The 2018
Texas Tech University
Comparative Literature Symposium

Comparative Literature at Texas Tech University
Celebrating 50 Years!
1968 – 2018

April 6-7, 2018
The Program in Comparative Literature at Texas Tech University has had a long history and a rich tradition. Starting in the late 1960s, with a few faculty members from different humanities disciplines meeting and exchanging their interests in comparative studies, the program has grown and evolved into one that encompasses both undergraduate minors and graduate specializations. It supports both Western and Third World studies, as well as organizes an annual symposium attracting scholars from across the region, the nation, and the globe.

CompLit Symposium 2018: Human Rights Now

Anti-apartheid activist, Bishop Desmond Tutu, explained the African concept of “Ubuntu” in this way: “My humanity is caught up, is inextricably bound up, in what is yours.” If connection is a way of being human, our actions impact others - human, animal, nature - and return to us in ways we cannot predict. The 50th Annual Texas Tech University Comparative Literature Symposium on April 6-7, 2018 explores the interconnectedness of humanity, humaneness, and human rights through texts, contexts, and comparisons.

The moral and legal claims of people caught in situations of civil and military conflict, natural calamities, climate change, medical crises, governmental repression, and the vagaries of international finance on local economies, have long been the subject of literature. Claims for fairness, respect, and human dignity have been expressed in many forms and genres, including agitational propaganda theatre, performance poetry, the revisionary bildungsroman, narco-, petro and climate fiction, war narratives, prison writing, and the testimonio.

Human rights in its moral, political, social, and literary ramifications has been mired in debate. The generic variety of literature on the topic is matched by varying emphases in its theorizations. Early theories outlined the political conception of human rights in contemporary international practice. Amartya Sen and Martha Nussbaum delineate the “capabilities” approach, which focuses on the availability of opportunities, freedoms, abilities, and material factors responsible for human welfare and achievements. Another strand of scholarship based in the work of feminist philosophers has shown the racial and gender assumptions in the concept of the human and called for a critical evaluation of rights claims from these perspectives. For some the concept universalizes the “human” in Eurocentric terms to re-enact, the “coloniality of power.” Often nation-states grossly violate human rights under the pretext of national security imperatives disregarding international protocols and accepted understandings of the dignity, value, and worth of human life. The symposium seeks to understand whether dignity and worth are categorical rather than relative and contextualized imperatives to account for the contested terrain of human rights now.
