

Associate Wealth Advisor

The Associate Wealth Advisor is a unique opportunity to collaborate with a growing firm with unique professional expertise to accomplish client goals. The individual will join the team to manage client relationships and actively participate in the advanced financial planning process to address retirement, risk management, estate, and tax considerations. In addition, this individual will coordinate with the portfolio management team to manage cash, place trades, rebalance portfolios and implement investment strategy on behalf of the advisory team's clients. Further, this individual will experience direct mentorship from firm leadership, and receive support, encouragement, and guidance in personal professional development pursuits.

Essential Duties and Responsibilities

- Develops a mastery of financial planning best practices and evidence-based investing, as implemented by Peirce Capital Management
- Creates a personalized Investment Policy Statement and holistic strategy for each client
- Facilitates the consulting process through the preparation and follow-up of each step of the client experience and active participation in client meetings
- Monitors the clients' asset allocation, rebalancing of portfolios, trade recommendations and submissions
- Recommends and executes tax loss harvesting
- Diligently records client communication
- Organizes input and analyzes output for wealth analyses (Monte Carlo)
- Serves day-to-day client needs and collaborates with team members to ensure the highest level of service

Additional Responsibilities

- Manages client onboarding process
- Develops areas of expertise on firm processes and/or advanced planning topics to add value to the firm
- Engages in business planning efforts and actively supports firm's strategic priorities
- Analyzes processes and procedures to identify improvements or efficiencies that can be created

Desired Skills and/or Work Experience

- College degree in financial planning, accounting, finance, or other comparable area of study
- 2+ years of successful client facing fee-only experience, or as an accountant, estate planning attorney or in another comparable profession
- Series 65 within 90 days of employment

Other Qualifications:

- Team player and collaborative; uses the resources of the firm
- Well-developed interpersonal and communication skills – able to build trusted relationships
- High personal standards and sound judgement
- Ability to think critically and to process complex financial scenarios
- Strong attention to detail and accuracy
- Strong time management skills – ability to multi-task and manage deadlines
- Open and receptive to feedback and coaching

Peirce Capital Management is a growing firm of advisors devoted to helping clients achieve their most important goals. An independent Registered Investment Advisor (RIA), Peirce Capital Management was established in 2007. The motivation to create PCM was to bring the power of academically based investing to investors who will not see those benefits through the traditional brokerage investing model. The gap in value between the two approaches was material enough to drive Wes (founder) to this service focused model.

With an aggressive focus on client service and expertise in financial planning, our firm now services more than 70 individuals and families while managing or advising on more than \$170 million in assets (as of 11/30/2016). We strive to complete meaningful, intentional, and careful work in a relaxed and flexible work environment. If this resonates with you, we invite you to learn more.
