How do I get this semester's live shell?

All semester-based Live Shells are automatically pushed to Blackboard.

There is no longer a need to request your live shells. The schedule for the live shell push is as follows:

- Fall – First Monday of July
- Spring – First Monday of November
- Summer – First Monday of April

The Live Shell is connected to Banner and will auto-populate your course with all registered students. After the Live Shell is created, you will have the option to copy the content from an existing Development Shell or another existing Live Shell into the new semester's Live Shell.
