

BSL II Training Instructions

<http://www.ttuhschool.edu/admin/safety/training.aspx>

go to the link above
choose "laboratory safety essentials" (its about half way down in the list)
press begin
press begin course
enter your social security number
register by following prompts

NOTE:

- *our lab is "none of the above" in the list
- *put Dr. Mindy Brashears as the "principle investigator"

There are 4 sessions that you must complete a quiz over. The entire "course" covers them so you really only take one class, but you get the info to answer questions from all the sets of quizzes.

Please see me if you need any help with this part and I also have notes to study in my office if you would like to read paper rather than a computer screen.

When you are done, please email me your certificate (you are going to have to print it then scan it or turn it into pdf or something). You have NOT completed this until I have an electronic copy!

From there, I will post the electronic copy on to the ESB site and you will be officially certified to be in ESB and the Pathogen Lab.

If you are to be helping in the Pathogen Lab the only additional requirement will be for you to complete a short quiz made by the project leader on the scope of the project you will be helping with (and that can be done the day of production)
