The Foundation High School Program and Endorsements

Texas students have a wealth of choices for their plans after high school. The careers displayed here represent several of the many occupations that are in demand in the state of Texas. The Foundation High School Program and Endorsements help students effectively determine their interests and plan for their postsecondary training and education.

The five endorsements you can earn are:

- **Arts and Humanities**: Includes courses directly related to political science, world languages, cultural studies, English literature, history and fine arts.
- **Business and Industry**: Includes courses related to database management, information technology, communications, accounting, finance, marketing, graphic design, architecture, construction, welding, logistics, automotive technology, agricultural science, heating, ventilation, and air conditioning.
- **Public Services**: Includes courses directly related to health science and occupations, education and training, law enforcement, culinary arts, and hospitality.
- **Multidisciplinary Studies**: Includes courses from the curriculum of each endorsement area and credits in a variety of advanced courses from multiple content areas sufficient to complete the Distinguished Level of Achievement under the Foundation High School Program.
- **STEM (Science, Technology, Engineering, And Mathematics)**: This path includes courses directly related to science (including environmental science), technology (including computer science), engineering and advanced mathematics, or a coherent sequence of some career and technology education courses.

**What is the Foundation High School Program?**

The Foundation High School Program is a core set of classes in the areas of math, English, science, social studies, foreign language, fine arts, physical education, and electives that all students must complete as a foundation to graduate from high school in Texas.

**What is an endorsement?**

All incoming ninth grade students will select an endorsement as a plan to complete the required credits for graduation.

**What is the Distinguished Level of Achievement?**

A student can earn the Distinguished Level of Achievement by completing 26 credits. These credits must include the Foundation Program requirements and at least one endorsement. Algebra II must be completed as one of the four math credits and a fourth advanced science credit must be earned as one of the Foundation elective credits. Students must graduate at the Distinguished Level of Achievement to be eligible for automatic admission to state colleges and universities through the Top Ten Percent Plan.
The image contains a TTU K12 Personal Graduation Plan Checklist with various sections and credits listed for different subjects and categories. The visible sections include STEM, Business & Industry, Arts & Humanities, and Multidisciplinary. Each section lists credits and courses required, such as English Language Arts, Mathematics, Social Studies, Fine Arts, Physical Education, and Electives. The checklist indicates prerequisites and requirements for graduation, including credits in different languages, mathematics, and various electives. The document emphasizes meeting specific endorsements, such as World Geography or English Language Arts, and completing a coherent sequence of courses in CTE.
