

TEXAS TECH UNIVERSITY
College of Human Sciences

Department of Nutritional Sciences™

Open Rank - Basic Science **Faculty Position**

Application Due: Review of applications will begin on February 1, 2021

Type: Nine-month, Tenure-track

Position Availability: September 1, 2021 or negotiable

Salary: Competitive and commensurate with qualifications

Position Description:

The Department of Nutritional Sciences (NS) seeks an energetic faculty member with demonstrated research excellence in the area of Basic Science to join a growing department with 17 full-time faculty. The successful applicant will contribute to the university's mission through teaching, research, and service by serving as a faculty member in our accredited graduate programs that include approximately 144 students in doctoral and master's degrees and dietetic internship. NS faculty also have the opportunity to teach in the growing undergraduate programs of 681 students, which includes an accredited didactic program in dietetics, and mentor undergraduate research.

Responsibilities:

- Teach undergraduate and graduate courses, face to face and/or online.
- Mentor undergraduate, MS and PhD students and assist in recruitment of graduate students.
- Develop and maintain a high impact scholarly research program in basic science, via peer-reviewed publications and external funding, commensurate with rank.
- Be able to work in multidisciplinary research teams.
- Engage in outreach activities and perform service to the department, college, university, and the profession through involvement and leadership in national and or international professional associations.

Required Qualifications:

- An earned doctorate, such as PhD, in nutrition, biochemistry, biomedical sciences or related disciplines.
- Potential for or experience in teaching as demonstrated by previous TA experience, conference presentations, or other related evidence.

- Demonstrated potential (commensurate with current position title) to secure extramural research grants and to engage in externally funded collaborative research projects across the college and university, and with local/regional and national partners including government, corporate, and philanthropic funding agencies.
- Strong written and verbal communication skills.
- Ability to interact successfully and work harmoniously with colleagues and students in a diverse community.

Preferred Qualifications:

- Postdoctoral or equivalent research experience.
- Research experience in obesity, diabetes, cancer, epigenetics, microbiome, liver and muscle metabolism and/or other nutrition science-related areas.
- Experience working with diverse student populations and first-generation students is highly desirable.
- Evidence or potential for training/mentoring graduate and undergraduate students.

Environment

This is a unique opportunity to join a newly formed and expanding department that is committed to educating future leaders in nutritional sciences, and promoting basic, translational, clinical, and community research and teaching excellence. We offer several infrastructure and collaborative resources within the department and College of Human Sciences (COHS) and the Texas Tech System:

- The Department of Nutritional Sciences, in the COHS, has several faculty with strong basic, clinical/translational and community research programs focusing on obesity and co-morbid conditions such as diabetes, cancer, clinical nutrition, nutritional biochemistry, nano-nutrition, adipocyte biology, food insecurity, and community-level interventions. <http://www.depts.ttu.edu/hs/ns/>
- The Department of Nutritional sciences houses state of the art instrumentation for cell, molecular and animal research including rodent Echo-MRI, metabolic cages, LC-MS, Agilent Seahorse analyzer, PCR instrumentation, scintillation counter, fluorescent microscopes, flow cytometer, plate readers, multiplex analyzer, and gel/membrane imagers
- Our newly formed Nutrition & Metabolic Health Initiative (NMHI) is focused on expanding our clinical research facilities and faculty to support our mission to become a nationally recognized clinical research institution.
- Texas Tech University houses several core facilities related to basic science research including the Center for Biotechnology and Genomics (CBG), which is a highly collaborative core facility with state of the art instrumentation for genomics, metabolomics and proteomics research. More information can be found at this link: <http://www.depts.ttu.edu/biotechnologyandgenomics/>. The College of Arts & Sciences Microscopy Center (CASM) houses state of the art TEM, SEM, confocal microscope, flow cytometer and cell sorter.
- The TTU Obesity Research Institute at Texas Tech University (ORI; <http://www.depts.ttu.edu/research/obesityresearch/>) is a TTU-wide interdisciplinary institute in the Office of Research and Innovation (ORI). The ORI serves as

a central collaborative platform for researcher working broadly in obesity-related chronic diseases. ORI members come from across the TTU System, primarily various departments and units at TTU including the new school of veterinary medicine, the Texas Tech Health Sciences (TTUHSC_ Schools of Medicine, Nursing and Biomedical Sciences in Lubbock and Permian Basin as well as some faculty from the Diabetes Center at TTUHSC EL Paso).

- The Texas Tech University Health Sciences Center offers a wide range of collaborative opportunities in health sciences <https://www.ttuhscc.edu/research/default.aspx>

About Texas Tech University

Focused on advancing higher education, health care, research and outreach, the Texas Tech University System is taking a leading role in meeting the global challenges of today and the future. Our component institutions –Texas Tech University, Texas Tech University Health Sciences Center, Texas Tech School of Law, Angelo State University and Texas Tech University Health Sciences Center El Paso are impacting the lives of individuals, not only in West Texas, but across the entire state, country and the world.

Lubbock, Texas is a vibrant community of over 295,000, located in the southern portion of the Texas panhandle. The community's main businesses are agriculture, education, and medicine. Lubbock is a major medical hub with University Medical Center housing a Level 1 Trauma Center as well as the Texas Tech School of Medicine.

All employees are expected to exhibit and convey good citizenship within the program, the department, college, university activities, collegial interactions, and maintain the highest standards of integrity and ethical behavior.

Please apply online at <http://www.depts.ttu.edu/hr/workattexastech/> using requisition number 22422BR.

As an Equal Employment Opportunity/Affirmative Action employer, Texas Tech University is dedicated to the goal of building a culturally diverse faculty committed to teaching and working in a multicultural environment. We actively encourage applications from all those who can contribute, through their research, teaching, and/or service, to the diversity, equity and inclusion, and excellence of the academic community at Texas Tech University. The university welcomes applications from minorities, women, veterans, persons with disabilities, and dual-career couples.
