DMFR Welcomes Anurag Sharma

Anurag joins DMFR as a Programmer Analyst III. He will be working with the Analytics and Data Management Team. His role with them will be developing Cognos reports and Database Programming.

After completing his Bachelor's degree, Anurag began his career as a Data Engineer. He has over 4 years experience in data-centric roles. He has worked with data scraping, feature engineering, and machine learning for solar and wind power forecast, and visualization for business intelligence solutions based on data analysis. Anurag received his Master's degree in Data Science from Rawls College of Business in 2020.

In his spare time, Anurag enjoys a good game of cricket and has recently developed an autonomous stock trading bot that is based on algorithmic trading. We welcome Anurag to TTU and our team.

Changes Are Coming to the DMFR Newsletter

We are excited to announce that the DMFR Newsletter is going to be given a facelift. One of the many changes that we are making is the delivery date. Instead of a monthly edition, we will be releasing a quarterly edition to be published the end of September, December, March and June. It will be published via TechAnnounce as you are accustomed to. Be watching in September for the new version.

DMFR Provides Flexible Training Options

To best serve the learning needs of campus, DMFR is making changes to their class offerings. Starting July 1 and going forward you will be able to enroll in In- Person Training or Virtual Training. Feel free to choose any class that fits your availability and/or learning methodology. Details for each are below:

Face-to-face training will be held in Doak Training Center. These sessions will be offered the *first two weeks of each month* for those who learn best in this environment. Some things to consider with this training:

- Parking is not available at Doak for the trainees
- Texas Tech Courtesy Shuttle is not operating and won't be available to transport the learner from their office to Doak Training Center and back
- Learner will need to be prepared to walk across campus to attend sessions
- Learner may wear face masks if desired, but is not required

Virtual Training sessions are provided via Microsoft Teams . These sessions will be offered the *final 2 weeks of each month*. This is the type of training that we have provided during the past year.

- Learner needs access to computer with microphone
- Learner needs to have Microsoft Teams installed

Enrollment remains through the [Cornerstone](#) system. In the session details it is indicated if the class is offered via Microsoft Teams or if an in-person session at Doak Training Center.

Report of the Month: FI137—Open Encumbrance Report

Have you reviewed your open encumbrances recently? Managing encumbrance is an essential function of sound financial management. This report is used to assist with that and should be executed monthly. This allows review of open encumbrances and determination of what action needs to be taken, if any.

The required Parameters, Chart of Accounts, Beginning and Ending Fiscal Year are pre-populated. You may enter:

- **Vendor R#** to view open purchase orders by vendor.
- **Doc Reference Number** to view open Travel Applications, use trip number from application submission.
- **Encumbrance Number** is where you enter a purchase order.
- **The Termination Date** parameter supports viewing purchase orders that we open when a grant ended.
- **Encumbrance Number** supports a purchase order.
- You may choose **Fund Class(es)**.
- You may enter **Fund Code(s)**.
- You may enter **Organization Code(s)**.

The most common parameter combination is to search by Fund and Organization Codes combined or to simply search

The report output for the FI137-Open Encumbrance Report is shown below. This is all open encumbrances based on the parameters entered.

- **Encumbrance Number** identifies the purchase order that is open.
- **Established Date** is the date the purchase order was created.
- **Fiscal Year** is the Fiscal Year the report was executed for. Purchase orders roll forward to the current fiscal year.
- **Vendor Name** is the vendor associated with the purchase. It will be blank if the purchase order rolled forward from the previous year. That is a clue that you need to research it.
- **Original Encumbrance** shows the amount that was encumbered when the purchase order was established.
- **Adj. and Liquidations** shows the funds released to support payment or reduction of encumbrance.
- **Remaining Balance** shows the balance still encumbered to support the open purchase order.
- **Fund, Organization, Account and Program** Codes are to the right of the Remaining Balance. This is the FOP with Account Code that is encumbered/

It is good to review all open purchase orders. Note the ones highlighted in yellow below. Three were established in 2016 and 2018. The one dated 10/15/20 could be reviewed as it appears to be a back order or cancelled order.

It is the responsibility of the department to request closure of any encumbrance that has a remaining balance of \$25 or more. This request is completed using the Encumbrance Release System. Reasons that an encumbrance would be closed include cancellation of a back-order, a speaker not fulfilling their obligation, a scheduled trip being cancelled, as well as other reasons.

Directions for using the Encumbrance Release System can be found at:

<https://www.depts.ttu.edu/procurement/resources/training-and-work-aids/documents/purchasing/purchasing-info/Encumbrance-Release-System-Training-Manual.pdf>. Review section titled Submitting an encumbrance close/decrease request.
