Literature Review (expected for all options) Student provides a concise, well-organized and integrated review of Relevant literature* Student adequately evaluates existing literature* Student addresses strengths and limitations of existing literature* Student discusses theoretical and methodological approaches used in existing literature* Purpose of review is clearly stated* For Research Report only Research questions/hypotheses are clearly stated* Student is able to accurately describe research methodology, including procedures, materials, sample size, and participant characteristics* Student is able to describe analytical procedures				+
Student provides a concise, well-organized and integrated review of Relevant literature* Student adequately evaluates existing literature* Student addresses strengths and limitations of existing literature* Student discusses theoretical and methodological approaches used in existing literature* Purpose of review is clearly stated* For Research Report only Research questions/hypotheses are clearly stated* Student is able to accurately describe research methodology, including procedures, materials, sample size, and participant characteristics* Student is able to describe analytical procedures	Scope of student's work is appro	priate for a comprehensive exam [*]		
Student provides a concise, well-organized and integrated review of Relevant literature* Student adequately evaluates existing literature* Student addresses strengths and limitations of existing literature* Student discusses theoretical and methodological approaches used in existing literature* Purpose of review is clearly stated* For Research Report only Research questions/hypotheses are clearly stated* Student is able to accurately describe research methodology, including procedures, materials, sample size, and participant characteristics* Student is able to describe analytical procedures	Literature Paview (expected for	ar all antions)		
Relevant literature* Student adequately evaluates existing literature* Student addresses strengths and limitations of existing literature* Student discusses theoretical and methodological approaches used in existing literature* Purpose of review is clearly stated* For Research Report only Research questions/hypotheses are clearly stated* Student is able to accurately describe research methodology, including procedures, materials, sample size, and participant characteristics* Student is able to describe analytical procedures				
Student addresses strengths and limitations of existing literature* Student discusses theoretical and methodological approaches used in existing literature* Purpose of review is clearly stated* For Research Report only Research questions/hypotheses are clearly stated* Student is able to accurately describe research methodology, including procedures, materials, sample size, and participant characteristics* Student is able to describe analytical procedures		organized and integrated review or		
Student discusses theoretical and methodological approaches used in existing literature* Purpose of review is clearly stated* For Research Report only Research questions/hypotheses are clearly stated* Student is able to accurately describe research methodology, including procedures, materials, sample size, and participant characteristics* Student is able to describe analytical procedures	Student adequately evaluates ex	kisting literature*		
Purpose of review is clearly stated* For Research Report only Research questions/hypotheses are clearly stated* Student is able to accurately describe research methodology, including procedures, materials, sample size, and participant characteristics* Student is able to describe analytical procedures	Student addresses strengths and	d limitations of existing literature*		
For Research Report only Research questions/hypotheses are clearly stated* Student is able to accurately describe research methodology, including procedures, materials, sample size, and participant characteristics* Student is able to describe analytical procedures		d methodological approaches used	in existing	
Research questions/hypotheses are clearly stated* Student is able to accurately describe research methodology, including procedures, materials, sample size, and participant characteristics* Student is able to describe analytical procedures	Purpose of review is clearly state	ed*		
Research questions/hypotheses are clearly stated* Student is able to accurately describe research methodology, including procedures, materials, sample size, and participant characteristics* Student is able to describe analytical procedures				
Student is able to accurately describe research methodology, including procedures, materials, sample size, and participant characteristics* Student is able to describe analytical procedures				
procedures, materials, sample size, and participant characteristics* Student is able to describe analytical procedures	Research questions/hypotheses	are clearly stated*		
procedures, materials, sample size, and participant characteristics* Student is able to describe analytical procedures	Student is able to accurately des	scribe research methodology, includi	ing	
Student provides accurate description of research findings	Student is able to describe analy	rtical procedures		
	Student provides accurate descr	iption of research findings		
Conclusions align with results of research	Conclusions align with results of	research		

Student is able to identify limitations of their research*

Document				
Student adheres to guidelin (7 th edition)	es set forth by	APA Publication Manual		
Document is well organized correct manner	d, written in cle	ar, concise, and grammatically		
Oral Presentation				
Student clearly communica	ted purpose of	project*		
Student is able to summari	ze and commu	nicate findings and conclusions*		
Student places their project	in the context	of existing research		
Professionalism				
	tery of relevan	t literature and research study (if a	applicable)*	
Student is able to adequate	ely answer que	stions in a thoughtful and scholarl	y manner	
Student conducts themselv	es in a profess	sional manner*		
or research report and 13 out of ES in order to meet expected	of 15 (87%) for li	ed to be marked 'Yes' to have the comterature review approval. Items desigency. ed level of competency for the thesis	nated with a * mus	approved t be marked
