TEKS: §111.12 Mathematics, Kindergarten					
TEKS Requirement (Elementary)	Sem. B	Course Guide Lesson #	Textbook Chapter/Page #	Bloom's Taxonomy	
§111.12. Mathematics, Kindergarten.					
(a) Introduction.					
(1) Within a well-balanced mathematics curriculum, the primary focal points at Kindergarten are developing whole-number concepts and using patterns and sorting to explore number, data, and shape.					
(2) Throughout mathematics in Kindergarten-Grade 2, students build a foundation of basic understandings in number, operation, and quantitative reasoning; patterns, relationships, and algebraic thinking; geometry and spatial reasoning; measurement; and probability and statistics. Students use numbers in ordering, labeling, and expressing quantities and relationships to solve problems and translate informal language into mathematical language and symbols. Students use objects to create and identify patterns and use those patterns to express relationships, make predictions, and solve problems as they build an understanding of number, operation, shape, and space. Students progress from informal to formal language to describe two- and three-dimensional geometric figures and likenesses in the physical world. Students begin to develop measurement concepts as they identify and compare attributes of objects and situations. Students collect, organize, and display data and use information from graphs to answer questions, make summary statements, and make informal predictions based on their experiences.					
(3) Throughout mathematics in Kindergarten-Grade 2, students develop numerical fluency with conceptual understanding and computational accuracy. Students in Kindergarten-Grade 2 use basic number sense to compose and decompose numbers in order to solve problems requiring precision, estimation, and reasonableness. By the end of Grade 2, students know basic addition and subtraction facts and are using them to work flexibly, efficiently, and accurately with numbers during addition and subtraction computation.					
(4) Problem solving, language and communication, connections within and outside mathematics, and formal and informal reasoning underlie all content areas in mathematics. Throughout mathematics in Kindergarten-Grade 2, students use these processes together with technology and other mathematical tools such as manipulative materials to develop conceptual understanding and solve meaningful problems as they do mathematics.					
(b) Knowledge and skills.					
(1) Number, operation, and quantitative reasoning. The student uses numbers to name quantities. The student is expected to:					
(A) use one-to-one correspondence and language such as more than, same number as, or two less than to describe relative sizes of sets of concrete objects;				Apply	
(B) use sets of concrete objects to represent quantities given in verbal or written form (through 20); and		76-80	8-1, 8-2,	Apply	
(C) use numbers to describe how many objects are in a set (through 20) using verbal and symbolic descriptions.		76-80, 139	8-1, 8-2,	Apply	
(2) Number, operation, and quantitative reasoning. The student describes order of events or objects. The student is expected to:					
(A) use language such as before or after to describe relative position in a sequence of events or objects; and		97, 149	9-7,	Apply	
(B) name the ordinal positions in a sequence such as first, second, third, etc.		143, 149		Remember	
(3) Number, operation, and quantitative reasoning. The student recognizes that there are quantities less than a whole. The student is expected to:					
(A) share a whole by separating it into two equal parts; and		111	10-7,	Analyze	
(B) explain why a given part is half of the whole.		111	10-7,	Understand	
(4) Number, operation, and quantitative reasoning. The student models addition (joining) and subtraction (separating). The student is expected to model and create addition and subtraction problems in real situations with concrete objects.		112-124, 126-136	11-1 through 11-9, 12-1 through 12-8,	Create	

TEKS Requirement (Elementary)		Sem. B	Course Guide Lesson #	Textbook Chapter/Page #	Bloom's Taxonomy
(5) Patterns, relationships, and algebraic thinking. The student identifies, extends, and creates patterns. The student is expected to identify, extend, and create patterns of sounds, physical movement, and concrete objects.			140, 148		Create
(6) Patterns, relationships, and algebraic thinking. The student uses patterns to make predictions. The student is expected to:					
(A) use patterns to predict what comes next, including cause-and-effect relationships; and			140		Evaluate
(B) count by ones to 100.			76-86, 139, 142, 149	8-1, 8-2, 8-4, 8-5,	Remember
(7) Geometry and spatial reasoning. The student describes the relative positions of objects. The student is expected to:					
(A) describe one object in relation to another using informal language such as over, under, above, and below; and					Understand
(B) place an object in a specified position.					Apply
(8) Geometry and spatial reasoning. The student uses attributes to determine how objects are alike and different. The student is expected to:					
(A) describe and identify an object by its attributes using informal language;			103, 140, 141	10-2,	Understand
(B) compare two objects based on their attributes; and			103, 146, 148	10-2,	Evaluate
(C) sort a variety of objects including two- and three-dimensional geometric figures according to their attributes and describe how the objects are sorted.			104, 105, 148	10-3,	Evaluate
(9) Geometry and spatial reasoning. The student recognizes attributes of two- and three-dimensional geometric figures. The student is expected to:					
(A) describe and compare the attributes of real-life objects such as balls, boxes, cans, and cones or models of three-dimensional geometric figures;			101, 102, 143	10-1,	Evaluate
(B) recognize shapes in real-life three-dimensional geometric figures or models of three-dimensional geometric figures; and			101, 102, 104-107	10-1, 10-3, 10-4, 10-5,	Understand
(C) describe, identify, and compare circles, triangles, rectangles, and squares (a special type of rectangle).			106, 107, 145, 149	10-4, 10-5,	Evaluate
(10) Measurement. The student directly compares the attributes of length, area, weight/mass, capacity, and/or relative temperature. The student uses comparative language to solve problems and answer questions. The student is expected to:					
(A) compare and order two or three concrete objects according to length (longer/shorter than, or the same);			142, 148		Evaluate
(B) compare the areas of two flat surfaces of two-dimensional figures (covers more, covers less, or covers the same);					Evaluate
(C) compare two containers according to capacity (holds more, holds less, or holds the same);			139, 144, 148		Evaluate
(D) compare two objects according to weight/mass (heavier than, lighter than or equal to); and			146		Evaluate
(E) compare situations or objects according to relative temperature (hotter/colder than, or the same as).			146		Evaluate
(11) Measurement. The student uses time to describe, compare, and order events and situations. The student is expected to:					
(A) compare events according to duration such as more time than or less time than;			95	9-5,	Evaluate
(B) sequence events (up to three); and			87-92, 97-99, 140, 141	9-1, 9-2, 9-7, 9-8,	Apply
(C) read a calendar using days, weeks, and months.			89-94	9-2, 9-3, 9-4,	Apply
(12) Probability and statistics. The student constructs and uses graphs of real objects or pictures to answer questions. The student is expected to:					
(A) construct graphs using real objects or pictures in order to answer questions; and			139, 145		Create
(B) use information from a graph of real objects or pictures in order to answer questions.			145		Create
(13) Underlying processes and mathematical tools. The student applies Kindergarten mathematics to solve problems connected to everyday experiences and activities in and outside of school. The student is expected to:					
(A) identify mathematics in everyday situations;			87, 88, 147	9-1,	Remember
(B) solve problems with guidance that incorporates the processes of understanding the problem, making a plan, carrying out the plan, and evaluating the solution for reasonableness;			81, 96, 109, 110, 124, 137,	8-3, 9-6, 10-6, 11-9, 12-9,	Evaluate

TEKS Requirement (Elementary)		Sem. B	Course Guide Lesson #	Textbook Chapter/Page #	Bloom's Taxonomy
(C) select or develop an appropriate problem-solving strategy including drawing a picture, looking for a pattern, systematic guessing and checking, or acting it out in order to solve a problem; and			81, 96, 109, 110, 124, 137	8-3, 9-6, 10-6, 11-9, 12-9,	Create
(D) use tools such as real objects, manipulatives, and technology to solve problems.					Apply
(14) Underlying processes and mathematical tools. The student communicates about Kindergarten mathematics using informal language. The student is expected to:					
(A) communicate mathematical ideas using objects, words, pictures, numbers, and technology; and			93, 112-114, 117-124, 126-136	9-4, 11-1, 11-2, 11-4 through 11-9, 12-1, 12-2, 12-4 through 12-8,	Apply
(B) relate everyday language to mathematical language and symbols.			87, 88, 93, 116, 117, 138, 147	9-1, 9-3, 11-3, 12-3, 12-10,	Evaluate
(15) Underlying processes and mathematical tools. The student uses logical reasoning. The student is expected to justify his or her thinking using objects, words, pictures, numbers, and technology.			81, 96, 112-114, 117-124, 126-136	8-3, 9-6, 11-1, 11-2, 11-4 through 11-9, 12-1 through 12-8,	Evaluate
