

Mark Luedecke Memorial Scholarship

Contributions made to the Mark Luedecke Memorial Scholarship support scholarships for undergraduate students majoring within the Department of Mathematics & Statistics. Mark graduated in 1990 with his BS in Mathematics and in 1992 with his MS in Statistics. He was a kind and highly respected individual who excelled in the application of math and statistics, pioneering its use in the field of Advanced Process Control which yielded amazing benefits to several complex processes in high-tech manufacturing companies. He loved working on puzzles and would flash that wonderful smile when he realized the solution. He was a mentor to younger statisticians and a role model to his friends.
