

## **Animal Training Record**

## **Background:**

Animal use regulatory bodies (AWA Section 2.32(a-b), PHS Policy Section IV.C.1.f, ILAR Guide, Ag Guide) require that animal care personnel and research teams have the necessary knowledge and expertise to use the species and specific procedures in the approved IACUC protocols. It is required that personnel receive training or have the experience to complete the tasks in which they are responsible. This training must also be documented, and the institution is required to ensure all personnel conducting research, teaching or demonstration involving animals are qualified to perform their duties.
