

Biological Risk Assessment Worksheet

Tracking # _____ Building/Lab Room # _____ PI Name _____

Laboratory protocols consist of one or more procedures. Each procedure in the protocol needs an agent-specific Biological Risk Assessment. Once an agent-specific Biological Risk Assessment has been completed for the procedure, it can be used for multiple protocols by referencing its tracking number. The procedure may be performed with additional precautions, if desired, but must be no less stringent than what is calculated below at Section II.

Keep a completed copy of this worksheet in your Biosafety Manual. The *Biosafety in Microbiological and Biological Laboratories* (BMBL) 5th Edition has additional guidance on facilities, work practices, PPE, and medical surveillance.

Section I: Complete All Data Entry in this Section

1. Agent Used _____
2. Is a vaccine available? Yes No
3. Risk Group of Agent (check www.absa.org) 1 2 3 4 {Inactivated agents = Risk Group 1}
4. Procedure _____
5. For Risk Group 2-3, is there a splash potential? Yes No
6. For Risk Group 2-3, does the procedure generate aerosol or large concentration? Yes No
(e.g., cell culture, vortex, centrifuge, aerosol chamber, sonicate)

Section II: Data will be calculated in this Section according to the answers entered above in Section I

1. Facility and Work Practices Biological Safety Levels (BSLs)
Facility BSL 1 2 3 4 Work Practices BSL 1 2 3 4
2. Biological Safety Cabinet Class I/II Class III
3. Personal Protective Equipment Needed for Procedure: (left to right = increased protection)
 - a. Gloves latex/nitrile required
 - b. Eye safety glasses goggles + face shield
 - c. Lab coat white blue smock/coveralls space suit
 - d. Respirator* N-95/PAPR space suit
4. Medical Protection and Surveillance
 - a. Medical Monitoring required
 - b. Hearing Conservation Program
 - c. Vaccine recommended*
 - d. Respiratory Protection Program
5. Comments _____

Note: *Vaccines and respirators require separate risk assessments.
