

Architecture, M.S.: Historic Preservation and Design Concentration

Texas Tech College of Architecture is proud to announce a new Master of Science degree in Architecture specializing in Historic Preservation and Design. This degree is a researched-based academic degree for students interested in advanced architectural studies, who want to enter the Historic Preservation field. This is considered a terminal degree for the architectural preservation professional discipline. This degree does not prepare students to receive architectural licensure. This degree is an option for students with an accredited professional B.Arch or M.Arch degree, or an approved bachelor's degree in architecture or in a related discipline (e.g., art, interior design, engineering, archaeology). Students who have non-architecture degrees and wish to enter the program may be required to complete leveling work that will not accrue graduate credit toward their degree.

APPLY for Fall 2020
Deadline – February 1, 2020
*Apply as soon as possible
for earlier acceptance and
scholarship opportunities.
Visit ARCH.TTU.EDU to
apply.*

The program is located in an active train station, the Union Depot in downtown El Paso, TX, designed by architect Daniel Burnham in 1906.
