TEXAS TECH UNIVERSITY

COLLEGE OF VISUAL AND PERFORMING ARTS

A Report to the Texas Tech University Board of Regents

November 15, 2002

COLLEGE OF VISUAL AND PERFORMING ARTS

A Report to the Texas Tech University Board of Regents

*Prepared by Garry W. Owens, Dean
November 15, 2002*

1) History of the CVPA

- The stimulus behind the creation of a new College of Visual and Performing Arts at Texas Tech University resides in the *interdisciplinary roots of our Ph.D. in Fine Arts* program. Embracing core study in all three of the arts disciplines—music, theater/dance and art—coupled with the opportunity for in-depth study in one's specialty, the thirty-year-old doctoral program in the fine arts has yielded an environment that has enhanced the connections inherent in our artistic and intellectual relationship.

2) Frequently asked questions:

- *What are we?*

Schools of Art and Music; Department of Theatre and Dance (each with new, talented and experienced administrators (*Art*—J. Don Wink [Stephen F. Austin]; *Music*—Nancy Cochran [UMKC]; *Theatre and Dance*—Fred Christoffel [TTU]); formerly in the College of Arts and Sciences (three of 22 units); nearly 100 faculty, over 1000 majors, countless students in core courses, performance organizations, and ensembles, etc.; we support an increased *focus* for the voice of the arts programs—at Tech, in the community, state, nationally, and internationally;

- *How did we get started?*

Beginning late last fall and continuing throughout the spring semester, an *Implementation Team* met to consider all aspects surrounding the founding of the new college. Members of the *Implementation Team* were *Fred Christoffel* [Theatre and Dance], *Robert Henry* [Music], *Mary Jane Hurst* [A&S liaison], *Jonathan Marks* [Theatre and Dance], *Terry Morrow* [Art], *Garry Owens* [Dean designate], *Brian Steele* [Art], and *Michael Stoune* [Music]. To each of these individuals, we owe an enormous debt of gratitude for their careful and diligent work. Without question, the new college got off to a textbook start owing primarily to the efforts of these dedicated colleagues.

- *Who are our new staff members?*

Our new staff includes associate deans *Robert Henry* (music) and *Brian Steele* (art); college development officer, *Anna McGregor*; marketing and public relations director, *Cathy Jung*; manager of finance and administration, *Mike Smith*; academic program advisor, *Kathy Nordstrom*; webmaster, *Kyle Alexander*; administrative assistant, *Beth Scheckel*; development associate, *Marilyn Arland*; and, *Steven Paxton*, coordinator of interdisciplinary activities.

- *Why “College of Visual and Performing Arts”?*

A *college* because we combine three academic units within a new administrative structure led by a dean

Visual because our School of Art deals with many kinds of instructional programs (design communication, art history, art education, 2- and 3-D),

all of which can be characterized by the word *visual* (rather than *fine* arts, which deals more specifically with 2- and 3-D elements—painting, sculpture, etc.)

Performing because this word can link easily the elements of music and theatre

- *Where are we located?*

On the second/third floor of the Administration Building (224—administrative offices; 222—Dean's Office; 220—undergraduate office, associate dean Henry and staff members; 301—graduate office, associate dean Steele and staff members)

- *What are our goals?*

MISSION STATEMENT

The College of Visual and Performing Arts is committed to providing an engaging and challenging environment that promotes the highest standards of excellence in art, music, theatre and dance.

VISION STATEMENT

The College of Visual and Performing Arts will be a leader in linking the elements of arts education, research, performance, creativity, and technology.

We support fully our unit and college *Strategic Plans* in these university-wide goal areas:

Access and Diversity, Academic Excellence, Engagement, Technology, Partnerships, Human Resources and Infrastructure, Tradition and Pride, and Financial Stability

These are some of our priorities, the goal areas that each addresses, and some related areas of accountability:

- Scholarships:** We operate in a highly competitive market for the brightest and best arts students. (Access and Diversity, Academic Excellence, Partnerships, Financial Stability—*recruiting, retaining, graduating*)
- Facilities:** We envision, in the not-too-distant future, a new performing arts center and academic building. (All eight goal areas covered--Access and Diversity, Academic Excellence, Engagement, Partnerships, Technology, Human Resources and Infrastructure, Tradition and Pride, Financial Stability—*accreditation, growth, quality*)
- Recruiting and retention:** (Access and Diversity—*faculty, staff, and students*)
- Board of Advisors:** (Partnerships, Financial stability, Engagement—e.g., "Dean's Circle"—*advice, accountability*)
- Faculty and student initiatives:** (Human Resources, Academic Excellence, Tradition and Pride, Partnerships—*regional, national, international reputation*)
- Curriculum:** (Academic Excellence—*development, enhancement of academic programs*)
- Professorships:** (Human Resources, Academic Excellence, Partnerships—*enhancement of programs*)
- Quality of cultural life:** (Engagement, Partnerships—*enhancing locally, regionally*)

3) Since we became a college this fall:

- Our *incoming freshman class* of visual and performing arts majors achieved an average SAT score of 1133, third among all colleges on campus (closely behind architecture and engineering).
- All of the college's programs have evidenced *growth* over the past five years and are preparing for increased numbers of students projected for Texas Tech over the new few years.
- Of the ten students nominated by the college for "*Who's Who*" awards, a campus committee selected all ten for this prestigious distinction.
- We received *our first scholarship endowment* from L. Edwin and Ruth Smith of Lubbock, a *\$20,000 gift* honoring their daughter, Jennifer Smith, a 1978 Texas Tech theatre/dance graduate who is now performing in the cast of "The Producers" on Broadway.
- There is a strong likelihood that we will be awarded a *\$1 million grant* from a local foundation to complete the renovation budget for the School of Art's new 3-D facility (former Central Foods Building). Hopefully, this project will appear on the Board of Regents agenda in December.
- We have been awarded a *\$100,000 grant* from the Helen Jones Foundation to support a state-of-the-art recording operation in the School of Music's Hemmle Recital Hall.
- Among our distinguished performance alumni:
 - *Susan Graham*, Texas Tech *Distinguished Alumni Award* winner for 2001, has performed in major opera houses worldwide, and most recently presented a solo recital at the Santa Fe Opera House.
 - *Randy Cordray*, theatre and dance graduate, is now serving as executive producer for the new CBS comedy, "Still Standing." In the past, Mr. Cordray has worked on the production staffs of such situation comedies as "Coach," and "Dharma and Greg."
 - *David Kneupper*, music graduate, founded the Hollywood post-production sound firm, Soundelux. Later, after selling his interest in Soundelux, Dr. Kneupper has served several major Hollywood studios as a free-lance composer.
 - *Garrett Sorenson*, music alumnus, has begun his professional career as a member of the Metropolitan Opera House, New York City.
 - Alumni *Terry Cook* and *Bruce Ford* have performed operatic roles throughout the world.
 - Theatre and dance graduate, *Hudson Hickman*, is executive vice-president for television at MGM studios in Hollywood.
 - *Jennifer Smith*, theatre and dance graduate, is featured in the company for the highly acclaimed Mel Brooks Broadway musical, "The Producers."
- Professor *Paul Sharpe* (music), double bass, was invited to perform and lecture at the Sixth Annual Double Bass Symposium in Brazil.
- Paul Whitfield Horn Professor, *Dr. Mary Jeanne van Appledorn* (music), has been awarded her 23rd consecutive Standard Panel Award from the American Society of Composers, Authors, and Publishers (ASCAP).
- Professor *Peggy Willis-Aarnio* (theatre and dance) had her book, *Agrippina Vagnova: Her place in the history of ballet and her impact on the future of modern dance* published by the Edwin Mellen Press of Lewiston, NY.

- Professor *Ken Dixon* (art) has recruited for the School of Art's Summer Research Program on the Junction campus. Over 1,100 Texas art teachers attended these sessions.
- Professor *Gerald Dolter* (music) has worked with Robert Hickerson and Valerie Paton to bring summer music theatre opportunities to the Fredericksburg campus.
- Professor *Lynwood Kreneck* (art) has been invited to present a special printmaking show to open in January 2003 at the Masereel Center in Kasterlee, Belgium.
- The newly enacted *Cultural Activities Fee* has enriched the college and its academic units in significant ways.
- The *college* and the *School of Art* joined with units in the College of Arts and Sciences, the International Cultural Center, and Latin American and Iberian Studies program to offer "Religious Art: From the Old World to the New," a symposium featuring three nationally prominent specialists in medieval art and architecture, art history, and anthropology presented in conjunction with the international exhibition of medieval paintings, "Frescoes from the Vatican" at the TTU Museum.
- The *Fine Arts Doctoral Program* has been embraced within the new college's administrative structure. In its thirty-plus years of existence, this program has awarded over 200 Ph.D. degrees.
- *Leslie Dutton*, a music student in the *Fine Arts Doctoral Program* organized a symposium focused upon a poet of the 19th-century and entitled "Bécquer Symposium: Merging Poetry and Music," which featured nationally prominent composers and specialists in poetic literature.
- Through the CVPA offices of development and marketing, the college is developing a media "*image*" package consistent with TTU guidelines.
- With the addition of the new Cultural Activities Fee, we have seen a *dramatic increase* in the number of Tech students attending our fall performances.
- We are in the process of establishing our college board of advisors, the "*Dean's Circle*," who will begin work during the first quarter of 2003.
- In March 2003, our School of Music major organizations will present a *Scholarship Gala Concert* at the world-renowned Meyerson Symphony Center in Dallas. Featured performer on this concert will be School of Music alumnus, *David Gaschen*, now appearing on Broadway as the Phantom in "Phantom of the Opera." Through this performance, we hope to generate between \$25,000-\$50,000 for music scholarships. Furthermore, we hope that this performance will signal the beginning of similar events in other metropolitan areas of Texas.
- Also in March 2003, we will celebrate the *grand opening of the college* with a scholarship gala for art, music, and theatre/dance students. Featured in this black tie optional affair will be theatre and dance alum, *Barry Corbin* (most recently appearing in the television series "Northern Exposure," along with many other feature films), who will serve as master of ceremonies. On the program will be a dinner accompanied by a potpourri of student performances and exhibits, and ending with the annual presentation of the college's Distinguished Alumni Awards. From this gala, we expect to raise an additional \$10,000-\$20,000 in scholarships for our college students.

4) Questions?

President's Report
Texas Tech University
Board of Regents Meeting
November 15, 2002

Dr. Schmidly distributed a copy of the annual research report on The Institute of Environmental and Human Health to the board members. He noted that this has been a good year for research at Texas Tech. There was almost \$54 million and we have been able to move our monthly and total R and D up to number 82 in the country. We finally cracked the top 100 in terms of federal funds. Dr. Schmidly reflected back on how some of the changes occurred.

In 1996, we set out with a major mission to really improve Texas Tech as a research university. One of the things we did then was to start the Institute for Environmental and Human Health at Reese. The Reese Air Force Base was closed and we put that center together and created the Department of Environmental Toxicology. We recruited a sizeable team of people to come in and staff that activity. Dr. Schmidly provided an update on the institute and some of its accomplishments. The report illustrates what it takes to grow a research enterprise and what kind of return you can get on that investment. When we started that institute, we invested initially a little more than \$1.3 million in faculty salaries and staff. As a result of the base being closed, we were able to acquire some facilities out there. We renovated those facilities with grant funds. Where we are today is quite impressive. Vice President Sweazy just completed a major review of the institute. We now have 45 graduate students in the Department of Environmental Toxicology: 26 of which are Ph.D. students; 4 are MS students; and we have 5 that are joint with the School of Law. These students come to us from five different countries. The total awards for 2002 exceeded \$6.6 million and generated over \$1.5 million in facilities and administration costs. They have active grants of \$10.5 million and they have had in excess of \$26 million awarded to them since their inception. Equally important in the last five years, the core facilities out there have authored 155 peer review publications and made 272 presentations at various professional societies. What we did was make a strategic investment five or six years ago and now we have seen that strategic investment grow and leverage into something that has really helped grow Texas Tech's research enterprise and it has also helped grow our graduate enrollment. Those are two of the major strategies that we have for continuing to move the institution up the national ladder.

The main point of the report is as we continue to look for ways to strengthen Texas Tech in research and in graduate education, we are going to have to continue to look for opportunities to make investments like this. What we did here, was we targeted a niche area that none of the other major universities in

Texas had moved into—and that's this area of environmental and human health—and we have been able to exploit that and it has done a good job towards growing our research program. We are going to have other opportunities to do that and increasingly, those opportunities are going to be interdisciplinary.

So, as we think about how to best invest our resources in the future, our HEAF money, where we put faculty, etc. this ability to evaluate and make strategic decisions and invest in those areas will have a lot to do with our ability to continue to advance Texas Tech as a research institution and to move up the national academic ladder. That, of course, is one of our primary goals at the university. We want to move into this top 75 status. That is hard ground to gain because you are chasing a moving target. In order to chase that target you have to be very judicious and very strategic in terms of where you invest.

A copy of the President's newsletter was distributed to the board. Dr. Schmidly remarked that the newsletter talks about institutional faculty, staff and student achievements since the last board meeting.

President's Report
Texas Tech University Health Sciences Center
Board of Regents Meeting
November 15, 2002

Mr. Cavin noted that he wanted to begin his report by talking about one of his favorite subjects—students. The students are why we are here and he wanted to discuss the education of those students to be the health care professionals at the Health Sciences Center for tomorrow.

At the last meeting of the board, Mr. Cavin mentioned that we anticipated record enrollment at the Health Sciences Center this fall. On the twentieth class day, which is accounting day, when we closed our books we, in turn, did have a record enrollment. We had an enrollment increase of 10.3%. During the fall a year ago, we had an enrollment of 1,788 students. This increased to 1,972 this current fall.

Probably even better than that, we had an increase in our semester credit hour production. That is what is important because that drives funding. Actually, semester credit hour production increased by 15.87%. Even though head counts only increased by 10.3%.

As far as diversity issues with those students, Mr. Cavin noted that between men and women that we had an exact 10.3% increase in each category. So, that very much is a mirror image of the overall increase of the student body at the Health Sciences Center.

As far as African American enrollment in that 10.3%, our African American enrollment increased by 40.5%. Hispanic enrollment increased by 20.3%. American Indian enrollment increased by 70%. So, we are very proud of those numbers. He stated that he was not bragging because we still have quite a ways to go, but he noted that this does show progress on the part of the deans and their recruitment efforts as far as the student body is concerned.

You have heard this before, but the School of Pharmacy was once again recognized for a 100% pass rate. This is the only pharmacy school in the nation to do that three years running. What pressure, obviously, this puts on the current senior class set to graduate in May is intense.

We also had the opening of the Marie Hall Synergistic Center on October 22. Regent Nancy Jones participated in the opening ceremony. The Synergistic Center is located on the Health Sciences Center campus adjacent to the new classroom facility. It provides areas of relaxation such as weight rooms,

showers, an internet café and game rooms. This facility was made possible by the generosity of Dr. Marie Hall. She wanted to provide a place for students from different disciplines within the Health Sciences Center to come together as a health care delivery team. The facility has proven to be a favorite among the students.

Also, on October 7 we had the ribbon cutting of the School of Pharmacy in Dallas. The facility is located on the VA campus in South Oak Cliff. We have approximately 60 Pharm.D. students and about 15 residents at that location.

During the month of October, the School of Nursing was honored by the American Association of Colleges of Nursing for having the best geriatric curriculum in the nation. This speaks well for our nursing school as far as the design of this curriculum and it fits well with our mission as far as our association with the new Garrison Center.

At the last meeting of the board, Mr. Cavin discussed the PeopleFirst initiative at the Health Sciences Center. We continue to implement the StudentFirst initiative recommendations and with the board's permission, would like to schedule the chair of that committee to present a report on the initiative at the next meeting of the board.

There are three partnerships that need addressing today. One is a licensing agreement with Global Distributing that has been entered into with Texas Tech. This is a new technology that has been developed by a Health Sciences Center researcher and a graduate student. The agreement will allow Global Distributing to market a technology while producing income for Texas Tech. The professor teaches in the department of Obstetrics and Gynecology at the Health Sciences Center and the graduate student is a student at Texas Tech University in the Department of Animal and Food Sciences. They have developed a new technology to improve artificial insemination in animals. This has both medicinal and agricultural uses.

The School of Nursing has also started a new program with support from the CH Foundation. The program is a senior house call project and it is designed to improve the situation for senior citizens so that they can receive more services at home in lieu of institutionalization. There are house calls for primary health care delivery as well as social services delivered through this effort.

Lastly, for the first time in Texas history, the first telepharmacy delivery was completed on September 18, 2002. This was a patient who was located in a clinic in Turkey, Texas. It was delivered via satellite communication back to the Lubbock campus, more than 100 miles away. Turkey was selected because it is a rural site and because there are no pharmacies in Turkey, Texas. This individual that was part of this initial consult is an individual who would have come to the clinic, received a prescription, driven a round trip of about 100 miles

to Childress, Texas to the pharmacy there at Walgreens. In this case, what happens through the telecommunications service, the prescription is still written by the physician at the clinic in Turkey. The prescription is filled by a pharmacist in Lubbock, prepackaged and sent to the clinic and then dispensed to the patient through the telecommunications with the pharmacist back in Lubbock. That was quite an innovative approach. This was first allowed because of legislation passed by this last session.

This concludes my report.

Chancellor's Report
Texas Tech University System
Board of Regents Meeting
November 15, 2002

Chancellor Smith noted that we are excited to have Mark Lindemood on board. The work that we are beginning already for this next campaign is exciting. We believe that we can accomplish similar feats that we did in the last campaign. The focus that we are going to have and we are going to be asking the board and our foundation and others for further advice is really going to be around that academic enterprise. We have been able to be very successful as you see in Facilities and other areas but we build those for a purpose and that is students. The board has said this—I remember Carin Barth back in August talking about the priorities related to scholarship. For us to be successful, whether it is in diversity in graduate studies and in retention, not just recruitment, but retention of students, we are going to have to make sure that our endowments are working for us in these areas. So, we are excited. We are beginning the planning phase for that. We are going to be looking at both the organizational situation, the structures that are in place, Richard is going to be working with Mark and the team that we have and, of course, both universities and the components that we have. I am excited about this. I think we can achieve the same goals that we did in the past and further our missions and build on the momentum that we have from the Horizon Campaign and Chancellor John Montford.

The second point I would like to make, and we do not get a chance to do this very often, is to congratulate the leadership of the board. The time that you spend, whether or not it is in investments, in giving us advice in a variety of areas is not acknowledged and I am also appreciative of the openness—the fact that we have been able to develop strong leadership teams in the area of problem-solving and opportunity seeking. That is commendable for us. It is good for this administration to get that kind of advice and particularly with the experience that all of you bring to the table. The fact that we always need to remember is that we need to keep you informed on where we are and where we are headed, making sure the board is involved in policy decisions—even though knotty policy decisions that we have from time to time—problem solving is part of your role along with establishing policy and direction and we appreciate that on behalf of the administration. It is also to ensure that you are more connected. Things such as last night where we had the opportunity to meet with Kate and Allison and Jeremy and Kelly and others gives us an opportunity to interface with our primary purpose which is embodied in your goals and, of course, the third one and that is people. Being able to listen and just the very advice that Regent Dr. Jones brought up about customer service in the area of student affairs, Bursar's office, Registrar's, and scholarships is such an example.

Finally, in summation, this continued interface is going to be critical as we head into an interesting legislative session. I won't put any other adjectives in front of that, but "interesting" is certainly one. I think we have opportunities. I think we should not undershoot—I heard that from Regent Black yesterday—that we need to continue to aspire and ask for what we need. This university needs a great deal to continue the momentum that Dr. Schmidly and Elmo Cavin have already cited to you today and what you have heard from others. We cannot be bashful in this session as we head into this legislative session. We need to ask for that, whether or not it is a four-year medical school in El Paso or the establishment of a water resource center or the ability for us to retain 100% of indirect costs if they will reimburse that. We cannot be bashful for others will not be in this state for certain.

Finally, of course, the most important thing this weekend as far as what many of us will be thinking about for at least a little bit is beating those Longhorns. I have watched the spirit of this football team and the players that we have had and their ability to continue to stick to it. I think it also speaks well for our student body of what they do in athletics, academics, research venues and service. So, most importantly, beat those Longhorns!

TEXAS TECH UNIVERSITY

Texas Tech is a state-assisted, multipurpose university of approximately 27,000 students enrolled in nine colleges—Agricultural Sciences and Natural Resources, Architecture, Arts and Sciences, Business Administration, Education, Engineering, Honors, Human Sciences, and Visual and Performing Arts. The School of Mass Communications is part of the College of Arts and Sciences; the School of Art and the School of Music are part of the College of Visual and Performing Arts. The Graduate School and the School of Law provide graduate and professional programs. The Texas Tech Health Sciences Center—a separate institution—shares the Lubbock campus with the University. The common-campus arrangement, with a law school, is unique among the state's higher education institutions.

As is necessary for an educational institution of its scope and purpose, Texas Tech operates in several locations. Beyond its 1,839-acre Lubbock campus—all in one tract—the University operates agricultural and biological facilities at the Texas Tech University Center at Amarillo, various research activities at the East Campus Research Center, and the Institute of Environmental and Human Health at Reese Center. Other agricultural research and teaching facilities are in Lubbock County. The Texas Tech University Center at Junction, in the Texas hill country, is a 411-acre unit including teaching, conference, and lodging facilities. There are Texas Tech University Centers in Amarillo, Abilene, Fredericksburg and Marble Falls. Texas Tech University Health Sciences Center is a multi-campus institution with Lubbock as the administrative center and regional campuses at Amarillo, El Paso and Odessa.

Paul Whitfield Horn, the first president of Texas Tech, drew from the broad open plains of West Texas his vision for the institution. "Let us make the work of our college fit into the scope of our country," he said. "Let our thoughts be big thoughts and broad thoughts. Let our thinking be in world-wide terms."

Horn's challenge to Texas Tech, now embarked on its seventy-ninth year, continues as a viable force. His insight is most evident as we—faculty and students, administrators and alumni, supporters and friends—strive to shape the University's programs and activities to meet the highest standards of excellence in teaching, research, and public service.

**ALMA MATER
"MATADOR SONG"**

Fight, Matadors, for Tech!
Songs of love we'll sing to thee.
Bear our banners far and wide,
Ever to be our pride.
Fearless champions ever be.
Stand on heights of victory.
Strive for honor evermore,
Long live the Matadors.

THE TEXAS TECH UNIVERSITY PRESIDENTIAL MACE

The Texas Tech University Presidential Mace is the symbolic staff of power and authority of the University. The mace is crowned by a flame symbolizing the Light of Knowledge. It is constructed of lathed and molded bronze that has been covered with a layer of 24K gold. The school crest is presented on either side directly under the flame. Hand-rubbed black walnut has been used for the connecting shafts.

The mace was designed by Robly A. Glover, an Associate Professor of Art at Texas Tech University. Mr. Glover's artwork is shown throughout the United States. His work has been included in the permanent collection of the Art Institute of Chicago, Chicago, Illinois.

MACE BEARERS

9:00 a.m.	Dr. Paul R. Goebel Professor College of Business Administration
1:30 p.m.	Dr. Dominick J. Casadonte, Jr. Associate Professor Department of Chemistry and Biochemistry College of Arts and Sciences

INTERNATIONAL FLAGS

From earliest times flags have served as symbols of ideals, aspirations and loyalties, representing in modern times national states and invoking sentiments of pride and patriotism. Every flag has its own tale, with the symbols and the colors having meaning for each nation. Texas Tech University has students from every state of the United States and from more than 100 other countries. It is with pride that the University displays the colors of those countries who have representatives among our students.

MASTER OF SCIENCE IN CHEMICAL ENGINEERING

Allen Everett Kaiser , Lubbock, Texas (In absentia) B.S., Texas Tech University, 1998 Thesis: "Wall Effects in Hard-Sphere Suspensions in Newtonian Fluids"	Chemical Engineering
---	----------------------

MASTER OF SCIENCE IN CIVIL ENGINEERING

Abdullah Ahmed Khalid Al-Homidy , Taiz, Yemen (In absentia) B.S., King Abdul Aziz University, 1989 M.Ed., Texas Tech University, 2001 non-thesis	Civil Engineering
Rawaa Al-Saadi , Damascus, Syrian Arab Republic B.S., National Chengchi University, 1998 Thesis: "Hyetograph Estimation for the State of Texas"	Civil Engineering

Jacob Kenyon Bice , Willis, Texas B.S., Texas Tech University, 2000 Thesis: "Direct Comparison Between Epoxy Coated Steel and Glass Fiber Reinforced Polymer Bars in a Concrete Highway Bridge Deck"	Civil Engineering
George Rudolph Herrmann , San Angelo, Texas B.S., Texas Tech University, 1988 Thesis: "Unit Hydrographs and Watershed Scale"	Civil Engineering
Shikha Jain , New Delhi, India B.S., University of Roorkee, 1997 Thesis: "Wind Effects on a Full-Scale Frame"	Civil Engineering
David White McLendon , Crockett, Texas B.A., Texas Tech University, 1999 Thesis: "Hydrologic Investigation of The NRCS Curve Number for Texas Watersheds Using Historical Records of Rain-Fall and Runoff"	Civil Engineering
Daniel Phil Rasband , Farmington, New Mexico (In absentia) B.S., Texas Tech University, 2000 non-thesis	Civil Engineering
Tony James Rector , Farmington, New Mexico B.S., Texas Tech University, 2001 Thesis: "Determination of the Fate and Behavior of an Alternative Surfactant in a Water Recycle System (WRS)"	Civil Engineering
Sanad Abdullah Sallam Shamsan , Taiz, Yemen B.S., University of Al-Mustansiriyah, 1997 M.Ed., Texas Tech University, 2001 Thesis: "Structural Analysis of Aboveground Storm Shelters"	Civil Engineering

MASTER OF SCIENCE IN ELECTRICAL ENGINEERING

Ryan Barrett Casey , Ft. Worth, Texas B.S., Texas Tech University, 2000 Thesis: "Efficient Realization of Biothogonal Fixed Point Cosine Modulated Filter Banks"	Electrical Engineering
Anilkumar Chandolu , Tenali, India B.S., Osmania University, 2000 Thesis: "Study of Thin Films Usings X-Rays"	Electrical Engineering
Bryan Lawrence Copeland , The Woodlands, Texas B.S., Texas Tech University, 2000 Thesis: "The Design and Implementation of an Automated Bench Test System"	Electrical Engineering
Vikash Daga , Lubbock, Texas (In absentia) B.S., University of Rajasthan, 1999 Thesis: "Analysis of Auditory Evoked Potential"	Electrical Engineering
Aiman Sedigh Etturki , Tripoly, Libya (In absentia) B.S., Al-Fateh University, 1994 Thesis: "Modeling and Control in the Hybrid Electric Vehicle"	Electrical Engineering
Nathan M. Frazier , Victoria, Texas (In absentia) B.S., Texas Tech University, 2000 Thesis: "Modeling Variations in Ring Oscillators with Respect to Parametric Process Parameters"	Electrical Engineering
Nilesh Mangal Kenkare , Mumbai, India B.S., University of Pune, 1999 Thesis: "Temperature Control and Measurement in Spike Anneal Process"	Electrical Engineering
Siddhartha S. Khoat , Mumbai, India (In absentia) B. of Engineering, University of Mumbai, 1997 Thesis: "Modular Approach to Performance Texting in Java"	Electrical Engineering
Roopesh Kumar , Bangalore, India B.S., Ramaiah Institute of Technology, 1999 M.S., Ramaiah Institute of Technology, 1999 Thesis: "Adaptive Wavelet Filter Design For Optimized Image Source Encoding"	Electrical Engineering
Deepa Thomas Mannath , Pune, India (In absentia) B.S., University of Pune, 2000 Thesis: "Study and Simulation of the Predictive Proportional Integral Controller in Comparison with Proportional Integral Derivative Controllers for a Two-Zone Heater System"	Electrical Engineering

Master of Science in Electrical Engineering (continued)

Sarath Babu Nallamudi, Anantapur, India
B.S., Jawaharlal Nehru Technological, 1999
Thesis: "Sixteen-Channel Temperature Controller"

Electrical Engineering

MASTER OF SCIENCE IN INDUSTRIAL ENGINEERING

Abhyuday Avinash Desai, Pune, India
(*In absentia*)
B.S., University of Pune, 1999
Thesis: "On Using Intelligent Scheduling for Multi-Criteria Optimization in a PC Assembly Shop"

Industrial Engineering

Sean Carter Dunagan, Carlsbad, New Mexico
(*In absentia*)
B.S., Texas Tech University, 2001
Thesis: "Inventory Model for Drug Dispensing Machines"

Industrial Engineering

Raghavendra Mohan Kulkarni, Hubli, Karnataka, India
(*In absentia*)
B.S., Karnataka University, 1999
non-thesis

Industrial Engineering

Khwaja Moïnuddin, Pondicherry, India
B.S., Pondicherry University, 2000
non-thesis

Industrial Engineering

Lohit Shastri, Hubli, India
B.S., Karnatak University, 1999
Thesis: "Development of Leather Based Body Armor Composite"

Industrial Engineering

MASTER OF SCIENCE IN MECHANICAL ENGINEERING

Emily Gene Hunt, Canyon, Texas
B.S., Texas Tech University, 2001
Thesis: "Laser Induced Surface Flow Visualization Technique Using Liquid Crystal Thermography"

Mechanical Engineering

Morshed Parvez Hillol Khandaker, Dhaka, Bangladesh
(*In absentia*)
B.S., Bangladesh University of Engineering, 1999
Thesis: "Probabilistic Modeling of Microelectromechanical Systems (MEMS)"

Mechanical Engineering

Caglar Ozerdim, Lubbock, Texas
(*In absentia*)
B.S., Istanbul Technological University, 2000
Thesis: "Absorption Characteristics of Impact Vibration Absorbers"

Mechanical Engineering

Kadir Bulent Unuvar, Istanbul, Turkey
(*In absentia*)
B.S., Istanbul Technical University, 2001
non-thesis

Mechanical Engineering

MASTER OF SCIENCE IN PETROLEUM ENGINEERING

Manish Kumar Lal, Patna, India
B.S., Indian School of Mines, 1998
Thesis: "Binary Interaction Parameters for Critical Loci of Polar and Non-Polar Systems"

Petroleum Engineering

MASTER OF SCIENCE IN SOFTWARE ENGINEERING

Joseph Alan Wigner, Lubbock, Texas
B.S., Texas Tech University, 2001
Thesis: "Evaluating Student Programs By Metric Analysis"

Software Engineering

MASTER OF SCIENCE IN SYSTEMS AND ENGINEERING MANAGEMENT

Kenneth Don Buchanan, Spearman, Texas
B.S., Texas Tech University, 2000

ACADEMIC DRESS AND PROCESSION

The wearing of academic dress at commencement dates from the early history of the oldest universities some of which in the twelfth or thirteenth century. Since educated people were almost always of the clergy, the black robe is somewhat of adaptation of the cope, a mantle of silk or other cloth worn by church dignitaries in processions and on other occasions. The long gown and cowl (similar to the academic hood of today) were worn by monks and monks for warmth in the cold medieval buildings.

In early centuries, a great diversity of color and style of cap, gown and hood appeared in different universities in Europe. The European custom of wearing academic dress was later introduced at American colleges. Not until 1875 was a uniform academic code of dress adopted by most colleges and universities in the United States. Since the black robe, hood, and cap are worn at most institutions of higher learning.

They are worn differently for the bachelor's, master's, and doctor's degrees. Usually the bachelor's robe has long sleeves, the master's has closed sleeves square at the end with a slit at the elbow, the doctor's is faced with velvet and has round open sleeves with three bars of velvet.

The doctor's hood has side panels and is slightly longer than the one worn for the master's degree. The color used on the velvet border of the hood indicates the field of study. The velvet border is widest on the doctor's hood. The colors in the lining of the hood indicate the college or university that conferred the degree. For example, those who have received advanced degrees from Texas Tech University wear hoods lined with red and black.

The tassel—the so-called mortarboard—is black and has a long tassel fastened to the center. The tassel is usually worn on the left front of the cap. Different colored tassels are often worn on the bachelors and masters caps to indicate the type of degree. The tassel on the cap of the doctor's candidate, except for professional degrees, is either gold or black. The doctor's degree holders may also wear the velvet tam with a gold tassel.

Candidates for the undergraduate degree will wear the tassel on the right side of the cap at commencement. After the degree has been conferred, baccalaureate degree recipients will turn the tassel to the left side of the cap, thus showing that they are now graduates. Those graduates who have the Official Texas Tech Alumni Association Pass Ring are invited to turn their rings at this time.

Candidates who wear the red cord are honor students who possess a minimum 3.50 grade average and will graduate *Cum Laude*, *Magna Cum Laude*, or *Summum Cum Laude*. Texas Tech University has four university-wide honoraries: Golden Key, Mortar Board, Omicron Delta Kappa and Phi Kappa Phi. Candidates wearing the red and black cords and black and silver medallions are Honor Studies graduates.

The following is a list of colors established by the Intercollegiate Code to represent the different departments of learning:
