

## How do I change a Discussion Forum to read-only access for my students?

### How to Make a Discussion Forum Read-Only

Once a discussion is complete, the instructor can change the forum into read-only, allowing students to go back into a forum and read the posts, but not be able to make changes or add a post to the forum.

1. Open the Discussion Board.
2. Click on the drop-down menu for the Discussion Forum you want to be read-only.
3. Select **Manage** from the drop-down menu.

4. Place a check next to each of the Forum Users.
5. Click on the **Edit Role** button and select **Reader**.

### Manage Forum Users

*Edit a course member's forum role by selecting a new role in the forum role select menu.*
