Climate Science Center™

CSC Weekly News - 9/27/16

## Community Event

Join us for our community event "Think Global, Act Local: Get Your Green Up" on October 16th from 2-4PM at the Museum of Texas Tech University. The CSC is partnering with the Museum of Texas Tech to host an event highlighting over 15 local organizations for sustainable living. The event will feature a presentation by Katharine Hayhoe and interactive displays from the organizations. The organizations will be highlighting information on water, renewable energy, recycling, lighting, wildlife, and more. This event is in conjunction with the Museum's new exhibit *Green Revolution*, open until January 15, 2017. After visiting the booths, the audience is encouraged to visit this exhibit. This version of *Green Revolution* is based on an exhibition originally created by the Museum of Science and Industry, Chicago, and its Black Creativity Council, and is made available by the Smithsonian Institution Traveling Exhibition Service. ## Video of the Week

Gardening in West Texas is becoming more difficult each year because of the long, hot, dry temperatures that are occurring more often because of climate change. Debbie Zak discusses how her plants are becoming more sensitive to climate change; the effects of climate change are making the plants harder to maintain and keep alive. This video is a part of our [Climate Witness](#) series. [WATCH NOW](#)
