Undergraduate Admission Priority Deadlines

Domestic Admission —

Submit application electronically at goapplytexas.org or www.commonapp.org/.

- **Summer 2025 First-Time and Transfer**
Priority deadline to complete application process: May 1, 2025
- **Fall 2025 First-Time and Transfer**
Priority deadline to complete application process: May 1, 2025
Final deadline to submit application: August 1, 2025
- **Spring 2026 First-Time and Transfer**
Priority deadline to complete application process: November 1, 2025
- **Summer 2026 First-Time and Transfer**
Priority deadline to complete application process: May 1, 2026
- **Fall 2026 First-Time and Transfer**
Priority deadline to complete application process: May 1, 2026
Final deadline to submit application: August 1, 2026
- **Spring 2027 First-Time and Transfer**
Priority deadline to complete application process: November 1, 2026

International Admission —

Submit application electronically at goapplytexas.org, www.commonapp.org/, or https://texastech.my.site.com/iadmission/TX_SiteLogin?startURL=%2Fiadmission%2FTargetX_Portal_PB.

- **Summer 2025 First-Time and Transfer Students**
Priority deadline to complete application process: March 1, 2025
Final deadline to submit application: May 1, 2025
- **Fall 2025 First-Time and Transfer Students**
Priority deadline to complete application process: May 1, 2025
Final deadline to submit application: August 1, 2025
- **Spring 2026 First-Time and Transfer Students**
Priority deadline to complete application process: November 1, 2025
Final deadline to submit application: January 1, 2026
- **Summer 2026 First-Time and Transfer Students**
Priority deadline to complete application process: March 1, 2026
Final deadline to submit application: May 1, 2026
- **Fall 2026 First-Time and Transfer Students**
Priority deadline to complete application process: May 1, 2026
Final deadline to submit application: August 1, 2026
- **Spring 2027 First-Time and Transfer Students**
Priority deadline to complete application process: November 1, 2026
Final deadline to submit application: January 1, 2027

TTU Costa Rica —

Additional information concerning programs offered at TTU Costa Rica available at <http://www.depts.ttu.edu/costarica/>.

- **Fall:** Priority deadline to complete the application process: August 1
- **Spring:** Priority deadline to complete the application process: January 1

Former Texas Tech Student Admission —

Information and application for re-admission available at www.depts.ttu.edu/admissions/apply/status/returning_other/former/.

About the University

Campuses

Texas Tech University is the largest institution in the Texas Tech University System, with an enrollment of more than 41,000 students. Its main campus is located in Lubbock, Texas, and the university operates several other locations throughout the state, including Dallas-Fort Worth, Waco, El Paso, Junction, Fredricksburg, Marble Falls, and Amarillo. Texas Tech University also has a campus in San Jose, Costa Rica as well as the Texas Tech University Center in Sevilla, Spain.

With a population of more than 260,000, Lubbock is in the heart of the South Plains of West Texas. The city is a major regional hub for many industries with year-round dynamic events and attractions, including a celebrated music scene, vibrant arts community, and eclectic food.

History

Texas Tech University was created by legislative action in 1923 and has the distinction of being the largest comprehensive higher education institution in the western two-thirds of Texas.

Originally named Texas Technological College, Texas Tech opened in 1925 with six buildings and an enrollment of 914 students. Graduate instruction began in 1927 in the School of Liberal Arts. A Division of Graduate Studies was established in 1935, which became known as the Graduate School in 1954.

By action of the Texas State Legislature, Texas Technological College formally became Texas Tech University on September 1, 1969. At that time, the schools of Agricultural Sciences, Arts and Sciences, Business Administration, Education, Engineering, and Home Economics also became known as “colleges.” Architecture became a college in 1986. Two colleges changed their names in 1993 to reflect the broadening fields each serves: the College of Agricultural Sciences became the College of Agricultural Sciences & Natural Resources, and the College of Home Economics became the College of Human Sciences. The Honors College was established in 1998, and the J.T. & Margaret Talkington College of Visual & Performing Arts opened in 2002. Media & Communication became a college in 2004.

The legislature authorized funds in 1965 to establish the Texas Tech University School of Law. The first class of 72 students enrolled in 1967. The law school was approved by the American Bar Association in 1970 and is fully accredited by the Supreme Court of Texas (1968) and the Association of American Law Schools (1969).

In 2019, the Texas Legislature appropriated \$17.35 million to Texas Tech University and directed the institution to undertake the steps necessary to open the School of Veterinary Medicine (SVM). Located in Amarillo, the SVM welcomed its inaugural class in the Fall of 2021.

As a member of the National Collegiate Athletic Association, Texas Tech began competing in the Big 12 Conference in 1996 after a 35-year membership in the Southwest Conference.

Texas Tech was first accredited by the Southern Association of Colleges and Schools in 1928 and has been accredited continuously since that time.

The following have been presidents of Texas Tech: Paul Whitfield Horn (1925-1932), Bradford Knapp (1932-1938), Clifford Bartlett Jones (1938-1944), William Marvin Whyburn (1944-1948), Dossie Marion Wiggins (1948-1952), Edward Newlon Jones (1952-1959), Robert Cabaniss Goodwin (1960-1966), Grover Elmer Murray (1966-1976), Maurice Cecil Mackey Jr., (1976-1979), Lauro Fred Cavazos (1980-1988), Robert W. Lawless (1989-1996), Donald R. Haragan (1996-2000), David J. Schmidly (2000-2002), Jon Whitmore (2003-2008), Guy Bailey (2008-2012), M. Duane Nellis (2013-2016), and Lawrence E. Schovanec (2016-present).

Financial Support

Texas Tech University is a public institution that receives a portion of its operating funds from the Texas State Legislature as well as student tuition and fees. State-appropriated funds are made available for the construction and renovation of academic and general buildings from the Higher Education Fund and the Capital Construction Assistance Projects funding. State-appropriated funds are also used to provide salary support for faculty and staff. State-appropriated funds are not used to support auxiliary departments such as residence halls, intercollegiate athletics, health services, the Student Union, or the University Recreation Center.

Student tuition and fees, along with gifts and grants from private individuals and organizations, provide critical additional funding to support scholarships and fellowships, faculty research, student services, student activities, and campus facilities.

Organizational Structure

A nine-member Board of Regents governs Texas Tech University, Angelo State University, Midwestern State University, and the Texas Tech University Health Sciences Centers in Lubbock and El Paso. The Governor of the State of Texas appoints the Regents to six-year terms. The terms of office of three Regents expire every two years. The university’s governance, control, and direction are vested in the Regents, who appoint a Chancellor to carry out the System’s policies as determined by the Regents. The Chancellor appoints a president for each institution in the System. The presidents are chief executive officers of their respective institutions and are responsible for the strategic operation of each institution.

Texas Tech University is home to the Graduate School; School of Law; School of Veterinary Medicine; University Studies; Honors College; Davis College of Agricultural Sciences & Natural Resources; Huckabee College of Architecture; Rawls College of Business; Whitacre College of Engineering; Talkington College of Visual & Performing Arts; and the Colleges of Arts & Sciences, Education, Health and Human Sciences, and Media & Communication. Each college is administered by a dean and consists of many instructional departments or areas.

2025-2026 Academic Calendar

Dean, TTU-Costa Rica

Texas Tech University System Chancellor/Board of Regents

System Chancellor

Tedd L. Mitchell, M.D.

Board of Regents

Term Expires January 31, 2027

Arcilia Acosta.....Dallas

Cody Campbell, Chair.....Fort Worth

Pat Gordon.....El Paso

Term Expires January 31, 2029

Clay Cash.....Lubbock

Tim Culp.....Midland

Shelley Sweatt.....Wichita Falls

Term Expires January 31, 2031

Doug McReaken.....Pearland

Don Sinclair.....Houston

Dustin R. Womble, Vice Chair.....Lubbock

Student Regent

Term Expires May 31, 2026

Eli Heath.....Flower Mound

Reader's Guide to the Catalog

How to Read Catalog Course Descriptions

Texas Tech offers more than 5,000 courses as part of its curriculum. These courses are listed alphabetically by subject prefix (see prefix listing on next page) within each college and departmental section of this catalog. The courses appear in numerical order, moving from beginning freshman or developmental-level courses to graduate, research, and professional courses.

Not all courses listed in this catalog are offered every year. An online class schedule published before each registration period indicates courses that

will be available during the upcoming term or semester and when each class will meet. Visit www.depts.ttu.edu/officialpublications/class_schedule/index.php to see the class schedule. The university reserves the right to cancel any scheduled course or withdraw any program from the list of offerings when the best interests of the institution require such action.

Courses are designated by a subject prefix and number along with a descriptive title. The following illustration may help readers better interpret the course descriptions found throughout this publication.

Subject prefix – Indicates course subject (BOT = Botany). See subject prefixes on next page.

Course title – Number in parentheses (3) denotes hours of semester credit earned. When the letter V precedes the numbers (e.g., V1-6), this indicates the class is a variable credit course. Such courses are ordinarily research courses and permit enrollment for any number of hours up to the limit indicated by the second number in the parentheses.

Course prefix and numbers in brackets – Identify this course as part of the Texas Common Course Numbering System that facilitates transfer between Texas colleges and universities (see page 28).

First digit in course number – Indicates the academic level of the course. The course in this example is a sophomore-level course. First digits of 1, 2, 3, or 4 indicate that the course is primarily designed for the freshman, sophomore, junior, or senior year, respectively. Developmental courses begin with “0” (e.g., MATH 0301). A number of 5 or above designates a graduate-level course. Graduate standing is a prerequisite for enrollment in all courses numbered in the 5000 series or above and are intended only for graduate students (except for seniors who are within 12 hours of graduation and whose enrollment has been authorized by the Graduate Dean). Although graduate students occasionally enroll in undergraduate courses to fill out deficiencies in their preparation for graduate work, coursework credited toward a graduate degree must, except in rare instances, be of graduate level (5000 series or above).

Second digit in course number – Indicates the semester hour credit of the course. Thus, BOT 2301 would be a sophomore-level course with 3 semester hours of credit.

Last two digits of course number – The distinguishing numbers of the course.

Course prefix and numbers in brackets after the course that are at different levels – Tandem courses are specifically for undergraduate and graduate courses in the same department. Tandem courses are taught by the same teacher in the same classroom at the same time.

Description of course content

Prerequisites – Some courses have specific prerequisites that must be met before the student can enroll. Before taking the course in this example, the student must have had CHEM 3305 and BIOL 1401 or 1403 or 1404.

Semester of course offering – Some course descriptions indicate when the course is normally taught (F–fall, S–spring, SSI–first summer term, SSII–second summer term; even–taught in even years; odd–taught in odd years).

Course prefix and numbers in brackets after the course when both are at the same level – Cross-listed with an identical course that has a different prefix and is usually offered by a different department. Both courses are taught by the same teacher in the same classroom at the same time.

Example: BOT 2301*

2301—Plant Physiology (3). [TCCNS: AGRI1310]
 Prerequisites: CHEM 3305 and BIOL 1401 or 1403, 1404.
 The physiology of plants with an emphasis on relationships of structure to function in vascular plants. Includes a lab.
 F, S, [NRM 3301]

Example: BOT 4304*

4304—Plant Molecular Biology (3).
 Prerequisites: C or better in BIOL 1403 and BIOL 1404.
 Molecular analysis of plant metabolism and signaling. S.
 [BOT 5304]

* Courses used for illustration purposes only; not a course number currently in use by Texas Tech University.

Glossary of Catalog Terms

The following definitions explain many of the academic terms and abbreviations used throughout this catalog.

Academic Year: The traditional annual cycle of academic terms: Fall, Spring, Summer.

Advanced Placement: A test taken to determine a student's level of competency in sequential courses such as mathematics, foreign languages, and chemistry.

Audit: To attend a class regularly without receiving credit. Does not count toward full-time enrollment.

Baccalaureate Degree (Bachelor's): A degree awarded for the successful completion of an approved undergraduate program.

B.S.: Bachelor of Science, the baccalaureate degree typically awarded in the sciences, engineering, and health professions.

B.A.: Bachelor of Arts, the baccalaureate degree typically awarded in the arts and humanities.

Certificate: A formal document that recognizes academic achievement in a specific discipline—usually as an adjunct to an undergraduate or graduate degree program.

Classification: Academic level (year), such as junior or senior based on hours earned.

College: An academic unit within the university that is headed by a dean, offers instruction, and grants degrees in several areas of study.

Communication Literacy: The ability to communicate effectively. The university requires students in each major to take at least three courses designated as including a Communication Literacy component.

Concentration: A specific area of coursework within an undergraduate major or master's degree.

Concurrent Enrollment: Simultaneous enrollment in two or more courses, programs, colleges, or universities.

Core Curriculum: Required courses designed to give all graduating students a general knowledge base in the life and physical sciences; social and behavioral sciences; mathematics, language, philosophy, and culture; creative arts, and tools of language and thought.

Corequisite: A course or other educational requirement that must be completed simultaneously with another course.

Course: A subject offered during a term or semester. Each course is assigned a course level. Courses numbered from 1000 through the 4000 level are undergraduate courses. Courses numbered 5000 or above are graduate or professional level courses.

Course Sequence: The specified order of enrollment for a series of courses.

Credit Hour: Every course taught is designated a total number of credit hours, reflecting

approximately the total hours a student spends per week in class.

Cum Laude: Means graduating "with honors." *Magna cum laude* means graduating with "high honors," and *summa cum laude* means "highest honors."

Degree: A title conferred upon one who has successfully completed an approved program of study.

Discipline: A branch of learning or field of study (e.g., mathematics, history, psychology).

Dissertation: A written report of research completed in fulfillment of the requirements for a doctoral degree.

Doctoral Degree (Doctorate): A graduate degree awarded for the completion of an advanced course of study emphasizing research, typically requiring 90 hours of course and research work beyond the bachelor's degree, the completion of an independent research project, and the completion and successful defense of a dissertation.

Drop/Add: The process by which a student changes his or her class schedule by adding a course, dropping a course, or both.

Dual Enrollment: Simultaneous registration at two educational institutions.

Electives: Courses that students may choose to take in contrast to those that are required.

Grade Points: Four points for each credit hour of A, three for each hour of B, two for each hour of C, one for each hour of D, zero for each hour of F.

Grade Point Average (GPA): The current GPA is determined by dividing the total number of grade points acquired during the current semester by the total number of semester hours taken during the semester. The **cumulative** grade point average is the total number of grade points earned in all courses taken at the university divided by the total number of semester hours. Both the current and cumulative GPAs include grade replacements.

Graduate Student: A student who has already earned a baccalaureate degree, has been admitted into the Graduate School, and is enrolled in advanced courses leading to a master's or doctorate.

Interdisciplinary or Multidisciplinary: A course of study from two or more academic disciplines.

Major: A primary undergraduate or graduate field of specialized study.

Master's Degree: A graduate degree awarded for completing an advanced course of study typically requiring 30 hours of coursework beyond the bachelor's degree.

Matriculation: Enrollment as an admitted, degree-seeking student. A *matriculation number* is a number by which the student is identified. It is assigned by the university.

Minor: An undergraduate or graduate field of specialized study in addition to the primary or major field.

Prerequisite: A course or other educational requirement that must be completed successfully prior to registering for another course or before proceeding to more advanced study.

Probation, Academic: Any undergraduate with less than a 2.0 cumulative Texas Tech GPA will be placed on academic probation (see Academic Requirements catalog section).

Residency: Classification of students as Texas residents or non-Texas residents for tuition purposes.

Semester: A standard academic term referring to one-half or about 16 weeks of the academic year (e.g., fall or spring semester).

Semester Hour: Unit of measure for credit purposes.

Seminar: A small group of students studying a subject under direction of a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Subject Prefix: An abbreviation used with a course number to indicate an academic subject area.

Suspension, Academic: Student is not permitted to take classes and is ineligible to participate in any extracurricular activities (see Academic Requirements catalog section).

Texas Common Course Numbering System (TCCNS): A statewide course numbering system for lower-division courses to facilitate transferring courses among institutions of higher education by promoting consistency in course designation and identification.

Thesis: A written report of research or creative activity completed in partial fulfillment of the requirements of a course or degree.

Track: A specific area of coursework within a doctoral program.

Transcript: A written report of a student's academic work. Official transcripts must bear the seal of the university.

Transfer Credit: Coursework completed at another institution that is accepted at Texas Tech University and which may be applicable toward a specific major, minor or degree.

Withdraw: To drop *all* courses for a given term. Should not be confused with "dropping" a course.

Policies and Statements

The 2025-26 *Undergraduate and Graduate Catalog* is an official publication of Texas Tech University. The annual catalog is published each spring, and its provisions apply during the following academic year, beginning with the fall semester and extending through the next summer semester. New students who register at the university for the first time during a summer session are subject to the degree requirements set forth in the catalog effective for the upcoming fall semester. Those degree requirements expire at the end of the summer session of the seventh academic year after publication.

Acceptance of registration by Texas Tech University and admission to any educational program of the university does not constitute a contract or warranty that the university will continue indefinitely to offer the program in which a student is enrolled. The university expressly reserves the right to change, phase out, or discontinue any program.

The listing of courses contained in this university catalog is by way of announcement only and shall not be regarded as an offer of contract. The university expressly reserves the right to (1) add or delete courses from its offerings; (2) change times or locations of courses or programs; (3) change academic calendars without notice; (4) cancel any course for insufficient registration; or (5) revise or change

rules, charges, fees, schedules, courses, requirements for degrees, and any other policy or regulation affecting students, including, but not limited to, evaluation standards whenever the same is considered to be in the best interest of the university.

Students who enter a degree program within the university in the academic year of this catalog generally may expect to follow the graduation requirements set forth here by the relevant college or degree-granting entity. Because the faculty reserves the right to change graduation requirements, students should meet with their academic advisor regularly to be certain they are aware of any changes in graduation requirements that may apply to them. Although faculty, academic advisors, and staff members are available to assist students, each student is responsible for knowing and following the academic rules, regulations, guidelines, and timelines of the university and the appropriate academic degree program.

Courses to be offered during any semester or summer term are announced prior to the registration period for that semester or term in the form of an online class schedule: www.depts.ttu.edu/officialpublications/class_schedule/index.php.

University Mission Statement

As a public research university, Texas Tech advances knowledge through innovative and creative teaching, research, and scholarship. The university is dedicated to student success by preparing learners to be ethical leaders for a diverse and globally competitive workforce. The university is committed to enhancing the cultural and economic development of the state, nation, and world.

Accrediting Organizations

Texas Tech University is accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) to award baccalaureate, masters, and doctorate degrees. Texas Tech University also may offer credentials such as certificates and diplomas at approved degree levels. Questions about the accreditation of Texas Tech University may be directed in writing to the Southern Association of Colleges and Schools Commission on Colleges at 1866 Southern Lane, Decatur, GA 30033-4097, by calling 404.679.4500, or by using information available on SACSCOC's website (www.sacscoc.org)

Other accrediting bodies with which the university is affiliated include:

Davis College of Agricultural Sciences & Natural Resources

- Association for Assessment and Accreditation of Laboratory Animal Care
- Landscape Architectural Accreditation Board
- National Institutes of Health - Office of Laboratory Animal Welfare
- Society for Range Management
- U.S. Department of Agriculture - Animal and Plant Health Inspection Service
- U.S. Department of Agriculture - Animal and Plant Health Inspection Service - Animal Care
- United States Department of Agriculture - Food Safety and Inspection Service

Huckabee College of Architecture

- National Architecture Accrediting Board

College of Arts & Sciences

- American Society for Biochemistry and Molecular Biology
- American Chemistry Society
- U.S. Centers for Medicare and Medicaid Services and Texas Health and Human Services
- U.S. Centers for Disease Control and Prevention
- American Psychological Association
- Human Factors and Ergonomics Society
- Network of Schools of Public Policy, Affairs, and Administration
- Council on Social Work Education

College of Education

- Association for the Education and Rehabilitation of Blind and Visually Impaired
- Council for Accreditation of Counseling and Related Educational Programs
- Council for Higher Education Accreditation
- Texas Education Agency
- U.S. Department of Education

College of Health & Human Sciences

- National Association of Schools of Art and Design
- Accreditation Commission for Programs in Hospitality Administration
- Accreditation Council for Education in Nutrition and Dietetics
- Certified Financial Planner Board of Standards
- Commission on Accreditation for Marriage and Family Therapy Education
- Council for Interior Design Accreditation
- National Association for the Education of Young Children
- National Council on Family Relations

J.T. & Margaret Talkington College of Visual & Performing Arts

- National Association of Schools of Art and Design
- National Association of Schools of Dance
- National Association of Schools of Music
- National Association of Schools of Theatre

Edward E. Whitacre Jr. College of Engineering

- ABET Engineering Accreditation Commission
- ABET Computing Accreditation Commission

Jerry S. Rawls College of Business

- Association to Advance Collegiate Schools of Business
- American Association of Professional Landmen

Texas Tech School of Law

- American Bar Association

Texas Tech School of Veterinary Medicine

- American Veterinary Medical Association Council on Education

Museum of Texas Tech

- American Society of Mammalogists
- American Alliance of Museums

Equal Opportunity Policy

Texas Tech University is open to all persons eligible for admission as students regardless of race, color, religion, sex, age, national origin, mental or physical disability, or Vietnam Era or Special Disabled Veteran status. All students admitted to the university are treated without discrimination in regard to their participation in university educational programs or activities. The university is an equal opportunity employer, and no applicant or employee will be discriminated against because of race, color, religion, sex, age, national origin, mental or physical disability, or Vietnam Era or Special Disabled Veteran status in regard to employment or during the course of employment in the institution. The university does not discriminate on the basis of sex or disability in its educational programs. Any student with inquiries or complaints concerning Section 504 of the Rehabilitation Act of 1973 (504) or the Americans with Disabilities Act (ADA) of 1990 should contact the ADA/Section 504 coordinator located in Student Disability Services, 130 Weeks Hall, 806.742.2405.

Student Conduct

The Office of Student Conduct is responsible for reviewing and adjudicating alleged violations of the Code of Student Conduct. All students are afforded due process while working with this office and are also informed about their rights and responsibilities throughout the process. In addition to adjudicating alleged violations of university policy, this office also serves as a clearinghouse for various background checks of current and former Texas Tech students.

The Office of Student Conduct works in partnership with various campus units, including but not limited to: Dean of Students Office, Student Counseling Services, University Student Housing, Texas Tech Police Department, Risk Intervention & Safety Education and more. This office also works to maintain compliance with various federal and state regulations.

Contact: 307 Student Union | www.studentconduct.ttu.edu | 806.742.1714

Students with Disabilities

Students with disabilities will find numerous programs designated to coordinate academic accommodations and promote access to every phase of university life. Such programming is coordinated through Student Disability Services (SDS).

SDS personnel oversee and coordinate programs to ensure accessibility on an individual basis to students with disabilities. Texas Tech strives to provide all students equal access to a college education and support in adjusting to the college experience.

Prospective and current students interested in receiving more information regarding programs for students with disabilities should contact Student Disability Services, 130 Weeks Hall, 806.742.2405 or visit online at <http://www.depts.ttu.edu/sds/>. Email: sds@ttu.edu

Academic Degree Programs

The program types listed below are available only to degree-seeking students enrolled in degree-granting programs:

Major: a group of courses at the undergraduate or graduate level that constitute a primary program of study. At the undergraduate level, an academic major must contain a minimum of 24 upper division credit hours. At the graduate level, an academic major must contain a minimum of 18 credit hours.

Documented on the diploma and transcript.

Minor: a group of courses that constitute a secondary program of study that is distinct, in subject area, from the primary program of study. Academic minors must contain a minimum of 18 credit hours (at least six upper division) for undergraduate degrees, six credit hours for master's degrees, and 15 credit hours for doctoral degrees. **Documented on the transcript.**

Minor (as part of an Interdisciplinary Degree): Interdisciplinary degrees comprise distinct fields of specialization. These fields of specialization are required to follow curricula approved for inclusion in an interdisciplinary degree. Any academic minor may be used as a field of specialization in an interdisciplinary degree. Additionally, students and advisers in these degree programs can pursue self-designed fields of specialization provided they obtain approval from the academic areas housing the courses included in those fields. **Documented on the transcript.** *Any interdisciplinary degree program may submit a request to the Office of the Provost to have the titles of the fields of specialization printed on the diploma. The form for the request is available under Faculty Resources on the Provost's webpage.*

Track: a group of courses that constitute a distinction **within a major** at the **professional master's and doctoral levels**. **Documented on the transcript.** *Any academic program may submit a request to the Office of the Provost to have one or more tracks printed on the diploma. The form for the request is available under Faculty Resources on the Provost's webpage.*

Concentration: a group of courses that constitute a distinction **within a major** at the **undergraduate level and in Master of Arts/Master of Science/Master of Education degrees**. The concentration allows the student to complete the degree with a demonstrated proficiency in an area of focus **within the major**.

At the **undergraduate level**, a concentration must include at least twelve semester credit hours and generally should not exceed 50% of the total semester credit hours required for the major (not the entire degree). A minimum of twelve semester credit hours in the concentration must be upper division.

For **Master of Arts/Sciences/Education degrees**, a concentration must align with **one** of the following:

1. A concentration is a group of courses comprising at least six semester credit hours in the major. The Texas Higher Education Coordinating Board (THECB) mandates that majors in master's degrees include a minimum of 18 semester credit hours (SCH). Concentrations must comprise six SCH **within that major**. The academic department determines what courses constitute the major and concentration. The concentration allows the student to complete the degree with a demonstrated proficiency in an area of focus **within the major**.
2. A concentration is a group of courses comprising at least six semester credit hours taken in addition to the major and which cannot be taken separately from the major. That is, a student not enrolled in the major may not complete the coursework required for the concentration. The concentration allows the student to complete the degree with a demonstrated proficiency in a secondary area of focus **complementary to the major**.

Regardless of concentration, the number of credit hours required to complete the degree should not change. This is because the required minimum semester credit hours for the degree awarded is based on the major only, not the concentration.

Concentrations are only available to students enrolled in the home major. **Documented on the transcript.** *Any academic program may submit a request to the Office of the Provost to have a concentration printed on the diploma. The form for the request is available under Faculty Resources on the Provost's webpage.*

Specialization: a group of courses that constitute a distinction **within a concentration**. **Documented on the transcript as an additional concentration.**

The program type below is available to degree-seeking and non-degree-seeking students:

Certificate: A group of courses that constitute an area of study that can be completed with or without an accompanying degree.

For degree-seeking students: Certificate will be awarded at the time degree is awarded: documented on the transcript.

For non-degree-seeking students: Certificate will be awarded when coursework is complete: documented on the transcript.

| ACADEMIC DEGREES | | | |

Texas Tech accepts the Common App application for Admission to Four-Year Institutions, which is available online at www.commonapp.org/ and the ApplyTexas application located at goapplytexas.org/. Essays and letters of recommendation are strongly recommended for students who do not qualify for assured admission. Please see the Admissions Deadlines section of this catalog for 2025-2026 admissions deadlines.

Admission to the Graduate School. See the Graduate School section of this catalog for information about graduate admission.

International Admission. See Admission Requirements for Undergraduate International Students for information regarding admission of international students.

Residency Status Determination. For rules governing the determination of residency status as defined by the Texas Higher Education Coordinating Board, search “residency” at www.collegeforalltexas.com. Additional information and forms can be found at www.depts.ttu.edu/admissions/residency/ and www.depts.ttu.edu/admissions/apply/residency/.

Meningitis Vaccine. The Texas Education Code, Section 51.9192 requires all students under the age of 22 years entering a public institution of higher education in Texas to provide documentation that they have had a meningococcal (bacterial meningitis) vaccine within the last five years. In addition to a current meningitis vaccine, Texas Tech University also requires the submission of two doses of Mumps, Measles, and Rubella (MMR). Visit Student Health <https://www.depts.ttu.edu/studenthealth/newstudents> for more information.

Admission Requirements

Applicants are considered for admission to the undergraduate divisions of the university by graduation from high school or equivalent or by transfer from an accredited college. Students are expected to be academically prepared to succeed; therefore, academic performance, standardized test scores, and educational preparation are specifically considered. Additional factors may be considered in determining the applicant's eligibility for admission during a holistic review that includes, but is not limited to, the student's extracurricular activities, leadership experiences, special talents, awards, conduct findings, and employment experiences.

Students are admitted to a specific college within the university. The university reserves the right to modify its admission requirements in order to manage enrollment in high-demand areas. The colleges may set various requirements for continuance in certain degree programs in addition to the general university minimum requirements. Texas Tech reserves the right to assign a major if applicants do not meet the qualifications for their major of choice. See below for admission requirements for specific colleges.

First-Time Admission

Applicants must complete the following:

1. Submit an application and pay a non-refundable application fee. The Common App application is available at www.commonapp.org/ and the ApplyTexas Application is available on the website goapplytexas.org/. The application fee may be paid by check, money order, or online at www.raiderconnect.ttu.edu with a credit card (Visa,

MasterCard, American Express, or Discover). If payment of the fee creates financial hardship, students may submit qualifying documentation of need for a fee waiver along with the application and supporting documents for admission. Refer to Undergraduate Admissions website for Fee Waiver guidelines (www.admissions.ttu.edu/feewaiver). Applications will not be complete without either the application fee or fee waiver documentation.

2. Provide a high school transcript showing GPA and class rank. If no rank is provided, one will be assigned. The transcript must state the State of Texas diploma type, or further documentation may be required. Senior courses in progress must be provided on the transcript, a grade report, or listed on the application form. A student with a GED must submit official GED scores as well as an official partial high school transcript. Students who are currently enrolled in high school at the time of application may submit an unofficial high school transcript to complete their admission file and receive a decision. Documents can be sent in the following manner:
 - The student may upload unofficial documents through the student portal in RaiderConnect.
 - The student may bring the document to the Undergraduate Admissions office in West Hall.
 - The high school may upload the official document through the Counselor portal in RaiderConnect.
 - The document can be sent through U.S. mail.

A final official high school transcript showing graduation date will be required after graduation and will become part of the student's permanent record. This official document must be sent directly from the high school or uploaded through the Counselor portal in RaiderConnect. No unofficial, final transcripts will be accepted from the student.

3. Students wishing to have their test scores considered during the admission process should have college entrance test scores, either the SAT or the ACT, sent from the testing agency at the time the test is taken. If the student is applying as Test-Optional, or if it has been five years or more since high school graduation, the requirement to take the SAT or ACT test will be waived.
4. Provide official college transcript for any dual credit completed. This is recommended for all and is mandatory for individuals attending an Early College High School program. Unofficial college transcripts will not be accepted.
5. Individuals who are not high school graduates but who have submitted evidence of a high school equivalency diploma from the Texas Education Agency (or equivalent agency in other states) may be eligible for admission to Texas Tech University when they have submitted all of the following items to the Office of Undergraduate Admissions:
 - Application for Admission
 - Current Application Fee
 - Partial high school transcript
 - Proof of completion of equivalency diploma, including the complete score report

While not mandatory, applicants may provide ACT or SAT scores.

6. Applicants currently enrolled in their first semester of college after high school graduation and wanting to transfer to Texas Tech should apply as transfer students but must also meet freshmen admission requirements and provide an official high school transcript showing a graduation date. While not mandatory, SAT or ACT scores may be submitted. Applicants must have one of the following:
 1. Successfully completed the curriculum requirements for the Distinguished Endorsement High School Program, the Foundation diploma, or Foundation diploma with an endorsement.
 2. Satisfied ACT's College Readiness Benchmarks (English 18, Math 22, Reading, 22, and Science 23) on the ACT assessment, or earned on the SAT assessment a score of at least 480 on the Evidence-based Reading and a 530 in Math in one sitting.

The following courses are recommended to be considered for admission:

| High School Subjects | Units Required |
|---------------------------------|----------------|
| English | 4 |
| Mathematics ¹ | 4 |
| Laboratory Science ² | 4 |
| Foreign Language ³ | 2 |

¹ Algebra I, Geometry, and Algebra II are the courses recommended for admission.

² Biology I, Chemistry I, or Physics I are the courses recommended for admission.

³ If two years of a single foreign language are not completed in high school, at least two semesters of a single foreign language may be required at the college level.

Homeschooled Students. The admission requirements for students who have been homeschooled are the same as for students who have attended traditional public or private schools. A transcript with all coursework, completed and in progress, is required with the application, test score (if not test-optional), and application fee or waiver. Homeschool transcripts must bear a notarized signature of the school official attesting to the authenticity of the record. See www.admissions.ttu.edu/homeschool. Please see Senate Bill 1543, 84th Texas Legislature, Regular Session, 2015 for information on admissions of students with nontraditional secondary education (www.capitol.state.tx.us/BillLookup/History.aspx?LegSess=84R&Bill=SB1543) and (www.capitol.state.tx.us/tlodocs/84R/billtext/pdf/SB01543F.pdf).

Early High School Graduates. Students graduating early from high school must submit all application materials and verification of early graduation. A letter from a high school counselor or an indication on the official transcript is acceptable for verification. Early graduates are required to meet regular freshmen requirements. An essay explaining the purpose or reason for early graduation is recommended.

Early College High School. College transcripts should be provided as part of the student's admissions packet.

Assured Admission

Students graduating from high school may be assured admission if they present the required combination of test scores and class rank indicated below.

| High School Class Rank | Minimum Test Scores for Assured Admission* | |
|---|--|-------------------|
| | ACT | rSAT [†] |
| Top 10 Percent [‡] | No Minimum | |
| First Quarter (other than top 10 percent) | 24 | 1180 |
| Second Quarter | 26 | 1240 |
| Third Quarter | 27 | 1280 |
| Fourth Quarter | Application Review | |

* Writing portions of the ACT and SAT are not included in the minimum scores for assured admission.

[†] Revised SAT

[‡] In accordance with House Bill 5, 83rd Texas Legislature, Regular Session, 2013, a student must earn distinguished level of achievement to be eligible for top 10% automatic admission.

Students graduating in the top 10 percent of their high school class will be assured admission by completing:

- Distinguished level of achievement under the Foundation; or
- Satisfied ACT's College Readiness Benchmarks; or
- Earned a score of 1500 out of the 2400 possible points on the legacy SAT assessment administered prior to March 2016, or earn a minimum score of 480 points on the Evidence-Based Reading and Writing and a minimum score of 530 points on the Math portion of the SAT administered on or after March 5, 2016.

Admission will be granted to students who hold competitive scholarships awarded by an official Texas Tech scholarship committee.

Admission Review

Applicants who do not meet assured admission criteria will have their records reviewed in order to evaluate other factors that could predict success at Texas Tech University. A committee will review applicants individually in a holistic manner. Academic performance, standardized test scores, and educational preparation are specifically considered for admis-

sion. Additional information used to evaluate a student's potential for success includes, but is not limited to, the following:

- High school coursework, including advanced rigor
- Dual credit (on an official college transcript)
- Extracurricular activities
- Leadership experiences
- Civic or other service activities
- Socioeconomic background
- Family educational background
- Bilingual proficiency
- Special talents or awards
- Diversity of experience

Admission Waitlist

Applicants who are placed on the Waitlist can become fully admitted by completing six qualifying credit hours through the Texas Tech Gateway Program, earn at least a 2.5 GPA at an accredited community college, and provide a final transcript of the qualifying college credit. Because Undergraduate Admissions will continue to review applications until April 1, waitlisted individuals also can provide additional items for consideration, such as updated test scores and revised/updated high school transcripts and should request a re-evaluation.

Admission Alternatives

First-year applicants who have been denied admission for the summer or fall semester are eligible to participate in the Summer Gateway alternative admissions program. Visit www.admissions.ttu.edu/gateway for details.

Test Optional Policy

Texas Tech University has enacted a test optional admission policy for students through the Fall 2026 term. This policy allows students the option to apply without consideration of SAT or ACT scores. At the time of application, students will share their plans regarding the submission or consideration of SAT or ACT as part of their application. Students selecting this option will have their application and supplemental information evaluated in a holistic manner. In lieu of these test scores, students are encouraged to submit additional material (detailed in the Supplemental Application Items below) that they feel best highlights their skills, talents, and potential contributions to Texas Tech.

Supplemental Application Items

- Essays
- Letter(s) of Recommendation
- College Transcripts for Dual Credit, AP Exams
- IB, Exit Exams, any other test scores or certificates
- Resume

Evaluation for Admission

If a student wishes to be evaluated under the test optional policy, their application and supplemental information will be evaluated holistically in the following manner:

- Some applicants may feel the SAT or ACT does not fully reflect their academic performance. These students are strongly encouraged to submit additional documentation that would reflect the items listed above.
- If a student supplied a test score prior to submitting the application and chooses on the application to be reviewed test optional, the test score will not be visible to those reviewing the file for admission.
- A review committee will examine each applicant's file to identify their achievements and the challenges they faced, hoping to identify the way the applicant took advantage of the opportunities presented to them.
- The file will be evaluated for intellectual curiosity and academic rigor, demonstrated leadership and problem-solving ability, contributions to community, socioeconomic background and family responsibilities, special talents and awards, and diversity of experience and background.
- After the holistic review, a decision will be rendered by the review committee for test optional students.
- If a student was evaluated test optional and denied, the student may choose to submit a test score and request a reevaluation with the score being considered. Students should contact their admissions counselor for information.

Test Optional: Scholarship Consideration

Texas Tech University is proud to offer a high-quality education at an affordable cost. TTU continues to be recognized as a best value university for your return on investment. Students who apply test optional will be evaluated holistically for merit scholarships.

While students may be test optional for admissions, students still have the opportunity to submit test scores for merit scholarship consideration. Students are able to submit scores until May 1 of their senior year to qualify for merit scholarships. After that, merit scholarships are available based on availability of funding. Students are considered for competitive-based scholarships with their application for admission.

This policy has been approved by the Texas Tech University System Board of Regents (May 2020).

Transfer Admission

Undergraduate students who have attended an accredited college **beyond high school graduation** should apply as a transfer and may be accepted for admission to Texas Tech provided they meet admission requirements. Falsification or omission of application information can void admission to Texas Tech University. Applicants must complete the following:

1. Submit a transfer application and pay a non-refundable application fee. The Common App application is available at www.commonapp.org/ and the ApplyTexas Application is available on the website goapplytexas.org/. The fee may be paid by check, money order, or online with a credit card (Visa, MasterCard, American Express, or Discover). If payment of the fee creates financial hardship, students may submit verification or documentation of need for a fee waiver along with the application and supporting documents for admission. Refer to Undergraduate Admissions website for Fee Waiver guidelines (www.admissions.ttu.edu/feewaiver). Applications will not be complete without either the application fee or fee waiver documentation. No waiver of the international application fee is available.
2. Provide official transcript(s) of academic records from all institutions in which the applicant has been or is currently enrolled. Applicants must be eligible to return to all previous institutions.
3. If transferring with fewer than 12 transferable completed hours, applicants must meet the same standards for admission as required of new first-year students entering from high school and have a minimum 2.0 transferable GPA in work completed. Applicants enrolled in their first semester of college after high school graduation should apply as transfer students but are required to submit a high school transcript and SAT or ACT scores and meet first-year admission requirements.
4. Transfer applicants with 30 or more transferable hours must choose a major.
5. The university reserves the right to modify its admission requirements to manage enrollment in high-demand areas.
6. Some majors may have set various admission requirements in addition to the university admission requirements. Texas Tech University reserves the right to assign a major if applicants do not meet the qualifications for their major of choice. Please refer to www.admissions.ttu.edu/transfer for more information.

An unofficial copy of the high school transcript is necessary for academic advising prior to enrollment but not required for admission unless the student has less than 12 transferable hours.

In order to apply high school foreign language credits toward the basic foreign language requirements of Texas Tech University, students must provide an official copy of their high school transcript.

Transfer Advising

Transfer Advising provides pre-transfer academic advising services to prospective students. The office advises high school, community college, and four-year institution students who are Red Raider Bound. The key is for transfer students to work with transfer advisors early to make informed educational decisions identifying the courses and appropriate sequencing of coursework needed while at the prior institution to ensure successful applicability of earned transfer college credits toward a TTU degree.

Transfer advising includes review of transferable courses/credits, a degree checklist and discussion of how transferable credits will apply to a chosen TTU degree, course sequence planning, and course recommendations.

To view additional information and schedule an appointment, please visit: www.depts.ttu.edu/admissions/advising/.

Assured Admission

Transfer applicants will be assured admission if they meet the following requirements (cumulative GPA is calculated with transferable credit only):

| Transferable Credit Hours | Transfer GPA |
|---------------------------|--------------|
| 12-23 | 2.5 |
| 24+ | 2.25 |

Admission Review

Transfer students who do not meet assured admission requirements but have at least a 2.0 transferable GPA will be reviewed. The student's major, types of courses taken, and pattern of progress, as well as high school records, essays, and standardized test scores may be considered in the admissions process. An essay explaining any extenuating circumstances is highly recommended.

Work in Progress

TTU Undergraduate Admissions will only consider coursework in progress for twelve months prior to a student's term of entry in order to provide a decision on application for admission. If a student is applying for a fall term, Undergraduate Admissions must have final grades for all coursework taken before the previous fall and prior; if a student is applying for a spring term, Undergraduate Admissions must have final grades for all coursework taken the previous spring and prior.

Conditional Admission

- If a student is admitted with work in progress, the admission decision will be conditional.
- Students can register for orientation with a conditional decision; however, they should provide a transcript showing all final grades before attending their orientation session. A registration hold will be placed on the student's account to prevent registration until final grades are received.
- Once the final transcript is received and the work is evaluated, applicants meeting university GPA requirements may be fully admitted to the university. Admission for applicants whose final transcript brings them below the minimum GPA may be rescinded.

Reactivation Requirements for Former Texas Tech Students

Reactivation Form materials and deadlines for former Texas Tech students are available at

www.depts.ttu.edu/admissions/apply/status/returning_other/former/.

Official transcripts from all institutions attended subsequent to Texas Tech enrollment must be submitted by the priority deadline. Students who were on probation, suspension, or second/subsequent suspension and are returning to Texas Tech should refer to the reactivation criteria under "Undergraduate Academic Standing Policy" in the Academic Requirements section of this catalog and on the website listed above. Students wishing to return to Texas Tech are required to have a 2.0 GPA on work completed during their absence and no work in progress.

Students who left Texas Tech in good academic standing may request a major change on their reactivation form. Students who do not meet the academic restrictions for their requested program will be placed into the program that they were last enrolled in, if eligible.

Transient/non-Degree Seeking Applicants

Students who are not seeking degrees at Texas Tech University but wish to take courses at the university should use the Transient Application

through goapplytexas.org. The application fee is required. Fee waivers are not accepted. Students should provide official transcript(s) of academic records from all institutions in which the applicant has been or is currently enrolled. Applicants must be eligible to return to all previous institutions.

Second Undergraduate Degree-Seeking Applicants

Individuals seeking a second bachelor's degree, including those who previously attended Texas Tech, should provide the following:

- Students who previously attended Texas Tech should submit the [Reactivation Form](#). Individuals who have never attended Texas Tech may submit a transfer application through goapplytexas.org or www.commonapp.org (indicate you are seeking a second degree)
- Application fee (fee waivers are not accepted)
- Provide official transcript(s) of academic records from all institutions in which the applicant has been or is currently enrolled. Applicants must be eligible to return to all previous institutions. The date and type of bachelor's degree must be reflected on the appropriate transcript. Texas Tech students who graduated with their bachelor's degree from Texas Tech do not need to send this transcript.

An academic dean must approve admission to any program. Admissions will request this approval after the applicant's file is complete.

Credit Transferred from Other Colleges and Universities

Evaluation of course credit earned at other institutions by the Transfer Evaluation Office does not decree approval of the credit for use toward degree requirements. Only the academic dean of the college offering the program in which a student is enrolled has authority for determining which courses will be applied toward any specific program. The only exception to this rule is that no transferred course completed with a grade below C- may be applied to fulfill course requirements in majors, minors, or concentrations.

Students must submit official records from all accredited institutions attended. Official transcripts must be sent directly to the Office of Undergraduate Admissions. All college-level, non-vocational courses completed with a passing grade of D or above at regionally accredited colleges and universities (not including trade or technical schools) will be evaluated for acceptance of transfer credit by the Transfer Evaluation Office. While all credit hours presented on the sending institution's transcripts will be evaluated and equivalent college-level courses posted to the student's academic record, a maximum of 80 semester credit hours may be applied toward Texas Tech University degree requirements. Students may apply up to 90 semester credit hours provided that a minimum of 10 degree applicable hours are upper division (3xxx/4xxx) and from a four-year institution. Courses that are accepted for transfer may not necessarily apply toward college, departmental, or program degree requirements. The last 30 hours of the degree must be taken in residence, defined as instructed by Texas Tech University. Students may petition their academic dean for exceptions to this requirement.

Students are encouraged to meet with the academic advisors of the college in which they plan to enroll to discuss that college's policies on applicability of transfer credit for degree purposes. Credit hours will be applied to degree programs and majors when courses are deemed equivalent to the Texas Tech courses that satisfy various program requirements by the college in which the student is seeking a degree.

Students wishing to transfer credit to Texas Tech from a nonaccredited institution must (1) complete 30 semester credit hours of work in residence at Texas Tech with at least a 2.0 GPA and (2) receive approval from the academic dean in order to validate credits for transfer.

Guidelines for Transfer of College Credit

- **Transcript** – Official college transcripts from which the academic credit was originally taken will be reviewed, and all coursework will be evaluated before transfer credit will be posted to a student's permanent academic record. Courses that may have been accepted for credit by another institution will not necessarily be accepted by

Texas Tech. High school transcripts may not be used to award college credit.

- **Grade** – Nonvocational, college-level courses completed with a grade of D or above at another accredited institution (including courses taken on a pass/fail basis and passed) may be accepted for transfer. Courses completed with codes indicating no grade or no credit will not be transferred. This includes courses from which a student has withdrawn or received a grade of incomplete.
- **Classification Level** – Courses will transfer to Texas Tech at the level at which the courses were taken at the transfer institution. Credit hours taken at a junior or community college may not be transferred as upper-division work, even when the Texas Common Course Numbering System designation indicates similar course content.
- **Credit Hour** – Transfer credit will be awarded on a semester credit hour scale for all courses, including courses transferred in on quarter-hour scales. Credit transferred in on quarter-hour scales will be converted to semester credit hours.
- **Credit by Examination** – Credit by examination will be accepted as transfer credit if a student provides an official college transcript indicating awarded test credit. Departmental exams are not accepted for transfer credit.
- **Course Equivalency** – Transfer courses that have received an equivalent course evaluation by the Texas Tech academic department will be honored and are degree applicable. Changes to the equivalent may be requested annually by the department.
- **Block or General Credit** – Transfer courses that do not receive an equivalent course evaluation by the Texas Tech academic department but are eligible for transfer will be assigned block or general transfer credit for the subject and level (1---, 2---, 3---, or 4---).
- **Repeat Courses** – When a course has been repeated at another institution, the credit award will match credit granted on the sending institution's transcript. Texas Tech follows the sending institution's grade replacement policy.
- **Academic Standing** – Transferability of courses will not be affected by a student's academic standing (i.e., probation, suspension), but credits earned while on academic suspension from Texas Tech University will apply to a degree plan only if approved by the student's academic dean.
- **Nontraditional Educational Experiences** – Credit granted for nontraditional educational experiences by community colleges or other universities will not be accepted for transfer. These include courses taken at a non-degree-granting institution, life or work experience, and work completed at specialized proprietary schools.
- **WECM (Workforce Education), Technical, or Vocational Courses** – Courses will not be accepted for transfer, except in the following circumstances:
 1. The student has transferred in a complete Applied Associates degree from an accredited, two-year institution and is enrolled in a B.A.A.S. program or in University Studies; or
 2. The student is enrolled in a degree program as part of an Articulation Agreement with another institution and WECM courses are an approved component of that Agreement; or
 3. The student obtains approval from the home department, college, and Vice Provost for Academic Innovation and Student Success to transfer in individual WECM courses. To request permission, the student must provide syllabi for all requested transfers, document the credentials of the instructor of record for the course(s) in question, obtain departmental approval for the transfer, and obtain college-level recommendation for the transfer.
- **Support Courses** – Credit for specialized support courses such as math, science, and English intended for use in an occupational program will not be transferred.
- **Remedial or Developmental Courses** – Credit will not be accepted for transfer, and the credit hours for these courses will not be reflected on the student's academic record at Texas Tech.
- **Nonaccredited Institution Courses** – Nonvocational, college-level courses from a nonaccredited institution may be posted to the student's academic record only after the student has validated the credits for transfer with the student's academic dean according to Texas Tech policy.

Texas Common Course Numbering System (TCCNS)

The Texas Common Course Numbering System (TCCNS) has been designed to aid students in the transfer of general academic courses between Texas public colleges and universities throughout the state. The system ensures students that courses designated as common will be accepted for transfer, and the credit will be treated as if the courses had actually been taken on the receiving institution's campus. Texas Tech courses identified as common will have the Common Course Number listed in brackets in each course description. For more information concerning the Texas Common Course Numbering System, please visit the TCCNS web page at www.tccns.org. Visit www.reg.ttu.edu for information on how your credit will transfer.

Transfer Disputes Involving Lower-Division Courses

If a dispute occurs involving the transfer of lower-division courses, the Texas Higher Education Coordinating Board has established the following procedures to resolve the dispute:

- If an institution of higher education does not accept course credit earned by a student at another institution of higher education, the receiving institution shall give written notice to the student and to the sending institution that transfer of the course credit is denied. The receiving institution shall also provide written notice of the reasons for denying credit for a particular course or set of courses at the request of the sending institution.
- A student who receives notice as specified above may dispute the denial of credit by contacting a designated official at either the sending or the receiving institution.
- The two institutions and the student shall attempt to resolve the transfer of the course credit in accordance with Coordinating Board rules and guidelines.
- If the transfer dispute is not resolved to the satisfaction of the student or the sending institution within 45 days after the date the student received written notice of denial, the institution that denies the course credit for transfer shall notify the Commissioner of Higher Education of its denial and the reasons for the denial.

The Commissioner of Higher Education or the Commissioner's designee shall make the final determination about a dispute concerning the transfer of course credit and give written notice of the determination to the involved student and institutions. The Coordinating Board shall collect data on the types of transfer disputes that are reported and the disposition of each case that is considered by the Commissioner or the Commissioner's designee.

If a receiving institution has cause to believe that a course being presented by a student for transfer from another school is not of an acceptable level of quality, it should first contact the sending institution and attempt to resolve the problem. In the event that the two institutions are unable to come to a satisfactory resolution, the receiving institution may notify the Commissioner of Higher Education, who may investigate the course. If its quality is found to be unacceptable, the Coordinating Board may discontinue funding for the course.

Approval for Concurrent Attendance at Other Institutions

Prior written approval is not required for students registered at Texas Tech who wish to register concurrently at another institution. Not all transferable coursework may be degree applicable. Students are strongly encouraged to discuss their course options with their academic advisor if they intend for the transfer coursework to apply to their Texas Tech degree plan. A student registered at another institution but wishing to enroll concurrently for credit at Texas Tech will be considered as a first-year or transfer (where appropriate) student and will be required to meet the standards for such students. Concurrent registration resulting in a combined enrollment beyond a maximum load at this institution will not be permitted.

Credit for Core Requirements Taken at Other Texas State Institutions

In accordance with the rules mandated by the Texas Legislature concerning the transfer of core curriculum: "If a student successfully completes the 42 semester credit hour core curriculum at an institution of higher education, that block of courses may be transferred to any other institution of higher education and must be substituted for the receiving institution's core curriculum. A student shall receive academic credit for each of the courses transferred and may not be required to take additional core curriculum courses at the receiving institution unless the board has approved a larger core curriculum at that institution." (Section 5.402, d)

Texas Tech will recognize and honor each core component area as indicated on the official college transcript from a Texas public institution.

Credit for Educational Courses Completed in the Armed Services

Credit may be given for formal service school courses completed in the armed services after evaluation of official documents by the Transfer Evaluation Office. The student's academic dean decides if credit awarded for such courses will be applied toward requirements for the bachelor's degree.

Texas Success Initiative (TSI)

The Texas Success Initiative (TSI) is a developmental education program mandated by the State of Texas to ensure that students enrolled in Texas public colleges and universities possess the necessary academic skills to succeed. State regulations require that all students enrolling in public higher education institutions demonstrate college readiness in reading, writing, and mathematics by earning passing scores on the TSI Assessment Test or providing proof of exempting ACT, SAT, or STAAR test scores; an associate's or bachelor's degree from an accredited public institution of higher education; honorable discharge from the U.S. military; or active U.S. military service. More information can be found at www.depts.ttu.edu/registrar/private/tsi. Students with questions about their status regarding the Texas Success Initiative should contact the TSI Compliance Office at 806.742.3661.

The TSI Assessment Test is available through Academic Testing Services, 214 West Hall, 806.742.3671. Students will need to present their driver's license or passport for identification purposes. After testing, students must submit their test scores to the TSI Compliance Office, 103A West Hall.

Students who have tested but did not meet the minimum scores in one or more sections of the TSI Assessment are required to meet with their academic advisor to determine an individual plan, including enrollment in required TSI developmental coursework, to ensure the student's academic success in their selected major and beyond.

Red Raider Orientation

Red Raider Orientation (RRO) is a mandatory program designed to provide all incoming undergraduate students an opportunity to meet with an academic advisor, register for classes, gather information about Texas Tech programs and services, and learn the history and traditions of the university. All new undergraduate students are required to attend RRO in order to register for classes. For more information, view www.orientation.ttu.edu, email orientation@ttu.edu, or call 806.742.2993.

Special Programs

Academic Fresh Start

Any applicant who elects to participate in this program should do so **at the time of application** and must otherwise meet current freshmen or transfer admissions requirements. State residents may apply for admission to Texas public universities without consideration being given to academic work

completed 10 or more years prior to the semester in which the applicant seeks to enroll. An applicant who is admitted under this plan may not receive any credit for courses taken 10 or more years prior to enrollment. Applicants should complete a Transfer application at either ApplyTexas (goapplytexas.org) or Common App application (www.commonapp.org), as well as the Fresh Start application located on the Undergraduate Admissions website www.depts.ttu.edu/admissions/freshstart.php.

If a student enrolled under this program completes a prescribed course of study, earns a baccalaureate degree, and applies for admission to a post-graduate or professional program offered by a public institution of higher education, the admitting institution will only consider the grade point average earned after the student enrolled under this program (along with other criteria the institution used to evaluate applicants for admission). See www.admissions.ttu.edu/otheradmission for additional information and application.

Admission for Current High School Students

Texas Tech University supports several programs that allow students to attend courses at Texas Tech while they are still attending high school, including:

Compass Program. The Compass Program is designed to introduce academically gifted, intellectually curious, mature, and responsible high school students to the college curriculum at Texas Tech University. Selected high school candidates will be invited to enroll in Texas Tech University courses and to engage with college-level coursework, to be mentored by TTU faculty, and to experience the university while still enrolled in high school. Acceptance will be based on SAT/ACT scores, class ranking, and application packet. Email the Honors College (honors@ttu.edu) for more information or visit <https://www.depts.ttu.edu/admissions/compass/index.php>.

Early College High School. Texas Tech University has a partnership with Lubbock Independent School District (LISD) to support an Early College High School campus at Estacado High School. Visit www.lubbockisd.org for complete details on this unique partnership.

Senior Academy Program for Ages 55+

This program is designed for students age 55 and above, who are Texas residents, and who wish to enrich their later years through the adventure of lifelong learning. Adults eligible for Senior Academy can enroll either to earn a degree or take a series of classes for personal enrichment. There is no special application required; students should apply with the application type that matches their educational pursuit. For more information, visit the Office of Undergraduate Admissions website (www.admissions.ttu.edu/otheradmission). Students are encouraged to contact Student Business Services at sbs@ttu.edu to ensure that their benefit is applied.

Undergraduate Credit by Examination

It is the general policy of the university to recognize academic achievement of students gained by means other than through performance in organized classes. Students will be given the opportunity to receive credit by examination in all courses in which proficiency may be determined by examination. The award of credit by examination will be based upon the score requirements in place during the most current of the following, but no earlier than the student's first term of entry to Texas Tech University: (1) the first term of entry to Texas Tech University or (2) the term in which the scores are presented to Texas Tech University. Students may achieve a high level of proficiency in certain subject areas through advanced work in high school, participation in advanced placement programs, or independent study. The university strongly encourages such superior attainment, recognizes it for academic purposes, and permits students who have done such work to obtain course credit through examination.

Students at Texas Tech University may attempt credit by examination for degree credit during their first year, sophomore, junior, and senior years. The student is responsible for taking the tests early enough to allow sufficient time for scores to be reported to the university and processed by the Office of the Registrar. All students in the College of Arts & Sciences should see the Credit by Examination paragraph in the General Degree Requirements for

the College of Arts & Sciences for the college's regulations regarding credit by exam, including lead time required for graduation processing and for foreign language exams. Students classified as seniors in colleges other than Arts & Sciences should plan to attempt credit by examination prior to the semester of graduation. Seniors must notify their academic dean's office prior to attempting credit by examination and provide proof of notification upon registering for an exam at Academic Testing Services.

For those who successfully earn test credit, the grade will not be calculated into their grade point average but will appear on the transcript as follows depending on which test was taken: CLP, AP, DE, FLP, and IB. Course credit earned by examination is recorded by the registrar on the student's transcript as "(Number) hours of credit via credit by examination program in (course equivalent)," and no grade points are awarded. Course credit by examination may not be used to satisfy the 30-hour minimum residence credit requirement for graduation. Any current, former, or prospective Texas Tech student may attempt to earn undergraduate course credit using the designated exam options. Some credit-by-exam programs (AP and IB) are only administered at participating high schools. CLEP exams are a credit-by-exam option for several undergraduate subjects and are administered at Texas Tech throughout the year and during Red Raider Orientation. Students may not use credit-by-exam options to attempt to remove or replace a grade that has already been earned in a Texas Tech course. The student is responsible for complying with the following procedures:

1. All CLEP exams are computer-based. Appointments to use the computers and schedule the exams must be made through Academic Testing Services in 214 West Hall, 806.742.3671. For more information on CLEP, visit the Academic Testing Services website, www.depts.ttu.edu/testing or www.collegeboard.com.
2. The student is responsible for having test scores sent to Texas Tech University. CLEP scores must be sent to the university directly from College Board. The student is responsible for completing tests for lower-level courses in sufficient time to qualify for registering for higher-level courses.
3. Students classified as seniors should plan to attempt credit by examination prior to the semester of graduation. Seniors must notify their academic dean's office prior to attempting credit by examination and provide proof of notification upon registering for an exam at Academic Testing Services.
4. After the 12th day of classes, credit by examination may be attempted for a course one is enrolled in only upon written approval of the appropriate academic dean's office.
5. Matriculated students seeking credit by examination in foreign languages not offered through the CLEP program are required to work with Academic Testing Services to test via the 16-point exam given by the Foreign Language Proficiency Testing Service of the New York University School of Continuing and Professional Studies or the University of Pennsylvania Language Proficiency Testing Services. *(The requirement for sitting for the 16-point exam from New York University is uniform and applicable to all students unless an exception is requested. An exception is granted when the student's home college requires less than 16 hours of foreign language credit. Students may, on a case-by-case basis, request permission to complete the 12-point exam as an alternative to the 16-point exam. Requests will be reviewed by Academic Testing Services in consultation with the student's Academic Dean.)* If the language to be tested is not available through Texas Tech, New York University, or the University of Pennsylvania, the student must work through Academic Testing Services to locate another accredited university distance program. Credit by examination through other institutions' distance education programs may take two long semesters for scores to be reported to Texas Tech, and all language score reports subsequently must be evaluated by the Department of Classical and Modern Languages and Literatures to determine credit awarded. It is the student's responsibility to plan in advance, in consultation with the appropriate academic dean's office, for scores to arrive and evaluation credit to be applied to the transcript in time to meet individual deadlines.
6. In cooperation and compliance with federal nondiscrimination laws and policies, credit by examination is open to all persons. Students with mostly A and B grades who have higher admission test scores are encouraged to consider attempting credit by examination.
7. College Level Examination Program (CLEP) tests cannot be repeated before three months have passed.

8. Accommodations for nonstandard testing must be submitted in writing (before the test date) and supported by documentation from a professional who is licensed and certified to diagnose the disability. All requests are subject to approval and must be scheduled with Academic Testing Services, 214 West Hall, 806.742.3671.

A student may earn course credit by examination from the following approved programs:

- **AP** – Advanced Placement Examinations that are a part of the College Board Advanced Placement Program available in a limited number of secondary schools.
- **CLEP** – Specified subject examinations of the College Board College Level Examination Program.
- **IB** – The International Baccalaureate (IB) diploma and/or examinations, dependent upon departmental evaluation.
- Departmental examinations prepared, administered, and scored by faculty members who teach the related course.

Many courses in the credit-by-examination program are prerequisites for higher-level courses; therefore, students seeking credit by examination must plan so that this credit can be assured before registering for advanced courses. Information regarding test dates and fees for national standardized examinations is available from Academic Testing Services at Texas Tech. It is the student's responsibility to request that test scores be sent to the university. Information concerning each of the testing programs is provided in this section, but students should note that policies and fees are subject to change.

Credit for Advanced Placement (AP) Examinations. The Advanced Placement Examination is the standardized final exam for a course offered in participating secondary schools. The objective of the AP is to allow students to begin work toward college credit while still in high school. Students should check with their high school counselor or principal as to the availability of the AP examinations in their school. The AP exam is offered once a year during May at designated high schools. AP scores are reported to the university in July.

Credit for College Level Examination Program (CLEP). Under the College Level Examination Program, the university will award credit only for specified examinations. Accepted exams vary among institutions, so students should be aware of which exams are accepted at Texas Tech. As with the other College Board testing programs, a student may attempt a CLEP examination at a national CLEP testing center before enrolling and have the scores reported to the university. However, these examinations are offered on the Texas Tech campus during Red Raider Orientation conferences, as well as several times each month throughout the year.

NOTE: Scores accepted for credit vary among universities. Students are responsible for knowing what scores are accepted at Texas Tech. Required scores are psychometrically scaled conversions and do not correlate on a one-point, one-question basis, nor is the required score a percentile.

Further information about the CLEP tests may be obtained from a high school counselor or principal; www.collegeboard.com; or Academic Testing Services, Texas Tech University, Box 45002, Lubbock, TX 79409-5002, 806.742.3671.

Credit by Departmental Examination. Any current or former Texas Tech student (or prospective student) may attempt to earn credit by examination for any undergraduate course provided the student has neither passed nor failed that course at Texas Tech. Under certain circumstances, departments within the university may prepare, administer, score, and award credit for their own examinations. Credit for specific courses is given upon satisfactory performance of the comprehensive examinations that are administered by the departments responsible for the courses and recommended by the deans of the respective colleges. To be eligible to attempt credit by departmental examination, a student must not have previously audited, enrolled in, or attempted credit by examination in the course. A student must apply in writing to the responsible department at least 30 days prior to taking a departmental examination for credit. Course credit earned by Texas Tech University departmental exam is not guaranteed to transfer to another institution. Further information regarding any credit by departmental examination should be secured directly from the academic department concerned.

Credit for International Baccalaureate (IB) Examinations and/or Diploma. The International Baccalaureate is an international program of courses and examinations offered at the high school level. Texas Tech

welcomes students in the IB program and will grant a minimum of 24 hours credit for an IB Diploma completed with Higher or Standard Level exam scores of 4 - 7. For those individuals who participate in IB courses but do not have an IB Diploma, individual course credit may be earned based on the subject and score obtained on specified IB exams. Students must send an official IB examination transcript to Texas Tech to receive credit.

Undergraduate Admission Requirements for Specific Colleges

Undergraduates who are accepted for admission to Texas Tech University will be enrolled in one of the academic units of the university listed below. In addition to university admission requirements, individual degree programs may have admission requirements that must be met before acceptance into the program.

Office of the Provost

- The admission requirements of this academic unit are the same as those for the university.

Davis College of Agricultural Sciences & Natural Resources

- The admission requirements of the college are the same as those for the university.

Huckabee College of Architecture

- Admission requirements for First-Year Undergraduate students are the same as those for the university.
 - Admission into the second year of the pre-professional program occurs at the end of year one and is competitive and based on a comprehensive review of the student's portfolio, writing sample, and GPA.
- Transfer students choosing to major in architecture will be admitted to architecture by transferring with a 3.0 GPA.
 - Placement within the program is based on portfolio, transcript, and statement of intent.

College of Arts & Sciences

- With the exception of the following majors, the admission requirements of the college are the same as those for the university.
 - First-time freshmen wishing to major in Biology, Microbiology, or Cell & Molecular Biology must meet assured admission criteria. Transfer students wishing to enter these majors must have a 2.5 minimum GPA on transferable hours taken. (*Effective fall 2018 and thereafter.*)
 - First-time freshmen wishing to major in Physics must meet assured admission criteria. Transfer students wishing to enter this major must have a 2.25 GPA on transferable hours taken. (*Effective spring 2019 and thereafter.*)
 - Transfer students choosing to major in Renewable Energy must have a minimum 2.25 GPA on transferrable coursework. Returning students who choose this major must have a 2.25 GPA on Texas Tech hours earned.
 - Returning students who wish to major in Geosciences, Kinesiology, and Sport Management must have a 2.5 GPA on Texas Tech hours earned.
 - Students who transfer to Texas Tech from other institutions, TTU students who wish to switch their major from another discipline, and TTU students who are second-semester freshmen must meet the 2.0 GPA threshold to be eligible for a major in Sociology.
 - Students who wish to declare a major in Sociology during their first semester as freshmen will be exempt from the 2.0 GPA minimum until their second freshman semester. Continuing students in Sociology must have a minimum 2.0 GPA.
- Freshmen or transfer students who are considering majors within this college may be admitted into a general major known as Arts & Sciences Undeclared (AS-BA-ASUD) until they select an A&S degree program in which they intend to graduate. Students transferring from

another institution with less than 30 hours (including coursework in progress) may choose ASUD. Students who have completed 30 or more hours must declare a major to be considered for admission to this college.

- Transfer students must have a minimum 2.0 transfer GPA to enter the college.

Jerry S. Rawls College of Business

- First-time freshmen wishing to major in any business discipline must meet assured admission criteria. Upon completion of the lower-division business core with grades of C or higher and attainment of a minimum 2.75 Texas Tech GPA, students may declare a major. For more information on majors, check the Jerry S. Rawls College of Business section of the catalog.
- Students transferring from any institution must have MATH 1330 (TCCN MATH 1324) with a grade of C or better and a minimum of 15 transferable hours with a minimum 2.75 transfer GPA. Transfer GPA includes all transfer coursework completed prior to attending Texas Tech University.

College of Education

- The admission requirements of the college are the same as those for the university.
- Freshmen and transfer students wishing to become teachers will major in Education. The Education degree will also allow for certification in Bilingual Education, Special Education, or English as a Second Language. Students wishing to become science teachers (grades 7-12) may major in multidisciplinary science.
- Students who major in the college or who major in another college and wish to become teachers must apply for admission to the Teacher Education Program. Requirements are available online at <http://www.depts.ttu.edu/education/apply-now/undergraduate.php>.
- Students must be able to meet the 2.75 GPA requirement for admission to the teacher preparation program in order to be accepted. Transfer students should consider the completed number of hours and GPA before completing a transfer to the College of Education.

Edward E. Whitacre, Jr. College of Engineering

- First-time freshmen or transfer students with fewer than 12 transferable credit hours must be accepted to the university with assured admission status. First-time freshman students who do not qualify for assured admission will be holistically reviewed for admission into the college by Whitacre College of Engineering staff. Applicants who are accepted to the college will be placed into their program of choice and initially work to complete a foundational curriculum.
- Students who are not directly admitted to the Whitacre College of Engineering but still intend to pursue an engineering degree will be initially admitted to the Explore STEM designation.
- Upon completion of the foundational coursework and attainment of departmental required TTU GPA, students will be moved into their upper-division degree program. Students who are not successfully admitted to an upper-division degree program must transfer out of the college.
- Transfer students must have 24 or more hours of transferable coursework and have a minimum cumulative GPA of 2.75 that includes the work at all previous institutions. Regardless of the number of hours and the specific courses included in the transfer credits, external transfer students are initially accepted into the lower-division foundational curriculum of their degree program and must complete a minimum of 12 hours of Texas Tech coursework before application to the upper-division degree program. Eligibility for admission to the upper division is based exclusively on the Texas Tech cumulative GPA prescribed by each department. Transfer students with fewer than 24 hours of transferable credit will begin in Explore STEM.

Honors College

- Students interested in admission to the Honors College must apply at honors.ttu.edu/admissions. Application to the Honors College is made separately from admission to Texas Tech. Space in Honors is limited and the applicant pool is highly competitive. Application

reviews are conducted holistically, though the College recommends that incoming first-year students have a minimum score of 1360 on the SAT or 29 on the ACT and be in the top 10% of their high school's graduating class. Current Texas Tech students or prospective transfer students should have a minimum GPA of 3.5. Special care is taken in reading the essays or portfolio items submitted on the application. While good scores and class rank may be positive attributes to the candidate's dossier, they do not guarantee an invitation to the Honors College.

- The Honors application opens on July 1. The priority deadline for students wishing to be considered for Honors scholarship awards is December 1. The final deadline for first-time in college students for the fall term is March 1.
- Admission to the Honors Sciences and the Humanities (HSH) major is contingent on successful admission to the Honors College. The HSH major is not a requirement for admission to Honors.

College of Health and Human Sciences

- First time in college students meeting the admission requirements of the university will be admitted to any major within the College of Health and Human Sciences with the exception of Interior Design, which requires incoming freshmen to qualify for assured admission. Applicants not meeting assured admission will be placed into the Interior Design undeclared major.
- For transfer admission into Interior Design, students must have at least a 2.7 GPA. Applicants not meeting minimum GPA requirements will be placed into the interior design undeclared major.
- Students seeking teacher certification in Early Childhood Education or Family and Consumer Sciences Education must meet university requirements for admission to the Educator Preparation program, including 60 credit hours completed toward the student's major and a 2.75 cumulative GPA. (Excludes Early Childhood Education, B.A.A.S.)
- Students who do not qualify to be directly admitted to the program of their choice in the College of Health and Human Sciences but still intend to pursue a degree in that program area will be initially admitted to the appropriate undeclared designation.

College of Media & Communication

- The admission requirements of the college are the same as those for the university.

J.T. & Margaret Talkington

College of Visual & Performing Arts

- The academic admission requirements of the college are the same as those for the university. In addition, specific programs require a portfolio, audition, and/or interview.
- Students entering the School of Art will be initially admitted to art incoming (ARTI). A portfolio or other academic review during the first year will be required for entry into a specific emphasis area. Please see the School of Art entry in this catalog for additional information.
- Students applying to the School of Music will be initially admitted to music audition required (MUAR) until their audition. Music majors must audition and be admitted into their declared principal applied area with the appropriate faculty for acceptance into any music program. Prospective students should contact the School of Music directly to inquire about audition requirements and the timing of auditions for each specific program.
- Students applying to the School of Theatre & Dance will be initially admitted to theatre and dance admitted (THDA). Entrance to the B.F.A. theatre arts program is by audition and interview. Students pursuing dance majors, minors, and concentrations must audition for acceptance into any dance program. Prospective students should contact the School of Theatre & Dance directly to inquire about audition requirements and the timing of auditions for each specific program.
- Art or music students who do not submit a portfolio or who do not pass an audition will be changed to Visual & Performing Arts Undecided (VPUD).

Admission Requirements for Undergraduate International Students

Jason Hale, Assistant Vice President

Office of Undergraduate Admissions
West Hall | Box 45005 | Lubbock, TX 79409-5005
T 806.742.1480 | F 806.742.0062

International Admission. See Office of Undergraduate Admissions for additional information regarding admission of international students.

Residency Status Determination. For rules governing the determination of residency status as defined by the Texas Higher Education Coordinating Board, search “residency” at www.collegeforalltexans.com. Additional information and forms can be found at www.depts.ttu.edu/admissions/residency/ and www.depts.ttu.edu/admissions/apply/residency/.

Individuals who do **NOT** meet any of the criteria below should complete an international application to Texas Tech University.

Individuals who meet the criteria listed below should complete a domestic application to Texas Tech University:

- U.S. Citizens
- Permanent Residents
- Individuals who have a pending application for Permanent Residency
- Individuals meeting all of the following criteria:
 - Have graduated or will graduate from a public or accredited private high school/secondary school in Texas or received the equivalent of a high school/secondary school diploma in the state, AND
 - Lived in Texas for the 36 months immediately preceding the date of high school graduation, AND
 - Lived in Texas for the 12 months preceding the census date of the academic semester in which the student enrolls at Texas Tech University.

Meningitis Vaccine. The Texas Education Code, Section 51.9192 requires all students under the age of 22 years entering a public institution of higher education in Texas to provide documentation that they have had a meningococcal (bacterial meningitis) vaccine within the last five years. Visit <https://www.depts.ttu.edu/studenthealth/newstudents/> and <https://www.depts.ttu.edu/studenthealth/internationalstudents/> for more information.

Texas Senate Bill 1107 (now TEC 51.9192) requires all students entering an institution of higher education (public and private) to either receive a vaccination against bacterial meningitis or meet certain criteria for declining such a vaccination before the first day of the semester. In addition to a current meningitis vaccine, Texas Tech University also requires the submission of two doses of Mumps, Measles and Rubella (MMR).

There may be additional Tuberculosis screening requirements for international students traveling from specific countries. Please visit the Student Health Services website for additional information regarding immunization requirements: <https://www.depts.ttu.edu/studenthealth/newstudents/>.

General Guidelines

- Applicants may be considered for admission to the undergraduate divisions of the university by graduation from an accredited high school or equivalent or by transfer from an accredited college. Graduates of foreign secondary schools who have completed the equivalent of a U.S. high school diploma may apply for admission to Texas Tech University. The completed application, test scores, prior conduct findings, and other applicable qualifying factors constitute the basis upon which eligibility is considered. Students who meet the stated requirements may reasonably expect to be admitted. However, additional factors may be considered in determining the applicant's admission. The admission of some applicants may be deferred in order to ensure sufficient resources to serve all enrolled students effectively. To be

considered for admission, applicants must be eligible to return to all prior institutions.

- All new students will be admitted to the university and then to a college and major. Texas Tech University may assign a major if the applicant does not meet the qualifications for a chosen major. A college or major may have admission requirements in addition to the university requirements. Please check the TTU online catalog for admission requirements for specific colleges.

Applications and Deadlines

International applicants are encouraged to submit all official documentation prior to the priority deadlines listed below for early processing and consideration for merit scholarships. The Office of Undergraduate Admissions will continue to accept and process applications beyond these dates.

Choose from the following sources and submit one application electronically.

- goapplytexas.org
- commonapp.org
- TTU International Application (https://texastech.my.site.com/iadmission/TX_SiteLogin?startURL=%2Fiadmission%2FTargetX_Portal_PB)
- Fall 2025 First-Time and Transfer Students
Priority deadline to complete application process: May 1, 2025
Final deadline to submit application: August 1, 2025
- Spring 2026 First-Time and Transfer Students
Priority deadline to complete application process: November 1, 2025
Final deadline to submit application: January 1, 2026
- Summer 2026 First-Time and Transfer Students
Priority deadline to complete application process: March 1, 2026
Final deadline to submit application: May 1, 2026
- Fall 2026 First-Time and Transfer Students
Priority deadline to complete application process: May 1, 2026
Final deadline to submit application: August 1, 2026
- Spring 2027 First-Time and Transfer Students
Priority deadline to complete application process: November 1, 2026
Final deadline to submit application: January 1, 2027

TTU Costa Rica Deadlines:

- Priority deadline to complete the application process:
Fall – August 1
- Priority deadline to complete the application process:
Spring – January 1

For additional information concerning programs offered at TTU-Costa Rica, please visit: <http://www.depts.ttu.edu/costarica/>.

Submitting Documentation

Students are highly encouraged to apply early and submit all required documentation as requested. All required documentation must be submitted to and received by the Office of Undergraduate Admissions in order for applications to be evaluated. All materials become the property of Texas Tech University and are not returnable or refundable.

1. Students are required to submit official transcripts from all institutions attended. Falsification or omission of information during the application/admission process may result in denial of admission to the university or admission being rescinded.
2. All documentation must be in PDF form. Required documents must be provided in the indigenous language and in English. If official English translations are not supplied by the applicant's institution(s), the applicant must request a translation done by an American Translators Association-certified translator.
 - A list of ATA-certified translators is available online at www.atanet.org/online directories. The official translated documents must be sent from the translating agency directly to Texas Tech University.
 - Texas Tech will accept an unofficial high school/college transcript for evaluation purposes only. Students will still be required to submit official documentation from all institu-

tions attended for final admissions processing. The unofficial document(s) may be submitted in the following manner:

- Students may upload supplemental documentation through [RaiderConnect](#) (letters of recommendation, essays, and resumes).
 - All **official documentation** must be submitted from the student's previous high school, institution, or the testing agency directly to Texas Tech University – Office of Undergraduate Admissions to complete the applicant's file.
 - Students can request this process through their school counselors/Registrar. These school officials can do the following:
 - Contact the Undergraduate Admissions office to submit official documentation through the TTU Counselor Portal: internationals@ttu.edu
 - Submit official documentation electronically through TReX, SPEEDE, eScrip-Safe, National Student Clearinghouse, or Parchment
 - Submit official documentation with official signatures and school seals in a sealed envelope via mail to: Office of Undergraduate Admissions - 2500 Broadway, Lubbock, TX 79409-5005
 - All official test score reports must be sent directly from the testing agency to the Office of Undergraduate Admissions. Students should choose the correct institutional code for undergraduate admissions when requesting score reports to avoid delays in admissions processing. (SAT Code: 6827 / ACT Code 4220).
 - If admitted, official documentation must be submitted prior to matriculation. If official documentation is not received prior to matriculation, a hold will be placed on the student's account preventing registration and/or the admission decision may be rescinded.
3. Applicants will be notified by the Undergraduate Admissions Office when an admission decision has been made. Students may check their application status at www.raiderconnect.ttu.edu.
 4. Note: *Processing may take up to 4 weeks depending on the timely submission and receipt of official documentation.*

If mailing documentation, counselors may submit official documentation to the following address:

Regular Airmail

Office of Undergraduate Admissions
2500 Broadway
Box 45005
Lubbock, TX 79409-5005 USA

Express Mail

Office of Undergraduate Admissions
2500 Broadway
Box 45005
Lubbock, TX 79409-5005 USA

Test Optional Policy

Texas Tech University has enacted a test optional admission policy for students through the Fall 2026 term. This policy allows students the option to apply without consideration of SAT or ACT scores. At the time of application, students will share their plans regarding the submission or consideration of SAT or ACT as part of their application. Students selecting this option will have their application and supplemental information evaluated in a holistic manner. In lieu of these test scores, students are encouraged to submit additional material (detailed in the Supplemental Application Items below) that they feel best highlights their skills, talents, and potential contributions to Texas Tech.

Supplemental Application Items

- Essays
- Letter(s) of Recommendation
- College Transcripts for Dual Credit, AP Exams
- IB, Exit Exams, any other test scores or certificates
- Resume

Evaluation for Admission

If a student wishes to be evaluated under the test optional policy, their application and supplemental information will be evaluated holistically in the following manner:

- Some applicants may feel the SAT or ACT does not fully reflect their academic performance. These students are strongly encouraged to submit additional documentation that would reflect the items listed above.
- If a student supplied a test score prior to submitting the application and chooses on the application to be reviewed test optional, the test score will not be visible to those reviewing the file for admission.
- A review committee will examine each applicant's file to identify their achievements and the challenges they faced, hoping to identify the way the applicant took advantage of the opportunities presented to them.
- The file will be evaluated for intellectual curiosity and academic rigor, demonstrated leadership and problem-solving ability, contributions to community, socioeconomic background and family responsibilities, special talents and awards, and diversity of experience and background.
- After the holistic review, a decision will be rendered by the review committee for test optional students.
- If a student was evaluated test optional and denied, the student may choose to submit a test score and request a reevaluation with the score being considered. Students should contact their admissions counselor for information.

Test Optional: Scholarship Consideration

Texas Tech University is proud to offer a high-quality education at an affordable cost. TTU continues to be recognized as a best value university for your return on investment. Students who apply test optional will be evaluated holistically for merit scholarships.

While students may be test optional for admissions, students still have the opportunity to submit test scores for merit scholarship consideration. Students are able to submit scores until May 1 of their senior year to qualify for merit scholarships. After that, merit scholarships are available based on availability of funding. Students are considered for competitive-based scholarships with their application for admission.

This policy has been approved by the Texas Tech University System Board of Regents (May 2020).

International Undergraduate Students: First-Time Students

Applicants must complete the following:

1. Create an international student account for uploading documentation and checking application status at www.raiderconnect.ttu.edu.
2. Submit an international first-time student application and pay a nonrefundable application fee.
 - goapplytexas.org
 - commonapp.org
 - TTU International Application (https://texastech.my.site.com/iadmission/TX_SiteLogin?startURL=%2Fiadmission%2FTargetX_Portal_PB)
Students applying to the Texas Tech Costa Rica campus should submit a first-time student or transfer application and pay a nonrefundable application fee at <https://texastech.force.com/iadmission>.
3. Complete the following steps:
 - Pay the application fee. Application fees are nonrefundable and cannot be waived.
 - The fee may be paid by credit card during the online application process (Visa, MasterCard, American Express, or Discover).
 - Fees may also be paid online through TouchNet/PayPal using the following link: (https://secure.touchnet.net/C20210_ustores/web/store_main.jsp?STOREID=14&SINGLESTORE=true)
 - If the student does not have a credit card, they may choose the check/money order payment option during the application

process. The fee may be paid by checks drawn on a U.S. bank, cashier's checks, U.S. or international postal money orders, international money orders, or traveler's checks. Fees may be mailed to the address below.

Undergraduate Admissions
Texas Tech University
2500 Broadway
Lubbock, TX 79409-5005 USA

- Provide a high school/secondary school transcript showing GPA and class rank. Applicants that provide a transcript without a rank will have a rank assigned. Senior courses in progress must be provided on the transcript, a grade report, or listed on the ApplyTexas, International App, or CommonApp application form. *A final official high school/secondary school transcript showing graduation date will be required after graduation and will become part of the student's permanent record. This official document should be sent directly from the high school/institution to the Office of Undergraduate Admissions through the Counselor Portal.*
- Have college entrance test scores, either the SAT or the ACT, sent from the testing agency to Texas Tech University – Undergraduate Admissions Office at the time the test is taken. If it has been five years or more since high school graduation, the requirement to take the SAT or ACT test will be waived.
 - Please choose the correct institutional code for undergraduate admissions when requesting test scores for TTU. Failure to do so will result in delays for admissions processing.
 - SAT: Texas Tech University's Institutional code for Undergraduate students is **6827**.
 - ACT: Texas Tech University's Institutional code for Undergraduate students is **4220**.
 - If transferring with fewer than 12 transferable completed hours, applicants must meet the same standards for admission as required of new first-time students entering from high school and have a minimum 2.0 transferable GPA in work completed. Applicants enrolled in their first semester of college after high school graduation should apply as transfer students, but are required to submit a high school transcript and SAT or ACT scores and meet first-year admission requirements. *(Students are required to submit official transcripts from all institutions attended. Falsification or omission of information during the application/admission process may result in denial of admission to the university or admission being rescinded.)*
- All international undergraduate applicants must provide official proof of English proficiency. Texas Tech accepts a variety of [English proficiency exams](#) as proof of proficiency. If admitted, the applicant will be required to submit official results from the test provider. Please choose the correct institutional code for the Office of Undergraduate Admissions when requesting test scores for TTU. Failure to do so will result in delays for admissions processing.

Education systems and content offerings vary depending on country and location. The following course listings provide general guidelines for admission consideration:

| High School Subjects | Units Required |
|---------------------------------|----------------|
| English | 4 |
| Mathematics ¹ | 4 |
| Laboratory Science ² | 4 |
| Foreign Language ³ | 2 |

¹ Algebra I, Geometry, and Algebra II are the courses recommended for admission.

² Biology I, Chemistry I, or Physics I are the courses recommended for admission.

³ If two years of a single foreign language are not completed in high school, at least two semesters of a single foreign language may be required at the college level.

Assured Admission

Prospective international undergraduate students can reasonably be assured admission if they present the combination of class rank, minimum test scores, and proof of English proficiency. Applicants that provide a transcript without a rank will have a rank assigned.

For the purposes of assured admission, the chart below will be used to make admission decisions regarding first-year international applicants.

Criteria for Assured Admission

| High School Class Rank | Minimum Test Scores for Assured Admission* | |
|--|--|-------|
| | ACT | rSAT† |
| Top 10 Percent | No Minimum | |
| First Quarter (other than top 10 percent) | 24 | 1180 |
| Second Quarter | 26 | 1240 |
| Third Quarter | 27 | 1280 |
| Fourth Quarter | Application Review | |

* ACT composite score; SAT reflects evidence-based reading and writing, and math; the highest section scores from multiple tests on the ACT and SAT will be used to maximize score.

† Revised SAT

Admission will be granted to students who hold competitive scholarships awarded by an official Texas Tech scholarship committee.

Admission Review

Applicants who do not meet assured admission criteria will have their records reviewed in order to evaluate other factors that could predict success at Texas Tech University. A committee will review applicants individually in a holistic manner. Academic performance, standardized test scores, English proficiency, and educational preparation are specifically considered for admission. Additional information used to evaluate a student's potential for success includes, but is not limited to, the following:

- High school coursework, including advanced rigor
- Extracurricular activities
- Leadership experiences
- Civic or other service activities
- Special talents or awards
- Diversity of experience
- Conduct findings

An essay submission for the ApplyTexas Application, International App, or CommonApp and up to three letters of recommendation are strongly encouraged for students who do not meet the assured admission requirements.

Scholarship Information

International students who are interested in applying for merit-based scholarships must submit SAT or ACT test scores. SAT official test scores must be received directly from the College Board. For the SAT, Texas Tech University's Institutional code for undergraduate students is **6827**. ACT official test scores must be received directly from ACT. For the ACT, Texas Tech University's Institutional code for all undergraduate students is **4220**.

Non-residents awarded a Texas Tech competitive scholarship of \$1,000 or greater will qualify to pay in-state tuition.

Students interested in competing for merit scholarships should check the scholarship website (www.depts.ttu.edu/scholarships/) for deadlines and additional information.

Admission will be granted to students who hold competitive scholarships awarded by an official Texas Tech scholarship committee. International students must also meet English proficiency requirements.

International Undergraduate Students: Transfer Applicants

International undergraduate students who have attended an accredited college beyond high school/secondary school graduation should apply as an international transfer student and may be accepted for admission to Texas Tech provided they meet admission requirements. Falsification or omission of application information can void admission to Texas Tech University. *Students are required to submit official transcripts from all insti-*

tutions attended. Falsification or omission of information during the application/admission process may result in denial of admission to the university or admission being rescinded.

Students must be eligible to return to all previously attended schools.

Transfer applicants may be admitted to the university in one of the following three ways.

- Transfer of 24 or more hours from an accredited institution with a minimum grade point average of 2.25 and eligibility to return to the institution most recently attended.
- Transfer of 12 to 23 hours, including at least 12 hours of required basic courses, from an accredited institution with a minimum grade point average of 2.5 and eligibility to return to the institution most recently attended.
- If transferring fewer than 12 hours, applicants must meet the same standards for admission as required of new first-time student applicants entering from high school and have a minimum 2.0 transferable grade point average in work completed.

Applicants must complete the following:

- Create an international student account for uploading documentation and checking application status at www.raiderconnect.ttu.edu.
- Submit an international transfer student application and pay a nonrefundable application fee.
 - goapplytexas.org
 - commonapp.org
 - TTU International Application (https://texastech.my.site.com/iadmission/TX_SiteLogin?startURL=%2Fiadmission%2FTargetX_Portal_PB)
Students applying to the Texas Tech Costa Rica campus should submit a first-time student or transfer application and pay a nonrefundable application fee in the TTU International Application.
- Complete the following steps:
 - Pay the application fee. Application fees are nonrefundable and cannot be waived.
 - The fee may be paid by credit card during the online application process (Visa, MasterCard, American Express, or Discover).
 - Fees may also be paid online through TouchNet/PayPal using the following link: (https://secure.touchnet.net/C20210_ustores/web/store_main.jsp?STOREID=14&SINGLESTORE=true).
 - If the student does not have a credit card, they may choose the check/money order payment option during the application process. The fee may be paid by checks drawn on a U.S. bank, cashier's checks, U.S. or international postal money orders, international money orders, or traveler's checks. Fees may be mailed to the address below.

Undergraduate Admissions
2500 Broadway
Box 45005
Lubbock, TX 79409-5005 USA

- Provide official transcript(s) of academic records from all institutions in which the applicant has been or is currently enrolled. Applicants must be eligible to return to the institution most recently attended.
 - If transferring with fewer than 12 transferable completed hours, applicants must meet the same standards for admission as required of first-year students entering from high school/secondary school. Applicants enrolled in their first semester of college after high school graduation should apply as transfer students but are required to submit a high school transcript and meet first-year admission requirements.
 - Transfer applicants with 30 or more transferable hours must choose a major.
 - An unofficial copy of the high school transcript is necessary for academic advising prior to enrollment but not required for admission unless the student has fewer than 12 transferable hours.
 - In order to apply high school foreign language credits toward the basic foreign language requirements of Texas Tech University, students must provide an official copy of their high school transcript.
 - All international undergraduate transfer applicants must provide proof of high school/secondary school completion. (Graduation certificate/Diploma).

- All international undergraduate applicants must provide official proof of English proficiency. Texas Tech accepts a variety of [English proficiency exams](#) as proof of proficiency.
- A college or major may have admission requirements in addition to the university requirements. Texas Tech University reserves the right to assign a major if applicants do not meet the qualifications for their major of choice. Please refer to <https://www.depts.ttu.edu/admissions/advising/> for more information regarding transfer advising for international applicants.
- Some academic colleges and departments at Texas Tech only accept students who meet assured admission requirements. College entrance requirements are subject to change and are listed in the Texas Tech Undergraduate Catalog.
 - Architecture 3.0 GPA
 - Biology, Cell & Molecular Biology, Microbiology 2.5 GPA
 - Sociology 2.0 GPA
 - Renewable Energy 2.25 GPA
 - Kinesiology 2.75 GPA
 - Sport Management 2.75 GPA
 - Physics 2.25 GPA
 - Business 15 hours + 2.75 GPA and C or better on MATH 1330
 - Engineering 24 hours + 3.0 GPA
 - Honors College 3.5 GPA
 - Human Development & Family Sciences 2.5 GPA
 - Interior Design 2.7 GPA

Transfer Advising and Admission

Transfer Advising provides pre-transfer academic advising services to prospective students. The office advises high school/secondary school, community college, and four-year institution students who are Red Raider Bound. The key is for transfer students to work with transfer advisors early to make informed educational decisions identifying the courses and appropriate sequencing of coursework needed while at the prior institution to ensure successful applicability of earned transfer college credits toward a TTU degree.

Transfer advising includes review of transferable courses/credits, a degree checklist and discussion of how transferable credits will apply to a chosen TTU degree, course sequence planning, and course recommendations.

International undergraduate students who wish to transfer to Texas Tech University should complete the following:

- Search the Transfer Equivalency Table (<http://portal.reg.ttu.edu/transfer/teo>) to determine if the institution the student is transferring from is listed with Texas Tech University. If the institution is not listed, the student should follow the directions below.
- International undergraduate students who are already studying in the United States and wish to transfer from a domestic institution should provide copies of course syllabi (not course descriptions) and course content to their TTU admissions counselor prior to transferring to Texas Tech University.
- International undergraduate students who are studying outside of the United States and wish to transfer from an international institution should provide course syllabi (not course descriptions) and English translations of syllabi and course content to their TTU admissions counselor.

After receiving the transfer documentation from the student, the TTU admissions counselor will review the information and submit it to the Transfer Evaluation Office (TEO). TEO will assist with submitting the documentation to the individual departments to determine course equivalency and will apply credits to the student's program accordingly.

Assured Admission

Transfer applicants will be assured admission if they meet all admission requirements including the following (cumulative GPA is calculated with transferable credit only):

Transferable Credit

| Hours | Transfer GPA |
|-------|--------------|
| 12-23 | 2.5 |
| 24+ | 2.25 |

Admission Review

Transfer students who do not meet assured admission requirements but have at least a 2.0 transferable GPA will be reviewed holistically. The student's major, types of courses taken, and pattern of progress toward major, as well as high school records and standardized test scores may be considered in the admissions process. An essay explaining any extenuating circumstances is highly recommended.

Work in Progress

TTU Undergraduate Admissions will only consider coursework in progress for twelve months prior to a student's term of entry in order to provide a decision on application for admission. If a student is applying for a fall term, Undergraduate Admissions must have final grades for all coursework taken before the previous fall and prior; if a student is applying for a spring term, Undergraduate Admissions must have final grades for all coursework taken the previous spring and prior.

Scholarship Information

Transfer Scholarships are offered to students who are admitted as transfer students based on official transcripts submitted to the Office of Undergraduate Admissions.

Non-residents awarded a Texas Tech competitive scholarship of \$1,000 or greater (including Proven Achievers) will qualify to pay in-state tuition.

Students interested in competing for merit scholarships should check the scholarship website (www.depts.ttu.edu/scholarships/) for deadlines and additional information.

Admission will be granted to students who hold competitive scholarships awarded by an official Texas Tech scholarship committee. International students must also meet English proficiency requirements.

Official Proof of English Proficiency and High School Foreign Language Guidelines

All international applicants must provide proof of English proficiency before their applications can be considered for admission. International students can demonstrate English proficiency through exams, secondary and post-secondary course work, certificates, and waivers. Screenshots of scores will not be accepted. If admitted, the applicant will be required to submit official results directly from the test provider. See *Submitting Documentation for important details*.

Texas Tech University will accept any of the following as proof of English proficiency:

Exams:

- **TOEFL** (Test of English as a Foreign Language)
 - The minimum TOEFL score required to show proof of English Proficiency is 550 (paper-based version) or 79 (internet-based version).
- TOEFL Essentials is an internet-based test that is 50% academic English and 50% general English skills. The score required to show proof of English Proficiency is 8.5.
 - TOEFL scores must be received directly from the Educational Testing Service (ETS); Texas Tech University's institutional code for the Office of Undergraduate Admissions is **B100**. All TOEFL scores are valid for only two years.
- **IELTS** (International English Language Testing Service)
 - The minimum IELTS required score is an overall band score of 6.5 on the Academic version; IELTS General Training results are not acceptable. There is no IELTS institution code for Texas Tech University. IELTS scores are valid for only two years. Students

may upload the IELTS score sheet for verification by Texas Tech University.

- **SAT**
 - The minimum Evidence-based Reading and Writing score required to show proof of English Proficiency is 500. SAT Scores must be received directly from the College Board. Texas Tech University's Institutional code for Undergraduate students is **6827**.
- **ACT**
 - The minimum English score required to show proof of English Proficiency is 21. ACT scores must be received directly from the ACT organization. Texas Tech University's Institutional code is **4220**.
- **PTE Academic** (Pearson Test of English Academic)
 - The minimum required PTE Academic score is 60. PTE General and PTE Young Learners results are not acceptable. There is no PTE Academic institution code for Texas Tech University. PTE Academic scores are valid for only two years.
- **C2 Proficiency**
 - The minimum required C2 Proficiency grade is C. There is no institutional code for the C2 Proficiency. The C2 Proficiency is valid for life.
- **C1 Advanced**
 - The minimum required C1 Advanced grade is B. There is no institutional code for the C1 Advanced. The C1 Advanced is valid for life.
- **Duolingo English Test** (Online examination)
 - The minimum required Duolingo score is 100. There is no institutional code for Duolingo. Scores are reported within 48 hours and are valid for two years. Test scores must be sent directly from Duolingo to Texas Tech University International – Undergraduate.

High School/Secondary School or College Course Work:

- Attend two consecutive years of high school/secondary school in the United States.
- Attend two consecutive years in a high school/secondary school with U.S. accreditation or attend high school/secondary school within an English proficiency exempt country. See a list of exempt countries below.
- Achieve a grade of 4 or better in English on the IB diploma.
- Achieve a grade C or better in English on the A-Level GCE. This cannot be English as a second language (ESL courses), English literature, etc.
- Completion of the equivalent of TTU's ENGL 1301 + 1302 English courses with a grade of B or better at an institution with U.S. accreditation or an institution within English proficiency exempt country. This can include a literature, composition, speech, or English class. These cannot be remedial or ESL courses. See a list of exempt countries below.
- Complete 30 transferable credit hours at an institution with U.S. accreditation or an institution within an English proficiency exempt country. Remedial or ESL courses do not count towards the total credit hours. See a list of exempt countries below.

Certificates and Other:

- An ELS Educational Services (<https://www.els.edu/>) official transcript and certificate showing successful completion of ELS' English for Academic Purposes program level 112 as proof of English proficiency.
- Completion of any CEA accredited English program, or the equivalent thereof, as proof of English proficiency. Undergraduate Admissions requires the official transcript and certificate showing successful completion of the CEA accredited English program or equivalent. A list of CEA accredited programs can be found at <https://cea-accredit.org/accredited-sites>.

English Proficiency Waivers. The English proficiency requirement is waived only for the following reasons

- Applicants who are citizens of an English proficiency-exempt country.
- Applicants who have attended two consecutive years in a high school/secondary school with U.S. accreditation or attended high school/secondary school within an English proficiency exempt country. See a list of exempt countries below.
- Applicants who have completed 30 transferable credit hours at an institution with U.S. accreditation or an institution within an exempt country.

Texas Tech University considers the following countries to have English as their official language:

- Anguilla
- Antigua and Barbuda
- Australia
- Bahamas
- Barbados
- Belize
- Bermuda
- Canada (except the Province of Quebec)
- Cayman Islands
- Dominica
- Falkland Islands (Islas Malvinas)
- Ghana
- Gibraltar
- Grenada
- Guyana
- Ireland, Republic of
- Jamaica
- Kenya
- Liberia
- Micronesia Islands, Federated States of
- Montserrat
- New Zealand
- Nigeria
- Saint Kitts and Nevis
- Saint Lucia
- Saint Helena
- South Africa
- St. Vincent and the Grenadines
- Trinidad and Tobago
- Turks and Caicos Islands
- United Kingdom (England, Scotland, Northern Ireland, and Wales)
- United States
- Virgin Islands
- Zimbabwe

Guidelines for High School/ Secondary School Foreign Language

| Native Language | Language of Instruction (secondary school) | Exemption Requirements | Documentation Required |
|-----------------|--|--|---|
| Not English | Native Language | (1) English proficiency admission requirement, or (2) two years of formal instruction in another language | (1) English proficiency documentation, or (2) transcript, or (3) Foreign Language Exemption Form (requested through academic adviser) |
| Not English | English | (1) English proficiency admission requirement, or (2) graduation from secondary school, or (3) two years of formal instruction in another language | (1) English proficiency documentation, or (2) transcript, or (3) Foreign Language Exemption Form (requested through academic adviser) |
| English | English | (1) two years of formal instruction in another language | (1) transcript, or (2) Foreign Language Exemption Form (requested through academic adviser) |

If two years of a single foreign language are not completed in high school/secondary school, at least two semesters of a single foreign language may be required at the college level.

In order to apply high school/secondary school coursework or foreign language credits toward the basic foreign language requirements of Texas Tech University, students must provide an official copy of their high school/secondary school transcript to their international admissions counselor.

Admission Alternatives

First-year applicants who have been denied admission for the summer or fall semester are eligible to participate in alternative programs. Contact the Undergraduate Admissions Office for additional details regarding these programs.

Provisional Admission. It is strongly recommended that students supply all required documentation prior to an admission decision. Under certain circumstances, however, consideration of a provisional admission for international students may be merited. For TTU-Lubbock, students may be admitted provisionally; however, I-20 documentation will not be issued until official documentation has been received directly from the testing agency or previous institution. TTU-Costa Rica students may be admitted provisionally because there are no U.S. immigration restrictions for processing.

International undergraduate applicants may be provisionally admitted under the following conditions:

- Students have submitted all unofficial documentation as required for admission and receipt of official documentation from their previous institution or testing agency is pending. Full admission is contingent upon submission of all required documentation as outlined in admission standards.
- A registration hold will be placed on the student's record until the admission requirement has been satisfied.

Conditional Admission for English Proficiency. Prospective international students who meet the minimum academic requirements for admission consideration, except for proof of English proficiency, may apply for conditional admission through ELS University Admissions (<https://www.els.edu/>). International undergraduate students admitted conditionally must complete Level 112 of ELS English for Academic Purposes program before beginning an academic program at Texas Tech University. An official transcript documenting successful completion of ELS Level 112 must be provided by ELS directly to Texas Tech University before registration for Texas Tech coursework will be allowed.

Conditional Admission for Academics. Transfer applicants who are currently in attendance at another institution but do not meet assured admission requirements for Texas Tech will be considered for conditional admission using the following guidelines:

- Student must submit official transcripts for all work completed up to the point of application.
- The student's major, types of courses taken, and pattern of progress, as well as high school records and standardized test scores, may be considered in the admissions process. Successful transfer applicants usually have a GPA of 2.0 or higher.
- Applicants whose transfer GPA is less than 2.0 will be placed in pending status until a final official transcript is received for evaluation.

Once the final transcript is received and the work is evaluated, applicants meeting university GPA requirements may be fully admitted to the university. Admission for applicants whose final transcript brings them below the minimum GPA will be rescinded.

If admitted with work in progress, the admission decision will be conditional. Students can attend orientation and register for classes for one term with a conditional admission decision.

If the university is still missing a final transcript for the prior term on the 12th class day, a registration hold for the following term will be placed on the student's account and all final grades must be submitted to remove that hold.

Reactivation Requirements for Former Texas Tech Students

Students who were previously enrolled at Texas Tech University should refer to the criteria listed below. Official transcripts from all institutions attended subsequent to Texas Tech enrollment must be submitted by the priority deadline.

1. If a student wishes to return within the first two terms after leaving, they should complete the Former Tech Reactivation Form on

the Undergraduate Admissions website. Reactivation materials and deadlines for former Texas Tech students are available at https://www.depts.ttu.edu/admissions/apply/status/returning_other/former/

2. If a student wishes to return after an absence of more than two long semesters, they should contact the Office of Admissions for information on returning.
3. Students who were on probation, suspension, or second/subsequent suspension and are returning to Texas Tech should refer to the reactivation criteria under "Undergraduate Academic Standing Policy" in the Academic Requirements section of this catalog and on the website listed above.
4. Students wishing to return to Texas Tech are required to have a 2.0 GPA on work completed during their absence and no work in progress.
5. Former Tech students pursuing a second undergraduate degree must submit an application on goapplytexas.org and pay the application fee.

Any returning student who has completed an undergraduate degree and is returning to take prerequisite or other non-degree-seeking coursework must submit the transient (non-degree-seeking) application on goapplytexas.org.

Transient/non-Degree-Seeking Applicants

Students who are not seeking degrees at Texas Tech University but wish to take courses at the university should use the international transfer application through goapplytexas.org. The application fee is required. Fee waivers are not accepted. Students should provide official transcript(s) of academic records from all institutions in which the applicant has been or is currently enrolled. Applicants must be eligible to return to all previous institutions. Students should inform their counselor of their non-degree/transient status at the time of application. The admissions counselor will update the application type internally to non-degree/transient once the application is in the system.

Second Undergraduate Degree-Seeking Applicants

Individuals seeking a second bachelor's degree who have not previously attended Texas Tech should provide the following:

- Students who previously attended and graduated should submit the Former Tech application. (See above.) Individuals who have never attended Texas Tech University may submit an international transfer application through goapplytexas.org or www.commonapp.org. (Student should indicate they are seeking a second degree.)
- Application fee (Fee waivers are not accepted.)
- Official transcript(s) of academic records from all institutions in which the applicant has been or is currently enrolled. Applicants must be eligible to return to all previous institutions. The date and type of bachelor's degree must be reflected on the appropriate transcript. Texas Tech students who graduated with their bachelor's degree from Texas Tech do not need to send this transcript. An academic dean must approve admission to any program. The Office of Undergraduate Admissions will request this approval after the applicant's file is complete.

Application Appeals

The applications of prospective international students who do not meet initial admission requirements are reviewed holistically by the Undergraduate Admissions staff. The secondary review process will consider other indicators of English proficiency, academic performance to date, and potential for success at TTU. Students who are denied admission after the holistic review may file for an appeal.

International undergraduate applicants whose applications have been denied for any of the reasons listed below will receive a notification explaining the reason for the denial and the available appeals process.

Possible reasons for denial of admission:

- Cumulative GPA below requirements
- Transferable credit hours below requirements
- Lack of English proficiency

In the case of an admission denial based on both insufficient prior academic performance and lack of English proficiency, separate appeals must be submitted. The appeal of the academic performance decision will be considered first by the Executive Director of Undergraduate Admissions. *An unsuccessful appeal of the academic performance decision preempts an appeal of the English proficiency decision.*

Appeal Process for Prospective International Students

For an appeal to have merit, it should present new academic and/or personal information, as well as details pertaining to extenuating circumstances that were not addressed in the initial application. Appeal letters must be written and submitted by the international undergraduate applicant or the TTU unit representing the applicant to Jason Hale, Executive Director of Undergraduate Admissions, within thirty (30) days of the denial notification. Appeals must be sent directly to the Office of Undergraduate Admissions (mailing address below) or by email to jason.hale@ttu.edu.

Regular Airmail

Undergraduate Admissions
2500 Broadway
Box 45005
Lubbock, TX 79409-5005 USA

Express Airmail

Undergraduate Admissions
2500 Broadway
Box 45005
Lubbock, TX 79409-5005 USA

The appeal process for all international prospective students may consist of the following:

- If possible, the student may be asked to meet in person with the Executive Director of Undergraduate Admissions.
- The student may be asked to participate in a brief Skype (Zoom, FaceTime, etc.) interview.

The interview process may consist of the following:

- The student may be asked questions to engage him/her in conversation to assess English proficiency. Questions might include cultural experiences, transition to United States, career goals, global challenges, etc.
- The student may be given a prompt and asked to submit a (short) writing sample during the interview.
- The student may be given a passage to read and asked questions to ascertain comprehension during the interview.
- The student may be shown a photograph and asked to describe the photograph during the interview.

Admission Alternatives

Students who are denied admission can also consider the following options:

- Admission applications can be reevaluated for the term applied for if a student can provide additional documentation indicating an increase in English proficiency and/or an increase in GPA after attending an intercession at another institution. If a student were able to increase their English proficiency and/or increase their GPA during the intercession and provide updated documentation/transcripts, their original application would then be reevaluated for an admission decision.
- If a student were reapplying for a different term with updated documentation indicating an increase in their GPA or English proficiency, this would be considered a new application. Students may have only one active application per term.

International Prospective Student Athletes

The below stated requirements are different from the required minimum for other student populations because student athletes receive academic support services from the Marsha Sharp Center, including but not limited to:

Individual Academic Support

- Athletic Academic Advisor
- Learning Specialist/Language Coach
- General/Subject Tutor
- Academic Coach
- Ongoing academic monitoring for early intervention

Social Support

- Engagement in the athletics international student-athlete programming
- Connection with other current international student-athletes
- Emersion in team environment with both domestic and international students
- Connection with on campus services for student services

Assessments

- Optimal Performance Evaluation (Academic, Mental Health, Nutrition, ADHD, etc.)
- Learning Profile

An international prospective student athlete who has received a scholarship offer and meets NCAA eligibility requirements should complete their admissions file in a timeframe that allows an admissions decision to be made on or before the date that is one week before the start of international student check-in and orientation. Any exception must include a detailed explanation for the request and be approved by the Executive Director of Undergraduate Admissions.

English Proficiency for Prospective Student Athletes

All international applicants must provide proof of English proficiency in order to be admissible to the university. The TOEFL exam is the most widely used standard for measuring proof of English proficiency and therefore is listed as the standard in this policy; however, students may also demonstrate proficiency by meeting the minimum scores with other exams such as Duolingo, IELTS, SAT, Cambridge, etc. as listed in the TTU International Undergraduate Admissions Requirements.

TOEFL. The minimum TOEFL score required to show proof of English Proficiency is 55 (internet-based version) for prospective student athletes (PSAs) with scholarship offers. If the PSA's TOEFL score is 55 or above, and the PSA meets NCAA eligibility requirements, the student will be automatically admitted.

Duolingo. The minimum score for the Duolingo English Test (DET) required to show proof of English proficiency is 80 (internet-based version) for PSAs with scholarship offers. If the PSA's Duolingo score is 80 or above, and if he or she meets NCAA eligibility requirements, the student will be automatically admitted.

IELTS. The minimum score for the IELTS required to show proof of English proficiency is 5.5 for PSAs. If the PSA's IELTS score is 5.5 or above, and if he or she meets NCAA eligibility requirements, the student will be automatically admitted.

If the PSA's score is below the minimum threshold for TOEFL, Duolingo, or IELTS (or any other exam used by TTU to demonstrate English proficiency) and the PSA meets NCAA eligibility requirements, the PSA will be automatically eligible for a Secondary Review and requested appeal, if necessary.

Secondary Review and Appeals Process for Prospective Student Athletes

Secondary Review

Prospective Student Athletes who meet NCAA eligibility requirements and have been offered a scholarship but were ineligible for admission because of an inadequate English proficiency score on an approved test will automatically be slated for a Secondary Review with the Executive Director of Undergraduate Admissions.

Secondary Reviews with Jason Hale, Executive Director of Undergraduate Admissions, will consider other indicators of English proficiency, academic

performance to date, and potential for success at TTU. Following the Secondary Review, the Executive Director will make a decision concerning the applicant's admission. The decision will be sent to the designated Athletics Department contact. (All notifications regarding admissions will be sent directly to this point of contact.)

Appeals Process

If the Executive Director does not recommend the PSA for admission, the designated Athletics Department contact may appeal the decision of the secondary review to the Vice President of Enrollment Management.

The Vice President of Enrollment Management will coordinate with the designated Athletics Department contact to arrange the interview. After consulting with the Executive Director of Undergraduate Admissions, the Vice President of Enrollment Management will communicate with the student by email to summarize the type of activities that may occur during the interview process.

The appeals interview for prospective international student athletes will follow the same guidelines as outlined above.

Admission Alternatives

Decisions on appeals are considered final; however, a student athlete or their representative may appeal the decision to the President or Provost who has authority under the provision of NCAA Bylaw 14.1.1.1 to review additional information related to decisions rendered and to consider or grant requests for reconsideration based on new or additional information.

This process may also be applied to other prospective international students who have been offered a competitive scholarship by any Texas Tech University department that provides a comparable level of academic and social support.

International students who are denied admission can also consider the following options:

- Admission applications can be reevaluated for the term applied for if a student can provide additional documentation indicating an increase in English proficiency and/or an increase in GPA after attending an intersession at another institution. If a student is able to increase their English proficiency and/or increase their GPA during the intersession and can provide updated documentation/transcripts, their original application would then be reevaluated for an admission decision.
- If a student is reapplying for a different term with updated documentation indicating an increase in their GPA or English proficiency, this would be considered a new application. Students may have only one active application per term.

Red Raider Orientation

Red Raider Orientation (RRO) is a mandatory program designed to provide all incoming undergraduate students an opportunity to meet with an academic advisor, register for classes, gather information about Texas Tech programs and services, and learn the history and traditions of the university. All new undergraduate students are required to attend RRO in order to register for classes. In addition to the regular RRO, there is a one-day orientation tailored specifically to the needs of international students—International Student Orientation (ISO)—offered before the start of classes. For more information, view the following sites:

- RRO site www.orientation.ttu.edu, email orientation@ttu.edu, or call 806.742.2993
- ISO site <https://www.depts.ttu.edu/international/iss/studentlife/InternationalOrientation/index.php>, call 806.742.3667, or email International Student Administrator, Beth Mora (beth.mora@ttu.edu)
- TTU Costa Rica students are required to attend RRO. Please visit the website or contact the Costa Rica campus/staff for additional details. <https://www.depts.ttu.edu/costarica/rro.php>

Texas Success Initiative (TSI)

The Texas Success Initiative (TSI) is a developmental education program mandated by the state of Texas to ensure that students enrolled in Texas public colleges and universities possess the necessary academic skills to

succeed. State regulations require that all students enrolling in public higher education institutions demonstrate college readiness in reading, writing, and mathematics by earning passing scores on the TSI Assessment Test or providing proof of exempting ACT, SAT, STAAR, or TAKS test scores; an associate's or bachelor's degree from an accredited public institution of higher education; honorable discharge from the U.S. military; or active U.S. military service. More information can be found at www.depts.ttu.edu/registrar/private/tsi.

The TSI Assessment Test is available through Academic Testing Services, 214 West Hall, 806.742.3671. Students will need to present their driver's license or passport for identification purposes. After testing, students must submit their test scores to the TSI Compliance Office, 103A West Hall.

Students with questions about their status regarding the Texas Success Initiative should contact the TSI Compliance Office at 806.742.3661. Students who have tested but did not meet the minimum scores in one or more sections of the TSI Assessment Test are required to obtain TSI advising through the TSI Developmental Education Office, 806.742.3242, www.depts.ttu.edu/tsi.

Credit Transferred from Other Colleges and Universities

Evaluation of course credit earned at other institutions by the Transfer Evaluation Office does not decree approval of the credit for use toward degree requirements. Only the academic dean of the college offering the program in which a student is enrolled has authority for determining which courses will be applied toward any specific program. The only exception to this rule is that no transferred course completed with a grade below C- may be applied to fulfill course requirements in majors, minors, or concentrations.

Applicants must submit official records from all accredited institutions attended. Official transcripts must be sent directly to the Office of Undergraduate Admissions. All college-level, non-vocational courses completed with a passing grade of D or above at regionally accredited colleges and universities (not including trade or technical schools) will be evaluated for acceptance of transfer credit by the Transfer Evaluation Office. The Transfer Evaluation Office determines acceptable transfer credit on the basis of an evaluation and in consultation with the appropriate academic units at Texas Tech University as necessary for clarification. While all credit hours presented on the sending institution's transcripts will be evaluated and equivalent college-level courses posted to the student's academic record, a maximum of 80 semester credit hours from two-year colleges may be applied toward Texas Tech University degree requirements. Courses that are accepted for transfer do not necessarily apply toward college, departmental, or program degree requirements. Transfer requirements are as follows:

- Texas Tech University may accept up to 80 degree-applicable credit hours from any accredited two- or four-year institution.
- Students may apply to bring in up to 90 degree-applicable credit hours provided that a minimum of ten degree-applicable hours are upper division (3xxx/4xxx) and from a four-year institution. The student's home department, college, and the Associate Vice Provost for Academic Affairs must approve the request.
- The last 30 hours of the degree must be taken in residence, defined as instructed by Texas Tech University. Students may petition their academic dean for exceptions to this requirement.

Students are encouraged to meet with the academic advisors of the college in which they plan to enroll to discuss that college's policies on applicability of transfer credit for degree purposes. Credit hours will be applied to degree programs and majors when courses are deemed equivalent to the Texas Tech courses that satisfy various program requirements by the college in which the student is seeking a degree.

Students wishing to transfer credit to Texas Tech from a nonaccredited institution must (1) complete 30 semester credit hours of work in residence at Texas Tech with at least a 2.0 GPA and (2) receive approval from the academic dean in order to validate credits for transfer.

Guidelines for Transfer of College Credit

- **Transcript** – Original copies of official college transcripts from which the academic credit was originally taken will be reviewed, and all coursework will be evaluated before transfer credit will be posted to a student's permanent academic record. Courses that may have been accepted for credit by another institution will not necessarily be accepted by Texas Tech. Texas Tech will not transfer credit for any college course documented only on a high school transcript.
- **Grade** – Nonvocational, college-level courses completed with a grade of D or above at another accredited institution (including courses taken on a pass/fail basis and passed) will normally be accepted for transfer. No transferred course completed with a grade below C- may be applied to fulfill course requirements in majors, minors, or concentrations. Courses completed with codes indicating no grade or credit will not be transferred. This includes courses from which a student has withdrawn or received a grade of incomplete.
- **Classification Level** – Courses will transfer to Texas Tech at the level at which the courses were taken at the transfer institution. Credit hours taken at a junior or community college may not be transferred as upper-division work, even when the Texas Common Course Numbering System designation indicates similar course content.
- **Credit Hour** – Transfer credit will be awarded on a semester credit hour scale for all courses, including courses transferred in on quarter-hour scales. Credit transferred in on quarter-hour scales will be converted to semester credit hours.
- **Credit by Examination** – Credit by examination will be accepted when the student provides documentation of appropriate test scores on an original score report from the national testing organization or official high school transcript. Credit is awarded according to Texas Tech University's credit by examination guidelines.
- **Course Equivalency** – Transfer courses that have received an equivalent course evaluation by the Texas Tech academic department will be honored.
- **Block or General Credit** – Transfer courses that do not receive an equivalent course evaluation by the Texas Tech academic department but are eligible for transfer will be assigned block or general transfer credit for the subject and level (1—, 2—, 3—, or 4—).
- **Repeat Courses** – When a course has been repeated at another institution, the credit award will match credit granted on the sending institution's transcript.
- **Academic Standing** – Transferability of courses will not be affected by a student's academic standing (i.e., probation, suspension), but credits earned while on academic suspension from Texas Tech University will apply to a degree plan only if approved by the student's academic dean.
- **Nontraditional Educational Experiences** – Credit granted for nontraditional educational experiences by community colleges or other universities will not be accepted for transfer. These include courses taken at a non-degree-granting institution, life or work experience, and work completed at specialized proprietary schools.

Texas Common Course Numbering System (TCCNS)

The Texas Common Course Numbering System (TCCNS) has been designed to aid students in the transfer of general academic courses between Texas public colleges and universities throughout the state. The system ensures students that courses designated as common will be accepted for transfer, and the credit will be treated as if the courses had actually been taken on the receiving institution's campus. Texas Tech courses identified as common will have the Common Course Number listed in brackets in each course description. For more information concerning the Texas Common Course Numbering System, please visit the TCCNS web page at www.tccns.org. Visit www.reg.ttu.edu for information on how your credit will transfer.

Transfer Disputes Involving Lower-Division Courses

If a dispute occurs involving the transfer of lower-division courses, the Texas Higher Education Coordinating Board has established the following procedures to resolve the dispute:

- If an institution of higher education does not accept course credit earned by a student at another institution of higher education, the receiving institution shall give written notice to the student and to the sending institution that transfer of the course credit is denied. The receiving institution shall also provide written notice of the reasons for denying credit for a particular course or set of courses at the request of the sending institution.
- A student who receives notice as specified above may dispute the denial of credit by contacting a designated official at either the sending or the receiving institution.
- The two institutions and the student shall attempt to resolve the transfer of the course credit in accordance with Coordinating Board rules and guidelines.
- If the transfer dispute is not resolved to the satisfaction of the student or the sending institution within 45 days after the date the student received written notice of denial, the institution that denies the course credit for transfer shall notify the Commissioner of Higher Education of its denial and the reasons for the denial.

The Commissioner of Higher Education or the Commissioner's designee shall make the final determination about a dispute concerning the transfer of course credit and give written notice of the determination to the involved student and institutions. The Coordinating Board shall collect data on the types of transfer disputes that are reported and the disposition of each case that is considered by the Commissioner or the Commissioner's designee.

If a receiving institution has cause to believe that a course being presented by a student for transfer from another school is not of an acceptable level of quality, it should first contact the sending institution and attempt to resolve the problem. In the event that the two institutions are unable to come to a satisfactory resolution, the receiving institution may notify the Commissioner of Higher Education, who may investigate the course. If its quality is found to be unacceptable, the Coordinating Board may discontinue funding for the course.

Undergraduate Credit by Examination

It is the general policy of the university to recognize academic achievement of students gained by means other than through performance in organized classes. Students will be given the opportunity to receive credit by examination in all courses in which proficiency may be determined by examination. The award of credit by examination will be based upon the score requirements in place during the most current of the following but no earlier than the student's first term of entry to Texas Tech University: (1) the first term of entry to Texas Tech University or (2) the term in which the scores are presented to Texas Tech University. Students may achieve a high level of proficiency in certain subject areas through advanced work in high school, participation in advanced placement programs, or independent study. The university strongly encourages such superior attainment, recognizes it for academic purposes, and permits students who have done such work to obtain course credit through examination.

Students at Texas Tech University may attempt credit by examination for degree credit during their first year, sophomore, junior, and senior years. The student is responsible for taking the tests early enough to allow sufficient time for scores to be reported to the university and processed by the Office of the Registrar. All students in the College of Arts & Sciences should see the Credit by Examination paragraph in the General Degree Requirements for the College of Arts & Sciences for the college's regulations regarding credit by exam, including lead time required for graduation processing and for foreign language exams. Students classified as seniors in colleges other than Arts & Sciences should plan to attempt credit by examination prior to the semester of graduation. Seniors must notify their academic dean's office prior to attempting credit by examination and provide proof of notification upon registering for an exam at Academic Testing Services.

For those who successfully earn test credit, the grade will not be calculated into their grade point average but will appear on the transcript as follows depending on which test was taken: CLP, AP, DE, FLP, and IB. Course credit earned by examination is recorded by the registrar on the student's transcript as "(Number) hours of credit via credit by examination program in (course equivalent)," and no grade points are awarded. Course credit by examination may not be used to satisfy the 30-hour minimum residence credit requirement for graduation. Any current, former, or prospective Texas Tech student may attempt to earn undergraduate course credit using the designated exam options. Some credit-by-exam programs (AP and IB) are only administered at participating high schools. CLEP exams are a credit-by-exam option for several undergraduate subjects and are administered at Texas Tech throughout the year and during Red Raider Orientation. Students may not use credit-by-exam options to attempt to remove or replace a grade that has already been earned in a Texas Tech course. The student is responsible for complying with the following procedures:

- All CLEP exams are computer-based. Appointments to use the computers and schedule the exams must be made through Academic Testing Services in 214 West Hall, 806.742.3671. For more information on CLEP, visit the Academic Testing Services website, www.depts.ttu.edu/testing or www.collegeboard.com.
- The student is responsible for having test scores sent to Texas Tech University. CLEP scores must be sent to the university directly from College Board. The student is responsible for completing tests for lower-level courses in sufficient time to qualify for registering for higher-level courses.
- Students classified as seniors should plan to attempt credit by examination prior to the semester of graduation. Seniors must notify their academic dean's office prior to attempting credit by examination and provide proof of notification upon registering for an exam at Academic Testing Services.
- After the 12th day of classes, credit by examination may be attempted for a course one is enrolled in only upon written approval of the appropriate academic dean's office.
- Matriculated students seeking credit by examination in foreign languages not offered through the CLEP program are required to work with Academic Testing Services to test via the 16-point exam given by the Foreign Language Proficiency Testing Service of the New York University School of Continuing and Professional Studies or the University of Pennsylvania Language Proficiency Testing Services. *(The requirement for sitting for the 16-point exam from New York University is uniform and applicable to all students unless an exception is requested. An exception is granted when the student's home college requires less than 16 hours of foreign language credit. Students may, on a case-by-case basis, request permission to complete the 12-point exam as an alternative to the 16-point exam. Requests will be reviewed by Academic Testing Services in consultation with the student's Academic Dean.)* If the language to be tested is not available through Texas Tech, NYU, or the University of Pennsylvania, the student must work through Academic Testing Services to locate another accredited university distance program. Credit by examination through other institutions' distance education programs often takes a minimum of two long semesters for scores to be reported to Texas Tech, and all language score reports subsequently must be evaluated by the Department of Classical and Modern Languages and Literatures to determine credit awarded. It is the student's responsibility to plan in advance, in consultation with the appropriate academic dean's office, for scores to arrive and evaluation credit to be applied to the transcript in time to meet individual deadlines.
- In cooperation and compliance with federal nondiscrimination laws and policies, credit by examination is open to all persons. Students with mostly A and B grades who have higher admission test scores are encouraged to consider attempting credit by examination.
- College Level Examination Program (CLEP) tests cannot be repeated before three months have passed.
- Accommodations for nonstandard testing must be submitted in writing (before the test date) and supported by documentation from a professional who is licensed and certified to diagnose the disability. All requests are subject to approval and must be scheduled with Academic Testing Services, 214 West Hall, 806.742.3671.

A student may earn course credit by examination from the following approved programs:

- **AP** – Advanced Placement Examinations that are a part of the College Board Advanced Placement Program available in a limited number of secondary schools.
- **CLEP** – Specified subject examinations of the College Board College Level Examination Program.
- **IB** – The International Baccalaureate (IB) diploma and/or examinations, dependent upon departmental evaluation.
- Departmental examinations prepared, administered, and scored by faculty members who teach the related course.

Many courses in the credit-by-examination program are prerequisites for higher-level courses; therefore, students seeking credit by examination must plan so that this credit can be assured before registering for advanced courses. Information regarding test dates and fees for national standardized examinations is available from Academic Testing Services at Texas Tech. It is the student's responsibility to request that test scores be sent to the university. Information concerning each of the testing programs is provided in this section, but students should note that policies and fees are subject to change.

Credit for Advanced Placement (AP) Examinations. The Advanced Placement Examination is the standardized final exam for a course offered in participating secondary schools. The objective of the AP is to allow students to begin work toward college credit while still in high school. Students should check with their high school counselor or principal as to the availability of the AP examinations in their school. The AP exam is offered once a year during May at designated high schools. AP scores are reported to the university in July.

Credit for College Level Examination Program (CLEP). Under the College Level Examination Program, the university will award credit only for specified examinations. Accepted exams vary among institutions, so students should be aware of which exams are accepted at Texas Tech. As with the other College Board testing programs, a student may attempt a CLEP examination at a national CLEP testing center before enrolling and have the scores reported to the university. However, these examinations are offered on the Texas Tech campus during Red Raider Orientation conferences, as well as several times each month throughout the year.

NOTE: Scores accepted for credit vary among universities. Students are responsible for knowing what scores are accepted at Texas Tech. Required scores are psychometrically scaled conversions and do not correlate on a one-point, one-question basis, nor is the required score a percentile.

Further information about the CLEP tests may be obtained from a high school counselor or principal; www.collegeboard.com; or Academic Testing Services, Texas Tech University, Box 45002, Lubbock, TX 79409-5002, 806.742.3671.

Credit by Departmental Examination. Any current or former Texas Tech student (or prospective student) may attempt to earn credit by examination for any undergraduate course provided the student has neither passed nor failed that course at Texas Tech. Under certain circumstances, departments within the university may prepare, administer, score, and award credit for their own examinations. Credit for specific courses is given upon satisfactory performance of the comprehensive examinations that are administered by the departments responsible for the courses and recommended by the deans of the respective colleges. To be eligible to attempt credit by departmental examination, a student must not have previously audited, enrolled in, or attempted credit by examination in the course. A student must apply in writing to the responsible department at least 30 days prior to taking a departmental examination for credit. Course credit earned by Texas Tech University departmental exam is not guaranteed to transfer to another institution. Further information regarding any credit by departmental examination should be secured directly from the academic department concerned.

Credit for International Baccalaureate (IB) Examinations and/or Diploma. The International Baccalaureate is an international program of courses and examinations offered at the high school level. Texas Tech welcomes students in the IB program and will grant a minimum of 24 hours credit for an IB Diploma completed with Higher or Standard Level exam scores of 4 - 7. For those individuals who participate in IB courses but do not have an IB Diploma, individual course credit may be earned based on the subject and score obtained on specified IB exams. Students must send an official IB examination transcript to Texas Tech to receive credit.

Acts of Dishonesty

All international undergraduate prospective students applying to Texas Tech University are expected to adhere to the university's Statement of Academic Integrity in the Student Handbook. This includes entering all secondary and post-secondary institutions attended on the application for admission as well as submitting official academic credentials from all secondary and post-secondary institutions attended. Official documentation must be sent to Texas Tech University – Undergraduate Admissions directly from the testing agency or previous institution. *The falsification of academic records or withholding of information on applications could result in denial of admission.*

For additional information or questions, please refer to the Office of Undergraduate Admissions website: <https://www.depts.ttu.edu/admissions/> or contact the office at:

Office of Undergraduate Admissions
Admissions@ttu.edu
806.742.1480

Enrollment Information

Bobbie Brown, Registrar

Office of the Registrar | 103 West Hall | Box 45015

Lubbock, TX 79409-5015 | T 806.742.3661

F 806.742.0355 | www.reg.ttu.edu

Prior to each semester or summer term, a registration period takes place, during which the formal process of enrollment in the university is completed. Students must complete the admission process and be formally admitted to the university prior to registration. Upon admission to the university, students are provided with additional materials and information regarding the registration process.

Registration Status. Priority for time of registration is generally based upon the student's classification and number of completed credit hours as designated by Academic Council. Exceptions to any of the assigned registration times will not be made.

See the Graduate School section of this catalog for information specific to graduate students.

Matriculation Number. Upon admission to the university, each student is assigned a Tech ID (R Number), which is used for matriculation and record identification purposes.

Stop Enrollment/Stop Registration. Insufficient information or improper information given by the student on any admission or registration form will constitute cause for delaying the admission or enrollment for the student. Students with this type of administrative hold on their records may be denied registration. For information about administrative holds and status of holds on students' records, refer to "Administrative Holds" in the Academic Requirements section of this catalog.

Name Changes and Identity Designations. Students who have a change in legal name must complete the Student Legal Name/Identification Correction Form and submit official documentation of the legal name change to the Registrar's Office.

Texas Tech strives to provide an inclusive educational environment for all students. The university recognizes the importance of affording students with the opportunity to designate a chosen first name and/or gender identity where possible. However, in certain circumstances and within some official documents, legal designations may be required by law or university policy (e.g., official transcripts, financial aid records, payroll). The *chosen* first name will be the sole first name used for professional communication and identification purposes. Students who wish to elect a *chosen* first name or gender identity designation must submit the Student Identity Change Form to the Registrar's Office. The Student Identity Change Form is required for gender identity designations and/or *chosen* first name changes and should not be used for *preferred* first name (i.e., nickname) designations. The preferred first name may be updated via Raiderlink (My Personal Information) and is used for shortened legal name or nickname purposes.

All official transcripts are issued under the student's legal name as recorded in the Registrar's Office.

Registration of Undergraduate Students in Graduate Courses. An undergraduate student who is within 12 semester hours of graduation and has at least a B average in the major subject may enroll for courses carrying graduate credit, subject to the approval of the dean of the academic college and the Dean of the Graduate School. This approval must be obtained on special forms provided by the Graduate School at the time of registration. Once approved, a permit for registration will be issued by the Graduate School. No course taken without this approval may be counted for graduate credit.

An undergraduate who is permitted to enroll for graduate credit as described above but has not previously taken the Aptitude Test of the Graduate Record Examinations may be required by specific degree programs to take the test during the first semester of enrollment in graduate courses.

Students who enroll in accelerated graduate degree programs will be coded as a graduate student at the point they have completed 90 undergraduate credit hours and a minimum of 120 combined undergraduate and graduate hours. Students who gain early admission to graduate school will be coded as a graduate student after they have completed all requirements for the undergraduate degree. The maximum course load that may be carried by an undergraduate taking courses for graduate credit is 16 credit hours in a semester or 6 hours in a summer term. An undergraduate may not accumulate more than 12 semester hours for graduate credit before being admitted to the Graduate School. Undergraduates permitted to enroll for graduate credit are expected to complete all of their undergraduate requirements within the academic year in which they first enroll for graduate credit.

It is the responsibility of the student to obtain the necessary forms and to follow prescribed procedures in registering for any course. An undergraduate student who enrolls in a course for graduate credit without obtaining proper approval will be dropped from that course.

Undergraduate students enrolled in graduate credit may not be paid financial aid for graduate credit hours. Graduate students enrolled in undergraduate credit may not be paid financial aid for undergraduate credit hours.

Change of Schedule. Student-initiated changes in schedule, including adding and dropping courses, should be arranged via MyTech by the appropriate deadlines; changes are not official until all steps in the process have been completed. The university reserves the right to make changes to a student's schedule.

Enrollment Without Credit. Persons who wish to audit a course for no grade must obtain written permission from the dean of the college in which the course is offered. Those who audit a course do so for the purpose of hearing or seeing only; they do not have the privilege of participating in class discussions or laboratory or field work, of turning in papers, or of receiving a grade or credit in the course. Students who audit a course will not be listed on the class roster, and no notation of the audit will be made on the student's transcript.

Students enrolled for fewer than 12 semester credit hours in a semester (6 hours in summer) must pay a fee (per semester credit hour) for the privilege of auditing a course. Written permission from the dean of the college in which the course is being taught and from the course instructor is required. This permission must be supplied to Student Business Services for payment. No charge is assessed for enrollment of 12 or more semester credit hours. Senior citizens 65 years of age and older are exempt from payment of this fee regardless of the number of semester credit hours.

Exemptions Under the Hazlewood Act. The purpose of the state's Hazlewood Exemption (Hazlewood Act) is to provide an education benefit to honorably discharged or separated Texas veterans and to eligible dependent children and spouses of Texas veterans. For more information, see Military and Veterans Programs at:

<http://www.depts.ttu.edu/mvp/hazlewood/hazlewood.php>.

Federal VA Benefits Certification. Each student using federal VA Educational Assistance is responsible for providing accurate information to the Military and Veterans Programs Department. The U.S. Department of Veteran Affairs requires accurate updated information; therefore, students must report all changes of status to their academic schedule, degree plan, or address immediately through the Military and Veterans

Programs Department's online Forms Portal at www.mvp.ttu.edu. Undergraduate students who have accumulated 60 credit hours must declare a major in a degree program when submitting a VA Certification Request via the Military & Veteran Programs Department's Forms Portal. If a major is not declared, the student's VA Certification Request cannot be certified for [Department of Veterans Affairs \(VA\) federal educational benefits](#). Graduate students must be admitted into an approved program and provide a degree plan as soon as possible after enrollment at Texas Tech.

Each semester, all students using federal VA Educational Assistance or the Hazlewood exemption must complete and submit a certification request

immediately after registration through the Military and Veterans Programs Department's online Forms Portal at www.mvp.ttu.edu.

Any student using the federal or state Tuition Assistance Program through the Department of Defense should provide documentation to Student Business Services, 301 West Hall, 806.742.3272, www.sbs.ttu.edu.

Contact: The Military and Veterans Programs Department | Drane Hall Room 147 | T 806.742.6877 | F 806.742.0480 | mvp@ttu.edu

Advising and Registration Tools. To support students in the processes of academic advising, schedule building, and course registration, the university provides a variety of helpful resources available at www.depts.ttu.edu/provost/success/.

Student Business Services (SBS) is responsible for the billing and collection of student accounts. Texas Tech reserves the right, without notice in this or any other publication, to change, amend, add to, or otherwise alter any or all fees, dues, rates, or other charges set forth herein and subject to action by the Texas State Legislature, the Board of Regents of the Texas Tech University System, or other authority as the case may be.

Texas Tech University reserves the right to deny credit for coursework completed in a semester or term and/or registration in a future semester or term for unpaid balances. This may also include the release of diplomas, official academic transcripts, and access to grades.

The university accepts no responsibility for billings or refund checks sent to incorrect addresses or difficulties caused by the postal service or other delivery services.

It is the student's responsibility to ensure that payment is in the possession of Student Business Services by the university-established due dates announced each semester.

Student Account Deferment Option for Recipients of Military Education Benefits

In accordance with Title 38 U.S. Code § 3679 (e), Texas Tech University will not impose any penalty including the assessment of late fees; denial of access to classes, libraries, or other institutional facilities; or a requirement that a student receiving military education benefits borrow additional funds because of the student's inability to meet financial obligations to the university on time as the result of the delayed disbursement of a state or federal military-related student financial assistance program covering tuition and fees.

Eligible students may request deferment for payment of tuition and fees if the military-related financial assistance is delayed. Requests for deferment should be requested prior to the first bill due date. Deferment will be permitted for up to 60 days from the first day of the semester.

To qualify for this provision, such students are required to:

- Produce the VA Certificate of Eligibility (COE) or current "Statement of Benefits" obtained from the Department of Veterans Affairs (VA) website - eBenefits (<https://www.va.gov/education/check-remaining-post-9-11-gi-bill-benefits/>);
- Provide an online request to be certified via the MVP Forms Portal (<https://www.depts.ttu.edu/mvp/>); and
- Provide additional information needed to properly certify the enrollment as described in other Texas Tech institutional policies.

Payment Policy

Failure to make payment arrangements by the due date may result in cancellation of the student's registration. Students who choose the payment plan option or who incur incidental fees during the semester must make full payment by the established due dates or they may be prohibited from registering for future terms until full payment is made. A student who is not 100 percent paid prior to the end of the term may be denied credit for coursework completed that semester or term.

Payment arrangements must be made by the established due dates. See go.ttu.edu/sbshelp for payment due dates. Students will receive email notification of amounts due as statements are posted to the eBill site. All notifications will be sent to the official email of record which is the student's ttu.edu email account. Additionally, students can access the eBill site online at any time to view amounts due and detailed charges as well as making payment or enrolling in a payment plan.

Payment must reach Student Business Services by close of business on the due date. Cancellation for non-payment may occur after close of business on the due date. Students who are canceled for non-payment must reregister for classes, and the original schedule is not guaranteed. Late fees and other incidental charges must be paid in full, or payment arrangements made, before registration, grade, diploma, and transcript holds are released. Late fees are subject to collection.

Payment Agreement Options

The Budget Payment Plan may be used for statutory tuition, mandatory fees, optional fees, and hospitality and housing. The Emergency Payment Plan is intended to provide coverage for statutory tuition and mandatory fees if aid or exemptions have been delayed. The Military Payment Plan is only available to eligible students using military education benefits.

All payment plans will be calculated on the account balance as of the payment plan enrollment date and will be adjusted for additional charges or credits occurring on the account during the term. See the Student Business Services website at go.ttu.edu/sbshelp for detailed information.

Budget Payment Option

- Available fall and spring terms only. A separate application is required for each term.
- Payments in four installments (25% each) of the total account balance.
- \$25 non-refundable enrollment fee is due at time of set up.
- Initial installments may also be due depending on the time of enrollment.
- Down payments and financial aid reduce the overall plan balance and do not count toward the first installment.

Emergency Payment Option

- Available fall, spring, and summer terms for students who owe a minimum of \$2,000 of tuition and mandatory fees. Students with accounts that do not meet this threshold must visit the Student Financial Center at 301 West Hall to be administratively enrolled. A separate application is required for each term.
- This plan does not include balances due for hospitality, housing, optional fees, or other institutional charges. Those charges must also be paid by the final installment due date to avoid holds or late fees regardless of the installment amount provided in the payment plan agreement.
- For fall and spring terms, this plan allows students to defer initial payment for approximately 30 days through financing provided by a short term, no interest loan. The balance will be paid in three installments.
- For summer terms, 100% emergency loan is applied as payment and there could be one or two payment due dates depending on enrollment throughout the summer.
- Up to \$25 non-refundable enrollment fee is due at time of set up.
- Initial installments may also be due depending on the time of enrollment.
- Down payments and financial aid reduce the overall plan balance and do not count toward the first installment.

Billings

Notification of billings will be sent via email to all registered students approximately one month prior to the due date. Updated statements will be posted to the student account monthly throughout the term. Students with incidental charges and not enrolled in a payment plan must pay their account balance in full within 30 days of the charge being posted to the account to avoid late fees. Students enrolled in payment plans must abide by the terms and deadlines established in the plan agreement. Students are billed based on their residency and registration. Students must verify their address each term when registering and may change their address on file at any time by entering the change at www.raiderlink.ttu.edu.

How to Pay. Payment can be made as follows:

- **In Person.** Students can pay with cash, personal check, cashier's check, money order, or debit card at the Student Business Services office located in the Student Financial Center at 301 West Hall. Checks should be made payable to Texas Tech University. All payments made, other than cash, are subject to final acceptance for payment. Checks may be held pending verification of payor. Temporary checks and checks drawn on international banks will not be accepted.
- **Mail.** Cash should not be sent through the mail, and Texas Tech accepts no responsibility for cash sent by mail. Payments should be mailed to Box 41099, Lubbock, TX 79409 at least five to seven days prior to the due date. Express mail payments should be sent to Student Business Services, Texas Tech University, 2520 Broadway, Room 333, Lubbock, TX 79409-1099.
- **Online Credit Card (subject to a service fee), Debit Card, or E-check Payments.** Pay online at www.raiderlink.ttu.edu.
- **International Payments.** International wire payments must be submitted through an approved international wire payment processor. TTU banking information for international wires will not be released for any reason. Visit go.ttu.edu/sbshelp for more information or to initiate international payments.

Account Information. Tuition and fee information can be obtained at www.raiderlink.ttu.edu from the MyTech tab. The student's eRaider user ID and password will be required to view this information. Students may add authorized users. These users will be given a separate login and can access billing information through a separate site. Students should never divulge their eRaider user ID and password. Doing so constitutes a violation of institutional policy and can result in disciplinary action.

Late Payment Fee. A late fee of up to \$50 may be charged monthly for delinquent accounts. Postmarks will not be considered when assessing this charge.

Dropped/Late Registration Fee. A \$50 fee may be assessed for registrations dropped due to non-payment or for registration that occurs after the first class day.

Returned Check Charge. A \$30 fee may be assessed for each check returned from the bank unpaid. A returned check for payment of tuition and fees may result in cancellation of enrollment. Responsibility rests with the student regardless of the maker of the check. If payment is returned for insufficient funds, SBS may restrict a student from using the same bank account for future payments. Returned or disputed credit card payments may be assessed a \$9 per item pass-through fee charged by the credit card processor. Additional pass-through fees may include a service fee of up to 2.95% of the payment amount, which may be assessed to the student account if the university is charged by the processor.

Cancellation Fee. A \$300 fee may be charged for cancellations occurring after the 12th class day (4th class day in summer). For student registrations to be reinstated, the student must make appropriate payment arrangements prior to the term report date (20th class day in fall/spring; 15th class day in summer terms). Failure to make payment arrangements by the report date may result in the student being denied reinstatement and still being held financially responsible for canceled courses as allowed by state law.

All fees are subject to collection and must be paid in full before registration, grade, diploma, and transcript holds will be released. Fee amounts are subject to change by action of the Board of Regents without prior notice.

Refund Policy

Refunds will be issued by Texas Tech University in the form of ACH to the bank account of the student's choice or by paper check mailed to the local address on file.

Students must visit www.raiderlink.ttu.edu and select the MyTech tab to provide direct deposit information to receive refunds via ACH. Students must have an active address in the Texas Tech system for refunds to be processed regardless of the form of the refund. It is the student's responsibility to maintain a correct, active address with Texas Tech to ensure receipt of refunds.

To expedite refund availability, students should enter their bank routing and account numbers in My Direct Deposit available at www.raiderlink.ttu.edu. Students who do not provide ACH information or whose information is invalid will receive a paper check mailed to the local address on file. ACH refunds will be processed multiple times per week. Paper checks will be processed only once a week. For security purposes, all checks will be mailed. No checks will be distributed in person. Due to significant cost, security issues, and untimely receipt of refunds via paper check, students are highly encouraged to sign up for My Direct Deposit.

Change in Class Schedule. Any refund as a result of registration change will be processed and distributed no later than the 35th class day of a fall or spring semester or the 20th class day of a summer term. A complete list of drop and withdrawal dates is available on the SBS website (go.ttu.edu/sbshelp). Please refer to that page for the most up-to-date information.

The class change credit amount will be in accordance with the following:

- **Fall or Spring Semester: Credit for a Dropped Course**

| | |
|--|------|
| 1st class day through 12th class day | 100% |
| After the 12th class day | None |
- **Summer Terms: Credit for a Dropped Course**

| | |
|---|------|
| 1st class day through 4th class day | 100% |
| After the 4th class day | None |

Withdrawal — Students withdrawing to zero hours at their request or those who have been withdrawn due to university action may be eligible to receive a credit for billed tuition and fees.

For a term lasting five weeks or less (Summer Short Terms), the student will be required to pay tuition and fees according to the following schedule:

| | |
|---|------|
| Before the 1st class day | None |
| 1st class day through 4th class day | None |
| 5th class day or later | 100% |

For a term lasting between five and nine weeks (Summer Long Term, TTU Online), the student will be required to pay tuition and fees according to the following schedule:

| | |
|---|------|
| Before the 1st class day | None |
| 1st class day through 4th class day | None |
| 5th or 6th class day | 50% |
| 7th class day or later | 100% |

For a term of 10 weeks or longer (Fall or Spring), the student will be required to pay tuition and fees according to the following schedule:

| | |
|---|------|
| Before the 1st class day | None |
| 1st class day through 12th class day | None |
| 12th class day through 20th class day | 50% |
| 21st class day and after | 100% |

Terms of a shorter duration may have different payment requirements as established by law.

Any refund due to a student will be made after calculation of the amount of tuition and fees due at the time of withdrawal. If the student has paid less than the amount due at the time of withdrawal, the student will be required to pay the remaining balance due. **Class day counts are determined by the first class day of the term and may not correspond to the actual first day of the enrolled class.**

Federal Refund Formula. The federal return to Title IV (R2T4) formula requires federal student aid to be returned to the lender at a pro rata basis if a complete withdrawal from the institution occurs before 60 percent of the semester has been completed. Any amounts in excess of this pro rata calculation that have already been refunded to the student are subject to immediate repayment.

Tuition and Fees

A complete list, including authority and explanations for tuition and fees, is available on the SBS website (www.sbs.ttu.edu) in the Global Fee and Other Educational Costs documents. Estimated Costs Calculators are provided on the SBS website to assist students in estimating the total charges of tuition and fees based on enrolled semester credit hours. Students can also find information on the total estimated cost of attendance on the Office of Financial Aid website.

Residency Status Determination

For rules governing the determination of residency status as defined by the Texas Higher Education Coordinating Board, see the website www.depts.ttu.edu/admissions/residency/.

General Information

Tuition Rate for Excess Doctoral Hours. Doctoral students registering with 130 or more doctoral hours (150 in the areas of clinical psychology and counseling psychology) may be required to pay out-of-state tuition (full cost of education). These fees may not be waived by virtue of employment or scholarship.

Tuition Rate for Excess Undergraduate Credit Hours. Texas Education Code, Section 54.014, states that a resident undergraduate student who has attempted 30 semester credit hours in excess of the number of hours required for completion of a baccalaureate degree program (or in excess of 15 semester credit hours for an associates degree program) in which the student is enrolled may be charged a higher tuition rate, not to exceed the rate charged to a nonresident.

Unfunded Hours Fee for Repeated Courses. The General Appropriations Act, Article III, Special Provisions Related to Institutions of Higher Education, Section 41 provides authority to assess an additional fee, not to exceed the amount of tuition charged to nonresident students, for students attempting the same course for the third time or more. This fee is to offset the loss of formula funding from the state.

Tuition Rebate for Certain Undergraduates. Under a state program authorized by Texas Education Code 54.0065, qualified students may be eligible for a rebate of a portion of the undergraduate tuition the student has paid. Visit go.ttu.edu/sbshelp for more information and requirements for the rebate program as well as information regarding outstanding student loans and applying the rebate to those loans. All application forms must be submitted to Student Business Services prior to graduation to be accepted under the rebate program guidelines.

Exemptions and Waivers

All exemptions and waivers have been authorized by statute in the Texas Education Code or through action of the Board of Regents of the Texas Tech University System. Texas Tech reserves the right, without notice in this or any other publication, to change, amend, add to, or otherwise alter any or all exemptions and waivers subject to and in accordance with actions of the Texas State Legislature and/or the Board of Regents.

Exemption and waiver requests must be submitted no later than the 12th class day of a fall or spring semester or the 4th class day of a summer term. It is the student's responsibility to check the student account prior to the 20th class day to ensure the exemption or waiver has been applied appropriately. Exemptions and waiver requests will not be accepted after these dates, unless authorized by state law.

Texas Tech University reserves the right to apply exemptions and waivers after the census day (12th class day of a fall or spring semester or the 4th class day of a summer term). Texas Tech University reserves the right to audit any exemption or waiver prior or subsequent to application to a student's tuition and fee account and to make account adjustments as necessary.

Certain exemptions and waivers are subject to verification of Selective Service registration, Satisfactory Academic Progress (GPA), eligibility for state funding, Texas Tech University operating policy provisions, and minimum grade or enrollment requirements. Exemptions and waivers may be denied or revoked during the term if any of these verifications, or another requirement as authorized by state law, does not meet state guidelines.

A complete list of waivers and exemptions offered by Texas Tech University can be found on the SBS website (go.ttu.edu/sbshelp).

For further information, contact Student Business Services at 806.742.3272 (toll free 866.774.9477) or visit go.ttu.edu/sbshelp to submit a question. Our AI generative chatbot is available at all times, and live chat is available during business hours.

Tuition Insurance

Texas Tech University has partnered with GradGuard™ to offer tuition insurance. All currently enrolled students and/or parents will have the opportunity to purchase the tuition protection plan during the registration period which extends through the twelfth day of class. The tuition protection plan can help protect your investment in higher education if a student must withdraw unexpectedly for a covered illness, injury, or mental health reason. Under our school withdrawal policy (noted above), students may not be eligible for a full refund if students must withdraw during the semester. The tuition protection plan complements and enhances the refund policy and can ensure up to 100% reimbursement for tuition payments, housing, and other fees if a student withdraws for a covered reason at any time during the semester. To learn more, visit gradguard.com/tuition/ttu or connect with a GradGuard™ tuition insurance specialist at 877.794.6603.

Student Financial Assistance

Jamie Hansard, Vice President for Enrollment Management Office of Student Financial Aid and Scholarships

301 West Hall | Box 45011 | Lubbock, TX 79409-5011

T 806.742.3681 | F 806.742.0880

finaid.advisor@ttu.edu | financialaid.ttu.edu

The Office of Student Financial Aid and Scholarships provides comprehensive financial assistance to students seeking higher education. The financial assistance offered at Texas Tech includes scholarships, grants, employment, and loans. Assistance is offered to students based on financial need, merit, and other specific program eligibility requirements. Financial need is defined as the difference between the cost of attending Texas Tech and the Student Aid Index (SAI), as determined by the Free Application for Federal Student Aid (FAFSA) or Texas Application for State Financial Aid (TASFA).

Texas Tech students are assigned a Student Financial Aid and Scholarships advisor and are encouraged to contact their advisor with questions. Advisor assignments are located at

<https://www.depts.ttu.edu/financialaid/myadvisor.php>.

No student or prospective student shall be excluded from participating in or be denied the benefits of any financial aid program at Texas Tech on the grounds of race, color, national origin, religion, or sex. Although qualifications required for each financial aid program may differ, the general requirements for financial assistance at Texas Tech are that the student must be admitted and enrolled for at least one-half the normal academic load, be in good academic standing with the university, and demonstrate need as determined by the FAFSA

(<https://studentaid.gov/h/apply-for-aid/fafsa>)

or TASFA (<https://www.depts.ttu.edu/financialaid/TASFA.php>).

Types of Assistance. The university participates in the following financial assistance programs:

- Federal Pell Grant
- Supplemental Educational Opportunity Grant
- TEXAS Grant
- Texas Public Education Grant
- Texas First Diploma Scholarship
- Texas Armed Services Scholarship
- Texas Leadership Scholarship
- Bilingual Education Program
- TEACH Grant
- Federal Work-Study Program
- State Work-Study Program
- Hinson-Hazlewood College Access Loan
- FORWARD Loan
- Federal Direct Loans
- Federal Direct PLUS Loans for Graduate Students
- Federal Direct Parent Loans for Undergraduate Students

Application Deadlines. The state priority deadline to submit the financial aid application is February 15 for the fall semester, November 1 for

the spring semester, and March 1 for the summer session. Applications completed after the priority deadline will be processed based only on fund availability.

Scholarship Information. Incoming students submit applications through ApplyTexas or the Common App. Current Texas Tech students submit applications at www.scholarships.ttu.edu for consideration for university scholarships, college and departmental scholarships, and need-based scholarships. Students may choose to further seek major-specific scholarships by contacting their department or college dean's office.

Presidential scholarships are awarded to entering first-time college students based on SAT or ACT test scores and unweighted grade point average. Test optional scholarships are available and based on unweighted grade point average. Contact the Scholarship Office at www.depts.ttu.edu/scholarships for more information on Presidential scholarships.

College and departmental scholarships are awarded to students from the 10 colleges and more than 100 academic departments at Texas Tech. They are awarded to entering and current students based on major, academics, leadership, community involvement, financial need, or any combination of these factors. For more information on college and departmental scholarships, please contact those offices or go to www.depts.ttu.edu for a website listing of departments.

Need-based scholarships are offered to entering and current students based on financial need, academics, major, leadership, county of residence, or any combination of these and other factors. Visit www.depts.ttu.edu/scholarships for more information on need-based scholarships.

Scholarship Application Deadlines. The priority deadline for incoming first-time college students applying for competitive scholarships is December 1. The priority deadlines for transfer scholarship applications are November 15 for spring transfers and March 1 for fall transfers. The deadline for the continuing student scholarship application is February 1.

External Scholarships. Students receiving scholarships from sources outside of Texas Tech University should submit scholarship checks to Texas Tech University Financial Aid and Scholarship Office, Box 45011, Lubbock, TX 79409-5011. External scholarships will be credited to tuition and fees and included in financial aid packages.

Academic Requirements for Assistance. Federal regulations require that all financial aid recipients maintain satisfactory academic progress. The guidelines for determining satisfactory academic progress are on the financial aid website at <https://www.depts.ttu.edu/financialaid/satisfactoryAcademicProgress.php>.

Assistance for Graduate Students. Financial opportunities are available through both the Graduate School and graduate academic departments. The Graduate School coordinates and disburses scholarships and fellowships each year for new and continuing degree-seeking students (both full- and part-time). The AT&T Chancellor's Fellowship and CH Foundation Doctoral Fellowship are available to departments to aid them in attracting new graduate students to Texas Tech. Most deadlines are in the spring (typically February) for the upcoming fall and spring semesters. Many departments also support graduate students through scholarships and assistantship positions. These must be requested from the specific department concerned. Online applications and detailed information are available at www.depts.ttu.edu/gradschool/financial/GeneralFellowships.php.

Housing and Hospitality

Tanya Massey, Senior Managing Director University Student Housing

Wiggins Complex | 3211 18th St. | Box 41141
Lubbock, TX 79409-1141 | T 806.742.2661
F 806.742.2696 | housing@ttu.edu | www.housing.ttu.edu

Kirk Rodriguez, Senior Managing Director Hospitality Services and Student Union & Activities

Wiggins Complex | 3211 18th St. | Box 42184
Lubbock, TX 79409-2184 | T 806.742.1360
hospitality@ttu.edu | hospitality.ttu.edu | @EatAtTexasTech

University Student Housing serves as a catalyst for student success by providing valuable learning experiences that recruit, retain, and support students through graduation. Our services, programs, activities, facilities, and staff will provide the foundation for learning and success.

University Student Housing offers a variety of living options, providing convenient and affordable housing for over 8,000 students. It features Learning Communities (LCs) across campus, which are unique and transformative environments where students with similar academic goals can live, learn, and socialize together. Texas Tech University currently hosts 18 Learning Communities, housing over 4,000 Red Raiders—about half of the student population.

The residence halls include traditional, pod, studio, suite, apartment, and premium apartment styles:

- **Traditional Halls:** Includes shared bedroom and community style bathrooms with both built-in and movable furniture hall options. Available in 13 residence halls which host multiple learning communities.
- **Pod-Style:** Includes shared bedroom and pod-central community style bathrooms. Located in Honors Hall which hosts the Honors Learning Community and features a full-service Starbucks®.
- **Studio-Style:** Gordon Hall includes double bedrooms with semi-private bathrooms and a shared living area.
- **Suite-Style:** Includes private bedroom and semi-private bathrooms in two- and four-bedroom suite options with a shared living area. Available in Murray Hall and Talkington Hall.
- **Apartment-Style:** Available for sophomore-level students or higher and offer private bedrooms, private/semi-private bathrooms, and a shared living area. Carpenter Wells offers three-bedroom townhouses or four-bedroom flats with kitchenettes. Premium Apartment options include West Village A and West Village B with full kitchen. West Village B is for students aged 21 or older.

On-Campus Housing Requirement

To support Texas Tech University's Strategic Plan, first-year students are required to live on campus. Research indicates that students living on campus are more likely to remain in college and achieve higher GPAs than those living off campus.

The On-Campus Residency Requirement applies to students enrolled in more than six hours during fall or spring semesters or three hours during summer sessions. Compliance is mandatory as a condition of enrollment, as set forth in the *Student Handbook* approved by the Board of Regents

and [Operating Policy 30.25](#). Students in violation will be placed in "Non-Compliance Status" and charged applicable housing and dining fees.

Students may request an exemption if they meet certain criteria, including residing within 60 miles of campus with parents, being over 21 years old, or having medical or financial hardships. Exemption requests must include proper documentation and be submitted before moving into residence halls.

It is the responsibility of the student to update any incorrect information regarding place of residence with the Office of the Registrar.

On-campus housing for married couples or individuals with children is not provided.

On-Campus Residence Exemption Process

Subject to verification and authorization by University Student Housing, students may be eligible to live off campus provided any one of the 11 exemption categories listed below is satisfied:

1. A student is currently residing and will continue to reside in the established primary residence of their parents (or legal guardian) if it is within a 60-mile radius of Texas Tech University. The parents (or legal guardian) must have established their primary residency at least six months prior to the request for an exemption. Legal guardianship must have been established by a court of law at least one year prior to the request.
2. A student presents sufficient evidence of an extreme financial hardship condition based on guidelines similar to those required for Financial Aid.
3. A student is married or has dependent children living with the student.
4. A student is 21 years of age or over on or before the first day of classes of the initial semester of enrollment.
5. A transfer student has successfully completed 30 or more semester hours of academic credit prior to the student's enrollment or re-enrollment. Credit earned by exam (Advanced Placement, CLEP, ACT, SAT) and hours received from concurrent high school credit are not considered.
6. A student is awarded a university scholarship/sponsorship that is managed by a university department or college, which minimally includes the equivalence of the current academic school year's room, board, tuition, fees, and textbooks (as estimated by the Student Financial Aid Office) during an academic school year. Upon prior approval from the managing department or college, the student may request to be exempt from living on campus. The managing department or college must provide verification in writing to University Student Housing prior to the student's enrollment and/or re-enrollment to the university.
7. A student is enrolled in the Graduate School or Law School.
8. A student has served in active military service, as verified by a discharge certificate (DD214).
9. A student presents sufficient evidence of an extreme medical condition, as documented by their treating physician, for which on-campus accommodations cannot be made. All medical hardship requests must be submitted and approved through [Student Disability Services](#).
10. A student presents sufficient and satisfactory evidence of extreme or unusual hardship that will be intensified by living in the residence halls.
11. A student has completed a full academic year (fall and spring terms) of living on campus in the Texas Tech University residence halls or provides sufficient evidence of living on campus at another university and receives confirmation of approval from University Student Housing.

Subject to verification and authorization by University Student Housing, students may be eligible to have their housing hold temporarily removed, and not be required to live on campus for the given term, provided any one of the three conditions listed below is satisfied:

1. A student is enrolled in online classes only and classified as a distance education learner.
2. A student is taking less than six hours during the academic year.
3. Any TTU or TTUHSC student who is enrolled to take courses at a campus other than the Lubbock campus.

To request approval to live off campus, the student must submit an [Exemption Form](#) along with all required documentation. University Student Housing staff will review and send denial/approval notices to the student's TTU email account.

No exemptions will be approved once the student has moved into the residence halls.

In conjunction with the university's support of academic integrity, evidence of deliberate falsification of information, data, or any materials submitted or providing false or erroneous information in connection with an application for exemption from the on-campus housing requirement will be grounds for disciplinary action. Such action may include, but is not limited to, revocation of a previously approved exemption, restitution of up to a semester's room and dining plan fees, or probation, as determined by the Office of Student Conduct and in accordance with the *Code of Student Conduct* of Texas Tech University.

Signing an off-campus lease will not relieve the student of contractual obligations that may have been assumed with the university. It is the responsibility of the student to comply with all provisions of the signed contract.

Housing Sign-Up Process

Residence halls, like all other services and facilities of Texas Tech University, are available to all students regardless of race, creed, national origin, age, sex, or disability. Applications for admission to the university and applications for residence hall accommodations are separate processes. To sign up for housing at Texas Tech University, students must first be admitted to the university. Students are encouraged to sign up for housing as soon as they are notified of their admission status and receive and activate their eRaider account information. To complete the housing sign-up process, go to housing.ttu.edu and follow the instructions provided.

Students sign a University Student Housing and Hospitality Services Contract for the academic year (fall and spring semesters), a 12-month contract (fall, spring, and summer), or a summer-only contract. Any student wishing to cancel their University Student Housing and Hospitality Services Contract should email housing@ttu.edu to discuss the cancellation provisions.

Housing and dining plan rates are based on a per-person charge. Rates will be established by the President. All rates are subject to change with appropriate notice. The most recent rates are posted on the University Student Housing and Hospitality Services websites.

A \$75 non-refundable application fee is required with all housing applications. This is a one-time fee. A \$400 Initial Deposit is required for all housing room reservations for all residence halls, including traditional spaces and suite/apartment/studio/pod-style spaces, and is due with the signed contract. The \$400 Initial Deposit is potentially refundable (less any fees or billed charges) if the contract is completed or properly canceled as outlined in the contract. A \$250 Additional Deposit is required for a housing room reservation in a suite/apartment/studio/pod-style space (Talkington, Gordon, Carpenter/Wells, Murray, Honors Hall, and West Village) and is due with the signed contract if selecting a suite/apartment/studio/pod-style space or when a student elects to upgrade to a suite/apartment/studio/pod-style space. The \$250 Additional Deposit is potentially refundable (less any fees or billed charges) if the contract is completed or if the student never reserves a suite/apartment/studio/pod-style space. The \$250 Additional Deposit is non-refundable if the contract is canceled at any time before the end of the contract period. For additional information on fees, deposits, and cancellation procedures, please review the housing contract on the University Student Housing website.

The university agrees to provide a room and dining plan only after the student has submitted the required application, properly signed the

University Student Housing and Hospitality Services Contract, and paid the application fee and applicable deposit(s). The student agrees to pay the housing and dining plan fees and any billed charges (i.e., damage charges, lock change charges, late/improper check-out charges, etc.) at the time scheduled by the university. All housing and dining plan fees and charges are billed in a combined account with the university tuition and fees. These accounts are managed by Student Business Services.

Students with academic year or 12-month contracts are charged 60% of the academic year housing and dining plan rate for the fall semester and 40% for the spring semester. Students entering the residence halls for the spring semester with an academic year contract are charged 50% of the academic year rate.

For additional information or questions, please contact University Student Housing at 806.742.2661, or you may email housing@ttu.edu.

Dining Plans

Hospitality Services provides a wide variety of fresh, healthy, and convenient dining options and Dining Plans. Dining Plans can be used at the Fresh Plate at Wall/Gates all-you-care-to-eat location, The Market food court at Stangel/Murdough featuring Fazoli's®, the Student Union food court featuring Boar's Head Deli® and Pizza Hut®, The Commons at Talkington Hall, Raider Exchange in West Village, Einstein® Bros Bagels and Chick-fil-A® at the Rawls College of Business, Starbucks® at the Honors Hall, and any Sam's Place Mini-market or Sam's Express Kiosk. For a complete list of dining locations, visit hospitality.ttu.edu.

Two levels of Dining Plans offer students the option of selecting the level that best fits their individual appetites and needs. For example, the Red & Black level is best for those students who consistently eat three meals per day. These plans also have plenty of flexibility for students who need late-night options and will take maximum advantage of the extensive offerings of the mini-markets. The Matador level will appeal to students who eat most meals on campus. The Matador level is the most popular Dining Plan and is the default when no plan is selected in the Residence Hall Contract. For more information, view the Dining Plan & Rates at hospitality.ttu.edu.

Dining Bucks allow Red Raiders the freedom to purchase complete meals or on-the-go snacks. Students receive a preset amount of Dining Bucks per semester, and their balance declines as they purchase meals from any of the all-you-care-to-eat dining locations or food items from retail operations.

Hospitality Services Dining Locations*:

- 23 at Sneed
- The Break Smoothies @ Student Union
- The Burkhardt Cafe @ the Burkhardt Center
- Chick-fil-A® @ RCoBA
- Chick-fil-A® @ Student Union
- The Commons @ Talkington
 - Einstein Bros® Bagels
- The Fresh Plate @ Wall/Gates - All You Care To Eat
- Einstein Bros® Bagels @ RCoBA
- The Market @ Stangel/Murdough
 - Fazoli's®
 - Day Break Coffee
 - The Corner Market Retail
- OfRed's @ Wiggins
 - Chick-fil-A®
- Raider Exchange @ West Village
- Sam's Express Kiosks
 - Holden Hall
 - Human Sciences
 - Library
- Sam's Place @ Student Union
- Starbucks® @ Honors Hall
- Starbucks® @ Student Union
- Student Union Food Court
 - Pizza Hut®
 - Raider Pit BBQ
 - Boar's Head Deli®
 - Sub-to-Go featuring Sushi with Gusto®

* all location availability subject to change

The Masked Rider Dining Plans are a great way for commuter students to take advantage of all the great dining locations on campus. The Masked Rider Dining Plans can be added to students' tuition bill, and the balance carries from semester to semester if students are enrolled with Texas Tech University. The Masked Rider Dining Plan can be purchased in increments of \$50 up to \$300 (The Masked Rider Dining Plans include a Dining Operations Cost of \$2.50 plus the current applicable state/local sales tax). Visit hospitality.ttu.edu for more information on all Dining Plans.

The Transact mobile **ordering app** makes it easy for Red Raiders to order food to go! Students can use the Transact app to order food for pickup with an on-campus Dining Plan from Hospitality Services. All on-campus Dining Plans will work exactly as they normally do with the same Dining Plan discounts and no fee for placing an order through the app!

When placing your first order, be sure to select your correct on-campus Dining Plan at checkout!

Follow campus dining on Instagram, Facebook, and X @EatAtTexasTech! Be in the know about special events, giveaways, new food locations, tasty treats, and more!!!

Room and Dining Plan Rates

Rates for room and dining plans are based on a per-person charge and established by the President. Twelve-month room rates are available for Carpenter/Wells and West Village.

Room and dining rates for 2025-26 can be found at housing.ttu.edu and hospitality.ttu.edu.

Academic Requirements

Ronald Hendrick, Ph.D., Provost and Senior Vice President

Office of the Provost | 104 Administration Building
Box 42019 | Lubbock, TX 79409-2019 | T 806.742.2184
F 806.742.1331 | www.depts.ttu.edu/provost

Students are responsible for their academic progress. Students seeking assistance with academic progress or experiencing academic difficulty should consult their associate academic dean (or designee) and academic advisor. For information about Academic Advising and Support, see page 520.

Each undergraduate student accepted for admission will enroll in one of the university's degree-granting colleges or areas: Davis College of Agricultural Sciences & Natural Resources, Huckabee College of Architecture, College of Arts & Sciences, Jerry S. Rawls College of Business, College of Education, Edward E. Whitacre Jr. College of Engineering, Honors College, College of Health and Human Sciences, College of Media & Communication, J.T. & Margaret Talkington College of Visual & Performing Arts, or Office of the Provost. A student's major subject is the primary area of specialized study (e.g., English) the student is pursuing within a degree program (e.g., Bachelor of Arts). A student interested in obtaining a double major or dual degree should contact his or her associate academic dean and academic advisor for specific requirements.

All baccalaureate degrees conferred by Texas Tech University are based on the satisfactory completion of specific authorized degree programs comprising a minimum of 120 semester hours. Requirements for undergraduate degrees are established at three different levels:

1. The university as a whole (Uniform Undergraduate Degree Requirements).
2. The college or area through which the degree is conferred (General Degree Requirements).
3. The particular degree program in which the student is working (Requirements for the Major).

Students should familiarize themselves with all three sets of requirements that must be fulfilled before the degree is granted. Students should consult their associate academic dean (or designee) and academic advisor whenever any question arises concerning academic standing or progress. Matters specifically requiring the associate academic dean's (or designee's) approval include the following:

- Concurrent enrollment in Texas Tech University and another institution
- Pass/fail option
- Credit by examination
- Exception to graduation requirements, including participating in a commencement ceremony prior to completing degree requirements, and candidacy for a degree
- Application of graduate credit hours toward the undergraduate upper-division requirement
- Applicability of transfer credits to degree programs
- Exception to taking the last 30 hours of coursework from Texas Tech University
- Application of workforce education, vocational, or technical coursework to a degree
- Satisfaction of foreign language requirement via study abroad and language placement test

Uniform Undergraduate Degree Requirements

The Uniform Undergraduate Degree Requirements apply to all Texas Tech undergraduates regardless of their major or college. The requirements have six components:

- General Requirements
- Core Curriculum Requirement
- Science Laboratory Requirement
- Foreign Language Requirement
- Communication Literacy Requirement

General Requirements

Residence Credit. The minimum actual residence required of each student is two consecutive semesters or the equivalent, and the minimum amount of residence work required is one-fourth of the total hours applicable toward the degree sought. In addition, the last 30 hours of coursework must be from Texas Tech.

The term "residence" as a degree requirement should not be confused with "residence" in the state of Texas for tuition purposes. "Residence credit" used here means credit for work done while enrolled in and attending classes taught under a Texas Tech course number, including distance education courses and those taught at locations other than the Lubbock campus.

Graduation Under a Particular Catalog. All degree requirements for undergraduate students must be met according to a single active Texas Tech University catalog. Upon first enrollment, the student will be assigned the catalog in effect, with the following permissions for exception requests:

1. Students enrolling as a transfer student may select any Texas Tech catalog that remains active from the point of their high school graduation to their enrollment at Texas Tech.
2. For the Former Tech student seeking readmission to the university, the applicable degree requirements are those that were in effect for the catalog under which the student was last enrolled at the university, provided that catalog is still active. Only with the specific approval of the associate academic dean (or designee) may a different catalog be selected.
3. For the student who changes a degree program after having enrolled at Texas Tech University, the applicable degree requirements are those in effect at the time the student is officially admitted to the college in which the degree program is housed. Only with the specific approval of the associate academic dean (or designee) may a different catalog be selected.

In no case may a student complete the requirements set forth in a catalog more than seven years old. When necessary, a catalog issued later than the student's first registration at Texas Tech University may be selected by the associate academic dean (or designee) in conference with the student. In reviewing catalog change requests, priority will be given to the course of action that most benefits the student, as determined by the student, the student's academic advisor, and the student's associate academic dean.

Students are encouraged to declare an academic minor at the same time that they declare their academic major so that the major and minor share the same catalog year. Students who do not declare their academic minor at the same time that they declare their academic major may be responsible for any changes made to the academic minor since the time the student declared the major. Examples of such changes include, but are not limited to, a GPA requirement for admission to the minor, changes to required courses, and changes to the number of credit hours required to earn the minor.

DegreeWorks Audit. DegreeWorks is the official degree auditing system of the university. DegreeWorks alone does not guarantee graduation but

is used in conjunction with academic advising to determine graduation eligibility and degree completion status. Students are responsible for monitoring their academic progress in DegreeWorks. At the time of graduation, the completed DegreeWorks audit is saved as the official document showing that all graduation requirements have been met.

Filing a Degree Plan. In 2019 the Texas Legislature passed SB 25 requiring all students enrolled in a bachelor's degree program at a state university to file a degree plan after the 12th class day but before the end of the semester or term immediately following the semester or term in which the student earned a cumulative total of 30 or more semester credit hours for successfully completed coursework. The 30 hours includes all transfer courses, international baccalaureate courses, dual credit courses, and any other course for which Texas Tech University has awarded college course credit, including credit awarded by examination. A student who enrolls for the first time at Texas Tech University with 30 or more semester credit hours already completed shall file a degree plan after the 12th class day but before the end of the initial semester or term of enrollment. In the event of a change in major, students should submit a new degree plan as soon as the program change is complete.

An undergraduate degree-seeking student must verify at each registration that a degree plan has been filed and the courses for which the student is registering are consistent with that degree plan. This verification will be done electronically through Raiderlink and Banner. Students who have not filed a degree plan within the allotted time period may not obtain an official transcript from the university registrar until the plan has been filed.

Students pursuing a bachelor's degree and utilizing [Department of Veterans Affairs \(VA\) federal educational benefits](#) are required to declare a major in a degree program prior to reaching junior standing (60 credit hours). If a major is not declared, the student's [VA Certification Request](#) cannot be certified for Department of Veterans Affairs (VA) federal educational benefits.

Filing "Intent to Graduate." Students must file an online confirmation to graduate with their college no later than the final class day in the term prior to their intended graduation. The online confirmation may be found on the MyTech tab at www.raiderlink.ttu.edu. Students who miss the deadline to file an intent to graduate online must make an appointment with their associate academic dean (or designee) to file a paper copy of the intent to graduate form.

Commencement Exercises. Commencement exercises are held at the end of each long semester (May and December) and at the end of the second summer term (August).

Second Bachelor's Degree. A student pursuing a second bachelor's degree must complete a minimum of 24 semester credit hours that were not applied to the student's first bachelor's degree. The required courses necessary for a student pursuing a second bachelor's degree will be defined by the college and department housing the degree. Students attending TTU to pursue a second bachelor's degree will be considered core complete provided that the first bachelor's degree was awarded from an accredited institution of higher education. A core complete designation does not mean that a student is also complete in the foreign language, communication literacy, Texas constitution, or lab science areas. Second degree-seeking students should consult with their academic advisors about remaining requirements in those areas. For requirements to qualify for Honors as a second degree-seeking student, see *Graduating with Honors for Second Texas Tech University Degree Students*.

Notice of Potential Ineligibility for License. A student's eligibility for an occupational license could be impacted by any criminal history they might have. For information on published guidelines for licensure in certain fields, consult Texas Occupations Code Chapter 53, section 53.025. Also note, under Section 53.102 of the Occupations Code, a student has the right to request a criminal history evaluation letter from the applicable licensing agency.

Science Laboratory Requirement

Students graduating from Texas Tech University are required to complete two semester credit hours of science laboratory courses. Normally this will be done by taking two 4-credit science courses or combinations of lecture and lab. Examples are BIOL 1401/BIOL 1402 or CHEM 1305/CHEM 1105 and CHEM 1306/CHEM 1106. Students may not take a lab that is not

matched to a corresponding lecture course without permission from their associate academic dean (or designee).

Transfer students who present 3-hour science courses may complete the science laboratory requirement in either of the following ways:

- They may take a laboratory course that matches a 3 credit-hour course accepted in transfer as satisfying a portion of the life and physical sciences requirement (for example, GEOL 1101 if the student transferred a course that was accepted as equivalent to GEOL 1303).
- They may enroll in BIOL 2202. This is a 2-hour self-paced online course designed specifically for transfer students who need to complete the science laboratory requirement. BIOL 2202 carries a biology prefix, but it is designed to be taken by any student who has completed one or two 3-hour science courses in any science discipline. The BIOL 2202 modules provide students with a framework for evaluating and critiquing scientific research findings and help students understand the role of scientific research in improving human health, contributing to economic growth, answering basic questions about the world, and working toward solving a multitude of problems faced by society. BIOL 2202 is not available to students who complete their life and physical sciences requirement at Texas Tech University without permission from the students' associate academic deans (or designee).

Foreign Language Requirement

Students graduating from Texas Tech University should be able to express, negotiate, and interpret meaning in a second language.

Any entering student who has not completed two years of a single foreign language in high school must complete at least two semesters (or its equivalent) of a single foreign language at the first-year college level (for example, FREN, GERM, or SPAN 1502 or 1507) **or** at least one semester of a foreign language at a 2000 level or higher as a graduation requirement. This requirement may also be satisfied by transferring in the equivalent courses from another college or university.

Individual Texas Tech University colleges may have additional foreign language proficiency requirements. Additional requirements may be necessary for select majors.

Many programs in the College of Arts & Sciences and some programs in the J.T. & Margaret Talkington College of Visual & Performing Arts require sophomore-level proficiency. Admission to sophomore-level foreign language courses requires either a minimum score on a placement exam or successful completion of prerequisites within the respective language.

International students who wish to have the foreign language requirement waived should review the Guidelines for High School Foreign Language Requirements for International Students.

The foreign language requirement may be met through credit by examination, described elsewhere in this catalog. Students who petition to complete the foreign language requirement via study abroad through a non-Texas Tech affiliated program must agree to have foreign language credit applied to their degrees based on scores on a language placement test administered by the Department of Classical and Modern Languages and Literatures after their return from the study abroad. Approval to do this must be granted in advance by the student's associate academic dean (or designee). For more information, consult the Department of Classical and Modern Languages and Literatures.

Communication Literacy Requirement

Students attending Texas Tech University for the first time in the Fall 2017 term or later will complete the Communication Literacy requirement in their program(s) of study.

Texas Tech University's transition from the Writing Intensive requirement to the Communication Literacy requirement signals the university's awareness that in addition to the fundamental role that writing plays in enabling students to explore, develop, focus, and organize a message, other types of communication must also be taught as appropriate for a student's discipline. Throughout each program of study, students must be given ample opportunity to develop their skills in forms of communication central to that program.

All students following a 2017-2018 or later catalog should consult the catalog information specific to their program(s) of study for more information about their Communication Literacy requirement.

Academic Regulations

Classification of Students. An undergraduate student is classified according to the following: first-year student, 0 to 29 hours completed; sophomore, 30 to 59; junior, 60 to 89; senior, 90 to completion of degree requirements. The junior and senior ranks are often referred to as “upper division” and “advanced.” A student who is enrolled for 12 or more credit hours per semester is considered a full-time student; one enrolled for fewer than 12 hours is considered a part-time student.

All baccalaureate degrees conferred by Texas Tech University are based on the satisfactory completion of specific authorized degree programs comprising a minimum of 120 semester hours. Students are required to take a minimum of 40 credit hours of 3000- and 4000-level courses prior to graduation. Graduate courses that have been approved by the student's home department and college to apply toward the student's undergraduate degree may apply toward the upper-division coursework requirement. Students are considered to be making satisfactory progress toward a degree objective when they complete at least 30 credit hours in each calendar/academic year, achieve an institutional GPA of 2.00 or higher in each semester, and maintain an institutional GPA of 2.00 or higher.

All references to a grade point average (GPA) reflect policy effective January 1, 2009, stipulating that the university will calculate only current and cumulative GPAs. Both calculations will include replaced grades. Unless otherwise stated, all GPA references refer to a cumulative institutional GPA that includes replaced grades.

Semester Credit Hour and Contact Hour Equivalents. For most purposes, a traditionally offered face-to-face course will have a minimum of 15 contact hours for each semester credit hour. Thus, a 1 credit hour course should meet for at least 15 hours over a long semester and a 3 credit hour course should meet for 45 hours over the semester. Courses taught during a summer session are expected to have the same number of contact hours as if they were taught during a long semester.

Semester Hours and Course Loads. The semester hour is the unit of measure for credit purposes. **The student is expected to spend a minimum of two hours in preparation for each hour of lecture or recitation.**

In-residence students and any students in their semester of graduation must be enrolled in a minimum of one semester hour. Registration in remedial and other zero-credit hour coursework must be accompanied by one credit-bearing course. Should a student drop to zero credit hours, the student will be withdrawn from the institution.

The maximum number of semester hours a student may take without specific permission of the associate academic dean (or designee) is as follows: 19 hours per long semester, 16 hours per long semester for students on academic probation or continued academic probation, and 8 hours per summer term. In determining a greater load, the associate academic dean (or designee) considers the quality of scholastic work performed by the student, the types of courses involved, the student's health, and extracurricular interests and activities.

Quarter Hour Conversion. Quarter credit hours are converted to semester credit hours by multiplying the number of quarter hours by two-thirds (or .67). Since a fraction of a credit hour cannot be awarded, the remaining fraction of semester hour credit is rounded to the nearest whole number from the tenth's position of the decimal.

For example, 5 quarter hours are equivalent to 3.4 semester hours, which in turn would be rounded to 3 semester hours of credit: 5 quarter hours \times .67 = 3.4 semester hours = 3 semester hours. Applicability of transfer credit toward degree requirements at Texas Tech University will be at the discretion of the student's associate academic dean (or designee).

Dropping a Course. Dropping a course delays graduation. Students should plan their schedules and make a serious commitment to academic success. When it becomes necessary to drop a course, the procedure varies according to the rules below. **All course drops, whether during the early semester student-initiated add-drop period, later in the semester as one of the restricted drops, or because of withdrawal from the university, are the**

responsibility of the student. If students stop attending a class but fail to drop the course, they will receive a grade of F and the grade will become a permanent part of their academic record.

All students who attend a Texas state institution of higher education are restricted to a maximum of six course drops during their undergraduate academic career. This includes all courses that were dropped at any Texas state institution of higher education the student has attended. For example, if a student attended a public community college and dropped two courses prior to enrolling at Texas Tech University, that student has four course drops remaining prior to graduation.

Students may use their limited drops (DG's) up to the deadline for drop and withdrawal for each term. Students must initiate a drop by following the procedures listed at raiderlink.ttu.edu. Further information can be obtained at 806.742.3661.

Exclusions from the rule governing course drops are as follows:

Drop or Withdrawal Designations

W: Complete withdrawal from the university. A grade of W will be recorded for each class but will not be counted as one of the permitted drops. A withdrawal will drop all registered hours.

DG: Dropping a course by last drop date. Applies only to students who entered Texas Tech during fall 2004 or thereafter and are limited to six dropped classes. A student may not drop to zero hours in a term.

- A two-week period of student-initiated add/drop at the beginning of each semester allows students to drop a course without the drop counting against their limit of six drops. The student-initiated add/drop period is noted in the academic calendar that appears in each university catalog and online at www.depts.ttu.edu/officialpublications/calendar/index.php.
- Students who find it necessary to withdraw completely from the university before the withdrawal deadline near the end of the semester will not have the dropped courses counted against their six course limit.

Aside from the exceptions noted above, students will not be permitted to drop more than six courses during their undergraduate academic career unless they can show good cause, including, but not limited to, demonstrating one or more of the following:

- Severe illness or other debilitating condition that affects the student's ability to satisfactorily complete the course.
- Student responsibility for the care of a sick, injured, or needy person if the provision of that care affects the student's ability to satisfactorily complete the course.
- Death of a person who is considered to be a member of the student's family or who is otherwise considered to have a sufficiently close relationship to the student that the person's death is considered to be a showing of good cause.
- Active duty service as a member of the Texas National Guard or the armed forces of the United States of either the student or a person who is considered to be a member of the student's family or who is otherwise considered to have a sufficiently close relationship to the student that the person's active military service is considered to be evidence of good cause.
- Change of the student's work schedule that is beyond the control of the student and affects the student's ability to satisfactorily complete the course.

Students who have dropped the maximum number of courses and believe they have good cause to drop an additional course should petition their associate academic dean (or designee).

Change of College. Students who wish to transfer from one college of the university to another should contact the associate academic dean (or designee) of the college to which they plan to transfer to ensure that they can meet all enrollment requirements. Students should then complete an academic transfer form in the receiving dean's office. The last day to change colleges in a given semester or term is the twelfth class day of the term. Students who return to the university following academic suspension may change their college if they follow the procedures specified in the section of this catalog on the Undergraduate Academic Standing Policy.

Change of Address. Students are responsible for maintaining a correct address on file with the university. Changes may be made online at

raiderlink.ttu.edu or by calling 806.742.3661 for assistance. Students required by the housing residence rules to live on campus may not move off campus during the semester without approval from University Student Housing.

Administrative Holds. Failure to meet certain university obligations may result in an administrative hold being placed on a student's record to prevent access to systems or information such as registration, release of transcripts and/or diplomas, and course add/drops.

Administrative holds may be placed on a student's record until resolution of problems, including, but not limited to, an outstanding debt to the university, disciplinary action, academic suspension, incomplete admission forms, or substandard test scores. It is the student's responsibility to get the hold released, which can be accomplished by meeting the requirements of the department placing the hold. Status of holds on student records may be obtained online at raiderlink.ttu.edu. An official diploma will not be issued unless all financial obligations to the university have been satisfied.

Class Attendance. Responsibility for class attendance rests with the student. Instructors set an attendance policy for each course they teach. The university expects regular and punctual attendance at all scheduled classes, and the university reserves the right to deal at any time with individual cases of nonattendance. Instructors should state clearly in their syllabi their policy regarding student absences and how absences affect grades.

In the event of excessive absences, the student must visit the instructor to discuss his or her status in the course. Excessive absences constitute cause for dropping a student from class. If the drop occurs before the first day of open registration for the next long semester or the last day to withdraw for the enrolled summer term, a designation of DG will be assigned (see section on "Dropping a Course"). If the drop occurs after that time period, the student will receive a grade of F. This drop can be initiated by the instructor but must be formally executed by the associate academic dean (or designee). In extreme cases, the associate academic dean (or designee) may suspend the student from the university.

Department chairpersons, directors, or others responsible for a student representing the university on officially approved trips should notify the student's instructors of the departure and return schedules in advance of the trip, per [OP 34.04](#). The instructor so notified must not penalize the student, although the student is responsible for material missed. Students absent because of university business must be given the same privileges as other students (e.g., if other students are given the choice of dropping one of four tests, then students with excused absences must be given the same privilege).

Reporting Illness. In case of an illness that will require absence from class for more than one week, the student should notify his or her associate academic dean (or designee). The dean's office will inform the student's instructors through the departmental office. In case of class absences because of a brief illness, the student should inform the instructor directly. Other information related to illness can be found in the *Student Handbook*.

Absence Due to Religious Observance. A student shall be excused from attending classes or other required activities, including examinations, for the observance of a religious holy day, including travel for that purpose. A student who intends to observe a religious holy day should make that intention known in writing to the instructor prior to the absence. A student who is absent from classes for the observance of a religious holy day shall be allowed to take an examination or complete an assignment scheduled for that day within a reasonable time after the absence.

Absence Due to Military Service. A student who is absent for a reasonably brief duration due to active military service, as defined by the Texas Administrative Code, Title 19, Part 1, Chapter 4, Subchapter A, Rule 4.8(d), "the maximum period for which a student may be excused shall be no more than 25% (twenty-five percent) of the total number of class meetings or the contact hour equivalent (not including the final examination period) for the specific course or courses in which the student is currently enrolled at the beginning of the period of active military service." In accordance with [Texas Education Code Section 51.9111](#), Excused Absence for Required Military Service, Texas Tech University shall excuse a student from attending classes or engaging in other required activities, including examinations, in order for the student to participate in active military service to which the student is called, including travel associated with the service. A student whose absence is excused under this subsection may not

be penalized for that absence and shall be allowed to complete an assignment or take an examination from which the student is excused within a reasonable time after the absence. Faculty are encouraged to work with the student to help them satisfactorily complete assignments and exams within a reasonable time. Faculty may take appropriate action if the student fails to satisfactorily complete the assignment or examination within a reasonable time after the absence. The student must provide a copy of the military orders to each instructor. Students whose absence is longer than the equivalent of 25% of the overall class content may request military withdrawal. See [OP 34.13](#) for more information.

Civility in the Classroom. Students are expected to assist in maintaining a classroom environment that is conducive to learning. To ensure that all students have the opportunity to gain from time spent in class, faculty members are encouraged to include a statement in their course syllabi relating to behavioral expectations in the classroom.

Grading Practices. A grade is assigned for all courses in which a student is enrolled during any semester or summer term. Only through enrollment can a grade be earned. A passing grade may be earned only if the student is enrolled for the duration of the course, and a grade, once given, may not be changed without approval of the student's academic dean (or designee).

The instructor of record determines all grades for a course. The method of determining a grade will be included in the course syllabus presented to students at the beginning of the semester.

The grades used, including plus and minus, with their interpretations, are A, excellent; B, good; C, average; D, inferior (passing, but not necessarily satisfying degree requirements); F, failure; P, passing; PR, in progress; I, incomplete; and W, withdrawal (not to be confused with a drop). The letter R designates a course repeated to remove an I. The grade of PR is given only when the work in a course extends beyond the semester or term; it implies satisfactory performance and is used primarily in individual study courses but is not considered a final grade. The grades of CR (credit) and NC (no credit) are given in certain instances.

The grade of I is given only when a student's work is satisfactory in quality but, due to reasons beyond his or her control, has not been completed. It is not given instead of an F. Prior to assigning the I, the instructor must fill out an online form stating the reasons beyond the student's control for granting the I and the conditions to be met to remove the I. The instructor, student, and associate academic dean (or designee) must authorize the request. The I may be replaced by an R if the course is repeated, and the appropriate grade will be given for the second registration. The grade of I will revert to an F after one calendar year if the conditions for completing the I as stated on the form have not been met.

The grade of DG is regulated by the university's drop policy (see section on "Dropping a Course").

Non-semester-based courses that are in progress but not completed by the end of a term will be noted on the transcript by PR. Official grades for such courses will appear on the transcript for the term when completed.

Grade Appeals. A student who wishes to appeal a final course grade should first consult with the course instructor, then with the department chairperson, and then, if the matter remains unresolved, with the associate academic dean (or designee) of the college in which the course is offered. A grade appeal must be filed in the office of the dean of the college in which the course is offered within 45 calendar days of the start of the next long semester after the term in which the disputed grade was received. Copies of the grade appeals policy can be obtained from any academic dean's office or from the Center for Campus Life.

Mid-Semester and Semester Grade Reports. At the close of each semester and each summer term, final course grades are available on raiderlink.ttu.edu (MyTech). Instructors of record are to post mid-semester grade reports for freshmen, student-athletes, new and transfer undergraduate students in their first term at the institution, and undergraduate students in a negative academic standing. Once mid-term grades are posted, students can view the grades on Raiderlink (MyTech).

Grade Points. The grades of A, B, C, and D carry with them grade points of 4, 3, 2, and 1, respectively, for each semester hour of credit value of the course in which the grade is received. All other grades have no assigned grade points.

Grade Point Averages. Only courses taken and grades received at Texas Tech University are used in calculating grade point averages. The current grade point average is determined by dividing the total number of grade points acquired during that semester by the total number of semester hours of all courses in which the student was registered in that semester, exclusive of courses in which grades such as DG, I, P, CR, and PR are received. In the same manner, the grade point average is obtained by dividing the total number of grade points earned in all courses for which the student has registered at this university, including hours for an F, by the total number of semester hours.

Undergraduate-level courses, including those taken toward a second bachelor's degree or for graduate leveling purposes, are calculated into the undergraduate Texas Tech University GPA. The cumulative Texas Tech University (institutional) GPA is adjusted to reflect grade replacements. A pure institutional GPA reflects all hours and courses taken at Texas Tech University and is the GPA used to calculate GPA for Texas Tech University honors designations.

Grade Replacement Policy. The Office of the Registrar will initiate the grade replacement process at the end of each term after a Texas Tech course has been retaken at Texas Tech University and prior to graduation. Students wanting to replace a grade received before fall 1983 should contact their associate academic dean's office.

Grade replacement is for the purpose of adjusting the cumulative grade point average. On the transcript, the original grade will remain visible but will include a notation indicating that the original grade was subsequently replaced. A pure grade point average including all coursework taken at Texas Tech will be used for honors designations. Additional rules concerning grade replacements are below:

- Only grades of D and F are eligible for grade replacement.
- There is no limit on the number of times that a student may attempt to grade replace a course. However, after the third attempt, the student will be charged the nonresident, undergraduate tuition rate for any and all subsequent enrollments in that same course (per the authority granted by Rule 13.105 of Title 19, Part 1, Chapter 13, Subchapter F of the Texas Administrative Code).
- Regardless of the number of attempts made by a student to grade replace a course, only the grade of D or F associated with the most recent attempt of the course will be factored into the student's cumulative grade point average until such time as the student successfully achieves a grade of C or better.
- When considering retaking a course for the purposes of grade replacement, a student with a grade of D in the course should consider the risk of making an F in the subsequent enrollment. The grade of F will replace the grade of D and the student may be required to retake the course again.

Effective January 1, 2009, only current and cumulative institutional GPAs will be calculated. The current and cumulative institutional GPA will include grade replacements. A notation will indicate the original course(s) that is being replaced. The transcript will include the original grade and original academic standing status on the term in which the initial grade was earned, however, a notation will be included that the grade has been "Grade Replaced" and excluded "E" from the GPA and hours.

Pass/Fail Option. Undergraduate students may take up to 13 elective semester hours toward satisfying degree requirements in which they will be graded on a pass/fail basis. Courses specified in the catalog as available only with pass-fail grading and courses taken in excess of degree requirements are not included in the 13-hour restriction. Courses taken as pass/fail may not apply to core curriculum or communication literacy requirements. Students wishing to take a course as pass/fail in their major, minor, or area of concentration must obtain approval from the associate academic dean's office of the college specific to the program in question. For example, students wishing to take as pass/fail a course that is part of their minor must obtain permission from the associate academic dean's office of the college housing the minor. A student who has chosen to take a course pass/fail may not subsequently change to a letter grade option. A grade of F received on a course taken pass/fail will be computed into the grade point average.

Credit by Examination for Matriculated Students. Matriculated students may be given the opportunity to receive credit by examination for courses in which proficiency may be determined by examination. For more

detailed information, see "Undergraduate Credit by Exam" in the Undergraduate Admissions section of this catalog.

Final Examination Policies. Class-related activities, with the exception of office hours, are prohibited on designated individual study days and during the final examination period ([OP 34.10](#)). These dates are set aside for students to prepare for and take scheduled final examinations. During this period, review sessions are not to be scheduled, quizzes are not to be given, and no other class-related activities can be scheduled.

No substantial examinations other than bona fide make-up examinations may be given during the last class week or during the individual study day. Courses in which lab examinations and design studio reviews are normally scheduled the week prior to finals are excluded from this policy. No extra-curricular activities of any kind may be scheduled within the individual study day and the final examination period without written permission of the Office of the Provost.

An instructor with a compelling reason to change the time of an examination must obtain written approval from the department chair and/or associate academic dean of the college or school in which the course is taught before requesting room accommodations from Section Inventory within the Office of the Registrar. Requests for change must be submitted to the Office of the Registrar by 30 days prior to the finals period. A change in the room assignment for a final examination may be made only with the approval of the Office of the Registrar.

There is no university policy that provides relief to students who have three examinations scheduled for the same day. In that situation, students may seek the assistance of the course instructors, department chair, and/or associate academic dean of the college. Contact Section Inventory within the Office of the Registrar at 806.742.1484 with questions, comments, or concerns regarding the final exam schedule.

Graduation Requirements. Graduation requirements include a minimum cumulative Texas Tech University GPA of 2.0 for all courses, including repeated courses, attempted in the degree program in which students seek graduation. To obtain a degree granted by the university, at least 25 percent of the total semester credit hours must be earned through instruction offered by Texas Tech University. Students in their semester of graduation must be enrolled in a minimum of one semester hour.

Graduation Rates. Federal regulations require that the university disclose graduation rates for men and women who are full-time, degree-seeking undergraduate students. Disclosure of graduation rates for various student populations, including athletes, is also required. These are the same rates as those supplied by Texas Tech to the National Collegiate Athletic Association. Detailed graduation rates are available from the Office of Marketing & Communications.

Withdrawal from the University. Students who find it necessary to withdraw from the university before the end of a semester or summer term must submit a withdrawal request online at <https://db.reg.ttu.edu/withdraw> by the appropriate deadline for the term. Although a W will be recorded for all classes that semester or term, these W's will not be counted as one of the six permitted drops. Under certain circumstances, a student may be administratively withdrawn from the university.

International students must receive clearance from the Director of International Programs as a part of the withdrawal procedure.

Academic Integrity

It is the aim of the faculty of Texas Tech University to foster a spirit of complete honesty and a high standard of integrity. The attempt of students to present as their own any work they have not honestly performed is regarded by the faculty and administration as a serious offense and renders the offenders liable to serious consequences, possibly suspension.

Academic integrity is taking responsibility for one's own class and/or coursework, being individually accountable, and demonstrating intellectual honesty and ethical behavior. Academic integrity is a personal choice to abide by the standards of intellectual honesty and responsibility. Because education is a shared effort to achieve learning through the exchange of ideas, students, faculty, and staff have the collective responsibility to build mutual trust and respect. Ethical behavior and independent thought are essential for the highest level of academic achievement, which then must

be measured. Academic achievement includes scholarship, teaching, and learning, all of which are shared endeavors. Grades are used to quantify the successful accumulation of knowledge through learning. Adhering to the standards of academic integrity ensures grades are earned honestly. Academic integrity is the foundation upon which students, faculty, and staff build their educational and professional careers. [Texas Tech University Quality Enhancement Plan, Academic Integrity Task Force, 2010]

Students must understand the principles of academic integrity and abide by them in all classes and/or coursework. Academic integrity violations are outlined in the Code of Student Conduct, Part X, B3 of the *Student Handbook*. If there are questions of interpretation of academic integrity policies or about what might constitute an academic integrity violation, students are responsible for seeking guidance from the faculty member teaching the course in question.

“Academic dishonesty” includes, but is not limited to, cheating, plagiarism, collusion, falsifying academic records, misrepresenting facts, and any act designed to give unfair academic advantage to the student (such as, but not limited to, submission of essentially the same written assignment for two courses without the prior permission of the instructor(s) or the attempt to commit such an act).

A. “Cheating” includes, but is not limited to, the following:

1. Copying from another student's test paper or devices.
2. Using unauthorized materials or devices during a test or other assignment.
3. Failing to comply with instructions given by the person administering the test.
4. Possession during a test of materials that are not authorized by the person administering the test, such as class notes, textbooks, or other unauthorized aids.
5. Possessing, using, buying, stealing, transporting, selling, or soliciting in whole or in part items, including, but not limited to, the contents of an unadministered test, test key, homework solution, or computer program/software. Possession of current or previous test materials at any time without the instructor's permission.
6. Collaborating with, seeking aid, or receiving assistance from another student or individual during a test or in conjunction with other assignments without authority.
7. Discussing the contents of an examination with another student who has taken or will take the examination without authority.
8. Substituting for another person or permitting another person to substitute for oneself in order to take a course, take a test, or complete any course-related assignment, including, but not limited to, signing in/registering attendance for another student without permission from the instructor.
9. Paying or offering to pay money or other valuables to obtain or coerce another person to obtain by any means items, including, but not limited to, (1) an unadministered test, test key, homework solution, or computer program/software or (2) information about an unadministered test, test key, homework solution, or computer program.
10. Falsifying research data, laboratory reports, and/or other academic work offered for credit.
11. Taking, keeping, misplacing, damaging, or altering property of the university or of another individual if the student knows or reasonably should know that an unfair academic advantage would be gained by such conduct.

B. “Plagiarism” includes, but is not limited to, the following:

1. Representation of words, ideas, illustrations, structure, computer code, and other expression or media of another as one's own.
2. Improper citation or lack of acknowledgment that direct, paraphrased, or summarized materials are not one's own.
3. Self-plagiarism that involves submission of the same written assignment for two courses without prior permission of the instructor and/or failure to cite correctly previous work written by the same student.

C. “Collusion” includes, but is not limited to, the following:

1. The unauthorized collaboration with another person in preparing academic assignments offered for credit.
2. Collaboration with another person to commit a violation of any section of the rules on academic dishonesty.

D. “Falsifying academic records” includes, but is not limited to, the following:

1. Altering or assisting in the altering of any official record of the university and/or submitting false information.
2. Omitting requested information that is required for, or related to, any academic record of the university. Academic records include, but are not limited to, applications for admission, awarding of a degree, grade reports, test papers, registration materials, grade change forms, and reporting forms used by the Office of the Registrar. *A former student who engages in such conduct is subject to a bar against readmission, revocation of a degree, and withdrawal of a diploma.*

E. “Misrepresenting facts” to the university or an agent of the university includes, but is not limited to, the following:

1. Providing false grades, resumes, or other academic information.
2. Providing false or misleading information in an effort to receive a postponement or an extension on a test, quiz, or other assignment to obtain an academic or financial benefit for oneself or another individual.
3. Providing false or misleading information in an effort to injure another student academically or financially.

NOTE: See www.depts.ttu.edu/studentjudicialprograms/academicinteg.php for more Academic Integrity information.

Instructor Responsibilities. Any person becoming aware of alleged violations of academic integrity should report the allegation to the instructor of record in the course. The instructor in a course is responsible for initiating action in each case of dishonesty or plagiarism that occurs in that class. The instructor may contact the Office of Student Conduct to discuss the nature of the violation and the student's record of academic integrity violations. The instructor should attempt to discuss the matter with the student and receive a response from the student about the allegations. Then, the instructor may assign academic sanctions, including, but not limited to, assigning a paper or research project related to academic integrity, assigning a make-up assignment that is different from the original assignment, issuing no credit for the original assignment, reducing the grade for the assignment and/or course, issuing a failing grade on the assignment, and/or issuing a failing grade for the course. All academic integrity violations should be referred to the Office of Student Conduct as a central clearinghouse of violations and for adjudication as a Code of Student Conduct violation in which disciplinary sanctions, conditions, and/or restrictions will be assigned.

Withdrawal and Assignment of Grades. Once a student has been notified of an academic integrity violation, the student may not drop the course or withdraw from the university until the academic integrity processes are complete. The university reserves the right to reinstate the student until the matter is resolved. A student should continue academic class and coursework until a final decision is made. If it is determined that the student was not responsible for academic integrity violations, the student may file a request with the Assistant Vice Provost for Student Affairs for approval to drop the course or withdraw from the university retroactively, without academic and financial penalty.

If a referring faculty member must submit a final course grade before an academic integrity violation allegation is resolved, the faculty member should notify the Registrar of the intention to assign a grade of F and/or leave the final grade blank. The involved student shall be given a temporary grade of X, which does not affect the student's GPA until the academic integrity adjudication process is complete. When the adjudication process is complete, the final grade will be assigned through the appropriate academic channels and the completion of a grade change form. When a student is found responsible for academic integrity violations, the recommended academic sanction will be enforced. When a student is found not responsible for academic integrity violations, the student will be entitled to the grade he/she would have received in the absence of an academic integrity violation.

All appeals related to academic integrity violations should follow the process outlined in the *Student Handbook*, Part X.E: Code of Student Conduct: Disciplinary Appeals Procedures.

Referrals to the Office of Student Conduct. In addition to the assignment of academic sanctions by the instructor of record, a referral of the academic integrity violation should also be made to the Office of Student Conduct for the assignment of disciplinary sanctions. A student referred to the

Office of Student Conduct for alleged violations of academic misconduct is entitled to all substantive and procedural guarantees provided in the Code of Student Conduct. Law students are subject to discipline procedures as described in the Honor Code of the School of Law. Instructors of record of the course in which the violation occurred and the associate academic dean of the college in which the student is enrolled may participate in the adjudication of the violation and assignment of additional sanctions, conditions, and/or restrictions with the Office of Student Conduct as outlined in the Code of Student Conduct.

Undergraduate Honors

Honor Lists. Full-time undergraduate students who earn a grade point average of 4.0 during a semester are eligible for the President's Honor List. Those who earn a GPA of 3.5 or higher during a semester are eligible for the Dean's Honor List of the college in which they are enrolled during that semester. For these acknowledgments, students must be enrolled in a minimum of 12 undergraduate hours. Undergraduate students enrolled in approved, accelerated Bachelor's-to-Master's degree programs may be eligible for Dean's and/or President's Lists if:

- The students have completed 90 degree-applicable semester credit hours at the undergraduate level;
- The students are enrolled in graduate credit hours that are approved to apply toward the completion of the undergraduate degree, and;
- The students are enrolled in a minimum of 12 semester credit hours total, including both the graduate and undergraduate courses.

Students taking between 7 and 11 hours and enrolled in the South Plains College (SPC) Spanish courses taught on the Texas Tech campus (SPCS 1501, 1502) may count the SPC hours to accumulate enough hours to qualify for the President's Honor List and the Dean's Honor List if they would otherwise qualify for those honors without the SPC courses. The SPC grades are not sufficient to advance students to qualify for the President's or Dean's list, but the courses can be used to acquire the necessary number of hours (minimum of 12) to qualify and thus keep the student eligible.

Graduation with Honors. Members of a graduating class who complete their work with a pure Texas Tech University grade point average of 3.9 or above graduate Summa Cum Laude; those who complete their work with a GPA of 3.7 to 3.899 graduate Magna Cum Laude; and those who complete their work with a GPA of 3.5 to 3.699 graduate Cum Laude. The pure GPA includes all grades earned at Texas Tech, and only the cumulative GPA without grade replacements is used in the calculation. Appropriate designation of the honor is made on the diploma and the commencement program. The pure GPA for graduation honors includes the final two semesters before graduation. Students are considered for graduation honors only if a minimum of 48 semester credit hours have been completed at Texas Tech University. The pure GPA includes Texas Tech University approved reciprocal exchange study abroad credit, pass/fail credit, and graduate hours applied toward the undergraduate degree. However, no CLEP, foreign language placement tests, or similar types of credit that do not involve course enrollment should be counted in calculating the GPA for graduation honors.

Those who graduate from the Honors College after acquiring at least 24 Honors credit hours (including two Honors seminars) graduate with "Honors," a distinction that is noted on diplomas and transcripts and receives special recognition at graduation ceremonies. Those who also complete an Honors thesis or project consisting of 6 additional hours graduate with "Highest Honors."

Graduation with Honors for Second Texas Tech University Degree Students. Students are considered for graduation honors only if a minimum of 24 semester credit hours have been completed at Texas Tech University after the completion and awarding of the first degree. Honors for the additional undergraduate degree will be based upon all Texas Tech University coursework taken in fulfillment of the second degree requirements. Policies governing minimum coursework required to earn a second undergraduate degree are available at: www.depts.ttu.edu/admissions/apply/status/returning_other/second-undergrad/.

Honors Studies. Honors courses are available to students in all undergraduate colleges. Interested students should consult the Dean of the Honors College or their college academic advisors.

Texas Tech offers one of the best honors programs in the nation for highly motivated and academically talented students who want to maximize their college education. Students must make special application to be considered for admission to the Honors College either as an entering first-year student or as a continuing Texas Tech or transfer student. With the exception of those in the honors arts and letters major, students accepted into the Honors College are also enrolled concurrently in the college that houses their major area of study.

Honor Societies and Organizations. The honorary societies listed here represent more than 20 university organizations open to undergraduates who qualify as a result of their academic achievements. To view a comprehensive listing of all honorary societies at Texas Tech, see [TechConnect](#).

- **Phi Beta Kappa** – Eligibility is limited to upper-division students with outstanding records of achievement in what the Phi Beta Kappa Society designates as the liberal arts and sciences. Phi Beta Kappa is the oldest honorary society in America and has chapters at only three public universities in Texas.
- **Mortar Board** – Mortar Board is a national honor society that recognizes college seniors for distinguished ability and achievement in scholarship, leadership, and service. The Texas Tech chapter is limited to 50 of the top seniors on campus, and members are chosen each spring.
- **Omicron Delta Kappa** – Omicron Delta Kappa is a national leadership honor society in which student membership candidates must rank in the upper 35 percent in scholarship of their school or college and must show leadership in at least one of five areas: scholarship; athletics; campus or community service, social and religious activities, and campus government; journalism, speech, and the mass media; and creative and performing arts.
- **Phi Kappa Phi** – The Honor Society of Phi Kappa Phi is the nation's oldest all-discipline honor society. Membership is by invitation only to the top 7.5 percent of second-semester juniors and the top 10 percent of seniors and graduate students.
- **National Society of Collegiate Scholars** – The National Society of Collegiate Scholars is an honors organization recognizing outstanding academic achievement among first- and second-year students who rank in the top 20th percentile of their class and have a minimum GPA of 3.4. Chapters are involved in service to their campus and local communities as well as scholastic and social activities.
- **Honor Societies for First-Year Students** – Alpha Lambda Delta and Phi Eta Sigma are national honor societies that recognize scholastic attainment during the first student year. Membership is offered to students who earn a grade point average of at least 3.5 during the first semester of their first year while completing at least 12 semester hours of coursework. Students who do not qualify during the first semester may become eligible by earning a grade point average of at least 3.5 for the first two semesters of work combined.

Service Learning Course Designation

Service learning courses are available to all Texas Tech University students and are identified with an "S" in the course section number, e.g. Section S01. Service learning is a pedagogy that links academic study and civic engagement through thoughtfully organized service that meets the needs of the community. The service is structured by and integrated into the academic curriculum, which provides opportunities for students to learn and develop through critical reflection.

A partnership of the Center for Transformative Undergraduate Experiences (TrUE) and the Teaching, Learning, and Professional Development Center (TLPDC), the Service Learning Program is committed to providing rigorous and reflective academic experiences for students. Texas Tech faculty from diverse academic disciplines report that service learning enhances their teaching and students' interest in course material and connects both faculty and students to the community.

Undergraduate Academic Standing Policy

Texas Tech University is committed to student success and assisting students in being accountable for engaging in the educational process. Academic standing is determined upon the completion of the academic

terms (fall, spring, summer) and is based on both current and prior academic performance. Academic standing can be an important indicator of progress and is used to assist with determining appropriate steps to help a student achieve educational goals. The possible academic standing levels for students are as follows:

1. Good Standing
2. Warning
3. Probation
4. Suspension
5. Dismissal

Academic Good Standing. The student has a cumulative institutional GPA at or above 2.0 and is eligible for all extracurricular activities as governed by the rules of the specific activity. Some academic and extracurricular programs have requirements over and above the cumulative GPA of 2.0. Students who have a cumulative GPA above 2.0 but whose current semester GPA is below 2.0 should seek advice from their associate academic dean (or designee).

Academic Warning. A student whose cumulative institutional GPA falls below 2.0 will be placed on “Academic Warning.” Such a student may not enroll for more than 16 hours without prior approval of the associate academic dean (or designee). Students on Academic Warning will receive official notification(s) from their associate academic dean about their academic standing, additional resources, and instructions for next steps. Students are required to schedule an appointment with the appropriate academic or success advisor to arrange academic recovery and grade replacement plans. Students should seek to take one course that was not satisfactorily completed for the purpose of grade replacement, which can have a significant positive impact on GPA. Approved academic recovery plans may require students to complete academic coaching, tutoring, and/or enroll in a Programs for Academic Development and Retention (PADR) course and pay a nonrefundable course fee. Midterm grades for students placed on Academic Warning will be required in the next enrolled term. Athletic academic services should be consulted on recovery plans for student-athletes. A student on Academic Warning remains eligible for all extracurricular activities as governed by the rules of the specific activity.

If the student's term and cumulative institutional TTU GPA is above 2.0 at the end of the following attended term, the academic standing for that term would be Good Standing. If the student's term GPA is above 2.0, but cumulative institutional GPA remains below 2.0 at the end of the following attended term, the academic standing for that term would remain Academic Warning. If the student's term TTU GPA and cumulative institutional GPA is below 2.0 at the end of the following attended term, the student will be placed on Academic Probation. Should a student on Academic Warning withdraw during the next attended term, the student's status will remain Academic Warning until such time as additional completed Texas Tech coursework may be considered.

Academic Probation. A student whose cumulative institutional GPA is below 2.0 for the second consecutive term will be placed on Academic Probation. Such a student may not enroll for more than 16 hours without prior approval of the associate academic dean (or designee). Students on Academic Probation will receive official notification(s) from their associate academic dean about their academic standing, additional resources, and instructions for next steps. Students are required to schedule an appointment with the appropriate academic or success advisor to arrange academic recovery and grade replacement plans. Students should seek to take two courses that were not satisfactorily completed for the purpose of grade replacement, which can have a significant positive impact on GPA. Approved academic recovery plans may require students to complete academic coaching, tutoring, and/or enroll in a Programs for Academic Development and Retention (PADR) course and pay a nonrefundable course fee. Midterm grades for students placed on Academic Probation will be required in the next enrolled term. In addition, the student must continue to seek regularly scheduled advice and counsel from an academic advisor or the academic dean. Athletic academic services should be consulted on recovery plans for student-athletes. The student will remain eligible for all extracurricular activities as governed by the rules of the specific activity subject to the conditions established by the academic dean or committee granting permission to attend classes.

If the student's term and institutional TTU GPA is above 2.0 at the end of the following attended term, the academic standing for that term would be Good Standing. If the student's term GPA is above 2.0, but cumulative

institutional GPA remains below 2.0 at the end of the following attended term, the academic standing for that term would be Academic Warning. If the student's term TTU GPA and cumulative institutional GPA is below 2.0 at the end of the following attended term, the student will be placed on Academic Suspension and all future registration canceled. Should a student on Academic Probation withdraw during the next attended term, the student's status will remain Academic Probation until such time as additional completed Texas Tech coursework may be considered.

Academic Suspension. A probationary student who has a current and a cumulative GPA below 2.0 at the end of a fall, spring, or summer semester will be on Academic Suspension. Students on Academic Suspension will receive official notification(s) from their associate academic dean about their academic standing, additional resources, and instructions for next steps. A student on Academic Suspension is not permitted to take classes for the period of one full term (fall, spring, or summer) and is ineligible to participate in any extracurricular activities once the suspension is posted.

A suspended student must apply for readmission (see Readmission after Suspension below). If readmitted, a student may not enroll for more than 16 hours without prior approval of the associate academic dean (or designee). Students returning from suspension are required to schedule an appointment with the appropriate academic or success advisor to arrange academic recovery and grade replacement plans. Students should seek to take two courses that were not satisfactorily completed for the purpose of grade replacement, which can have a significant positive impact on GPA. Approved academic recovery plans may require students to complete academic coaching, tutoring, and/or enroll in a Programs for Academic Development and Retention (PADR) course and pay a nonrefundable course fee. Midterm grades for students placed on Academic Suspension will be required in the next enrolled term. In addition, the student must continue to seek regularly scheduled advice and counsel from an academic advisor or the academic dean. Athletic academic services should be consulted on recovery plans for student-athletes. The student will be eligible for all extracurricular activities as governed by the rules of the specific activity subject to the conditions established by the associate academic dean or committee granting permission to attend classes.

If the student's term and cumulative institutional TTU GPA is above 2.0 at the end of the next attended term, the academic standing for that term would be Good Standing. If the student's term GPA is above 2.0, but cumulative institutional GPA remains below 2.0 at the end of the following attended term, the academic standing for that term would be Academic Probation. If the student's term TTU GPA and cumulative institutional GPA is below 2.0 at the end of the following attended term, the student will be placed on Academic Dismissal and all future registration canceled.

Should a student returning from Academic Suspension withdraw during the term of readmission, the academic standing for the withdrawn term will be Scholastic Probation. A student in this situation will be subject to the same requirements and guidelines for a suspended student upon returning to the institution. A withdrawn student will be required to apply for readmission.

Academic Dismissal. Students reaching the point of Academic Dismissal are at a critical point of their academic career. Academic Dismissal is a serious consequence of poor academic performance. Students will be dismissed from the institution for a period of one calendar year. Following the dismissal period, the student may appeal the dismissal and apply for readmission. The student's associate academic dean (or designee) will review the student's application.

If readmitted, a student may not enroll for more than 16 hours without prior approval of the associate academic dean (or designee). Students returning from Academic Dismissal are required to schedule an appointment with the appropriate academic or success advisor to arrange academic recovery and grade replacement plans. Students should seek to take two courses that were not satisfactorily completed for the purpose of grade replacement, which can have a significant positive impact on GPA. Approved academic recovery plans may require students to complete academic coaching, tutoring, and/or enroll in a Programs for Academic Development and Retention (PADR) course and pay a nonrefundable course fee. Midterm grades for students returning from academic dismissal will be required in the next enrolled term. In addition, the student must continue to seek regularly scheduled advice and counsel from an academic advisor or the academic dean.

If the student's term and cumulative institutional TTU GPA is above 2.0 at the end of the next attended term, the academic standing for that term would be Good Standing. If the student's term GPA is above 2.0, but cumulative institutional GPA remains below 2.0 at the end of the following attended term, the academic standing for that term would be Academic Probation. If the student's term TTU GPA and cumulative institutional GPA is below 2.0 at the end of the following attended term, the student will be placed on Permanent Academic Dismissal and all future registration canceled.

Should a student returning from Academic Dismissal withdraw during the term of readmission, the academic standing for the withdrawn term will be Scholastic Probation. A student in this situation will be subject to the same requirements and guidelines for dismissed students upon returning to the institution. A withdrawn student will be required to apply for readmission.

Permanent Academic Dismissal. A student whose academic standing is Permanent Academic Dismissal will have no opportunity for appeal. The student will be notified of her/his expulsion from the institution by the Office of the Provost.

Readmission Following Suspension or Dismissal

Students wishing to return to the university after suspension or dismissal will be treated as former students for reinstatement purposes and must provide official transcripts for all academic work completed at institutions other than Texas Tech. Students seeking to return to the university must have a 2.0 GPA on work taken since leaving Texas Tech. Application materials and deadlines for former students are available at https://www.depts.ttu.edu/admissions/apply/status/returning_other/former/.

Students who apply for reinstatement after suspension or dismissal may be subject to additional requirements as prescribed by the academic dean.

Conditions of Return from Academic Suspension. Students on academic suspension may seek reinstatement after a minimum of one semester (fall, spring, or summer). Both summer terms are considered to be a semester for the purpose of serving a suspension.

Students who are reinstated from a suspension and desire to change colleges to pursue a different major or career goal must (1) contact the associate academic dean (or designee) of the college to which they desire to transfer and ensure they meet enrollment requirements, (2) complete an academic transfer form in the receiving dean's office, and (3) complete the process by the last day to change colleges, which is the first day of open registration for the next semester.

Conditions of Return from Academic Dismissal. Students who were academically dismissed from the university may appeal for reinstatement following one calendar year. Students seeking to be readmitted should go to https://www.depts.ttu.edu/admissions/apply/status/returning_other/former/ and complete the Returning Student Application Form, including the required statement of how they plan to complete a degree program successfully.

Returning students must submit all transcripts for work completed at other institutions of higher education attended since leaving Texas Tech. After the application, transcripts, and required fee are received by the Office of Undergraduate Admissions, a message will be sent to the applicant describing the following remaining steps to be readmitted.

All returning students are required to meet with the associate academic dean (or designee) of the college for which they are requesting admission. Returning students will then prepare an Academic Recovery Plan that complies with college and/or program admission requirements. Students who have failed to successfully complete the PADR course required upon their return from suspension must enroll in that course upon return from dismissal.

Returning students entering as an undeclared major are required to meet with a University Advising staff member to develop an Academic Recovery Plan.

The completed "Return from Academic Dismissal Approval Form" concludes the readmission process. This form must be submitted to the Department of Undergraduate Admissions, which will admit the student upon receipt of the form.

Students who fail to adhere to the terms of the agreements required for readmission may be withdrawn from the university and/or barred from enrolling in other Texas Tech University courses until the terms of the contract are successfully completed. Withdrawn students may be permanently academically dismissed.

Teacher Certification Concentrations

Texas Tech University offers a wide variety of programs that can provide certification for students desiring careers in education. Teacher certification concentrations are available in the following areas:

- All Level Art (AART)
- All Level Music (AMUS)
- All Level Theatre Arts (ATHE)
- Elementary Core Subjects (ELEM)
- Middle-Level English, Language Arts, and Reading (MELR) (As part of Education major.)
- Middle-Level Math (MMAT) (As part of Education major.)*
- Middle-Level Science (MSC) (As part of Education major.)
- Middle-Level Social Studies (MSST) (As part of Education major.)
- Secondary Agricultural Food and Natural Resources (SAST)
- Secondary Biology (MLBI) (As part of Multidisciplinary Science major.)
- Secondary Chemistry (SCHE)
- Secondary Dance (SDNC)
- Secondary English, Language Arts, and Reading (SELR)
- Secondary English (SENG) (As part of Education major.)
- Secondary Family Consumer Sciences (SFCS)
- Secondary French (SFRE)
- Secondary German (SGER)
- Secondary History (SHIS)
- Secondary Hospitality, Nutrition, and Food Sciences (SHNF)
- Secondary Human Development and Family Sciences (HDFS)
- Secondary Journalism (SJOU)
- Secondary Life Science (SLFS)
- Secondary Math (SMAT)
- Secondary Math (SMAT) (As part of Education major.)
- Secondary Physical Science (SPSC)
- Secondary Science (SSCI) (As part of Multidisciplinary Science major.)
- Secondary Spanish (SSPA)

* This program is currently not accepting new students.

Pre-Professional Fields

Pre-Professional fields are designations, not degree-granting majors. For example, pre-law and pre-medicine do not result in a bachelor's degree. They designate a career path that will require a professional school after graduation or completion of necessary prerequisite coursework. Pre-professional students who plan to earn a baccalaureate degree must eventually select a degree-granting major in an academic discipline while also completing courses required for admission to the professional program of interest (e.g., law school). Pre-professional advisors are available to guide students in meeting the specific requirements for entry into a professional school while also exploring their options for degree-granting majors (for more information on pre-professional advising, visit www.pphc.ttu.edu or www.prelaw.ttu.edu). Available pre-professional fields include the following:

- Pre-Clinical Laboratory Science (PCLS)
- Pre-Occupational Therapy (POCP)
- Pre-Physical Therapy (PPHT)
- Pre-Physician Assistant (PHPA)
- Pre-Dentistry (PDEN)
- Pre-Law (PLAW)
- Pre-Medicine (PMED)
- Pre-Nursing (PNUR)
- Pre-Optometry (POPT)
- Pre-Pharmacy (PPAR)
- Pre-Speech, Language and Hearing Sciences (PSLH)

Temporary Designations for Students Who Have Not Declared a Major

Special temporary designations are intended to provide appropriate advisement to students who have not yet declared a major. Students declaring a temporary designation will take courses to complete core curriculum and GPA requirements in preparation for entering a major. Academic advisors from the supervising college or department will assist students with exploring possible majors and determining appropriate course options based on that exploration.

Students normally change from the temporary designation and declare a major by the time they have earned 35 to 45 semester credit hours.

Students who have not decided on a major should consider one of the following alternatives for a temporary designation:

- An incoming student can be designated initially as Exploratory. **The Exploratory designation is most appropriate for students (0-35 hours) who are exploring majors in a variety of academic disciplines and colleges.** The eXplore designation is also appropriate for students who are working toward the competitive entry requirements for specific majors, including those in the Whitacre College of Engineering or the Rawls College of Business Administration. Through the university's eXplore process, students can meet with explore advisors to identify values, interest, skills, and abilities which align with their best-fit major. Exploratory status allows students the freedom to explore best-fit academic majors while staying on track in progress toward a degree. For more information on the Exploratory designation, contact Texas Tech University Advising, 347 Drane Hall, 806.742.2189, advising@ttu.edu, www.advising.ttu.edu.
- Students who are only **exploring majors that fall within one particular academic college** should check with advisors in that specific college.
- Students who aspire to apply to a **law, dental, medical, nursing, optometry, or pharmacy school or to one of a full range of health**

career professional schools (e.g., physical therapy, physician assistant) should consult the Pre-Professional Programs section of this catalog and seek advisement as recommended.

- Students who aspire to pursue **pre-veterinary medicine** should refer to Pre-Veterinary Medicine and seek advisement from the Davis College of Agricultural Sciences & Natural Resources.

The temporary designations are as follows:

STEM (TSTM) – Students who are interested in any area of science, technology, engineering, or math fit into the STEM eXplore field! Every field of engineering fits into this category, as do the identifiable mathematics and physical science degrees. Students might also explore Economics as a science or even Information Systems and Quantitative Sciences as technology.

Public Service (TPBS) – Explore majors from health care to education; counseling to public relations fall under this area. Many pre-professional areas fall under Public Service, including those leading to nursing school, law school, and graduate school.

Business & Industry (TBSI) – Students with thoughts of owning their own business or working in banking or money industries, fall under the TBSI category. eXplore Business and Industry includes the traditional areas of business as well as economics, international and global studies, and agricultural industries.

Arts & Humanities (TARH) – Students interested in exploring majors that work primarily on figuring out the historical relevance of events or the potential impact of activities often start with the TARH area.

Social Sciences (TSSC) – Students who are interested in classic social sciences such as humanities or human sciences may choose to start their exploration with the TSSC designation.

Multidisciplinary (TMLT) – Sometimes, students want to explore a variety of combinations of majors and minors. The Multidisciplinary designation fits well for the student looking to combine academic elements from a variety of departments, colleges, or disciplines.

Core Curriculum Requirement

The core curriculum is designed to expose all Texas Tech University graduates to areas of study that are traditionally regarded as basic to the intellectual development of a broadly educated person. These areas of study include: life and physical sciences; social and behavioral sciences; mathematics; language, philosophy, and culture; creative arts; American history; political science/government; and communication. The Texas Tech University core curriculum complies with Texas statutes and Texas Higher Education Coordinating Board rules.

Transfer of Core Curriculum. In accordance with Texas statutes and Texas Higher Education Coordinating Board rules concerning the transfer of core curriculum, a degree-seeking student who transfers from one Texas institution of higher education to another must receive academic credit within the core curriculum of the receiving institution for each of the courses that the student has successfully completed in the core curriculum of the sending institution. Additionally, "If a student successfully completes the 42 semester credit hour core curriculum at an institution of higher education, that block of courses may be transferred to any other institution of higher education and must be substituted for the receiving institution's core curriculum. A student shall receive academic credit for each of the courses transferred and may not be required to take additional core curriculum courses at the receiving institution unless the board has approved a larger core curriculum at that institution." (Section 5.402, d). However, if a TTU degree program has a major requirement typically fulfilled within the core curriculum that the student has not satisfied with their core transfer courses, the student may be required to take the course(s) to satisfy the specific degree requirements.

Students should refer to college and department degree requirements and recommendations when choosing core curriculum courses.

A. Communication: 9 hours

Courses in this core component area focus on developing ideas and expressing them clearly, considering the effect of the message, fostering understanding, and building the skills needed to maximize the potential for effecting change through communication. Courses involve the command of oral, aural, written, and visual literacy skills that enable people to exchange messages appropriate to the subject, occasion, and audience.

Students graduating from Texas Tech University should be able to develop ideas and express them clearly, considering the effect of the message, fostering understanding, and building the skills needed to communicate effectively.

1. Written Communication: 6 hours

TTU Course

| | |
|-----------|--------------------------------|
| ENGL 1301 | Essentials of College Rhetoric |
| ENGL 1302 | Advanced College Rhetoric |

TCCNS

| |
|-----------|
| ENGL 1301 |
| ENGL 1302 |

2. Oral Communication: 3 hours

TTU Course

| | |
|-----------|--|
| CARS 2300 | Communication, Civility, and Ethics |
| CHE 2306 | Exposition of Technical Info. |
| COMS 2300 | Public Speaking |
| COMS 2358 | Speaking for Business |
| ENGR 2331 | Professional Comm. for Engineers |
| IVPA 1302 | Global Dialogues: Connections through the Arts |
| MCOM 2310 | Business and Professional Comm. |

| MATH 2442 |

| |
|-----------|
| MATH 1350 |
|-----------|

| | |
|-----------|----------------------------------|
| MATH 2345 | Intro. to Stats. w/ App. to Bus. |
| MATH 2370 | Elementary Analysis I |
| MATH 2371 | Elementary Analysis II |

2. Mathematics or Logic: 3 hours

Any of the mathematics courses listed above or

| | |
|-----------|--------------------------------|
| AAEC 2301 | Agricultural Statistics |
| EDIT 2318 | Computing and Info. Technology |
| PHIL 2310 | Logic |
| PSY 2400 | Statistical Methods |

| |
|-----------|
| PHIL 2303 |
|-----------|

NOTE: MATH 1351, MATH 1352, and MATH 2350 were 3-hour calculus courses that have been replaced by 4-hour courses: MATH 1451, MATH 1452 and MATH 2450. Any 3-hour calculus course taken prior to fall 2012 will satisfy all calculus and prerequisite requirements that now require 4-hour courses.

Students cannot receive credit for both MATH 1320 and 1420.

Students cannot receive credit for both MATH 1330 and 1430.

Students may use only one of MATH 2300, MATH 2345, AAEC 2301, or PSY 2400 to satisfy the mathematics and logic requirements.

C. Life and Physical Sciences: 8 hours (Two 3-hour lecture classes, each with a related 1-hour laboratory class)

Courses in this category focus on describing, explaining, and predicting natural phenomena using the scientific method. Courses involve the understanding of interactions among natural phenomena and the implications of scientific principles on the physical world and on human experiences.

Students graduating from Texas Tech University should be able to explain some of the major concepts, demonstrate an understanding of scientific approaches to problem-solving, including ethics, and demonstrate understanding of the effects on society and the environment.

The state of Texas requires that all students complete six credit hours in the Life and Physical Sciences area. **Texas Tech University has an additional, two credit hour laboratory science requirement that is not included in the state's requirement. Courses that fulfill this institutional requirement are indicated with a ‡ symbol.** The total, eight credit hour Life and Physical Sciences requirement can be satisfied by taking two four-hour combined lecture and lab science courses (for example, BIOL 1401 and 1402) or two 3-hour science lecture courses along with the accompanying laboratory courses (for example, ATMO 1300 and ATMO 1100, GEOL 1303 and GEOL 1101). It is also permissible to take one 4-hour science course and one 3-hour science course along with the accompanying laboratory course (such as BIOL 1401 and ATMO 1300 with ATMO 1100). Credit toward the science laboratory requirement is not granted for laboratory courses that do not share the same course prefix as the lecture course taken to satisfy a portion of the life and physical sciences core requirement.

For information about how transfer students who present 3-hour science courses may complete the science laboratory requirement see "Science Laboratory Requirement" on page 53.

D. Language, Philosophy, and Culture: 3 hours

Courses in this core component area focus on how ideas, values, beliefs, and other aspects of culture reflect and affect human experience. Courses involve the exploration of ideas that foster aesthetic and intellectual creation in order to understand the human condition across cultures.

Students graduating from Texas Tech University should be able to think critically and evaluate possible multiple interpretations, cultural and historical contexts, and values.

F. Social and Behavioral Sciences: 3 hours

Courses in this core component area focus on the application of scientific methods in the understanding of what makes us human. Courses involve the exploration of behavior and interactions among individuals, groups, institutions, and events, examining their impact on the individual, society, and culture.

Students graduating from Texas Tech University should be able to demonstrate the ability to assess critically claims about social issues, human behavior, and diversity in human experiences.

G. American History: 6 hours

Courses in this core component area focus on the consideration of past events relative to the United States, with the option of including Texas history for a portion of this component area. Courses involve the interaction among individuals, communities, states, the nation, and the world, considering how these interactions have contributed to the development of the United States and its global role.

Students graduating from Texas Tech University should demonstrate an understanding of the historical origins of the United States and be able to identify and describe the importance of key individuals and events in United States and/or Texas history.

H. Government/Political Science 6 hours

Courses in this core component area focus on consideration of the Constitution of the United States and the constitutions of the states, with special emphasis on that of Texas. Students who complete their government requirement outside the State of Texas or from a Texas private institution will need to provide a transcript that verifies they have taken a course with the required Texas and United States constitution content. If verification is not provided, students may be required to complete POLS 2107 - Federal and Texas Constitutions, to ensure they have attained the required competency. Courses involve the analysis of governmental institutions, political behavior, civic engagement, and their political and philosophical foundations.

Students graduating from Texas Tech University should demonstrate an understanding of the organization and functions of the different levels of government in the United States, be able to explain the importance of the United States Constitution and those of the states, and be able to comment on the role of civic engagement in United States politics and culture.

Davis College of Agricultural Sciences & Natural Resources

Clint Krehbiel, Ph.D., Dean

108 Goddard | Box 42123 | Lubbock, TX 79409-2123
T 806.742.2808 | F 806.742.2836 | www.daviscollege.ttu.edu

About the College

The Davis College of Agricultural Sciences & Natural Resources is dedicated to excellence in teaching, research, and outreach and provides outstanding opportunities to students of all levels. Educational programs are designed to prepare the student for dynamic, cutting-edge careers in agriculture, natural resource, and landscape architecture industries. These industries range from local to global in scale and include producing, processing, and marketing agricultural products and related supplies; conserving, managing, and designing renewable natural resources in both managed and natural landscapes; and providing technical assistance, financing, services, education, research, and communications in all sectors of the food, feed, fiber, natural resources, and landscape design industries.

As the size and complexity of agricultural and natural resource endeavors continue to increase, students in these fields will need more technology, science, management, and communications training. Programs in the Davis College include lectures, laboratories, and hands-on learning experiences in each field that provides these important skills.

Teaching and Research Facilities

The college provides excellent teaching, research, and outreach facilities. These include a large number of well-equipped laboratories, design studios, and classrooms. A research-teaching land site adjacent to the campus, a livestock arena, a meat laboratory, a campus greenhouse-experimental garden complex, an equestrian center, and an off-campus research farm are used as teaching laboratories as well as for research in plant and soil science, animal science, plant biotechnology, horticulture, and natural resources management.

The College's research program complements its teaching mission by providing the information and knowledge necessary to keep faculty members current in their respective fields. Research projects provide essential training for graduate students and advanced undergraduates as well as solutions to problems facing the industry. Various forms of outreach are provided by the Davis College through numerous short courses, conferences, workshops, and engaged scholarship conducted throughout the year.

Government Internship Program

The Davis College is unique in providing a dedicated Government Internship Program that provides students an opportunity to intern in congressional and legislative offices in Washington, D.C., and Austin, TX. Requirements for the program include but are not limited to:

- Interns must have completed 30 hours of TTU coursework by the start of the internship and have a minimum cumulative GPA of 3.0.
- Internships start and end according to the full semester schedule.
- Interns must register for a minimum of 6 hours in absentia in a Davis College departmental problems course or internship course and will be considered a full-time student for insurance/scholarship purposes.
- Interns will receive a stipend to help defray expenses.
- Housing costs are deducted from the stipend; students interning in Washington, D.C., must live in the Texas Tech House.

See www.depts.ttu.edu/agriculturalsciences/Students/current/govInterns/index.php for more information.

Graduate Programs

For information on graduate programs offered by the Davis College, visit the Graduate Programs section of the catalog on page 93.

Undergraduate Programs

Core Curriculum Requirements. The university has established core curriculum requirements for all students in order to ensure breadth in each academic program. Students may consult their academic advisor regarding specific core curriculum requirements; however, these requirements are incorporated in each major in the college. Students may find a listing of core curriculum requirements in the Academic Requirements section of this catalog.

Academic Counseling. Each student in the college is assigned an academic advisor. Students who have not selected a major will be assigned an academic advisor by the department chair's office.

Selecting a Major. If students know which course of study they wish to pursue, they should select that major field when they enroll initially. Students who are undecided about a major will be classified as agriculture-undecided but will be assigned to a department and an academic advisor. During the first semester, several introductory courses in agricultural sciences and natural resources should be selected to assist in determining or confirming the preferred area for a major. Students who enter as freshmen should select a major by the end of their fourth semester. Transfer students will be required to make a major selection within two semesters after entering Texas Tech. Some departments offer the opportunity for a dual major program. Students interested in such a program should contact the chairperson of the specific departments involved.

Selecting a Minor. Minors are available in all departments for students with majors in the Davis College as well as those majoring in other colleges within the university. Minors are offered in the following areas: agribusiness management, agricultural leadership, agricultural communication studies, animal science, food science, landscape architecture, natural resources management, and plant and soil science. A minimum of 18 hours is required for a minor. The maximum number of transfer hours in any minor is 9. Courses in a major but outside a student's department may be used in the minor. A student must earn a grade of C or better in each course counted toward a minor. Students are encouraged to seek early advisement from the chair of the minor department to plan for courses that will best meet their educational and career objectives.

General Standards and Requirements. Minimum standards and requirements of the Davis College are the same as those for the university, with certain additions. In addition to the requirements stated in the Academic Requirements section of this catalog, other requirements include the following:

1. Students must file an application for a senior audit with the Dean's Office approximately one year before their expected graduation date. Substitution forms also must be filed each applicable semester.
2. Transfer students who plan to request the use of provisional elective transfer courses as a substitution for required courses must make such a request by the end of their first semester in the Davis College.
3. Any deviation from the approved curriculum for a particular degree must have prior approval from the chairperson of the department and the Dean of the Davis College.

New Students. All new students should carefully read the catalog sections entitled Undergraduate Admissions. Entering freshmen should give special attention to course credit that can be obtained by the College Level Examination Program (CLEP) examinations usually given prior to the beginning of the fall semester. Transfer students should read the paragraphs dealing

with admission of transfer students and transfer of credits from other colleges and universities in the Undergraduate Admissions section of this catalog.

Distance Degree Program. One distance education program is available at the undergraduate level. The Bachelor of Science in Plant and Soil Science with a concentration in horticulture, local food and wine production or viticulture and enology is detailed in the catalog under the Department of Plant and Soil Science.

Sustainability, Undergraduate Minor

The minor in Sustainability is a cross-college, interdisciplinary minor designed in collaboration with multiple colleges across TTU. The minor offers a wide range of suitable courses and advisors from collaborating units. A minimum of 18 hours is required for this minor. Students must have a minimum 2.75 Texas Tech University GPA to complete the minor. Transfer students without Texas Tech University coursework must have a minimum 2.75 transfer GPA. No more than 6 credit hours from a student's respective major can count toward this minor. Unless approved by the course instructor, course prerequisites must be met prior to taking each course. A student must earn a grade of C or greater in each course counted toward this minor. Unless approved by an advisor, courses must be completed at Texas Tech University.

Student learning outcomes:

Upon completing this minor, students will be able to:

1. Define sustainability broadly, and within the context of each emphasis area
2. Demonstrate an understanding of the interdependence of natural resources and social/economic systems
3. Recognize and predict global sustainability benefits, opportunities, and challenges within each emphasis area
4. Identify tools and strategies to address sustainability challenges within each emphasis area
5. Identify, act on, and evaluate professional and personal actions with the knowledge and appreciation of interconnections among economic, environmental, and social perspectives

Requirements:

1. Students must have a minimum 2.75 TTU GPA. Transfer students without a TTU GPA must have a cumulative 2.75 transfer GPA.
2. A minor plan will consist of a minimum of 18 hours.
3. At least 6 of the 18 hours must be upper division (3000 or 4000) courses.
4. No more than 6 credit hours from a student's respective major can count toward this minor.
5. Prerequisites must be met prior to taking each course, unless approved by the course instructor.
6. A minimum grade of C is needed to complete each course in the minor plan.
7. Courses must be taken at Texas Tech University, unless approved by an advisor.
8. Requirements for the minor for Honors students are consistent with the above, but they may also earn Honors credit for any course with an HONS prefix, an Honors section number (H01, etc.), an HE+ section, or an Honors contract.

Academic Advisors:

- Davis College: Dr. Jyotsna Sharma (jyotsna.sharma@ttu.edu) / Ms. Diann Merriman (diann.merriman@ttu.edu)
- Arts & Sciences: Ms. Kacey Marshall (kacey.marshall@ttu.edu, Renewable Energy Program)
- Health and Human Sciences: Dr. Shane Blum (shane.blum@ttu.edu)
- Honors College: Dr. Bryan Giemza (b.giemza@ttu.edu)
- University Studies: Ms. Kelsey Kern (kelsey.kern@ttu.edu)
- TTU-Costa Rica: Ms. Luciana Mendiola (Luciana.Mendiola@ttu.edu)

Program Requirements:

Complete 18 hours from any one of the options below, or consult with an advisor if interested in mixing courses from the three options to customize the minor. An asterisk (*) indicates no prerequisites. The dagger symbol (†) indicates that the course is offered online (either only online or both online and on-campus). The double dagger symbol (§) indicates that the course is offered in both non-Honors and Honors sections. The section symbol (§) indicates that the course is exclusively open to Honors students.

The title of the minor will remain 'Sustainability,' regardless of the courses chosen by students.

Sustainable Agriculture & Natural Resources: AAEC 4309; BIOL 1305*†, BIOL 1401‡, BIOL 3404 ‡, BIOL 4302; LARC 1302*†, LARC 4351*†; NRM 1300*, NRM 3307*, NRM 3309*, NRM 4320; PSS 4312* (Study abroad option)†, PSS 4320†

Sustainable Energy & Engineering: CE 3309; ENCO 3320; ENGR 1320*‡; ME 4360; RE 1300*†, RE 2300*†, RE 3300†, RE 3301†, RE 3315*†

Sustainability in Art, Architecture & Society: ARCH 1311*, ARCH 4311*; ART 2310‡; ATMO 1300*, ATMO 3310; CMI 4301 (Storytelling from the Trail)‡, CMI 4313‡; ENGL 2310†; GEOG 3353*, GEOG 3355*, GEOG 3360*; INTS 3300†; MUHL 4300 (Music, Climate, Environment, Empire: A Sustainable Music History)*; POLS 3303 (Global Weirding)†, PUAD 3329*†; RHIM 3350*†, RHIM 3360*, RHIM 3365

Honors-Only Courses: Sustainability in Creating Livable Futures:

HONS 1304 (Creative Processes)§, HONS 3300 (Thesis 1)§, HONS 3301§, HONS 3302§, HONS 3303§, HONS 4300 (Thesis 2)§, HONS 4302§, HONS 4362§

Matador Institute for Leadership Engagement, Undergraduate Certificate

The college offers the Davis College Matador Institute for Leadership Engagement (MILE) undergraduate certificate to educate young leaders in the agriculture industry about important issues and advanced technologies and how to effectively communicate those ideas to the general public. Students who complete this certificate will enter their careers as the next generation of leaders for the agriculture industry, representing the local, regional, and national industry segments. To apply for the certificate, students must have a 3.0 GPA. Applicants will be interviewed and selected to participate based on qualifications. The certificate program consists of 12 hours: AGSC 2302, 3301, 3302, and an Internship Experience (students will register for a 3-hour internship in their home department).

Undergraduate Course Descriptions

Course descriptions for various specializations within the college can be found in the catalog sections for each department. Those undergraduate courses that are common to many disciplines and have an AGSC prefix can be reviewed below.

Agricultural Science (AGSC)

2300—Computers in Agriculture (3). [AGRI1309] Introduction to information technology in agricultural applications. Includes applications in spreadsheet data analysis, word processing, and database management. F, S.

2301—Agribusiness Data Analysis and Modeling with Spreadsheets (3). Introduction to database management applications, extended application of spreadsheet software, and networked systems. F, S.

2302—Individual Leadership in Agricultural Sciences and Natural Resources (3). Prerequisite: Instructor consent. Provides students with an understanding of agricultural sciences and natural resources leadership through workshops, personality tests, leadership literature, professional development activities, networking opportunities, hands-on agriculture tours, and team building activities.

3301—Service Leadership in Agricultural Sciences and Natural Resources (3). Prerequisites: Instructor consent. Selection for the MILE certificate program. Enhance leadership skills through learning and experiencing agricultural sciences and natural resources service leadership development by creating and implementing service projects.

3302—Community Leadership in Agricultural Sciences and Natural Resources (3). Prerequisites: Instructor consent. Student must be admitted into the MILE Certificate. Provides experience and knowledge in the importance of leadership development in individual and community organizations through workshops and leadership trips to Austin and Washington, D.C.

Department of Agricultural and Applied Economics

Phillip N. Johnson, Ph.D., Chairperson

Combest Chair of Agricultural Competitiveness: Hudson

Charles Thompson Chair of Agricultural Finance: Johnson

Emabeth Thompson Professor of Risk Management: Devadoss

Professors: Devadoss, Hudson, Johnson, Lyford, Misra

Associate Professors: Chidmi, Farmer, Lange, Martin, Murova, Pavlik, Rahman, Wang

Assistant Professors: Amin, Badruddoza, Che, McCallister, Mottaleb

Professor of Practice: Middleton

Adjunct Faculty: Phillips

About the Department

This department administers the following degree programs:

- Bachelor of Science in Agribusiness
- Bachelor of Science in Agricultural and Applied Economics
- Master of Agribusiness
- Master of Science in Agricultural and Applied Economics
- Doctor of Philosophy in Agricultural and Applied Economics

Dual Degree Programs

- Bachelor of Science in Agricultural and Applied Economics /
Bachelor of Business Administration in General Business
- Master of Science in Agricultural and Applied Economics /
Doctor of Jurisprudence

The field of agricultural and applied economics focuses on the application of economic methods to contemporary problems in production, distribution, and consumption of commodities and resources. This field is concerned with decision making in the public sector and in firms that provide materials and services, credit, processing, marketing, and distribution of products, as well as analysis of economic behavior in the food and fiber industries, including the effects of government policies.

The major objective of the department is to teach students to think analytically and base decisions on economic principles. Students develop skills in economics, mathematics, statistics, and communication. Training in policy, price analysis, and marketing is also provided. The department prepares graduates to manage business and financial firms, farms, ranches, and related organizations and direct land and property development and real estate activities.

Graduate Programs

For information on graduate programs offered by the Department of Agricultural and Applied Economics, visit the Graduate Programs section of the catalog on page 94.

Undergraduate Programs

The Bachelor of Science in Agricultural and Applied Economics provides a strong foundation in economics and mathematics and emphasizes writing and communication skills. Flexibility in the program allows a student to earn a minor in areas such as general business and personal financial planning. Minors are also available in other departments in the Davis College as well as in economics and other fields. The department also offers a Bachelor of Science in Agribusiness. This degree program combines the core courses in agricultural and applied economics with those in business administration to provide a solid foundation for careers in businesses related to agriculture. In addition, a dual degree is offered in combination with the Rawls College of Business. This program leads to a B.S. in Agricultural and Applied Economics and a B.B.A. in General Business. Students

Agribusiness, B.S. Recommended Curriculum

FIRST YEAR

Fall

- Lab Science (4 SCH)*
- ENGL 1301 - Essentials of College Rhetoric (3 SCH)
- MATH 1330 - Introductory Mathematical Analysis I (3 SCH)
- POLS 1301 - American Government (3 SCH)
- AAEC 2305 - Fundamentals of Agricultural and Applied Economics (3 SCH) (fulfills Social and Behavioral Sciences requirement)

TOTAL: 16

Spring

- Lab Science (4 SCH)*
- ENGL 1302 - Advanced College Rhetoric (3 SCH)
- MATH 1331 - Introductory Mathematical Analysis II (3 SCH)
- POLS 2306 - Texas Politics and Topics (3 SCH)
- ECO 2302 - Principles of Economics II (3 SCH)

TOTAL: 16

SECOND YEAR

Fall

- Sophomore English (3 SCH)†
- AGSC 2301 - Agribusiness Data Analysis & Modeling w/ Spreadsheets (3 SCH)
- HIST 2300 - History of the United States to 1877 (3 SCH)
- ACCT 2300 - Financial Accounting (3 SCH)
- Creative Arts Course (3 SCH)

TOTAL: 15

Spring

- AAEC Elective (3 SCH)‡
- AAEC 2301 - Agricultural Statistics (3 SCH)
- HIST 2301 - History of the United States since 1877 (3 SCH)
- ACCT 2301 - Managerial Accounting (3 SCH)
- COMS 2358 - Speaking for Business (3 SCH) (fulfills Oral Communication req.)

TOTAL: 15

THIRD YEAR

Fall

- MGT 3370 - Managing People and Organizations (3 SCH)
- AAEC 3315 - Agricultural Price Theory (3 SCH)
- PCOM 3373 - Applied Workplace Communication (3 SCH)
- MKT 3350 - Marketing for a Global Marketplace (3 SCH)
- BLAW 3391 - Business Law and Ethics (3 SCH) OR
- AAEC 4320 - Agribusiness Law (3 SCH) OR
- AAEC 4330 - Natural Resource Law (3 SCH)

TOTAL: 15

Spring

- AGBS Group (3 SCH)§
- AAEC 3100 - Seminar (1 SCH)
- ECO 3311 - Intermediate Macroeconomics (3 SCH)
- FIN 3320 - Financial Management (3 SCH)
- AAEC 3316 - Applied Risk Analysis and Management (3 SCH)

TOTAL: 13

FOURTH YEAR

Fall

- ISQS 3344 - Intro. to Production and Operations Management (3 SCH)
- AGBS Group (9 SCH)§
- AAEC 4315 - Strategic Agribusiness Management (3 SCH) OR
- MGT 4380 - Strategic Management (3 SCH)

TOTAL: 15

Spring

- AAEC 4317 - Commodity Futures Trading and Analysis (3 SCH)
- AAEC 4302 - Statistical Methods in Agricultural Research (3 SCH) OR
- AAEC 4312 - Applied Optimization Methods (3 SCH)
- BA Group (6 SCH)¶
- Free Elective (3 SCH)

TOTAL: 15

TOTAL HOURS: 120

The Departmental CORE Policy includes AAEC 2301, AAEC 3315, and AGSC 2301. All students expecting to graduate on schedule are strongly advised to complete the CORE before beginning their senior year. Students failing to do so may delay their graduation date. AAEC 2305; AGSC 2301; all courses in MATH, ECO, and ENGL; and all courses in business administration (including ACCT, BECO, FIN, ISQS, MGT, and MKT) must be completed with a grade of C or better.

To advance to the upper division of the business administration program, satisfactory completion of the first- and second-year courses and a 2.75 GPA at Texas Tech are required. 2.75 GPA required for ACCT 2300 and ACCT 2301.

* **Lab Science:** Selected from PSS 1411 and PSS 2401, ANSC 1401, NRM 1401, ATMO 1300/1100, BIOL 1401 and BIOL 1402, CHEM 1305/1105 and CHEM 1306/1106, GEOG 1401, GEOL 1303/1101, PHYS 1403 and PHYS 1404, or any other 4-hour lab science course (see Life and Physical Sciences core curriculum).

† **Sophomore English:** Choose one from the following (all fulfill the Language, Philosophy, and Culture requirement): ENGL 2307, 2310, 2351, 2381, 2382, 2383, 2388, 2391.

‡ **AAEC Elective:** AAEC 3301, 3302, 3303, 3305, 3306, 4319.

§ **AGBS Curriculum Group:** Select four 3-hour courses (not used to fulfill another requirement) from any 4000-level AAEC courses (excluding AAEC 4320, and 4330) or any 3000- or 4000-level courses from ACCT, BECO, FIN, ISQS, MGT, MKT. One of the four courses must be chosen from AAEC 4305, 4306, or 4313.

¶ **BA Curriculum Group:** Choose two 3-hour courses (not used to fulfill another requirement) from any 3000- or 4000-level courses in ACCT, BECO, FIN, ISQS, MGT, MKT. Be aware that some senior-level courses will most likely have prerequisites. Please refer to course descriptions. A certificate in commercial banking may be obtained through careful selection of courses from the AGBS and BA curriculum groups.

may also prepare to study toward advanced degrees in economics, law, business administration, and other related areas.

The department's programs emphasize international economics, particularly with respect to trade in commodities. Students completing these plans of study will be better educated for the world economy of the future and will have opportunities for a wide range of careers. Local, regional, and national processing and marketing firms offer many applied economists their first positions. Others become self-employed business operators or managers. State cooperative extension services, financial institutions, the United States Department of Agriculture, utility companies, and many state and government agencies also hire graduates.

The department offers a concentration in international agribusiness for students interested in international agribusiness and economics. The concentration includes 18 hours of coursework applied to any of the three degrees offered by the department (with no increase in required hours to graduate). The concentration includes an international experience of three or six credit hours completed in a foreign country, fulfilled by approved international study abroad. In addition, the concentration includes six hours of core courses in international business and economics (AAEC 4306 and AAEC 4317) and six or nine hours from selected courses in AAEC, ECO, BECO, FIN, MGT, and MKT.

The opportunity to participate in the Honors College is available to agricultural and applied economics students who demonstrate high academic achievement and are accepted into the Honors College. AAEC students wishing to earn an Honors College designation may take AAEC 4301 for honors credit. Admission criteria and other information about the Honors College can be found in the Honors College section of this catalog.

Communication Literacy Requirement. The ability of students to communicate effectively is important for success. The Agricultural and Applied Economics department is committed to improving communication skills of our students. Communication literacy in Agricultural and Applied Economics is evidenced by competence in reading, writing, and oral communication. These competencies are reinforced through requirements within a selection of courses that seek to develop these communication skills. An important aspect of communication for our students is the ability to communicate within an economic context that includes analysis and conclusions.

The communication literacy requirement signals the university's awareness that, in addition to the fundamental role that writing plays in enabling students to explore, develop, focus, and organize a message, other types of communication must also be taught as appropriate for a student's discipline. Throughout each program of study, students must be given many opportunities to develop their skills in forms of communication central to that program.

The following courses partially fulfill the Communication Literacy requirement in the Agribusiness major: PCOM 3373; COMS 2300, COMS 2358, or MCOM 2310; AAEC 4305, 4306, or 4313.

The following courses partially fulfill the Communication Literacy requirement in the Agricultural and Applied Economics major: ENGL 2311 or ACOM 2302; COMS 2300, COMS 2358, or MCOM 2310; AAEC 4305, 4306, or 4313.

The following courses partially fulfill the Communication Literacy requirement for the dual-degree program: PCOM 3373; COMS 2300, COMS 2358, or MCOM 2310; AAEC 4305, 4306, or 4313.

Accelerated Bachelor's to Master's (ABM) Degrees. Exceptional undergraduate agricultural and applied economics majors who wish to complete an ABM degree in a timely manner may apply for admission into one of three accelerated degree programs:

- Bachelor of Science in Agricultural and Applied Economics and Master of Agribusiness
- Bachelor of Science and Master of Science in Agricultural and Applied Economics, thesis option
- Bachelor of Science and Master of Science in Agricultural and Applied Economics, non-thesis option

Admission to these programs allows students to count 9 dual hours of undergraduate coursework toward these degrees. Application should be made during the first semester of the junior year following procedures from the department's graduate program coordinator.

Undergraduate Minors

The department offers three minors for non-departmental majors—a minor in agribusiness management; a minor in international agribusiness; and a minor in applied political economy.

Agribusiness Management

The minor in agribusiness management is for non-departmental majors. The minor consists of 18 hours of coursework, including AAEC 2305, nine hours from 3000-level AAEC courses, and six hours from 4000-level AAEC courses. Students must satisfy course prerequisites before registering for courses.

Applied Political Economy

The minor in applied political economy is intended for students interested in working on issues at the intersection of applied economics and political science. The minor includes nine hours of core courses (AAEC 2305, BECO 4345, and POLS 3316); three hours of policy analysis selected from AAEC 4305, PUAD 3352, and BECO 4366; and six elective hours selected from BECO 3310, BECO 4376, AAEC 3306, and POLS 3366. AAEC 4305, PUAD 3352, and BECO 4366 that are not taken to fulfill the policy requirement may be taken as electives.

International Agribusiness

The department offers a minor in international agribusiness for non-departmental majors. The minor consists of 18 hours of coursework, including AAEC 2305, nine hours from 3000-level AAEC courses, and six hours from 4000-level AAEC courses. Students must satisfy course prerequisites before registering for courses. This minor in international agribusiness requires six hours of approved courses in the area of international economics and business. A minimum of three credit hours must be taken in a foreign country, fulfilled by approved international study abroad.

Undergraduate Certificate

Excellence in Ag Finance

The Excellence in Ag Finance (EIAF) undergraduate certificate program is a selective program that prepares students for a career in the diverse area of agricultural finance. The banking, real estate, insurance, commercial finance, and commodity markets fields are critically short of highly qualified graduates. The EIAF program is designed to identify and match excellent students with an interest in finance and risk management with career opportunities through high-quality educational and experiential learning opportunities. This is a competitive process based on student performance in courses, a statement of interest, and interviews with the EIAF advisory/faculty panel. If selected, to complete the certificate program, students must:

- Complete a short 2-3 week shadowing exercise with an external partner during the summer after they have been selected. Successful completion of that experience and a positive rating from the external partner is required to continue in that program.
- Complete an internship with an external partner in the general field of agricultural finance: banking, real estate, insurance, commodity trading, etc., during the summer of a subsequent year of their program. This is a formal internship process whereby the student is expected to engage in the learning opportunity and define, in conjunction with the host firm, a project or professional experience. Students must submit a report based on that project to a faculty committee that will assess student performance with additional feedback from the host firm
- Complete a set of required online short modules to ensure that students have the necessary background in basic agricultural issues

Each student who completes the above requirements will register for an AAEC 4301 course during their final semester to receive a grade for the content learned in the above based on the assessments for each activity. This course will count for one of the required electives in their degree program. Admission to this course and a grade will be only for students who complete these requirements and the courses below to receive their certificate. In addition, students are required to complete with a grade of C

Agricultural and Applied Economics, B.S. Recommended Curriculum

FIRST YEAR

Fall

- ☐ Lab Science (4 SCH)*
- ☐ ENGL 1301 - Essentials of College Rhetoric (3 SCH)

The Departmental CORE Policy includes AAEC 2301, AAEC 3315, and AGSC 2301. All students expecting to graduate on schedule are strongly advised to complete the CORE before beginning their senior year. Students failing to do so may delay their graduation date.

† Agricultural elective must be selected from PSS 1321, NRM 1300, NRM 1401, or ANSC 1401. All courses in MATH and AAEC 2305 must be completed with a grade of C or better.

2.75 GPA required for ACCT 2300 and ACCT 2301.

As part of the macroeconomics sequence, completion of ECO 2302, with a grade of C (or better), is a prerequisite for ECO 3311.

§ **Electives:** The degree program consists of 21 elective hours including 9 hours of **directed electives** chosen from upper-level ECO, PFP/PFI, BA, and AAEC courses not required elsewhere (this excludes AAEC 4000 and may include AAEC 4301 for students wanting undergraduate research experience), and 12 hours of **free electives** chosen from any other courses not used elsewhere in the degree program. Approved internship hours may count as free electives. Suggested courses for students interested in specific areas are as follows:

Agricultural Business Management: Consider electives from AAEC 3303, AAEC 3305, AAEC 4317, and appropriate upper-level courses in BA or ECO, such as BA 3301, BA 3303, BA 3304, or BA 3305; ECO 3320, (To take BA courses, students may need to declare a business minor.)

Agricultural Production (Farm or Ranch) Management: Select electives from AAEC 4317 and appropriate courses in PSS, ANSC, and NRM.

Students may earn a minor by careful use of elective hours.

* **Lab Science:** Selected from PSS 1411 and PSS 2401, ANSC 1401, NRM 1401, ATMO 1300/1100, BIOL 1401 and BIOL 1402, CHEM 1305/1105 and CHEM 1306/1106, GEOG 1401, GEOL 1303/1101, PHYS 1403 and PHYS 1404, or any other 4-hour lab science course (see Life and Physical Sciences core curriculum).

‡ **Language, Philosophy, and Culture; or Creative Arts Elective:** There are two university core curriculum requirements for these subjects. The requirements may be met individually or by completing a course that satisfies more than one. A list of approved courses is available from the Davis College Dean's Office.

¶ **AAEC Curriculum Group:** Select four courses from: AAEC 4303, 4304, 4305, 4306, 4309, 4313, 4315, 4316, 4317, 4320, 4325, 4330, 4385, 4000. (One of the four courses must be chosen from AAEC 4305, 4306, or 4313.)

- ☐ MGT 4380 - Strategic Management (3 SCH)
- ☐ BA Group (12 SCH)¶

TOTAL: 18

Spring

- ☐ AAEC 4302 - Statistical Methods in Agricultural Research (3 SCH)
- ☐ AGGB Group (6 SCH)¶
- ☐ BA Group (6 SCH)¶

TOTAL: 15

TOTAL HOURS: 144

The Departmental CORE Policy includes AAEC 2301, AAEC 3315, and AGSC 2301. All students expecting to graduate on schedule are strongly advised to complete the CORE before beginning their senior year. Students failing to do so may delay their graduation date.

Notes: Both degrees may be granted on completion of all 144 hours. AAEC 2305; AGSC 2301; all courses in MATH, ECO, and ENGL; and all courses in business administration (including ACCT, BECO, FIN, ISQS, MGT, and MKT) must be completed with a grade of C or better. See the Rawls College of Business section of the catalog for information on lower division requirements. Students interested in pursuing a B.B.A. degree in majors other than general business should visit with a Rawls College of Business advisor about additional course requirements. Satisfactory completion of the first and second year courses and a 2.75 GPA at Texas Tech are required to advance to the upper division of the business administration program. 2.75 GPA required for ACCT 2300 and ACCT 2301.

* **Lab Science:** Selected from: PSS 1411 and PSS 2401, ANSC 1401, NRM 1401, ATMO 1300/1100, BIOL 1401 and BIOL 1402, CHEM 1305/1105 and CHEM 1306/1106, GEOG 1401, GEOL 1303/1101, PHYS 1403 and PHYS 1404, or any other 4-hour lab science course (see Life and Physical Sciences core curriculum).

‡ **Language, Philosophy, and Culture; or Creative Arts Elective:** There are two university requirements for these subjects. The requirements may be met individually or by completing a course that satisfies more than one. A list of approved courses is available from the dean's office.

¶ **AGGB Curriculum Group:** Select 5 courses from the following list: AAEC 4303, 4304, 4305, 4306, 4309, 4312, 4313, 4315, 4317, 4325, 4385, 4000. (One of the five courses must be chosen from AAEC 4305, 4306, or 4313.)

§ **Agricultural Elective** must be selected from: PSS 1321, NRM 1300, NRM 1401, ANSC 1401.

¶ **BA Curriculum Group:** Choose 21 hours (not used to fulfill another requirement) from at least 3 of the areas ACCT, BECO, FIN, ISQS, MGT, MKT. At least 9 hours must be from senior-level courses. Be aware that some senior-level courses will most likely have prerequisites. Please refer to course descriptions.

A certificate in commercial banking may be obtained through careful selection of courses from the AGGB and BA curriculum groups.

or better: AGSC 2301; AAEC 3302, AAEC 3316, AAEC 4316, AAEC 4317. Students participating in the Excellence in Ag Finance certificate program also have the option to complete either/and the Excellence in Banking and Commercial Real Estate certificate programs (this option is currently only available to Agribusiness and Dual Degree students). Agricultural and Applied Economics students are eligible to complete the Excellence in Ag Finance certificate but are not eligible to complete the other certificate programs in the Rawls College of Business.

Intra-institutional Dual Degree

Agricultural and Applied Economics, B.S. / General Business, B.B.A.

This unique and progressive program leads to two undergraduate degrees—Bachelor of Science in Agricultural and Applied Economics and Bachelor of Business Administration in General Business. Students completing this program will be better educated for the world economy of the future and will have enhanced marketability for a wide range of careers. Students will also be prepared to enter the Master of Business Administration program if desired. The curriculum provides a common body of knowledge for students in agricultural and applied economics and business administration. Students must complete lower-division BA courses before taking upper-division BA courses and must have a 2.75 GPA.

Undergraduate Course Descriptions

Agricultural and Applied Economics (AAEC)

- 1301—Economics, Ecology, and Ethics (3).** An introduction to economics for non-AAEC majors focusing on ecology, social ethics, and inequality. Fulfills core Social and Behavioral Sciences requirement.
- 2301—Agricultural Statistics (3).** Principles and procedures involved in the analysis of agricultural data including indices of central tendency and dispersion; probability; sampling; significance tests; analysis of variance; and correlation and simple linear regression. Partially fulfills core Mathematics requirement (in conjunction with a mathematics course). F, S, SS.
- 2305—Fundamentals of Agricultural and Applied Economics (3).** [AGRI2317] Fundamental economic principles and their application to problems and issues in the food, fiber, and natural resource sectors of the economy. Fulfills core Social and Behavioral Sciences requirement. F, S, SS.
- 3100—Seminar (1).** Prerequisite: Junior standing. Informs students of job opportunities available to agricultural and applied economics graduates. Guest speakers and written assignments will help graduates be successful in entering the job market. F, S.
- 3301—Agribusiness Marketing (3).** Prerequisites: AAEC 2305 or ECO 2301 and ENGL 1302. Marketing of raw materials and processed products from the management perspective. Market structure, conduct, performance. Marketing channels. F, S.
- 3302—Agribusiness Finance (3).** Prerequisites: AAEC 2305, C or better in MATH 1320 or MATH 1330. Basic principles of finance emphasizing the mathematics of finance, credit, and financial analysis. F, S.
- 3303—Cooperatives (3).** Organization and operation of agricultural and other cooperatives. S.
- 3305—Introduction to Sales (3).** Principles and methods used in professional selling for the business environment. Includes concepts of human behavior and professional selling techniques. F, S.
- 3306—The Economics of the American West (3).** Prerequisite: Junior standing. Introduces economic concepts to explore various historical forms of social organization in the American West.
- 3315—Agricultural Price Theory (3).** Prerequisites: AAEC 2305 or ECO 2301 and MATH 1331. Basic economic principles with applications to agricultural pricing problems and resource allocations. F, S, SS.
- 3316—Applied Risk Analysis and Management (3).** Prerequisite: AGSC 2301 and AAEC 3315. Familiarizes students with the concepts of risk and provides tools for applied analysis of risk and risk management, especially as related to biological production and markets.

- 4000—Internship in Agricultural and Applied Economics (VI-12).** Prerequisite: Sophomore standing and approval. Supervised study providing in-service training and practice in business and organizations. F, S, SS.
- 4101—Current Problems in Agricultural and Applied Economics (1).** Prerequisite: Senior standing and instructor consent. Topics may vary. May be repeated twice for credit. F, S, SS.
- 4301—Special Problems in Applied Economic Analysis (3).** Prerequisite: Instructor consent. Individual instruction in analysis of a research problem. May be repeated with the approval of the department. F, S, SS.
- 4302—Statistical Methods in Agricultural Research (3).** Prerequisites: MATH 1331, AAEC 2301 or MATH 2300 or MATH 2345. Advanced agricultural statistical analysis related to research methods using probability theory; tests of statistical significance; multiple correlation and regression; analysis of covariance; and experimental design. S, SS.
- 4303—Property Appraisal (3).** Prerequisites: AAEC 2305 or ECO 2301. Factors governing property prices and valuation. Appraisal of property for use, sale, and other purposes. F.
- 4304—Agribusiness Logistics (3).** Prerequisite: AAEC 2305. Logistics and supply chain management course about managing relationships across the complex agribusiness networks that today's supply chains have become. S.
- 4305—Agricultural and Public Policy (3).** Prerequisite: AAEC 3315. Historical development and economic analysis of public programs and policies affecting the food and fiber sector and the environment. (CL) F.
- 4306—International Agricultural Trade (3).** Prerequisite: AAEC 3315. Economic principles of interregional and international trade, location, and inter-area competition in products and services. (CL) S.
- 4309—Sustaining Global Ecology, Natural Resources and Economy (3).** Prerequisite: Junior standing. Challenges to global markets and environment across diverse systems and histories. F.
- 4312—Applied Optimization Methods (3).** Prerequisite: AAEC 3315. Study of techniques applicable to economic optimization problems, including mathematical optimization and linear programming. Emphasis on problem solving. F.
- 4313—Natural Resource Economics (3).** Prerequisite: AAEC 3315. Economics of natural resource use and allocation including land economics, economics of water development, and environmental economics. (CL) S.
- 4315—Strategic Agribusiness Management (3).** Prerequisite: AAEC 2305 and sophomore standing. Provides key insights and information necessary to achieve success in agribusiness management in a collaborative and interactive manner. Provides information on the logic and methods of strategic analysis, business strategy development and strategic decision-making tools for agribusiness. F.
- 4316—Agricultural Financial Analysis (3).** Prerequisite: AAEC 3302 or FIN 3320. Principles and procedures in managing financial and credit resources; nature, purposes, and use of financial statements, budgets, and credit instruments; and criteria for decision making in borrowing and lending. S.
- 4317—Commodity Futures Trading and Analysis (3).** Prerequisites: AAEC 2305 or ECO 2301. History and characteristics of commodity futures markets, hedging and speculation, and use of futures as a management tool. F, S.
- 4319—Agribusiness Enterprise Management (3).** Prerequisite: AAEC 2305 or ECO 2301. Organization and management of the individual small business including farms, ranches, input suppliers, commodity processors, etc. [AAEC 5319]
- 4320—Agribusiness Law (3).** Focuses on various areas of law that directly affect the operation of agricultural businesses and producers. Examines nature and source of law, contracts, real estate matters, commercial transactions, business entities and environmental issues. F.
- 4325—The US-Mexico Border Economy (3).** Prerequisite: ECO 2302. Examines the evolution of the U.S.-Mexico border economy from colonial times until today using economic, sociological, environmental, and political insights.
- 4330—Natural Resource Law (3).** General examination of the regulatory and legal framework of natural resource laws that affect the operation of agricultural businesses and producers. S.
- 4385—The Economics of Food Security, Terrorism, and Conflict (3).** Prerequisite: ECO 2301 or AAEC 2305 or equivalent. Covers the economics of food security and other factors and catalysts for engagement in terrorism and conflict. Addresses myths and realities of terrorism through economics. S.

Department of Agricultural Education and Communications

Scott Burris, Ph.D., Chairperson

Professors: Akers, Brashears, Burris, Irlbeck, Lawver, Meyers, Rayfield

Associate Professors: Boren-Alpizar, Fischer, Gibson, Ritz

Assistant Professor: Headrick

Associate Professor of Practice: Kennedy

Assistant Professors of Practice: Hatch, Morales

Lecturer: Harlan

CONTACT INFORMATION: 103 Agricultural Education and Communications Building | Box 42131 | Lubbock, TX 79409-2131

About the Department

This department supervises the following degree programs:

- Bachelor of Science in Agricultural Education
 - Concentrations in Agricultural Leadership and Teacher Certification
- Bachelor of Science in Agricultural Communications
- Master of Science in Agricultural Education
- Master of Science in Agricultural Communications
- Doctor of Education in Agricultural Education
- Doctor of Philosophy in Agricultural Communications and Education
- Graduate Certificate in Agricultural Communications Leadership
- Graduate Certificate in Agricultural Leadership

Laptop Requirement. Undergraduate students in the department are required to have a laptop computer. Specifications are posted at both:
www.depts.ttu.edu/aged/ugrad/gen_info.php
www.depts.ttu.edu/ithelpcentral/recommend.php

Graduate Programs

For information on graduate programs offered by the Department of Agricultural Education and Communications, visit the Graduate Programs section of the catalog on page 95.

Undergraduate Programs

Agricultural Communications, B.S.

Agricultural communications is the practice of communicating to audience segments using a variety of communication channels on topics relevant to agriculture, food, environment, and natural resources. Agricultural communications students learn how to communicate about and advocate for the agricultural industry through comprehensive coursework. The combination of courses in both communications and agricultural sciences prepares our students to successfully communicate with various audiences using multiple media (print, online, video, etc.)

Examples of careers in agricultural communications are communications specialist, photographer, lobbyist, editor, reporter, public relations specialist, event planner, videographer, and graphic designer. Agricultural communications majors gain hands-on experience while interning with a variety of professional communication entities, including national publications, television stations, commodity groups, and major agricultural events.

These degrees are also recommended for students interested in continued studies in professional schools such as law or business. A grade of C or higher is required in each required ACOM course.

Communication Literacy Requirement. Communication Literacy courses for the Agricultural Communications major are ACOM 4305, ACOM 4311, ACOM 4312, and ACOM 4410.

Agricultural Communications, B.S. Recommended Curriculum

FIRST YEAR

Fall

- ☐ Life and Physical Sciences (4 SCH)
- ☐ ENGL 1301 - Essentials of College Rhetoric (3 SCH)
- ☐ MATH 1320 - College Algebra (3 SCH)
- ☐ ACOM 1300 - Introduction to Agricultural Communications (3 SCH)
- ☐ AGED 2300 - Introduction to Agricultural Education (3 SCH)

TOTAL: 16

Spring

- ☐ Life and Physical Sciences (4 SCH)
- ☐ ENGL 1302 - Advanced College Rhetoric (3 SCH)
- ☐ HIST 2300 - History of the United States to 1877 (3 SCH)
- ☐ Basic Agricultural Elective (3 SCH)
- ☐ MATH 2300 - Statistical Methods (3 SCH)

TOTAL: 16

SECOND YEAR

Fall

- ☐ AAEC 2305 - Fundamentals of Agricultural and Applied Economics (3 SCH)
- ☐ Basic Agricultural Elective (3 SCH)
- ☐ ACOM 2302 - Scientific Comm. in Agriculture & Natural Resources (3 SCH)
- ☐ ACOM 2303 - Digital Imaging in Agriculture (3 SCH)
- ☐ HIST 2301 - History of the United States since 1877 (3 SCH)

TOTAL: 15

Spring

- ☐ ACOM 2300 - Professional Development in Agricultural Comm. (3 SCH)
- ☐ ACOM 2305 - Digital Communications in Agriculture (3 SCH)
- ☐ JOUR 2310 - News Writing (3 SCH)†
- ☐ Language, Philosophy, & Culture (3 SCH) (select from the university core curriculum)
- ☐ POLS 1301 - American Government (3 SCH)

TOTAL: 15

THIRD YEAR

Fall

- ☐ POLS 2306 - Texas Politics and Topics (3 SCH)
- ☐ COMS 2300 - Public Speaking (3 SCH) (fulfills Oral Communication requirement)
- ☐ Communications Elective (3 SCH)
- ☐ Creative Arts (3 SCH) (select from the university core curriculum)
- ☐ ACOM 3300 - Communicating Agriculture to the Public (3 SCH)

TOTAL: 15

Spring

- ☐ Advanced Agricultural Electives (6 SCH)*
- ☐ Basic Agricultural Elective (3 SCH)
- ☐ Communications Elective (3 SCH)
- ☐ ACOM 3301 - Video Production in Agriculture (3 SCH)

TOTAL: 15

FOURTH YEAR

Fall

- ☐ ACOM 4000 - Internship in Agricultural Communications (V1-12 SCH) (Minimum of 3 hours required.)
- ☐ Advanced Agricultural Electives (6 SCH)*
- ☐ ACOM 3305 - Layout and Design in Agricultural Sciences (3 SCH)
- ☐ ACOM 3311 - Web Design in Ag. Sciences & Natural Resources (3 SCH)

TOTAL: 15

Spring

- ☐ ACOM 4305 - Agricultural Communication Campaigns (3 SCH)
- ☐ ACOM 4311 - Convergence in Agricultural Media (3 SCH)
- ☐ ACOM 4312 - Advanced Design Principles for Agricultural Media (3 SCH)
- ☐ ACOM 4410 - Development of Agricultural Publications (4 SCH)

TOTAL: 13

TOTAL HOURS: 120

* Advanced agricultural elective is a 3000- or 4000-level course.

† Must pass BOW exam, maintain a 2.5 GPA, and pass ENGL 1301 and ENGL 1302 with a C or better before enrolling.

Life & Physical Sciences: ANSC 1401, 1404; BIOL 1401, 1402; CHEM 1305 and 1105; NRM 1401; PSS 1411, 2401

Communications Electives: Suggested communications electives: ADV 3310; PRSC 2310; MCOM 3300, 3320, 3380; BA 3301 or AAEC 3301, or others with advisor approval.

Agricultural Education, B.S.

Students majoring in agricultural education for the B.S. degree may choose from two concentrations: teacher certification or agricultural leadership.

Teacher Certification. The teacher certification concentration involves courses from many departments in the college. Elective courses can be selected in areas of special interest. Job placement in high schools, cooperative extension, and community colleges offers a life-long career for many graduates and alternative employment opportunities for others. Students seeking teacher certification also may receive a degree in another agricultural area and, with proper planning, receive certification in agricultural education.

Agricultural Leadership. Agricultural leadership prepares students to master the complexities of agriculture and blends the understanding of working with people with having an understanding of the food, agriculture, human sciences, and natural resources industry. The leadership component of the degree challenges students to engage in personal leadership development, leadership theory, organizational leadership, effective group and team leadership, diversity and inclusion leadership in an agricultural context, global leadership, change management, and contemporary issues in agriculture. This allows students to thrive during a required internship experience. Students select technical agricultural courses that allow them to specialize in areas of interest and to reinforce their general knowledge of the agricultural industry. Examples of careers in agricultural leadership include leadership specialists, human resources, policy and government relations, nonprofits, sales, management, and careers in law and public service and preparation for professional and graduate schools. Agricultural leadership majors understand the human connections behind the work that occurs across the agricultural industry and understand the dynamic theories and leadership approaches to working across business, communities, and systems to advance the agricultural industry and its people.

Communication Literacy Requirement. Communication Literacy courses for the Agricultural Education: Agricultural Leadership major are AGLS 1300; ACOM 2302 or ENGL 2311; AGLS 4309.

Communication Literacy courses for the Agricultural Education: Teacher Certification major are ACOM 2302; AGED 4303, AGED 4404, and AGED 4306.

Undergraduate Minors

The department offers two minors for students outside the department: agricultural leadership and agricultural communication studies.

Agricultural Communication Studies

The department of Agricultural Education and Communications offers a minor in agricultural communication studies for students outside the department. Required courses are ACOM 1300, 2302, 2305, 3300; JOUR 2310; and one of ACOM 3301, 3302, 3305, or 3311.

Agricultural Leadership

The Department of Agricultural Education and Communications offers a minor in agricultural leadership for students outside the department. Select six courses from the following list: AGLS 1300, 2307, 3302, 3310, 3314, 3315, 4308, and 4330.

Undergraduate Course Descriptions

Agricultural Communications (ACOM)

- 1300—Introduction to Agricultural Communications (3).** An overview of information systems and media associated with the agricultural industry.
- 2300—Professional Development in Agricultural Communications (3).** Focuses on job applications, business etiquette, soft skills, event planning, and professionalism.
- 2302—Scientific Communications in Agriculture and Natural Resources (3).** Improve written, visual, and oral communications. Development of press releases, scientific papers, popular press articles, poster presentations, technical presentations, and grant applications. (CL)
- 2303—Digital Imaging in Agriculture (3).** Basics of composition, techniques, and lighting involved in photographing agricultural images. Students

will learn about photographing agricultural subjects, people, and landscapes.

- 2305—Digital Communications in Agriculture (3).** Examination of the use of computers in agricultural communications with emphasis on graphic art production, photo manipulation, and elements of design.
- 3300—Communicating Agriculture to the Public (3).** Prerequisite: ACOM 2302. Principles and procedures in communicating agricultural news and information to general and specialized audiences through presentations and various media. S.
- 3301—Video Production in Agriculture (3).** Prerequisite or corequisite: ACOM 2303. Basics in producing an agricultural video. Students learn scripting, shooting, and digital video editing.
- 3302—Advocating for Agriculture (3).** Promotes understanding of the agricultural industry with a focus on advocacy, written, online, and oral communications.
- 3305—Layout and Design in Agricultural Sciences (3).** Prerequisite: ACOM 2305. Examination of design principles and desktop publishing in the agricultural industry.
- 3311—Web Design in Agricultural Sciences and Natural Resources (3).** Prerequisite: ACOM 2305. Promote basic understanding of Web design principles and experiential learning through a project requiring students to develop a Web site for a client in the agriculture industry.
- 4000—Internship in Agricultural Communications (V1-12).**
- 4001—Agricultural Communications Problems (V1-3).** Individual study of advanced application of principles of agricultural communications.
- 4304—Risk and Crisis Communications in Agricultural and Natural Resources (3).** Prerequisite: ACOM 3300 OR JOUR 2310. Introducing risk and crisis as interdisciplinary concepts. Includes theoretical understanding of communication, processing risks and leveraging trust and knowledge for understanding, and organizational crisis communication. [ACOM 5304]
- 4305—Agricultural Communication Campaigns (3).** Prerequisite: ACOM 3305, junior or senior standing, and ACOM majors only. Principles, practices, and applications of social marketing as they pertain to developing communication campaigns for the food and fiber industry. (CL)
- 4311—Convergence in Agricultural Media (3).** Prerequisites: C- or better in ACOM 3311, instructor consent, and ACOM majors only. Intensive application of communication skills to produce a multimedia website focused on agricultural topics. (CL)
- 4312—Advanced Design Principles for Agricultural Media (3).** Prerequisites: ACOM 2305 and ACOM 3305. Provides an in-depth examination of design principles, theories, applications, and topics relevant to agricultural media with an emphasis in advanced design skills in computer applications. (CL)
- 4410—Development of Agricultural Publications (4).** Prerequisite: JOUR 2310. Students integrate various skills including writing, editing, advertising sales, photography, and layout in producing agricultural publications. Emphasis upon computer software applications in agricultural publishing. (CL)

Agricultural Education (AGED)

- 2300—Introduction to Agricultural Education (3).** History and principles of vocational education, community assessment of agricultural programs planning, and development of agricultural youth organization.
- 2304—Agriculture and Society (3).** An examination of relationships between agriculture and society, the environment, and population. Emphasizes agriculture's use of science, technology, engineering, and mathematics.
- 3100—Introduction to Teaching Agricultural Education (1).** Provides new teacher candidates information, access and skills to successfully complete a teacher education program in agricultural education.
- 3333—Developing Secondary Agricultural Education Programs (3).** Provides theory and application in instruction, leadership, and experience for agricultural science teachers as they learn components of the agricultural education model.
- 4000—Internship (V1-12).**
- 4001—Agricultural Education Problems (V1-3).** Prerequisite: Approval of department chairperson. Individual investigation related to agricultural education or leadership. May be repeated for credit. F, S, SS.
- 4303—Designing and Integrating the Agricultural Curriculum (3).** Instructional methodology on curricular goals for agricultural programs and designing curriculum with integration of STEM areas for cross-content credit in secondary agricultural education. (CL)
- 4306—Student Teaching (3).** Prerequisite: Senior standing in agricultural education. (CL)
- 4310—Advanced Supervised Agricultural Experience (SAE) Management (3).** Corequisites: AGED 3100, AGED 4404, AGED 4312, AGSM 4303. Provides theory and application for working with youth in the appli-

Agricultural Electives: Choose from the following prefixes: AAEC, ACOM, AGLS, ANSC, FDSC, LARC, NRM, PSS.

cation of experiential learning, specifically as it relates to Supervised Agricultural Experience (SAE) projects.

- 4311—Agricultural Education Senior Seminar (3).** Students pursuing teacher certification must value professional demands. Course involves theory and application toward teaching, conducting daily tasks, and assuming professional roles.
- 4312—Managing a Classroom in Secondary Agricultural Education (3).** Focuses on classroom behavior management in secondary agricultural science. Knowledge and skills will enable pre-service teachers to implement procedures to encourage appropriate student decorum.
- 4313—Professional Development and Supplemental Instructional in School-Based Agricultural Education (3).** Prerequisite: AGED 3333 and instructor approval. Focuses on roles and responsibilities of secondary ag educators during extended contract time, where they attend professional development and conventions and manage FFA programs.
- 4404—Methods of Teaching Agriscience in the Secondary School (4).** Exploration of the methods, techniques, and strategies essential for teaching agricultural subjects in the secondary school. (CL)
- 4410—Integrating Science into Agricultural Education (4).** Methods of integrating activities related to science content during the instruction of secondary agricultural education. Special focus on laboratory instruction in animal science.

Agricultural Leadership (AGLS)

- 1300—Introduction to Agricultural Leadership Development (3).** Principles, theories, and application of interpersonal skills required to develop strong leadership in the agricultural and natural resource context. (CL)
- 2307—Leadership and Diversity in Organizations and Communities (3).** Exploration toward understanding principles of diversity and inclusion related to leader development, followership, organizational culture, leadership education, and practical application in agricultural and natural resources.
- 3302—Theories of Change (3).** Examination of processes by which professional agriculturalists influence the introduction, adoption, and diffusion of technological change. F.
- 3310—Leadership in International Development of Agriculture (3).** Leadership development concepts, theories and strategies and effective application within international agricultural populations, cultures and industries resulting in improved education, training and performance.
- 3314—Team Leadership Development in Agriculture and Natural Resources (3).** Exploration of strategies and techniques for successful teams, including conflict management, facilitation, and negotiation, skill

building, and experimental activities in agriculture and natural resources.

- 3315—Leadership Theory for Agriculture and Beyond (3).** Principles of leadership and personal skill development. Emphasizes leadership styles, types of management, group dynamics, and managing change as applied to agriculture.
- 4302—Interpreting Social Science Research in Agriculture (3).** Prepares students to understand and apply the research tools associated with the scientific method, research design, data collection and qualitative and quantitative analysis of data.
- 4308—Organizational Leadership Development in Agriculture and Natural Resources (3).** Human behavior in organizations, the role of leadership in organizational performance, and the process of organizational change and improvement.
- 4309—Contemporary Issues in Agricultural Leadership (3).** An evaluation of current issues pertaining to leadership in agriculture and natural resources including a historical look at leadership and its impact on producers and consumers. (CL)
- 4330—Interrelationships of Agricultural Agency Information Systems (3).** Utilization of agricultural service systems to disseminate information to traditional and nontraditional agricultural clientele. Emphasis on USDA organizations.

Agricultural Systems Management (AGSM)

- 2303—Welding and Metalwork (3).** Metal fabrication and repair using hand tools, power tools, and welding equipment. Includes metallurgy pertaining to welding processes and heat treating.
- 3304—Systems in Agricultural Mechanics (3).** Prerequisite: AGSM 2303. Mathematics and physical science applications to systems in agricultural mechanics. Topics in electricity, internal combustion engine theory, land measurement, and environmental control.
- 3305—Structural Systems in Agricultural Mechanics (3).** Prerequisites: AGSM 2303 and AGSM 3304. Mathematics and physical science applications to agricultural structural systems. Topics in safety, woodworking, surveying, concrete, framing, finishing, specialized agricultural structures, plumbing, environmental control.
- 4301—Agricultural Mechanization Problems (3).** Individual study of an advanced phase of agricultural mechanization. Research report required. F, S, SS.
- 4303—Laboratory Methods in Agricultural Systems Management (3).** Prerequisite: AGSM 2303; AGSM 3304 recommended. Principles in managing secondary agricultural science laboratories. Features safe operation of power tools and equipment.

Department of Animal and Food Sciences

J Chance Brooks, Ph.D., Chairperson

Horn Distinguished Professor and Roth and Letch Family Chair in Food Safety: Brashears

Cargill Professor in Sustainable Meat Science: Woerner

Gordon W. Davis Regent's Chair: Johnson

John W. and Doris Jones Associate Professor: R. Rathmann

San Antonio Livestock Exposition Chair: Miller

Thornton Distinguished Chair in Animal Science: Hales

Professors: Brady, Brooks, Jackson, Krehbiel, McGlone, Prien, Thompson, Walla

Associate Professors: Crossland, N. Hall, Legako, Sanchez-Plata, Sarturi

Assistant Professors: Aviles-Rosa, Choi, Foraker, Stellato

Professor of Practice: Riccitelli

Associate Professor of Practice: Echeverry

Assistant Professors of Practice: Gauthier, Niblett, O'Hanley, Sillivent, Thomas

Instructors: Backus, Beyers, Dechant, H. Hall, Irwin, K. Rathmann, Scott

Adjunct Faculty: Brown, Bugarel, Henry, Koohmaraie, Loes, Penrose, Protopopova, Schroeder, Shackelford, Shome, Webb, Wheeler

About the Department

This department supervises the following degree programs and certificates:

- Bachelor of Science in Animal Science
 - Concentrations in Science and Industry
- Bachelor of Science in Food Science
 - Concentrations in Science and Industry
- Undergraduate Certificate in Equine Science
- Undergraduate Certificate in Horsemanship
- Master of Science in Animal Science
- Master of Science in Food Science
- Doctor of Philosophy in Animal Science
- Graduate Certificate in Global Food Security

Accelerated Bachelor's to Master's Degree Programs

- Bachelor of Science in Animal Science / Master of Agribusiness
- Bachelor of Science in Food Science / Master of Agribusiness

The department offers minors in animal science or food science for students majoring outside the department. For more information on requirements for completing a minor, refer to Selecting a Minor in the introductory information about this college or contact a department advisor.

Graduate Programs

For information on graduate programs offered by the Department of Animal and Food Sciences, visit the Graduate Programs section of the catalog on page 96.

Undergraduate Programs

Animal Science, B.S.

Students majoring in animal science for the B.S. degree may choose to focus on one of two concentrations: science and industry. The department also directs the pre-professional course preparation for veterinary medicine, two equine undergraduate certificate programs, and a minor in animal science. All concentrations prepare students for careers in all facets of livestock production and companion animal science. Regardless of concentration, students majoring in animal science are expected to successfully complete coursework in general animal science, domestic

animal anatomy, animal physiology, nutrition, feeding, meat science, reproductive physiology, genetics, animal welfare and ethics, and animal production/experiences.

The science concentration provides advanced training in basic sciences to prepare students for study toward an advanced degree. The science concentration is recommended for students interested in pursuing a post-baccalaureate graduate degree in livestock, equine, food, meat, veterinary, ruminant nutrition, animal health, range, ranch management, and other agricultural sciences.

The industry concentration is flexible and provides students with the opportunity to diversify their coursework or focus on areas of interest. This industry concentration is recommended for those with career interest in livestock production, animal business, animal physiology, equine and equine assisted services, meat science and muscle biology, companion animal science, and animal welfare. Course offerings in this concentration focus on topics across a wide range of subjects related to live animal production, animal food systems, and one-health. Students interested in pre-nursing can major in animal science and complete their nursing school prerequisite courses in the Industry concentration.

Students must earn a grade of C or better in all animal science courses required for graduation. Students must also earn a grade of C or better in courses used as substitutions for animal science courses. In addition, students are expected to participate in a transformative learning opportunity (internship, research, service learning, study abroad, entrepreneurship, intercollegiate competitive team, or another transformative, high-impact learning experience identified by department advisor) prior to graduation. All electives are subject to departmental approval.

Students with Pre-Veterinary Medicine and other pre-professional health interests (pre-clinical laboratory sciences; pre-dentistry; pre-medicine; pre-occupational therapy; pre-optometry; pre-pharmacy; pre-physical therapy; pre-physician assistant; and pre-speech, language, and hearing sciences) can major in animal science as most professional school prerequisite courses are included in this degree concentration.

Communication Literacy Requirement in Animal Science. Communication literacy in Animal Science is evidenced by competence in finding, reading, and interpreting animal science material; and communicating (both written and oral) an understanding of the material. This is accomplished through the analysis of literature—both scientific and popular press, as well as through writing and public speaking to a variety of audiences with diverse educational backgrounds. These skills will be assessed in three required courses: ANSC 3100, 3401, and at least one of the following: ANSC 4303, 4401, 4402, 4403, 4405, 4408, or 4411.

Food Science, B.S.

Food science provides coursework for a comprehensive background in the processing and preservation of foods. Food science graduates may be employed in areas concerned with food systems management, design and development of new food products, strategies for quality control/assurance and food safety, or research in basic constituents of food. The increasing pressure of world population growth on available food supply assures a stable, growing job market for food science students. Positions in private industry, educational institutions, and governmental agencies offer excellent potential for rapid advancement.

The food science curriculum provides coursework suggested by the Institute of Food Technologists and emphasizes processing and quality control aspects. A pilot plant and associated chemical and microbiological laboratories allow students practical experience in development, manufacture, and analysis of food products.

Students majoring in food science for the B.S. degree may choose between two concentrations: industry or science. All students are required to take a 3-hour internship or 3-hour research experience to fulfill graduation requirements.

Communication Literacy Requirement in Food Science. Communication literacy in Food Science is evidenced by competence in finding, reading, and interpreting food science material; and communicating (both written and oral) an understanding of the material. This is accomplished through the analysis of literature—both scientific and popular press, as well as through writing and public speaking to a variety of audiences with diverse educational backgrounds. These skills will be assessed in five

- ☐ Creative Arts (3 SCH)*
- ☐ FDSC 4402 - Food Analysis (4 SCH)
- ☐ PHYS 1403 - General Physics I (4 SCH)
- ☐ Approved Elective (3 SCH)

TOTAL: 14

TOTAL HOURS: 120

* Choose from core curriculum requirements.

Approved Electives: Students must complete an internship or research experience.

FDSC 3306, 4001, 4307; ANSC 2202, 2303, 3306, 3315, 3321, 4400, 4404; AAEC 3301, 3302, 3303, 3305, 3315, 4319; BA 3301, 3302, 3303, 3304, 3305, 3306; CHEM 3341 and 3141, 3301; PSS 1311, 1321, 2314 and 2114, 2401, 3310, 3322, 4301, 4416.

required courses: ACOM 2302 or ENGL 2311; FDSC 3100, FDSC 4304, at least one of the following courses: FDSC 3301, FDSC 4402, FDSC 4403; and at least one of the following: FDSC 3303, FDSC 3305, or FDSC 3309.

Undergraduate Minors

Animal Science

Requirements:

1. All prerequisites must be met prior to taking each course.
2. A grade of C or higher is required in each course.
3. The maximum number of transfer hours in any minor is nine (9).
4. A student may not minor within their department.
5. Courses in a major, but outside a student's department, may be used in a minor.
6. **Minors will consist of a minimum of 18 hours.**
7. At least nine (9) hours in a minor must consist of upper-division courses (3000 or higher).
 - Required Courses (11 hours): ANSC 1401, 3301 or 3305 (spring only) or 2305 (fall only).
 - Any production class: ANSC 4400, 4401, 4402, 4403, 4404, 4405, 4406, 4407, 4408, 4409.
 - Electives: At least seven (7) hours of directed electives will be chosen by the student with the consent of the Animal Science Minor Advisor.

Food Science

Requirements:

1. All prerequisites must be met prior to taking each course.
2. A grade of C or higher is required in each course.
3. The maximum number of transfer hours in any minor is nine (9).
4. A student may not minor within their department.
5. Courses in a major, but outside a student's department, may be used in a minor.
6. **Minors will consist of a minimum of 18 hours.**
7. At least nine (9) hours in a minor must consist of upper-division courses.
 - Required Courses (9 hours): FDSC 2300, 2301, and 3303 or 3309
 - Electives (9 hours from the following): FDSC 3301, 3305, 4001, 4304, 4306, 4307, 4402, 4403

Undergraduate Certificates

Equine Science

The Equine Certificate is offered as two options: Equine Assisted Therapy and Ranch Horse Management. Both options contain 13 hours of required coursework and 6 hours of directed electives, which are specific to each option. A grade of C- or better is required in all coursework. A maximum of 6 transfer credit hours can be applied toward the certificate. Any prerequisites must be met prior to taking a course.

Courses Required (students must complete 13 hours of the following): ANSC 2304, 3303, 4402 and 3 hours from ANSC 2305 or 3307.

- **Equine Assisted Therapy (6 hours):** ANSC 3309, 4301, 4305
- **Ranch Horse Management (6 hours):** ANSC 3304, 3310, 3317, 4305

Horsemanship

The department offers a 12-hour Undergraduate Horsemanship Certificate to provide hands-on training in equine science. Students must complete one of the following ANSC Primary Equine Courses.

ANSC Primary Equine Courses. ANSC 2305, 3303, 4402.

ANSC General Equine Courses. Students will also be required to complete two additional courses from the following ANSC General Equine Courses or students can take additional ANSC Primary Equine Courses to complete the 12 hours. A minimum grade of C must be earned in each class. If a course requires a prerequisite, the prerequisite must be taken: ANSC 2304, 2310, 3204, 3304, 3309, 3310, 3312, 3313, 3317, 4305.

Note: Courses may be taken in any order as long as prerequisites are met.

Undergraduate Concentration

Pre-Veterinary Medicine

Although Texas Tech does not offer a degree in pre-veterinary medicine, students may still prepare for veterinary school by completing the minimum admission requirements. A pre-veterinary medicine advisor is available to assist students in selecting courses and degree programs.

The following courses and requirements are a summary of the minimum admission requirements for Texas veterinary schools. Students interested in applying to a Veterinary Medicine program are highly encouraged to contact the program of interest for specific requirements and possible changes.

| | TTU Courses That Meet TTU School of Veterinary Medicine Requirements | | TTU Courses That Meet Texas A&M University College of Veterinary Medicine Requirements | |
|---|---|-------------------------------------|---|-----------------------------------|
| Subject | Credit Hours | Courses | Credit Hours | Courses |
| Required Prerequisites | | | | |
| General Biology with Lab | 4 | BIOL 1402 or BIOL 1403 | 4 | BIOL 1402 or BIOL 1403 |
| General Microbiology with Lab | 4 | MBIO 3400 or MBIO 3401 | 4 | MBIO 3401 |
| Genetics | 4 | ANSC 3402 or BIOL 3416 or PSS 3421 | 3 | BIOL 3416 or PSS 3421 |
| Animal Nutrition | 3 | ANSC 3301 or 3307 | 3 | ANSC 3301 or 3305 or 3307 |
| Inorganic Chemistry with Lab | 8 | CHEM 1307/1107 and CHEM 1308/1108 | 8 | CHEM 1307/1107 and CHEM 1308/1108 |
| Organic Chemistry with Lab | 4 | CHEM 3305/3105 | 8 | CHEM 3305/3105 and CHEM 3306/3106 |
| Biochemistry (must be lecture hours only) | 3 | CHEM 3310 or CHEM 3311 | 3 | CHEM 3310 or CHEM 3311 |
| Statistics | 3 | MATH 2300 or MATH 2345 or AAEC 2301 | 3 | MATH 2345 or AAEC 2301 |

| Comm./Public Speaking | 0 | (not required) | 3 | COMS 2300 or COMS 2358 |

Undergraduate Course Descriptions

Animal Science (ANSC)

1100—Freshman Seminar (1). Challenges students to think critically, apply solutions to problems, and develop a plan for success in college. Students will learn about support services, employment opportuni-

- ties, extracurricular, service, and leadership organizations within the university. [FDSC 1100]
- 1401—General Animal Science (4).** [AGRI1419] The application of basic scientific principles to the efficient production of domestic animals. Students must enroll in lecture and lab concurrently. Partially fulfills core Life and Physical Sciences requirement. F, S, SS.
- 1404—The Meat We Eat - Introduction to Meat Production, Selection and Meat-Eating (4).** For nonmajors who desire general knowledge of meat purchasing, selection, and cookery. Aspects of hazard analysis, food safety, and sanitation will be studied. Partially fulfills core Life and Physical Sciences requirement. F, S.
- 2202—Principles of Anatomy of Domestic Animals (2).** Introduction to anatomy of domesticated animals with emphasis on bones, muscles, organs, vascular and nervous systems. F, S.
- 2301—Livestock and Meat Evaluation I (3).** [AGRI2322] Evaluation and selection of breeding and market animals, carcass evaluation and grading, breed characteristics. Field trips to ranches and meat packing plants. S.
- 2302—Livestock and Meat Evaluation II (3).** Advanced training in evaluating, selecting, pricing, and grading of breeding and market livestock, carcasses, and wholesale cuts. Field trips to ranches and meat packing plants. Livestock and meat judging teams originate from this course. May be repeated for credit. F.
- 2303—Care and Management of Companion Animals (3).** Principles and practices of proper selection, feeding, and care of companion animals, with emphasis on the dog and cat. Nutrition, health care, behavior, training, and reproduction are discussed. F.
- 2304—Selection and Evaluation of Horses (3).** Criteria for evaluation and selection of breeding and show animals. Evaluation of breed types and show ring characteristics. Field trips to various breed operations. Horse judging teams will originate from this course. S.
- 2305—Introductory Horse Nutrition (3).** Introduction to basic nutrition and feeding of horses. Emphasis on practical applications and feeding management guidelines. F.
- 2306—Principles of Physiology of Domestic Animals (3).** Prerequisite: ANSC 2202. Introduction to physiological principles of domesticated animals, including major systems. S.
- 2307—Animal Welfare and Ethics (3).** Examines topics in animal rights philosophy, cultural differences in animal caretaking, and animal welfare. Horses, livestock, companion animals, and laboratory animals will be discussed.
- 2310—The Horse in World Art (3).** A comprehensive study of the depiction of the horse in fine arts, reflecting cultures, values, traditions, and heritage of civilization throughout history. Fulfills core Creative Arts requirement. F, SII.
- 3100—Animal Science Seminar (1).** Information to prepare students to function in a competitive work environment or professional/graduate school. (CL) F, S.
- 3203—Livestock and Meat Judging (2).** In-depth special training in livestock and meat judging, grading, and evaluation for students who wish to become members of the livestock or meat judging teams. May be repeated for credit. S.
- 3204—Advanced Livestock, Horse, and Meat Judging (2).** Advanced training in judging, grading, and evaluating performance for members of the senior livestock, horse, or meat judging teams. May be repeated for credit once. F.
- 3301—Principles of Nutrition (3).** Prerequisites: ANSC 1401; CHEM 1305 or CHEM 1307. Nutritional roles of carbohydrates, proteins, lipids, minerals, vitamins, and water. Digestion, absorption, and use of nutrients and their metabolites. F, S, SS.
- 3303—Introductory Horse Management (3).** An introduction to all aspects of equine management including selection, herd health, reproduction, nutrition, behavior, and marketing. F.
- 3304—Management and Training of Horses (3).** Practical application of the science of equine behavior to training young ranch horses. Emphasis on training, communication, and progressive learning of ranch skills.
- 3305—Applied Animal Nutrition (3).** Prerequisites: ANSC 1401 and CHEM 1305 or CHEM 1307. The fundamental metabolic principles of nutrition will be developed into concepts applicable to problem solving and situation use in the field. Nutrition-disease involvement. Not open to animal science majors. Will not qualify as prerequisite to ANSC 3307. S, SSI.
- 3306—Animal Diseases (3).** Diseases of farm animals, both infectious and noninfectious, parasites, parasitic diseases, and the establishment of immunity through the use of biological products. S.
- 3307—Feeds and Feeding (3).** Prerequisite: ANSC 3301. Characteristics of feedstuffs used in livestock enterprises. Ration formulation and nutritional management of beef and dairy cattle, sheep, goats, swine, and horses. Methods of processing and evaluating feeds. F, S.
- 3308—Clinical Veterinary Science (3).** Prerequisites: ANSC 2202 and ANSC 2306. Clinical course working with various animal species. Course provides practical applications in various disciplines of veterinary medicine. SSI.
- 3309—Principles of Hippotherapy (3).** An interdisciplinary overview of hippotherapy with primary emphasis on the use of the horse in therapy for children with physical, cognitive, and other disabilities F, S, SS.
- 3310—Principles of Equine Sales Preparation and Marketing (3).** Prerequisite: ANSC 3303. Principles of equine management as related to fitting, presentation, and marketing of horses.
- 3312—Horsemanship I: General Horsemanship (3).** Fundamentals of horse care and riding with an emphasis on practical experience. F.
- 3313—Horsemanship II: Advanced Horsemanship (3).** Riding-intensive class for advanced riders. Emphasis on communication with horse in both hunt/stock seat disciplines. S.
- 3314—Companion Animal Behavior and Training (3).** Prerequisite: ANSC 1401. Covers basic principles of animal learning and provides an introduction to dog training and companion animal behavioral consulting.
- 3315—Companion Animal Nutrition (3).** Prerequisite: ANSC 3301. Nutrition and feeding of companion animals, with an emphasis on cats and dogs. Topics discussed will range from digestive systems and pet food composition to regulations.
- 3316—Animal Growth and Development (3).** Prerequisites: ANSC 2202 and ANSC 2306. A comprehensive course in the basic principles and concepts of livestock growth and development.
- 3317—Ranch Horse Techniques (3).** Prerequisite: Consent of instructor. Riding-intensive class for advanced riders. Instruction in working cattle, reining, and trail. Student will provide a horse. May be repeated for credit. F, S.
- 3318—Domestic Animal Behavior (3).** Prerequisite: ANSC 1401 or BIOL 1402 or BIOL 1403. Examines farm and companion animal behavior, including physiology of behavior, communication, social behaviors, and others. S, SSI.
- 3321—Human-Animal Interactions (3).** Prerequisite: ANSC 1401. Topics include animals in society and the history and application of animal-assisted interventions to benefit human populations using horses, dogs, and other animals.
- 3401—Reproductive Physiology (4).** Prerequisites: ANSC 2202 and ANSC 2306 or ANSC 3405. Physiological approach to reproductive processes in farm animals. Study includes anatomy, endocrinology, estrous cycles, egg and sperm physiology, fertilization, gestation, parturition, and artificial insemination. (CL) F.
- 3402—Animal Breeding and Genetics (4).** Prerequisites: ANSC 1401 and MATH 1320 or higher. Fundamental principles of cellular, population, and quantitative genetics applied in selection and mating systems to make genetic improvements in farm animals. F.
- 3403—Selection, Care, Processing, and Cooking of Meats (4).** A general course in selecting, preserving, inspecting, grading, and cooking meats. F, S.
- 3405—Advanced Physiology of Animals (4).** Prerequisites: ANSC 2202 and honors student status or consent of instructor. Physiology of domestic animals for advanced or honors students. Lecture and laboratory emphasizing whole animal physiology. S, even years.
- 4000—Internship (V1-12).** Prerequisite: Consent of instructor. A supervised study course providing in-service training and practice in the various areas of animal science. F, S, SS.
- 4001—Special Problems in Animal Science (V1-6).** Prerequisite: Consent of instructor. Individual investigation. May be repeated for credit. F, S, SS.
- 4202—Artificial Insemination of Livestock (2).** Prerequisite: ANSC 3401 or consent of instructor. Anatomy and physiology of reproductive organs, palpation, insemination techniques, handling frozen semen, estrous detection, synchronization of estrus and ovulation, and pregnancy determination. Intersession.
- 4203—Dog Training Practicum II (2).** Prerequisite: ANSC 4303. In this hands-on practicum, students will develop and teach community dog training classes as well as mentor other students. May be repeated for credit.
- 4301—Equine-Assisted Mental Health (3).** Prerequisite: ANSC 3312 or instructor permission. An introduction to therapeutic intervention using horses to address behavioral, relational, and emotional issues for clients. S.
- 4303—Dog Training Practicum (3).** Prerequisite: ANSC 3314. In this hands-on practicum, students will assist in developing and teaching community dog training classes. May be repeated for credit. (CL)
- 4305—Therapeutic Riding (3).** Skills and theories of therapeutic riding, including lesson plan development, knowledge of disabilities, and groundwork for instructor certification. F.
- 4306—Equine Feeding and Exercise Management (3).** Prerequisite: ANSC 2305 or consent of instructor. Students will investigate exercise physi-

ology concepts and nutritional requirements related to the feeding and care of horses.

- 4307—Sensory Analysis of Foods (3).** Prerequisites: MATH 2300 or AAEC 2301. Analytical, affective, and statistical methods for assessing the sensory properties of foods and beverages. [ANSC 5317]
- 4400—Meat Science and Muscle Biology (4).** Prerequisite: ANSC 3403 or consent of instructor. Study of meat components, their development, and their effect on meat characteristics and processing properties. Emphasis on industry issues. F.
- 4401—Swine Production (4).** Prerequisite: ANSC 3301. Understanding pig biology, management of the pig's environment and genetics to maximize profits. Include genetics, nutrition, reproduction, housing, herd health, and management practices. Laboratory and field trips. (CL) F.
- 4402—Horse Production (4).** An advanced study of equine anatomy, reproductive physiology, nutrition, disease, and management. (CL) S.
- 4403—Beef Production (4).** Prerequisite: ANSC 3301. The breeding, feeding, and managing of beef herds for profitable production of slaughter cattle. Emphasis on commercial cow-calf herds. Field trips to ranches. (CL) S.
- 4404—Processed and Cured Meat Science (4).** Introduction to manufactured meat products and muscle ingredients, processing technologies, storage conditions, and stability of cured muscle foods. S.
- 4405—Beef Cattle Stocker and Feedlot Management (4).** Prerequisite: ANSC 3301. Stocker and feedlot cattle production with focus on management, procurement and marketing, animal health and nutrition. Field trips to feedlots. (CL) F.
- 4406—Sheep and Goat Production (4).** Prerequisite: ANSC 3301. Sheep, goat, wool, and mohair production management and marketing practices. Field trips to ranches and feedlots. S.
- 4407—Poultry Production (4).** Prerequisite: ANSC 3301. Poultry production including layers, broiler and turkey management. F.
- 4408—Animal Shelter Management (4).** Prerequisite: ANSC 3314. A combination of lectures, demonstrations, and hands-on activities in animal shelter management. Students will work directly with animal shelters in the community. (CL)
- 4409—Dairy Production (4).** A comprehensive, introductory study of modern dairy herd management, including health topics, housing design, feeding strategies, animal welfare, and product marketing in the U.S. and abroad.
- 4410—Advanced Clinical Veterinary Science (4).** Familiarizes students with numerous aspects of veterinary medicine including clinical procedures, physical exams, client communication, diagnostics, wound care, and advanced anatomy.
- 4411—Advanced Animal Behavior and Training (4).** Prerequisite: ANSC 3314. Hands-on animal training experience including opportunities to serve as a companion animal trainer/instructor. (CL)
- 4412—Feline Behavior and Training (4).** Prerequisite: ANSC 3314. Covers cat behavior modification and training principles. Students will work with shelter cats to apply these principles and mechanics of training to improve behavior. (CL)

Food Science (FDSC)

- 1100—Freshman Seminar (1).** Challenges students to think critically, apply solutions to problems, and develop a plan for success in college. Students will learn about support services, employment opportuni-

ties, extracurricular, service, and leadership organizations within the university. [ANSC 1100]

- 1300—Your Food (3).** Introduction to the origins of agriculture and how food has shaped our current societies and contemporary behavior and health. Will cover popular topics.
- 2300—Principles of Food Technology (3).** [AGRI1329] Basic information necessary to understand technological aspects of modern industrial food supply systems. A fundamental background in food classification, modern processing, and quality control. F, S, SS.
- 2301—Fundamentals of Food Processing (3).** An introductory course in the principles and application of unit operations in food and beverage processing with a focus on quality and safety.
- 3100—Food Science Seminar (1).** Information to prepare students to function in a competitive work environment or professional/graduate school. (CL)
- 3301—Food Microbiology (3).** Prerequisite: MBIO 3400 or MBIO 3401 or permission of instructor. Study of method for preservation of food with respect to control of microbiological growth and activity. (CL) S, even years.
- 3303—Food Sanitation (3).** Principles of sanitation in food processing and food service applications. Chemical, physical, and microbiological basis of sanitation. Equipment and food product care. (CL) F, S, SSII.
- 3305—Principles of Food Engineering (3).** Prerequisites: MATH 1320 and MATH 1321 or higher-level math. Provides students exposure in using food engineering principles for improving the commonly used unit operations in the food processing industry. (CL)
- 3306—Food Plant Design (3).** Prerequisite: FDSC 3305. Introduction to the principles of hygienic design required for food processing plants and facilities. Emphasis on site, layout, costs, and design considerations.
- 3308—Quality Control and Assurance in the Food Industry (3).** Prerequisite: C or better in FDSC 2301. Introduction to principles of quality control, assurance, and statistical process control. Emphasis on industry standards, requirements, root-cause analysis, troubleshooting, histograms, and data interpretation for food safety.
- 3309—Food Safety (3).** Food safety and sanitation in food manufacturing and/or processing. Topics include FDA and USDA regulations, HACCP principles, and good manufacturing practices. (CL) F.
- 4001—Food Science Problems (V1-6).** Taught on an individual basis. May be repeated for credit with permission.
- 4304—Field Studies in Food Processing and Handling (3).** Visits to food processing and handling facilities and discussions of operations. (CL) F.
- 4306—Dairy Products Manufacturing (3).** Physical and chemical characteristics of milk and milk products. Principles involved in processing dairy foods. S.
- 4307—Poultry Processing and Products (3).** Poultry meat and egg processing including functional properties, meat quality and value-added products.
- 4402—Food Analysis (4).** Prerequisites: CHEM 3305/CHEM 3105 or CHEM 2303/CHEM 2103, or permission of the instructor. Fundamentals and application of physical, chemical, and instrumental quantitative techniques to determine the composition and quality of food products. (CL) [FDSC 5402] S.
- 4403—Food Chemistry (4).** Prerequisite: CHEM 3305, CHEM 3105 or CHEM 2303/CHEM 2103 or permission of instructor. Chemical and physiochemical properties of food constituents. A comprehensive study of food components, their modification, and technology applications in food. (CL) [FDSC 5403] F.

Department of Landscape Architecture

Leehu Loon, ASLA, PLA, Chairperson

Professors: Bernard, Loon

Associate Professor: Monsur

Assistant Professor: Phillips

Instructors: Cook, Horsford, Nelson

CONTACT INFORMATION: 101 CASNR Annex Building
Box 42121 | Lubbock, TX 79409-2121 | T 806.742.2858
www.depts.ttu.edu/larc

About the Department

This department offers the following Landscape Architectural Accreditation Board (LAAB)-accredited degree programs:

- Bachelor of Landscape Architecture
- Master of Landscape Architecture

Students in the interdisciplinary Land Use Planning, Management, and Design program leading to the Doctor of Philosophy degree (see Interdisciplinary Graduate Opportunities section) have the opportunity to focus on Landscape Architecture as their area of research.

Graduate Programs

For information on graduate programs offered by the Department of Landscape Architecture, visit the Graduate Programs section of the catalog on page 98.

Undergraduate Programs

The Bachelor of Landscape Architecture (B.L.A.) degree is accredited by the Landscape Architectural Accreditation Board (LAAB). The next accreditation review is scheduled for the fall 2023 semester. The B.L.A. is also approved by the Texas Higher Education Coordinating Board and SACSCOC as a four-year, 120-semester-credit-hour degree.

Computer Requirement. All students are required to provide their own laptop computer meeting the Department of Landscape Architecture specifications (see www.larc.ttu.edu for more information). A laptop computer meeting the spec is critical to efficient and effective fused analog and digital workflows taught throughout the curriculum using state-of-the-art CAD, BIM, GIS, graphics visualization, and modeling tools.

Landscape Architecture, B.L.A.

The landscape architecture program vision is to advance the discipline of landscape architecture through innovative learning, research, and service activities. First professional B.L.A. and M.L.A. degrees are accredited by the Landscape Architectural Accreditation Board. Student learning outcomes are coordinated through the curriculum and in each semester to develop creative leaders ready for professional licensure and practice in the public or private sector.

The program specializes in semi-arid landscapes, while engaging design and planning issues critical to a sustainable, resilient, adaptable earth and its growing urban populations. Students are off campus the spring and summer of the third year on extended internship (January through August), or a combination of study abroad and a three-month internship.

Students should note the curriculum is sequential and LARC courses must be taken in order as outlined in the recommended curriculum. Failure to earn a C or better in LARC courses will delay graduation for a full year and prevent students from moving to the next level of courses. Transfer students will likely require two summer sessions and three full years to achieve all course work required for an accredited degree leading toward licensure.

Landscape Architecture, B.L.A. Recommended Curriculum

FIRST YEAR

Fall

- ❑ LARC 1302 - Introduction to Landscape Architecture (3 SCH)
(fulfills Creative Arts requirement)
- ❑ LARC 1411 - LA Design Studio I (4 SCH)
- ❑ LARC 1321 - LA Modeling and Communication I (3 SCH)
- ❑ ENGL 1301 - Essentials of College Rhetoric (3 SCH)
(partially fulfills Communication Core requirement)
- ❑ Mathematics Core (3 SCH)
(select with advisor to partially fulfill Mathematics Core requirement)

TOTAL: 16

Spring

- ❑ LARC 1412 - LA Design Studio II (4 SCH)
- ❑ LARC 1322 - LA Modeling and Communication II (3 SCH)
- ❑ PSS 1411 - Principles of Horticulture (4 SCH)
(partially fulfills Life & Physical Sciences Core requirement; includes lab)
- ❑ ENGL 1302 - Advanced College Rhetoric (3 SCH)
(partially fulfills Communication Core requirement)
- ❑ Mathematics Core (3 SCH)
(select with advisor to partially fulfill Mathematics Core requirement)

TOTAL: 17

SECOND YEAR

Fall

- ❑ LARC 2302 - History of Landscape Architecture (3 SCH)
(fulfills Language, Philosophy, & Culture Core requirement)
- ❑ LARC 2413 - LA Design Studio III (4 SCH)
- ❑ LARC 2223 - LA Modeling and Communication III (2 SCH)
- ❑ LARC 2331 - LA Materials, Methods and Details I (3 SCH)
- ❑ PSS 3318 - Woody Plants (3 SCH)

TOTAL: 15

Spring

- ❑ LARC 2332 - LA Construction and Administration II (3 SCH)
- ❑ LARC 2414 - LA Design Studio IV (4 SCH)
- ❑ LARC 2224 - LA Modeling and Communication IV (2 SCH)
- ❑ HIST 2300 - History of the United States to 1877 (3 SCH)
(partially fulfills American History core requirement)
- ❑ Life & Physical Sciences Core (4 SCH)
(select with advisor to partially fulfill Life & Physical Sciences Core requirement, including lab)

TOTAL: 16

THIRD YEAR

Fall

- ❑ LARC 3415 - LA Design Studio V (4 SCH)
- ❑ LARC 3225 - LA Modeling and Communication V (2 SCH)
- ❑ LARC 3333 - LA Construction and Administration III (3 SCH)
- ❑ COMS 2300 - Public Speaking (3 SCH)
(partially fulfills Communication Core requirement)
- ❑ HIST 2301 - History of the United States since 1877 (3 SCH)
(partially fulfills American History Core requirement)

TOTAL: 15

Spring

- (Off-campus extended internship [January through August] or combination Study Abroad and three-month internship)
- ❑ LARC 4000 - Internship (V1-6 SCH)
- ❑ Social and Behavioral Sciences (3 SCH)
(select with advisor to fulfill Social and Behavioral Sciences Core requirement)
- ❑ POLS 1301 - American Government (3 SCH)
(partially fulfills Government/Political Science Core requirement)
- ❑ Free Elective (3 SCH)

TOTAL: 12

FOURTH YEAR

Fall

- ❑ LARC 4162 - Seminar (1 SCH)
- ❑ LARC 4226 - LA Modeling and Communication VI (2 SCH)
- ❑ LARC 4351 - Environmental Planning for Sustainable Development (3 SCH)
- ❑ LARC 4361 - Project Research Methods and Development (3 SCH)
- ❑ LARC 4416 - LA Design Studio VI (4 SCH)
- ❑ Directed Elective (3 SCH)

TOTAL: 16

Spring

- ❑ LARC 4417 - LA Design Studio VII (4 SCH)
- ❑ LARC 4371 - Professional Practice (3 SCH)
- ❑ POLS 2306 - Texas Politics and Topics (3 SCH)
(partially fulfills Government/Political Science Core requirement)
- ❑ Free Elective (3 SCH)

TOTAL: 13

TOTAL HOURS: 120

Core courses selected with advisor are from core curriculum list.
Extended internship or combination Study Abroad and three-month internship must be approved by the department no later than mid-fall semester of the third year.
No LARC or required prerequisite may be taken pass/fail. All LARC courses must be passed with a C or better.
Directed electives are subject to approval of the academic advisor and department chairperson.

Department offices and classroom facilities are located in the CASNR Annex Building and Agriculture Pavilion.

Communication Literacy Requirement. Communication Literacy courses for the Landscape Architecture major are LARC 4416, 4226, 4361, and 4417.

Landscape Studies, Undergraduate Minor

The Landscape Studies minor provides students outside landscape architecture a foundation in theories and practices that guide the design, construction, and interpretation of landscape and built environments.

Required courses (9 hours): LARC 1302, 2302, 4351.

Directed Electives: A minor in landscape studies also consists of nine (9) hours of directed electives, three (3) of which must be upper level: LARC 1321, 1322, 1411, 1412, 2331, 4162, 4371.

Accelerated Bachelor's to Master's Degree

Landscape Architecture, B.L.A. / Landscape Architecture, M.L.A.

The Master of Landscape Architecture Accelerated Program provides opportunity for currently enrolled undergraduate students to complete an M.L.A. one year after completion of B.L.A.

Accelerated Landscape Architecture, B.L.A. + M.L.A. Recommended Curriculum

B.L.A. FOURTH YEAR

Fall

- ☐ LARC 5302 - Adv. Environmental Planning for Sustainable Dvlpmnt. (3 SCH)†

TOTAL: 3

Spring

- ☐ LARC 6302 - Administrative Aspects of Landscape Architecture (Directed Elective) (3 SCH)†

TOTAL: 3

FIFTH YEAR

Fall

- ☐ LARC 6414 - Adv. Landscape Tech.: Monitor. + Managing Change (4 SCH)* **OR**
- ☐ LARC 6415 - Resilient Design in Landscape Architecture (4 SCH)* **OR**
- ☐ LARC 6416 - Landscape for Learning (4 SCH)*
- ☐ LARC 6203 - Thesis Research, Preparation, and Organization (2 SCH)
- ☐ LARC 6363 - Research Methodology for Planning and Design (3 SCH)
- ☐ LARC 6161 - Landscape Architecture Seminar (1 SCH)
- ☐ Directed Elective (3 SCH)

TOTAL: 13

Spring

- ☐ LARC 6414 - Adv. Landscape Tech.: Monitor. + Managing Change (4 SCH)* **OR**
- ☐ LARC 6415 - Resilient Design in Landscape Architecture (4 SCH)* **OR**
- ☐ LARC 6416 - Landscape for Learning (4 SCH)*
- ☐ LARC 6414 - Adv. Landscape Tech.: Monitor. + Managing Change (4 SCH)* **OR**
- ☐ LARC 6415 - Resilient Design in Landscape Architecture (4 SCH)* **OR**
- ☐ LARC 6416 - Landscape for Learning (4 SCH)* **OR**
- ☐ LARC 5000 - Landscape Architecture Graduate Internship (V1-6 SCH)* **OR**
- ☐ LARC 5001 - Special Problems in Landscape Architecture (V1-4 SCH)* **OR**
- ☐ LARC 7000 - Research (V1-12 SCH)*
- ☐ LARC 6000 - Master's Thesis (V1-6 SCH) (6 SCH required)
- ☐ Directed Elective (3 SCH)

TOTAL: 17

TOTAL HOURS: 36

A maximum of 6 credit hours can dual count for B.L.A. and M.L.A. degrees. A total of 150 hours must be obtained (120 B.L.A. + 30 M.L.A. not counting credit used to fulfill undergraduate requirements).

* Option for specialization studio involving research and professional collaboration.

† Tandem course also offered at the undergraduate level. These courses often are leveling courses for graduate students entering the first professional Master of Landscape Architecture program without a design or planning background.

Undergraduate Course Descriptions

Landscape Architecture (LARC)

- 1302—Introduction to Landscape Architecture (3).** An introduction to the multidisciplinary field of landscape architecture exploring its historical evolution, highlighting its interaction with arts and science, and examining its contemporary leaders. Fulfills core Creative Arts requirement.
- 1321—LA Modeling and Communication I (3).** Corequisite: LARC 1411. Introduction to digital and analog theory, application and dynamic, integrated workflows related to spatial and designed space models and narrative communication.
- 1322—LA Modeling and Communication II (3).** Prerequisite: LARC 1321 and LARC 1411. Corequisite: LARC 1412. Digital and analog theory, application, and dynamic-integrated workflows in programmatic site design, landscape inventory and analysis involving landform, vegetation-planting, hardscape and landscape performance.
- 1411—LA Design Studio I (4).** Corequisite: LARC 1321. Digital and analog theory, application, and dynamic-integrated workflows in programmatic site design, landscape inventory and analysis involving landform, vegetation-planting, hardscape and landscape performance.
- 1412—LA Design Studio II (4).** Prerequisites: LARC 1321 and LARC 1411. Corequisite: LARC 1322. Landscape understanding, design process, theory, dynamic analog-digital workflows in programmatic site design informed by inventory and analysis, and involving landform, vegetation, hardscape and landscape performance.
- 2223—LA Modeling and Communication III (2).** Prerequisites: LARC 1412 and LARC 1322. Corequisites: LARC 2413 and LARC 2331. Digital and analog theory, application, and dynamic-integrated workflows to communicate programmatic design involving landscape systems (natural and social) analysis, synthesis and performance.
- 2224—LA Modeling and Communication IV (2).** Prerequisites: LARC 2413 and LARC 2223. Corequisite: LARC 2414. Digital and analog theory, application, and dynamic-integrated workflows to communicate urban planning-design involving landscape systems (natural and social) analysis, synthesis and performance.
- 2302—History of Landscape Architecture (3).** History of landscape architecture. Design as expression of culture and society's relationship to nature. Geographical, historical, and cultural context of major movements in landscape architecture. Fulfills core Language, Philosophy, and Culture requirement. F.
- 2331—LA Materials, Methods and Details I (3).** Prerequisites: LARC 1412 and LARC 1322. Corequisites: LARC 2413 and LARC 2223. Landscape architecture: project management, construction methods (subdivision, horizontal-vertical alignment, stormwater, erosion, earthwork), materials (hardscape, structural, plant, soil), systems (circulation, utility), details in construction documentation, administration.
- 2332—LA Construction and Administration II (3).** Prerequisite: LARC 2331. Landscape architecture: project management, construction methods (layout, grading, planting, irrigation), materials (hardscape, structural, plant, soil), systems (hydrologic, irrigation, lighting, structural), details in construction documentation, administration.
- 2413—LA Design Studio III (4).** Prerequisites: LARC 1412 and LARC 1322. Corequisites: LARC 2223 and LARC 2331. Landscape systems suitability, vulnerability and performance theory applied in schematic design, design development concepts including materials, methods (circulation, grading, planting, drainage, water-balance) and details.
- 2414—LA Design Studio IV (4).** Prerequisites: LARC 2413, LARC 2223, LARC 2331. Corequisite: LARC 2224. Urban and community planning and design theory, landscape systems synthesis applied in urban district planning and community schematic design, design development and construction documentation.
- 3225—LA Modeling and Communication V (2).** Prerequisites: LARC 2224 and LARC 2414. Corequisites: LARC 3415 and LARC 3333. Digital and analog theory, application, and dynamic-integrated workflows to communicate regional planning-design involving landscape systems (natural and social) analysis, synthesis and performance.
- 3333—LA Construction and Administration III (3).** Prerequisites: LARC 2414 and LARC 2332. Corequisites: LARC 3415 and LARC 3225. Landscape architecture: project management, construction methods (subdivision, horizontal-vertical alignment, stormwater, erosion, earthwork), materials (hardscape, structural, plant, soil), systems (circulation, utility), details in construction documentation, administration.
- 3415—LA Design Studio V (4).** Prerequisites: LARC 2414, LARC 2224, and LARC 2332. Corequisites: LARC 3225 and LARC 3333. Regional planning and design theory and systems synthesis applied in regional planning and design recognizing scalar relationships to urban and community planning and design.

- 4000—Internship (VI-6).** Prerequisites: LARC 2414, LARC 2332. Provides students valuable office specialization opportunities under the supervision of a registered landscape architect or related licensed practitioner (architect, engineer, planner). A minimum of six months full-time employment or employment+study abroad are required to satisfy the minimum 3 credit hour requirement.
- 4001—Landscape Architecture Problems (VI-4).** An investigation of a problem in the profession of special interest to the student. Open to all advanced students.
- 4162—Seminar (1).** Prerequisite: Senior standing. Corequisite: LARC 4416. Assigned readings, informal discussions, oral reports, and papers.
- 4226—LA Modeling and Communication VI (2).** Prerequisites: LARC 3415 and LARC 3225. Corequisites: LARC 4416 and LARC 4361. Digital and analog theory, application, and dynamic-integrated workflows to communicate synthetic planning-design process involving landscape systems (natural and social) analysis, synthesis and performance. (CL)
- 4321—Virtual Landscapes (3).** Prerequisite: Instructor consent. A technology-based virtual exploration of functional and aesthetic design decision making in manipulating natural and built environments utilizing real-time rendering software.
- 4351—Environmental Planning for Sustainable Development (3).** An introduction to environmental planning issues with emphasis on the integration of related disciplines to attain environmentally and socially sustainable development. F.
- 4352—Landscape Performance Process and Evaluation (3).** Multidisciplinary approach to the collection, documentation, and assessment of landscape performance and evaluation measures of a site as outlined by LAF and GBCI.
- 4361—Project Research Methods and Development (3).** Prerequisite: LARC 3415. Corequisites: LARC 4416 and LARC 4226. Project research methods, development and management strategies integrated into student developed landscape architecture project proposal background, methods, data collection, inventory and analysis continued in LARC 4417. (CL)
- 4371—Professional Practice (3).** Methods, procedures, and ethics of professional practice of landscape architecture. F.
- 4416—LA Design Studio VI (4).** Prerequisites: LARC 4000, LARC 3415, LARC 3225. Corequisites: LARC 4226, LARC 4361, and LARC 4162. Topical, collaborative specialization design studio engaged in professional and/or academic research. (CL)
- 4417—LA Design Studio VII (4).** Prerequisites: LARC 4000, LARC 4416, LARC 3333, LARC 4226, and LARC 4361. Student led and managed specialization project applying: cumulative research, theory, and methods related to the delineated planning, schematic design, design development, and/or construction documentation. (CL)

Department of Natural Resources Management

Richard D. Stevens, Ph.D., Chairperson

Bricker Endowed Chair in Wildlife Management: Conway

Burnett Foundation Professorship in Quail Ecology: Dabbert

Caesar Kleberg Endowed Professor of Wildlife Conservation: Stevens

Professors: Boal, Conway, Cox, Dabbert, Griffis-Kyle, Patino, Perry, Stevens

Associate Professors: Barnes, Collins, Gill, Grisham, Portillo-Quintero, Villalobos

Assistant Professors: Cooper-Norris, Norris

Adjunct Faculty: Arsuffi, Baccus, Bibbes, Cain, Collins, Conway, Fish, Fritts, Fulbright, Harveson, Haukos, Hewitt, Parmenter, Pease, Skipper, Terhune

Emeritus Faculty: Fish, Gibson, Patino, Sosebee, Wallace

CONTACT INFORMATION: 263 Plant and Soil Science Building

Box 42125 | Lubbock, TX 79409-2125 | T 806.742.2841 | nrm@ttu.edu

About the Department

This department supervises the following degree programs:

- Bachelor of Science in Conservation Law Enforcement
- Bachelor of Science in Natural Resources Management
 - Concentrations in Wildlife Biology; Fisheries Biology; Ranch Management; Range Conservation; Conservation Science
- Master of Science in Ranch Management
- Master of Science in Wildlife, Aquatic, and Wildlands Science and Management
- Professional Science Master's in Environmental Sustainability and Natural Resources Management
- Doctor of Philosophy in Wildlife, Aquatic, and Wildlands Science and Management

Graduate Programs

For information on graduate programs offered by the Department of Natural Resources Management, visit the Graduate Programs section of the catalog on page 99.

Undergraduate Programs

The Department of Natural Resources Management is primarily concerned with the application of basic ecological principles to the management and use of natural resources. The curriculum for natural resources management students is focused on relevant and tangible skills and experiential learning opportunities to prepare students for graduate school or for professional careers working for public and private natural resources management agencies. The degree plans are geared toward meeting certification requirements for positions as range conservationists or wildlife biologists for agencies such as Texas Parks and Wildlife Department, U.S. Fish and Wildlife Service, Natural Resource Conservation Service, the U.S. Forest Service, National Park Service, Bureau of Land Management, as well as for non-governmental organizations.

Students are encouraged to become actively involved in the student organizations supported by the Department of Natural Resources Management: The Wildlife Society at Texas Tech, Student Association for Fire Ecology, Student Chapter of the American Fisheries Society, and the Student Chapter of the Society for Range Management. These student organizations promote involvement in professional societies such as The Wildlife Society, The Ecological Society of America, the American Fisheries Society, the Society for Range Management, as well as engagement and experiences with professionals. Activities include regularly scheduled meetings with guest speakers and social events.

Conservation Law Enforcement, B.S.

Students seeking the 120-hour B.S. in Conservation Law Enforcement must first obtain an Associate of Arts in Criminal Justice from an approved institution. Designed to prepare students for careers as game wardens or similar positions, this degree requires 60 hours of coursework at Texas Tech University in addition to the initial 60 hours transferred from an approved collaborating institution.

Communication Literacy Requirement. Communication literacy in Conservation Law Enforcement is evidenced by competence in written, oral, and quantitative analysis and synthesis skills. To accommodate our majors while emphasizing the communication skills that they will need to graduate, we focus on developing students' abilities to integrate and articulate ideas and information specific to three areas: Written Communication, Oral Communication, and Quantitative Analysis and Synthesis. Upon graduating, students will be able to comprehensively articulate and synthesize, using various communication strategies, key components of each of these areas. Students can anticipate working with a variety of law enforcement officers, government agencies, and the public. Students will select one course from each of the following areas:

Written Communication Area: NRM 3325, 3302, 4311.

Oral Communication Area: NRM 3323, 4301, 4306, 4335, 4401.

Quantitative Analysis and Synthesis Area: NRM 3304, 3308, 4408.

Natural Resources Management, B.S.

Students pursuing a B.S. in Natural Resources Management must make a C or better in departmental courses to be eligible for graduation. The degree has five concentrations: (1) conservation science, (2) fisheries biology, (3) ranch management, (4) range conservation, and (5) wildlife biology.

Communication Literacy Requirement. CL courses for the Natural Resources Management major include NRM 3302, 3304, 3308, 3323, 3325, 4306, 4335, 4401, or 4408.

Conservation Science Concentration. The Conservation Science concentration is designed to provide a broader array of course options, where the focus is understanding the science and policy elements of the interdependent relationships between humans and the environment. Graduates from this concentration frequently work for non-governmental organizations such as The Nature Conservancy, federal and state agencies, and often focus their work on threatened and endangered species and ecosystems, as well as invasive species, and ecosystem restoration.

Fisheries Biology Concentration. The Fisheries Biology concentration is designed to prepare students for careers focused on ecological and environmental factors that influence fishes and other aquatic organisms, with an emphasis on in-field training and experiences. Aquatic ecosystems face increasing threats from pollution, drought, invasive species, and water shortages. Students in this concentration learn the science and application of balancing increasing water demands with maintaining aquatic ecosystem services. Graduates from this concentration often work in state and federal agencies and non-governmental organizations, working on a range of applied and basic aquatic conservation topics.

Ranch Management Concentration. The Ranch Management concentration is designed to prepare students for applied careers focused on ranching, livestock management and production, wildlife management, forage production, range management, habitat and ecological restoration, and the economic approaches to successful ranch management. Applied training in multiple disciplines is crucial for successful ranch management, and this concentration provides broad training in relevant topics for our students. Graduates from this concentration often work on private ranches, consulting firms, real estate agencies, outdoor recreation, as well as in state and federal agencies and non-governmental organizations.

Range Conservation Concentration. The Range Conservation concentration is designed to train students on the science and management of sustainable use of grasslands, shrublands, and forest lands that provide the necessities of life for grazing and browsing animals. This concentration focuses on field-based experiences and providing the basis for understanding how range managers can maintain healthy range ecosystems for their continued use for domestic and wildlife animal production and recreational opportunities. Graduates from this concentration often work for the Natural Resource Conservation Service, the U.S. Forest Service,

Conservation Law Enforcement, B.S. Recommended Curriculum

THIRD YEAR

Fall

- ☐ NRM 1300 - Environmental Science as a Social Pursuit (3 SCH)
- ☐ NRM 2305 - Introduction to Freshwater Ecology and Fisheries (3 SCH)
- ☐ NRM 3403 - Range, Forest, and Wetland Vegetation and Plant Identification in North America (4 SCH)
- ☐ NRM 4311 - Wildlife Law (3 SCH)

TOTAL: 13

Spring

- ☐ NRM 1401 - Introduction to Natural Resources Management (4 SCH)
- ☐ NRM 3325 - Integrated Natural Resources Management Skills (3 SCH)
- ☐ Zoology Elective (4 SCH)†
- ☐ NRM 4301 - Problems (3 SCH)

(Professionalism and Leadership in Conservation Law Enforcement)

TOTAL: 14

FOURTH YEAR

Fall

- ☐ NRM 3304 - Principles of Range Management (3 SCH)
- ☐ NRM 3306 - Principles of Wildlife Management (3 SCH)
- ☐ NRM Elective (3 SCH)*
- ☐ Zoology Elective (4 SCH)†
- ☐ NRM 4320 - Natural Resource Policy (3 SCH)

TOTAL: 16

Spring

- ☐ NRM Electives (7 SCH)*
- ☐ NRM 3407 - Wildlife Management Techniques (4 SCH)
- ☐ NRM GIS Elective (3 SCH)‡
- ☐ NRM 4000 - Internship (V1-12 SCH) (3 hours required) OR
- ☐ NRM 4001 - Undergraduate Research (V1-12 SCH)

TOTAL: 17

TOTAL HOURS: 120

Note: Years 3 and 4 represent additional 60 credits to be taken at Texas Tech. When combined with 60 hours transferred from an approved institution, the total required number of hours is 120. Students must be advised by the program coordinator before starting the program at Texas Tech.

* **NRM Elective.** Select one course from: NRM 2406, 3300, 3301, 3307, 3309, 3323, 4302, 4305, 4306, 4309, 4310, 4322, 4401, 4403

† **ZOOL Elective.** Select two courses from: BIOL 4418; ZOOL 4406, 4410, 4421

‡ **GIS Elective.** Select one course from: NRM 3300, 4403, 4315; GIST 3300, 4302, 4304, 4310, 4312

and Bureau of Land Management because the curriculum meets the Civil Service requirements for their range conservation positions. The range conservation concentration meets the accreditation standards of the Society for Range Management.

Wildlife Biology Concentration. The Wildlife Biology concentration is designed to train students in the biology, ecology, and management of wildlife populations, with an emphasis on habitat management and population management. This concentration provides students with opportunities for in-field experiences and focuses on applied techniques for managing wildlife. Graduates from this concentration often work as wildlife biologists for state and federal agencies, private ranches, and other non-governmental organizations. The wildlife biology concentration is designed to provide the opportunity to pursue certification from The Wildlife Society.

Natural Resources Management, Undergraduate Minor

The department of Natural Resources Management offers a minor in natural resources management for students majoring outside the department. A minimum of 18 hours is required for this minor. The maximum number of transfer hours is 9. Courses in a major, but outside a student's department, may be used in the minor. A student must earn a grade of C or better in each course counted toward this minor.

Natural Resources Management, B.S. (Conservation Science Concentration) Recommended Curriculum

FIRST YEAR

Fall

- ☐ ENGL 1301 - Essentials of College Rhetoric (3 SCH)
- ☐ MATH 1330 - Introductory Mathematical Analysis I (3 SCH)
- ☐ BIOL 1402 - Biology of Animals (4 SCH)
- ☐ NRM 1300 - Environmental Science as a Social Pursuit (3 SCH) **OR**
 - ☐ NRM 2305 - Introduction to Freshwater Ecology and Fisheries (3 SCH)
 - ☐ POLS 1301 - American Government (3 SCH)

TOTAL: 16

Spring

- ☐ ENGL 1302 - Advanced College Rhetoric (3 SCH)
- ☐ MATH 1331 - Introductory Mathematical Analysis II (3 SCH)
- ☐ NRM 1401 - Introduction to Natural Resources Management (4 SCH)

Directed Zoology Elective. Select one course from: BIOL 4418; ZOOL 4406, 4410, 4421

Undergraduate Course Descriptions

Natural Resources Management (NRM)

1300—Environmental Science as a Social Pursuit (3). Application of scientific methods to global and environmental issues. Explores the impact of culture and science on core natural resources such as food and clean air. Fulfills core Social and Behavioral Sciences requirement. F, S, SS.

1401—Introduction to Natural Resources Management (4). Observe, describe, and understand phenomena in the natural world. Examines the roles of natural and social science in understanding interactions among humans and natural resources. Partially fulfills core Life and Physical Sciences requirement. F, S, SS.

2305—Introduction to Freshwater Ecology and Fisheries (3). Survey and management of freshwater habitats: types of organisms, adaptations, and ecological interactions; and effects of solar radiation, temperature, currents, dissolved gases, chemicals, and pollution. F, S, SS.

2307—Diversity of Life (3). Principles of genetics, genetic change in populations, and biodiversity as related to conservation and management of natural resources at scales ranging from genes to the biosphere. S, SS.

2400—The Art and Science of Geographic Information (4). Provides a broad introduction to foundational concepts of geographic information science and elements of cartographic design for natural resource managers.

2406—Wildlife Anatomy and Physiology (4). A systematic study of the body systems of wild animals emphasizing functional anatomy and physiology and their ecological implications. F.

3202—Range, Forest, and Wetland Vegetation in North America (2). A survey of the ecology and distribution of native and naturalized vegetation in North America; distribution, ecology, plant communities and economic values are stressed.

3203—Range, Forest, and Wetland Plant Identification (2). Identification of native and naturalized range, forest, and wetland plants.

3300—Geographic Information Systems for Natural Resources Management (3). Provides students an introductory knowledge of the principles of geographic information systems and its applications for natural resources mapping and monitoring.

3301—Vegetation Inventory and Analysis (3). Prerequisites: NRM 3202 and NRM 3203. Techniques and methods for sampling and analyzing rangeland vegetation.

3302—Range Plant Ecology (3). The basic principles of autecology and synecology and their relationship to management of rangeland ecosystems. (CL) F.

3303—Range Management Principles and Practices (3). Prerequisite: Sophomore standing. A general course in the principles and practices of range management designed for nonrange majors who plan to enter the ranching industry. Field trips required. Not open to range or wildlife majors. F, SS.

3304—Principles of Range Management (3). Prerequisite: C or better in NRM 3202. Application of ecological principles in the management of rangelands for sustained livestock products consistent with conservation of the range resource. Field trips required. (CL) S.

3306—Principles of Wildlife Management (3). Prerequisites: NRM 1300 or NRM 1401 or NRM 2305. Expands upon introductory concepts of wildlife management by focusing on the techniques, approaches, and principles of wildlife management and wildlife population dynamics.

3307—Principles of Conservation Science (3). A survey of the theory and practices of conservation biology. Emphasis is placed on methods used to maintain plant and animal biodiversity. F.

3308—Quantitative Methods in Natural Resources (3). Prerequisite: MATH 1330. Survey of quantitative and statistical methods used in natural resource management, conservation biology, and in assessing biodiversity. (CL) F, odd years.

3309—Restoration Ecology (3). Case studies, literature, and hands-on experience illustrate the theory and practice of ecological restoration, including plants and animals. S, even years.

3311—Field Ecology (3). Provides a foundation in population and community ecology in a field setting and familiarizes students with all stages of the scientific process. [BIOL 3301]

3314—Wildlife and Livestock Nutrition (3). Study of the nutritional relationship between the range resource and grazing/browsing herbivores.

3323—Prescribed Burning (3). Prerequisite: Sophomore standing or above. Planning, implementing and evaluating prescribed fires. (CL) S.

3325—Integrated Natural Resources Management Skills (3). Prerequisite: C or better in NRM 1300 or NRM 1401 or NRM 2305. Develops skills in the generation and dissemination of scientific information to scientists, policy makers, and society. (CL) F, S, SS.

3333—Pond Fish Management (3). Management of ponds for recreational fishing. Includes principles of pond construction, fish stocking, water

quality and habitat management, and assessment of common problems. Field trips required.

- 3401—Plant Physiology (4).** Prerequisite: C or better in BIOL 1401 and BIOL 1402; one semester of organic chemistry. Covers aspects of physiological processes, morphological development, and nutritional qualities in vascular plants. [BIOL 3401]
- 3403—Range, Forest, and Wetland Vegetation and Plant Identification in North America (4).** A survey of the ecology and distribution of native and naturalized forage plants of the US; distribution, ecology, plant communities, and economic values are stressed.
- 3407—Wildlife Management Techniques (4).** Prerequisite: Sophomore standing; C or better in NRM 1300 or NRM 1401 or NRM 2305. Techniques for sampling and analyzing rangeland wildlife habitats and populations. F.
- 4000—Internship (V1-12).** Prerequisite: Instructor consent.
- 4001—Undergraduate Research (V1-12).** Prerequisite: Instructor consent. Selected research problems according to the needs of the student. May be repeated.
- 4100—Seminar (1).** An organized discussion of current problems and research in range, wildlife, and fisheries management. May be repeated.
- 4301—Problems (3).** Prerequisite: Instructor consent. Individual investigation of an assigned problem in range, wildlife, and fisheries management. Emphasis placed on the theory, methods, and practice of range, wildlife, or fisheries field work. (CL)
- 4302—Range Improvements (3).** Application of principles and practices necessary to enhance the productive potential of the range resource for all potential uses. Methods for brush management, revegetation, conservation, etc. are considered. Improvement for increased domestic livestock production and for enhancing wildlife habitat is emphasized. [NRM 6326] S, odd years.
- 4303—Rangeland and Wildlife Analysis and Management Planning (3).** Prerequisites: NRM 3403 and NRM 3407. Analysis of rangeland and wildlife resource inventories for planning appropriate future use. Management plans, landowner interactions, and application in decision making are emphasized. Field trips required. S.
- 4304—Fire Ecology and Management (3).** Ecological effects, adaptations, management implications of fire (and its exclusion) on flora and fauna of North America ecosystems. F.
- 4305—Big Game Ecology (3).** Survey of distributions and life histories of North American big game species. Productivity, food habits, economic significance, and management will be examined. Field trips required. S.
- 4306—Upland Game Ecology (3).** Prerequisites: C or better in NRM 1401 or instructor consent. Ecological approach to the management of upland game populations. Stresses population mechanisms and habitat management of selected species. Field trips required. (CL) S, odd years, SS.
- 4307—Forest and Rangeland Insect Diversity (3).** Insect identification, collection, and preservation techniques; students will learn habitats, ecology and taxonomy of common Texas rangeland and forest insects.
- 4308—Avian Ecology and Management (3).** Students will examine principles of bird population ecology, adaptation, and conservation of bird populations.
- 4309—Range-Wildlife Habitat Management (3).** Prerequisite: C or better in NRM 3402; or NRM 3202 and NRM 3203; or NRM 3403. A study of wildlife habitats based on major vegetation types and the management problems involved. Emphasis on how other resource demands can be integrated with wildlife. Field trips required. F.
- 4310—Principles of Waterfowl Management (3).** Prerequisite: C or better in NRM 1300 or NRM 2305. Ecology and management of continental waterfowl resources. Life histories, population management, and habitat manipulation are stressed. Field trips required. F, even years.
- 4311—Wildlife Law (3).** Prerequisite: C or better in NRM 1300 or NRM 1401 or NRM 2305. Imparts understanding of the laws regulating the recreational and commercial uses of wildlife. Includes their history and purposes. Available only during Intercession. (CL) F.
- 4314—Watershed Planning (3).** The watershed as a unit of resource-oriented planning and development. Principles and objectives of watershed management. Physical description of watershed. Relationship between land-use conditions and the water delivery character of watersheds. Watershed analysis, including techniques, collection of field data, and sources of information. F, S.
- 4315—Spatial Analysis in Natural Resource Management (3).** Prerequisites: NRM 3300 or NRM 2400 or GIST 3300. Introduces students to scientific applications in natural resources monitoring and management with the use of advanced geographic information systems and remote sensing techniques. S.
- 4320—Natural Resource Policy (3).** Prerequisite: C or better in NRM 1300 or NRM 2305. Emphasis on the human dimension of natural resource management. Historical, agency, and private organization roles in policy and conflict resolution. F.
- 4322—Nongame Ecology (3).** Prerequisite: NRM 2307. Ecological approach to nongame wildlife population management. Public policies, socioeconomic factors, population dynamics, and species-at-risk issues are examined.
- 4324—Tropical Ecology and Conservation (3).** An introductory survey of tropical ecology and conservation covering both theory and practice. Previous ecology course, instructor consent, and field trips are required. SS.
- 4330—Aquaculture (3).** Prerequisite: BIOL 1404 and CHEM 1308 or instructor consent. A global overview of aquaculture including fish, aquatic invertebrates, plants, and design and operation of production facilities.
- 4335—Freshwater Bioassessment (3).** Prerequisite: C or better in NRM 2305. No freshmen. An overview of the methods used to evaluate the condition of waterbodies, including surveys and other direct measurements of aquatic species attributes and habitats. (CL) S.
- 4340—Urban Ecology and Human Dimensions (3).** Prerequisite: C or better in NRM 1300 or NRM 2305 and NRM 1401, or instructor consent. An introduction to urban ecology, human dimensions of natural resources, and urban wildlife management. Case studies, policies, socioeconomic factors, and ecosystem function are examined.
- 4401—Fisheries Conservation and Management (4).** Prerequisites: ZOOL 4410, C or better in NRM 2305 and either AAEC 2301, MATH 2300, or C or better in NRM 3308 or instructor consent. Theory and practice regarding conservation and management of aquatic resources, including ecology, population biology, sampling, restoration, and resource conflict. (CL) F, even years.
- 4403—Fundamentals of Remote Sensing for Natural Resources Management (4).** Fundamentals of aerial photograph reading, interpretation, and evaluation. Introduction to remote sensing techniques and geographic information systems. F, S.
- 4405—Drone Piloting (4).** Students in this course will pilot uncrewed aerial systems, review principles of remote sensing, and prepare to pass the Federal Aviation Administration Part 107 exam. [NRM 5405]
- 4408—Wildlife Population Dynamics and Analysis (4).** Prerequisites: C or better in NRM 1401, NRM 3407, and NRM 3308. The mechanisms of wildlife population changes and their management. Detailed examination of techniques for measuring population characteristics. (CL) S.

Department of Plant and Soil Science

Glen Ritchie, Ph.D., Chairperson

Horn Distinguished Professor: Hequet

Bayer CropScience Chair: de los Reyes

Rockwell Endowed Chair of Weed Science: Dotray

Leidigh Professor: Abidi

President's Distinguished Professor: Herrera-Estrella

Professors: M. Burow, Hirmas, Jagadish, Montague, Ritchie, Sharma, Tran, Xu

Associate Professors: Deb, Guo, B. Kelly, Laza, Longing,

Lopez-Arredondo, Patil, Shim, Siebecker, Simpson, Singh, Slaughter, Young

Assistant Professors: Berdeja, Janga, Jiao, Lewis, Liu, Rajan, Shamshina

Research Assistant Professors: Baliga, Ha, Nicolas, Ir. Pabuayon,

Is. Pabuayon, Saini, Samira, Somayanda, Turner

Instructors: Plowman, Qualia, Thomas, Williams

Adjunct Faculty: Acosta-Martinez, G. Burow, Casby-Horton, Dever, Hellman, Herrero-Isern, Keeling, C. Kelly, Lascano, Mauget, Parajulee, Payton, Porter, Trostle, Ulloa, Wallace, Wanjura, Wu, Wheeler, Xin

About the Department

This department administers the following degree programs and certificates:

- Bachelor of Science in Plant and Soil Science
- Bachelor of Science in Plant and Soil Science (Distance Program):
 - Horticulture Concentration
- Bachelor of Science in Plant and Soil Science: (Hybrid/Off-Campus Program):
 - Local Food and Wine Production
 - Viticulture and Enology
- Master of Science in Horticulture Science
- Master of Science in Plant and Soil Science
- Doctor of Philosophy in Plant and Soil Science
- Graduate Certificate in Crop Protection
- Graduate Certificate in Fibers and Biopolymers
- Graduate Certificate in Horticultural Landscape Management
- Graduate Certificate in Soil Management
- Undergraduate Certificate in Agricultural Water Management

A total of 120 hours is required for a B.S. degree. Students seeking a master's or doctoral degree within the department should consult the chairperson about their programs before enrolling for any courses.

The department is the academic home to the Fiber and Biopolymer Research Institute (FBRI), which is internationally known for its expertise in cotton. The FBRI focuses on research, education, and technology transfer pertinent to fibers, textiles, and biological-based polymers. While it is an integral part of the Department of Plant and Soil Science in Davis College, the FBRI also collaborates with departments in the Colleges of Engineering, Arts & Sciences, and Human Sciences, offering opportunities to students for special projects and thesis research.

Graduate Programs

For information on graduate programs offered by the Department of Plant and Soil Science, visit the Graduate Programs section of the catalog on page 101.

Undergraduate Programs

Plant and Soil Science, B.S.

The department offers a Bachelor of Science in Plant and Soil Science degree designed to build on a foundation of basic biological and physical

science principles. This foundation provides students with a broad base of knowledge as well as hands-on experience in many aspects of the plant and soil sciences industry. Students learn the latest methods to produce agronomic, forage, horticultural, and turfgrass crops while conserving natural soil and water resources. In addition, students learn current management techniques to control or prevent plant diseases, insects, and weed species as well as efficient soil nutrient and water management.

A bachelor's degree in plant and soil science prepares students to manage properly a wide variety of plant and soil issues, such as fertilization and pesticide application, mitigation of urban heat load through appropriate use of landscape plants, improved crop production through plant breeding and biotechnology, and appropriate management practices for vineyards and wineries.

Students may focus on one of six areas of concentration: crop science, environmental soil and water science, horticulture and turfgrass science, viticulture and enology, horticulture at a distance, or local food and wine production. This degree prepares students to meet the challenges of sustainable production of plants for food, fiber, fuel, and aesthetic beauty while preserving natural resources and environmental integrity.

The Department of Plant and Soil Science offers on-campus, distance, and hybrid/off-campus programs requiring 120 semester credit hours. For the distance program, students will need to complete a portion of their general coursework at another institution and complete the last 30 semester credit hours through Texas Tech University. For the hybrid/off-campus program, students may need to complete a portion of their general coursework at another institution and complete the last 30 semester credit hours at Texas Tech University's Lubbock Campus, Fredericksburg Campus, or online. Students must earn a grade of C or greater in all courses required for graduation. All electives are subject to departmental approval.

Communication Literacy Requirement. CL courses for the Plant and Soil Science major are PSS 1100, 3323, 4100, and 4421.

Plant and Soil Science, Undergraduate Minor

The department offers a minor in plant and soil science for students majoring outside the department. For information on requirements for completing the minor, refer to "Selecting a Minor" in the introductory information about the college or contact the department's lead academic advisor.

Agricultural Water Management, Undergraduate Certificate

The Agricultural Water Management undergraduate certificate provides a suite of courses focused on efficient and profitable management of all key areas of water for agricultural purposes, with emphasis on irrigation technologies. The certificate program will enhance students' skills in agricultural production and support industries. Courses may be taken in any order.

- Required Courses (9 hours): PSS 4325, 4340; AGSC 4000
- Electives (6 hours from the following): AAEC 4313; AGED 3302; NRM 4314; PSS 4001, 4316, 4336

Undergraduate Course Descriptions

Plant and Soil Science (PSS)

- 1100—Freshman and Transfer Student Seminar (1).** Exposure to scientific disciplines, time management strategies, various learning styles, support services, employment opportunities, and social organizations within the Department of Plant and Soil Science. (CL)
- 1311—The Science of Wine (3).** Introduction to the history of winemaking and application of biology, chemistry, and technology to modern grape and wine production.
- 1321—Agronomic Plant Science (3).** [AGRI1307, 1407] Importance, distribution, and use of major world agronomic crops. Fundamentals of growth, structure, and improvements are also stressed. F.
- 1411—Principles of Horticulture (4).** [AGRI1415; HORT1401] Principles and practices of growth and development, structure, nomenclature, use of horticultural plants and how they are affected by the environment. Partially fulfills core Life and Physical Sciences requirement.
- 2114—Wine Production Lab (1).** Corequisite: PSS 2314. Acquaints students with the basic concepts of winemaking and fermentation. Applies theories of winemaking taught in Wine Production course. Fermentation

* Major course requirement

[†] Students must fulfill the university's Language, Philosophy, and Culture/Creative Arts requirements.[‡] See www.pssc.ttu.edu/ProgramPages/CourseRot.php for rotation of courses.**Concentration Course Requirements.** All PSS courses must be completed with a minimum grade of C; all students will be advised prior to registration.)**Crop Science** — Required concentration courses (25 hours): PSS 3321, 3322, 3324, 4321, 4325, 4335, 4331 or 4337; CHEM 2303 or 3305, 2103 or 3105**Elective concentration courses (16-17 hours):** PSS 3309, 4000, 4001, 4301, 4305, 4316, 4320, 4330, 4331, 4332, 4336, 4337, 4340, 4411, 4415**Environmental Soil and Water Sciences** — Required concentration courses (28 hours): PSS 4301, 4325, 4330, 4331, 4332, 4335, 4337; GIST 3300; CHEM 2303 or 3305, 2103 or 3105**Elective concentration courses (13-14 hours):** PSS 3309, 3321, 3322, 4000, 4001, 4305, 4316, 4320, 4336, 4340; GEOL 1303; GIST 3301; NRM 4314**Horticulture and Turfgrass Science** — Required concentration courses (25 hours): PSS 2312, 2313, 3309, 3318, 4000, 4313, 4316, 4411**Elective concentration courses (16 hours):** PSS 2310, 2314, 2114, 3311, 3312, 4001, 4301, 4305, 4312, 4314, 4318, 4320, 4321, 4323, 4325, 4331, 4335, 4336, 4337, 4340, 4415

applications and analysis techniques required to monitor the progress of fermentations including sugar concentration, pH, and acidity.

2310—Floral Design (3). Floral design as a commercial enterprise. Emphasis on principles of floral design, patterns of arrangements, and elements of color composition. Field trips required. Fulfills core Creative Arts requirement.

2312—Propagation Methods (3). Prerequisite: C or better in PSS 1411 or PSS 1321. Propagation techniques of commercial nurseries and greenhouse ranges; study of the physiological reaction and cutting material. On campus (even), Distance (odd).

2313—Herbaceous Plant Materials (3). Prerequisite: C or better in PSS 1411 or PSS 1321. Study of the principal herbaceous plants and plant families, palms, roses, and subtropical landscape plants. F (even).

2314—Wine Production (3). Corequisite: PSS 2114. Overview of wine production focusing on pre-fermentation processes and fermentation management. Emphasis placed on improved winemaking through quality control and management. Designed for students and individuals either interested in or currently working in grape wine production. S (even).

2330—Fundamental Concepts of Soil Science (3). Course will discuss composition of soils and significance of soil chemical, physical, and biological properties with an emphasis on critical soil processes. Credit not given for PSS 2330 and PSS 2432. SS, F.

2401—Introductory Entomology (4). An introduction to the arthropods with major emphasis on the insects. Insect structure, function, identification, and relationships to man, plants, and animals will be discussed. Partially fulfills core Life and Physical Sciences requirement.

2432—Principles and Practices in Soils (4). Prerequisites: CHEM 1305 or CHEM 1307 and CHEM 1105 or CHEM 1107. Formation and composition, physical and chemical properties, hydraulic and thermal relationships of soil. Role of soil in ecosystems. Credit not given for PSS 2330 and PSS 2432.

3309—Introduction to Turfgrass Science (3). Prerequisite: C or better in PSS 1411 or PSS 1321. An overview of turfgrass selection, growth, adaptation and management. Specialized practices relative to home lawns, athletic fields, golf courses, and utility turfs. On campus (F), Distance (SS).

3310—Viticulture I: Principles of Viticulture (3). Prerequisite: C or better in PSS 1411 or PSS 1321. Introduction to grapevine history, biology, physiology, and principles and practices of vineyard management. F, On campus (odd), Distance (even).

3311—Sustainable Vegetable Crop Production (3). Prerequisite: C or better in PSS 1411 or PSS 1321. Study of principles and practices of sustainable vegetable production methods used by commercial growers. Focus will be on planning, production, and marketing of major vegetable crops within Texas. S (even).

3312—Sustainable Fruit and Nut Crop Production (3). Prerequisite: C or better in PSS 1411 or PSS 1321. Introduction to principles and practices of sustainable production of temperate tree fruits, nuts, and berry crops in Texas and the southern United States.

3317—Interior Plants (3). Prerequisite: C or better in PSS 1411 or PSS 1321. Selection and maintenance of interior plants and planting facilities. F (odd).

3318—Woody Plants (3). Prerequisite: C or better in PSS 1411 or PSS 1321. Discussion and selection of woody plants used for ornamental purposes in the landscape setting. The course will be divided between deciduous and evergreen plants. F.

3321—Forage and Pasture Crops (3). The production and use of forage and pasture crops. S.

3322—Grain, Fiber, and Oilseed Crops (3). History, distribution, use, plant form, growth and development, and cultural and production practices of important agronomic crops. S (odd).

3323—Crop Physiology (3). Presents fundamental concepts underlying the science of crop physiology, including crop phenology, canopy development and light interception, photosynthesis and respiration, and dry matter partitioning. (CL) F.

3324—Seed Science (3). Analysis of seed for planting. Seed quality as related to production, processing, storing, and handling. Study of federal and state seed laws. S (even).

3421—Fundamental Principles of Genetics (4). Prerequisites: BIOL 1401, BIOL 1402, or BIOL 1403 and a C or better in PSS 1321 or PSS 1411. Mendelian genetic principles and chromosomal basis of heredity and genetic analysis based on recombinant DNA.

4000—Internship (V1-3). Prerequisite: Approval of department chair. A supervised study course providing in-service training and practice in various areas of plant science. May be repeated for credit.

4001—Problems (V1-3). Prerequisite: Approval of instructor. An assigned problem and individual instruction in a specific area, Plant Science. May be repeated for credit with approval of department chair.

* Major course requirement

† See www.pssc.ttu.edu/ProgramPages/CourseRot.php for rotation of courses.

‡ Students must fulfill the university's Language, Philosophy, and Culture/Creative Arts requirements.

All PSS courses must be completed with a minimum grade of C.

All students will be advised prior to registration.

Required Concentration Courses (26 hours): PSS 1311, 2114, 2312, 2314, 3310, 4000, 4310, 4311, 4416

Elective Concentration Courses (15-16 hours): PSS 3311, 3312, 4001, 4301, 4305, 4314, 4320, 4325, 4335, 4336, 4411; RHIM 4340, 4350; CHEM 2103 and 2303; MBIO 3400

- 4100—Seminar (1).** Utilization of writing and oral presentation skills. Continued enhancement of education skills and adherence to professional ethics. (CL) F.
- 4301—Agricultural Compounds (3).** Prerequisites: CHEM 1107, CHEM 1108, CHEM 1307, and CHEM 1308; C or better in PSS 2401 and consent of instructor. Nature, mode of action, and uses of insecticides, fungicides, herbicides, and other pesticides. S (even).
- 4305—Integrated Pest Management (3).** Prerequisite: C or better in PSS 2401. The principles and practices of integration of all available control strategies in the management of arthropod pest populations. S (odd).
- 4310—Viticulture II: Grape Production (3).** Prerequisite: C or better in PSS 3310. Advanced studies of grape production and management practices in commercial vineyards. Advanced studies of grape production and management practices in commercial vineyards.
- 4311—Wines of the World (3).** Prerequisite: Students must be 21 years old, PSS majors, minors and concentrations only. Introduction to wines of the world through learning materials and sensory evaluation of regional wines. The content and the exam for Wine and Spirits Educational Trust (WSET) Level 1 Award in Wine is a required component of this course. [RHIM 4311]
- 4312—Environmental Ethic, Biodiversity, and Permaculture (3).** Prerequisites: Approval of instructor for non-PSS majors. Science of ecological, or natural, agriculture and social design by mimicking natural ecosystems centered on sustaining biodiversity and environmental ethic.
- 4313—Arboriculture (3).** Prerequisite: C or better in PSS 1411 or PSS 1321. The physiological principles and industry practices in the production, moving, care, and maintenance of ornamental trees, shrubs, and ground covers. Required field trips. S (even).
- 4314—Horticultural Management and Entrepreneurship (3).** Prerequisite: C or better in PSS 1411 or PSS 1321. Acquaints students to components of the horticultural marketing chain, management principles, and entrepreneurship principles found within the horticultural industry. [PSS 5317] F (even).
- 4315—Introductory Plant Pathology (3).** Identification and management of diseases of agricultural and horticultural plants. Diagnostic methods used to identify basic plant pathogens. F.
- 4316—Landscape Water Conservation and Ecology (3).** Prerequisite: C or better in PSS 3309 or consent of instructor. Study of landscape plant physiological response to environment, mechanical stress, plant or pest competition, and managing landscapes with less water or poor quality water sources. S.
- 4318—Landscape Pest Management (3).** Prerequisite: C or better in PSS 1411 or PSS 3309. Study of biology, identification, and control strategies of common turf and ornamental pests (weeds, diseases, insects) found throughout the United States. S (even).
- 4320—Sustainable Agriculture (3).** Prerequisite: C or better in PSS 1411 or PSS 1321. Discusses concepts and strategies addressing current agricultural issues (soil, tillage, irrigation, pests, and fertilization) that form the basis for organic farm systems. [PSS 5320]
- 4321—Fundamental Principles of Plant Breeding (3).** Prerequisite: C or better in PSS 3421. Practical application of genetics and biotechnology in the breeding and improvement of plants. S (even).
- 4323—Organic Crop Production Systems (3).** Prerequisite: C or better in PSS 1411 or PSS 1321. Introduction to principles of organic farming systems. Management of inputs, and technology for different ecosystems that promotes local food security, environment and economic growth. [PSS 5322]
- 4325—Crop Water Management (3).** Evaluation of the primary irrigation systems used in crop production, soil-plant interactions affecting water supply, and methods of monitoring soil and plant water status. S.
- 4330—Environmental Soil Chemistry (3).** Prerequisite: C or better in PSS 2432. Chemistry of inorganic and organic soil components with emphasis on environmental significance of soil solution-solid phase equilibria, sorption phenomena, ion exchange processes, reaction kinetics, redox reactions, and acidity processes. S.
- 4331—Soil Microbial Ecology (3).** Prerequisite: MBIO 3401 or BIOL 3309 or a C or better in PSS 2432 or consent of instructor. Introduction to soil organisms. Includes interactions between organisms, processes, and their ecological functions. S (odd).
- 4332—Soil Classification (3).** Approval of instructor for nonagriculture majors. Soil profile morphology. Classification systems with emphasis on the taxonomic system of the United States. F (even).
- 4335—Soil Fertility and Nutrient Management (3).** Prerequisite: C or better in PSS 2432. Nutrient availability as influenced by soil properties, modern methods of nutrient management, and tools for maximizing nutrient use efficiency. F.
- 4336—Soil Physical Properties (3).** Prerequisites: PSS 2432 and 6 hours of mathematics. Physical properties of soils: structure and movement of water, air, and temperature.
- 4337—Environmental Soil Science (3).** Prerequisite: C or better in PSS 2432. Physical, chemical, and biological properties and processes of soil as they relate to environmental quality. S (even).
- 4340—Irrigation Management Seminar (3).** Prerequisite: Consent of instructor. Survey of water management related to crop production and landscape management, including soil and plant water relations, mechanics and scheduling of irrigation, water management of specific crops and landscapes, regulatory aspects, and economic decision-making.
- 4411—Controlled Environment Crop Production (4).** Prerequisite: C or better in PSS 1411 or PSS 1321. Introduces concepts of construction, operation, and management for a variety of structures and crops. Includes construction materials and methods, heating, cooling, growing media, pest management, nutrition, fertility, growth regulation, irrigation, and post-harvest handling. Field trip required. S (odd).
- 4415—Plant Biotechnology (4).** Prerequisite: C or better in PSS 3421. The study of plant biotechnology with emphasis on industry topics such as research, marketability, product development, and regulatory and intellectual property issues.
- 4416—Winemaking Quality Control and Analysis (4).** Prerequisites: CHEM 1307, CHEM 1308, CHEM 1107, CHEM 1108; C or better in PSS 1311, PSS 2314; FDSC 3301 or MBIO 3400 (may be taken concurrently). Quality control and analysis for winemaking. S (odd).
- 4421—Principles of Weed Science (4).** Fundamentals of chemical weed control. Emphasis on herbicide families, names, usage, absorption, translocation, mechanism of action, and factors influencing selectivity and soil persistence. The laboratory will emphasize labels, calculations, equipment, calibrations and usage, and methods of application. (CL) F, On Campus (even), Distance (odd).
- 4426—Introduction to Genomics (4).** Prerequisite: Consent of instructor. Focuses on genome structure and function of model systems with emphasis on studying the regulation of gene expression and the transcriptome. F.

Department of Veterinary Sciences

Michael Ballou, Ph.D., Chairperson

Horn Professor: Galyean

Professor: Ballou

Associate Professor: Machado

Assistant Professors: Benitez Rojas, Strieder-Barboza

CONTACT INFORMATION: 108 Goddard Building
Box 42123 | Lubbock, TX 79409-2123 | T 806.742.2808
www.depts.ttu.edu/agriculturalsciences/vetSciences/

About the Department

The department supervises the following program:

- Master of Science in Animal Health and Industry

Established in 2017, the Department of Veterinary Sciences is designed to provide a greater focus on research, teaching, and outreach efforts in animal health and well-being and is intended to meet the educational and research needs of the animal-agriculture industry and the regional veterinary community.

The Veterinary Sciences Department has several faculty members with joint appointments at the School of Veterinary Medicine in Amarillo. The Animal Health and Industry program is not to be confused with the School of Veterinary Medicine, which offers doctorates in veterinary medicine. The Texas Tech Veterinary Sciences Department offers a master's graduate degree program.

Office and laboratory spaces are in the Food Technology and Experimental Sciences II Building located in the heart of the Texas Tech University Campus. The department research extends to all the laboratory animal facilities, as well as the cattle, sheep and goat, swine, and equine facilities affiliated with the Davis College of Agriculture.

Graduate Programs

For information on the graduate program offered by the Department of Veterinary Sciences, visit the Graduate Programs section of the catalog on page 103.

Davis College of Agricultural Sciences & Natural Resources Graduate Programs

The college administers a variety of graduate programs through its various departments. Some courses are offered at the college level. For more information about the programs listed, visit the departmental websites.

Programs in the Davis College lead to the following graduate degrees:

- Master of Science with majors in the Departments of Agricultural and Applied Economics, Agricultural Education and Communications, Animal and Food Sciences, Natural Resources Management, Plant and Soil Sciences, and Veterinary Sciences.
- Master of Agribusiness is designed to meet the growing need for agribusiness professionals with advanced conceptual and quantitative training. The degree program provides a unique blend of analytical and business capability from both the Department of Agricultural and Applied Economics and the Rawls College of Business.
- Master of Landscape Architecture is a professional Landscape Architecture Accreditation Board (LAAB)-accredited degree for students with a bachelor's degree in any field (72 credits including leveling courses and 36 credits required for the M.L.A.), and a post-professional M.L.A. degree for students with a B.L.A. or related professional degree (up to 36 credit hours depending on bachelor's courses and professional experience). The post-professional M.L.A. encourages specialization and can lead to a Ph.D. in Land-use Planning, Management and Design housed in the Huckabee College of Architecture.
- Doctor of Education with a major in the Department of Agricultural Education and Communications.
- Doctor of Philosophy with majors in the Departments of Agricultural and Applied Economics, Agricultural Education and Communications, Animal and Food Sciences, Natural Resources Management, and Plant and Soil Sciences.

The graduate program also offers a university-wide interdisciplinary program leading to the Ph.D. degree in Land-use Planning, Management, and Design. A Doctor of Education degree is available from the College of Education for students who wish to have agricultural education as a support area.

Applicants who meet the admission standards of the Graduate School also must receive formal approval from a departmental committee. Admission standards of some departments exceed those of the Graduate School.

Advisory committees for the M.S. and M.L.A. degrees consist of at least three faculty members. Advisory committees for the Ph.D. degree in agricultural and applied economics consist of four or five faculty members. Advisory committees for Ph.D. degrees in the Departments of Natural Resources Management; Plant and Soil Science; and Animal and Food Sciences consist of five faculty members.

A preliminary examination is required of all doctoral students before the end of the second semester of work. The student's progress will be evaluated and recommendations will be made concerning continuation of graduate studies and leveling work necessary to remove any deficiencies revealed by the examination.

No specific language or tool requirements exist for the graduate programs. However, such requirements may be incorporated when deemed appropriate. Other requirements for the degree programs are specified in other sections of this catalog.

Distance degree programs are offered at the graduate level in agricultural education and horticulture. The Master of Science degrees in horticulture and plant and soil science are detailed in the catalog under the Department of Plant and Soil Science. The Department of Agricultural Education and Communications offers two distance degree programs: Master of Science in Agricultural Education and Doctor of Education in Agricultural Education. The Doctor of Education is delivered as a joint program with Texas A&M University. Both degree programs are referenced in the catalog under the department.

Graduate Course Descriptions

Agricultural Science (AGSC)

5303—**Ecology of Grazing Lands Systems (3).** A field oriented course on ecology, management, and research in forage-livestock systems.

Department of Agricultural and Applied Economics

The department offers Master of Science and Master of Agribusiness degrees, as well as a Doctor of Philosophy degree.

Agribusiness, M.A.B.

The Master of Agribusiness is designed to meet the growing need for agribusiness professionals with advanced conceptual and quantitative training. The degree program provides a unique blend of analytical and business capability from both the Department of Agricultural and Applied Economics and the Rawls College of Business. The Master of Agribusiness requires 36 hours and may be completed fully online. An internship with a professionally relevant company is required.

Agricultural and Applied Economics, M.S.

The Master of Science in Agricultural and Applied Economics requires either a minimum of 30 hours of graduate credit for the thesis option or a minimum of 36 hours for the non-thesis option. A student seeking an M.S. in Agricultural and Applied Economics may choose courses to emphasize agribusiness and trade or resource policy and development.

Agricultural and Applied Economics, M.S. / J.D.

The School of Law and the Graduate School of Texas Tech University offer a dual degree program that allows students to complete the requirements for the Master of Science degree in Agricultural and Applied Economics and the Doctor of Jurisprudence degree. This dual program can be completed one year sooner than when each is pursued separately. The 36-hour M.S. component is administered by the Department of Agricultural and Applied Economics on behalf of the Graduate School, while the J.D. component is administered by the School of Law.

The dual degree program is of particular benefit to students who are interested in practicing law in a rural setting or who want to pursue certain types of careers in agribusiness finance or natural resource law. Students must be admitted to both programs separately, but the LSAT test will suffice for both applications.

Agricultural and Applied Economics, Ph.D.

The doctoral program in agricultural and applied economics requires a minimum of 70 credit hours of coursework beyond the baccalaureate degree and at least 20 credit hours for dissertation. The program is designed to develop a broad-based competence in advanced economic theory, techniques of quantitative analysis, and public administration of agricultural and economic issues. The program has several committee-approved electives that can be taken inside or outside the department with approval of the student's advisory committee. These courses can be mixed from other departments or concentrated to form a formal minor in another department. We have a unique relationship that allows students to pursue a minor in personal financial planning, a joint Ph.D. program between the department and the College of Health and Human Sciences. Completion of the doctoral program in agricultural and applied economics with a minor in personal financial planning qualifies graduates to take a test administered by the Certified Financial Planning Board of Standards to become Certified Financial Planners.

Each Ph.D. candidate is expected to demonstrate competency by satisfactorily completing (1) a comprehensive written examination addressing core topics administered by the department, (2) a dissertation research project that demonstrates original independent scholarly research, and (3) a final oral exam.

Before being recommended for admission to a degree program with a major in agricultural and applied economics, the student may be required to take (without graduate credit) undergraduate leveling courses as specified by the department.

Graduate Course Descriptions

Agricultural and Applied Economics (AAEC)

- 5000—**Professional Internship (V1-6).** Supervised study providing in-service training and practice in a professional setting, including businesses and non-profits.
- 5301—**Special Study in Agricultural and Applied Economics (3).** Prerequisite: Instructor consent. Individual and group study in advanced topics not covered in other graduate courses. May be repeated for credit. F, S, SS.
- 5302—**Food and Agriculture Sector Public Policy (3).** Prerequisite: AAEC 4305. Analysis of public policies affecting the food and fiber sector; commodity programs, environmental laws, and trade policy. F.
- 5303—**Advanced Production Economics (3).** Prerequisite: AAEC 3315. Criteria for resource use optimality under price and yield certainty and uncertainty. F.
- 5304—**Applied Logistics (3).** Logistics and supply chain management course about managing relationships across the complex agribusiness networks that today's supply chains have become.
- 5305—**Applied Behavioral Economics (3).** Introduction to the concepts and applications of behavioral economics in business, academic, policy, government, and other diverse contexts.
- 5306—**Agribusiness Analytics (3).** Introduction to big data management, processing, and analyses. Emphasis on applied economics and agribusiness applications using dynamic visualization, classification, and prediction methods.
- 5307—**Applied Econometrics I (3).** Prerequisite: AAEC 4302. Advanced statistical methods, including multiple regression analysis, for applied economic problems; constructing econometric models; multicollinearity, autocorrelation, heteroscedasticity, and related problems. F.
- 5308—**Natural Resource Economics (3).** Prerequisite: ECO 5311 or instructor consent. Economic theory and empirical investigations of resource utilization with special emphasis on arid and semi-arid land areas and environmental issues. F.
- 5309—**Natural Resources and International Economic Development (3).** Prerequisite: AAEC 3315. International economic development issues with a focus on resource use, institutional analysis, political economy, and geography. F.
- 5310—**Advanced Market Analysis (3).** Theoretical and empirical approaches to market structures and market price behavior. S.
- 5312—**Applied Economic Analysis for Agribusiness (3).** Application of economic theory and methods to management problems of the business firms in the food and fiber sector. SS.
- 5313—**Microcomputer Applications in Agribusiness and Research (3).** Prerequisites: AGSC 2300 and instructor consent. Use of microcomputers, software, and design of software for agricultural business and research purposes. Not open to majors. F, S.
- 5314—**Environmental Economics and Policy Analysis (3).** Familiarize students with economic techniques and their use in analyzing natural resources and environmental policy issues. For non-majors only.
- 5315—**Property Appraisal (3).** Prerequisites: C or better in AAEC 2305 and a 2000-level ENGL course. Factors governing land prices, valuation. Appraisal for use, sale, lending, condemnation, estate settlement, taxation. F.
- 5316—**International Agricultural Trade (3).** Economic theory dealing with the international movement of goods, services, and capital; welfare and distributional aspects of trade; and policy issues in international agricultural trade. S.
- 5317—**Financial and Commodity Futures and Options (3).** Prerequisite: C or better in AAEC 2305 or ECO 2301. Mechanics of futures trading, history and functions of futures market. Role of futures and options markets in managing risks. F, S.
- 5318—**Finance and Agribusiness Sector (3).** Prerequisite: C or better in AAEC 3302 or FIN 3320. Applications of financial theory for the agribusiness sector. Risk, capital structure, business structure, investment analysis. S.
- 5319—**Advanced Agribusiness Enterprise Management (3).** Analysis of the organization and management of agribusiness operations including farms, ranches, input suppliers, commodity processors, etc. [AAEC 4319]
- 5320—**Agribusiness Law (3).** Course focuses on various areas of law that directly affect the operation of agricultural businesses and producers. Course examines nature and source of law, contracts, real estate

matters, commercial transactions, business entities and environmental issues. F.

- 5321—Research Methodology in Economics (3).** Review of philosophical and conceptual basis of economic research and study of the procedural aspects of designing, planning, and conducting research in economics. S.
- 5325—Applied Regression and Least Squares Analysis for Agricultural Sciences (3).** Application of regression analysis to analyze problems in the agricultural sciences; simple linear and multiple regression models, residual analysis, introduction to time series models.
- 5330—Graduate Studies in Natural Resource Law (3).** General examination of the regulatory and legal framework of natural resource laws that affect the operation of agricultural businesses and producers.
- 6000—Master's Thesis (V1-6).**
- 6301—Advanced Special Problems in Agricultural and Applied Economics (3).** Prerequisite: Instructor consent. Individual study in advanced topics not covered in other graduate courses. F, S, SS.
- 6302—Food, Agriculture, and Natural Resource Policy Analysis (3).** Prerequisite: AAEC 4305. Analysis of policies, programs affecting food, agricultural commodities, trade, and natural resources. Includes policies in the U.S. and other countries. F.
- 6305—Economic Optimization (3).** Prerequisite: AAEC 5303. Development and use of mathematical economic models emphasizing static and stochastic linear, nonlinear and dynamic processes. F.
- 6306—Institutional Analysis (3).** Introduces students to the major ideas and methods used in institutional economics, covering topics such as private and common property, customs, and constitutions.
- 6308—Advanced Natural Resource Economics (3).** Prerequisite: ECO 5311. Advanced economic theory and analysis of environmental and natural resource issues, both domestic and global. F.
- 6310—Demand and Price Analysis (3).** Prerequisite: ECO 5311. Applied price and demand analysis including complete demand systems and hedonic-characteristic price analysis. S.
- 6311—Applied Econometrics II (3).** Prerequisite: AAEC 5307. Methods and applications of single and multi-equation models in agricultural economics; logit and probit models, nonstructural models and related methods. S.
- 6312—Applied Econometrics III (3).** Prerequisite AAEC 6311. Advanced econometrics methods, including nonlinear OLS, GMM, MLE, panel data, limited dependent variables models, and time series.
- 6315—Applied Microeconomics I (3).** Prerequisites: ECO 5301 and ECO 5311 or instructor consent. Covers consumer theory, production theory, market equilibrium, imperfect competition, general equilibrium, welfare economics topics related agricultural and natural resource economics.
- 6316—Advanced International Trade and Policy (3).** Prerequisites: AAEC 6315 and AAEC 5316 (or comparable course), or instructor consent. Covers advanced materials in Ricardian theory of comparative advantage, Heckscher-Ohlin theory, New Trade Theory, firm-level trade theory, and trade policies. Applications to agriculture.
- 7000—Research (V1-12).**
- 7200—Teaching Practicum (2).** Prerequisite: Doctoral student in the program, previous or concurrent enrollment in a higher education teaching methods course, instructor consent. Supervised teaching at the university level.
- 8000—Doctor's Dissertation (V1-12).**

Department of Agricultural Education and Communications

Contact: Dr. Courtney Meyers | Graduate Program Coordinator
courtney.meyers@ttu.edu

The department offers two Master of Science degree programs, one in agricultural education and one in agricultural communications. These programs may be completed with 36 hours of approved graduate courses or 30 hours of graduate courses plus six hours of thesis research. Both degrees are offered resident-delivery or distance-delivered.

The department also offers two doctoral programs to meet unique career goals and personal needs.

Agricultural Communications, M.S.

The Master of Science in Agricultural Communications is designed to prepare graduates for entry into or advancement in a variety of media, marketing, and public relations positions. This program also provides

development of professional communications skills for related careers in agribusiness, government service, education, and extension. This master's degree provides a flexible program, which can be tailored to meet each student's unique situation. Specialization areas such as online marketing, digital media, and public relations are also available through cooperation with the College of Media and Communication. Students can choose to complete the master's degree on the thesis (30 hours) or non-thesis (36 hours) track. Both degrees are offered resident-delivery or distance-delivered.

Agricultural Education, M.S.

The Master of Science in Agricultural Education is designed to prepare graduates for teaching, research, extension, leadership, and administrative positions in the public and private sectors. Students in this master's program focus on a core of agricultural education courses along with an emphasis in educational/training program development, evaluation, teaching/training methods, leadership development, and interpersonal communication. Students can choose to complete the master's degree on the thesis (30 hours) or non-thesis (36 hours) track. Both degrees are offered resident-delivery or distance-delivered.

Agricultural Leadership Concentration

The concentration area of Agricultural Leadership may be included in either the master's degree in Agricultural Education or Agricultural Communications by completing two of the four available AGLS courses. Students are not required to take additional hours but are able to include the two AGLS courses (6 hours) within the required hours of their selected M.S. program. Agricultural Leadership will be added to student transcript upon graduation.

Agricultural Communications and Education, Ph.D.

The Doctor of Philosophy in Agricultural Communications and Education is a resident degree designed to prepare students for a career as a faculty member. The program provides an opportunity for advanced study in the human dimensions of agriculture (agricultural communications, agricultural education, and agricultural leadership) to meet the growing demand for college and university faculty who can provide instruction in more than one dimension. This degree program requires a minimum of 48 semester hours of graduate coursework along with the development of a dissertation (12 hours) beyond a master's degree (total of 60 hours post-master's degree).

At or near the end of course work, the student will take a qualifying examination that requires a synthesis and application of knowledge acquired during the course of study for the doctoral student. This qualifying examination process also includes an oral examination under the supervision of the committee. Students are required to complete a dissertation and pass an oral defense of the dissertation.

Agricultural Leadership Track. The Agricultural Leadership Track may be included within the Ph.D. in Agricultural Communications and Education. Students are not required to take additional hours but are able to include the four AGLS courses (12 hours) within the 60 required hours of the Ph.D. program. Agricultural Leadership will be added to student transcript upon graduation.

Agricultural Education, Ed.D.

The Doctor of Education in Agricultural Education is a unique distance-delivered degree awarded by Texas Tech. This degree is designed for mid-career professionals who are place-bound and cannot relocate. All coursework associated with this degree is delivered online. Emphasis is placed on selecting courses and experiences that lead to a thorough and comprehensive knowledge of agricultural education, agricultural leadership, and/or agricultural communications, a supporting field, research methods, and statistics. This degree requires a minimum of 72 semester hours of graduate coursework beyond the baccalaureate degree, including 12 hours of dissertation.

At or near the end of coursework, students will take a qualifying written examination. Shortly after the written examination, students will take an

oral qualifying examination. Both examinations are administered by the student's committee. Students are then required to complete a dissertation and pass an oral defense of the dissertation.

Agricultural Communications, B.S. / M.S.

The Accelerated Bachelor's to Master's in Agricultural Communications provides an opportunity for qualified TTU students to earn both degrees in a cost-effective and timely manner. Students in the program get an early start on master's work by taking three graduate courses in their senior year, in place of three senior elective courses, to complete their B.S. degree. They then take the remaining graduate courses the following year to complete their M.S. degree with a thesis or non-thesis option. The three graduate courses are selected from the following six courses: ACOM 5304, 5305, 5306, 5307, 5308; AGED 5302.

Graduate Course Descriptions

Agricultural Communications (ACOM)

- 5302—**Knowledge Management and Data Visualization in Agriculture Organizations (3)**. A comprehensive, systematic examination of the information assets of agricultural organizations and how they are identified, captured, organized, and shared to facilitate decision-making internal and external to the organization.
- 5303—**Advanced Video Production in Agriculture (3)**. Study of video and images as well as visual theories in relation to agriculture. Course includes study and practice of advanced video production for agricultural communications professionals with a focus on editing.
- 5304—**Risk and Crisis Communications in Agriculture and Natural Resources (3)**. Examines potential risk and crisis communications scenarios in agriculture and the relevant theories, models, and processes to address these types of situations effectively. [ACOM 4304]
- 5305—**Public Opinion in Agriculture and Natural Resources (3)**. Reviews the concept of "public opinion" from a multidisciplinary perspective and examines how the concept applies to agriculture and the natural resources industry.
- 5306—**Foundations of Agricultural Communications (3)**. Explore historical foundations and selected philosophical concepts and philosophers and evaluate their influence upon agricultural communications.
- 5308—**Utilizing Online Media in Agricultural Communications (3)**. Identify agricultural audiences, conduct analyses, and use results to evaluate and produce online media that utilizes design fundamentals, visual communication theories, and new media technology.
- 5309—**Social Marketing Campaigns in Agriculture & Natural Resources (3)**. Focuses on the introduction of social marketing and how it is being applied throughout the world to foster behavioral change.

Agricultural Education (AGED)

- 5001—**Contemporary Issues in Agricultural and Extension Education (V1-6)**. Study current issues and trends in agricultural and extension education and develop plans to improve the disciplines. May be repeated for up to 6 hours credit. F, S, SSI, SSII.
- 5301—**Special Problems (3)**. Investigation of problems in agricultural education or extension education of special interest to the student. May be repeated for credit. F, S, SSI, SSII.
- 5302—**Research Methods and Analysis in Agricultural Education and Communications (3)**. Application of research techniques in the education and communications aspects of agriculture, including proposal preparation, literature review, research design, data analysis, and reporting of results.
- 5305—**Program Development in Agricultural and Extension Education (3)**. Development of a total agricultural education program in communities and counties using all available resources. SSI, SSII.
- 5306—**History and Philosophy of Agricultural Education and Communications (3)**. Historical and philosophical foundations of education, communications, and extension education in agriculture.
- 5308—**Foundations of Adult Education (3)**. Study and investigation of adult learning theories, methods, and procedures to implement changes in adult behavior.
- 5309—**Evaluation of Programs in Vocational, Technical, and Extension Education (3)**. Techniques in evaluating vocational, technical, and extension education programs. Principles and procedures of evaluation with emphasis on focusing, designing, reporting, and managing evaluation. SSI, SSII.

- 5310—**College Teaching in Agriculture (3)**. Methods and techniques of teaching agriculture at the college level. Includes self-assessment, student assessment, course development, lesson planning, presentations, and evaluation. F.
- 5311—**Human Dimensions of International Agricultural Development (3)**. Study current issues and trends in the human dimension of international agricultural development.
- 5312—**Data Analysis and Presentation in Agricultural Communications and Education (3)**. Assessment of programs in agriculture and extension education based on programming theories, concepts, and research. Emphasizes assessing client need, monitoring programs based on objectives, and determining program effectiveness and efficiency.
- 5314—**Agricultural Education in International Settings (3)**. A study-abroad exploration of agricultural and sustainable practices in international settings. Conducted across a country and includes tours of crops, livestock facilities, and educational environments. May be repeated for credit.
- 5315—**Experiential Learning (3)**. Focuses on theory and practice in facilitating learning from experiences in formal, informal, and non-formal settings.
- 5340—**Educational Law (3)**. Introduction to the legal aspects of educational organizations, focusing on the school building level and emphasizing the rights and responsibilities of stakeholders. [EDLD 5340]
- 5351—**Communication for School Leaders (3)**. Study and application of interpersonal communication theory and research as related to organizational, social, and environmental contexts. Conferencing, informational and employment interviewing, and group dynamics.
- 6000—**Master's Thesis (V1-6)**.
- 6301—**The Professorate (3)**. Overview of agriculture-focused faculty roles and career paths in non-profit colleges and universities in the United States.
- 7000—**Research (V1-12)**.
- 7005—**Professional Internship (V1-6)**. An on-the-job supervised experience program conducted in the area of the student's specialization. May be repeated for credit.
- 7100—**Graduate Seminar (1)**. Group study and discussion of current developments in agricultural behavioral sciences. May be repeated for credit.
- 8000—**Doctor's Dissertation (V1-12)**. Initiation and completion of research for advanced degree.

Agricultural Leadership (AGLS)

- 5302—**Methods of Technological Change (3)**. Dynamics of cultural change as theoretical framework for planned technological change; methods of planning and implementing change, its effect, and how it can be predicted. SSI, SSII.
- 5304—**Theoretical Foundations of Leadership (3)**. Theory of motivation, behavior, leadership styles, power, influence, charisma, and the historical context of leadership in the agriculture industry. S.
- 5305—**Developing Leadership in Rural Communities (3)**. Introduction to the theories, concepts, and practical application of identifying, developing, and utilizing leadership to help sustain and revitalize rural communities.
- 5306—**Contemporary Issues in Agricultural Leadership (3)**. Exposes students to national, regional, and local agricultural issues that can be positively impacted with the proper application of leadership principles.
- 5307—**Evaluating Leadership in Agricultural Organizations (3)**. The application of leadership and evaluation principles to determine improvement areas to maximize efficiency of the human dimension of the agricultural industry.

Agricultural Systems Management (AGSM)

- 5301—**Investigations in Advanced Agricultural Mechanics (3)**. Individual study or investigation of an advanced phase of mechanized agriculture. May be repeated for credit. F, S, SSI, SSII.

Department of Animal and Food Sciences

The Department of Animal and Food Sciences offers flexible degree programs preparing graduates for a wide array of positions in agriculture and allied fields. Students with bachelor's degrees in a variety of fields are welcome to study in the department.

Animal Science, M.S.

The Department of Animal and Food Sciences offers a non-thesis, 30-hour Master of Science degree in animal science for students who wish to pursue a focus area in livestock production (beef cattle, swine, sheep and goat, dairy cattle, equine, and poultry), agricultural product processing (meats, food, or feeds emphasis), companion animal, equine assisted therapy and activities, or feedlot management. An internship or practical experience is required for this degree. The non-thesis Master of Science degree is considered a terminal degree.

The Department of Animal and Food Sciences also offers a Master of Science in Animal Science for students seeking a non-terminal, thesis option. Students may pursue studies in topics including animal breeding (physiology or genetics), livestock (ruminant or monogastric) or companion animal nutrition, animal behavior and welfare, growth and development, livestock production, animal health, companion animal science, equine science, equine-assisted therapy, or meat science. This degree requires a thesis in addition to at least 24 semester hours of coursework and 6 thesis hours.

Food Science, M.S.

The Department of Animal and Food Sciences offers a non-thesis, 30-hour Master of Science degree in food science with concentrations in food safety, food analysis/chemistry, food regulations, and agricultural product processing (meats, food, or feeds emphasis). An internship or research experience is required for this degree. The non-thesis Master of Science degree is considered a terminal degree.

The Department of Animal and Food Sciences also offers a Master of Science in Food Science for students seeking a non-terminal, thesis option. The master's degree in food science emphasizes the scientific and technological aspects of pre- to post-harvest food processing and distribution. Knowledge of the physical and biological sciences, economics, marketing, and engineering is applied to product development, food processing, packaging, food microbiology and safety, food defense, food security, quality control/assurance, technical sales, and distribution. Research programs involve food safety, food security, food processing, food microbiology, food quality and composition, and processing. Consumer demands for a variety of highly nutritious and convenient foods of uniformly high quality create many and varied career opportunities in the food and allied industries. These careers include management, research and development, process supervision, quality control/assurance, procurement, distribution, sales, and merchandising. This degree requires a thesis in addition to at least 24 semester credit hours of coursework and 6 thesis hours.

Animal Science, Ph.D.

The doctoral program in animal science requires a dissertation and a minimum of 60 hours of graduate coursework as well as 12 dissertation hours, totaling 72 hours. Students may transfer in 30 hours of coursework from an M.S. degree (excluding thesis and seminar hours) if approved by the student's advisory committee. Candidates for the Doctor of Philosophy in Animal Science may specialize in one of several areas of interest such as animal breeding and genetics, livestock or companion animal nutrition, reproductive or environmental physiology, animal health and epidemiology, animal behavior and welfare, growth and development, companion animal science, equine science, meat science, or food science.

Students who receive stipends have special responsibilities in research and teaching. These awards include waiver of nonresident tuition.

Graduate Course Descriptions

Animal Science (ANSC)

- 5000—Professional Internship (VI-6).** Prerequisite: Consent of instructor. Supervised study providing advanced training for Master's of Agriculture and Master's of Science (nonthesis) students. Emphasis is on creative and technical abilities.
- 5001—Problems in Animal Science (VI-6).** Prerequisite: Consent of instructor. Selected problems based on the student's needs and interests not included in other courses. May be repeated for credit with approval of department.

- 5100—Seminar (1).** Analysis of significant research. Oral presentations and discussions; enrollment required each semester of student's residence. F, S.
- 5201—Ethical Behavior and Integrity in Scientific Research (2).** Combination of lecture presentations and student analysis of behavior in science to explore aspects of scientific integrity and conduct. S, even years.
- 5219—Advanced Studies in Equine Behavior and Dynamics (2).** Advanced study of equine behavior, psychology, and herd dynamics. SS.
- 5301—Advanced Equine-Assisted Mental Health (3).** Advanced study of equine-assisted mental health as a therapeutic intervention utilizing horses to address behavioral, relational, and emotional issues for clients. S.
- 5302—Advanced Beef Production (3).** Advanced study of beef production and management. Emphasis on the application of current research to improve the efficiency of beef production. SS, even years.
- 5303—Advanced Beef Cattle Feedyard Management (3).** Emphasis on the application of recent research to improve the management of cattle feedyard operations. Special emphasis will be placed on risk and resource management within the feedyard. F.
- 5304—Growth and Development (3).** A study of differentiation, development, growth, and fattening of domestic animals and hereditary and environmental influences and interactions. S.
- 5305—Advanced Therapeutic Riding (3).** Advanced skills and theories of therapeutic riding, including lesson plan development, advanced knowledge of disabilities, and ground-work for instructor certification. F.
- 5306—Advanced Animal Breeding (3).** Prerequisite: ANSC 3402 or equivalent. Advanced topics in selecting and mating farm animals with the objective of making genetic improvement. Emphasis on breeding value estimation and crossbreeding. S, odd years.
- 5307—Research Methods in Agricultural Sciences (3).** Prerequisite: ANSC 5403 or equivalent. Computer programming, data inputs, and interpretation. Covers examples that relate to experimental designs in agricultural research. SSI.
- 5308—Minerals and Vitamins in Animal Nutrition (3).** An in-depth study of vitamin and mineral chemistry, metabolism, interrelationships, and requirements for production. SS.
- 5309—Advanced Topics in Reproduction (3).** A review of current literature and demonstrated techniques of the current procedures being used in assisted reproduction. S, odd years.
- 5311—Ruminant Nutrition (3).** A study of the digestive physiology of ruminants. Emphasis on rumen fermentation and its relationship to practical nutrition. Individual topics and current research information. F, even years.
- 5312—Advanced Sheep and Goat Production (3).** Advanced study of sheep and goat production and management. Application of research in genetics, reproduction, nutrition, health, management, wool, mohair, and marketing. S.
- 5313—Nutritional Biochemistry in Animals (3).** Nutrient metabolism and regulation in animals. Course integrates metabolic pathways with nutrition and physiology. [VSCI 5313] S.
- 5314—Animal Protein and Energy Utilization (3).** An in-depth study of nitrogen, amino acid metabolism, and energy utilization in animals. Evaluation of sources and requirements for production F, odd years.
- 5316—Muscle Chemistry, Ultrastructure, and Physiology (3).** A study of muscle structure, composition, growth mechanisms of contraction, and rigor as related to livestock. S, odd years.
- 5317—Studies in the Sensory Analysis of Foods (3).** Advanced analytical, affective, and statistical methods for assessing the sensory properties of foods and feeds for animal and human consumption with emphasis on experimental design. [ANSC 4307]
- 5318—Topics in Animal Stress, Welfare, and Behavior (3).** Students will write and discuss each topic online. Topics include animal rights philosophy and applications, stress mechanisms, measuring behavior and welfare, and other current topics.
- 5319—Nutrition and Immune Function in Animals (3).** Nutritional immunology in livestock. An integrated overview of the effect of immune system stimulation on nutrient utilization and partitioning with an emphasis on regulatory mechanisms.
- 5320—Basic Concepts in Endocrinology (3).** The goal of this course is to develop a general understanding of endocrine physiology, focusing on the integrative and regulatory roles of the endocrine system. [VSCI 5320]
- 5321—Epidemiology in Animal Welfare Science (3).** Explores fundamental epidemiological concepts, including causation, sampling, study design, critical appraisal, and statistical modeling, and the application of these concepts in measuring human and animal health-related outcomes.
- 5322—The Biochemical Basis of Animal Behavior (3).** Study the biochemical mechanisms underlying an animal's behavior, stress response, learning

and memory, affective states, sensory perception, and homeostasis regulation.

- 5400—**Advanced Meat Science and Muscle Biology (4)**. Advanced study of meat components, their development, and effect on meat characteristics and processing properties. Emphasis on industry issues and the current scientific literature. Not for students who have taken ANSC 4400. SS
- 5401—**Experimental Techniques in Meat Chemistry and Muscle Biology (4)**. Histological, chemical, and biological properties of meat. Experimental techniques in meat science and muscle biology will be studied in lecture and individual lab study.
- 5402—**Advanced Horse Production (4)**. An advanced study of equine science, including health, lameness, disease, genetics, reproductive physiology, nutrition, and research topics within the equine industry.
- 5403—**Biometry (4)**. Introduction to biological statistics. Observations, probability, “t” test, analysis of variance, mean separation procedures, linear regression and correlation, and chi-square. Introduction to computerization of statistical analyses. [VSCI 5403] F.
- 5404—**Physiology of Reproduction (4)**. Anatomy of reproductive systems, physiological regulations of reproductive processes, estrous cycle, gonadal functions, semen evaluation, fertilization, embryology, pregnancy, parturition, lactation, reproductive efficiency, and research techniques. SSII, odd years.
- 5405—**Advanced Processed and Cured Meat Science (4)**. Advanced application of scientific principles and practices to manufactured meat products. Interrelationships among muscle ingredients, processing technologies, storage conditions, and stability of cured muscle foods. S, even.
- 5406—**Research Methods in Ruminant Nutrition (4)**. Prerequisite: Consent of instructor. Experimental techniques related to ruminant nutrition research will be examined in lecture and lab study.
- 6000—**Master's Thesis (V1-12)**.
- 6001—**Supervised Teaching (V1-3)**. Supervised teaching experience at the university level.
- 7000—**Research (V1-12)**.
- 8000—**Doctor's Dissertation (V1-12)**.

Food Science (FDSC)

- 5210—**Grant Writing (2)**. Prerequisite: Ph.D. program or consent of instructor. Development of grant proposals for submission to funding agencies. Agency identification, proposal development, budgets, project management and agency relations.
- 5301—**Study in Food Microbiology (3)**. Isolation and identification of organisms surviving process treatment of food products. Techniques in maintaining culture and shelf-life quality for fermented foods. Organized lecture and individualized laboratories. S, even years.
- 5304—**Rheological Properties of Food Materials (3)**. Students will learn rheological properties of food and biomaterials as well as their applications in the food industry. Rheological characterizations of both solid and liquid foods will be covered.
- 5306—**Hygienic Design of Food Processing Plants (3)**. Advanced principles of sanitary design for food processing plants. Emphasis on site, layout, costs, and design considerations as well as project design and execution.
- 5307—**Topics in Food Science (3)**. Students work on subjects of individual interest but opportunity is given for interaction with fellow students in the course. May be repeated for credit. F, S, SS.
- 5309—**Current Topics in Food Microbiology (3)**. Understand and discuss current topics in food microbiology. Focus on current scientific literature, current methodologies and data evaluation and interpretation. May be repeated for credit. F.
- 5310—**Food Sanitation Management (3)**. Food-borne pathogens and their control in a foodservice and retail setting. Topics include sanitation, food hygiene, FDA Model Food Code, and HACCP. Provides certification in applied food service sanitation management. F, S, SSII.
- 5311—**Modeling Transport in Food and Biomaterials (3)**. Modeling of transport processes for food and biomaterials using finite element method and commercial software. F.
- 5402—**Chemical and Instrumental Analyses of Agricultural Products (4)**. Application of chemical, chromatographic, and spectroscopic methods in analysis of agricultural products. [FDSC 4402] S.
- 5403—**Study in Food Chemistry (4)**. Analysis of food components and changes in their characteristics due to processing treatments. Laboratory techniques in instrumental analysis. [FDSC 4403] F.
- 6000—**Master's Thesis (V1-12)**.
- 6001—**Supervised Teaching (V1-3)**. Supervised teaching experience at the university level.

Department of Landscape Architecture

The department offers a Master of Landscape Architecture (M.L.A.) degree accredited by the Landscape Architecture Accreditation Board.

Landscape Architecture, M.L.A.

The landscape architecture program vision is to advance the discipline of landscape architecture through innovative learning, research, and service activities. First professional B.L.A. and M.L.A. degrees are accredited by the Landscape Architectural Accreditation Board (LAAB). Student learning outcomes are coordinated throughout the curriculum and in each semester to develop creative leaders ready for professional licensure and practice in the public or private sector. The graduate program specializes in semi-arid landscapes, while engaging design and planning issues critical to a sustainable, resilient, adaptable earth and its growing urban populations.

The Master of Landscape Architecture program offers both first professional and post-professional degree options vital to the department's vision to advance the discipline of landscape architecture. The first professional LAAB-accredited degree program is designed to accommodate students who do not have a Bachelor of Landscape Architecture (B.L.A.) or related design degree but who wish to become licensed landscape architects. Post-professional students, who already have a B.L.A. or related design/planning degree, develop a specialization in the discipline and/or prepare to enter an academic career in landscape architecture. Faculty advisors assist students in their development of a specific program of study to meet their goals and satisfy university and LAAB requirements.

First professional M.L.A. students begin with a sequential curriculum of leveling courses (up to 36 credit hours) focused on student learning outcomes aimed at competencies required for the Landscape Architecture Registration Examination (LARE national license exam). All students, both first and post-professional, take an individualized set of up to 36 semester credit hours required for the concentration and career interest. All graduate students can include a study abroad and/or professional internship as part of their required concentration course of study.

Computer Requirement. All students are required to provide their own graphics workstation meeting the Department of Landscape Architecture specifications. A graphics workstation meeting the spec is critical to efficient and effective fused analog and digital workflows taught throughout the curriculum using state-of-the-art CAD, BIM, GIS, graphics, visualization, and modeling tools.

Thesis and Project Thesis Options. Both first and post-professional degree students have the option of preparing a thesis or a project thesis. The project thesis option is typically chosen by students who desire to obtain a first professional degree and enter professional practice. The thesis option is optimal for post-professional degree students seeking greater research and theoretical opportunities and is particularly suited to a career in academia or public practice.

Admissions. Admission requirements are established by the Texas Tech University Graduate School. At this time, neither the Graduate School nor the Department of Landscape Architecture requires the GRE for admission. Application of both U.S. and international students may be made through the [Graduate School website](#).

In addition to the Graduate School requirements, the Department of Landscape Architecture requires: (1) a letter of intent addressing how an M.L.A. degree from Texas Tech will help the student achieve his or her goals and make a difference in the world, (2) two letters of reference, and (3) a digital portfolio in PDF format of graphic and/or creative works, including writing. Letters of reference should be from individuals who are familiar with the applicant's academic abilities and related professional experience. Transcripts should be official transcripts requested by the applicant to be sent directly from the granting institution to the Texas Tech University Graduate School. The digital portfolio PDF can include drawings, sketches, photography, images of landscape projects, creative writing, or any form of artistic and creative work that is of interest to the candidate and their future goals.

Graduate Course Descriptions**Landscape Architecture (LARC)**

- 5000—Landscape Architecture Graduate Internship (VI-6).** Optional 3-6 month full-time employment internship with licensed practitioner required to satisfy the minimum 3 credit hour requirement. Departmental approval required prior to experience.
- 5001—Special Problems in Landscape Architecture (VI-4).** Selected problems based on student's needs and interests not included in other courses. May be repeated for credit with approval of department.
- 5221—LA Modeling and Communication I (2).** Corequisite: LARC 5311. Introduction to digital and analog theory, application and dynamic, integrated workflows related to spatial and designed space models and narrative communication.
- 5222—LA Modeling and Communication II (2).** Prerequisites: LARC 5311, LARC 5221. Corequisite: LARC 5312. Digital and analog theory, application, and dynamic-integrated workflows in programmatic site design, landscape inventory and analysis involving landform, vegetation-planting, hardscape and landscape performance.
- 5223—LA Modeling and Communication III (2).** Prerequisites: LARC 5312, LARC 5222. Corequisite: LARC 5313. Digital and analog theory, application, and dynamic-integrated workflows to communicate programmatic design involving landscape systems (natural and social) analysis, synthesis and performance.
- 5224—LA Modeling and Communication IV (2).** Digital and analog theory, application, and dynamic-integrated workflows to communicate urban planning-design involving landscape systems (natural and social) analysis, synthesis and performance.
- 5225—LA Modeling and Communication V (2).** Digital and analog theory, application, and dynamic-integrated workflows to communicate regional planning-design involving landscape systems (natural and social) analysis, synthesis and performance.
- 5226—LA Modeling and Communication VI (2).** Digital and analog theory, application, and dynamic-integrated workflows to communicate synthetic planning-design process involving landscape systems (natural and social) analysis, synthesis and performance.
- 5302—Advanced Environmental Planning for Sustainable Development (3).** An introduction to environmental planning issues with emphasis on the integration of related disciplines to attain environmentally and socially sustainable development. F.
- 5310—History of Landscape Architecture (3).** Investigation of the issues, work, and personalities in landscape architecture as expressed through design and their relationship to and influence on society and nature. F.
- 5311—LA Graduate Design Studio I (3).** Corequisite: LARC 5221. Introduction to and application of spatial understanding, design theory and application, dynamic analog and digital workflows.
- 5312—LA Graduate Design Studio II (3).** Prerequisites: LARC 5311, LARC 5221. Corequisite: LARC 5222. Landscape understanding, design process, theory, dynamic analog-digital workflows in programmatic site design informed by inventory and analysis, and involving landform, vegetation, hardscape and landscape performance. S.
- 5313—LA Graduate Design Studio III (3).** Prerequisites: LARC 5312, LARC 5222. Corequisite: LARC 5223. Landscape systems suitability, vulnerability and performance theory applied in schematic design, design development concepts including materials, methods (circulation, grading, planting, drainage, water-balance) and details.
- 5331—LA Materials, Methods and Details I (3).** Landscape architecture: project management, construction methods (subdivision, horizontal-vertical alignment, stormwater, erosion, earthwork), materials (hardscape, structural, plant, soil), systems (circulation, utility), details in construction documentation, administration.
- 5332—LA Construction and Administration II (3).** Prerequisite: LARC 5331. Landscape architecture: project management, construction methods (layout, grading, planting, irrigation), materials (hardscape, structural, plant, soil), systems (hydrologic, irrigation, lighting, structural), details in construction documentation, administration.
- 5333—LA Construction and Administration III (3).** Prerequisite: LARC 5332. Landscape architecture: project management, construction methods (layout, grading, planting, irrigation), materials (hardscape, structural, plant, soil), systems (hydrologic, irrigation, lighting, structural), details in construction documentation, administration.
- 6000—Master's Thesis (VI-6).** Prerequisite: LARC 6203.
- 6001—Master's Project Thesis (VI-6).** An individual professional design project demonstrating comprehensive skills, synthesis of knowledge, and professional project management abilities developed during the study of landscape architecture.

- 6161—Landscape Architecture Seminar (1).** Critical readings, discussion and writing on a range of disciplinary and interdisciplinary planning, design, management, and environmental issues.
- 6203—Thesis Research, Preparation, and Organization (2).** Prerequisite: LARC 6363. Preparation of thesis project content, selection of the thesis committee, and the proposal submission to the Graduate Studies Committee for approval.
- 6302—Administrative Aspects of Landscape Architecture (3).** The methods, procedures, and organizational structure of professional practice in landscape architecture. F.
- 6306—Special Problems (3).** Prerequisite: Consent of instructor. Methods of interpretation of planning and designing projects that influence the historical, ethnic, and cultural aspects of a region.
- 6363—Research Methodology for Planning and Design (3).** Introduction to the research process and methods used in the design-planning field. F.
- 6414—Advanced Landscape Technology: Monitoring + Managing Change (4).** Examines landscape technologies, social choices that inform their design and adoption, and impacts on monitoring and managing landscape systems according to design objectives.
- 6415—Resilient Design in Landscape Architecture (4).** Specialization design studio engaged in research focusing on resilient landscape causes, effects, and design alternatives.
- 6416—Landscape for Learning (4).** Understanding the role of landscape architecture for improving learning environment qualities and applying knowledge in design and theory to maximize impacts of creating dynamic environments.
- 7000—Research (VI-12).**

Department of Natural Resources Management

The department offers Master of Science, Professional Science Masters, and Doctor of Philosophy degrees. Those interested in pursuing a graduate degree in the Department of Natural Resources Management should consult with a potential faculty advisor and the departmental chairperson.

Ranch Management, M.S.

The department of Natural Resources Management offers a non-thesis 36-hour master's degree in Ranch Management. This program is focused on providing students with a diverse education that supplies the tools needed to manage a diverse array of ranching enterprises, as well as other related occupations.

Wildlife, Aquatic, and Wildlands Science and Management, M.S.

The M.S. thesis program requires a minimum of 24 hours of graduate coursework plus 6 hours of thesis and 6 hours of research followed by successful defense of the thesis and final examination. The non-thesis degree requires a minimum of 36 hours of graduate coursework and a final examination. Before recommendation for candidacy to a master's degree program, students may be requested to take a preliminary examination to determine proficiency and background for graduate work. Students may be required to take (without graduate credit) such undergraduate leveling courses as may be designated by the graduate advisory committee.

Environmental Sustainability and Natural Resources Management, P.S.M.

Those interested in pursuing a P.S.M. degree with the Natural Resources Management option should consult with Dr. Kerry Griffis-Kyle, and the departmental chairperson prior to enrollment.

The Professional Science Master's (P.S.M.) degree is a two-year graduate degree designed to allow students who are already employed in a related profession to pursue advanced training while simultaneously developing valued business skills. The P.S.M. degree qualifies students for employment in the public or private sector and offers two options: (1) Natural Resource Management offered in the Department of Natural Resources Management and (2) Ecology and Environmental Sustainability taught through the Department of Biological Sciences within the College of Arts & Sciences.

The degree consists of 15 to 19 hours of required courses (including either a 6-hour internship or a 3-hour capstone course) plus 15 hours of elec-

tive courses. In addition, students will be required to complete a series of online workplace skills modules (e.g., economics, ethics, interviewing skills, human resource management, conflict management, team building). Students accepted into the program but found to be deficient in preparation for taking graduate courses will be required to take leveling courses. This primarily online P.S.M. degree differs from a conventional M.S. degree in requiring an internship or capstone experience in lieu of a research-based thesis. The degree is intended for those already employed in the environmental fields.

Wildlife, Aquatic, and Wildlands Science and Management, Ph.D.

Those interested in pursuing a Ph.D. degree in the Department of Natural Resources Management should consult with a potential faculty advisor and the departmental chairperson.

Doctoral candidates may focus their research in a variety of disciplines, including rangeland management, range improvement, range animal nutrition, fire ecology, plant ecology, plant ecophysiology, wildlife habitat management, game or nongame ecology, upland gamebird ecology, wildlife population ecology, geospatial analyses, environmental DNA, fisheries, or wetland ecology and management.

An oral and/or written preliminary examination is required of all students seeking a Ph.D. degree. If the preliminary examination reveals weaknesses in the student's background, remedial courses may be designated by the graduate advisory committee. The student's graduate advisory committee will also recommend courses to be taken in supporting disciplines. In accordance with the requirements of the Graduate School, a qualifying examination is prepared and administered by the candidate's graduate advisory committee and any other professors the committee may consider necessary.

The doctorate normally requires completion of 72, or more, semester credit hours of graduate coursework beyond the bachelor's degree, exclusive of credit for the dissertation. In addition to the courses required for the major, an applicant for the doctorate must have taken at least 15 semester hours of graduate coursework outside the department. These hours may be taken in supporting fields without concern for a minor specialization, depending on recommendation of the student's graduate advisory committee. However, if they are taken in a block of related courses, they may be declared as a minor.

There is no foreign language requirement for the Ph.D. degree, but such a requirement may be incorporated into individual programs at the discretion of the student's graduate advisory committee. All doctoral candidates must successfully complete or have completed one semester of experimental design (NRM 5403) and one semester of teaching practicum (NRM 7210).

Graduate Course Descriptions

Natural Resources Management (NRM)

- 5000—Professional Internship/Capstone (V1-6).** Provides essential supervised study and practical training in integrating coursework into real-world applications in professional work environments associated with natural resource careers.
- 5100—Seminar (1).** An organized discussion of current problems in range, wildlife, and fisheries management. May be repeated.
- 5201—Foundations of Ecology and Conservation Biology (2).** Examination of classic foundational papers in ecology and conservation biology, their influence in these fields, and their relevance to current research.
- 5302—Range Research Methods (3).** Prerequisite: C or better in ISQS 5346. Study plan preparation; methods of studying vegetation; sampling techniques; increasing sampling efficiency; methods of reducing experimental error; grazing studies; utilization studies; wildlife techniques; and tests of goodness of fit for binomial, poison, negative binomials, and normal distributions. F, odd years.
- 5303—Synecology (3).** An advanced study of terrestrial plant community ecology; mechanisms and consequences of species coexistence; diversity relations; causes and patterns of community development; community dynamics. Statistical and numerical analyses applicable to community ecology are discussed.

- 5304—Fire Behavior and Ecology (3).** Prerequisite: Instructor consent. An assessment of the role of fire in succession and management of plants and animals in all major vegetation types of U.S. and Canada; effect of fire on litter and soil properties; fire temperatures and heat effects. Field trips required. S, odd years, F.
- 5305—Plant Ecophysiology (3).** Prerequisite: Instructor consent. Advanced study of the influences of the environmental complex on the processes, structure, and physiological functioning of an individual plant or species. S, even years.
- 5306—The Physiological Basis for Grazing Management (3).** A study of the physiological processes, morphological development, nutritional qualities, and palatability of range plants as a basis for grazing management strategies for domestic and wild animals. Field trips required. F, even years.
- 5307—Wetland Ecology (3).** Prerequisite: Instructor consent. Advanced study in the ecology and management of wetland ecosystems. F, odd years.
- 5308—Advanced Restoration Ecology (3).** Advanced study of restoring damaged ecosystems. Explores the history, practice, and theory of restoration ecology through case studies, literature, and hands-on experience. S, even years.
- 5309—Population Estimation and Dynamics (3).** Prerequisite: Instructor consent. Principles of estimation theory. Detailed examination of modern analysis techniques; indices, line transect, capture-recapture, Jolly-Seber, survival, and life table limitations. Computer use. S.
- 5310—Advanced Range Ecology (3).** An examination of the basic ecological principles affecting plant growth and development, distribution of plants, community structure and dynamics, and nutrient cycling. Field trips required. F.
- 5311—Wildlife Conservation and Management (3).** An examination of conservation principles and management practices enhancing wildlife populations.
- 5312—Ecology of Renewable Natural Resources (3).** An introduction to the ecology of renewable natural resources such as vegetation, wildlife, soil, and water.
- 5313—Advanced Big Game Ecology and Management (3).** An advanced study of the ecology and management of big game resources. Field trips required. S, even years.
- 5314—Advanced Upland Game Ecology and Management (3).** An advanced study of the ecology and management of upland game resources. Field trips are required. S, odd years.
- 5315—Advanced Studies in Range-Wildlife Habitat (3).** An ecological approach to wildlife management stressing the relationships between animals and their habitat. Focuses on rangeland habitats. Field trips required. F.
- 5316—Waterfowl Ecology (3).** An ecological examination of waterfowl behavior, breeding biology, and habitat requirements. Field trips required. F, even years.
- 5317—Watershed Management (3).** Management concepts of watersheds as a holistic unit. Inventory techniques, information sources, analysis procedures, and economic and financial effects applicable to watershed management planning. F, S.
- 5318—Range Animal Nutrition (3).** Prerequisite: Instructor consent. Study of the nutritional relationship between the range resource and grazing herbivores, including domestic livestock and wild ungulates, and techniques for range animal nutrition research. F, odd years.
- 5319—Mammalian Predator-Prey Relationships (3).** Examines evolution of predator-prey relationships and historical and current management practices. Only for NRM, ANSC, or BIOL graduate students.
- 5320—Natural Resource Biopolitics (3).** Policy, planning, and conflict resolution from a natural resource management perspective. Historical, agency, and private organization roles in natural resource management are evaluated. F.
- 5321—Wetland Management and Policy (3).** Examination of the history and current events in wetland management and policy, including training in skills such as communicating across political divides and wetland delineation.
- 5322—Advanced Nongame Ecology and Management (3).** Ecological approach to nongame wildlife population management. Public policies, socioeconomic factors, population dynamics, and species-at-risk issues are examined.
- 5323—Prescribed Burning (3).** Planning, implementing, evaluating prescribed fires, and expert systems. Field trips required. S.
- 5324—Physiological Ecology of Aquatic Organisms (3).** Regulatory mechanisms and adaptive significance of selected physiological processes in aquatic vertebrates. S, even years.
- 5325—Raptor Ecology and Conservation (3).** Provides an introduction to North American raptors, their biology, physiology, life history, ecology, management, and conservation.

- 5330—**Advanced Aquaculture (3)**. Prerequisite: Instructor consent. A global overview of aquaculture including fish, aquatic invertebrates, plants, and design and operation of production facilities. F, odd years.
- 5335—**Advanced Freshwater Bioassessment (3)**. Prerequisite: Instructor consent. Overview of methods used to evaluate the condition of waterbodies, including surveys and other direct measurements of aquatic species attributes and habitats.
- 5336—**Field Ichthyology (3)**. Prerequisite: Instructor consent. Distribution, life history, and habitat associations of Texas freshwater, estuarine, and marine fishes. Emphasizes field identification and collection methods. Field trips required.
- 5337—**Fish and Wildlife Population Modeling (3)**. The development and use of models to analyze and simulate ecological processes in fish and wildlife populations and communities.
- 5340—**Graduate Studies in Urban Ecology and Human Dimensions (3)**. Prerequisite: Instructor consent. An introduction to urban ecology, human dimensions of natural resources, and urban wildlife management. Case studies, policies, socioeconomic factors, and ecosystem function are examined.
- 5347—**Advanced Conservation Science (3)**. Prerequisite: Instructor consent. A survey of the theory and practice of conservation biology for advanced students.
- 5401—**Advanced Fisheries Conservation and Management (4)**. Prerequisite: Instructor consent. Theory and practice regarding the conservation and management of aquatic resources, including ecology, population biology, sampling, restoration, and resource conflict.
- 5402—**Fisheries Ecology (4)**. Prerequisite: Statistics and basic fisheries. An examination of population dynamics, community ecology, bioenergetics, fisheries models and other quantitative aspects of fisheries ecology.
- 5403—**Experimental Design and Analysis (4)**. Prerequisite: PSS 5302 or ANSC 5403 or BIOL 6309 or STAT 5302 or equivalent basic graduate statistics course. Principles and applications of experimental design and analysis (completely randomized designs, randomized blocks, covariance analysis, factorials, split plots, repeated measures, regression).
- 5404—**Aerial Terrain Analysis (4)**. Exploration of methods, the utilization of techniques, and evaluation of landscape using aerial photographs. An introduction to the theories, technical and practical aspects, and considerations of computer based geographic information systems in landscape planning, design, and management.
- 5405—**Advanced Drone Piloting (4)**. Students in this course will pilot uncrewed aerial systems, review principles of remote sensing, and prepare to pass the Federal Aviation Administration Part 107 exam. [NRM 4405]
- 6000—**Master's Thesis (V1-6)**.
- 6001—**Selected Topics in Range Science (V1-6)**. Advanced topics selected by departmental recommendation. May be repeated for credit in different subject areas.
- 6002—**Selected Topics in Wildlife Science (V1-6)**. Advanced topics selected by departmental recommendation. May be repeated for credit in different subject areas.
- 6003—**Selected Topics in Fisheries Science (V1-6)**. Advanced topics selected by departmental recommendation. May be repeated for credit in different subject areas.
- 6204—**Advanced Statistical Applications in Ecology (2)**. Prerequisite: NRM 5403 or equivalent. Provides a foundation in generalized linear models as applied to ecological problems.
- 6301—**Research Methods (3)**. A review of the philosophy of science, scientific methods, research activities, and the planning and execution of research programs.
- 6302—**Natural Resource Professionalism (3)**. Understanding and application of workplace professionalism; field, animal and office ethics; Texas Tech procedural trainings; inter- and intra-communication training. SS.
- 6303—**Imagery Interpretation for Natural Resource Management (3)**. An advanced course in the applications of imagery producing systems for use in the inventory, analysis, planning, and management of natural resources. Involves the use of satellite imagery, infrared and radar scanning systems, as well as advanced work in interpreting standard aerial photography. S.
- 6305—**Geospatial Technologies in Natural Resource Management (3)**. Principles of geographic information systems and global positioning systems. Applications for natural resource inventory, planning, and management are emphasized.
- 6323—**Wildland Fire Management Practicum (3)**. Prerequisite: NRM 3323 or NRM 5323. Advanced prescribed burning field training in diverse field settings. Practitioners and students will work together to accomplish management objectives.
- 6324—**Advanced Tropical Ecology and Conservation (3)**. Prerequisite: Instructor consent. A survey of tropical ecology for advanced students. Both theory and practice will be covered. Field trips required. F.

- 6326—**Advanced Range Improvements (3)**. Application of principles and practices to enhance productive potential of range resources. Improvement for increased domestic livestock production and for enhancing wildlife habitat is emphasized. [NRM 4302]
- 6330—**Plant Ecohydrology (3)**. Vegetation factors affecting hydrological dynamics of landscapes and water uses by different types of vegetation. Implications to land and vegetation management at multiple levels.
- 6408—**Advanced Biometry for Ecologists (4)**. Provides a foundation for design and analysis of both natural and intentionally manipulated experiments, within the context of research in environmental biology, ecology, and natural resources.
- 7000—**Research (V1-12)**.
- 7210—**Teaching Practicum (2)**. Prerequisite: Doctoral student in the Department of Natural Resources Management. Supervised teaching experience at the university level.
- 8000—**Doctor's Dissertation (V1-12)**.

Department of Plant and Soil Science

The department offers a Master of Science in Horticulture Science (available online); a Master of Science in Plant and Soil Science (available online) with concentrations in crop protection, crop science, fibers and polymers, and soil science; and a Doctor of Philosophy in Plant and Soil Science.

Horticulture Science, M.S.; Plant and Soil Science, M.S.

Before being recommended for admission to a master's degree program with a major in this department, students may be requested to provide evidence of proficiency in background for graduate work or may be required to take (without graduate credit) such undergraduate leveling courses as may be designated by the department.

Master of Science degree students may pursue either the thesis or non-thesis option. The thesis option (24 hours of graduate coursework plus 6 hours of thesis) is designed for students who intend to pursue a Ph.D. An oral exam over the research is required for the thesis option. The non-thesis option (36 hours of graduate coursework) is considered a terminal degree. An oral exam is required during the graduating semester for the non-thesis option.

These degrees are available at a distance; they require a minimum of 36 hours of graduate coursework without a thesis. Students must take the last 6 semester credit hours from Texas Tech, and an oral exam is required during the semester of graduation.

For the Plant and Soil Science, M.S., students in the thesis program can focus on one of the program's disciplinary concentrations that include (1) Crop Protection; (2) Crop Science; (3) Fibers and Biopolymers; (4) Plant Genetics, Breeding, and Biotechnology; and (5) Soil Science. The non-thesis option is considered a terminal degree.

Plant and Soil Science, Ph.D.

The doctoral program in Plant and Soil Science requires 60 semester hours of graduate coursework beyond the baccalaureate degree and 12 dissertation hours for a minimum total of 72 credits. Doctoral students may pursue one of the program's disciplinary tracks that include: (1) Crop Protection; (2) Crop Science; (3) Fibers and Biopolymers; (4) Horticulture; (5) Plant Genetics, Breeding, and Biotechnology; and (6) Soil Science. The track should be chosen at the time of the preliminary examination. If the preliminary examination for admission to doctoral studies reveals weaknesses in the student's subject matter background, the student may be required to take remedial courses designated by the graduate faculty of the department. The student's advisory committee will make recommendations concerning language requirements and basic work in other sciences.

A Ph.D. candidate in the department is required to take written and oral comprehensive qualifying examinations prepared and conducted by the graduate committee. The purpose of these examinations is to determine whether the candidate possesses a depth of knowledge in the track they are following, a breadth of knowledge in supporting areas, an understanding of the scientific method, and the ability to communicate knowledge in an organized and scholarly manner.

Research, teaching, and scholarship stipends are often awarded to qualified applicants. Nonresident tuition is often waived with the award. Students receiving this support have special responsibilities in research and/or teaching.

Graduate Course Descriptions

Plant and Soil Science (PSS)

- 5000—Professional Internship (V1-6).** Prerequisite: Consent of department chairperson. Supervised study providing advanced training for master's students. Emphasis is on scientific and technical training.
- 5001—Problems in Plant and Soil Science (V1-3).** Prerequisite: Consent of instructor. Selected problems based on the student's needs and interests, not included in other courses. May be repeated for credit with approval of department.
- 5100—Seminar (1).** Current research in all aspects of plant and soil science including presentations by internationally recognized scientists. May be repeated for credit. F, S.
- 5231—Applied Geostatistics (2).** Application of regionalized variable theory to surface and subsurface land forms using semivariograms and kriging. S, odd.
- 5232—International Agronomic Development (2).** Overview of world food situation. Role of assistance programs and international and national research centers in the development of agronomic research and outreach for developing countries. F, even.
- 5301—Advanced Genetics (3).** Prerequisite: BIOL 3416 or a C or better in PSS 3421. Examines the complex principles and applications of modern genetics. F, even.
- 5302—Statistical Applications in Natural Resources (3).** Introduction to statistical concepts and overview of statistical methods as applied to current research issues in plant and soil science and natural resource management. S.
- 5303—Host Plant Resistance to Arthropod Pests (3).** Applied co-evolution aspects of plant-insect interactions. Covers developmental, physiological and behavioral aspects of arthropod-plant interactions. F (odd).
- 5307—Pesticides (3).** Advanced study of the registration, development, and legal use of pesticides. S, even.
- 5312—Vineyard Management (3).** Prerequisite: C or better in PSS 3310 or consent of instructor. Application of advanced knowledge of viticultural principles to the management of commercial vineyards. S, On campus, even; Distance, odd.
- 5314—Turf and Ornamental Pest Management (3).** Prerequisite: C or better in PSS 3309 or consent of instructor. Advanced study of biology, identification, and control strategies of common turf and ornamental pests (weeds, diseases, insects) found throughout the United States. S, even.
- 5316—Advanced Arboriculture (3).** Advanced principles associated with anatomical, physiological, and chemical changes in woody plants. S, even.
- 5317—Management and Entrepreneurship of Horticultural Operations (3).** Familiarizes students with elements of marketing products, revenue streams, personnel management, day-to-day production, and entrepreneurship principles found within the horticultural industry. [PSS 4314] F, even.
- 5318—Advanced Turfgrass Physiology and Ecology (3).** Prerequisite: C or better in PSS 3309 or consent of instructor. Interaction between turfgrass and the environment. Focus on turfgrass adaptation and tolerance to environmental and mechanical stress. S.
- 5319—Advanced Interiorscaping (3).** A tropical foliage plant course for graduate students with no previous training in interiorscaping. Emphasis is placed on plant identification, selection, design, lighting and maintenance. F, odd.
- 5320—Sustainable Crop Production Concepts (3).** Focuses on comprehensive strategies and techniques addressing current agricultural issues that form the basis for sustainable, organic farming systems. [PSS 4320]
- 5321—Plant Breeding Theory (3).** Prerequisite: C or better in PSS 3421. Breeding and plant improvement presented at an advanced level. S, even.
- 5322—Organic Farming Practices (3).** Discusses multifaceted management practices and biological processes that form the basis for organic farm production systems. [PSS 4323]
- 5323—Environmental Crop Physiology (3).** The plant-environment interaction in relation to growth and production of crop communities. Radiant energy, carbon dioxide, water, and temperature relationships in crop stands. F, odd.
- 5324—Mode and Mechanism of Herbicide Action (3).** Prerequisite: Consent of instructor. Herbicide classification, activity, crop selectivity, and resistant plants. S; On campus, odd; Distance, even.

- 5325—Plant Genetic Engineering (3).** Genome organization in plants, inter-specific hybridization, cytoplasmic male sterility, self-incompatibility, tissue culture, in-vitro screening, and transformation technologies. S.
- 5326—Advanced Seed Science (3).** In-depth study of seed and seedling anatomy, the sequence of events and factors affecting germination and emergence, and the characteristics of dormancy and vigor. S, even.
- 5328—Forages and Livestock in Pasture Ecosystems (3).** Systems of grazing management are presented from the perspective of ecosystems in pasture lands and other grazing lands with intensified management. S.
- 5329—Precision Agriculture (3).** Introduction to site-specific management of agricultural crops emphasizing collection and use of geospatial information in performing variable-rate farming practices. F, even.
- 5330—Advanced Environmental Soil Chemistry (3).** Prerequisite: C or better in PSS 2432. Chemistry of inorganic and organic soil components with emphasis on environmental significance of soil solution-solid phase equilibria, sorption phenomena, ion exchange processes reaction kinetics, redox reactions, and acidity processes. S.
- 5331—Advanced Plant Nutrient Management (3).** Prerequisite: C or better in PSS 2432. Evaluation and application of theory to plant nutrient management; a study of nutrient needs and nutrient reactions in soil; and predicting nutrient need and response. F.
- 5334—Soils and Crops in Arid Lands (3).** Potentials for utilizing soils, rainfall patterns, and plant characteristics for crop production in arid lands. F, odd.
- 5335—Soil Physics (3).** Physical characteristics of soils and porous media and principles underlying flow and distribution of water, air, and heat in soils. S.
- 5336—Soil Mineralogy (3).** The mineralogical makeup of sand, silt, and clay. The relation of physical and chemical soil properties to mineralogy. S, even.
- 5337—Advanced Soil Classification (3).** A study of the taxonomic System of Soil Classification as used in the United States. F, even.
- 5351—Environmental Instrumentation and Measurements (3).** Setting up and programming a data logger to collect environmental measurements related to soil, atmosphere, and plant conditions using a variety of sensors. S.
- 5370—U.S. and Global Cotton Fiber-Textile Industries (3).** Examination of factors affecting cotton production, processing, marketing, and utilization as an industrial raw material for textile manufacturing. F.
- 5371—Structure and Functionalization of Cotton Fibers (3).** Fundamental understanding of the structure of cotton fibers and their characterization. Presents techniques used to functionalize the cotton fabric to create "smart" textiles. S, even.
- 5373—Biopolymers and Bioproducts (3).** Prerequisite: Consent of instructor. Focuses on the chemistry of biopolymers and their transformation to bio-based products. S, odd.
- 5375—Application of Green Chemistry Principles Toward Manufacture of Bio-based Products (3).** Prerequisite: PSS 5373 or consent of instructor. Course will focus on application of green chemistry principles for conversion of biomass into bioproducts.
- 5376—Advanced Studies in Cotton Fiber (3).** Examination of the structure of cotton fibers, meaning and measurement of fiber properties, and issues related to increasing cotton's use-value as an industrial raw material. Offered every 8 months.
- 5380—Advanced Strategies for Learning in Data-Driven Agricultural Research (3).** Prerequisite: PSS 5302 or equivalent. Provides students an introduction to tools and strategies useful for developing a data driven scientific investigation in an agricultural research setting.
- 5415—Advanced Greenhouse Crop Production (4).** Prerequisite: Consent of instructor. Greenhouse construction, heating, cooling, growing media, pest management, nutrition, fertility, growth regulation, irrigation, post-harvest handling, marketing greenhouse crops. Required field trips.
- 5416—Advanced Winemaking (4).** Prerequisites: CHEM 1107, CHEM 1108, CHEM 1307, CHEM 1308; PSS 1311, PSS 2314; FDSC 3301 or MBIO 3400 (may be taken concurrently). Advanced winemaking quality control and analysis.
- 5421—Genetically Modified Crops (4).** Prerequisite: BIOL 3416 or C or better in PSS 3421. Examines the contemporary methods and genetic principles of plant biotechnology and the commercialization of genetically modified plants. S, odd.
- 5425—Advanced Agricultural Plant Pathology (4).** Prerequisite: Consent of instructor. Identification of causal agents of plant diseases (fungi, bacteria, nematodes, and viruses). Emphasis will be placed on diagnostic methods, isolation, and inoculation. Not open to students who have taken PSS 4315.
- 5429—Advanced Principles of Weed Science (4).** Prerequisite: Consent of the instructor. Weeds, weed control, plant identification, and equipment presented at an advanced level.

6000—Master's Thesis (V1-6).

6001—Selected Topics in Plant and Soil Science (V1-3). Prerequisite: Consent of instructor. Individual study of advanced topics in plant and soil science. May be repeated in different areas for credit.

6301—Quantitative Agricultural Remote Sensing (3). A general course in the theory and application of remote sensing to quantifying soil and vegetation characteristics relevant to agriculture and natural biosystems. S, odd.

6302—Plant Growth Modeling (3). Development, testing, and application of mathematical models of plant growth relevant to agriculture and natural biosystems. F, even.

6315—Mycorrhizal Symbiosis (3). Study of mycorrhizal fungi and their ecology. Types of mycorrhizal associations and their functional implications for plant growth and ecosystem functioning. F, odd.

6318—Plant Science Research Methods (3). Development of scientific questions, associated hypotheses, experimental design. Synthesis of results, constructing and expressing logical arguments, problem-solving skills, and time management will be emphasized.

6321—Principles and Applications of Synthetic Biology for Crop Improvement (3). Prerequisite: Instructor consent. Engineering and biological principles and concepts applied for the design and implementation of genetic circuits in the context of crop genetic improvement.

6322—Advanced Plant Breeding (3). Qualitative and quantitative inheritance, heterosis, selection theory and breeding methodology for crop plant improvement, genotype by environment interaction, and application of cellular and molecular techniques to plant breeding. S, odd.

6323—Plant-Water Relations (3). Comprehensive understanding of biophysical factors affecting water status of plant tissue and resultant physiological responses. S.

6324—Genomics I: Foundational Genomics (3). Provides an overview of genomics (trait mapping for genetic improvement, comparative, bioinformatic, and evolutionary analysis) on plant, human, animal, and microbial biology.

6325—Epigenetic Mechanisms (3). Prerequisite: Instructor consent. Non-Mendelian phenotypes explained by mechanisms involving histone modification, chromatin remodeling, DNA methylation, regulatory non-coding RNA molecules, genomic imprinting, paramutation and transposable elements.

6326—Genomics II: Genomic Applications (3). Prerequisite: PSS 6324. Covers advanced topics in population genomics, with an emphasis on the latest technologies and analytical methods used in the field.

6327—Advanced Forage Science (3). Prerequisite: PSS 5328 or instructor permission. Presents forage plant development, nutritional limitations, mineral cycling, dynamics of grazing, and research methodology in forage-livestock systems. S, even.

6331—Advanced Environmental Soil Science (3). Prerequisite: C or better in PSS 2432. Applications of soil chemical, physical, and biological principles to environmental issues. Applications of soil chemical, physical, and biological principles to environmental issues.

6332—Advanced Soil Microbial Ecology (3). Study of soil biota, emphasizing soil microorganisms' ecology, physiology, and biochemical functions. S (odd).

7000—Research (V1-12).

8000—Doctor's Dissertation (V1-12).

Department of Veterinary Sciences

The department offers a Master of Science in Animal Health and Industry.

Animal Health and Industry, M.S.

The Master of Science with a major in Animal Health and Industry objective is to provide students with knowledge and skillsets to design strategies to mitigate the detrimental impacts of health issues in the livestock industry. This will include the identification of major health issues in animal industries, analysis, and interpretation of epidemiological data, and communication with stakeholders.

This degree is the first of its kind to be established to fill the niche between a bachelor's degree and a Doctor of Veterinary Medicine. The degree offers both face-to-face and at a distance option thus allowing students from across the United States to complete the degree program. The allied industries and the Animal Health field are remarkably diverse. The flexibility of this degree program provides students with options to meet their individual learning objectives.

The Master of Science in Animal Health and Industry required courses will provide students with a practical knowledge base to prevent, identify

and interpret data collected in the workplace setting and develop strategic plans to implement in the care of livestock animals. The prescribed elective courses will offer students the opportunity to learn the communication and business analysis skills necessary to work in the industry at the local and international marketplace level while allowing the flexibility to tailor their degree program to meet the individual needs of each student and their career goals.

Admission Requirements.

- Acceptance and approval of the Graduate School
- A four-year undergraduate degree in an area that will provide an adequate background to successfully undertake graduate studies in Animal Health and Industry
- A minimum GPA of 3.0
- A Test of English as a Foreign Language (TOEFL) score of 80 or above is required for international applicants
- A one-to-two-page personal narrative statement reflecting the applicant's background, career goals, and how the program will help to achieve those goals
- Official Transcripts
- At least two letters of recommendation
- Interview with program representatives
- Program may be started any semester
- Completion of an official Degree Plan by the end of the students first semester of coursework

Non-Thesis Option (30 credit hours).

- Required Courses (18 hours): VSCI 5403, 5320, 5313, 5301, 5302, 5100 (1st semester), 5100 (2nd semester)
- Prescribed Electives (6 hours): ACOM 5304, 5305, 5306; AAEC 5310, 5312, 5318, 5319, 5320, 5325; AGLS 5304, 5305, 5306, 5307; AGED 5301; additional/alternate electives may be approved by academic advisor
- Electives/Internship/Capstone (6 hours): VSCI 5000, 5001
- Comprehensive exam upon completion of coursework

Thesis Option (30 credit hours).

- Required Courses (12 hours): VSCI 5403, 5100 (1st semester), 5100 (2nd semester), and two courses from: VSCI 5320, 5313, 5301, 5302
- Free Elective Courses (6 hours): Collaborating with their advisor, the student will choose 6 hours of elective courses relative to their area of study and interest
- Thesis and Research Courses (12 hours): VSCI 6000 (6 hours required), 7000 (6 hours required)

Graduate Course Descriptions

Veterinary Sciences (VSCI)

5000—Animal Health and Industry Internship (V1-6). Prerequisite: Instructor consent. Supervised study providing advanced training for (nonthesis) students. Emphasis is on practical application of skills.

5001—Special Problems in Veterinary Sciences (V1-6). Prerequisite: Instructor consent. Designed for graduate students to work on a supervised independent study in Veterinary Sciences related subject matter.

5100—Animal Diseases - Seminar (1). Graduate students will gain experience by examining principles of interpreting scientific data, analysis of scientific writing, and effective communications within the animal health industry.

5301—Principles and Application of Epidemiologic Methods in Veterinary Sciences (3). Designed for graduate students interested in learning basic principles of epidemiology and their application to studies in the veterinary/animal sciences.

5302—Animal Diseases in Livestock (3). Teaches about major diseases that affect ruminants and swine. Topics include cellular and tissue mechanisms leading to specific diseases, their etiology, diagnosis, pathology, prevention, treatment, and the implications in livestock production.

5304—Application of Immunology in Animal Health (3). Covers immunological concepts and their applications in animal health, providing a solid foundation for further specialization and practical understanding through lectures and research analysis.

5313—Nutritional Biochemistry in Animals (3). Nutrient metabolism and regulation in animals. Course integrates metabolic pathways with nutrition and physiology. [ANSC 5313]

5320—Basic Concepts in Endocrinology (3). Develops general understanding of medical endocrine physiology, focusing on the integrative and

regulatory roles of the endocrine system and incorporating information regarding underlying cellular and molecular mechanisms. [ANSC 5320]

5403—Biometry (4). Introduction to biological statistics. Observations, probability, “t” test, analysis of variance, mean separation procedures, linear regression, and correlation, and chi-square. Introduction to computerization of statistical analyses. [ANSC 5403]

6000—Master’s Thesis - Animal Health and Industry (VI-6). Prerequisite: Instructor consent. Designed for graduate students pursuing a Master of Science Thesis Option in Veterinary Sciences. Those students will be required to take at least 6 credit hours while writing their master’s thesis to graduate.

7000—Research - Animal Health and Industry (VI-6). Prerequisite: Instructor consent. Designed for graduate students when completing research on Veterinary Sciences related subjects.

Graduate Certificates

Agribusiness

This 12-hour graduate certificate offers professionals post-baccalaureate level training options in applied economics and business topics relevant to the agribusiness industry. Specifically designed for professionals who wish to improve their analytical skills and/or assume managerial responsibilities in the agribusiness sector. The graduate certificate includes 6 hours of core courses (AAEC 5312 and AAEC 5325) and 6 elective hours from graduate-level AAEC courses and may be completed fully online.

Agricultural Communications Leadership

The 12-hour Graduate Certificate in Agricultural Communications Leadership enables individuals working in agricultural communications professions to increase their understanding of the more complex and dynamic communication strategies such as crisis communications, knowledge management, and effective online media utilization. It increases students’ understanding of leadership and the people with whom they interact on a daily basis, enabling them to perform their professional duties more effectively and efficiently.

- Required (choose three courses from): ACOM 5304, 5305, 5308; AGLS 5302
- Elective (choose one course from): AGLS 5304, 5305, 5306, 5307

Contact: Dr. Todd Brashears | todd.brashears@ttu.edu

Agricultural Leadership

The 12-hour Graduate Certificate in Agricultural Leadership will enable individuals working in any sector of the agricultural industry to develop an understanding of theoretical leadership principles as well as the basics of applying leadership techniques to groups in a variety of situations.

- Required: AGLS 5304, 5305, 5306, 5307

Contact: Dr. Todd Brashears | todd.brashears@ttu.edu

Crop Protection

The 13-hour Graduate Certificate in Crop Protection provides supplementary training and updated credentialing in the development of crop protection chemicals.

- Required: PSS 5307, 5429
- Electives: PSS 5318, 5323, 5415, 6323, 6331

Contact: Dr. Peter Dotray | 806.834.3685 | peter.dotray@ttu.edu

Fibers and Biopolymers

The 12-hour Graduate Certificate in Fibers and Biopolymers provides professionals an opportunity to understand the meaning and complexity of cotton production and processing and its impact on cotton apparel, home furnishings, and industrial cotton products.

- Required: PSS 5371, 5373, 5376
- Electives: PSS 5001, 5370, 6001

Contact: Dr. Nouredine Abidi | 806.834.1221 | nouredine.abidi@ttu.edu

Global Food Security

The 12-hour Graduate Certificate in Global Food Security (GFS) is an interdisciplinary program offered by the International Center for Food Industry Excellence that enables individuals to increase their understanding of the interdisciplinary issues related to the approaching global crisis of food insecurity as the world surges toward more than 9 billion people by the year 2050. The program follows recommendations from the Food and Agriculture Organization of the United Nations for increased education within the four pillars of food security: Availability, Access, Stability, and Utilization. This program will help increase students’ understanding of various aspects of GFS while allowing the flexibility to focus instruction in one of the four defined pillars. Courses are offered in a face-to-face or distance format by several departments within the university including Agricultural Education and Communications, Agricultural and Applied Economics, Animal and Food Sciences, Nutritional Sciences, and Plant and Soil Sciences. For more information, contact Dr. Todd Brashears in the Department of Agricultural Education and Communications, the administrative department for the program.

Horticultural Landscape Management

Because industry trends in recent years have left many professionals seeking supplementary training, the graduate certificate in Horticultural Landscape Management provides industry professionals an opportunity to update their credentials. The 13-hour graduate certificate addresses a growing need in the Texas green industry (one of the largest agricultural industries in Texas).

- Required: PSS 5316, 5429
- Electives: PSS 5307, 5317, 5318, 5324, 5331, 5415, 6301, 6331; LARC 6302

Contact: Dr. Thayne Montague | 806.834.7311 | thayne.montague@ttu.edu

Soil Management

The 12-hour Graduate Certificate in Soil Management allows potential soil scientists to obtain the required number of college soils credit hours required by the Natural Resources Conservation Service (NRCS) and have a tangible certificate to indicate that the individual has the requisite education.

- Courses Required*: PSS 5331, 5335, 5336
- Optional Courses*: PSS 5330, 5334, 5337, 6327, 6331, 6332

Total Hours: 12†

** All prerequisites must be met prior to taking each course or consent from the instructor.*

† For those seeking this certification to satisfy requirements by the NRCS of the United States Department of Agriculture (USDA), one additional 3-hour course is needed because NRCS requires 15 credit hours.

Graduate Minors

Agribusiness

The graduate minor in Agribusiness is designed to provide graduate students training on business and economics methods to analyze agribusiness enterprises. The minor includes 6 hours of core courses (AAEC 5312 and AAEC 5325) and 9 elective hours from graduate-level AAEC courses.

Agricultural and Applied Economics

The graduate minor in Agricultural and Applied Economics is intended for students interested in complementing their training in their field of study with knowledge about the application of economic methods for the study of production, distribution, and consumption of commodities and resources. The minor includes 6 hours of core courses (ECO 5311 and AAEC 5307) and 9 elective hours from graduate level AAEC courses.

Faculty

Professors: Aranha, Ellis, Flueckiger, Haq, Kripa

Associate Professors: Buelinckx, Cricchio, Hadighi, McReynolds, Mostafavi, Mueller, Park, Raab, Zugay

Assistant Professors: Arja, He, Hunt, Ke, Khairnar, Maher, Mehan, Qiu, Turturo

Visiting Assistant Professors: Hayes, Klieopatinon, Robles

Instructors and Lecturers: Anaya, Ask, Barajas, Bradshaw, Drennan, Gandara, Gonzalez-Cervantes, Jaddo, Johnson, McGlone, Natividad, Phillips, Pittman, Plunket, Roop, Soderberg-Esper, Stephens, P. Velazquez, S. Velasquez, Wade, Washington, Wier

About the College

Architecture bridges the sciences with the arts. Students who succeed in architecture are balanced individuals who can manage the rigor of the rational and the ambiguity of the intuitive. In addition to the degree program in architecture, the Huckabee College of Architecture offers dual programs with the Whitacre College of Engineering and the Rawls College of Business. Students can pursue career paths in design, construction, real estate development, product development construction, and sales. The general architecture curriculum also provides an excellent portal into the university with coursework that is specific not only to the field but also fulfills the core curriculum of the university.

Mission Statement. Texas Tech University Huckabee College of Architecture aspires to advance the knowledge, discipline, and practice of architecture through innovation, creative teaching, research, regional and global engagement, and scholarship. Our curriculum builds upon the needs of a changing world by looking at the method of integrating technology within our design studios, introducing history and theory at an earlier level to invigorate the worldliness and capacity of our students, reinforcing new ways to teach structures and construction techniques, and creating a new study abroad program that will help our students engage the world. Our architecture program has been known to provide our students with the best knowledge and tools to facilitate their transition seamlessly into practice. The college is keeping this as part of our goals in the process of invigorating the curriculum where our students become exposed to the cutting-edge technologies and advances in the discipline and practice of architecture.

Admission. The undergraduate architecture program has two components: general architecture and pre-professional architecture. Admission to the general architecture program is open to all students admitted into the university. Admission into the pre-professional program in the second year is competitive and based on a comprehensive review of the student's portfolio, written exam, grade point average, and completion of all first-year architecture courses with a minimum grade of C-.

Requirements for Licensure as an Architect. Becoming a licensed architect is a three-step process. Students must receive an accredited degree in architecture that has been approved by the National Architectural Accreditation Board (NAAB) (www.naab.org), successfully complete an internship with licensed architect(s), and pass the Architect Registration Examination (ARE) (www.ncarb.org). The accredited program at Texas Tech University includes three components: general architecture, pre-professional, and professional. The general and pre-professional programs are undergraduate programs, while the accredited professional degree is the Master of Architecture.

Degree and Certificate Programs

The Huckabee College of Architecture offers programs leading to the following degrees and certificates:

- Bachelor of Science in Architecture
- Undergraduate Certificate in Architectural Digital Media
- Undergraduate Certificate in Ecological Architecture and Design (Main campus only)
- Undergraduate Certificate in Historic Preservation and Conservation (El Paso campus only)
- Master of Architecture (M.Arch., NAAB accredited professional degree)
- Master of Science in Architecture with concentration in Design, Computation and Fabrication
- Master of Science in Architecture with concentration in Urban and Community Design
- Master of Science in Architecture with concentration in Health and Wellness Design
- Master of Science in Architecture with concentration in Historic Preservation (El Paso)
- Graduate Certificate in Design, Computation, and Fabrication
- Graduate Certificate in Ecological and Sustainable Design
- Graduate Certificate in Health Care Facilities Design
- Graduate Certificate in Health and Wellness Design
- Graduate Certificate in Historic Preservation
- Graduate Certificate in Land Arts of the American West
- Graduate Certificate in Urban and Community Design Studies

Dual Degree Programs

- Bachelor of Science in Architecture / Bachelor of Business Administration (General Business)
- Bachelor of Science in Architecture / Bachelor of Science in Civil Engineering
- Master of Architecture / Master of Business Administration

Undergraduate Programs

Architecture, B.S.

Program Description. The Bachelor of Science in Architecture consists of 124 credit hours of undergraduate courses. The B.S. in Architecture degree will give students knowledge of and career opportunities in architecture, the building industry, and related fields. This also prepares students to continue into the master's degree program to obtain an accredited professional degree.

Transfer Courses. All transfer coursework taken at any other institution must receive evaluation and approval from the Huckabee College of Architecture. The student must provide sufficient evidence of equivalency. No course with a grade less than a C will be accepted.

Transfer to the College of Architecture. Current Texas Tech students (internal transfers) must have a TTU institutional GPA of 3.0 on a minimum of 18 hours exclusive of credit earned by exam and be TSI compliant. External transfers (non-TTU students) with fewer than 12 hours of transferable coursework must meet first-time freshman assured admission standards. For admission into Architecture, transfer students must have 18 hours of transferable coursework and a minimum cumulative GPA of 3.0 that includes work at all previous institutions. Students from institutions with existing transfer agreements will be accepted per the agreement in place.

Concurrent Enrollment. Students who are registered at Texas Tech and wish to register concurrently at another institution must obtain prior written approval from the academic dean of the college in which they are

enrolled. No student is allowed concurrent enrollment during the semester of expected graduation. This approval applies to all residence courses, extension courses, and distance education courses in progress elsewhere at the time of registration and to those begun during the semester.

A student registered at another institution but wishing to enroll concurrently for credit at Texas Tech will be considered as a transfer student and will be required to meet the standards for such students. Concurrent registration resulting in a combined enrollment beyond a maximum load at this institution will not be permitted.

Core Curriculum Requirements. The university has established core curriculum requirements for all students. A listing of these requirements appears in the Academic Requirements section of this catalog.

Electives. All electives taken to satisfy the architecture degree plan must be at the 2000 and above level. All undergraduate architecture courses numbered 2000 and above may only be taken with the permission of the dean.

Computer Requirement. Students in all programs are required to have their own computer in the classroom and studio. Computer equipment and software must be compatible with college standards. Computer equipment and software requirements are posted at www.depts.ttu.edu/architecture/.

Grades of C. A minimum grade of C or better is required for all courses in the architecture degree plan, including corequisites, prerequisites, and architecture electives.

Student Projects. The college reserves the right to retain, exhibit, and reproduce work submitted by students. Work submitted for a grade is the property of the college.

Academic Standing. The Academic Requirements section of this catalog gives information regarding academic standing. Students on academic probation or academic suspension should familiarize themselves with these regulations. Only one semester of probation is allowed at the graduate level before academic suspension.

Counseling and Advising. Faculty members assist students in career counseling and guidance. Advisement for course registration is provided by the academic advising staff.

Ineligible Registration. The Huckabee College of Architecture reserves the right to prevent any student who is not eligible for registration from entering or dropping a course for reasons such as unapproved overloads, unapproved repeated courses, lower-division/upper-division rule infractions, academic performance, and lack of corequisites and prerequisites. Courses taken when the student was ineligible will not be used in the student's degree program.

Catalog Selection. Students will use the catalog issued for the year in which they were first officially admitted to the Huckabee College of Architecture or may elect to use a more recent catalog. However, if they later transfer to another institution or another college at Texas Tech and wish to return to the Huckabee College of Architecture at Texas Tech, they will follow the current catalog curricula in effect when they are readmitted. A catalog expires after seven years.

Course Load. Approval from the academic advisor is required for a course load of more than 18 semester hours (8 hours for a summer term). Distance education courses are included in the student's course load, as are courses taken concurrently at other institutions. Students who are employed for more than 20 hours each week should limit their semester hour enrollment.

Class Attendance. Students in the college are expected to attend all scheduled class meeting times and activities. Absences more than those stipulated in each individual course syllabus will result in an F in the course. Students should refer to the university's policy, procedures, and dates regarding dropping a course and see their academic advisor for additional information.

Application for Degree. The Bachelor of Science degree candidate must file an "Application for Degree" with the academic advisor at least one year before the anticipated date of graduation. Subsequently, the student will receive a list of courses and be apprised of the number of grade points that are lacking. Undergraduate students must have a 2.5 GPA to graduate. Graduate students must have a 3.0 GPA to graduate.

Because students are expected to follow the graduation requirements set forth in the catalog of the year they entered the Huckabee College of Architecture, students filing an "Application for Degree" must indicate the catalog year under which they will graduate. This must be the year in which they were accepted and registered in the Huckabee College of Architecture. See also Uniform Undergraduate Degree Requirements.

Dual-Degree Programs. The Huckabee College of Architecture, in partnership with the Whitacre College of Engineering, offers the option of earning a Bachelor of Science in Architecture simultaneously with a Bachelor of Science in Civil Engineering. Also, the Huckabee College of Architecture, in partnership with the Rawls College of Business, offers the option of earning a Bachelor of Science in Architecture along with a Bachelor of Business Administration.

Communication Literacy Requirement. Communication Literacy courses for the Architecture major are ARCH 3314, 3352, and 3602.

Architecture, Undergraduate Minor

Students should consult with an architecture advisor and have a Minor Approval Form signed. A list of recommended courses is available from the advisor. A minor consists of 18 hours, which must include 6 hours of junior- or senior-level courses. At least 9 of the 18 hours must be taken in residence. Grades of C or better are required in each course.

Undergraduate Certificates

Architectural Digital Media

This 12-hour undergraduate certificate program is taught on both campuses. Required courses are ARCH 3314 (ARDM emphasis), 3352, and 4341 (ARDM emphasis), and choose one from: ARCH 3350 (El Paso campus) or 4361 (Main campus). Courses may be taken in any order.

Accelerated Bachelor's to Master's Degree

Architecture, B.S. / Master of Architecture, M.Arch.

Qualified architecture undergraduates (possessing at least a 3.5 GPA and 90 undergraduate credit hours; 45 hours must be architecture courses) may apply for admission to the Accelerated B.S. + M.Arch. program. The accelerated program is 175-184 semester credit hours and is designed for undergraduate architecture majors at Texas Tech who wish to obtain their M.Arch. degree. Qualified students are provided with the opportunity to complete the graduate application process during their third year and prior to enrolling in ARCH 4601. Students will complete 9 hours of approved graduate coursework that will count toward both the undergraduate and graduate degree requirements. Students choose courses in consultation with the graduate advisor. The B.S. will be completed in a spring term and the M.Arch. will begin in a fall term.

Architecture, B.S. Recommended Curriculum

General Architecture Program. Only courses with a minimum grade of C or better (including corequisites, prerequisites, and electives) will be accepted into the architecture program.

FIRST YEAR

Fall

- ☐ ARCH 1301 - Architectural Design I (3 SCH)
- ☐ ARCH 1101 - Architectural Representation I (1 SCH)
- ☐ ARCH 2311 - History of World Architecture I (3 SCH) (*core*)
- ☐ ARCH 1311 - Design, Environment, and Society (3 SCH) (*core*)
- ☐ MATH 1321 - Trigonometry (3 SCH)
- ☐ ENGL 1301 - Essentials of College Rhetoric (3 SCH)

Pre-professional Program. Competitive placement based on comprehensive review including student portfolio, written exam, GPA, statement of intent, and successful completion of all first-year architecture courses. Students who have not been admitted to the pre-professional program are not eligible to take courses at the 2000 level and above, except ARCH 2311, 2315, and 3313.

SECOND YEAR

Fall

- ☐ ARCH 2503 - Architectural Design III (5 SCH)
- ☐ ARCH 2101 - Architectural Representation III (1 SCH)
- ☐ ARCH 3313 - History of World Architecture III (3 SCH)
- ☐ ARCH 2351 - Architectural Technology I: Matter (3 SCH)
- ☐ CE 2301 - Statics (3 SCH)
- ☐ CE 2201 - Materials for Constructed Facilities (2 SCH)
- ☐ HIST 2301 - History of the United States since 1877 (3 SCH)

TOTAL: 20

Spring

- ☐ ARCH 2504 - Architectural Design IV (5 SCH)
- ☐ ARCH 2102 - Architectural Representation IV (1 SCH)
- ☐ ARCH 2362 - Fundamentals in Architectural Thinking (3 SCH)
- ☐ ARCH 2355 - Architectural Technology II: Gravity (3 SCH)
- ☐ CE 3303 - Mechanics of Solids (3 SCH)
- ☐ COMS 2300 - Public Speaking (3 SCH) **OR** COMS 2358 - Speaking for Bus. (3 SCH)

TOTAL: 18

Summer I

- ☐ CHEM 1307 - Principles of Chemistry I (3 SCH)
- ☐ CHEM 1107 - Experimental Principles of Chemistry I (1 SCH)
- ☐ POLS 1301 - American Government (3 SCH)

TOTAL: 7

Summer II

- ☐ CHEM 1308 - Principles of Chemistry II (3 SCH)
- ☐ CHEM 1108 - Experimental Principles of Chemistry II (1 SCH)
- ☐ POLS 2306 - Texas Politics and Topics (3 SCH)

TOTAL: 7

THIRD YEAR

Fall

- ☐ ARCH 3601 - Architectural Design V (6 SCH)
- ☐ ARCH 3352 - Building Information Technology (3 SCH)
- ☐ CE 3321 - Introduction to Geotechnical Engineering (3 SCH)
- ☐ CE 3121 - Geotechnical Engineering Laboratory (1 SCH)
- ☐ CE 3340 - Structural Analysis I (3 SCH)
- ☐ CE 3103 - Mechanics of Solids Laboratory (1 SCH)

TOTAL: 17

Spring

- ☐ ARCH 3602 - Architectural Design VI (6 SCH) (*Study Abroad*)
- ☐ ARCH 3314 - Contemporary Issues in Architecture (3 SCH)
- ☐ IE 2341 - Engineering Statistics I (3 SCH) **OR**
- ☐ MATH 3342 - Mathematical Statistics for Engineers and Scientists (3 SCH)
- ☐ CONE 2302 - Surveying (3 SCH)
- ☐ CE 3305 - Mechanics of Fluids (3 SCH)
- ☐ CE 3105 - Mechanics of Fluids Laboratory (1 SCH)

TOTAL: 19

FOURTH YEAR

Fall

- ☐ ARCH 4601 - Architectural Design VII (6 SCH)
- ☐ CE 3341 - Principles of Structural Design (3 SCH)
- ☐ CE 3354 - Engineering Hydrology (3 SCH)
- ☐ CE 3309 - Environmental Engineering (3 SCH)
- ☐ CE 3171 - Environmental Engineering Laboratory I (1 SCH)

TOTAL: 16

Spring

- ☐ ARCH 4602 - Architectural Design VIII (6 SCH)
- ☐ CE 4343 - Design of Concrete Structures (3 SCH)
- ☐ CE 4340 - Structural Analysis II (3 SCH) (*Offered during spring semesters only.*)
- ☐ CE 4342 - Design of Steel Structures (3 SCH) (*Offered during spring semesters only.*)
- ☐ CE 3372 - Water Systems Design (3 SCH)

TOTAL: 18

FIFTH YEAR

Fall

Core Curriculum. Courses include: ENGL 1301, 1302; POLS 1301, 2306; HIST 2300, 2301; COMS 2300 or 2358; and 4-hour Life & Physical Sciences.

Undergraduate Course Descriptions

Architecture (ARCH)

- 1101—Architectural Representation I (1).** Corequisite: ARCH 1301. An introduction to the techniques and methods of architectural representation with an emphasis on utilizing architectural projection systems to describe form, space, and geometry.
- 1102—Architectural Representation II (1).** Prerequisite: ARCH 1101. Corequisite: ARCH 1302. A continued introduction to the techniques of architectural representation with an emphasis on the hybridization of analogue and digital methods.
- 1301—Architectural Design I (3).** Corequisite: ARCH 1101. Introduction to foundational principles of observation, ordering, and analysis, for the purpose of communicating design strategies, as a precursor to design synthesis.
- 1302—Architectural Design II (3).** Prerequisites: ARCH 1101, ARCH 1301. Approaching the creative process in architecture through synthetic process and the construction of spatial organizational strategies.
- 1311—Design, Environment, and Society (3).** [ARCH1311] Introduction to architecture as an integral component of a complex world. Examination of societal and environmental contexts and appropriate design responses. Fulfills core Social and Behavioral Sciences requirement. F.
- 2101—Architectural Representation III (1).** Corequisite: ARCH 2503. Prerequisite: ARCH 1102. Advanced architectural representation techniques emphasizing digital craft and acumen, with an introduction to fabrication techniques and tools.
- 2102—Architectural Representation IV (1).** Corequisite: ARCH 2504. Prerequisite: ARCH 2101. Develops a thorough understanding of complex architecture representation with an emphasis on multimedia techniques and tools with the use of advanced fabrication methods.
- 2311—History of World Architecture I (3).** [ARCH1301] Survey of the development of world architecture from pre-history to the Middle Ages. Fulfills core Language, Philosophy, and Culture requirement. F.
- 2315—History of World Architecture II (3).** [ARCH1302] Survey of the development of world architecture from the Renaissance through the 19th century. Fulfills core Creative Arts requirement. S.
- 2351—Architectural Technology I: Matter (3).** [ARCH2312] Introduction to architectural technology and our constructed relationship with the environment. Emphasis on contemporary materials, behaviors, sources, sustainability, methods of fabrication, products and their potentialities. F.
- 2355—Architectural Technology II: Gravity (3).** Prerequisite: ARCH 2351. Introduction to the mechanics of structural materials with emphasis on capacities and behavior. Structural analysis and determination of structural systems via load-tracing, equilibrium and statics. F.
- 2362—Fundamentals in Architectural Thinking (3).** Covers critical works from architecture and other related disciplines; traces how different systems of ideas have transformed architectural production from antiquity to today.
- 2503—Architectural Design III (5).** Prerequisite: ARCH 1302, ARCH 1102, admission to the professional program. Corequisite: ARCH 2101. Develops design skills through the extension and application of representational techniques that allow a designer to explore relationships between form, space and inhabitation. Studio course.
- 2504—Architectural Design IV (5).** Prerequisites: ARCH 2503. Corequisite: ARCH 2102. Advances the student's understanding of architecture's disciplinary specificity through the development of a coherent design project that resolves programmatic, tectonic and contextual forces. Studio course.
- 3313—History of World Architecture III (3).** Survey of the development of world architecture during the 20th and 21st centuries. F.
- 3314—Contemporary Issues in Architecture (3).** Contemporary issues in architectural theory and history utilizing precedents from early 20th century to present. May be repeated for credit. (CL)
- 3315—Building the United States (3).** Examines the construction of the United States as both a process of building and creation of culture. Describes the parallel development of the U.S.'s diverse and energetic society at work by examining a wide array of works of architecture, infrastructure, and landscape.
- 3350—Architectural Technology III: Assemblies (3).** Prerequisite: ARCH 2355. Introduction to envelopes in relation to architectonic systems. Emphasis on methods of representation, structural design, and environmental systems integration in architectural design.
- 3352—Building Information Technology (3).** Analysis of communication of technical information and the process of preparing documents for building construction utilizing Building Information Modeling (BIM). (CL)
- 3355—Architectural Technology IV: Atmosphere (3).** Prerequisite: ARCH 3350. Study of environmental systems and envelopes with emphasis on their relationships. Analysis of air-conditioning, ventilation, acoustics, daylighting, facades, cladding. Introduction to MEP, codes, regulations.
- 3361—Design Workshop (3).** Special projects and project development in architectural design. May be repeated for credit.
- 3362—Product Design Workshop (3).** Introduction to the design and executed construction of a prototypical piece of furniture or other design product using an architectural design process. May be repeated for credit. S.
- 3373—Environmental Analysis - Site Planning (3).** Basic course to develop a working knowledge of the techniques and principles involved in site planning to provide optimum living and working environments. F.
- 3601—Architectural Design V (6).** Prerequisite: ARCH 2504. Builds on foundational skills through a series of complex constraints and contexts, while emphasizing social, cultural, or civic roles of architectural design. Open only to architecture majors or to students having permission of the Dean.
- 3602—Architectural Design VI (6).** Prerequisite: ARCH 3601. Focuses on how architectural concepts and ideations translate into built environments that affect the public realm. Open only to architecture majors or to students having permission of the Dean. (CL)
- 4000—Architecture and Urban Studies (VI-6).** Prerequisite: Advanced standing and approval of the dean. Individual studies of special interest in advanced architecture, history of architecture, and city planning. May be repeated for credit.
- 4311—Architecture in Nonwestern Societies (3).** A study of multicultural architectural contributions, interrelationships of culture and architecture, diversity of traditions, meanings, modernity, and change in the nonwestern world.
- 4324—Introduction to Historic Preservation (3).** An introduction to the history and contemporary practice of historic preservation, including the preservation of buildings, landscapes, and material culture.
- 4325—Cultural Heritage Tourism (3).** Prerequisite: ARCH 4324. Study of the practice and theory of heritage tourism and strategies for the sustainable development and management of cultural heritage tourism initiatives.
- 4341—Media Elective (3).** Analog or digital media options chosen from approved list. May be repeated for credit.
- 4354—Integrative Building Modeling (3).** Prerequisite: ARCH 2355 and ARCH 3355. Integration of structural, mechanics, electrical, plumbing, and code with life safety systems into building design, through a comprehensive building model. S.
- 4361—Architectural Studies Seminar (3).** The study, presentation, and discussion of issues regarding architecture as an aspect of culture. May be repeated for credit.
- 4391—Architectural Internship (4).** Prerequisite: ARCH 3602. Individual study based on an approved internship position consisting of a minimum of 300 hours per semester or summer.
- 4392—Historic Preservation Internship (3).** Prerequisites: ARCH 4324 and ARCH 4325. Supervised internship designed to provide students with practical experience. Practicum includes a report, an oral presentation, and a minimum work commitment of 160 hours.
- 4601—Architectural Design VII (6).** Prerequisite: ARCH 3602. Provides instruction in advanced architectural design projects. Students develop integrated design skills negotiating the complex issues of program, site, and form in a specific cultural context. Integrates aspects of architectural theory, building technology, and computation into the design process.
- 4602—Architectural Design VIII (6).** Prerequisite: ARCH 4601. Provides instruction in advanced architectural design projects. Students develop integrated design skills as they negotiate the complex issues of program, site, and form in a specific cultural context. Integrates aspects of architectural theory, building technology, and computation into the design process.

Graduate Programs

Master of Architecture, M.Arch. (Accredited Professional Degree)

Mandatory Accreditation Statement. In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted an 8-year, 3-year, or 2-year term of accreditation, depending on the extent of its conformance with established educational standards.

Doctor of Architecture and Master of Architecture degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

On August 5, 2016, the Master of Architecture degree program in the Huckabee College of Architecture at Texas Tech University was granted an eight-year term of accreditation. The Master of Architecture accredited professional program consists of an undergraduate curriculum of 124 hours and a graduate curriculum of 60 hours. The dual Master of Architecture / Master of Business Administration includes an additional 30 credit hours in the graduate program. Successful completion of a graduate comprehensive exam (GCE) at the end of three semesters is required.

Architecture, M.S.

The Master of Science in Architecture (M.S.) is a research-based academic degree for students interested in advanced architectural studies. This degree does not prepare students to receive an architecture licensure. It is for students with an accredited professional B.Arch. or M.Arch. degree, or an approved bachelor's degree in architecture or in a related discipline (e.g., art, interior design, engineering, archaeology). Students who have non-architecture degrees and wish to enter the program may be required to complete leveling work that will not accrue graduate credit toward their degree. Students will be required to complete a minimum of 28 credit hours of graduate study and write and defend a thesis (6 hours). Students requesting admission into the Master of Science in Architecture program must meet the entrance standards of the Graduate School and the Huckabee College of Architecture. The admission application includes a portfolio of creative work (writing, design, drawing, photography, etc.) that reflects the student's level of design interest, intellectual inquiry, and communication skills, GRE scores, GPA, Statement of Intent/Purpose, and three letters of recommendation. International applicants must submit TOEFL or IELTS scores.

There are five options for Master of Science in Architecture (M.S.) students:

- Concentration in Design, Computation and Fabrication
- Concentration in Design and Health
- Concentration in Ecological and Sustainable Design
- Concentration in Urban and Community Design
- Concentration in Historic Preservation (El Paso)

The Design and Health concentration has two fields of focus:

1. Health and Wellness Design (HWD)
2. Healthcare Facilities Design (HFD)

Academic requirements vary depending on the option chosen. Candidates for the Master of Science in Architecture must specify the option in which they are interested by selecting that option on the Graduate School admission application. After the first semester, students will be matched with a faculty member who will serve as their academic advisor and the chair of their thesis committee. The faculty advisor will be responsible for guiding the student concerning electives, developing a thesis proposal, and selecting thesis committee members. The student also has access to the HCOA graduate advisor for additional assistance. All students seeking a degree must complete the program in residency, including the thesis.

Graduate Certificates

Design, Computation, and Fabrication

The Design, Computation, and Fabrication graduate certificate program provides a unique platform of various natures and practice of computation in architectural design, and the ways that design meaning, intentions, and knowledge are constructed through computational thinking, representing, sensing, making, and considering the social and cultural implication of our positions. Design, Computation, and Fabrication students are expected to acquire both the technical skills and the theoretical and conceptual foundations to rethink and challenge the limits of current design processes.

Required: ARCH 5603 (DCF emphasis) or 5604 (DCF emphasis)

Approved ARCH Elective: Choose three from ARCH 5301 (DCF emphasis), 5302, 5303, 5334, 5352, 5354, 7000

Contact: Kuhn Park | kuhn.park@ttu.edu | 806.834.1242

Ecological and Sustainable Design

The Ecological and Sustainable Design (ESD) graduate certificate is tailored toward forward-thinking students eager to address the complex and wicked problems of climate change, social justice, and adaptation for innovative design in architecture. Through a carefully curated selection of elective and studio courses, explore current issues such as regenerative and carbon-neutral materials, ecologically minded technologies and integration, and energy-efficient design. With 15 credit hours of targeted ESD-approved coursework, students will gain invaluable knowledge and practical skills to advance ecological and environmental systems through architecture. This graduate certificate will provide tools to shape the future while making meaningful contributions to sustainable design and advancing careers at the intersection of ecology, equity, and innovation.

Required courses: ARCH 5603 (ESD emphasis) or 5604 (ESD emphasis); and three courses from: ARCH 5301 (ESD emphasis: Re-thinking Materials), 5301 (ESD emphasis: LEED, WELL and Passivehaus), 5301 (ESD emphasis: Social Equity and Sustainability), 5301 (ESD emphasis: Energy Modeling and Performance), 5363 (ESD emphasis: Ecological Theory and ARCH Design).

Health Care Facilities Design

The 15-hour interdisciplinary Graduate Certificate in Health Care Facilities Design includes the Rawls College of Business and the School of Nursing at TTUHSC.

It offers specialty courses to graduate students and design professionals in healthcare design, emphasizing evidence-based design to enhance efficiency and safety. Successful completion of the certificate will position graduates to be employed in the healthcare facilities design sector and play a leading role in evidence-based design.

Must complete ARCH 5366 and 5604 (HFD emphasis); and six hours from approved electives including but not limited to: HOM 5306, 5308; NURS 5322 (TTUHSC); and ENVD 5386.

NOTE: Please contact Dr. Saif Haq for additional course options

Contact: Saif Haq, Ph.D. | saif.haq@ttu.edu | 806.834.6317

Health and Wellness Design

The Huckabee College of Architecture partners with the Department of Public Health at TTUHSC in this 15-hour graduate certificate. It offers advanced knowledge of environmental design that enhances the physical, intellectual, emotional, mental, and spiritual health of groups and individuals. This program is flexible enough to include students with or without design backgrounds.

Knowledge areas covered include, but are not limited to, understanding salutogenic design principles and the ways design impacts health, public health principles, evidence-based design principles, research methods, and the role of research in design.

Required courses are ARCH 5604 or 5301 (HWD emphasis) (research project done in support of a school studio or a project in a practice; studio

drawing activity not required), and 5301 (HWD Emphasis); GSPH 5313 (TTUHSC); and 3 or 6 hours from an approved elective.

Historic Preservation

The Graduate Certificate in Historic Preservation prepares graduate students to play leadership roles in the historic preservation of architecture. This certificate provides students with the knowledge and practical skills needed to be thoughtful stewards of the world's architectural heritage and provides a comprehensive understanding of historic preservation that includes the built, cultural, and natural environments. To satisfy these objectives, this graduate certificate presents a balanced curriculum of history, theory, documentation, and preservation technology courses.

The program is an international leader in historic architectural documentation and provides opportunities for regional, national, and international research. Students and faculty participate in documentation and preservation research through collaborative efforts with public, private, and non-profit organizations.

An interdisciplinary program that focuses on the documentation and preservation of historic architecture, the certificate has three major areas of interest: architecture history and theory, preservation policy and law, and building analysis technology. Required courses are ARCH 5301, 5320, 5321, 5324, 5325.

Land Arts of the American West

The 12-hour Land Arts of the American West Graduate Certificate in the Huckabee College of Architecture centers on the transdisciplinary Land Arts field program that investigates the intersection of human construction and the evolving nature of the planet. The program leverages immersive field experience in the desert southwest as a primary pedagogic agent to support research that opens horizons of perception, probes depths of inquiry, and advances understanding of human actions shaping environments. Land Arts attracts architects, artists, and writers from across the university and beyond to a "semester abroad in our own backyard" that travels 6,000 miles overland while camping for two months to experience major land art monuments—Double Negative, Spiral Jetty, Sun Tunnels, The Lightning Field—while also visiting sites to expand understanding of what land art might be, such as pre-contact archeology, military and industrial facilities, and contemporary infrastructure. Throughout the travels and on campus, participants make work in response to their experience, which is exhibited at the Museum of Texas Tech University to conclude the field season.

The specialty courses in this certificate emphasize the merits, rigors, and risks of fieldwork; the in-depth value of seminar-based dialog; the public exhibition of research produced products; and the synthesis, documentation, and reflection of the experience in written and visual forms.

Students will apply to the TTU Graduate School. Required courses are ARCH 5378, 5379, 5679.

Contact: Chris Taylor, Director of Land Arts of the American West at Texas Tech | chris.taylor@ttu.edu | 806.834.1589

Urban and Community Design

This certificate provides a UCD specialization for graduate students and professionals in architecture or related fields. Students develop knowledge and skills in the integrated relationship between architecture and the urban environment, including issues of urbanism and community design. The certificate is further supported by the Urban Tech Downtown Studio in Lubbock (fall only) and/or the Urban Design Studio in Lubbock (typically includes a study abroad field trip in spring only). This certificate requires 15 hours of approved coursework.

- Required: ARCH 5384; and one of 5600 (UCD emphasis), 5603 (UCD emphasis), 5604 (UCD emphasis)
- Approved ARCH Elective: one of ARCH 5382, 5383, 5325 (when offered)
- Approved General Elective:* one of FIN 5332, 5345; GIST 5300; PUAD 5324, 5342, 5345, 5363; MGT 5371, 5372; ENVD 5383

* Under certain circumstances, students may take ARCH 5301 or ARCH 7000 as an approved general or architecture elective and must have written approval from the graduate certificate coordinator.

Contact: Saif Haq, Ph.D. | saif.haq@ttu.edu | 806.834.6317

Graduate Course Descriptions

Architecture (ARCH)

- 5301—Special Problems in Architecture (3).** Prerequisite: College approval. Individual study projects in architecture of special interest to students. May be repeated for credit.
- 5302—Product Design Workshop (3).** Introduction to the design and executed construction of a prototypical piece of furniture or other design product using an architectural design process. S.
- 5303—Smart Materials (3).** Studies emerging materials and how properties and performances affect design thinking. Investigates advanced technologies facilitating design innovation in building components and their assemblies. S.
- 5304—Architectural Technology Integration: Survey (3).** Corequisite: ARCH 5600. Survey of contemporary and emerging architectural technologies. Includes issues of design and analysis of the built environments.
- 5315—Systems of Architectural Inquiry (3).** An investigation into the schools of thought and methods of inquiry, including the craft of research with a focus on writing, reading, and critical thinking. F.
- 5319—History of American Architecture: Pre-Contact to 1865 (3).** Prerequisite: ARCH 2311 or approval of instructor. History of American Cultural expression, using buildings as a vehicle for exploring diverse issues including race, class and gender. Time period covers Pre-Contact to 1865. F.
- 5320—American Architecture History from 1800 (3).** Prerequisite: ARCH 2311 or instructor approval. History of American cultural expression, using buildings as a vehicle for exploring diverse issues including race, class and gender. Time period 1800 to present. S.
- 5321—Historic Building Technology and Documentation (3).** Survey of techniques of restoration and stabilization of historic buildings; standards of workmanship; traditional methods and new technologies. Survey of documentation techniques and preservation design. S.
- 5324—History and Theory of Historic Preservation (3).** Survey of theory and practice of historic preservation and restoration; overview of the history of the preservation movement in the U.S. F.
- 5325—Conservation Policies (3).** Survey of federal and state enabling legislation; federal, state, and local policies on historic preservation and urban design, discussion of redevelopment strategies. S.
- 5327—Architectural Detailing: Why – How – The Human Experience (3).** An exploration of architectural detailing through reading, research, discussion, sketching, emulating, and creating.
- 5332—Women and Architecture: From Here the American West to There the World (3).** Explores local and global issues relating to women and architecture spanning from the past, over the present, into the future.
- 5333—Special Studies in the History of Architecture (3).** Prerequisites: ARCH 2311 and ARCH 2315. Studies in western / nonwestern Architectural history involving written and oral analysis of scholarly sources. Topic varies and may include preservation, class, race and/or gender issues.
- 5334—Advanced Architectural Technology I: Topics (3).** Prerequisite: ARCH 5304. Advanced architectural technologies focused on one or more of the following topics: prototyping, fabrication, data-driven design optimization, parametric systems, and/or building performance analysis. F, S.
- 5341—Energy Modeling and Building Performance (3).** Develops advanced energy modeling skills to design and optimize sustainable, energy-efficient buildings through hands-on projects utilizing cutting-edge analysis tools and sustainable design strategies.
- 5342—Regenerative Architecture (3).** Explores materiality, life-cycle analysis, and methodologies to design ecological, biogenic, and regenerative buildings that minimize impact and actively restore natural systems.
- 5352—Computer Applications to Architecture (3).** Survey of digital computer applications to the issues and processes of architecture and planning. May be repeated for credit. F.
- 5354—Advanced Architectural Technology II: Topics (3).** Prerequisite: ARCH 5304. Current and emerging research topics in architectural technology.
- 5361—Architectural Research Seminar (3).** Architecture as art, science, and a contemporary philosophical concept. Exploration of context and goals. Illustrated lectures. May be repeated for credit.

- 5362—**Theories in Architecture: Survey (3).** Survey of theoretical issues in architecture through critical reading of texts selected from Vitruvius to the most contemporary thinkers in relation to emerging design challenges. F, S.
- 5363—**Theories in Architecture: Topics (3).** Prerequisite: ARCH 5362. Explores specific theories in architecture in the context of social and design issues. May be repeated for credit.
- 5366—**Evidence-Based Architecture (3).** Historical development and theoretical fundamentals of research based “evidence” in architecture. Challenges and opportunities for different stakeholders. Finding and using “evidence” in design. Case studies. F.
- 5371—**Church Competition and Innovation in American Religious Architecture (3).** Seminar that critically examines the development, variety, and agency of American religious architecture from the colonial period to today.
- 5372—**Model Design, Object, Cultus (3).** Seminar that critically explores architectural models within the discipline and practice of architecture and within popular culture.
- 5378—**Place-Less-Place: Mining the Shift from Unknown to Acculturated Space (3).** Corequisite: ARCH 5379. Explores the process of making space into place through examinations of occupation and intervention between humans, more-than-humans, and land.
- 5379—**Exhibiting-Syn-Thesis: The Responsibility of Return (3).** Corequisite: ARCH 5378. Reflection and documentation of work completed during the Land Arts field season through creation of a printed portfolio.
- 5382—**Urban Theory (3).** An extensive writing course exploring a comprehensive investigation from selected conceptual and philosophical topics based upon the critical relationship between culture and the urban environment. F.
- 5383—**Infrastructure in the Urban Environment (3).** Addresses the relationship between infrastructure and city form and function in large urban (above 200,000 population) areas. Emphasis is on the city of Houston as a contextual laboratory for learning. S.
- 5384—**Community Design and Development Resources (3).** Investigation of the development resources available to community and designers emphasizing partnerships and collaboration. S.
- 5385—**Design for Resilient Environments (3).** Examines the role of race and gender in informal housing production across Latin America and along the U.S - Mexico Border.
- 5391—**Architectural Internship (3).** Individual study based on approved internship position consisting of a minimum of 300 hours per semester or summer.
- 5392—**Professional Practice (3).** The principles and practices of architectural business including the discussion of professionalism, administration, management, legalities, and liabilities. Exploration of current, advanced, and complex processes for the delivery of architecture F, S.
- 5506—**Collaboration Studio (5).** An interdisciplinary studio for the design professions addressing the process and skills necessary for collaboration as well as team-development products. (Field Trip Required) F.
- 5600—**Integrative Architectural Design Studio I (6).** Integrative Architectural Design Studio focused on a comprehensive architectural project based on the development of architectural ideas, methodologies, and strategies in relationship to building technologies, systems, and materiality. F, S.
- 5602—**Integrative Architectural Design Studio II (6).** Corequisite: ARCH 5334. Integrative Architectural Design Studio focused on a comprehensive architectural project based on the development of architectural ideas, methodologies, and strategies in relationship to building technologies, systems, and materiality.
- 5603—**Architectural Design and Research I (6).** Explores design processes with theoretical and/or technological foundation that enables contemporary architectural discourse and practice. F, S.
- 5604—**Architectural Design and Research II (6).** Explores design processes with theoretical and/or technological foundation that enables contemporary architectural discourse and practice. F, S.
- 5622—**Preservation Studio (6).** Research on current preservation issues. Individual projects required.
- 5679—**Land-Scape: Operating at the Intersection of Human Construction and the Evolving Nature of the Planet (6).** Land Arts Studio investigates relations within and between landscapes of the American West through the examination and creation of situated works.
- 6000—**Master's Thesis (V1-6).** Involves completing the master's thesis in architecture under the supervision of a thesis advisor.
- 7000—**Research (V1-12).** Research course in which students will learn and demonstrate the core skills necessary to draft a thesis, or generate an alternative research project.

Architecture, M.S.: Design, Computation and Fabrication Concentration

Recommended Graduate Curriculum

FIRST YEAR

Fall

- ☐ ARCH 5603 - Architectural Design and Research I (6 SCH) (*DCF emphasis*)
- ☐ ARCH 5315 - Systems of Architectural Inquiry (3 SCH)
- ☐ ARCH 7000 - Research (V1-12 SCH) (*1 SCH*)
- ☐ ARCH 5354 - Advanced Architectural Tech. II: Topics (3 SCH) (*DCF emphasis*) **OR**
- ☐ ARCH 5352 - Computer Applications to Architecture (3 SCH) **OR**
- ☐ ARCH 5301 - Special Problems in Architecture (3 SCH) (*DCF emphasis*)

TOTAL: 13

Spring

College of Arts & Sciences

Tosha Dupras, Ph.D., Dean

202 Holden Hall | Box 41034 | Lubbock, TX 79409-1034
T 806.742.3831 | Arts-and-Sciences@ttu.edu
www.as.ttu.edu

About the College

The College of Arts & Sciences offers a broad spectrum of programs and courses in the liberal arts; humanities; mathematics; and social, behavioral, and natural sciences. The primary function of the college is to impart to students the knowledge, skills of thinking and communicating, and values and attitudes that constitute a liberal education. The faculty of the college seek to instill in their students a humanistic spirit, an appreciation of creativity, a commitment to excellence and truth, an ability to think critically and communicate effectively, and a desire for lifelong learning. The courses and programs in the college also provide a base of knowledge and skills from which students may enter such professional fields of study as law and medicine.

Undergraduate Curriculum

General Degree Requirements

Baccalaureate Degrees. Requirements for the Bachelor of Arts (B.A.) degree apply to all baccalaureate degrees offered through the College of Arts & Sciences unless specifically shown to the contrary. It is strongly recommended that students take all courses within Arts & Sciences to fulfill core, university, and general education degree requirements.

Major, Minor, and Electives. Students must take major, minor, and elective courses sufficient to total 120 semester hours, although some majors may require more total hours.

The minor may be any departmental minor or an established interdisciplinary minor. Some majors have a specific set of approved minors from which students must choose.

Many departments and programs have residency requirements for the major and minor. See departmental or program listings for specific information.

Students should have selected their major and minor fields by the time they reach their sophomore year. For the major subject, they will be required to complete a minimum of 30 semester hours, which should include a specified number of communication literacy courses. As indicated in the degree programs on the following pages, some majors require more than the 30-hour minimum. At least 24 hours of the major subject must be in courses at the junior/senior level. For the minor, a minimum of 18 semester hours must be completed, at least 6 of which must be of junior or senior level. All courses in the major and minor must be approved by the appropriate academic unit. Students are expected to develop a degree plan no later than the first semester of the sophomore year.

A minimum of 40 semester hours of junior and senior work must be presented for all programs.

Core Curriculum Requirements. The core curriculum requirements ensure breadth in each academic program. These requirements have been incorporated into the college's various degree programs. Students have no need to refer to the core curriculum requirements unless so directed by their specific degree program.

Course Load. A normal full-time course load is 15 hours or more per semester. Course loads in excess of 19 semester hours for the fall and

spring and 16 semester hours for the summer require approval by the academic dean's office. The maximum course load for a student on probation is 16 hours. To receive full-time financial aid, students must be enrolled for a minimum of 12 hours. Some financial aid programs allow enrollment in less than full-time hours. The normal course load for a single summer term is 6-8 hours.

Credit by Examination. Students at Texas Tech University may attempt credit by examination through Academic Testing Services. The student is responsible for taking the tests early enough to allow sufficient time for scores to be reported to the university and processed by the Office of the Registrar, which in the case of Arts & Sciences degrees is generally two semesters prior to the semester of graduation. Arts & Sciences degrees require fulfillment of foreign language. For Arts & Sciences foreign language requirements, please refer to the specific requirements listed for each degree. Generally, Arts & Sciences students who wish to attempt credit by examination for degree credit in foreign language do so before the end of their sophomore year. This ensures that these students will have time to complete their foreign language requirement within four years if they do not succeed in earning credit by examination. Seniors must receive written permission from their academic dean's office prior to attempting credit by examination and provide proof of notification upon registering for an exam at Academic Testing Services.

Grading Practices. The College of Arts & Sciences conforms to university grading practices as set forth in the major section entitled Academic Requirements in this catalog. Credits for a course in which a grade of D is earned may not be applied toward fulfillment of the major, adjunct, minor, concentration area, or teaching field requirements for any degree program.

Except for those courses designated "may be repeated for credit" in this catalog, no course may be used more than once on a degree plan unless it has been approved by the academic dean's office.

First Year. Entering first-year students develop their programs in conference with an academic advisor. The students report to their advisors for such individual conferences or group meetings as are needed for the purpose of orienting themselves to academic regulations and procedures, curricula, and degree requirements in their various areas of interest.

Students are urged to take required first-year courses during their initial year. During the sophomore year, the student should complete the second year of English and all other first-year requirements. Normally, core curriculum requirements should be completed by the end of the sophomore year. First-year students should not enroll in junior-/senior-level courses.

Admission of Transfer Students. Students transferring from another academic institution must meet the university-wide admission requirements stated in an earlier section. Students requesting permission to transfer from another college at Texas Tech must have a GPA of at least 2.0. The College of Arts & Sciences will determine the applicability of any transferred credit to academic programs in the college.

Arts & Sciences Undeclared. First-year students may be admitted with a general major known as "Arts & Sciences Undeclared" (ASUD) until they select the major degree program in which they intend to graduate. The college offers a broad area of education that includes the social sciences, liberal arts, and humanities, as well as the natural sciences and mathematics. Arts & Sciences Undeclared is only a temporary administrative designation in which students cannot earn a degree. Students in the College of Arts & Sciences are urged to focus on fulfilling general degree requirements during their first year. This alleviates the pressure to make an immediate decision on a major and career. Students can use their first year to build a strong academic foundation. At the same time, students can investigate career alternatives and take elective courses in those professional fields or subject areas that are possible majors. Students listed as ASUD are advised by academic advisors with the Office of Student Success in room 131 Holden Hall to help with selecting general degree requirements, elec-

tives, and a major. Skill/interest testing is available to students at 164 Drane Hall. After taking courses that are required for most majors (e.g., English, American history, political science, mathematics), students have the flexibility to begin working toward any of the major fields offered within the College of Arts & Sciences. **Only students with fewer than 30 hours may be listed as Arts & Sciences Undeclared. Students who have completed 30 or more earned hours will have a hold placed on their records until they declare a major.**

Final 30 Credit Hours. The final 30 credit hours applied to a degree program must be completed with Texas Tech enrollments. Students wishing to transfer in coursework during their semester of graduation may do so with prior approval from their academic dean's office. Due to processing deadlines, it is strongly recommended that transfer coursework is not taken in the semester of graduation.

Teacher Education. The curricula of most of the Bachelor of Arts degree programs and some of the Bachelor of Science programs are flexible to permit a student to major in an academic subject, yet meet the requirements for teacher certification by taking the required courses in the College of Education. Those students planning to become high school teachers should minor in secondary education. Prospective teachers should refer to the College of Education section of this catalog as well as consult the College of Education and the chairperson or undergraduate advisor of the department in which they wish to major.

Dual Degrees. Students progressing toward a degree in another college may apply to the College of Arts & Sciences for permission to declare another degree in a Bachelor of Science, Bachelor of Arts, Bachelor of Applied Arts & Sciences, Bachelor of General Studies, or Bachelor of Science International Economics program to become a dual-degree student. Generally, a 2.50 TTU cumulative grade point average is required before permission to enter a dual-degree program in the College of Arts & Sciences is given. Students declaring a B.A., B.A.A.S., B.G.S., or B.S.I.E. degree will be required to complete all requirements for those degrees as listed in this section of the catalog. Students declaring a B.S. degree will be required to complete all requirements as listed in this section of the catalog but may request a waiver of the sophomore foreign language requirement only if their other college does not have this requirement. Waiver requests may be completed and submitted to Holden Hall 102 at the time of declaring the dual degree and must be on file prior to the semesters of graduation. **NOTE:** Dual-degree students who cancel their other degree program for any reason, or become ineligible to continue in the other degree program, will be required to complete the foreign language requirement in their A&S B.S. degree program. Requirements for all degrees must be completed and degrees conferred at the same time.

Students progressing toward a degree in the College of Arts & Sciences may also seek permission to declare another degree within the college in a B.S., B.A., B.A.A.S., B.G.S., or B.S.I.E. program, but will be required to complete all requirements given herein. These students (both degrees within the college) may not request a waiver of the sophomore foreign language requirement.

Students pursuing more than one major within a single degree (B.S. or B.A.) in the College of Arts & Sciences do not constitute a dual degree, and only one degree will be awarded.

Additional information may be obtained by contacting the College of Arts & Sciences Academic Affairs Office, Holden Hall 102.

Second Bachelor's Degree. A second bachelor's degree requires 24 semester credit hours that were not applied to the first degree, and at least 30 hours completed at Texas Tech if the first degree was completed at an institution other than TTU. Credit by examination will not satisfy the 30-hour residence requirement. To earn Latin honors for graduation, a student must complete 24 hours of coursework at TTU after the completion and awarding of the first degree. For additional information, see "Second Bachelor's Degree" under the Academic Requirements section of this catalog.

The College of Arts & Sciences does not allow students with an undergraduate degree who are seeking to take only "prerequisite" coursework for eventual application to a professional health school to enter a second undergraduate degree program. These students should contact Undergraduate Admissions and apply to enter a non-degree seeking program.

Bachelor of Arts

The curriculum established for the Bachelor of Arts is designed to provide the foundation of a liberal education through a well-rounded study of the humanities; arts; mathematics; and social, behavioral, and natural sciences. It also provides the factual basis and the insights requisite for specialized study and professional work in these fields.

General Requirements. See "Undergraduate Credit by Examination" in the Undergraduate Admissions section of this catalog for information on credit provided by test scores to meet these requirements. Students must take the specified number of hours in the areas listed below. With a few exceptions, courses from the major and minor may be used to satisfy these requirements. Courses taken at State of Texas non-public or out-of-state institutions and transferred to Texas Tech will be evaluated on a case-by-case basis and, if acceptable, will be applied to core and general education requirements as applicable. A minimum of 24 hours at the junior/senior level is required in the major.

English: 12
The 12 hours of English must consist of ENGL 1301 and 1302 and two literature courses selected from the college general education requirements. See https://www.depts.ttu.edu/artsandsocieties/CurrentStudents/gen_degree_req.php.

Oral Communication: 3
Course must be selected from the core curriculum options.

Foreign Language: 11-16
A student must complete 6 hours at the sophomore level or above in a single language. If 4 or more semesters of high school foreign language are accepted for admission, the student should consult the information preceding the course listing for the foreign language department. A student enrolling in the first-year sequence will have a total requirement of 11-16 hours. A student who enrolls in the second-year sequence will have a 6-hour requirement. International students whose native language is not English, who attended a secondary school for at least two years in their native country, and whose language of instruction in the foreign secondary school was not English, may satisfy this requirement by contacting the Arts & Sciences Dean's Office to request a foreign language waiver. An official high school transcript, certificate, and/or diploma from the foreign high school will be required to verify the language of instruction. Second degree students whose native language is not English, who attended a high school or postsecondary school for at least two years in their native country, and whose language of instruction in the foreign high school or postsecondary school was not English, may satisfy this requirement by contacting the academic dean's office to request a foreign language waiver.

Mathematics: 6
At least three hours from the following list must be taken: MATH 1300, 1320, 1321, 1330, 1331, 1350, 1420, 1430, 1451, 1452, 1550, 2300, 2345, 2370, or 2371. Only one of MATH 1320 or 1420 may apply. Only one of MATH 1330 or 1430 may apply. The remaining three hours may be taken from the list above or from the following list: PHIL 2310; PSY 2400; EDIT 2318; or AAEC 2301. Students cannot receive credit for more than one of AAEC 2301; MATH 2300, MATH 2345; or PSY 2400.

Life and Physical Sciences: 8
Courses must be selected from the list of core curriculum options.

Social and Behavioral Sciences: 6
One course must be selected from the core curriculum options. The other course can be selected from the core curriculum options or from the college general education requirements. See https://www.depts.ttu.edu/artsandsocieties/CurrentStudents/gen_degree_req.php.

United States History: 6
Courses must be selected from the list of core curriculum options.

United States and Texas Government: 6
Students will enroll in POLS 1301 and POLS 2306. For more information, see the Department of Political Science section of this catalog. For more information regarding the Texas Constitution requirement, see the core curriculum requirement section of this catalog.

Language, Philosophy, and Culture:..... 6
One course must be selected from the core curriculum options. The other course can be selected from the core curriculum options or from the college general education requirements. See https://www.depts.ttu.edu/artsandsciences/CurrentStudents/gen_degree_req.php.

Creative Arts: 6
One course must be selected from the core curriculum options. The other course can be selected from the core curriculum options or from the college general education requirements. See https://www.depts.ttu.edu/artsandsciences/CurrentStudents/gen_degree_req.php.

Personal Fitness and Wellness:..... 2
To satisfy the College of Arts & Sciences requirement of 2 hours of personal fitness and wellness, students are to complete successfully any two PFW courses. See https://www.depts.ttu.edu/artsandsciences/CurrentStudents/gen_degree_req.php for courses also accepted for fulfilling the requirement. Students age 25 or older at the time of graduation are exempt. Any student who has served honorably in the U.S. Armed Forces for a minimum of 90 days may receive credit for 2 semester hours in personal fitness and wellness. Students participating in varsity athletics may enroll in the PFW course that corresponds to their varsity sport. A maximum of 1 credit hour per academic year per sport may be earned in this manner.

In addition to the general degree requirements for the Bachelor of Arts, students will have to complete majors and minors based on the various individual departmental requisites. Sample curriculum tables have been provided in the departmental sections for nearly all majors and minors. In some cases, degree requirements may be fewer or more than the hours presented in the tables. Students who switch between degree programs will be required to fulfill any additional core and general education requirements.

Bachelor of Science

The Bachelor of Science degree permits a greater degree of specialization than the B.A. and is offered by the Departments of Biological Sciences, Chemistry and Biochemistry, Economics, Geosciences, Kinesiology and Sport Management, Mathematics and Statistics, Physics and Astronomy, Psychological Sciences, and Renewable Energy. A minimum of 24 hours at the junior/senior level is required in the major. **Please note the differences in requirements for the Bachelor of Science and the Bachelor of Arts degrees:**

English:..... 9
The 9 hours of English must consist of ENGL 1301 and 1302 and one literature course selected from the college general education requirements. See https://www.depts.ttu.edu/artsandsciences/CurrentStudents/gen_degree_req.php.

STUDENTS WISHING TO ALSO USE ENGLISH LITERATURE TO COMPLETE THE CORE LANGUAGE, PHILOSOPHY, AND CULTURE REQUIREMENT MUST CHOOSE ONE COURSE FROM ENGL 2307, 2310, 2351, 2381, 2382, 2383, 2388, and 2391.

Oral Communication: 3
Course must be selected from the core curriculum options.

Foreign Language: 8-13
A student must complete 3 hours at the sophomore level or above. If 4 or more semesters of high school foreign language are accepted for admission, the student should consult the information preceding the course listing for the foreign language department. A student enrolling in the first-year sequence will have a total requirement of 8-13 hours in a single language. A student who enrolls in the second-year sequence will have a 3-hour requirement. International students whose native language is not English, who attended a secondary school for at least two years in their native country, and whose language of instruction in the foreign secondary school was not English, may satisfy this requirement by contacting the Arts & Sciences Dean's Office to request a foreign language waiver. An official high school transcript, certificate,

and/or diploma from the foreign high school will be required to verify the language of instruction. Second degree students whose native language is not English, who attended a high school or postsecondary school for at least two years in their native country, and whose language of instruction in the foreign high school or postsecondary school was not English, may satisfy this requirement by contacting the academic dean's office to request foreign language waiver.

The Arts & Sciences Dean's Office may exempt the B.S. second-year foreign language requirement for students who wish to pursue certain dual degrees between another college and the College of Arts & Sciences when the other college does not have a second-year foreign language requirement. Exemption requests may be completed and submitted to Holden Hall 102 at any time prior to the semester of graduation. **NOTE:** Dual degree students who cancel their other degree program for any reason or become ineligible to continue in the other degree program will be required to complete the 3 hours of a single foreign language at the sophomore level in their Arts & Sciences B.S. degree program.

Mathematics:..... 6

At least three hours from the following list must be taken: MATH 1300, 1320, 1321, 1330, 1331, 1350, 1420, 1430, 1451, 1452, 1550, 2300, 2345, 2370, or 2371. Only one of MATH 1320 or 1420 may apply. Only one of MATH 1330 or 1430 may apply. The remaining three hours may be taken from the list above or from the following list: PHIL 2310; PSY 2400; EDIT 2318; or AAEC 2301. Students cannot receive credit for more than one of AAEC 2301; MATH 2300, MATH 2345; or PSY 2400.

Life and Physical Sciences: 8

Courses must be selected from the list of core curriculum options.

Social and Behavioral Sciences: 3

Course must be selected from the list of core curriculum options.

United States History:..... 6

Courses must be selected from the list of core curriculum options.

United States and Texas Government:..... 6

Students will enroll in POLS 1301 and POLS 2306. For more information, see the Department of Political Science section of this catalog. For more information regarding the Texas Constitution requirement, see the core curriculum section of this catalog.

Language, Philosophy, and Culture:..... 3

Course must be selected from the list of core curriculum options. For some degree programs, this requirement may be fulfilled upon completion of sophomore English literature.

Creative Arts: 3

Course must be selected from the list of core curriculum options.

Personal Fitness and Wellness:..... 1

To satisfy the College of Arts & Sciences requirement of 1 hour of personal fitness and wellness, students are to complete successfully any PFW course. See https://www.depts.ttu.edu/artsandsciences/CurrentStudents/gen_degree_req.php for courses also accepted for fulfilling the requirement. Students age 25 or older at the time of graduation are exempt. Any student who has served honorably in the U.S. Armed Forces for a minimum of 45 days may receive credit for 1 semester hour in personal fitness and wellness. Students participating in varsity athletics may enroll in the PFW course that corresponds to their varsity sport.

In addition to the general degree requirements for the Bachelor of Science, students will have to complete majors and minors based on the various individual departmental requisites. Sample curriculum tables have been provided in the departmental sections for nearly all majors and minors. In some cases, degree requirements may be more than the hours presented in the tables. Students who switch between the B.S. and B.A. degree programs will be required to fulfill any additional core and general education requirements.

Interdisciplinary Programs

Graduate Programs

For information on interdisciplinary graduate programs offered by the College of Arts & Sciences, visit the Graduate School section on page 201.

Undergraduate Degrees

General Studies, B.G.S.

The Bachelor of General Studies with a major in General Studies is a multidisciplinary degree in the College of Arts & Sciences for students with postsecondary education experience who are looking for a pathway to completion of their first bachelor's degree. Students in the program are typically seeking degree completion as a means of moving from a paraprofessional career to a professional career and/or as a means of finishing an already expansive or extended postsecondary educational experience. The major coursework will be defined by a 54-hour concentration area, each of which must contain a minimum of 30 hours of Arts & Sciences coursework and 24 hours of upper-level (3000-4999) coursework. At least 18 of the 54 hours must be taken in residence at TTU. Students interested in this major must meet with a General Studies advisor to determine admission to the program.

Students will choose one concentration area from the list below. Concentrations for the B.G.S. in General Studies are defined by applicable subjects listed therein. This provides some level of focus for each student while still allowing for flexibility in course application. Additional courses and disciplines may be approved for each concentration through an academic advisor.

Life Sciences. Students pursuing a concentration in life sciences may choose coursework from the following disciplines: biology, biochemistry, botany, environmental toxicology, health, kinesiology, microbiology, and zoology.

Applied STEM. Students who are interested in any area of science, technology, engineering, or mathematics may declare a concentration in applied STEM. This concentration may include coursework from the following disciplines: accounting, anthropology (selected courses), astronomy, atmospheric science, biology, botany, chemistry, computer science, economics, engineering (all), environmental toxicology, finance, forensic science, general business, geochemistry, geographic information science and technology, geography, geology, geophysics, health, kinesiology, mathematics, microbiology, physics, renewable energy, technical communication, wind energy, zoology, and any other course that satisfies core mathematics or life and physical sciences in the state of Texas.

Social Sciences. Students pursuing a concentration in social sciences may choose coursework from the following disciplines: anthropology, criminology, economics, geography, global studies, political science, psychology, sociology, sport management, social work, and any other course that satisfies core social and behavioral sciences in the state of Texas.

Liberal Arts and Humanities. Students pursuing a concentration in liberal arts and humanities may choose coursework from the following disciplines: classical and modern languages and literatures, English, Mexican American and Latino/a studies, philosophy, and any other course that satisfies core language, philosophy, and culture in the state of Texas.

Arts and Sciences. Students pursuing a concentration in arts and sciences may choose any coursework, with the exception of personal fitness and wellness courses, housed in the College of Arts & Sciences.

Applicability of coursework and exceptions to these course lists will be determined in consultation with a General Studies Academic Advisor.

The Bachelor of General Studies with a major in General Studies may not be used as a dual degree, double major, or second bachelor's degree option.

General Studies, B.G.S. Sample Curriculum

FIRST YEAR

Fall

- ☐ ENGL 1301 - Essentials of College Rhetoric (3 SCH)
- ☐ HIST 2300 - History of the United States to 1877 (3 SCH)
- ☐ Life and Physical Sciences Elective (4 SCH)
- ☐ Social & Behavioral Sciences (3 SCH)
- ☐ Mathematics (3 SCH)

TOTAL: 16

Spring

- ☐ ENGL 1302 - Advanced College Rhetoric (3 SCH)
- ☐ HIST 2301 - History of the United States since 1877 (3 SCH)
- ☐ Life and Physical Sciences Elective (4 SCH)
- ☐ Language, Phil., & Culture Elective (3 SCH)
- ☐ Mathematics (3 SCH)

TOTAL: 16

SECOND YEAR

Fall

- ☐ POLS 1301 - American Government (3 SCH)
- ☐ Oral Communication Elective (3 SCH)
- ☐ Personal Fitness & Wellness (1 SCH)
- ☐ Concentration Area (3 SCH)
- ☐ Concentration Area (3 SCH)

TOTAL: 13

Spring

- ☐ POLS 2306 - Texas Politics and Topics (3 SCH)
- ☐ Social & Behavioral Sciences (3 SCH)
- ☐ Creative Arts Elective (3 SCH)
- ☐ Personal Fitness & Wellness (1 SCH)
- ☐ Concentration Area (3 SCH)
- ☐ Concentration Area (3 SCH)

TOTAL: 16

THIRD YEAR

Fall

- ☐ Creative Arts Elective (Jr./Sr.) (3 SCH)
- ☐ Language, Phil., & Culture Elective (Jr./Sr.) (3 SCH)
- ☐ Elective (Jr./Sr.) (3 SCH)
- ☐ Concentration Area (3 SCH)
- ☐ Concentration Area (3 SCH)

TOTAL: 15

Spring

- ☐ Concentration Area (3 SCH)
- ☐ Concentration Area (3 SCH)
- ☐ Concentration Area (3 SCH)
- ☐ Concentration Area (3 SCH)
- ☐ Elective (Jr./Sr.) (3 SCH)

TOTAL: 15

FOURTH YEAR

Fall

- ☐ Concentration Area (Jr./Sr.) (3 SCH) (*Communication Literacy*)
- ☐ Concentration Area (Jr./Sr.) (3 SCH)
- ☐ Concentration Area (Jr./Sr.) (3 SCH)
- ☐ Concentration Area (Jr./Sr.) (3 SCH)
- ☐ Elective (Jr./Sr.) (3 SCH)

TOTAL: 15

Spring

- ☐ Concentration Area (Jr./Sr.) (3 SCH) (*Communication Literacy*)
- ☐ Concentration Area (Jr./Sr.) (3 SCH)
- ☐ Concentration Area (Jr./Sr.) (3 SCH)
- ☐ Concentration Area (Jr./Sr.) (3 SCH)
- ☐ Elective (Jr./Sr.) (2 SCH)

TOTAL: 14

TOTAL HOURS: 120

40 hours total must be at the junior/senior level.

Foreign Language. If an entering student has not completed two years of a single foreign language in high school or has not transferred the equivalent of two semesters from another institution, the student must complete the equivalent of two semesters of a single foreign language at the first-year level (or higher) as a graduation requirement.

Global Studies, B.A. Sample Curriculum

FIRST YEAR

Fall

- ☐ ENGL 1301 - Essentials of College Rhetoric (3 SCH)
- ☐ Oral Communication (3 SCH)*
- ☐ Mathematics (3 SCH)*
- ☐ Elective (3 SCH)
- ☐ POLS 1301 - American Government (3 SCH)

TOTAL: 15

Spring

- ☐ ENGL 1302 - Advanced College Rhetoric (3 SCH)
- ☐ POLS 2306 - Texas Politics and Topics (3 SCH)
- ☐ Creative Arts (3 SCH)*

Spring

- ☐ GLST 4300 - Global Studies Capstone (3 SCH)
- ☐ Prescribed Electives (6 SCH) *(Students will choose prescribed electives with the guidance and consent of the major advisor or program director.)*
- ☐ Elective (6 SCH)

TOTAL: 15

TOTAL HOURS: 120

* Choose from General Core Curriculum Requirements.

† A student must complete 12 hours at the sophomore level or above in a single language. The prerequisite for all sophomore language courses is credit for the freshman level. This credit may be determined through a placement examination. The score attained on the exam will determine whether the student is placed in a second-year course, a 5 hour review course, or, in some cases, the first or second semester of a beginning (first-year) language course. See Arts & Sciences General Degree Requirements for further explanation.

Undergraduate Course Descriptions

Arts & Sciences Capstone Course (CASC)

3100—Leadership Development and Team Building (1). Students will acquire skills necessary for success in their approach toward leadership objectives as well as enhancing their teamwork outlook and involvement and critical thinking skills.

Global Studies, B.A.

A Bachelor of Arts in Global Studies encompasses interdisciplinary study of global, international, and regional politics, economics, culture, and society. The global studies degree will provide students with training and education appropriate to individuals seeking careers in diplomatic service, non-governmental organizations, international organizations, and foreign policy. Students will be prepared to undertake graduate studies in a variety of fields with international orientation. Graduates of the program will be able to contribute to Texas Tech's vision of championing global engagement, educating a diverse and globally competitive workforce, and enhancing the cultural and economic development of the state, nation, and world. The global studies major requires students to take 18 hours of required courses, and 24 hours of prescribed electives, with a minimum of 24 hours at 3000- or 4000-level. Required courses are GEOG 3350, HIST 2323, POLS 3368, CMLL 2305, CMI 3358, and GLST 4300. Electives include 12 hours of junior- or senior-level courses, 9 hours of courses from any level, and 6 hours of courses from Communication Literacy electives. In addition, this degree requires 6 hours of 3000- or 4000-level foreign language. Substitutions may be made to these requirements with the consent of director. A minor is not required for completion of this degree.

Communication Literacy Requirement. All students will take GLST 4300 and CMLL 2305. Students will take two additional Communication Literacy courses, in consultation with the program advisor. Collectively, the courses must address written, oral, and graphic communications.

Contact: Sara Jackson, Department of Political Science
sara.jackson@ttu.edu

Undergraduate Course Descriptions

Global Studies (GLST)

2300—Professional Career Paths in Global Studies (3). Develops skills, knowledge, attitudes, and values appropriate to careers in international settings. Enhances awareness of career opportunities for students earning the B.A. in Global Studies and other degrees with an international focus.

3300—Selected Topics (3). Various topics relevant to interdisciplinary study of global affairs. Open to all students. Repeatable for up to 6 hours subject to approval from advisor.

4300—Global Studies Capstone (3). Prerequisite: Senior standing or consent of instructor. Students will develop a synthetic comprehensive understanding of global studies, demonstrating the ability to draw connections among diverse disciplines and issues. (CL)

Renewable Energy, B.A.A.S.

The objective of the Bachelor of Applied Arts and Science (B.A.A.S.) in Renewable Energy is to provide a pathway for career progression to individuals holding an Associate of Applied Science (A.A.S.) degree in renewable energy technology. This program aims to augment the technical expertise of students, equipping them with leadership skills applicable to their specific professional contexts. Students seeking the 120-hour Bachelor of Applied Arts and Sciences in Renewable Energy degree must have a 2.25 GPA and first obtain an applied associate's degree from an approved A.A.S. program. Eligibility of a student's A.A.S. degree will be determined by a committee within the Renewable Energy Program's administrative unit upon admission.

Degree Requirements. To complete the B.A.A.S. in Renewable Energy, students will complete any additional core curriculum courses required for a four-year degree, up to 33 A.A.S. SCH in the student's A.A.S. Occupational Specialty, 34 SCH of Renewable Energy Core, 11 SCH of TTU and College of Arts & Sciences requirements, and any electives needed to complete the 120 SCH needed for graduation; 40 upper-level SCH will be

required. Any entering student who has not completed two years of a single foreign language in high school must complete at least two semesters at the first-year college level.

Global Component. In today's globalized renewable energy job market, students who participate in a study abroad program or gain job experience through an internship, preferably with an international company, are considered more marketable and competitive. Students will complete the Global Component by choosing from the following global component options:

- **Study Abroad Option.** Complete an approved study abroad experience through the International Texas Tech Center, a Texas Tech-approved reciprocal exchange program, or a faculty-led program. Students must enroll in and successfully complete 3 credit hours of coursework with a grade of C or better to satisfy 3 credit hours of the global component. Departmental consent required.
- **Internship Option.** Complete an approved internship with an international company, either in the U.S. or abroad, related to the renewable energy field. Two hundred hours of job-related experience and a written report are required to earn 3 credit hours of internship credit. Internships should be completed during the student's junior or senior year of coursework. Instructor approval required.

Renewable Energy, B.S.

Rapid growth in the renewable energy industry has produced an increase in demand for a well-educated workforce. Texas Tech University, already a pioneer in wind energy education, has developed educational programs to meet these expanding needs and educate future leaders in the renewable energy field.

The Bachelor of Science in Renewable Energy prepares students for a career in multiple segments of the industry by offering an interdisciplinary curriculum, from education on the characteristics of renewable resources to instruction on project development and management. The versatile multidisciplinary nature of the degree plan makes Texas Tech's renewable energy program unique. A 2.25 cumulative Texas Tech GPA is required for entrance into the program.

Grading Practices. Credits for a Renewable Energy or Wind Energy course in which a grade of D or lower is earned may not be applied toward the fulfillment of the Renewable Energy degree, minor, or certificate. No course may be used more than once on a degree plan unless it has the statement "may be repeated for credit" in the official published course description.

Communication Literacy Requirement. Communication literacy in Renewable Energy is evidenced by competence in reading, writing, debating, software skill and interpretation, and presenting. The BSRE academic committee supports a holistic approach to developing communication literacy in our student population. Students will develop communication literacy fundamentals in various formats like small analysis papers and in-class debates and then proceed to more nuanced forms of communication literacy by more in-depth written work and public presentations. Communication Literacy courses for the Renewable Energy major are RE 3315, 4310, and 4311.

Degree Requirements. Students will maintain a minimum 2.25 institutional GPA and must follow course prerequisites for all courses as stated in their degree plan requirements. Coursework in the B.S. in Renewable Energy must total a minimum of 120 semester hours, including 46 hours of the university's core curriculum, 47 hours of renewable energy core courses, 3 hours of a global component, and 24 hours of applied electives.

Global Component. In today's globalized renewable energy job market, students who are exposed to a foreign language, participate in a study abroad program, or gain job experience through an internship with an international company are considered more marketable and competitive.

Students will complete the College of Arts & Sciences foreign language requirement by completing 3 hours at the sophomore level or above in a single language and by choosing from the following global component options:

- **Study Abroad Option.** Complete an approved study abroad experience through the International Texas Tech Center, a Texas Tech-approved reciprocal exchange program, or a faculty-led program. Students must enroll in and successfully complete 3 credit hours of

coursework with a grade of C or better to satisfy 3 credit hours of the global component. Departmental consent required.

- **Internship Option.** Complete an approved internship with an international company, either in the U.S. or abroad, related to the renewable energy field. Two hundred hours of job-related experience and a written report are required to earn 3 credit hours of internship credit. Internships should be completed during the student's junior or senior year of coursework. Instructor approval required.

Minor. A minor is not required but is encouraged. Consult with an advisor for specific minors helpful in the Renewable Energy industry.

Undergraduate Course Descriptions

Renewable Energy (RE)

- 1110—Renewable Energy Analytical Modeling Lab (1).** Corequisite: RE 1310. Hands-on exercises using various software associated with mathematical modeling and data manipulation in renewable energy. F.
- 1300—Introduction to Renewable Energy (3).** An overview of sustainability, energy extraction methods from renewable sources, plant development, and its environmental, ecological, and social impacts will be covered. F, S.
- 1310—Analytical Methods for Renewable Energy (3).** Explains the fundamentals of renewable energy mathematical modeling (one to three dimensions). Additionally, the applications of those models to forecasting and climatology will be covered. F.
- 1311—Principles of Energy Conversion (3).** Prerequisite: RE 1310. A concept-and-problem oriented course that covers the relevant fundamentals of physics and math required for renewable energy systems understanding and modeling. S.
- 2300—Social Impacts of Renewable Energy (3).** Provides an introduction to environmental, economic, national security, health benefits, and issues of renewable energy vs. non-renewable energy. F, S.
- 2310—Methods for Renewable Energy Resource Characteristics (3).** Prerequisite: RE 1310. In-depth study of applied statistics to contextual renewable power problems. S.
- 3100—Renewable Energy Modeling Lab (1).** Prerequisite: RE 1310. In-depth instruction and hands-on assignments on the physical principles of renewable resources modeling, site assessment, GIS, and renewable data processing utilizing industry specific software. F, S.
- 3300—Renewable Energy Science and Technology I (3).** Prerequisite: RE 1300. Introduction to solar, wind, and storage working principles, renewable plant architecture, measurements of renewable energy, renewable energy application, energy conversion and sustainability. F.
- 3301—Renewable Energy Science and Technology II (3).** Prerequisite: RE 3300. Provides a deep understanding of renewable energy systems as well as the related fundamentals of electromagnetism and power electronics. S.
- 3302—Renewable Energy CAD and Design (3).** Prerequisites: RE 3300 and RE 3301. Covers 3D modeling and printing of renewable energy components. Allows students to reverse-engineer parts and print new parts as needed.
- 3310—Renewable Energy Economics and Finance (3).** Prerequisite: RE 2310. Provides in-depth understanding of the economic and financial concepts involved in both large and small-scale developments of renewable energy. F.
- 3315—Renewable Energy and the Environment (3).** Provides an overview of society's needs and future energy demands. Examines conventional energy sources and systems. Provides in-depth analysis of renewable energy sources. (CL) S.
- 4000—Internship in Renewable Energy (VI-6).** Prerequisite: Junior or senior standing, consent of instructor. Supervised internship in an approved renewable energy industry or professional establishment. May be repeated for up to 8 credit hours.
- 4303—Data Science for Renewable Energy (3).** Covers the application of the Data Science Method (DSM) for Renewable Energy specific applications. [RE 5303]
- 4307—Renewable Energy Grid Integration (3).** Prerequisite: RE 3301. In-depth instruction on electric grid operations, renewable energy grid integration, and the market and regulatory attributes of renewable energy production. [RE 5307] F.
- 4310—Renewable Energy Modeling and Design (3).** Prerequisites: ENGL 1302; RE 2300, RE 3300, RE 3301, RE 3100, and RE 3310. Instruc-

TOTAL: 15

TOTAL HOURS: 120

* Choose from the university's core curriculum list.

† **Math Elective.** Choose from: MATH 1320, 1321, 1330, 1331, 1550, and 2300. If a three-hour course is chosen, an additional two semester credit hours are required to total 120 hours.

Foreign Language: A student must complete 3 hours at the sophomore level or above in a single language. The prerequisite for all sophomore language courses is credit for the freshman level. This credit can be determined through a placement examination. The score attained on the exam will determine whether the student is placed in a second-year course, a 5-hour review course, or in some cases the first or second semester of a beginning (first-year) language course. See Arts & Sciences General Degree Requirements for further explanation.

Global Component: May be satisfied through an approved Study Abroad experience or internship with an international company (RE 4000), subject to department approval. See an academic advisor for details.

tion in the process and development of renewable energy projects emphasizing technical, environmental, and financial aspects of project development. (CL) S.

- 4311—Renewable Energy Law, Policy, and Regulation (3).** Prerequisite: RE 3315, ENGL 1302, or declared minor in legal studies. Provides an overview of the legal, regulatory, and policy issues relating to commercial-scale renewable energy generation projects from planning through decommissioning. (CL) S.
- 4313—Renewable Energy Geographic Information Systems & Mapping (3).** Prerequisites: RE 2310 and RE 3100. Focuses on the tools, methods, technology, data, and related issues of GIS and mapping systems in renewable energy.
- 4320—Independent Study in Renewable Energy (3).** Prerequisite: 9 hours of RE courses and consent of instructor. Individual research in the renewable energy area of student's choice under faculty guidance. May be repeated up to three times for credit.
- 4323—Meteorology for Renewable Energy (3).** Prerequisite: RE 1311 and RE 2310. Discusses topics associated to weather and climate at different scales oriented to Renewable Energy Meteorology (REM): Resources, Siting, and Short-term Forecast. (Paradigm: Physics-based, Data-driven). F.
- 4343—Renewable Energy Project Management (3).** Prerequisite: RE 3300. Provides an in-depth understanding of project management topics as they relate to the development of large- and small-scale renewable energy projects.
- 4390—Advanced Renewable Project Design and Analysis (3).** Prerequisites: RE 3100. Focuses on advanced renewable energy project design, layout, and optimization using real-world data, problems, and considerations.

Wind Energy (WE)

- 4321—Wind Dynamics for Wind Energy (3).** Prerequisite: RE 4323. Provides a background on the physical and mathematical bases of wind prediction.
- 4322—Wind Turbine Aerodynamics (3).** Prerequisite: RE 3301. Provides an in-depth understanding of wind turbine aerodynamic principles and applications.
- 4330—Critical Infrastructure for Renewable Energy (3).** Prerequisite: RE 3300. Addresses critical infrastructure resiliency pivotal to enhancing the cyber-physical security of a nation's electric grid and water system and reducing vulnerabilities from diverse threats to minimize the economic losses related to power grid and water security failures.

Undergraduate Minors

Actuarial Science

The interdisciplinary minor in actuarial science builds a foundation for students interested in a profession that provides advice and solutions for business and societal problems involving economic risk. To secure an entry-level position, a prospective actuary is expected to have passed several society (CAS/SOA) exams, as well as have acquired validation through education experience (VEE) credits in three areas: applied statistical methods, corporate finance, and economics. The varied courses in this interdisciplinary minor prepare students for most of these entry requirements.

Required courses: MATH 3356, 4342

Suggested courses (any four of the following): MATH 4343; FIN 3320, 3323, 3324; ECO 2301 OR AAEC 2305; ECO 2302; ECO 4305 OR AAEC 4302

Contact: Dr. Zari Rachev and Dr. Alexandre Trindade, Department of Mathematics and Statistics | 806.742.2566 | zari.rachev@ttu.edu | alex.trindade@ttu.edu

Archeological Studies

The College of Arts & Sciences offers an interdisciplinary minor in archaeological studies. This program combines archaeological courses from Classics and Anthropology to provide students with complementary perspectives on the discipline, focusing on the Mediterranean world and the New World, respectively. To complete the minor in archaeological studies, students must complete 18 hours of courses approved by the director. The minor requires a minimum of 9 hours of upper division (3000-level courses or higher) coursework. All students are required to take ANTH 2301 (Introduction to Archaeology) and CLAS 2335 (Archaeologies of the

Classical World). Students may count one field course toward the minor: ANTH 4642 (Field Archaeology), ANTH 4643 (Field Research in Skeletal Biology), or CLAS 4601 (Classical Field Archaeology). No more than 12 hours of coursework from one program can be counted toward the minor. Students must receive a grade of C or better in all courses applied toward the minor. Contact the director or see the program's website (https://www.depts.ttu.edu/sasw/anthropology/archaeological_studies.php) for a list of approved courses. Other applicable courses not on the list may be approved at the director's discretion.

Contact: Dr. Brett A. Houk, Department of Sociology, Anthropology, and Social Work | brett.houk@ttu.edu

Asian Studies

The minor in Asian studies allows students throughout the university to develop a more in-depth understanding of the history, literature, and culture of one of the most vital parts of the world. Besides taking core courses and electives drawn from a wide range of disciplines, including anthropology, architecture, English, geography, history, philosophy, political science, and theatre arts, students may also study Asian languages such as Chinese, Japanese, or Vietnamese and are encouraged to take part in study abroad programs in South Asia, East Asia, Southeast Asia, South Asia, and Central/Inner Asia. The minor in Asian Studies requires 18-22 hours of coursework in addition to the courses taken to fulfill a student's major. A minimum of 6 hours of junior/senior coursework is required for this minor, of which 3 hours must be completed in residency at Texas Tech. No more than 3 courses from one department can be counted toward the minor.

Course offerings: ARCH 4311; CHIN 1501, 2301, 2302, 4300; CMLL 1501, 1502, 2301, 2302, 4300; ENGL 3387*, 3391**, 3394; GEOG 2351; HIST 2322, 3330, 3333, 3389, 3394, 3398, 4383, 4384, 4385, 4393, 4394, 4395, 4696; HONS 3303; JAPN 1501, 1502, 2301, 2302, 4300; PHIL 2350, 3302; POLS 2361, 2371, 3300, 3364, 3368, 3376; SOC 4307; VIET 4300.

*Asian American Literature

**Vietnam War Literature

Cognitive Science

Cognitive science is the interdisciplinary study of the mind, where the mind is understood in terms of representational and computational processes. The interdisciplinary minor in cognitive science provides a well-rounded training in cognitive science by allowing students to take courses drawn from various departments across the campus, including Psychology, Philosophy, English, and Anthropology in the College of Arts & Sciences and Computer Science in the Whitacre College of Engineering. The minor requires 21 hours of coursework, and of these, 6 are required and 15 are elective.

The psychology cluster is mandatory; students then choose 2 more clusters between philosophy, linguistics/anthropology, or computer science/engineering. By default, students can take no more than 3 non-core courses from a single cluster, and students must take at least 1 non-core course in each of their 3 chosen thematic clusters.

Core Courses: PHIL 3335; PSY 1300

Psychology (mandatory): PSY 3317, 3318, 3327, 4323, 4324, 4327, 4328

Philosophy: PHIL 2310, 3330, 3340, 4310, 4330, 4331, 4335

Linguistics: ENGL 2370, 3371, 3373; ANTH 2315

Computer Science: CS 3366, 3368, 3383, 4354, 4391

Contact: Dr. Joseph Gottlieb, Department of Philosophy | joseph.gottlieb@ttu.edu

Community and Urban Studies

The College of Arts & Sciences offers an interdisciplinary minor in community and urban studies. This program exposes students to a variety of perspectives on conditions and problems of urban life, including issues of sociology, education, economics, politics, race and ethnicity, law, poverty, crime, environment, physical and mental health, art and design, planning, and others. The program is highly flexible and adaptable to each

student's needs. In the past, students have used this minor to go on to careers in education, urban planning, law, sociology, and government.

To complete the minor in community and urban studies, students must complete 18 hours of courses approved by the director. The minor requires a minimum of 6 hours of upper division (3000-level courses or higher) coursework, of which 3 hours must be completed in residency at Texas Tech (as opposed to abroad). No more than 9 hours of coursework from one program can be counted toward the minor. Students must receive a grade of C or better in all courses applied toward the minor. Contact the director for a list of approved courses. Other applicable courses not on the list may be approved at the director's discretion.

Contact: Dr. Patricia Maloney, Department of Sociology, Anthropology, and Social Work | 806.834.8969 | patricia.maloney@ttu.edu

Comparative Literature

Comparative literature is designed for students who are interested in critical studies of literatures and cultures across national boundaries. The program provides a minor for the Bachelor of Arts degree. The minor consists of 18 hours of courses, 3 hours of which must be at the 4000 level. Six hours must be upper division. Students may apply 6 hours of sophomore-level coursework from either the Department of Classical and Modern Languages and Literatures or the Department of English if such coursework is not in the student's major field. Students not majoring in a foreign language must complete at least 3 hours at the junior or senior level in a foreign language.

Individual minor programs are arranged by the student and the director of the comparative literature program. This minor may not include coursework in the student's major field unless such coursework is over and above the minimum catalog requirements for the major.

Comparative literature minors must take at least 6 hours from the following courses: CLAS 3350; CLT 4300, 4305, 4317; CMLL 2305; ENGL 3337, 3384, 3389; GERM 2312; HUM 2301, 2302; SLAV 2301; WGS 4310.

Contact: Dr. John Beusterien, Department of Classical and Modern Languages and Literatures | john.beusterien@ttu.edu

Undergraduate Course Descriptions

Comparative Literature (CLT)

4300—Individual Studies in Comparative Literature (3). Independent study in comparative literature under the guidance of a faculty member. May be repeated for credit with the consent of instructor.

4305—Contemporary Theories of Cultural Meaning (3). Introduction to the most important contemporary theories on the nature and origin of meaning in culture.

4317—Readings in Comparative Literature and Culture (3). Readings from a particular period or study of a literary theme or genre. May be repeated for credit with consent of instructor.

Dramatic Writing

The Department of English, School of Theatre & Dance, and College of Media & Communication offer an interdisciplinary minor in dramatic writing. The program is designed to prepare students to write scripts for cinema, television, and stage productions. The minor consists of 18 hours—12 in writing and 6 in analysis. Courses in which the student earns less than a C may not be counted toward the minor. This 18-hour requirement may not include courses taken to fulfill requirements in the student's major field.

The 12 hours in writing are to be chosen from the following courses and must include at least one course from each department: ENGL 2351, 3351, 4351; CMI 4370, 4375, 4380; THA 4303 (may be repeated for credit). The 6 hours in analysis will include THA 4300 and one course from the following: CMI 3345; ENGL 2388, 3388, 4312, 4315.

Contact: Professor Mark Charney | Maedgen Theatre
mark.charney@ttu.edu

Environmental Studies

The College of Arts & Sciences offers an interdisciplinary minor in Environmental Studies. This minor is nontechnical in nature and specifically designed for students seeking the Bachelor of Arts degree. It focuses on the interaction of humans and the natural environment and the consequences of that interaction. The minor does not train professional environmentalists but will, in combination with existing major programs, give students a broad foundation as preparation for more advanced environmental studies programs; professional work in law, regional planning, or resource management; and various environmental positions in government, business, or teaching. The minor also will provide students with a better understanding of basic ecology and the nature of environmental problems in order to make more knowledgeable value judgments on environmental issues.

The following general rules pertain to the Environmental Studies minor program:

1. Students minoring in Environmental Studies must complete at least 18 semester hours (6 courses) to be chosen from the courses listed.
2. Because this is an interdisciplinary program, students may not count more than two courses from any one department or discipline toward the minor.
3. Students must take at least two upper-division (junior and senior rank) courses. For this reason, the basic introductory prerequisite courses are included in most instances.
4. Students are strongly discouraged from counting courses in their major department toward fulfillment of the minor since the purpose of a minor is to explore other fields.

Electives in the program include: AAEC 4309; ARCH 1311; ATMO 1300; BIOL 1305, 1401, 1402, 3307, 3309, 4393; ECO 3336, 3356; ENGL 2310; ENTX 3300, 3301; EVHM 1302, 2302, 3300, 3305, 3306, 3350; GEOG 1401, 3310, 3353, 3355, 3360, 4301, 4321, 4357; GEOL 1303, 1350, 3322, 3323, 3328; GIST 3300, 3301; HIST 3327, 4323; HLTH 2302; LARC 2302, 4351; NRM 1300, 1401, 2305, 2307, 3302, 3307; PHIL 3325; POLS 3328, 3334; PUAD 3329; SOC 3355, 4312; RE 1300, 2300, 3315.

Contact: Dr. Mark Stoll, Department of History | mark.stoll@ttu.edu

Ethnic Studies

The college offers an interdisciplinary minor in ethnic studies. The goal of the program is to increase students' understanding of the nature and development of race relations in a globalized society. Students may, if they wish, specialize in African-American, Mexican-American, or Native-American studies. All students minoring in ethnic studies must complete at least 18 hours in ethnic content courses. No more than three courses may be taken in one department. At least 6 hours of upper-division coursework is required.

Electives in the program include, but are not limited to, the following courses: ANTH 1301, 2302, 3331, 3347; ARTH 3333, 4335; COMS 3332; HIST 3311, 3318, 3325, 3326, 3395, 4383; PSY 3398; SOC 3323, 3337; SPAN 4320, 4360.

Contact: Dr. Ignacio Luis Ramirez, Department of Sociology, Anthropology, and Social Work | 806.742.2400 | I.ramirez@ttu.edu

European Studies

The interdisciplinary minor in European studies is designed to allow students to pursue interests in European society, culture, history, and politics. It offers them the opportunity to deepen their knowledge of Europe and interactions between Europe and the wider world from ancient times to the postcolonial present. The program builds upon strengths of the Texas Tech faculty, invites students to take advantage of academic activities outside the classroom, and encourages study abroad in Europe. The minor is especially suited for students with interests in the humanities and social sciences, fine and performing arts, and law and business. A European studies minor touching on contemporary European affairs, including European integration, would suit students planning graduate study in arts and sciences and anticipating careers in education, law, business, government, and nongovernmental agencies.

The minor consists of 18 hours of coursework divided into two concentrations: Historical and Social Sciences (HSS) and Arts and Humanities (AH).

Students will take at least 6 hours in each concentration, but the total hours will number 18. Students will choose from a curriculum that currently includes courses in architecture, art, classical and modern languages and literatures, English, history, music, philosophy, political science, and theatre and dance. At least 6 hours of upper-division (3000 or 4000-level) coursework is required. Students and advisors are encouraged to get in touch with the director with any questions.

Contact: Dr. Abigail Swingen, Department of History | 806.742.3744
abigail.swingen@ttu.edu

Family Life Studies

The College of Arts & Sciences and College of Health and Human Sciences jointly offer an interdisciplinary minor in family life studies. The program involves an integrated course of study that provides the student with diverse perspectives on the family. The minor consists of 18 hours chosen from several disciplines. No more than 6 hours may be taken from any one department (SOC and SW must count as 2 different departments). Courses counted toward the major will not count toward the minor. At least 6 hours must be at the junior-senior level.

Courses may be selected from the following: CLAS 3340; COMS 3333, 3334; HDFS 2300, 2303, 2322, 3301, 3320, 3321, 3322, 3324, 3326, 3331, 3332, 3350, 3383, 3385, 4301; HIST 3322, 3323, 3394, 4325, 4326, 4328, 4375, 4380; PFI 1305; PFP 3301; PSY 2301, 2306, 3318, 3341, 4300, 4301, 4310; SOC 3325, 3331, 3335, 4327; SW 2311, 3312.

Contact: Dr. Brandon Wagner, Department of Sociology, Anthropology, and Social Work | brandon.wagner@ttu.edu

Film and Media Studies

The interdisciplinary minor in film and media studies allows students to focus on the history and criticism of film and media while encouraging courses in multiple disciplines. Because of its interdisciplinary nature, the minor complements many majors and allows students to learn about the cinema cultures of diverse countries and language groups. It offers students the freedom to explore such questions as the role of media in historical and social change, issues of media preservation, the relationship between technology and artistic expression, the relationship of media to cognition, and the study of film as a means of appreciating cultural diversity.

Although the curriculum focuses on film, courses in other media such as television, radio, photography, sound recording, video games, digital art, or media industries can apply to the minor. Students who are seeking professional training in media production will be encouraged to pursue those interests through cooperative programs in the College of Media & Communication and/or the J.T. & Margaret Talkington College of Visual & Performing Arts.

The minor in film and media studies requires 18 credit hours taken from courses in at least three departments. Students in the College of Arts & Sciences must take at least 6 hours from upper-division courses. Students should consult with the director concerning course selection and progress toward the minor. For details on eligible courses, visit https://www.depts.ttu.edu/english/programs_degrees/ba/minors/film_media_req.php.

Health Professions

An interdisciplinary minor in health professions is for students who are planning to apply to post-graduate health profession programs with very specific prerequisite requirements. The minor will meet the needs of pre-professional health careers students who may require courses outside their major. All students who are enrolled in the health professions minor will be required to complete ZOOL 2403 or 2404. No substitutions can be made. The requirements for the minor are as follows:

- A minimum of 18 hours of approved classes.
- A minimum 2.0 GPA to declare the health professions minor.
- No more than three classes from any department or program may count toward the minor. Classes with a corresponding lab (e.g., CHEM 1305/1105) will count as one class for this requirement.
- A minimum of 6 hours at the junior or senior level taken at Texas Tech.
- Substitutions to the existing course list (see below) may be made with prior approval of the advisor if a course is shown to be a prerequisite for a specific health professions program.

- Courses used to fulfill requirements for the student's major may not be applied toward fulfillment of the health professions minor (does not include adjunct requirements).

Approved courses for the minor include the following: BIOL 1402; CHEM 1305, 1105, 1307, 1107, 1308, 1108, 2303, 2103, 3305, 3105, 3306, 3106, 3310; COMS 2320, 3365; ENGL 2311; HDFS 2303, 3310, 3321, 3332, 4343; HLTH 3301, 3311; HUSC 3221; MATH 1451, 2300; MBIO 3400 OR 3401; NS 1325, 1410, 4220; PHYS 1403, 1404, 1408, 2401; PSY 3327, 4301, 4305; ZOOL 2403, 2404, 3303.

Contact: biology.advising@ttu.edu

International Studies

An interdisciplinary minor in international studies is offered for students who wish to gain an understanding of how the nations of the world are economically, politically, socially, and culturally interdependent. The minor is made up of a 9-hour core of required courses and 9 hours of electives. The core courses are SOC 3357, GEOG 2351, and POLS 2361. The advisor may allow substitutions in the core when it can be shown that they fit in with the student's major program and academic objectives.

Elective courses are selected from among courses that deal with international topics in departments within the College of Arts & Sciences. Courses from other colleges may be accepted if they have been previously approved by the program advisors.

Contact: Dr. David Lektzian, Department of Political Science
806.834.6470 | david.lektzian@ttu.edu

Linguistics

Linguistics is the scientific study of human language, its development, and use. The interdisciplinary minor in linguistics provides a well-rounded training in linguistics by allowing students to take courses drawn from various departments across the campus, including Classical & Modern Languages and Literatures; English; Philosophy; Psychology; and Sociology, Anthropology, and Social Work in the College of Arts & Sciences; the Department of Communication Studies in the College of Media & Communication; and the Department of Human Development and Family Studies in the College of Health and Human Sciences.

The minor requires 18 hours of coursework, and of these, 9 are required and 9 are elective. The required are ENGL 2370 OR 2371, 3371, and 3373. Electives may be any three courses drawn from the following pool, provided that they are selected from at least two different departments, and that one of the courses is from English. Elective options are: ANTH 3316; COMS 3301, 3332, 3334; ENGL 3372, 4300, 4371, 4373; FREN 4300; GERM 3305; GRK 4300; HDFS 3312; ITAL 4300, 4303; JAPN 4300; LING 4311, 4315, 4327, 4332, 4335, 4383; PORT 4300; RUSN 3305; SPAN 3305, 3308, 3318, 3389, 4318; TURK 4300; VIET 4300; PHIL 2310, 3330, 3340, 4310, 4330, 4331; PSY 4301.

aaron.braver@ttu.edu

Literature of Social Justice and Environment

The minor in the Literature of Social Justice and Environment (LSJE) provides a structured program that allows students to benefit from the creative possibilities of interdisciplinary research. Because of its interdisciplinary nature, the LSJE minor compliments many majors and allows students to investigate courses committed to empowering them as responsible and conscientious global citizens. This minor is intended to engage students with the most important contemporary developments in the study of race, gender, sexuality, global studies, and the natural environment. The program offers the freedom to explore diverse interdisciplinary approaches while developing a global consciousness rooted in a broad, yet practical understanding of the institutions that shape our human efforts.

Core courses in the Department of English focus on issues of social justice within the context of specific cultures and peoples. Within the LSJE curriculum, students may further explore discourses ranging from the gendered politics of the world of sports to historical treatments of nature and identity. They may choose to focus on topics of environmental ethics, political philosophy, and international politics. The program is flexible and adaptable to each student's needs.

The LSJE minor requires 18 credit hours, 6 of which are required ENGL courses. No more than two courses from any department or program may count toward the minor. The College of Arts & Sciences requires that at least 9 hours be from upper-division courses.

cordelia.barrera@ttu.edu

Religion Studies

A minor in religion studies is offered to students who wish to enhance their understanding of religion by studying it from a variety of academic perspectives. The program is intended to enable students to place their understanding of religion in the broader frameworks of several academic disciplines.

A minor in religion studies for a baccalaureate degree is composed of courses drawn from several departments in the college. Eighteen hours of coursework are necessary to complete the minor, including courses from at least three disciplines. Four of the courses in the minor must be from the core courses and such courses must be taken from at least two disciplines. Courses taken must reflect the study of at least two religious traditions. The 18 hours may not include courses taken to fulfill requirements in the student's major. Students may use one independent topics course for the minor when the topic is religion. Students may also use HONS seminars and variable-topic courses when the topic is religion. Prior to registration, the student should consult the director of the program concerning availability of courses and the student's progress in the minor.

- Core Courses: ANTH 3322; CLAS 2302, 3350; ENGL 2383, 3384; GERM 2313; HIST 3328, 3344, 3350, 3377, 4347, 4349, 4352, 4384, 4385; PHIL 2350, 3302, 3324; PSY 3310; SOC 4331.
- Other Courses: ARTH 3320, 4340; HIST 3301, 3302, 3348, 3358, 3394, 3395, 3398, 4352; PHIL 2320.

Renewable Energy

Rapid growth in the renewable energy industry has produced an increase in demand for a well-educated workforce. Texas Tech University, already a pioneer in renewable energy education, has developed educational programs to meet these expanding needs and educate future leaders in the renewable energy field.

Job growth in renewable energy has been strong, while the renewable energy industry contributes to energy independence, positive environmental impact, and favorable growth to the United States economy. Texas Tech supports undergraduate and graduate coursework in the field of renewable energy.

This minor consists of 18 hours of undergraduate renewable energy courses. A minimum of 9 hours of RE coursework must be taken at the 3000 level or above. All courses must be approved by a renewable energy advisor, and a grade of C or better achieved in each course. Renewable energy is a multidisciplinary field, and some concepts will require a background in calculus and physics.

Undergraduate Certificate

Renewable Energy

The undergraduate certificate in Renewable Energy consists of 10 hours of undergraduate renewable energy courses. A grade of C or higher in each course is required. Students pursuing the undergraduate certificate must take: RE 1300, 3300, 3301, 3100.

Department of Biological Sciences

Jennifer M. Burns, Ph.D., Chairperson

Professors: Bradley, Burns, J. Carr, Densmore, Gollahon, Kingston, McIntyre, Olson, Ray, Rice, Rock, Sheridan, H. Zhang, K. Zhang

Associate Professors: Brelsfoard, Brown, Held, Johnson, Keyel, Manthey, Phillips, Salazar-Bravo, Schmidt, Schwilk, N. Smith, van Gestel, Wakeman, Xie

Assistant Professors: Banerjee, Bono, K. Chen, Harris, Limeri, McMillan, Onyango, Reid, A. Tice

Associate Professor of Practice: Lockwood

Assistant Professors of Practice: Hartgraves, Navlekar, C. Tice

Research Associate Professor: D. Carr

Research Assistant Professor: J. Smith

Senior Lecturer: Boros

Lecturer: Monje

Instructor: Griffith

Adjunct Faculty: Alviña, Balguera-Reina, J. Chen, Fokar, Fon Tacer, Karamysheva, Li, McGuire, Morgan, Patino, Payton, Rosa, Serra-Moreno, Shi, Stevens, Tumban, Xin

Emeritus: Burns, Chesser, Collie, Coulter, Deslippe, Diamond, Dini, Heintz, Holiday, Houck, Jeter, C. J. Phillips, Proctor, Rodgers, Rylander, San Francisco, Schmidly, Strauss, Wilde, Zak

About the Department

This department supervises the following degree programs:

- Bachelor of Science in Biology
- Bachelor of Science in Cell and Molecular Biology
- Bachelor of Science in Microbiology
- Master of Science in Biology
- Master of Science in Microbiology
- Professional Science Master's in Environmental Sustainability and Natural Resources Management
- Doctor of Philosophy in Biology

Graduate Programs

For information on graduate programs offered by the Department of Biological Sciences, visit the Graduate Programs section of the catalog on page 200.

Undergraduate Programs

The department offers five distinct undergraduate programs which lead to a Bachelor of Science. These majors are biology, cell and molecular biology, microbiology, biology with a concentration in ecology and environmental biology, and biology with a concentration in premedical health sciences.

Any students entering in Fall 2018 or later must meet the TTU Assured Admission Standards to declare as a DBS major (see Admissions). Internal TTU transfer students must have a TTU GPA of 2.5 or better with a minimum 12 completed semester hours. External transfer students from other colleges and universities must have a GPA of 2.5 or better with a minimum 12 completed semester hours to declare as a DBS majors. Any student whose TTU GPA drops below 2.5 shall have one long semester to bring their TTU GPA back to 2.5; a student who fails to do so within that time limit shall be transferred out of DBS.

Departmental Requirements. Two semesters of organic chemistry are required of all majors within this department. Students are urged to take organic chemistry during their second year of study, and those whose area of interest requires a strong background in chemistry should complete a chemistry minor.

Biology majors and students in the ecology and environmental biology concentration must take either MATH 1451 (calculus) or MATH 2300 (statistics). Cell and molecular biology majors must take one semester of calculus (MATH 1451). Microbiology majors must take either MATH 1451 or MATH 2300.

Students majoring in biology, biology with a concentration in ecology and environmental biology, cell and molecular biology, or microbiology must complete PHYS 1403 and PHYS 1404 or PHYS 1408 and PHYS 2401.

Unless otherwise noted, all prerequisite courses with BIOL, MBIO, and ZOOL prefixes must be passed with a grade of C or higher. Courses with a grade of D cannot be counted toward fulfillment of requirements for a major or minor (including adjunct requirements and minors from other departments) in any program in the department.

BIOL 1401 and BIOL 1402 will satisfy the laboratory science requirements for the College of Arts & Sciences. Students can test out of BIOL 1401 and BIOL 1402 by taking the AP biology test in high school and achieving a score of at least three (3) or by passing the CLEP-S test administered by Academic Testing Services. Advanced placement scores for BIOL 1401 and BIOL 1402 will not be accepted as credit toward major requirements in the department.

BIOL 1403 and BIOL 1404 (or courses with Texas Common Course Numbers BIOL 1406 and 1407) are required for all majors in the department. Students can test out of BIOL 1403 and BIOL 1404 by taking the AP biology test in high school and achieving a score of five (5).

Communication Literacy Plan. Biological Sciences majors must complete 3 Communication Literacy courses (9 credits). Courses in the CL Plan for the B.S. in Biological Sciences in all concentrations are BIOL 1403, 1404, 3404, 3405, 3416, 4307, 4320, 4393, 4416; MBIO 3403, 4303, 4367, 4401; ZOOL 4313, 4410, and 4421. Guidelines for CL courses can be found on the [Office of the Provost website](#).

Research Opportunities. The department encourages undergraduate students to work with departmental faculty to obtain first-hand experience with research in the life sciences. Students involved in research projects may have the opportunity to receive competitive grants, present papers at scientific meetings, and co-author papers published in scientific journals. Information describing research interests of the faculty is available from advisors or on the departmental website at www.biol.ttu.edu. Students should contact faculty members with whom they wish to conduct research prior to registering for BIOL 4100 or BIOL 4300. No more than 6 hours of undergraduate research credit may be counted toward any major in the department. Students conducting biologically relevant research under the mentorship of faculty in other departments can petition to have their efforts credited towards their degree.

Departmental Residency Requirement. At least 10 hours of upper-division biological sciences courses for all majors in this department and at least 6 hours of upper-division biological sciences courses for biology minors must be taken at Texas Tech.

Teacher Education. Students who complete a major in biology and satisfy other requirements for the B.S. degree, including 18 hours of professional educational courses, will be qualified to teach high school biology in the public schools of Texas. The following courses meet both the major and the certification requirements in life science:

- BIOL 1403 and 1404, 3320, 3120, 3416; MBIO 3401; BIOL 3404 or 3401; ZOOL 2403 or 3405; BIOL 4416 or ZOOL 4407.
- At least one of BIOL 3309, 3307, 3305, or ZOOL 4312.
- PHYS 1403 and 1404 or PHYS 1408 and 2401; CHEM 1307, 1107, 1308, 1108, and one semester of organic chemistry, which may be satisfied with CHEM 3305 and 3105.

Students may satisfy the requirements for the teaching of high school biology under the multidisciplinary science major with an emphasis in biology. Alternatively, students interested in becoming high school teachers should minor in secondary education. Both the multidisciplinary science major and the secondary education minor are administered by the Department of Teacher Education, in the College of Education, and interested Biology students should consult with advisors in those programs as well.

Minors. Students majoring in biology may minor in any other field not offered by this department or in Health Professions.

Biology, B.S.

Students majoring in biology must complete a total of 120 credit hours for graduation, including a minimum of 39 hours taken from this department. Requirements for the B.S. in Biology are as follows:

- BIOL 1403, 1404, 3305, 3309, 3320, 3120, 3416
- CHEM 1307, 1308, 1107, 1108, 3305, 3306, 3105, 3106
- PHYS 1403, 1404 OR 1408, 2401
- MATH 2300 OR 1451
- Additional hours of 3000-4000 level biological sciences courses (prefixes BIOL, MBIO, and ZOOL) as needed to bring the total biological sciences hours to the 39-hour minimum. This does not include MBIO 3400. Students may apply one 3-hour PHIL credit from PHIL 3322, PHIL 3325, or PHIL 3334 as an upper-level elective. Honors students may take HONS 4332 as an approved biology elective. No more than 6 hours of undergraduate research may apply to the degree.

Ecology and Environmental Biology Concentration Requirements.

Students majoring in biology for the B.S. degree may gain a concentration in ecology and environmental biology by completing a minimum of 39 semester hours from this department. Requirements for this concentration are as follows:

- BIOL 1403, 1404, 3305, 3309, 3416
- CHEM 1307, 1308, 1107, 1108, 3305, 3306, 3105, 3106
- PHYS 1403, 1404 OR 1408, 2401
- MATH 2300 OR 1451
- Group I—At least one course from: BIOL 3306, BIOL 3401 OR NRM 3401; MBIO 3401; ZOOL 4409 OR BIOL 3320 AND BIOL 3120
- Group II—At least one course from: BIOL 3404, 4392, 4416; ZOOL 3405, 4407
- Group III—At least four courses from: BIOL 3301, 3307, 3405, 4301, 4304, 4310, 4330, 4332, 4350, 4393, 4418; MBIO 3403, 4401; ZOOL 4312, 4313, 4321, 4406, 4410, 4421
- Group IV—Additional hours of 3000-4000 level biological sciences courses (prefixes BIOL, MBIO, and ZOOL) as needed to bring the total biological sciences hours to the 39-hour minimum. This does not include MBIO 3400. Students may apply one 3-hour PHIL credit from PHIL 3322, PHIL 3325, or PHIL 3334 as an upper-level elective. Honors students may take HONS 4332 as an approved biology elective. No more than 6 hours of undergraduate research may apply to the degree.

Premedical Health Sciences Concentration Requirements. Students majoring in Biology for the B.S. degree may gain a concentration in Premedical Health Sciences by completing a total of 120 credit hours for graduation, including a minimum of 39 hours taken from this department. Requirements for this concentration are as follows:

- BIOL 1403, 1404, 3305, 3309, 3120, 3320, 3416
- CHEM 1307, 1308, 1107, 1108, 3305, 3306, 3105, 3106
- PHYS 1403, 1404 OR 1408, 2401
- MATH 2300 OR 1451
- Group I—At least one from: BIOL 3302, 3304, 3308, 3405, 4303, 4307, 4320, 4340; ZOOL 3405
- Group II—At least two from: BIOL 4311, 4324; MBIO 3403, 4310, 4402; ZOOL 3303, 4313, 4409
- Group III—At least one from: BIOL 4332; MBIO 3303, 3401, 4311, 4303, 4404
- Group IV—Additional hours of 3000-4000 level biological sciences courses (prefixes BIOL, MBIO, and ZOOL) as needed to bring the total biological sciences hours to the 39-hour minimum. Students may apply one 3-hour PHIL credit from PHIL 3322 (Biomedical Ethics) or PHIL 3334 (Philosophy of Biology) as an upper-level elective. Students may apply up to 3 hours from the following as upper-level electives: NS 4220 (Medical Terminology), ENTX 4325 (Principles of Toxicology), ENTX 4326 (Principles of Toxicology II). Honors students may take HONS 4332 as an approved biology elective. No more than 6 hours of undergraduate research may apply.

Cell and Molecular Biology, B.S.

Students majoring in cell and molecular biology must complete a total of 120 credit hours for graduation, including a minimum of 39 hours taken from this department. Requirements for the B.S. in Cell and Molecular Biology are as follows:

Biology, B.S. Sample Curriculum

NOTE: Students in all three undergraduate majors (biology, cell and molecular biology, and microbiology) should take identical courses during the first two years. For the third and fourth years, students should consult with departmental advisors about the appropriate 3000- and 4000-level biological sciences course requirements for their majors. All three majors require 39 total hours of biological science classes. Non-science courses required for all three majors are identical. The sample curriculum below assumes a chemistry minor.

FIRST YEAR**Fall**

- ☐ CHEM 1307 - Principles of Chemistry I (3 SCH)*
- ☐ CHEM 1107 - Experimental Principles of Chemistry I (1 SCH)
- ☐ MATH 1320 - College Algebra (3 SCH)†
- ☐ ENGL 1301 - Essentials of College Rhetoric (3 SCH)
- ☐ BIOL 1403 - Biology I (4 SCH)
- ☐ Personal Fitness and Wellness (1 SCH)

TOTAL: 15

Spring

- ☐ CHEM 1308 - Principles of Chemistry II (3 SCH)
- ☐ CHEM 1108 - Experimental Principles of Chemistry II (1 SCH)
- ☐ MATH 2300 - Statistical Methods (3 SCH)
(MATH 1451 required for degree in cell & molecular biology.)
- ☐ ENGL 1302 - Advanced College Rhetoric (3 SCH)
- ☐ BIOL 1404 - Biology II (4 SCH)

TOTAL: 14

SECOND YEAR**Fall**

- ☐ CHEM 3305 - Organic Chemistry I (3 SCH)
- ☐ CHEM 3105 - Experimental Organic Chemistry I (1 SCH)
- ☐ ENGL Literature (3 SCH)
(Course should fulfill Language, Philosophy, and Culture requirement)
- ☐ U.S. History (3 SCH)
- ☐ BIOL 3416 - Genetics (4 SCH)

TOTAL: 14

Spring

- ☐ CHEM 3306 - Organic Chemistry II (3 SCH)
- ☐ CHEM 3106 - Experimental Organic Chemistry II (1 SCH)
- ☐ U.S. History (3 SCH)
- ☐ PHYS 1403 - General Physics I (4 SCH)
- ☐ BIOL 3305 - Organic Evolution (3 SCH)

TOTAL: 14

THIRD YEAR**Fall**

- ☐ Foreign Language (5 SCH)
- ☐ POLS 1301 - American Government (3 SCH)
- ☐ BIOL 3320 - Cell Biology (3 SCH)
- ☐ BIOL 3120 - Cell Biology Laboratory (1 SCH)
- ☐ PHYS 1404 - General Physics II (4 SCH)

TOTAL: 16

Spring

- ☐ Social & Behavioral Sciences Elective (3 SCH)
- ☐ POLS 2306 - Texas Politics and Topics (3 SCH)
- ☐ BIOL 3309 - Principles of Ecology (3 SCH)
- ☐ Foreign Language (5 SCH)
- ☐ CHEM Elective (for minor) (3 SCH)

TOTAL: 17

FOURTH YEAR**Fall**

- ☐ Oral Communication Elective (3 SCH)
- ☐ Creative Arts Elective (3 SCH)
- ☐ Foreign Language (3 SCH)
- ☐ Advanced BIOL Elective (3 SCH)
- ☐ Elective (3 SCH)

TOTAL: 15

Spring

- ☐ Advanced BIOL Electives (14 SCH)
(Students should check with their academic advisor for complete listing of approved electives.)
- ☐ Additional elective to meet 120-hour minimum (1 SCH)

TOTAL: 15

TOTAL HOURS: 120

The teacher education program includes a full year of student teaching. See Teacher Education.

* Students may have to take CHEM 1301 the first semester if they do not pass the Chemistry Placement Exam.

† Because cell and molecular biology majors are required to take calculus, some students may want to substitute MATH 1550, Precalculus.

College of Arts & Sciences General Degree Requirements. Select from College of Arts & Sciences General Degree Requirements.

Foreign Language. A student must complete 3 hours at the sophomore level or above in a single language. The prerequisite for all sophomore language courses is credit for the freshman level. This credit can be determined through a credit by examination. The score attained on the exam will determine whether the student is placed in a second-year course, a 5-hour review course, or in some cases the first or second semester of a beginning (first-year) language course. See Arts & Sciences General Degree Requirements for further explanation.

- BIOL 1403, 1404, 3302, 3320, 3120, 3416, 4320
- CHEM 1307, 1308, 1107, 1108, 3305, 3306, 3105, 3106, 3310 OR 3311 AND 3312
- MATH 1451
- PHYS 1403, 1404 OR 1408, 2401
- An additional four (4) courses of 3000-4000 level biological sciences courses (one of which must include a laboratory) from: BIOL 3410, 3305, 4300 (counts as a laboratory course; 3 hours may apply as an CMBI elective – additional 3 hours may apply as elective needed to reach 39 hours), 4307 4324, 4332; EITHER BIOL 3401 OR NRM 3401; MBIO 3401, 4303, 4310, 4311, 4367, 4402, 4404, 4406; ZOOL 3401, 4409
- Additional hours of 3000-4000 level biological sciences courses (prefixes BIOL, MBIO, and ZOOL) as needed to bring the total biological sciences hours to the 39-hour minimum. This does not include MBIO 3400. Students may apply one 3-hour PHIL credit from PHIL 3322, PHIL 3325, or PHIL 3334 as an upper-level elective. No more than 6 hours of undergraduate research may apply to the degree.

Microbiology, B.S.

Students majoring in microbiology must complete a total of 120 credit hours for graduation, including a minimum of 39 hours taken from this department. Requirements for the B.S. in Microbiology are as follows:

- BIOL 1403, 1404, 3305, 3416 OR MBIO 4406; MBIO 3401
- CHEM 1307, 1308, 1107, 1108, 3305, 3306, 3105, 3106, 3310 OR 3311 AND 3312
- PHYS 1403, 1404 OR 1408, PHYS 2401
- MATH 2300 OR 1451
- An additional five (5) courses of 3000-4000 level biological sciences courses from: BIOL 3320, 4300 (three hours may apply as an MBIO elective; additional 3 hours may apply as elective needed to reach 39 hours), 4311, 4332; MBIO 3303, 3403, 4303, 4310, 4311, 4367, 4401, 4402, 4403, 4404, 4406; FDSC 3301; HONS 3331
- Additional hours of 3000-4000 level biological sciences courses (prefixes BIOL, MBIO, and ZOOL) as needed to bring the total biological sciences hours to the 39-hour minimum. This does not include MBIO 3400. Students may apply one 3-hour PHIL credit from PHIL 3322, PHIL 3325, or PHIL 3334 as an upper-level elective. HONS 4332 is an option for students in the Honors College. No more than 6 hours of undergraduate research may apply to the degree.

Biology, Undergraduate Minor

Students from other departments may minor in biology and must complete 18 hours in biological sciences (includes courses with BIOL, MBIO, and ZOOL prefixes). Either BIOL 1401 and BIOL 1402 OR BIOL 1403 and BIOL 1404 must account for 8 of these hours; another 6 hours must come from 3000- and 4000-level courses. No more than 6 hours of undergraduate research may apply to the minor. Students desiring to minor in biological sciences should consult the Biology advisors no later than the beginning of their junior year.

Vector-Borne Diseases, Undergraduate Certificate

Graduates of this 12-hour undergraduate certificate program will possess a strong foundation in entomology, vector biology, and the management of vector-borne diseases, making them highly competitive in fields such as a public health, vector control, and entomology. Students entering the program should have a background in biology or a related field, and prerequisites may apply for certain courses. Program duration will depend upon when courses are offered and the student's interests, but the certificate program is expected to be completed in two semesters.

- Core Courses (6 Hours): ZOOL 4313; BIOL 4326, 4301
- Electives (6 Hours): BIOL 4311, 4300; PSS 2401, 4305; MBIO 3403; ZOOL 4321

Undergraduate Course Descriptions

Biology (BIOL)

- 1110—Basic Lab in Biology (1).** Prerequisite: Consent of instructor. Laboratory topics not included in other courses. Content may differ each time offered. May be repeated up to 3 credit hours.
- 1113—Environmental Problems Laboratory (1).** [ENVR1101] Laboratory and field studies of environmental problems. Not for major credit. Partially fulfills core Life and Physical Sciences requirement.
- 1301—Basic Topics in Biology (3).** Prerequisite: Consent of instructor. Areas of interest not included in other courses. Content is normally different each time offered. May repeat for credit three times with different content.
- 1305—Ecology and Environmental Problems (3).** [BIOL2306, 2406, ENVR1301, 1401] An introduction to ecological principles and the analysis of environmental problems. Not for major credit. BIOL 1401, BIOL 1402, 1305, and BIOL 1306 may be taken in any sequence or simultaneously. Partially fulfills core Life and Physical Sciences requirement.
- 1306—Biology of Sex (3).** An introduction to the diversity of reproductive modes in organisms and issues such as human reproduction, the evolution of sex, and mating systems. BIOL 1401, BIOL 1402, BIOL 1305, and 1306 may be taken in any sequence or simultaneously.
- 1401—Biology of Plants (4).** [BIOL1311+1111, 1411] An introductory coverage of plant-environment interactions and plant structure and function as they relate to our understanding of the plant world. Expressly designed for students not majoring in a biological science. BIOL 1401 and BIOL 1402 may be taken in any sequence or simultaneously. Includes a lab. Partially fulfills core Life and Physical Sciences requirement.
- 1402—Biology of Animals (4).** [BIOL1313+1113, 1413] An introductory coverage of animal-environment interactions and animal structure, function, and behavior as they relate to our understanding of the animal world. Expressly designed for students not majoring in a biological science. BIOL 1401 and 1402 may be taken in any sequence or simultaneously. Includes a lab. Partially fulfills core Life and Physical Sciences requirement.
- 1403—Biology I (4).** [BIOL1306+1106, 1406] Fundamentals of molecular biology, cell biology, genetics, and evolutionary theory. First semester of an integrated course recommended for students majoring in biological sciences or related disciplines. Includes a lab. (CL)
- 1404—Biology II (4).** [BIOL1307+1107, 1407] Fundamentals of organismal biology, population biology, and biological diversity. Second semester of an integrated course recommended for majors in biological and related sciences. Includes a lab. (CL)
- 2120—Introductory Cell and Molecular Biology (1).** An introduction to current areas of research and to recent technological advances in the field of cellular and molecular biology.
- 2202—Interdisciplinary Science Issues (2).** Online interdisciplinary science laboratory course emphasizing the impact of science to contemporary human activities. Intended for non-major transfer students needing laboratory credit towards graduation requirements.
- 3109—Principles of Ecology Laboratory (1).** Prerequisite or corequisite: BIOL 3309. Explores ecology through laboratory and field exercises that enhance understanding of ecological processes spanning multiple levels from individuals to ecosystems.
- 3120—Cell Biology Laboratory (1).** Prerequisite or corequisite: BIOL 3320. A survey of the experimental techniques used to study cells and cellular processes.
- 3210—Biology Happenings and the World Around You (2).** Covers a variety of current topics: zoonotic diseases, GMOs, climate change's effects on biodiversity and humans, hunting, anti-vaccination movement, invasive species, pollution, etc.
- 3301—Field Ecology (3).** Teaches students how to design, conduct, analyze, and report on the results of field studies in aquatic and terrestrial environments.
- 3302—Developmental Biology (3).** Prerequisite: BIOL 3416. A synthesis of animal and plant development, stressing the basic principles of molecular, cellular, and organismic development.
- 3304—Human Genetics (3).** Prerequisite: BIOL 3416. A study of the frequency and transmission of human genetics and chromosomal mutations and the application of this information to individual cases.
- 3305—Organic Evolution (3).** Prerequisites: BIOL 1403, BIOL 1404. The principles and processes of evolution, and how they relate to the ecology, physiology, behavior, morphology, and systematic classification of organisms.
- 3306—Principles of Plant Biology (3).** Prerequisites: BIOL 1403 and BIOL 1404. A survey of plant structure and function relationships, plant evolution and the issues of plant reproduction, and plant responses to the environment.
- 3307—Population Biology (3).** Introduction to population biology theory with emphasis on interaction between genetics and ecology.
- 3308—Genomes and Society (3).** Prerequisites: BIOL 3416 or consent of instructor. Provides a basic understanding of the concepts underlying genomics and opportunities to critically think about the implications of this growing field of study in biology.
- 3309—Principles of Ecology (3).** Prerequisite: BIOL 1401 and BIOL 1402 or BIOL 1403 and BIOL 1404. An examination of ecological systems emphasizing populations, communities, and ecosystems.
- 3320—Cell Biology (3).** Prerequisites: BIOL 1403, BIOL 1404, BIOL 3416, and junior standing. An integrated study of the basic principles of cell structure and function.
- 3401—Plant Physiology (4).** Prerequisites: CHEM 3305 and BIOL 1401 or BIOL 1403, BIOL 1404. The physiology of plants with an emphasis on relationships of structure to function in vascular plants. Includes a lab. [NRM 3401]
- 3404—Evolution and Classification of Plants (4).** Prerequisite: BIOL 1401 or BIOL 1404. A survey of plant diversity from an evolutionary perspective, including genetic analysis, classification schemes, identification / documentation techniques, and field trips to study local flora. Includes a lab. (CL)
- 3405—Plant Ecology (4).** Prerequisites: BIOL 1401 or BIOL 1404. The ecology of plants including plant-environment relations, plant life histories, plant-animal interactions, and current global issues in plant ecology. Includes a lab. (CL)
- 3410—Experimental Molecular Biology (4).** Prerequisite: BIOL 3320 or consent of instructor. Introduction to modern molecular biology research techniques used to study eukaryotic cells. Includes a lab. Offered odd years only.
- 3416—Genetics (4).** Prerequisite: C or better in BIOL 1403. Genetic principles with emphasis on mechanisms and problem solving. Includes a lab. Includes a lab. (CL)
- 4100—Undergraduate Research in Biology (1).** Prerequisite: Consent of instructor. Selected research problems according to the needs of the students. May be repeated or taken parallel for credit in another field or with new materials in the same field.
- 4101—Biology Seminar (1).** Senior standing in biology, botany, or zoology. Critical reviews of classical and recent literature and reports of original investigations. May be repeated once for credit. (CL)
- 4110—Topics in Biology (1).** Prerequisite: Consent of instructor. Special areas of current interest not commonly included in other courses. Content normally different each time offered. May be repeated for credit up to 3 hours.
- 4300—Undergraduate Research in Biology (3).** Prerequisite: Consent of instructor. Selected research problems according to the needs of the students. May be repeated or taken parallel for credit in another field or with new materials in the same field. No more than 6 hours can be applied to degree requirements.
- 4301—Topics in Biology (3).** Prerequisite: Consent of instructor. Special areas of current interest not commonly included in other courses. Content normally differs with section number. May be repeated for credit with different course content. (Neurobiology is CL)
- 4302—Field Botany and Natural History Collections (3).** Students will learn about herbarium curation, collect West Texas specimens, analyze scientific literature, and discuss the societal impact of natural history collections.
- 4303—Population Genetics (3).** Prerequisite: BIOL 3416 or equivalent course in genetics; MATH 1320 or equivalent course in algebra recommended. The origin, maintenance, and significance of genetic variation in natural and artificial populations.
- 4304—Plant Molecular Biology (3).** Prerequisites: C or better in BIOL 1403 and BIOL 1404. Molecular analysis of plant metabolism and signaling. S, alternate years.
- 4307—Cancer Biology (3).** Prerequisite: C or better in BIOL 1403, BIOL 1404, and BIOL 3416. Presents a comprehensive overview covering the history of cancer biology to the most recent developments in the field. Molecular and cellular biology as well as clinical topics will be covered. (CL)
- 4310—Community Ecology (3).** Prerequisite: BIOL 3309 or consent of instructor. An investigation of theoretical and experimental approaches to understanding the composition, diversity, and structure of plant, animal, and microbial communities.
- 4311—Applied Virology (3).** Prerequisite: C or better in MBIO 4310. BIOL 3320, BIOL 3416, and MBIO 4402 are highly recommended. Covers in detail aspects of infectious diseases caused by human viruses and the applicability of virology to other fields in biology.
- 4316—Principles of Terrestrial Ecosystem Ecology (3).** Students will learn the fundamentals of ecosystem ecology, including interactions between

biological organisms and their environment. Students will be evaluated on their ability to discuss and disseminate course topics. [BIOL 5316]

- 4320—Molecular Biology (3).** Prerequisite: C or better in BIOL 3320 or instructor consent. Includes the study of molecular processes involved in cellular functioning of eukaryotic and prokaryotic cells and viruses together with recent technological advances in molecular biology research. (CL)
- 4324—General Endocrinology (3).** Prerequisites: BIOL 1403 and BIOL 1404. Hormones as chemical coordinators of bodily functions. [BIOL 5324]
- 4326—Vector Biology (3).** Prerequisites: BIOL 1403 and BIOL 1404. Introduces students to the principles of transmission of pathogens by arthropods with an emphasis on understanding the biology and ecology of different arthropod taxa. [BIOL 5326]
- 4330—Landscape Ecology (3).** Prerequisite: BIOL 1404 or BIOL 3309. An examination of how we quantify patterns and effects of spatial heterogeneity on organisms and ecological processes.
- 4332—Ecology and Evolution of Infectious Disease (3).** Prerequisites: BIOL 1403 and BIOL 1404 and at least one of MBIO 3401 or BIOL 3309 or BIOL 3305. Introduces students to key concepts in the ecology and evolution of infectious diseases across diverse taxa and levels and connects these key concepts to applications to a variety of real world issues, including climate change and conservation. [BIOL 6332]
- 4340—Genomes and Genome Evolution (3).** Prerequisite: BIOL 3416. Fundamentals of genome analysis and how genomics impacts our understanding of organismal biology, evolution, and medicine.
- 4350—Physiological Plant Ecology (3).** Prerequisites: BIOL 1404, and either BIOL 3306 or permission from instructor. Investigation of the physiological processes of plants that contribute to understanding the ecological distribution and evolutionary success of plants in their physical environment.
- 4360—Conservation Biology (3).** Prerequisite: BIOL 3309. Focuses on the principles of conservation biology, discussing the values of and threats to biodiversity before exploring interdisciplinary approaches to biodiversity protection. [BIOL 5360]
- 4392—Marine Biology (3).** Prerequisites: BIOL 3309 and BIOL 3405 or instructor consent. Introduction to the study of marine organisms and their environments.
- 4393—Tropical Marine Biology (3).** Prerequisites: BIOL 1401 and BIOL 1402 or BIOL 1403 and BIOL 1404. Introduces students to the ecology and diversity of tropical marine communities. (CL)
- 4409—Plant Development (4).** Prerequisites: BIOL 1403, BIOL 1404, and BIOL 3416. Integration of positional, environmental, hormonal, and genetic regulation of plant development; emphasis on model species and comparisons to animals. Alternate years. Includes a lab.
- 4416—Comparative Invertebrate Zoology (4).** Prerequisites: BIOL 1401 and BIOL 1402 or BIOL 1403 and BIOL 1404. Structure, life history, and evolution of the invertebrates. Includes a lab. (CL) [BIOL 5416]
- 4418—General Ornithology (4).** Prerequisite: BIOL 1402 or BIOL 1404 or consent of instructor. Emphasis on laboratory and field work in systematics, ecology, and anatomy of birds. Local field trips. Includes a lab. [BIOL 5418]

Microbiology (MBIO)

- 3303—Microbiomes (3).** Prerequisites: BIOL 1403 and BIOL 1404. Microbiomes are universal and essential to human, animal, plant, and ecosystem health. This course deeply examines microbiome diversity, function, sequencing methods, bioinformatics, and key controversies. [BIOL 6301]
- 3400—Microbiology (4).** Prerequisite: BIOL 1402 or BIOL 1403 or BIOL 1404 or ZOOL 2403 or equivalent; CHEM 1305 or CHEM 1307. Morphology, physiology, and activities of bacteria, fungi, and viruses. Primarily for students of agriculture, food and nutrition, animal science, secondary education, nursing, and others seeking an advanced science elective. Includes a lab. May not be applied to degree requirements for biological sciences majors.
- 3401—Principles of Microbiology (4).** Prerequisite: BIOL 1403 and BIOL 1404 or BIOL 1403 and junior standing; prerequisite or corequisite CHEM 3305. Morphology, physiology, and classification of microorganisms. Includes a lab.
- 3403—Parasitology (4).** Prerequisites: BIOL 1401 and BIOL 1402 or BIOL 1403 and BIOL 1404. Morphology, life cycles, and physiology of protozoan and helminth parasites, with emphasis on broad aspects of parasitism and examples with medical and economic interest. (CL)
- 4303—Physiology of Bacteria (3).** Prerequisite: MBIO 3401. Anatomy and physiology of the bacterial cell. A molecular approach. (CL)
- 4310—Introduction to Virology (3).** Prerequisite: C or better in MBIO 3401 or BIOL 3320 or instructor consent. An introduction to virus structure, propagation, and transmission, with a main focus on the molecular mechanisms of replication of viruses from eukaryotes and prokaryotes.

- 4311—Biofilms (3).** Prerequisites: C or better in MBIO 3400 or MBIO 3401. Explores the community-associated of microorganisms and how competition and cooperativity within these communities can be either beneficial or detrimental to human health.
- 4367—Molecular Pathogenesis of Protozoans (3).** Prerequisite: MBIO 3401. The basic biology and fundamental mechanism of pathogenesis of protozoan parasites. (CL)
- 4401—Microbial Ecology (4).** Prerequisite: MBIO 3401 or BIOL 3309. An examination of the population and community ecology of bacteria and fungi, and the roles of these organisms in ecosystem processes. Includes a lab. (CL)
- 4402—Immunology and Serology (4).** Prerequisite: MBIO 3401 or BIOL 3320 or CHEM 3312. The fundamental biology of the human immune system, including immune responses to microorganisms and inflammatory diseases. The associated laboratory covers serological techniques and methods of immune cell identification.
- 4403—The Biology of Fungi (4).** Prerequisites: C- or higher in BIOL 1403 and BIOL 1404 or equivalent, MBIO 3401 is recommended, or instructor consent. An in-depth coverage of fungal taxonomy, physiology, genetics, cell biology, ecology, and evolution, with lab activities focusing on identification and culture of fungi.
- 4404—Pathogenic Microbiology (4).** Prerequisite: MBIO 3401. A detailed study of pathogenic microorganisms. Includes a laboratory discussion of medical case studies. Includes a lab.
- 4406—The Genetics of Microorganisms (4).** Prerequisite: MBIO 3401 or instructor consent. The principles of genetic systems existing among microorganisms, with emphasis upon bacteria and bacteriophages. Includes a lab. Includes a lab.

Zoology (ZOOL)

- 2403—Human Anatomy and Physiology I (4).** [BIOL2101+2301, 2401] Prerequisites: Three hours of chemistry recommended. Human gross and microscopic anatomy for allied health majors. Not for major credit. Includes a lab. Partially fulfills core Life and Physical Sciences requirement.
- 2404—Human Anatomy and Physiology II (4).** [BIOL2102+2302, 2402] Prerequisites: ZOOL 2403 strongly recommended, plus 3 hours of college chemistry. Human physiology for allied health majors. Not for major credit. Includes a lab.
- 3303—Basic Concepts of Pathophysiology (3).** Prerequisites: ZOOL 2403 and ZOOL 2404. Study of the physiologic basis of disease for healthcare professionals. Emphasis on application of pathophysiology concepts to the recognition of pathologic conditions across the lifespan.
- 3401—Animal Histology (4).** Prerequisites: BIOL 1403 and BIOL 1404, CHEM 1307. The study of normal tissues of the human and other mammals. An introductory course recommended for students of pathology, medical sciences, and biomedical sciences. Includes a lab.
- 3405—Vertebrate Structure and Development (4).** Prerequisites: BIOL 1403 and BIOL 1404. The comparative study of vertebrate structure and embryological development.
- 4312—Animal Behavior (3).** Prerequisite: BIOL 1404 or BIOL 3309. Comparative study of animal behavior; its genetic basis, expression through neurophysiological mechanisms, function in the environment, and adaptive role during evolutionary history.
- 4313—Medical Entomology (3).** Prerequisites: BIOL 1401 and BIOL 1402 or BIOL 1403 and BIOL 1404. An introduction to the roles of insects and other arthropods in the direct causation of disease or disease transmission in humans. Online. (CL)
- 4321—Insect Diversity (3).** Prerequisites: BIOL 1401 and BIOL 1402 or BIOL 1403 and BIOL 1404; BIOL 3309 recommended. An advanced exploration of the behavior, ecology, and evolution of insects.
- 4406—Introduction to Mammalogy (4).** Prerequisite: BIOL 1402 or BIOL 1404. Study of the classification, natural history, and ecology of mammals. Includes a lab.
- 4407—Natural History of the Vertebrates (4).** Prerequisites: BIOL 1401 and BIOL 1402 or BIOL 1403 and BIOL 1404. Evolutionary relationships, identification, and ecology of vertebrates. Local fauna emphasized. Includes a lab.
- 4409—Comparative Animal Physiology (4).** Prerequisites: CHEM 1308, BIOL 1403, and BIOL 1404. A comparison of physiological functions of animals in the major phyla. Includes a lab.
- 4410—Introduction to Ichthyology (4).** Prerequisite: BIOL 1402 or BIOL 1404. Diversity, evolutionary relationships, ecology, and anatomy of fishes. Includes a lab. (CL)
- 4421—Field Herpetology (4).** Prerequisite: BIOL 1402 or BIOL 1404 or equivalent. Evolutionary history, anatomy and physiology, and behavior of reptiles and amphibians. Field component includes trips to sites in central and West Texas. Includes a lab. (CL)

Department of Chemistry and Biochemistry

Dimitri Pappas, Ph.D., Chairperson

Horn Distinguished Professors: Li, Mechref

Piper Professor: Casadonte

Welch Chair: Mechref

Professors: Gamez, Ge, Gellene, A. Gorden, Heppert, Korzeniewski, Krempner, Morales, Pappas, Paré, Poirier, Quitevis, Shi

Associate Professors: Cozzolino, J. Gorden, Mayer, Smith, Thompson, Weber, Wylie

Assistant Professors: Chen, Georgieva, Kristufek, R. Liang, Park, Ravanfar, Tropp, Whitehurst

Research Professor: Lischka

Instructors: Mason, McLaurin, Pedrech, Pool, Xu

Adjunct Faculty: Aquino, El-Yazbj, Findlater, Guan, Hutchins, Latham, H. Liang, Perera, Sutton

Joint Faculty: Horita, Ridley, Shamshina

CONTACT INFORMATION: 104 Chemistry Building | 1204 Boston Ave. Box 41061 | Lubbock, TX 79409-1061 | T 806.742.3067 | F 806.742.1289 chem.ttu.edu

About the Department

This department supervises the following degree programs:

- Bachelor of Arts in Chemistry
- Bachelor of Science in Chemistry
- Bachelor of Arts in Biochemistry
- Bachelor of Science in Biochemistry
- Master of Science in Chemistry
- Doctor of Philosophy in Chemistry

Students seeking graduate degrees may specialize in analytical, inorganic, organic, physical, or theoretical chemistry; chemical education; chemical physics; or biochemistry.

Graduate Programs

For information on graduate programs offered by the Department of Chemistry and Biochemistry, visit the Graduate Programs section on page 202.

Undergraduate Programs

The Department of Chemistry and Biochemistry offers four undergraduate degree programs in chemistry and biochemistry. The Bachelor of Science degree programs are most appropriate for students who plan to pursue a professional, research-based career in chemistry or biochemistry. The Bachelor of Arts options provide a strong undergraduate background in the central sciences of chemistry and biochemistry as preparation for other objectives, such as health-related professional schools, teaching, or sales. The undergraduate advisor provides career counseling and assists students in selecting courses and fulfilling degree requirements. The department offers honors-level courses to qualified students (admitted to the Honors College) in both general and organic chemistry. Highly motivated undergraduate chemistry or biochemistry majors are strongly encouraged to complete an individual research project under the supervision of a faculty member. Undergraduate research students gain a working knowledge of research methods in a specialized area and familiarity with a wide range of instrumentation and techniques. The department has very active chapters of the Student Affiliates of the American Chemical Society (ACS) and the American Society for Biochemistry and Molecular Biology (ASBMB).

Students who have not completed the prerequisites for a course in which they have enrolled will not be allowed to continue and will be dropped from the course by the department.

Chemistry Curriculum. The undergraduate student may take courses leading to a Bachelor of Arts or a Bachelor of Science degree in chemistry.

Either program offers a wide choice of minor subjects in Arts & Sciences or other colleges. Consult the undergraduate advisor prior to registration for a particular minor program.

Biochemistry Curriculum. Both the Bachelor of Science and Bachelor of Arts degree programs in biochemistry have a common objective of providing general education and training in the chemical aspects of biological systems through a combination of coursework in biochemistry, chemistry, and biology. Both of the biochemistry degrees are accredited by ASBMB, the primary professional organization for these disciplines.

Residency Requirements. The department generally accepts transfer credits from other colleges and universities. However, to receive an undergraduate degree in either chemistry or biochemistry, at least 25 percent of the hours in the major must be taken at Texas Tech. For a chemistry minor, at least 6 hours of junior/senior level courses must be taken at Texas Tech.

Advanced Standing. The department will permit a student to receive credit for any courses in the curriculum if proficiency is demonstrated in that subject by examination. Examinations for CHEM 1305, CHEM 1306, CHEM 1307, and CHEM 1308 are given at Academic Testing Services prior to each semester. Previous registration for these examinations is not required for students entering Texas Tech for the first time. Students who are currently enrolled must apply to the Arts & Sciences Dean's Office for approval to take the examination. For all other courses, it is the student's responsibility to obtain approval from the Dean's Office and to petition the department chair for such examination(s) well before normal enrollment in the course. There is a fee for the CLEP test.

Teacher Education. Students seeking a teaching certificate are expected to earn a bachelor's degree (B.A. or B.S.) with a major in either chemistry or biochemistry. Students also may satisfy the requirements for the teaching of high school chemistry by majoring in multidisciplinary science with an emphasis in chemistry. This major is administered by the College of Education. Those students in the College of Arts & Sciences who plan to become high school teachers should minor in secondary education. They will be required to take EDSE 4000 for their student teaching experience. Those students majoring in chemistry or biochemistry and minoring in secondary education will complete one semester of student teaching in the senior year. See a College of Education advisor to complete a certification plan.

Chemistry Placement Examination. Students wishing to enroll in either CHEM 1301 or CHEM 1307 must first take the Chemistry Placement Examination. Please consult chem.ttu.edu for additional information. A sample placement exam with key may be found at this site. Previous registration for this examination is not required and there is no fee. Students are strongly encouraged to review high school level chemistry concepts and skills prior to attempting the examination.

Course Prerequisites. All undergraduate CHEM courses require a C or better in all prerequisite courses unless specified otherwise in the course description.

Communication Literacy Requirement. Chemistry and Biochemistry majors must complete three Communication Literacy courses. Courses that fulfill the CL requirement are CHEM 3107, 3108, 3141, 3251, 3313, 4101, and 4114. See individual degree plans for specific courses required for each major.

Biochemistry, B.A.

The B.A. in Biochemistry degree requires 120 credit hours for graduation and is primarily designed to prepare an undergraduate student for entry into medical school or other medically related professional schools. Graduates with a B.A. in Biochemistry are also qualified for industrial employment in areas in which a strong biochemistry background is an asset, such as technical sales or management. The B.A. degree provides sufficient background in biochemistry and chemistry for admission to a graduate program in biochemistry or biotechnology.

Biochemistry, B.S.

The B.S. in Biochemistry degree requires 120 credit hours for graduation and will prepare an undergraduate student for graduate study in biochemistry and related disciplines, for entry into medical or dental school, or for employment in industrial or governmental laboratories in which graduate training is not required. A biology minor may be earned by completing

one biology course in addition to those specifically required for the B.S. in Biochemistry degree (see the biological sciences undergraduate advisor for specific requirements). This additional biology course may be selected from the advanced electives needed to fulfill the bachelor's degree.

Chemistry, B.A.

The B.A. in Chemistry degree requires 120 credit hours for graduation and has a curriculum primarily designed for those interested in using an undergraduate major in chemistry as the background for a career in which extensive training in chemistry is either valuable or essential (e.g., medicine, dentistry, forensics, environmental protection, clinical and pharmacological chemistry, technical sales, and chemical patent law). Though a B.S. is generally preferred by employers, a B.A. may also provide a sufficient background in chemistry for employment as a chemist in a small laboratory or for entry into a graduate program leading to the M.S. or Ph.D. degree in chemistry.

Chemistry, B.S.

The B.S. in Chemistry degree prepares a student for graduate school or a career as a professional chemist. This degree program is technically oriented, requiring greater depth of mathematics, physics, and chemistry than does the Bachelor of Arts degree. This degree requires 120 credit hours and has a heavier chemistry requirement than the B.A. degree program. As a result, students have fewer elective courses to pursue other interests. Completion of the B.S. curriculum leads to automatic American Chemical Society certification of a student as the recipient of a professional degree.

Chemistry, Undergraduate Minor

The chemistry minor consists of CHEM 1307, 1107, 1308, 1108, and 11 credit hours of chemistry courses at the 3000 level or higher (excluding CHEM 3000, 3101, 4010, and 4300). At least 6 credit hours of 3000- or 4000-level chemistry courses must be taken at Texas Tech (see residency requirements above). Two hours of laboratory coursework must be included in the 11-hour total.

Undergraduate Course Descriptions

Chemistry (CHEM)

- 1101—General Chemistry Bridge Course (1).** Prerequisite: 43 percent or higher on the Chemistry Placement Exam or a passing grade in CHEM 1301. Review of high school chemistry and preview of college chemistry for students intending to take CHEM 1307. Recommended preparation for student success.
- 1105—Experimental Chemical Basics (1).** [CHEM1105, 1405] Prerequisite: CHEM 1305 (may be taken concurrently) or CHEM 1301. CHEM 1105 may NOT be taken concurrently with CHEM 1301. Experimental chemistry course complementary to CHEM 1305. Partially fulfills core Life and Physical Sciences requirement when coupled with CHEM 1301 or 1305.
- 1106—Chemistry Experiments That Matter (1).** [CHEM1107, 1407] Prerequisite or corequisite: CHEM 1306. Experimental chemistry course complementary to CHEM 1306. Partially fulfills core Life and Physical Sciences requirement when coupled with CHEM 1306.
- 1107—Experimental Principles of Chemistry I (1).** [CHEM1111, 1411] Prerequisite or corequisite: CHEM 1307. Experimental chemistry course complementary to CHEM 1307. Partially fulfills core Life and Physical Sciences requirement when coupled with CHEM 1307.
- 1108—Experimental Principles of Chemistry II (1).** [CHEM1112, 1412] Prerequisite or corequisite: CHEM 1107, CHEM 1308. Experimental chemistry course complementary to CHEM 1308. Partially fulfills core Life and Physical Sciences requirement when coupled with CHEM 1308.
- 1117—Support for CHEM 1307 (1).** Corequisite: CHEM 1307. A weekly interactive course using a classroom response system designed to be coordinated with and improve performance in CHEM 1307.
- 1118—Support for CHEM 1308 (1).** Corequisite: CHEM 1308. A weekly interactive course using a classroom response system designed to be coordinated with and improve performance in CHEM 1308.
- 1301—Introductory Chemistry (3).** Prerequisite: Score of 0 or better on the Chemistry Placement Exam. A survey of chemical nomenclature, the periodic table and periodic trends, chemical reactions, atomic

structure, chemical bonding, and molecular structure that assumes minimal background knowledge. Fulfills core Life and Physical Sciences requirement.

- 1305—Chemical Basics (3).** [CHEM1305, 1405] A survey of basic chemical concepts, properties, and reactions. Partially fulfills core Life and Physical Sciences requirement when coupled with CHEM 1105.
- 1306—Chemistry That Matters (3).** [CHEM1307, 1407] Description of polymers, drugs, agricultural chemicals, food/nutrition, fuels, and genetic engineering for non-science majors. Partially fulfills core Life and Physical Sciences requirement when coupled with CHEM 1106.
- 1307—Principles of Chemistry I (3).** [CHEM1311, 1411] Prerequisite: CHEM 1301 or meet CHEM 1307 placement criteria of the Chemistry Placement Exam or CHEM 1101 with a grade of A+. A study of fundamental concepts of chemistry including nomenclature, states of matter, the periodic table and periodic trends, chemical reactions, atomic structure, chemical bonding, molecular structure, and the properties of gases, liquids, solutions, and solids. This course is recommended for students who plan careers in the physical and biological sciences as well as medicine and engineering. Partially fulfills core Life and Physical Sciences requirement when coupled with CHEM 1107.
- 1308—Principles of Chemistry II (3).** [CHEM1312, 1412] Prerequisite: CHEM 1307. A continuation of CHEM 1307, which covers solution chemistry, chemical kinetics, acid/base and ionic equilibria, thermodynamics, electrochemistry, nuclear chemistry, and coordination chemistry. Serves as a prerequisite to all advanced chemistry courses. Partially fulfills core Life and Physical Sciences requirement when coupled with CHEM 1108.
- 2103—Experimental Introductory Organic Chemistry (1).** Prerequisite: CHEM 1105 and CHEM 1106 or CHEM 1108. Experimental chemistry course complementary to CHEM 2303 for students in agriculture and human sciences.
- 2303—Introductory Organic Chemistry (3).** Prerequisites: CHEM 1305 and CHEM 1306 or CHEM 1308. A brief study of the chemistry of carbon compounds for students in agriculture and human sciences. Does not satisfy any requirements of B.A. or B.S. in chemistry or biochemistry or a chemistry minor.
- 3000—Undergraduate Research (VI-6).** Individual research project under the guidance of a staff member. May be repeated for credit.
- 3101—Organic Chemistry Bridge Course (1).** Prerequisite: CHEM 1308. Review of general chemistry concepts most relevant to organic chemistry and introduction to organic nomenclature and simple organic chemistry concepts. Offered online only.
- 3105—Experimental Organic Chemistry I (1).** Prerequisites: CHEM 1108 and CHEM 3305 (concurrent enrollment allowed). Experimental chemistry course complementary to CHEM 3305 addressing fundamental techniques of organic chemistry.
- 3106—Experimental Organic Chemistry II (1).** Prerequisite: CHEM 3105; prerequisite or corequisite: CHEM 3306. Experimental chemistry course complementary to CHEM 3306 addressing fundamental techniques of organic chemistry.
- 3107—Experimental Physical Chemistry I (1).** Prerequisite or corequisite: CHEM 3307, CHEM 4311, or CHE 3322. An introduction to physical chemical experimental methods, including calorimetry, phase equilibria, surface phenomena, and viscosity. (CL)
- 3108—Experimental Physical Chemistry II (1).** Prerequisite or corequisite: CHEM 3308. An introduction to physical chemical methods, including spectroscopy, high-vacuum techniques, and electric and magnetic phenomena. (CL)
- 3111—Biochemical Calculations (1).** Corequisite: Concurrent enrollment in CHEM 3311 (or prior completion with a C or better). Quantitative problem-solving in the field of biochemistry including pH/pKa, isoelectric point, equilibrium/dissociation, and other thermodynamic/kinetic computations.
- 3141—Experimental Analytical Chemical Methods (1).** Prerequisite or corequisite: CHEM 3341. Experimental chemistry course complementary to CHEM 3341 with emphasis on analytical techniques important to biological and medical sciences. (CL)
- 3201—Advanced Experimental Organic Chemistry (2).** Prerequisite: CHEM 3106. Advanced synthesis, purification, and analysis of organic compounds. Required for B.S. majors in chemistry.
- 3251—Experimental Analytical Chemistry (2).** Prerequisite or corequisite: CHEM 3351. Experimental chemistry course complementary to CHEM 3351 with emphasis on the major analytical techniques. (CL)
- 3301—Descriptive Inorganic Chemistry (3).** Prerequisite: CHEM 1308. A broad descriptive survey of modern topics in inorganic chemistry, including coordination compounds, acid-base chemistry, periodicity, transitional and main-group elements, common inorganic structures and compounds, and application of inorganic compounds.

Biochemistry, B.A. Sample Curriculum**FIRST YEAR****Fall**

- ☐ CHEM 1307 - Principles of Chemistry I (3 SCH)
- ☐ CHEM 1107 - Experimental Principles of Chemistry I (1 SCH)
- ☐ BIOL 1403 - Biology I (4 SCH) (*See Below*)
- ☐ U.S. History (3 SCH)*
- ☐ ENGL 1301 - Essentials of College Rhetoric (3 SCH)

TOTAL: 14

Spring

- ☐ CHEM 1308 - Principles of Chemistry II (3 SCH)
- ☐ CHEM 1108 - Experimental Principles of Chemistry II (1 SCH)
- ☐ BIOL 1404 - Biology II (4 SCH) (*See Below*)
- ☐ U.S. History (3 SCH)*
- ☐ ENGL 1302 - Advanced College Rhetoric (3 SCH)
- ☐ Personal Fitness and Wellness (1 SCH)*

TOTAL: 15

SECOND YEAR**Fall**

- ☐ CHEM 3105 - Experimental Organic Chemistry I (1 SCH)
- ☐ CHEM 3305 - Organic Chemistry I (3 SCH)
- ☐ Personal Fitness and Wellness (1 SCH)*
- ☐ CHEM 3341 - Analytical Chemical Methods (3 SCH)†
- ☐ CHEM 3141 - Experimental Analytical Chemical Methods (1 SCH)†‡
- ☐ MATH 1451 - Calculus I with Applications (4 SCH) (*See Below*)
- ☐ Foreign Language (3 SCH) (*See Below*)

TOTAL: 16

Spring

- ☐ CHEM 3106 - Experimental Organic Chemistry II (1 SCH)
- ☐ CHEM 3306 - Organic Chemistry II (3 SCH)
- ☐ Foreign Language (3 SCH) (*See Below*)
- ☐ BIOL 3416 - Genetics (4 SCH)§
- ☐ MATH 1452 - Calculus II with Applications (4 SCH) (*See Below*)

- ☐ CHEM 4101 - Chemistry and Communication (1 SCH)‡
- ☐ English (3 SCH)*
- ☐ Language, Philosophy, & Culture Elective (6 SCH)*
- ☐ Social and Behavioral Sciences (3 SCH)*

TOTAL: 13

TOTAL HOURS: 120

* Select from Arts & Sciences General Requirements for B.A. degree.

† Can substitute CHEM 3351 and CHEM 3251 for CHEM 3341 and CHEM 3141

‡ Communication Literacy Course

§ BIOL 3416 and BIOL 3320, plus the 3000-level BIOL minor course will complete a minor in the biological sciences.

Biology: Failure to complete BIOL 1403 and BIOL 1404 in the first year will make the B.A. degree difficult to complete in four years without taking courses during summer sessions.**Calculus:** Adequate training in algebra, trigonometry, and analytic geometry is a prerequisite for calculus. A score of 7 on the Math Placement Exam is necessary to take calculus the first year. Scores below 7 will require additional coursework.**Foreign Language:** A student must complete 6 hours at the sophomore level or above in a single language. The prerequisite for all sophomore language courses is credit for the freshman level. This credit can be determined through a credit by examination. The score attained on the exam will determine whether the student is placed in a second-year course, a 5-hour review course, or in some cases the first or second semester of a beginning (first year) language course. See Arts & Sciences General Degree Requirements for further explanation.**Biochemistry, B.S. Sample Curriculum****FIRST YEAR****Fall**

TOTAL HOURS: 120

* Select from Arts & Sciences General Requirements for B.S. degree.

† BIOL 3416, MBIO 3401, plus the biology-related major-related elective will complete a minor in the biological sciences.

‡ Communication Literacy Course

§ Chosen from ENGL 2305, 2306, 2307, 2308, 2351, 2388, 2391.

Note: Taking CHEM 4105 and either CHEM 3301 or CHEM 4309 will complete American Chemical Society requirements.

For those who wish to pursue teacher certification, the university's teacher education program includes a full year of student teaching (two semesters of the senior year).

Biology: Failure to complete BIOL 1403 and BIOL 1404 in the first year will make the B.S. degree difficult to complete in four years without taking courses during summer sessions.**Calculus:** Adequate training in algebra, trigonometry, and analytic geometry is a prerequisite for calculus. A score of 7 on the Math Placement Exam is necessary to take calculus the first year. Scores below 7 will require additional coursework.**Foreign Language:** A student must complete 3 hours at the sophomore level or above in a single language. The prerequisite for all sophomore language courses is credit for the freshman level. This credit can be determined through a credit by examination. The score attained on the exam will determine whether the student is placed in a second-year course, a 5-hour review course, or in some cases the first or second semester of a beginning (first-year) language course. See Arts & Sciences General Requirements for further explanation.**Major-Related Electives:** Nine elective hours: 1 course from BIOL 3320, MBIO 4402, or MBIO 4404; and 2 courses from CHEM 3000 (3), 3301, 4300, 4306, 4309, 4314, or ENGL 2311.

See Arts & Sciences General Degree Requirements for further explanation.

- 3305—**Organic Chemistry I (3)**. Prerequisite: CHEM 1308. First semester of a thorough foundation course in organic chemistry.
- 3306—**Organic Chemistry II (3)**. Prerequisite: CHEM 3305. Second semester of a thorough foundation course in organic chemistry.
- 3307—**Physical Chemistry I (3)**. Prerequisites: CHEM 1308, MATH 1452, and PHYS 1404 or PHYS 2401. The study of gases, thermodynamics, chemical and phase equilibria, and solutions.
- 3308—**Physical Chemistry II (3)**. Prerequisites: CHEM 1308, MATH 1452, and PHYS 1404 or PHYS 2401. The study of kinetic theory, chemical kinetics, electrochemistry, transport properties, surface chemistry, and quantum chemistry.
- 3310—**Molecular Biochemistry (3)**. Prerequisite: CHEM 3306. Molecular descriptions of biological materials and systems. A one-semester course covering molecular approaches to biochemistry and metabolism.
- 3311—**Biological Chemistry I (3)**. Prerequisite: CHEM 3306 and BIOL 1402 or BIOL 1404. Corequisite: CHEM 3111. First semester of a three-semester course in general biochemistry.
- 3312—**Biological Chemistry II (3)**. Prerequisites: CHEM 3311. Second of a three-part course in general biochemistry.
- 3313—**Experimental Biological Chemistry (3)**. Prerequisites: CHEM 3106, CHEM 3311. Techniques for the isolation, purification, and characterization of biomolecular species. (CL)
- 3314—**Biological Chemistry III (3)**. Prerequisites: CHEM 3311. Third of a three-part course in general biochemistry. Emphasis on gene replication, expression, and regulation.
- 3341—**Analytical Chemical Methods (3)**. Prerequisite: CHEM 1308. A lecture course in analytical chemical methods emphasizing practical applications, including techniques important to the biological and medical sciences.
- 3351—**Analytical Chemistry (3)**. Prerequisite: CHEM 1308 and MATH 1452. A lecture course in the basic and advanced theories and techniques of analytical chemical methods. Required of all B.S. chemistry and biochemistry majors.
- 4010—**Individual Studies in Chemistry (VI-6)**. A structured independent studies course under the guidance of a faculty member. May be repeated for credit.
- 4101—**Chemistry and Communication (1)**. Prerequisite: Instructor consent. Introduces students to scientific communication, including the process of creating, revising, and presenting a scientific talk. (CL)
- 4105—**Experimental Inorganic Chemistry (1)**. Prerequisite: CHEM 3105. Techniques used in the synthesis and characterization of inorganic compounds.
- 4114—**Experimental Instrumental Analytical Methods Chemistry (1)**. Prerequisite or corequisite: CHEM 4314. Experimental chemistry course complementary to CHEM 4314 providing experience and practice with several important chemical instruments. (CL)
- 4300—**Senior Research (3)**. Prerequisite: Senior standing. Individual research project under the guidance of a staff member. The project will be at a more advanced level than is involved in CHEM 3000. The student is required to use the chemical literature in planning of the research and to submit a formal written report. May not be repeated for credit.
- 4302—**Structure and Mechanisms in Organic Chemistry (3)**. Prerequisite: CHEM 3306. Organic chemistry at an advanced level. Emphasis on developments in mechanistic organic chemistry.
- 4306—**Glycobiology: How Sweet Are the Sugars! (3)**. Prerequisites: CHEM 3305, CHEM 3306 and CHEM 3351 or instructor consent. Glycobiology is "the branch of science concerned with the role of sugars in biological systems." Sugar's biosynthesis, structures, and biological roles are covered.
- 4309—**Advanced Inorganic Chemistry (3)**. Prerequisite: CHEM 3305. A theoretical treatment of inorganic chemistry, including symmetry, group theory, bonding principles, spectroscopy, inorganic reaction mechanisms, transition metals, and organometallic chemistry.
- 4310—**Polymer Chemistry (3)**. Prerequisite: CHEM 3306. An introduction to the chemistry of macromolecules, focusing on the synthesis of polymers and their structures, how structure affects their properties, and then their applications.
- 4311—**Physical Chemistry for the Biological Sciences (3)**. Prerequisites: CHEM 3306, MATH 1452, and either PHYS 1403 or PHYS 1408. A physical chemistry course for majors in biochemistry and the biological sciences. Topics include quantum chemistry, thermodynamics, electrochemistry, and kinetics.
- 4312—**Physical Biochemistry (3)**. Prerequisites: CHEM 3312, CHEM 3313, CHEM 3314, CHEM 3351, CHEM 4311 or CHEM 3307; PHYS 2401. Applications of physical chemical techniques to proteins, nucleic acids, and membranes.
- 4314—**Instrumental Analytical Methods (3)**. Prerequisites: CHEM 3341 or CHEM 3351. Lecture course covering theories and application of instrumental chemical analysis methods.

Department of Classical and Modern Languages and Literatures

Erin Collopy, Ph.D., Interim Chairperson

Horn Distinguished Professor: Larmour

Charles B. Qualia Chair: Larson

Charles B. Qualia Professor: Lee

Professors: Barta, Beusterien, Edwards, Elola, Gorsuch, Larson, Lee, Pereira-Muro, Reiter, Reynolds, Witmore

Associate Professors: Bishop, Borst, Cole, Collopy, Guengerich, Kleinhans, Ladeira, Lavigne, McChesney, Michelson, Qualin, Regan, Stojanovic, Surliuga, Wood

Assistant Professors: Anderson, Andrade, Echeverria Arriaga, Freeman, Gosner, Guerrero, Pentead, Rocker, Shepard, Zhang, Zinn

Associate Professor of Practice: Wang

Assistant Professors of Practice: Brooke, Hays, Janzen

Senior Lecturers: Al-Hmoud, Drigalenko, Mallory

Lecturers: Benson, Cantero Viudez, Cantor, A.Cosper, J. Cosper, Dollar, Flores, Hohenstein, Martinez, Parras-Aranda, Small, Popescu, Verboon

CONTACT INFORMATION: 207 Foreign Language Building
Box 42071 | Lubbock, TX 79409-2071 | T 806.742.3145 | F 806.742.3306

About the Department

This department supervises the following degree programs and certificates:

- Bachelor of Arts in Languages and Cultures
 - Fields of Concentration: American Sign Language/English Interpretation, Chinese Language and Area Studies, Classics, French, German, Russian Language and Area Studies
- Bachelor of Arts in Spanish
- Master of Arts in Languages and Cultures
 - Fields of Concentration: Applied Linguistics, Classics, German
- Master of Arts in Romance Languages
 - Fields of Concentration: French, Spanish
- Doctor of Philosophy in Spanish
- Undergraduate Certificate in Global Readiness
- Undergraduate Certificate in Translation and Interpretation
- Graduate Certificate in English Language for Academic and Professional Communication

Accelerated Bachelor's to Master's Programs

- Languages and Cultures, B.A. / Languages and Cultures, M.A.
- Languages and Cultures, B.A. / Romance Languages, M.A.
- Spanish, B.A. / Romance Languages, M.A.

The department participates in the Ethnic Studies, Honors, Linguistics, Comparative Literature, and teacher education programs (see introductory section of the College of Arts & Sciences catalog text). The department also operates in the Texas Tech Center in Sevilla, Spain year-round and offers summer language and archeological field study abroad programs in Brazil, France, Germany, Italy, Mexico, Russia, and Spain. During the summer, the department hosts the International Teaching Assistant Workshop for international students.

Graduate Programs

For information on graduate programs offered by the Department of Classical and Modern Languages and Literatures, visit the Graduate Programs section on page 203.

Undergraduate Programs

Resident Courses. Students who are minors are required to take at least one upper-level 3-hour class in residence in the target language at Texas Tech University. Students who are majors are required to take at least

three upper-level classes (9 hours), including 3 courses of Communication Literacy, in residence in the target language at Texas Tech. Students who study abroad with the university programs (which involve faculty from this department) may include those courses among the required courses. Foreign study courses taken through approved exchange programs or other programs affiliated with Texas Tech are not considered as resident courses.

Study Abroad Courses. The department encourages students to study abroad and is very proud of its study abroad programs. Students enrolled at Texas Tech have many opportunities and options to study abroad, and many take this opportunity to enhance their language skills. Resident semester and academic year abroad programs are available in Sevilla, Spain. The department operates summer programs in Sevilla, Spain; Munich, Germany; Reims, France; Amman, Jordan; Rabat, Morocco; Chengdu, China; Shaoxing, China; Trentino Region of Italy; and, in alternate years, Salvador, Brazil, and Russia. In addition, the department offers a classical archaeology summer field course. Students enrolled in Arabic, Chinese, French, Italian, Japanese, and Russian have other opportunities to study abroad in the respective countries. During the long semester, students may earn up to 16 hours of credit and during the summer they may earn up to 6 hours of credit per summer semester. Course offerings may include from first year through graduate study. Students should check with the respective language advisors and program directors for specific information on the programs, including prerequisites and other important information.

Foreign Language Requirements and Options. To fulfill the Arts & Sciences Bachelor of Arts requirements, students must complete 6 semester hours of 2301 and 2302 or above in the same language. A student who enrolls in the first-year sequence will have an 11-16 hour requirement.

To fulfill the Arts & Sciences Bachelor of Science requirements, students must complete 3 semester hours at the sophomore level or above in the same language. A student who enrolls in the first-year sequence will have an 8-13 hour requirement.

Courses taught in English such as CHIN 3301, 3306, 3310, 4301, 4306; FREN 2390; GERM 2312, 2313; ITAL 2315, 3390; SPAN 2300, 3390, 3391, 3392; and RUSN 2304, 3301, 3302, 4301, 4302 may not be used to fulfill the foreign language requirement for any bachelor's degree.

Foreign language courses 1502, 1507, or 1508 are prerequisites for courses 2301, 2303, or 2607; a minimum grade of B in SPAN 1502, 1507, or 1508 is required to enroll in SPAN 2607. All first- and second-year courses are sequential and should be taken in their proper order beginning with 1301, 1501, 1507, or 1508 and progressing up through 2302, 2304, or 2607. If credit is earned for 1507, no credit will be awarded for 1501 and/or 1502. Students with two years of high school Chinese, French, German, or Spanish are required to enroll in 1507.

Successful completion of lower-numbered courses or equivalent competency is a prerequisite for enrollment in higher-numbered courses. For example, 2302 or its equivalent is a prerequisite for enrolling in a junior-level course, and completion of at least 3 hours at the junior level is a prerequisite for enrolling in a senior-level course. Language courses are offered on a fall/spring sequence beginning with 1501 in the fall, 1502 in the spring, 2301 in the fall and 2302 in the spring.

Upper-level courses allow students to pursue their particular interests in language, culture, and literature.

Teacher Education. For purposes of certification, teaching fields are offered in French, German, and Spanish. The standard program requires 24-27 hours at the 2000-level and above, which must include 9 hours of 4000-level courses in the specific language (12 hours in German). Students seeking secondary certification in French and Spanish must complete LING 4311 (offered fall semesters only) as part of the teaching field, preferably before their student teaching. Students seeking bilingual education endorsement, ESL endorsement, or secondary certification in French, German, or Spanish should consult with advisors in the College of Education and in the Department of Classical and Modern Languages and Literatures.

Students who plan to become high school teachers should minor in secondary education. They will be required to take EDSE 4000 for their student teaching experience. Please see a College of Education advisor to complete a certification plan.

Placement and Credit by Examination. Students at Texas Tech University may attempt credit by examination for degree credit during their freshman, sophomore, junior, and senior years. Students can get more information on the credit by examination tests, including CLEP, at the Academic Testing Center in West Hall. The student is responsible for taking the tests early enough to allow sufficient time for scores to be reported to the university and processed by the Office of the Registrar, which in the case of Arts & Sciences degrees is generally two semesters prior to the semester of graduation. Arts & Sciences B.A. degrees require the successful completion of 6 hours at the sophomore level or above in a single language. Therefore, Arts & Sciences students who wish to attempt credit by examination for degree credit in a language other than English should do so before or during their freshman year. In this way, students will have time to complete their language requirement within four years if they do not succeed in earning credit by examination. Seniors must notify their academic dean's office prior to attempting credit by examination and provide proof of notification upon registering for an exam at Academic Testing Services.

Departmental Placement Exams. Students who have taken at least two years of high school Spanish or who are heritage speakers of Spanish are eligible to take SPAN 1507 OR take the Spanish Placement Exam to attempt to bypass SPAN 1507 and move directly into SPAN 2301, 2302, 2303, 2304, or 2607. The SPLEX exam is optional. Students who choose not to take the exam may begin with SPAN 1507. For placement exam information, go to

www.depts.ttu.edu/classic_modern/spanish/PlacementExam.php.

Latin offers a non-credit placement exam. For information, contact Carla Burrus, carla.burrus@ttu.edu.

Diplôme de Français Professionnel (Affaires) B1 (French diploma for Business Professionals at the Advanced intermediary level of the Chambre de Commerce et d'Industrie de Paris). The "Diplôme de Français Professionnel des Affaires B1" is addressed to students, trainees and professionals who have obtained a good level in French applied to the acts of communication in companies and who wish, in a professional point of view, to confirm their knowledge by an official diploma adapted to the requirements of the professional world. This exam is prepared in FREN 3306 and FREN 4304.

For information, contact Dr. Carole Edwards, carole.edwards@ttu.edu.

Languages and Cultures, B.A.

The Bachelor of Arts in Languages and Cultures consists of 33 hours at the 2000-level and above, including CMLL 2305. As part of the required hours, each of the degree's six concentrations must include the following:

- **Classics** – A minimum of 6 hours of two 4000-level Classics courses (6 hours)
- **French** – A minimum of four 4000-level French courses (12 hours)
- **German** – A minimum of two 3000-level courses (6 hours) and two 4000-level courses (6 hours) taught in German
- **Russian Language and Area Studies** – A minimum of two 4000-level Russian and/or Slavistics courses (6 hours)
- **Chinese Language and Area Studies** – A minimum of two 4000-level Chinese courses (6 hours) and CHIN 3305 and CHIN 3306
- **American Sign Language/English Interpretation** – A minimum of three 4000-level American Sign Language courses: ASL 4301, ASL 4331, and ASL 4332.

Students must make a C or better in departmental courses to be eligible for graduation.

Communication Literacy Requirement. Students with a concentration in Classics must complete CLAS 4310 and two Communication Literacy (CL) courses from GRK 2302, LAT 2302, CLAS 3320, and CLAS 3330.

Students with a concentration in French must complete three CL courses from FREN 3302, 3303, 3306, 4302, 4303, 4304, 4305, 4308, 4315, 4317, and 4322. The department requires students with a minor in French to take one CL course.

Students with a concentration in German must complete three CL courses from GERM 3301, 3303, 3304, 3306, 3314, 4303, and 4305. The department requires students with a minor in German to take one CL course.

Students with a concentration in Russian Language and Area Studies must complete three CL courses: RUSN 3305 (in residence), 4301, and 4302.

Students with a concentration in Chinese Language and Area Studies must complete 9 hours of CL courses (in residence) from: CHIN 3305 (repeatable with different content), 3306, and 4306.

Students with a concentration in American Sign Language/English Interpretation must complete three CL courses (in residence): ASL 3312, 3320, and 4301.

Spanish, B.A.

The Bachelor of Arts in Spanish consists of 30 hours at the 2000-level and above, including a minimum of four 4000-level courses. The Spanish major requires 3 hours of grammar courses from SPAN 3305 or SPAN 3315, SPAN 4305, and SPAN 4343. A Spanish major may include 3 hours taught in English from SPAN 3390 or CMLL 3303. Students must make a C or better in departmental courses to be eligible for graduation.

As part of the required hours, students can optionally choose one of the degree's five concentrations. These are:

- A. Literatures and Cultures of the Spanish-Speaking World.** The concentration requires SPAN 3306 or 3307. It also requires six credits at the 4000-level in Literatures and Cultures of the Spanish-Speaking World, such as SPAN 4337, 4320, 4327, 4360, and other courses with departmental approval.
- B. Hispanic Linguistics.** The concentration consists of a total of 12 credits. The concentration requires SPAN 3308 as the core course (SPAN 3318 may also count as the core course). It also requires an additional nine credits (3 courses), chosen from SPAN 3318, 4307, 4311, 4318, or another upper-level course with departmental approval. Two of the four total courses must be at the 4000-level.
- C. Spanish in a Global Context.** The concentration requires six or more credits abroad at the 3000- or 4000-level, such as SPAN 4343, 4344, 4346, and other courses with departmental approval.
- D. Spanish for the Professions.** The concentration requires six credits from the following courses: SPAN 4308, SPAN 4309, and other courses with departmental approval.
- E. Spanish in the United States.** The focus of this concentration is on improving oral and written skills in Spanish while learning about the Spanish language and Latinx culture in the United States. This concentration requires SPAN 3305 or 3315, and 4307. It also requires three credits at the 4000-level from the following: SPAN 4360, 4361, or 4318.

Communication Literacy Requirement. Spanish majors must complete a minimum of three communication literacy courses from SPAN 3304, 3306, 3307, 3308, 3309, 3315, 3318, 3344, 3345, 3346, 3390, 4306, 4307, 4320, 4327, 4337, 4344, and CMLL 3303.

Undergraduate Minors

Students wishing to obtain information on this minor should consult an advisor in the Department of Classical and Modern Languages and Literatures. The advisors can provide information on all aspects of the major and minor programs, including career opportunities. A grade of at least C in all major and minor courses is required. College Level Examination (CLEP) credits are accepted by the department.

American Sign Language

The minor in American Sign Language consists of a minimum of 18 hours, including ASL 1501 and ASL 1502. Students must complete at least 6 hours at the upper level.

Ancient Greek

The minor in Ancient Greek consists of a minimum of 18 hours including 9 hours of Ancient Greek at the 2000 level and above. In addition, students must complete CLAS 3320 (World of Greece) and an additional 6 hours of upper level CLAS or GRK courses.

Arabic

This minor consists of a minimum of 22 hours, including ARAB 1501 and ARAB 1502. Students must complete at least 6 hours at the upper level. An Arabic minor can include, with approval of the student's minor advisor, 3 hours taught in English from ARAB 3305, HIST 3398 or HIST 4385.

Chinese

The minor in Chinese consists of a minimum of 22 hours, including CHIN 1501, 1502, 2301, and 2302. Students must complete at least 6 hours at the upper level, of which 3 hours must be either CHIN 3311 or 3305.

Classics

The minor in classics consists of the completion of a minimum of 18 hours from an approved list of CLAS, LAT, or GRK courses at the 2000-level or above.

French

The minor in French consists of a minimum of 20 hours, including FREN 1502 or FREN 1507. Students minoring in French must complete 9 hours of upper-level courses (at least 3 of the 9 hours must be at the 4000 level in French). The department requires students with a minor in French to take one Communication Literacy course. Courses taught in English do not count toward the French minor. Students may not complete all 9 hours of their upper-level requirement in one semester.

German

The minor in German consists of a minimum of 20 hours, including GERM 1502 or GERM 1507. Students minoring in German must complete 9 hours of upper-level courses (at least 6 of the 9 hours must be taught in the target language). The department requires students with a minor in German to take one Communication Literacy course.

Humanities

The purpose of the humanities minor is to provide the inquiring and curious student a flexible and interdisciplinary program to explore the creative works of human beings—literary, musical, philosophical, religious, theatrical, and artistic. The minor encourages a broad-based and overarching approach to the investigation of human accomplishment that expresses visions of life and values for living which offer both delight and wisdom.

For students majoring in the sciences or professions, the interdisciplinary humanities minor offers an enriching educational experience. For students already majoring in a single discipline among the humanities, this minor provides a broader awareness of the background of ideas and arts that shape our world. The introductory humanities courses also fulfill core curriculum requirements or provide elective credit.

In the humanities 19-hour minor, the student takes two 3-hour foundation courses, HUM 2301 and HUM 2302. Under the director's guidance, the student chooses to focus on one of three concentrations: Ancient, Medieval/Renaissance, or Modern. The student then selects one course from each of three categories within each concentration (Art and Architecture, Language and Culture, and History and Philosophy) as well as an additional course from a category of the student's choice. The student's experience culminates with completion of a one-hour capstone course which requires an essay that summarizes the ways in which the courses within the selected concentration relate. The final course of study must be approved by the director.

Italian

The minor in Italian consists of a minimum of 20 hours, including ITAL 1502. Students minoring in Italian must complete 9 hours of upper-level courses (at least 3 of the 9 hours must be at the 4000 level in Italian). Students may not complete all 9 hours of their upper-level requirement in one semester. Only one course taught in English may count for the Italian minor.

Japanese

The minor in Japanese consists of a minimum of 22 hours, including JAPN 1501 and JAPN 1502. Students must complete at least 6 hours at the upper level.

Languages and Cultures, B.A. (American Sign Language/English Interpretation) Sample Curriculum

FIRST YEAR

Fall

- ☐ ENGL 1301 - Essentials of College Rhetoric (3 SCH)
- ☐ ASL 1501 - Beginning Course in American Sign Language I (5 SCH)

- ☐ Social & Behavioral Sciences Elective (3 SCH)
- ☐ Minor (3 SCH)

TOTAL: 15

THIRD YEAR

Fall

- ☐ SPAN 3306 - Hispanic Culture and Society (3 SCH)
- ☐ SPAN 3307 - Introduction to Hispanic Literatures (3 SCH)
- ☐ POLS 2306 - Texas Politics and Topics (3 SCH)
- ☐ Life & Physical Sciences Elective (4 SCH)*
- ☐ Minor (3 SCH)

TOTAL: 16

Spring

- ☐ SPAN 4000-level (3 SCH)
- ☐ SPAN 4000-level (3 SCH)
- ☐ Life & Physical Sciences Elective (4 SCH)*
- ☐ Creative Arts Elective (3 SCH)*
- ☐ Minor (3 SCH)

TOTAL: 16

FOURTH YEAR

Fall

- ☐ SPAN 4305 - Advanced Grammar (3 SCH)
- ☐ Minor (3 SCH)
- ☐ Junior/Senior Elective (3 SCH)
- ☐ Language, Philosophy, and Culture Elective (3 SCH)

TOTAL: 12

Spring

- ☐ SPAN 4000-level (3 SCH)
- ☐ Minor (6 SCH)
- ☐ Language, Philosophy, and Culture Elective (3 SCH)
- ☐ Creative Arts Elective (3 SCH)

TOTAL: 15

TOTAL HOURS: 120

* Refer to the General Degree Requirements of Arts & Sciences for a complete list of qualifying courses.

A summer or semester of study abroad is strongly recommended for students to obtain a greater proficiency level in Spanish, particularly for the development of oral skills. Consult the undergraduate academic advisor for a list of suggested programs. Third-year students may study abroad in an affiliate, reciprocal or in a TTU faculty-led study abroad program. Fourth-year students may study abroad at the TTU Sevilla Center only.

Korean

The minor in Korean consists of a minimum of 22 hours, including KOR 1501 and KOR 1502. Students must complete at least 6 hours at the upper level.

Latin

The minor in Latin consists of a minimum of 18 hours, including 9 hours of Latin at the 2000-level and above. In addition, students must complete CLAS 3330 (World of Rome) and an additional 6 hours of upper-level CLAS or LAT courses.

Russian Language and Area Studies

The Russian Language and Area Studies minor consists of a minimum of 18 hours, beginning with RUSN 2301. Students must complete at least 6 hours at the upper level (at least 3 of the 6 hours must be at the 4000-level in Russian). Russian Language and Area Studies minors will complete at least 18 hours from an approved list of courses.

Russian

The minor in Russian consists of a minimum of 20 hours, including RUSN 1502. Students minoring in Russian must complete 9 hours of upper-level courses (at least 3 of the 9 hours must be at the 4000 level in Russian). Students may not complete all 9 hours of their upper-level requirement in one semester.

Spanish

The minor in Spanish consists of a minimum of 20 hours (with SPAN 1502, SPAN 1507, or SPAN 1508) or 19 hours (with SPCS 1412). Students minoring in Spanish must complete 9 hours of upper-level courses (at least 3 of the 9 hours must be at the 4000 level in Spanish). A Spanish minor may include 3 hours taught in English from SPAN 3390 and CMLL 3303.

Students may not complete all 9 hours of their upper-level requirement in one semester, unless it is done in an approved semester study-abroad program.

Undergraduate Certificates

Global Readiness

This certificate prepares students to communicate in intercultural and global professional contexts while making use of their world language skills and cultural knowledge. Students who complete this certificate will be able to:

- use their language skills in a professional environment
- navigate diverse cultural situations
- better understand the world and their place in it both locally and globally

Required courses:

- 2302 of any language, (FREN 2607, SPAN 2607 or SPAN 2304 can be substituted). Students who place higher or test out of fourth semester language can substitute a 3000- or 4000-level language course taught in the target language.
- Two 3000- or 4000-level courses offered in CMLL or approved by the certificate faculty advisor from two of the following categories:
 - One course with a Language for Specific Purposes (LSP) focus (ARAB 3301; ASL 4301, 4312, 4331; CHIN 3311, 3312, 4300; FREN 3306, 4304; GERM 4309; ITAL 3303, 4303; JAPN 4300; RUSN 3305; SPAN 4308, 4309)
 - A service-learning course
 - An approved study abroad course (ARAB 3306; CHIN 3320; FREN 4300-260; GERM 3306; SPAN 3306-260, 3309, 4309-260, 4343, 4346)
 - An internship with a global/professional focus for a minimum of three credits (ASL 4301, 4332; CMLL 4002; SPAN 4335)

Translation and Interpretation

The 15-credit Undergraduate Certificate in Translation and Interpretation introduces students to the fields of translation and interpretation and

provides them a basic understanding of theories and practices in these fields. The certificate does not grant professional certification, but it gives students the foundation for a career in translation and interpretation and the basis to work toward professional certification. The certificate is for degree-seeking students only.

Required Courses for all Languages:

- 2302 of any modern language (SPAN 2607 or SPAN 2304 may be substituted)*
- CMLL 3303
- ENGL 3341 OR LING 4335

* Students who place higher or test out of fourth-semester language can substitute a 3000 or 4000-level language course taught in the target language.

Additional Required and Elective Courses:

- **American Sign Language***: One semester of ASL 3301 as prerequisite to CMLL 3303; One semester of ASL 3302, 3320, or 4301.
* The TTU Undergraduate Certificate in Translation and Interpretation is not equivalent to professional interpreter certification, which must be pursued through a certifying organization such as the Board for the Evaluation of Interpreters or the Registry of Interpreters for the Deaf.
- **Arabic**: One semester of ARAB 3301 or 4300 as prerequisite to CMLL 3303; one additional semester of ARAB 3301 or 4300.
- **French**: Two semesters of FREN 3302, 3303, 3304, 3306, 4302, 4303, 4304, 4305, 4308, 4315, 4317, 4322, or 4345 courses.
- **German**: One semester of GERM 3303, 4301, or 4309; one additional semester of GERM 3301, 3304, 4303, or 4305.
- **Japanese**: One semester of JAPN 4300 as a prerequisite to CMLL 3303; one additional semester of JAPN 4300.
- **Mandarin Chinese**: One semester of CHIN 3305 as a prerequisite to CMLL 3303; one additional semester of CHIN 3305 or 4308.
- **Russian**: One semester of RUSN 3305 as a prerequisite to CMLL 3303; one additional semester of RUSN 3305.
- **Spanish**: One semester of SPAN 4309 as prerequisite to CMLL 3303; One additional 4000-level course taught in Spanish.

Undergraduate Course Descriptions

American Sign Language (ASL)

- 1501—Beginning Course in American Sign Language I (5).** [SGNL1301, 1401] Introduction and development of receptive and expressive language skills in American Sign Language.
- 1502—Beginning Course in American Sign Language II (5).** [SGNL1302, 1402] Prerequisite: ASL 1501. Introduction and development of receptive and expressive language skills in American Sign Language.
- 2301—Second Course in American Sign Language III (3).** [SGNL2301] Prerequisite: ASL 1502. Development of intermediate receptive and expressive skills in American Sign Language.
- 2302—Second Course in American Sign Language IV (3).** [SGNL2302] Prerequisites: ASL 1501, ASL 1502, ASL 2301. Development of intermediate receptive and expressive skills in American Sign Language.
- 3300—Introduction to the Interpreting Profession (3).** Prerequisites: ASL 1501 and ASL 1502. An overview of American Sign Language (ASL)/English interpretation. Provides a historical framework for current principles, ethics, roles, responsibilities, and standard practices of the profession.
- 3301—Advanced American Sign Language/Interpreting I (3).** Prerequisite: ASL 2302. Development of advanced expressive and receptive ASL skills. English-ASL translation.
- 3302—Advanced American Sign Language/Interpreting II (3).** Prerequisite: ASL 3301. Development of advanced expressive and receptive ASL skills. English-ASL translation.
- 3304—Gestural and Visual Communication in American Sign Language (3).** Prerequisites: ASL 1501 and ASL 1502. A knowledge/skills-based course designed to develop non-verbal communications. Emphasizes facial expression, gestures, pantomime, body language, classifiers, and other visual/gestural strategies.
- 3312—Introduction to Deaf Culture and Linguistics (3).** Prerequisite: ASL 2302 (may be taken concurrently with department permission). Overview of deaf culture and history including deaf community values and issues. ASL linguistic structure. (CL)
- 3320—American Sign Language to English I (3).** Prerequisites: ASL 1501, ASL 1502, ASL 2301. Builds voice interpreting – receiving the source language (ASL) and producing it into the target language (English) for interpreting purposes. (CL) (CL)

- 4300—Individual Studies in ASL (3).** Prerequisite: ASL 2302 or instructor consent. Independent study in American Sign Language under the guidance of a faculty member. May be repeated for credit up to 9 hours with consent of instructor.
- 4301—Topics in American Sign Language Interpreting: Community Interpreting (3).** Prerequisites: ASL 1501 and ASL 1502. Addresses skills, knowledge, attitudes, and behaviors pertinent to interpreting. Topics may include education, ethics, theatrical/music, and Greek/Latin Roots. Topics vary per semester. (CL)
- 4302—American Sign Language to English (3).** Prerequisite: ASL 3301. A course designed to build voice interpreting – receiving the source language (ASL) and producing it into the target language (English) for interpreting purposes.
- 4312—Interpreting in Educational Settings (3).** Prerequisite: ASL 2301. Increases awareness of current techniques and ethical issues in mainstreamed settings and bilingual/bicultural education practices. Covers various modes of communication.
- 4320—American Sign Language to English II (3).** Prerequisite: ASL 3320. A course designed to build voice interpreting – receiving the source language (ASL) and producing it into the target language (English) for interpreting purposes.
- 4330—Consecutive Interpreting vs. Simultaneous Interpreting (3).** Prerequisite: ASL 3302. A knowledge/skills-based course designed to strengthen simultaneous interpreting from English to ASL and develop the interpreting skills critical to successfully render a simultaneous interpretation.
- 4331—Observation/Interpreting Business Practices (3).** Prerequisite: ASL 3302. Creates a learning experience that enables the student to apply specialized occupational theory, skills, and concepts.
- 4332—Interpreting Internship (3).** Prerequisite: ASL 4331. Students will work alongside a certified interpreter and gain an understanding of linguistic variations in a wide scope of interpreting settings.

Arabic (ARAB)

- 1501—Beginning Course in Arabic I (5).** Introduction and development of the four language skills in Arabic. Listening comprehension, speaking, reading, and writing.
- 1502—Beginning Course in Arabic II (5).** Prerequisite: ARAB 1501. Introduction and development of the four language skills in Arabic. Listening comprehension, speaking, reading, and writing.
- 2301—Second Course in Arabic I (3).** [ARAB2311] Prerequisite: ARAB 1502. Reading, cultural background, grammar review, conversation, and composition.
- 2302—Second Course in Arabic II (3).** [ARAB2312] Prerequisite: ARAB 1501, ARAB 1502, ARAB 2301. Reading, cultural background, grammar review, conversation, and composition.
- 3301—Advanced Arabic Conversation (3).** Prerequisite: ARAB 2302 or instructor consent. A proficiency-based course in Modern Standard Arabic. Independent study. Can be repeated with new content and dialects.
- 3305—Introduction to Arab-Muslim Civilization (3).** Overview of Arab-Muslim civilization to include such topics as culture, Islam, cinema, art, and women. In English.
- 3306—Arabic Language Studies (3).** Prerequisite: ARAB 1502 or instructor consent. Readings in cultural history and literature, lectures, and tours on location. Taught in Arabic. May be repeated once for credit with different content.
- 4300—Individual Studies in Arabic (3).** Prerequisite: ARAB 2302 or instructor consent. Independent work under the guidance of a faculty member. Contents vary to meet the needs of the student. May be repeated for up to 12 credit hours.

Chinese (CHIN)

- 1501—A Beginning Course in Chinese I (5).** [CHIN1411, 1511] Introduction and development of the four language skills in Mandarin Chinese: listening comprehension, speaking, reading, and writing.
- 1502—A Beginning Course in Chinese II (5).** [CHIN1412, 1512] Prerequisite: CHIN 1501. Introduction and development of the four language skills in Mandarin Chinese: listening comprehension, speaking, reading, and writing.
- 2301—A Second Course in Chinese I (3).** [CHIN2311] Prerequisite: CHIN 1502. Reading, cultural background, grammar review, conversation, and composition of Mandarin Chinese.
- 2302—A Second Course in Chinese II (3).** [CHIN2312] Prerequisite: CHIN 2301. Reading, cultural background, grammar review, conversation, and composition of Mandarin Chinese.

- 3301—Chinese Phonology: History, Development and Comparison (3).** Survey of the history and development of Chinese pronunciation and investigation of the phenomena of phonetics, phonology, and sociolinguistics.
- 3305—Advanced Chinese (3).** Prerequisites: Successful completion of CHIN 2302 with a C or higher or permission from the instructor. Develop advanced Chinese language skills through authentic materials such as films, newspapers, magazines, TV programs, etc. Repeatable for up to 12 credit hours with different content. (CL)
- 3306—Chinese Culture (3).** Explores the foundations of Chinese civilization and various dimensions of Chinese culture. Provides students with a deeper knowledge of Chinese culture and society. (CL)
- 3310—Chinese Culture and Chinese Characters (3).** Analyzes Chinese culture presented by Chinese characters and illustrates the etymology of Chinese characters by the intuitive visual aids.
- 3311—Business Chinese I (3).** Prerequisite: Successful completion of CHIN 1502 with a C or higher, have the equivalent language proficiency, or consent of instructor. Development of Chinese business culture and etiquette and Chinese language skills for the communication in Chinese business environment.
- 3312—Business Chinese II (3).** Prerequisite: Successful completion of CHIN 3311 with a C or higher, have the equivalent language proficiency, or consent of instructor. Deeper understanding of the Chinese social norms and modes of interaction in the business context and development of Chinese language skills.
- 3320—Chinese Civilization and Society (3).** Explores the civilization, history, and society in Chinese speaking countries and regions.
- 4300—Individual Problems in Chinese (3).** Prerequisite: CHIN 2302 or consent of instructor and department chairperson. Contents will vary to meet the needs of the student. Independent work under the guidance of a faculty member. May be repeated twice for credit with consent of instructor.
- 4301—Chinese Characters and Calligraphy (3).** Survey of the history and development of Chinese writing system and development of the Chinese calligraphy knowledge.
- 4306—Modern Chinese Literature and Cinema (3).** Survey of modern and contemporary Chinese literature from the beginning 20th century to present day. (CL)
- 4308—Chinese Grammar (3).** An overview of various linguistic levels of Chinese language — phonology, morphology, syntax, and writing system.

Classics (CLAS)

- 1310—Latin and Greek Terminology (3).** Analysis of English words through the study of Latin and Greek roots, prefixes, and suffixes. Does not count in the major or minor in classics.
- 2302—Classical Mythology (3).** Classical myths: stories of gods, demigods, and heroes; their significance in the ancient and modern worlds. Selected readings in translation with lectures and discussions in English. Fulfills core Language, Philosophy, and Culture requirement.
- 2303—Sports and Public Spectacles in the Ancient World (3).** Survey of Greek and Roman athletics, the Roman Triumph, gladiatorial combat, and other spectacles in the Ancient World. Fulfills core Language, Philosophy, and Culture requirement.
- 2304—The Ancient World: Prophets, Warriors, Poets (3).** Survey of literature, religion, warfare of Ancient Greece, Rome, and Near East, focusing on cultural and intellectual origins of Western Civilization. Fulfills core Language, Philosophy, and Culture requirement.
- 2305—Ancient Technology (3).** Examination of the science and engineering of the ancient Egyptians, Greeks, and Romans through archeological remains and literary sources. Fulfills core Social and Behavioral Sciences requirement.
- 2335—Archaeologies of the Classical World (3).** Introduction to the materials, methods, practices, and theories of archaeologies related to the classical world. Addresses questions of how archaeology helps (re) construct Greco-Roman societies and why the classical world matters today. Fulfills core Social and Behavioral Sciences requirement.
- 3315—World of Egypt and the Near East (3).** Examination of the literature and /or art and archaeology of ancient Egypt, and the Near East in its cultural context.
- 3320—The World of Greece (3).** Examination of the literature and/or art and archeology of ancient Greece in its cultural context. (CL)
- 3330—The World of Rome (3).** Examination of the literature and/or art and archeology of ancient Rome in its cultural context. (CL)
- 3340—Gender and Sexuality in the Classical World (3).** Examination of the social and cultural dimensions of gender and sexuality in the ancient Greco-Roman world. Readings in English. [WGS 3340]

- 3350—Comparative Mythology (3).** Ancient myths in various cultures and their influence on modern literature and film.
- 3360—Ancient Cities (3).** Explores ancient cities and the development of urbanism in the ancient world.
- 4300—Research in Classics (3).** Prerequisite: Instructor consent. Undergraduate research in classics under direction of instructor. May be repeated for up to 15 credit hours.
- 4310—Seminar in Classics (3).** Prerequisite: Instructor consent. Intensive study of a topic in ancient culture. May be repeated twice for credit. (CL)
- 4601—Classical Field Archaeology (6).** Prerequisite: Instructor consent. Intensive undergraduate research in classics under the direction of instructor. Taught during study abroad. May be repeated once for credit with different content.

Classical and Modern Languages and Literatures (CMLL)

- 1301—Individual Studies in Modern Languages I (3).** Introduction and development of skills in a modern language, including listening comprehension, speaking, reading, and writing.
- 1302—Individual Studies in Modern Languages II (3).** Introduction and development of skills in a modern language, including listening comprehension, speaking, reading, and writing.
- 1501—Individual Studies in Modern Languages I (5).** Introduction and development of the four languages skills: listening comprehension, speaking, reading, and writing. May be repeated twice for credit when language is different.
- 1502—Individual Studies in Modern Languages II (5).** Introduction and development of the four languages skills: listening comprehension, speaking, reading, and writing. May be repeated twice for credit when language is different.
- 2301—Individual Studies in Modern Languages III (3).** Prerequisite: CMLL 1302 or CMLL 1502. Continuation of study of a modern language. Introduction and development of skills in a modern language, including listening comprehension, speaking, reading, and writing.
- 2302—Individual Studies in Modern Languages IV (3).** Prerequisite: CMLL 2301. Continuation of study of a modern language. Introduction and development of skills in a modern language, including listening comprehension, speaking, reading, and writing.
- 2305—Introduction to Language and Culture (3).** Explores such topics as how culture is expressed in languages, how people learn languages, and how people benefit from learning languages. languages. Fulfills core Language, Philosophy, and Culture requirement. (CL)
- 2306—Introduction to World Cinema (3).** Introduction to the global world of classic films produced in Africa, Asia, Europe, and Latin America. Fulfills core Language, Philosophy, and Culture requirement.
- 2307—Developing Cultural Intelligence in a Global Society (3).** Students develop the skills for effective cross-cultural interaction through an understanding and practice of the components of cultural intelligence.
- 2308—Folklore and Fairy Tales Around the World I (3).** Explores folklore, fairy tales, and oral traditions from different cultures around the world, addressing topics such as orality, adaptation, cultural identity, class, gender, and race/ethnicity.
- 3303—Introduction to Translation and Interpretation (3).** Prerequisite: 2302 in any language sequence or equivalent. Introduces students to the theoretical, practical, and professional basics of the skills of translation and interpretation. Taught in English. (CL)
- 4001—Undergraduate Research in Languages and Cultures (VI-3).** Prerequisite: Instructor approval. Experiential learning in languages and cultures for students involved in research.
- 4002—Internship in Language and Culture (3).** Prerequisite: Minimum one year of language study. Experiential learning in a professional environment emphasizing language and intercultural skills.
- 4300—Individual Studies in Modern Language (3).** Prerequisite: CMLL 2302 or instructor consent. Independent study in modern language under the guidance of a faculty member. May be repeated once for credit with consent of instructor.

English as a Second Language (ESL)

- 4301—English for Academic Communication (3).** Prepares non-native speakers of English for academic oral and written communication.

French (FREN)

- 1501—A Beginning Course in French I (5).** [FREN1411] Prerequisite: permission of department.

- 1502—A Beginning Course in French II (5).** [FREN1512] Prerequisite: FREN 1501.
- 1507—Comprehensive French Review First Year (5).** Prerequisite: Two years of high school French or permission of department. A comprehensive one-semester review.
- 2301—A Second Course in French I (3).** [FREN2311] Prerequisite: FREN 1502 or FREN 1507. Readings, cultural background, conversation, and composition.
- 2302—A Second Course in French II (3).** [FREN2312] Prerequisite: FREN 2301. Readings, cultural background, conversation, and composition.
- 2390—French Culture (3).** A multimedia approach to topics related to French culture. Taught in English. Credit does not apply to major or minor. May not be repeated. Fulfills core Language, Philosophy, and Culture requirement.
- 2607—Intensive French Second Year (6).** Intensive immersion development. Reading, writing, culture, conversation, and composition. Taught in France. Equivalent to FREN 2301 and FREN 2302.
- 3302—Introduction to Literature in French (3).** Prerequisite: FREN 2302. An introduction to classic and contemporary French and Francophone literature and to the methodologies and approaches of literary studies. (CL)
- 3303—French Conversation (3).** Prerequisites: FREN 2302, or equivalent. Designed to increase vocabulary and attain oral fluency. May be taken concurrently with FREN 3304 or FREN 3302. (CL)
- 3304—Advanced Literacies in French (3).** Prerequisite: FREN 2302 or equivalent. Develops French grammar, style, and discursive competence in cultural context. Repeatable once for study abroad credit.
- 3306—Business French (3).** Prerequisites: FREN 2302. Oral and written French with special attention to idiomatic expressions currently used in marketing, advertising, and the stock market. (CL)
- 3309—French Literature, Culture, and Thought (3).** Explores themes, questions, and problems in French and Francophone literature, culture, and thought through study of texts, films, and other cultural objects in English translation. May be repeated for credit.
- 4100—Advanced Individual Problems in French (1).** Prerequisite: consent of instructor. Contents will vary to meet the needs of student. May be repeated for credit up to 6 hours with the consent of the instructor.
- 4300—Individual Problems in French (3).** Prerequisite: Any course from FREN 3000-3999. Contents will vary to meet the needs of students. Independent work under the guidance of a staff member. May be repeated for credit up to 12 hours with the consent of the instructor.
- 4302—Advanced Grammar and Composition (3).** Prerequisite: Any course from FREN 3000-3999. Review of important grammatical constructions and idioms, with written practice. May be repeated once for credit for purposes of study abroad. (CL)
- 4303—Dialogues in French Culture (3).** Prerequisite: Any course from FREN 3000-3999. Designed to increase fluency in the spoken language. May be repeated once for credit for purposes of study abroad. (CL)
- 4304—Commercial French (3).** Prerequisite: Any course from FREN 3000-3999. Oral and written French, with special attention to idiomatic expressions currently in use in business and technical fields. (CL)
- 4305—Cultures of the French-Speaking World (3).** Prerequisite: Any course from FREN 3000-3999. Survey of French-speaking cultures of the world. Includes history, arts, customs, and daily life. (CL)
- 4308—French and Francophone Culture Through Film (3).** Prerequisite: Any course from FREN 3000-3999. Analysis of cinematographic and cultural elements across Francophone films. May be repeated with different content. (CL)
- 4315—The French Short Story (3).** Prerequisite: Any course from FREN 3000-3999. Traces the development of the French short story from Voltaire's *Candide* to Boris Vian's *Les Lurettes Fourrées*. May be repeated once for credit for purposes of study abroad. (CL)
- 4317—Readings in French Literature and Culture (3).** Prerequisite: Any course from FREN 3000-3999. Conducted in French. May be repeated once for credit with consent of instructor. (CL)
- 4322—Civilisation Française: French Civilization (3).** Prerequisite: Any course from FREN 3000-3999. A survey of French civilization from the Middle Ages to the present: literature, art, music, philosophy, science, and architecture. Readings, slides, films, and tapes. Conducted in French. May be repeated once for credit for purposes of study abroad. (CL)
- 4345—History of the French Language (3).** Prerequisite: Any course from FREN 3000-3999. The historical, linguistic, and literary evolution of French from its Latin origins to the present day.

German (GERM)

- 1310—Survival German Language and Cultures (3).** A study of situation-based German and the cultures of German-speaking countries to prepare students to study abroad.
- 1501—A Beginning Course in German I (5).** [GERM1511] Prerequisite: Permission of department. Oral practice, elementary reading, and grammar.
- 1502—A Beginning Course in German II (5).** [GERM1512] Prerequisite: GERM 1501. Oral practice, elementary reading, and grammar.
- 1507—Comprehensive German Review - First Year (5).** Prerequisite: Two years of high school German or permission of department. A comprehensive one-semester review.
- 1607—Intensive German Review (6).** Intensive immersion development of the four language skills in German: oral comprehension, speaking, reading, and writing. Taught in Germany.
- 2301—A Second Course in German I (3).** [GERM2311] Prerequisite: GERM 1502 or GERM 1507. Reading, cultural background, grammar review, and conversation.
- 2302—A Second Course in German II (3).** [GERM2312] Prerequisite: GERM 2301. Reading, cultural background, grammar review, and conversation.
- 2312—The Holocaust in Literature and Film (3).** Examination of the Holocaust as represented in literature, film, and art. Conducted in English. Fulfills core Language, Philosophy, and Culture requirement.
- 2313—Northern Myths and Legends (3).** Introduction to Germanic myths, epics, sagas, legends, and fairy tales. Selected readings in translation with lectures and discussions in English. Fulfills core Language, Philosophy, and Culture requirements.
- 2607—Intensive German Second Year (6).** Intensive immersion development. Reading, writing, culture, conversation, and composition. Taught in Germany. Equivalent to GERM 2301 and GERM 2302.
- 3301—Cultures of the German Speaking World (3).** Prerequisite: GERM 2302 or GERM 2607. Study of video, internet, and textual resources on the diverse cultures of the contemporary German-speaking world. Conducted in German. (CL)
- 3303—Conversation and Composition (3).** Prerequisite: GERM 2302 or GERM 2607. Emphasis on fluency in spoken and written German. Conducted in German. May be taken concurrently with GERM 3301. May be repeated once for credit with consent of instructor. (CL)
- 3304—Introduction to Literature (3).** Prerequisite: GERM 2302 or GERM 2607. An introduction to periodization of German literature, literary genres, and literary theory. Conducted in German. (CL)
- 3305—German Language Studies (3).** Prerequisite: GERM 2302 or GERM 2607. Development of listening, speaking, reading, and writing skills in Germany. May be repeated once for credit. Offered each summer.
- 3306—Contemporary Germany (3).** Prerequisite: GERM 2302 or GERM 2607. Readings in cultural history and literature, lectures, and tours on location. Taught in German. May not be repeated for credit toward major or minor. (CL)
- 3314—Cultural Excursions in Germany (3).** Students participate in German cultural and historical excursions, visit sites of cultural and historical interest, and discuss social and cultural topics. Taught in an immersion context. (CL)
- 4000—Individual and Group Studies in German (VI-6).** Prerequisite: Consent of department. Study in German under the guidance of a faculty member. May be repeated for credit up to 15 hours.
- 4301—Grammar (3).** Prerequisites: GERM 3301 and GERM 3303. Review of grammatical structure. Practice in pronunciation and in written and spoken German.
- 4303—German Classics (3).** Prerequisites: 6 hours from GERM 3301, GERM 3303, GERM 3304. Examination of iconic, well-known, and influential German-language literature. Conducted in German. (CL)
- 4305—Readings in German Language and Literature (3).** Prerequisites: GERM 3303 and GERM 3304. Readings from a particular period or study of a literary theme. Conducted in German. May be repeated once for credit with consent of instructor. (CL)
- 4306—German Culture in Theory and Practice (3).** Examination of German-language literature, film, media, and other cultural production through current theoretical frameworks in German Studies.
- 4309—Business German (3).** Prerequisites: 6 hours from GERM 3301, GERM 3303, GERM 3304. Oral and written German with special attention to the idiomatic expressions and cultural practices of business in Germany.
- 4335—Internship to German (3).** Prerequisites: Completion or concurrent enrollment in at least one GERM 3000- or 4000-level course and consent of instructor. Teaching experience and service learning in community schools, while improving German language and communication skills. May be repeated once for credit.

Greek (GRK)

- 1301—A Beginning Course in Ancient Greek I (3).** [GREE1311, 1511] Introduces the ancient Greek language, especially its grammar and vocabulary, with the goal of reading ancient Greek literary, historical, philosophical, and Biblical texts.
- 1302—A Beginning Course in Ancient Greek II (3).** [GREE1312, 1512] Prerequisite: GRK 1301. Concludes introduction to the ancient Greek language, especially its grammar and vocabulary, with the goal of reading ancient Greek literary, historical, philosophical, and Biblical texts.
- 2301—A Second Course in Greek I (3).** Prerequisite: GRK 1302. Review; selected readings from standard authors.
- 2302—A Second Course in Greek II (3).** Prerequisite: GRK 2301. Review; selected readings from standard authors. (CL)
- 4300—Individual Problems in Greek (3).** Prerequisites: GRK 2302. Contents will vary to meet the needs of students. Independent readings under guidance of a staff member. May be repeated once for credit with consent of instructor.

Italian (ITAL)

- 1501—A Beginning Course in Italian I (5).**
- 1502—A Beginning Course in Italian II (5).** Prerequisite: ITAL 1501.
- 2301—A Second Course in Italian I (3).** [ITAL2311] Prerequisite: ITAL 1502. Reading, cultural background, conversation, and composition.
- 2302—A Second Course in Italian II (3).** [ITAL2312] Prerequisite: ITAL 2301. Reading, cultural background, conversation, and composition.
- 2307—Italian Culture (3).** Survey of Italian culture including art, architecture, design, fashion, cuisine, language, literature, and cinema. Fulfills core Language, Philosophy, and Culture requirement.
- 2315—Italian Filmmakers (3).** An analysis of the development and main themes of major Italian filmmakers such as Fellini, Antonioni, Wertmüller, Avati, and Moretti. Taught in English. Fulfills core Creative Arts requirement.
- 3303—Italian Conversation (3).** Prerequisite: ITAL 2302. Through discussions on contemporary Italian culture, students will improve their fluency in Italian.
- 3390—Italian Cinema (3).** Covers the development of Italian cinema from the 1940s to the present. Taught in English.
- 4300—Individual Problems in Italian (3).** Independent work under guidance of a staff member. Contents will vary to meet the needs of students. May be repeated for credit up to 9 hours with consent of instructor.
- 4301—Topics in Italian Literature (3).** Prerequisite: ITAL 2302 or consent of instructor. A study of selected classical masterpieces or contemporary Italian literary works. Taught in Italian. May be repeated once when content is different.
- 4303—Advanced Italian Conversation (3).** Prerequisite: ITAL 3303. The continuation of Italian 3303. Students will be exposed to conversations with native Italian speakers and Italian media such as Italian news broadcasts, magazines, and documentaries.

Japanese (JAPN)

- 1501—A Beginning Course in Japanese I (5).** [JAPN1411] Introduction and development of the four language skills: listening comprehension, speaking, writing, and reading.
- 1502—A Beginning Course in Japanese II (5).** [JAPN1412] Prerequisite: JAPN 1501. Introduction and development of the four language skills: listening comprehension, speaking, writing, and reading.
- 2301—A Second Course in Japanese I (3).** [JAPN2311] Prerequisite: JAPN 1502. Reading, cultural background, grammar review, conversation, and composition skills.
- 2302—A Second Course in Japanese II (3).** [JAPN2312] Prerequisite: JAPN 2301. Reading, cultural background, grammar review, conversation, and composition skills.
- 3306—Introduction to Japanese Culture (3).** Explores the foundations of the various dimensions of Japanese culture and provides students with a deeper knowledge of Japanese culture and society. Online.
- 4300—Individual Studies in Japanese (3).** Prerequisite: JAPN 2302 or consent of instructor. Independent study in the Japanese language under the guidance of a faculty member. May be repeated for credit up to 24 hours with consent of instructor.

Korean (KOR)

- 1501—A Beginning Course in Korean I (5).** [KORE1411] Introduction and development of the four language skills: listening, comprehension, speaking, reading, and writing.

- 1502—Beginning Course in Korean II (5).** [KORE1412] Prerequisite: KOR 1501. Introduction and development of the four language skills: listening, comprehension, speaking, reading, and writing.
- 2301—A Second Course in Korean I (3).** [KORE2311] Prerequisite: KOR 1502. Enhances the knowledge and skills of the Korean language to achieve low-level intermediate proficiency in the Korean Language.
- 2302—A Second Course in Korean II (3).** [KORE2312] Prerequisite: KOR 2301. Develops communication skills to achieve high-level intermediate proficiency in learning the modern Korean language.
- 4300—Individual Studies in Korean (3).** Prerequisites: C or higher in KOR 1501, KOR 1502, KOR 2301, and KOR 2302; OR above 80 out of 100 scores in placement tests. Independent study in Korean language under the guidance of the instructor. May be repeated once for credit with different content with the consent of the department.

Latin (LAT)

- 1501—A Beginning Course in Latin I (5).** [LATI1411]
- 1502—A Beginning Course in Latin II (5).** [LATI1412] Prerequisite: LAT 1501.
- 1507—Comprehensive Latin Review First Year (5).** Prerequisite: placement exam or consent of the coordinator of the Latin program/undergraduate advisor. A comprehensive one-semester review of first year Latin for qualified students.
- 2301—A Second Course in Latin I (3).** [LATI2311] Prerequisite: LAT 1502 or LAT 1507. Review; selected readings from standard authors.
- 2302—A Second Course in Latin II (3).** [LATI2312] Prerequisite: LAT 2301. Review; selected readings from standard authors. (CL)
- 4300—Individual Problems in Latin (3).** Prerequisite: LAT 2302 or consent of instructor. Contents will vary to meet the needs of the students. Independent reading under guidance of a staff member. May be repeated for credit up to 18 hours with consent of instructor.
- 4305—Individualized Readings in Latin Literature (3).** Prerequisite: LAT 2302 or consent of instructor. Contents will vary to meet the needs of students. Major works of selected Latin writers. May be repeated once for credit with consent of instructor.

Linguistics (LING)

- 2308—Language Learning Myths and Realities (3).** Surveys myths, misconceptions, and everyday questions about how people learn a second language, and how language is viewed and used in society.
- 4311—Methods of Teaching Second and Foreign Languages (3).** Prerequisite: At least two language courses at third-year level, preferably a senior-level language course. Overview of historical and current methods of teaching second and foreign languages.
- 4315—Introduction to Spanish Linguistics (3).** Prerequisite: Consent of instructor. An introduction to the fundamentals of Spanish linguistics, including syntax, phonetics, phonology, semantics, history of the Spanish language, and linguistic variation.
- 4327—English as a Second Language: Language Use and Learning (3).** Prerequisite: Consent of instructor. Raises awareness of the social and educational implications of teaching English as a second language.
- 4332—Child Language Acquisition (3).** Prerequisite: Consent of instructor. Examines child language acquisition from birth and introduces key research and debates in the field of child language acquisition.
- 4335—Introduction to Linguistics for Second and Foreign Language Education (3).** Basic concepts in linguistics and linguistic analysis as they relate to bilingual education, ESL, and second or foreign language education.
- 4383—Topics in Second Language and Bilingual Studies (3).** Prerequisite: Consent of instructor. Linguistic, psycholinguistic, and sociolinguistic issues in bilingualism and second languages. May be repeated for a maximum of 6 hours if content is different.

Portuguese (PORT)

- 1501—Elementary Portuguese I (5).** [PORT1411] Introduction and development of the four language skills in Portuguese: Listening comprehension, speaking, reading, and writing.
- 1502—Elementary Portuguese II (5).** [PORT1412] Prerequisite: PORT 1501. Introduction and development of the four language skills in Portuguese: Listening comprehension, speaking, reading, and writing.
- 1507—Intensive Portuguese for Spanish Speakers (5).** Prerequisite: Consent of instructor. An intensive course of elementary Portuguese for Spanish speakers. Comparative aspects of Spanish and Portuguese. Topics in Lusophone culture. Covers the material of PORT 1501 and PORT 1502. Admits to PORT 2301.

- 2301—Intermediate Portuguese I (3).** [PORT2311] Prerequisite: PORT 1502 or PORT 1507. Reading, cultural background, grammar review, conversation, and composition.
- 2302—Intermediate Portuguese II (3).** [PORT2312] Prerequisite: PORT 2301. Reading, cultural background, grammar review, conversation, and composition.
- 3303—Studies in Portuguese (3).** Prerequisite: PORT 2302. Independent studies in selected topics in Portuguese language and literature. May be repeated once when content differs.
- 3307—Luso-Brazilian Civilization and Literature (3).** Examines the civilization and cultures of the Luso-Brazilian world through the study of representative literary, cultural, and journalistic texts. Topics range from 16th through the 20th centuries. Films will be screened to illustrate the material. Taught in English. May be repeated once with different content.
- 4300—Individual Studies in Portuguese (3).** Prerequisites: PORT 2302 and consent of instructor. Contents will vary to meet the needs of the student. Individual study under the guidance of a faculty member. May be repeated for up to 12 credit hours.

Russian (RUSN)

- 1501—A Beginning Course in Russian I (5).** [RUSS1411] Introduction and development of the four language skills: listening comprehension, speaking, reading, and writing.
- 1502—A Beginning Course in Russian II (5).** [RUSS1412] Prerequisite: RUSN 1501. Introduction and development of the four language skills: listening comprehension, speaking, reading, and writing.
- 2301—A Second Course in Russian I (3).** [RUSS2311] Prerequisite: RUSN 1502. Training in oral and written expression and in aural and reading comprehension, including optional work in the language laboratory.
- 2302—A Second Course in Russian II (3).** [RUSS2312] Prerequisite: RUSN 2301. Training in oral and written expression and in aural and reading comprehension, including optional work in the language laboratory.
- 2304—Russian Culture (3).** An examination of the important historical, political, and cultural events and trends that have been instrumental in forming Russian cultural identity. Fulfills core Language, Philosophy, and Culture requirement.
- 3301—Russian Civilization Through Literature in the 19th Century (3).** A survey course of 19th century Russian literature. Includes the works of the century's most important writers from Alexander Pushkin to Anton Chekhov. Taught in English.
- 3302—20th Century Russian Civilization Through Literature in Translation (3).** This course will deal with the literature and other arts of the turn of the 20th century in Russia and with the survival of this pre-1917 cultural tradition among the émigrés and in the Soviet Union. Taught in English.
- 3305—Studies in Advanced Russian (3).** Prerequisites: RUSN 2302 and consent of instructor. Advanced Russian language skill development at third- and fourth-year levels. May be repeated for credit up to 12 hours when content differs. (CL)
- 4301—The Great Russian Realists: Tolstoy and Dostoevsky (3).** Examines the significance of masterpieces by Tolstoy and Dostoevsky. The works will be read in translation. Conducted in English. (CL)
- 4302—Contemporary Russian Literature in Translation (3).** Examines the works of major Russian authors such as Aleksandr Solzhenitsyn and Tatyana Tolstaya from 1953 to the present. (CL)

Slavistics (SLAV)

- 2301—The Vampire in East European and Western Culture (3).** An investigation of the myth of the vampire from its inception in early East European culture to its popularization in the West. Fulfills core Language, Philosophy, and Culture requirement.
- 4300—Individual Studies in Slavistics (3).** Prerequisite: Instructor consent. Independent study in Slavic and East European subjects under guidance of a faculty member, with content varying according to needs. May be repeated for credit up to 24 hours with consent of instructor.

Spanish (SPAN)

- 1310—Survival Spanish Language and Cultures (3).** Situation-based study of Spanish and cultures of the Hispanic world to prepare students to study and work abroad. Does not fulfill foreign language requirement.
- 1501—A Beginning Course in Spanish I (5).** [SPAN1411] Prerequisite: 0-1 years of high school Spanish. The Office of the Registrar must receive student's official high school transcript prior to registration.
- 1502—A Beginning Course in Spanish II (5).** [SPAN1412] Prerequisite: SPAN 1501.

- 1507—Comprehensive Spanish Review - First Year (5).** [SPAN1305] Prerequisite: Two years high school Spanish. The Office of the Registrar must receive student's official high school transcript prior to registration. A comprehensive one-semester review.
- 1508—Beginning Spanish for Hispanic Students (5).** Prerequisite: Spanish Heritage Language (SHL) department approval. For students who grew up listening to Spanish but are not confident in speaking, reading, or writing Spanish.
- 1607—Intensive Spanish First Year (6).** Intensive immersion development of the four language skills in Spanish: Oral comprehension, speaking, reading, and writing. Course is taught in Spain.
- 2300—Social Change in the Hispanic World through Cultural Expressions (3).** Examines culture and social change in Spanish, Latin American, Latinx, and U.S.-Mexico Border cultures through different cultural expressions such as language, text, image, and music. Fulfills core Language, Philosophy, and Culture requirement.
- 2301—A Second Course in Spanish I (3).** [SPAN2311] Prerequisite: SPAN 1502 or SPAN 1507 or SPAN 1607 or consent of department. Reading, cultural background, conversation, and composition. (Honors section offered.)
- 2302—A Second Course in Spanish II (3).** [SPAN2312] Prerequisite: SPAN 2301. Reading, cultural background, conversation, and composition. (Honors section offered.)
- 2303—Intermediate Spanish for Hispanic Students I (3).** [SPAN2313] Prerequisite: placement exam. A second-year course designed for Hispanic students who have been educated in the United States and have had exposure to Spanish at home but have had limited formal training in Spanish.
- 2304—Intermediate Spanish for Hispanic Students II (3).** [SPAN2315] Prerequisite: placement exam. A second-year course designed for Hispanic students who have been educated in the United States and have had exposure to Spanish at home but have had limited formal training in Spanish.
- 2607—Intensive Spanish - Second Year (6).** Prerequisite: B or better in any of the following courses: SPAN 1402, SPAN 1502, SPAN 1507, SPAN 1607; SPCS 1305, 1512. Reading, culture, conversation, and composition. Equivalent to SPAN 2301 and SPAN 2302. Specific sections are reserved for heritage Spanish speakers and require departmental approval.
- 3304—Hispanic Cultural Studies Survey (3).** Prerequisites: SPAN 2302 or SPAN 2304 or SPAN 2607 or departmental approval. Introduction to the literary and cultural history of the Spanish-speaking world. (CL)
- 3305—Intermediate Grammar: Oral and Written Spanish (3).** Prerequisite: SPAN 2302 or SPAN 2304 or SPAN 2607. An overview of important Spanish grammar concepts and development of basic oral and written communication skills through the study of language and culture.
- 3306—Hispanic Culture and Society (3).** Prerequisite: SPAN 2302 or SPAN 2304 or department approval. Introduction to study of Hispanic culture and society. Examines how culture interacts with social structures and daily experience. May be repeated once with different content. (CL)
- 3307—Introduction to Hispanic Literatures (3).** Prerequisite: SPAN 2302 or SPAN 2304 or department approval. Introduction to Spanish and Spanish American literatures through selected works and authors. This course is highly recommended as a prerequisite to all 4000 level literature courses. (CL)
- 3308—How the Spanish Language Works: A course in Hispanic Linguistics (3).** Prerequisite: SPAN 2302 or SPAN 2304 or departmental approval. Examines language structure throughout the Spanish-speaking world, and covers topics such as bilingualism, sound systems, historical developments, language learning, and dialect differences. (CL)
- 3309—Spanish Language Studies—Special Topics (3).** Prerequisites: SPAN 2302, SPAN 2304, SPAN 2607, or departmental consent. Study of Spain through its rich linguistic, literary, and visual culture. May be repeated once for credit with different content. Taught on-site in Seville, Spain. (CL)
- 3315—Communication Literacies for Heritage Speakers (3).** Prerequisites: SPAN 2302 or SPAN 2607 or SPAN 2304; departmental approval. Development of oral communication skills through the study of language and culture in bilingual contexts. For students who grew up speaking or listening to Spanish. (CL)
- 3318—The Sounds of Spanish (3).** Prerequisite: SPAN 2302 or SPAN 2304 or department approval. Provides students with an overview of the sound system of Spanish and the socio-phonological variation present in the Spanish speaking world. (CL)
- 3343—Spanish Language Development (3).** Prerequisite: SPAN 2301 and SPAN 2302. Development of listening, speaking, reading, and writing skills on location in Mexico. Offered in Mexico each summer.
- 3344—Mexican Life and Culture (3).** Prerequisite: SPAN 2302 or SPAN 2304 or SPAN 2607 or departmental consent. Introduction to the fields of

Mexican literary and cultural studies, with an emphasis on the modern and contemporary periods. (CL)

- 3345—Hispanic Lubbock (3).** Prerequisites: SPAN 2302, SPAN 2304, or department approval. Study of the contributions of Mexican Americans to Lubbock's culture, history, and economic growth since the early twentieth century. (CL)
- 3346—Gender and Sexuality in Latin America (3).** Prerequisites: SPAN 2302 or SPAN 2304 or departmental approval. Introduces students to the cultural history of gender and sexuality in the Hispanic/Lusophone world, examining intersections of race, class, sex, gender, and nation as well as the role of cultural products in shaping how we think about gender and sexuality. (CL)
- 3389—Individual Studies in Spanish (3).** Prerequisite: SPAN 2302 or SPAN 2607 or consent of instructor. Independent work under the guidance of a full-time faculty member. Course is generally for study abroad when organized courses are not available. May be repeated for credit up to 9 hours with different course content. May not be taken following 4000-level work.
- 3390—Hispanic Culture and Civilization (3).** An overview of the Hispanic world, from Roman Spain to modern Latin America. Taught in English. Carries humanities credits. (CL)
- 3391—Hispanic Film in Translation (3).** A study of Hispanic film and its relationship to literature and culture. Taught in English. Not for Spanish majors or minors, but recommended as supplementary.
- 3392—Hispanic Literature in Translation (3).** A study of major literary themes and writers of the Hispanic world. Taught in English. Not for Spanish majors or minors, but recommended as supplementary.
- 4000—Individual Studies in Spanish (VI-6).** Prerequisite: Departmental consent. Study in Spanish under the guidance of a faculty member. May be repeated for credit up to 6 hours.
- 4305—Advanced Grammar (3).** Prerequisites: SPAN 3305 and any 3000-level SPAN course. Spanish language, syntax, and grammar.
- 4306—Introduction to Spanish Translation and Interpretation (3).** Prerequisites: 6 hours of SPAN courses at the 3000 level. Introduction to translation and interpretation through theory and practice. Special attention given to linguistic and cultural approaches that focus on skills required of professionals. (CL)
- 4307—Writing Literacies in Context (3).** Prerequisites: SPAN 3305 and any 3000-level SPAN course. Development of (digital) writing skills for academic and professional purposes. (CL)
- 4308—Business Spanish (3).** Prerequisites: 6 hours of SPAN courses at the 3000 level. Oral and written Spanish with special attention to idiomatic expressions and cultural practices of business in the Hispanic world.
- 4309—Spanish Language Studies-Special Topics (3).** Prerequisites: 6 hours of SPAN courses at the 3000 level. Study of diverse topics such as medical or legal Spanish, Spanish on the Internet, etc. May be repeated once for credit with different content.
- 4311—Topics in Linguistics (3).** Prerequisite: One 3000-level SPAN course (preferably SPAN 3308 or SPAN 3318). Provides an in-depth analysis of sub-fields of linguistics covering topics such as Spanish in Texas, language contact, language and social media, corpus linguistics, and linguistic landscapes.
- 4318—Spanish in the United States (3).** Prerequisites: SPAN 3305 and any other SPAN 3000-level course. Provides a sociolinguistic analysis of Spanish in the U.S. as well as the sociohistorical context, politics, and educational policies surrounding Spanish in the U.S.
- 4320—Masterpieces of Hispanic Literature (3).** Prerequisite: SPAN 3307 or departmental consent. A study of selected works from Spanish and/or Spanish American literature. May be repeated once for credit if different instructor and different content. (CL)
- 4327—Hispanic Literature-Special Topics (3).** Prerequisites: Six hours of SPAN 3305, SPAN 3307, SPAN 3315, SPAN 4305, or SPAN 4307.

Subject matter will vary to include such topics as women writers, Mexican Revolution, social protest, etc. May be repeated once for credit with different content. (CL)

- 4332—Hispanic Civilization (3).** Prerequisites: 6 hours of SPAN courses at the 3000 level. A thematic study of Spanish and Spanish American patterns of civilization, especially in the contemporary period, and the United States' Spanish heritage. May be repeated once for credit.
- 4335—Internship in Spanish (3).** Prerequisites: Two SPAN courses at the 3000 level or consent of department. Work experience in a community agency that deals with native Spanish speakers. Emphasis on cultural understanding and communicative skills.
- 4337—Topics in Latin American Cultural Studies (3).** Prerequisites: 6 hours of SPAN courses at the 3000 level. Advanced topics in Latin American literature and culture. Issues of race, ethnicity, gender, and class in Latin America. Specific topics vary. May be repeated once for credit with different content. (CL)
- 4338—Topics in Iberian Cultural Studies (3).** Prerequisites: 6 hours of SPAN courses at the 3000 level or department approval. Advanced topics in Iberian literature and culture. Study of the history, politics, and culture of the Iberian Peninsula. Specific topics vary. May be repeated once with a different topic.
- 4343—Advanced Language Skills (3).** Prerequisite: SPAN 3315, SPAN 3305, or departmental consent. A study abroad course to help develop communicative language skills through class work and organized field projects. Offered in Spain throughout academic year. Offered in Mexico only in summer. Offered only in Mexico and/or Spain each summer.
- 4344—Contemporary Mexico (3).** Prerequisites: 6 hours of SPAN at the 3000 level. Seminar-style course focusing on significant issues of contemporary Mexican culture and society. (CL)
- 4346—Spanish Life and Culture (3).** Prerequisite: SPAN 3305. A survey of Spain with emphasis on its literature, history, and culture. May be repeated once for credit. (CL) Offered in Spain each summer.
- 4360—Latinx Literature and Culture (3).** Prerequisite: SPAN 3307 or departmental consent. The development of Mexican-American literature from 1849 to the present with an emphasis on literature of the Chicano movement.
- 4361—Spanish for the Southwest (3).** Prerequisites: 6 hours of SPAN courses at the 3000 level. Study of similarities and differences between standard and regional Spanish.
- 4389—Individual Problems in Spanish (3).** Prerequisites: Two SPAN courses at the 3000 level or department consent. Independent work under the guidance of a full-time faculty member. Content will vary to meet the needs of the student. May be repeated for credit up to 9 hours with different instructor and course content.
- 4392—The Play in Spanish (3).** Prerequisites: Two SPAN courses at the 3000 level or consent of department. Intensive analysis of a play and preparation for two public performances. May be repeated for credit with change of content for up to 6 hours.

Turkish (TURK)

- 3307—Turkish Culture (3).** Turkish history, culture, and civilization. Course utilizes resources from Archives of Turkish Oral Narrative. Taught in English. Course may be repeated once with different content.
- 4300—Individual Studies in Turkish (3).** Independent studies in the language under the guidance of a faculty member. May be repeated once for credit with consent of instructor.

Vietnamese (VIET)

- 4300—Individual Problems in Vietnamese (3).** Content varies to meet the needs of students. May be repeated for credit up to 12 hours.

Department of Economics

Rashid B. Al-Hmoud, Ph.D., Chairperson

Professor: Noel

Associate Professors: Al-Hmoud, Avetisyan, Gittings, Ma, Popov, Rahnama, von Ende

Assistant Professors: Ciarliero, Economides, Hang, Kim, Ludwig, Papazyan

Lecturer: Kemper

Adjunct Faculty: Sikhova

CONTACT INFORMATION: 248 Holden Hall

Box 41014 | Lubbock, TX 79409-1014 | T 806.742.2201 | F 806.742.1137

About the Department

This department supervises the following degree programs:

- Bachelor of Arts in Economics
- Bachelor of Science in Economics
- Bachelor of Science in International Economics
- Master of Arts in Economics
 - Thesis Option
 - Non-Thesis Option
- Doctor of Philosophy in Economics

Graduate Programs

For information on graduate programs offered by the Department of Economics, visit the Graduate Programs section on page 207.

Undergraduate Programs

The Department of Economics at Texas Tech University offers a dynamic and challenging undergraduate program that provides students with a solid foundation in economics, as well as a variety of options to specialize and tailor their education to their individual goals and interests.

The Department of Economics offers three undergraduate degree programs. The Bachelor of Arts (B.A.) provides students with a broad liberal arts education while allowing them to specialize in economics and understand the complex relationship between consumers, producers, and governments in an economic system. The Bachelor of Science (B.S.) is highly structured and technically oriented, ideal for students who desire an in-depth study of economics and its tools. The Bachelor of Science in International Economics (B.S.I.E.) program combines international politics and international business with economics to provide students with a comprehensive understanding of the global economy.

Visit the [Department of Economics webpage](#) for more information.

Degree Requirements. MATH 1451 (Calculus I) is recommended for all majors in the department. Students must complete the Foundational Economics coursework [ECO 2301, 2302, 3311, and 3312] with a C- or higher before attempting any junior/senior economics courses. Additional requirements for the B.A. and B.S.I.E. include adjunct courses in statistics [MATH 2300, 2345, or equivalent] and for the B.S. include any adjunct courses in statistics [MATH 4342 and 4343]. Students choosing any of the undergraduate programs must complete all courses in the specified Communication Literacy requirement for each major. Consult with department advisor for more information.

Math Placement Examination. Students wishing to enroll in MATH 1451 must take the Math Placement Exam. View the Department of Mathematics and Statistics webpage for additional information. Previous registration for this exam is not required and there is no fee. Students are strongly encouraged to review high school level calculus concepts and skills prior to attempting the exam.

Residency Requirements. The department generally accepts transfer credits from other colleges and universities. At least 15 hours of junior/senior economics courses must be taken at Texas Tech for all majors in the

department. For an economics minor, a minimum of 9 hours of economics courses must be taken at Texas Tech. This residency requirement will be waived by the department only in very exceptional circumstances.

Grading Practices. C- or higher is required in economics courses to count toward an economics major or minor. Moreover, a minimum grade of C- is required in all specific area courses in the B.S.I.E. degree program. Additionally, the adjunct statistics for each major requires a C- or higher to count. Courses specifically required for each major or minor may not be taken pass/fail.

Minor. A minor of choice is required for the B.A. degree program. A Mathematics minor is required for the B.S. degree program. No minor is required for the B.S.I.E. degree program but it is allowed. Multiple minors are allowed if the student shows other areas of interest. Consult with department advisor for specific minors helpful for roles in economics, business, law, and other professional industries.

Study Abroad. The Department of Economics does not require B.S.I.E. majors to study abroad but highly recommends it. Additionally, we encourage all majors to participate in a study abroad program when possible. Students can participate in an approved study abroad experience through the Texas Tech International Affairs Center like faculty-led programs or a Texas Tech approved reciprocal exchange program. Consult with department advisor for more information.

Economics, B.A.

A minimum of 33 semester hours in economics courses is required for the major, including ECO 2301, 2302, 3311, 3312, 3305 or 3333, and 4305 or 4314; plus 15 hours of advanced economics field courses, of which a minimum of 3 hours must be at the 4000 level.

Communication Literacy Requirement. The courses in the Communication Literacy plan for the B.A. in Economics are ECO 3312; 3305 or 3333; and 4305 or 4314.

Additional Requirements. Additional requirements for the B.A. in Economics include an adjunct course in statistics (MATH 2345 or 2300 or equivalent) and a minimum of 18 semester hours in a minor field of choice. A minimum of 120 credit hours is required to complete the degree. Candidates for the B.A. in Economics are encouraged to consult with their advisors for more information. Other requirements appear in the Undergraduate General Degree Requirements.

Economics, B.S.

A minimum of 39 semester hours in Economics courses is required for the major, including ECO 2301, 2302, 3311, 3312, 3305 or 3333, and 4305 or 4332, and 21 hours of advanced economics electives, of which a minimum of 3 hours must be at the 4000 level.

Communication Literacy Requirement. The three required courses in the Communication Literacy plan for the B.S. in Economics are ECO 3312; 3305 or 3333; and 4305 or 4332.

Additional Requirements. A mathematics minor and two adjunct statistics courses (MATH 4342 and 4343) are required. The sample curriculum table reflects the general degree requirements for a B.S. in Economics. A minimum of 120 credit hours is required to complete the degree. Consult with department advisor for more information. Other requirements appear in the Undergraduate General Degree Requirements.

International Economics, B.S.I.E.

A minimum of 30 semester credit hours in economics courses is required, including ECO 2301, 2302, 3311, 3312, 4331, 3305 or 3333, and 4305 or 4332; plus 9 hours of junior/senior economics field courses are required. Additionally, all specific area courses, including 9 hours in International Political Science and 15 hours in Cultural, International Business, and Quantitative courses, are required.

Communication Literacy Requirement. The three required courses in the Communication Literacy plan for the B.S.I.E. are ECO 3312; 3305 or 3333; and 4305 or 4332.

Additional Requirements. No minor is required but it is allowed. An adjunct course in statistics (MATH 2300, MATH 2345, or equivalent) is required. No study abroad is required but highly recommended. The

‡ MATH 1550 and MATH 1451 are also a recommended pair.

Calculus: Adequate training in algebra, trigonometry, and analytic geometry is a prerequisite for calculus. A score of 7 on the Math Placement Exam is necessary to take calculus the first year. Scores below 7 will require additional coursework.

International Political Science Course: Consult with department advisor for complete listing of approved International Political Science courses.

Cultural, International Business, and Quantitative (CIBQ) Area: Consult with department advisor for complete listing of approved CIBQ courses.

Foreign Language: A student must complete 6 hours at the sophomore level or above in a single language. The prerequisite for all sophomore language courses is credit for the freshman level. This credit can be determined through a credit by examination. The score attained on the exam will determine whether the student is placed in a second-year course, a 5-hour review course, or in some cases the first or second semester of a beginning (first-year) language course. See Arts & Sciences General Degree Requirements for further explanation.

Study Abroad: A summer or semester of study abroad is strongly recommended (not required). Consult with department advisor for complete list of suggested study abroad programs.

Electives: These are the only courses not requiring a grade of C or higher. Elective hours may vary to meet 120-hour requirement.

sample curriculum table reflects the general degree requirements for a B.S. in International Economics. A minimum of 120 credit hours is required to complete the degree. Consult with department advisor for more information. Other requirements appear in the Undergraduate General Degree Requirements.

Economic Data Analysis, Undergraduate Minor

The online minor in Economic Data Analysis trains students to work with economic data. It begins with basic economic principles, introduces practical tools such as Excel and coding, and delves into statistics and data analysis used to answer economic questions. Tailored for today's job landscape, this minor sets students up for careers in research, data analytics, and economics.

Required courses (18 hours): ECO 2301, 2302, 3361, 3362, 3363, 3364.

Economics, Undergraduate Minor

Requirements for the minor in economics are ECO 2301, 2302, 3311, 3312, and two elective courses in advanced economics.

Undergraduate Course Descriptions

Economics (ECO)

2301—Principles of Economics I (3). [ECON2302] Emphasis on theories of the firm, value and price determination, and functional distribution, with the application of these theories to the problems of particular firms, industries, and markets. Fulfills core Social and Behavioral Sciences requirement.

2302—Principles of Economics II (3). [ECON2301] An introduction to modern economic society and theories of production and exchange. Emphasis upon monetary and fiscal policy and macroeconomics. Fulfills core Social and Behavioral Sciences requirement.

2305—Principles of Economics (3). An abridged course for students not majoring in economics. Covers the most significant portions of ECO 2301 and ECO 2302, with emphasis upon monetary and fiscal policy. Credit will not be given for both ECO 2305 and ECO 2302. Fulfills core Social and Behavioral Sciences requirement.

3161—Excel Basics (1). Learn foundational Excel tools tailored for economic data analysis.

3305—Game Theory (3). Prerequisites: C- or better in ECO 3311 and ECO 3312. Analysis of strategic interaction. Strategies of rational choice will be derived and analyzed in economics and other environments. (CL)

3306—Introduction to Mathematical Economics (3). Prerequisites: ECO 3311 and ECO 3312. Equips students with essential mathematical techniques foundational to economics. Covers multivariate calculus, linear algebra, optimization, and probability theory in various economic contexts.

3310—Sports Economics (3). Prerequisites: ECO 2301, or ECO 2305, or consent of instructor. Examines how economic principles and business strategies shape the sports industry.

3311—Intermediate Macroeconomics (3). Prerequisite: C- or better in ECO 2302. Analysis of the determinants of aggregate demand and supply with special emphasis on macroeconomic problems such as unemployment and inflation and on techniques used to forecast macroeconomic variables.

3312—Intermediate Economic Theory (3). Prerequisite: C- or better in ECO 2301. Intermediate price theory and introduction to welfare theory. Includes theory of demand, theory of the firm, and welfare theory. (CL)

3320—Managerial Economics (3). Prerequisite: C- or better in ECO 3311 and ECO 3312. The application of economic theory to problems of business enterprise.

3323—Principles of Money, Banking, and Credit (3). Prerequisites: C- or better in ECO 3311 and ECO 3312. A basic course which deals with the commercial banking system, the Federal Reserve System, and other matters associated with money, prices, and credit control.

3324—Taxation and Public Expenditure (3). Prerequisites: C- or better in ECO 3311 and ECO 3312. Explores the justification for and effects of the entrance of government into the U.S. marketplace.

3325—Special Topics in Applied Economics (3). Prerequisites: C- or better in ECO 3311 and ECO 3312 or consent of instructor. Analysis of selected economic issues, theories, and policies in microeconomics or macroeconomics. May be repeated once for credit when topics vary.

- 3326—Industrial Organization and Competitive Strategy (3).** Prerequisite: C- or better in ECO 3311 and ECO 3312. Analyzes strategic behavior firms in imperfectly competitive markets. Includes price discrimination, price fixing, price wars, oligopoly, entry deterrence, mergers, and vertical restraint.
- 3327—Antitrust Law and Economic Regulation (3).** Prerequisites: C- or better in ECO 3311 and ECO 3312. Competition strategy and legal limits on what firms can and cannot do when competing. In-depth review of antitrust laws and full-blown economic regulation.
- 3333—International Economics (3).** Prerequisites: C- or better in ECO 3311 and ECO 3312 or consent of instructor. Principles of international trade, balance of payments, trade policies, and agreements. (CL)
- 3336—Environmental Economics (3).** Prerequisites: C- or better in ECO 3311 and ECO 3312 or consent of instructor. Applies economic models to current local and global environmental issues with an emphasis on evaluating policies.
- 3350—Behavioral and Experimental Economics (3).** Prerequisite: C- or better in ECO 3311 and ECO 3312. Shows developments in the testing of economic theory through experiments with a strong emphasis on behavioral models/phenomena in explaining economic decision-making.
- 3355—Political Economy (3).** Prerequisite: ECO 3312 or consent of instructor. An introduction to political economy theory. Topics include collective action problems, strategic voting, strategic communication, strategic bargaining, revolutions, and the role of institutions.
- 3356—Energy Economics (3).** Prerequisites: C- or better in ECO 3311 and ECO 3312 or consent of instructor. Application of economic models to current local and global energy markets with an emphasis on evaluating policies.
- 3361—Excel for Economists (3).** Learn advanced Excel tools tailored for economic data analysis.
- 3362—Statistics for Economists (3).** Introductory statistics with an emphasis on economic data analysis.
- 3363—Economic Data Analysis I (3).** Introductory course on economic data analysis, focusing on the measurement, presentation, and interpretation of economic and financial indicators.
- 3364—Economic Data Analysis II (3).** Prerequisite: ECO 3363. Introductory course on modern economic data analysis, creating indicators from surveys, newspapers, social media, and online searches to identify economic behaviors and patterns.
- 4300—Economic Research (3).** Prerequisite: C or better in ECO 3311 and ECO 3312 and consent of instructor and the director of undergraduate studies or the department chairperson. Directed undergraduate student research in selected areas under the supervision of selected departmental faculty.
- 4305—Introduction to Econometrics (3).** Prerequisite: C- or better in ECO 3311 and ECO 3312. Application of linear regression analysis including simple statistics, probability, distributions, hypothesis testing, and linear regression. (CL)
- 4306—Economic and Business Forecasting (3).** Prerequisite: C- or better in ECO 3311 and ECO 3312. Introduction to forecasting methods based on ARMA, VAR, VEC, GARCH models, applications to time series data in macroeconomics, business, and finance.
- 4314—Development of Economic Doctrines (3).** Prerequisites: C- or better in ECO 3311 and ECO 3312. The basis, nature, and effects of economic doctrines from ancient times through the 19th century. (CL)
- 4322—The Economics of Labor Markets (3).** Prerequisite: C- or better in ECO 3311 and ECO 3312. Labor as a factor of production, labor market participation and hours worked, compensating wage differentials, human capital investment, income inequality, migration, and discrimination.
- 4323—Monetary Theory (3).** Prerequisite: C- or better in ECO 3311 and ECO 3312. Analysis of money supply, money demand, interest rates, income and price level determination, and transmission mechanisms. Emphases include monetary policies in an open economy context.
- 4331—Economics of Multinational Enterprise (3).** Prerequisite: C- or better in ECO 3311 and ECO 3312. Examination of the economics of international enterprise and associations with the major dimensions of the international economy and international political economy.
- 4332—International Finance (3).** Prerequisite: C- or better in ECO 3311 and ECO 3312. Analysis of international monetary system theory, policy, and institutions. Includes attention to foreign exchange markets and roles of international banking and international managerial finance. (CL)
- 4368—Machine Learning for Economists (3).** Prerequisites: C or better in ECO 3311 or ECO 3312 or consent of instructor. Completion of ECO 3362 or a course with similar content is recommended. Introductory course in machine learning for economists. Emphasis on understanding and applying supervised and unsupervised learning techniques to address real-world challenges.

Department of English

Michael J. Faris, Ph.D., Chairperson

Hon Distinguished Professor: Wenthe

Professors: Barrera, Batra, Bauer, Baugh, Borshuk, Couch, Faris, Holmes, Kim, Kolosov, Patterson, Purinton, Rice, Roach, Shu, Spurgeon, Still, Whitney
Associate Professors: Ben-Youssef, Braver, Cortese, Geiger, Hackenbracht, Hunter, Kvande, McFadden, McNamara, W. Phillips, Pihlaja, J. Samson, Sauer, Shelton, Tham, Weedon, Zellinger

Assistant Professors: Burke, Chahine, Ganguly, Gray, Kostelich, N. Osorio, Pellegrini, L. Phillips, Schiller, Shabaan

Associate Professors of Practice: Rogerson, Smith

Assistant Professors of Practice: Cozby, Elgin Wegmann, K. Osorio, Varner

Senior Lecturers: Alvarez, S. Samson, Taylor

Lecturers: Albiar, Baratjourabi, Wells Zepeda

Visiting Assistant Professor: Koo

CONTACT INFORMATION: 212 Humanities Building
 Box 43091 | Lubbock, TX 79409-3091 | T 806.742.2501 | F 806.742.0989

About the Department

This department supervises the following degree programs and certificates:

- Bachelor of Arts in English
- Bachelor of Arts in Writing, Design, and Technical Communication
- Master of Arts in English
- Master of Arts in Technical Communication
- Master of Fine Arts in Creative Writing
- Doctor of Philosophy in English
- Doctor of Philosophy in Technical Communication and Rhetoric
- Graduate Certificate in Book History and Digital Humanities
- Graduate Certificate in Grants and Proposals
- Graduate Certificate in Linguistics
- Graduate Certificate in Teaching Technical Communication
- Undergraduate Certificate in User Experience (UX) Design
- Undergraduate Writing Certificate

In addition to its degree and certificate programs, the Department of English cooperates in interdepartmental programs in linguistics and comparative literature at both the undergraduate and graduate levels. The department also sponsors both the local chapter of Sigma Tau Delta (the national English honorary society) and a chapter of the Society for Technical Communication and supports the publication of two journals, *Iron Horse Literary Review* and *Computers and Composition*.

Graduate Programs

For information on graduate programs offered by the Department of English, visit the Graduate Programs section on page 208.

Undergraduate Programs

Written Communication Requirements

ENGL 1301 and ENGL 1302 are required of all undergraduate students. Some colleges require additional hours in English; students should consult their advisors concerning required English courses.

ENGL 1301 and ENGL 1302 are prerequisites for all 2000-level English courses. Two 2000-level English courses are prerequisites for all 3000- and 4000-level English courses (except ENGL 3365 and ENGL 3366).

English, B.A.

The English, B.A. program can be taken onsite or online.

The program in English requires 120 semester credit hours, including the core curriculum, the major, and a minor. English majors must choose a concentration in literature and language, creative writing, or the certificate program for teaching in the secondary schools. A maximum of 9 advanced hours of transfer credit in English will be accepted for the major.

Literature and Language Concentration

Students majoring in English with a concentration in literature and language study literary works from a wide variety of periods and genres. They learn to think critically and analytically about literature and about language itself. This concentration prepares students for many careers—including teaching, government service, and business—and for graduate and professional study in fields requiring extensive reading and writing, such as law, medicine, and business. ENGL 1301, 1302; 6 hours from ENGL 2321, 2322, 2323, 2324, 2325, 2326; and 3 hours from ENGL 2307, 2310, 2371, 2381, 2382, 2383, 2388, 2391 are required for an English major with a concentration in literature and language. Majors must complete 18 hours at the 3000-level and 9 hours at the 4000-level in the following courses:

I. 3000-Level

- A. Theory or Linguistics – Take one of the following: ENGL 3301, 3328, 3339, 3371, 3372, 3373
B. Diversity – Take one of the following: ENGL 3338, 3339, 3341, 3342, 3384, 3387, 3389, 3392, 3393, 3394, 3395

Note: A course cannot count for both the Diversity and the Theory/Linguistics Categories

- C. Distribution Courses – Take one course each from two of the following lists. Note that students must choose from categories not fulfilled at the 2000-level. For example, a student who has taken ENGL 2323 and ENGL 2326 must choose from Early Global, Later Global, Later British, and Early American for their distribution courses. See below for a visual explanation of this example (note that many other combinations are possible).

| | Early | Later |
|----------|---|---|
| Global | Possible 3000-level distribution course | Possible 3000-level distribution course |
| British | ENGL 2323 | Possible 3000-level distribution course |
| American | Possible 3000-level distribution course | ENGL 2326 |

- Early Global: ENGL 3335, 3336, 3338
- Later Global: ENGL 3337, 3338, 3341, 3342
- Early British: ENGL 3302, 3303, 3304, 3305, 3385
- Later British: ENGL 3307, 3308, 3309, 3311
- Early American: ENGL 3323, 3392, 3393, 3394, 3395
- Later American: ENGL 3324, 3325, 3392, 3393, 3394, 3395

Note: If students count a distribution course also as a diversity course, they must make up 3 hours with a 3000-level English elective to meet the 18 hours required at the 3000-level.

- D. Two additional 3000-level courses

II. 4000-Level

- A. Three additional 4000-level courses from the following: ENGL 4300, 4301, 4311, 4312, 4313, 4314, 4315, 4321, 4342, 4351, 4371, 4373, or 4390

Communication Literacy (CL) Requirement. To accommodate English majors while emphasizing the communication skills they will need to graduate and succeed, the department focuses on developing students' abilities to articulate and integrate ideas and information specific to three areas. Students will choose one course from each area. Courses that partially fulfill the Communication Literacy requirement for English majors with a language and literacy concentration and their associated areas, are as follows:

- **Situating in Cultural/Historical Context** (ENGL 3302, 3303, 3304, 3305, 3307, 3308, 3309, 3311, 3312, 3323, 3324, 3325, 3335, 3336, 3337, 3385, 3392, 3393, 3394, 3395)
- **Critical Communication** (ENGL 3301, 3328, 3339, 3371, 3372, 3373, 4342)
- **Intercultural Communication** (ENGL 3338, 3339, 3341, 3342, 3382, 3384, 3387, 3388, 3389, 3392, 3393, 3394, 3395)

Not all courses above will be required to fulfill the Communication Literacy requirement. After completing the CL courses, students will be able to articulate and synthesize key components of each area, using writing and other communication strategies.

English, B.A. Sample Curriculum

FIRST YEAR

Fall

- ☐ ENGL 1301 - Essentials of College Rhetoric (3 SCH)
- ☐ Mathematics (3 SCH)*
- ☐ POLS 1301 - American Government (3 SCH)
- ☐ Creative Arts (3 SCH)*
- ☐ Social & Behavioral Sciences (3 SCH)*

TOTAL: 15

Spring

- ☐ ENGL 1302 - Advanced College Rhetoric (3 SCH)
- ☐ Mathematics (3 SCH) **OR**
 - ☐ PHIL 2310 - Logic (3 SCH)
- ☐ American History (3 SCH)*
- ☐ Oral Communication (3 SCH)*
- ☐ Social & Behavioral Sciences (3 SCH)*

TOTAL: 15

SECOND YEAR

Fall

- ☐ ENGL 2000-level (3 SCH)
(Select a course that also fulfills the Language, Philosophy, and Culture requirement.)
- ☐ Foreign Language (2000-level) (3 SCH)
- ☐ POLS 2306 - Texas Politics and Topics (3 SCH)
- ☐ Life and Physical Sciences (4 SCH)*
- ☐ ENGL 2000-level survey (3 SCH) (Lit. & Lang.) **OR**
 - ☐ Elective (3 SCH)

TOTAL: 16

Spring

- ☐ ENGL 2000-level survey (3 SCH) (Lit. & Lang.) **OR**
 - ☐ Elective (3 SCH)
- ☐ Foreign Language (2000-level) (3 SCH)
- ☐ Creative Arts (3 SCH)*
- ☐ Life and Physical Sciences (4 SCH)*
- ☐ Elective (1 SCH)

TOTAL: 14

THIRD YEAR

Fall

- ☐ ENGL 3000-level (3 SCH)
- ☐ ENGL 3000-level (3 SCH)
- ☐ Minor Elective (3 SCH)
- ☐ Minor Elective (3 SCH)
- ☐ Elective (3 SCH)

TOTAL: 15

Spring

TOTAL HOURS: 120

For those who wish to pursue teacher certification, the university has a teacher education program that includes one semester of student teaching in the senior year.

* Select courses from the university's core curriculum.

Foreign Language: A student must complete 6 hours at the sophomore level or above in a single language. The prerequisite for all sophomore language courses is credit for the freshman level. This credit can be determined through a credit by examination. The score attained on the exam will determine whether the student is placed in a second-year course, a 5-hour review course, or in some cases the first or second semester of a beginning (first-year) language course. See Arts & Sciences General Degree Requirements for further explanation.

**Writing, Design, and Technical
Communication, B.A. Sample Curriculum****FIRST YEAR****Fall**

- ☐ ENGL 1301 - Essentials of College Rhetoric (3 SCH)
- ☐ American History (3 SCH)*
- ☐ MATH or Logic (3 SCH)*

* Select from the university's Core Curriculum.

Foreign Language: A student must complete 6 hours at the sophomore level or above in a single language. The prerequisite for all sophomore language courses is credit for the freshman level. This credit can be determined through a credit by examination. The score attained on the exam will determine whether the student is placed in a second-year course, a 5-hour review course, or in some cases the first or second semester of a beginning (first-year) language course. See Arts & Sciences General Degree Requirements for further explanation.

Creative Writing Concentration

The major in English with a concentration in creative writing is designed for students wishing to write fiction, nonfiction, and/or poetry with the guidance of teachers who write. This plan allows maximum concentration in literature courses so that, as they write, students may further understand and appreciate the aspects and techniques of fiction, nonfiction, and poetry. In addition to the opportunities for writing and literary study, this concentration is especially appropriate for students interested in teaching creative writing and literature at the college level, studying creative writing and literature in graduate school, and preparing for professional graduate schools, such as law and business. Permission to take ENGL 4351 requires submission of a writing sample, the prerequisite of at least one ENGL 3351 (in the same genre), and permission of the instructor.

The creative writing concentration requires ENGL 1301 and 1302 and 9 hours of 2000-level courses, at least 6 hours of which should be drawn from ENGL 2321, 2322, 2323, 2324, 2325, 2326, or 2351; and 3 hours from ENGL 2305, 2306, 2307, 2308, 2381, 2382, 2383, or 2388.

Advanced courses include 18 hours at the 3000-level and 9 hours at the 4000-level.

I. 3000-Level

- A. One British literature period course: ENGL 3302, 3303, 3304, 3305, 3307, 3308, 3309, or 3311
- B. One Global or American literature period course: ENGL 3323, 3324, 3325, 3335, 3336, 3337, 3338, 3341, 3342, 3387, 3389, 3390, 3392, 3393, 3394, or 3395
- C. Six hours of ENGL 3351 under two separate genres (fiction, poetry, or creative nonfiction)
- D. Six hours of other ENGL courses at the 3000-level

II. 4000-Level

- A. ENGL 4351 (must be in the same genre as one of the two ENGL 3351 courses the student has taken)
- B. Two additional 4000-level courses from the following: ENGL 4300, 4301, 4311, 4312, 4313, 4314, 4315, 4321, 4342, 4351, 4371, 4373, or 4390

Communication Literacy (CL) Requirement. Effective leaders, workers, and citizens—whether in the arts, government, health care, information services, industry, education, or anything else—must possess the ability to communicate effectively. That is, they must possess communication literacy. To that end, the department offers a concentration in creative writing that will help students: 1.) foster a critical understanding of how communication functions in different contexts, 2.) gain an appreciation of literature's uniquely transactional nature, and 3.) teach the acquisition of language skills toward adapting messages to situations and audiences, communicating in ways that are ethically and socially responsible in a diverse global society. To complete the concentration in creative writing, students need two sections of ENGL 3351 in different genres and one section of ENGL 4351.

English Teaching Concentration

Students seeking a provisional certificate with English Language Arts as a teaching field may satisfy the requirement in English through the Bachelor of Arts degree. Certification requirements are determined by the State Board for Education Certification and are subject to change. A grade of C or better in all English courses is required. In addition, the certification program through the College of Education requires a 2.75 GPA in the teaching field. Before beginning to take advanced courses, students should successfully complete ENGL 1301 and 1302 and 9 hours in 2000-level English (ENGL 2305, or 2306, 2307, 2308, 2310, 2311, 2321, 2322, 2323, 2324, 2325, 2326, 2351, 2371, 2381, 2382, 2383, 2388, or 2391).

Advanced courses include 15 hours at the 3000-level, 9 hours at the 3000- or 4000-level, and 3 hours at the 4000-level.

I. 3000-Level

- A. One world literature and diversity course: ENGL 3335, 3336, 3337, 3338, 3339, 3341, 3342, 3382, 3384, 3386, 3387, 3389, 3390, or 3391
- B. One British literature before 1700 course: ENGL 3302, 3303, 3304, 3305, or 3385
- C. One British literature after 1700 course: ENGL 3307, 3308, 3309, or 3311

D. One American literature course: ENGL 3323, 3324, 3325, 3387, or 3390, 3392, 3393, 3394, 3395

E. ENGL 3365

[Note that some courses fulfill more than one category (e.g., ENGL 3387 is both world literature and American literature). However, each category must have its own course to fulfill it.]

II. 3000- or 4000-Level

A. One language course: ENGL 3371, 3372, 3373, 4371, or 4373

B. One composition course: ENGL 3360 or 4360

C. One additional 3000- or 4000-level ENGL course

III. 4000-Level

A. One additional 4000-level literature or language course

Students planning to become high school teachers should minor in secondary education, which includes student teaching (EDSE 4000). They will be required to take EDSE 4000 for their student teaching experience. The university has implemented a teacher education program that includes one semester of student teaching in the senior year. Students wishing to obtain teacher certification should consult with the department's undergraduate advisor and see a College of Education advisor to complete a secondary education minor degree plan.

Communication Literacy (CL) Requirement. To accommodate English majors while emphasizing the communication skills they will need to graduate and succeed, the department focuses on developing students' abilities to articulate and integrate ideas and information specific to three areas. Students will choose one course from each area. Courses that partially fulfill the Communication Literacy requirement for English majors with a language and literacy concentration and their associated areas, are as follows:

- **Situating in Cultural/Historical Context** (ENGL 3302, 3303, 3304, 3305, 3307, 3308, 3309, 3311, 3312, 3323, 3324, 3325, 3335, 3336, 3337, 3385, 3392, 3393, 3394, 3395)
- **Critical Communication** (ENGL 3301, 3328, 3339, 3371, 3372, 3373, 4342)
- **Intercultural Communication** (ENGL 3338, 3339, 3341, 3342, 3382, 3384, 3387, 3389, 3392, 3393, 3394, 3395)

Not all courses will be required to fulfill the Communication Literacy requirement. After completing the CL courses, students will be able to articulate and synthesize key components of each area, using writing and other communication strategies.

Writing, Design, and Technical Communication, B.A.

The Writing, Design, and Technical Communication B.A. can be taken onsite or online.

The Bachelor of Arts in Writing, Design, and Technical Communication will provide a broad liberal arts background and intensive training in the principles and practices of technical communication. It will prepare students for careers as technical communicators, editors, grant writers, website developers, information architects, and publications managers in a variety of professional domains, including publishing, education, government, health care, biology, chemistry, physics, and engineering. It also will prepare students for graduate education in technical communication as well as in law, business, science, and medicine.

The Writing, Design, and Technical Communication program requires 120 semester credit hours consisting of the core curriculum, 33 hours in a major field, and a required minor.

Requirements

I. 2000-Level: ENGL 2311, 2312

II. 3000-Level

One of the following: ENGL 3366, 3371, 3373

Four of the following (Note: ENGL 3366 may be used only once):

ENGL 3360, 3362, 3363, 3365, 3366, 3367, 3368, 3369

III. 4000-Level: ENGL 4380

Three of the following: ENGL 4360, 4363, 4365, 4366, 4367, 4368, 4369, 4378

Communication Literacy Requirement. Students pursuing a degree in technical communication will engage with communication and literacy in a range of contexts. In order to complete the breadth of communication

literacy contexts required for the profession, students will choose from courses in five different communication literacy categories:

- **Workplace Literacy:** ENGL 4380 and 2311
- **Rhetorical Literacy:** (Choose One) ENGL 3362 or 3363
- **Technological Literacy:** (Choose One) ENGL 3367, 3368, or 3369
- **Linguistic Literacy:** (Choose One) ENGL 3366 or 4366
- **Cultural Literacy:** ENGL 2312

Undergraduate Minors

Book History and Digital Humanities

The minor in book history and digital humanities allows students to study oral, written, and printed texts and visual and digital media in varied social, economic, and political contexts. Students explore book history and digital humanities on local, national, and global scales, considering the various actors in textual creation, production, circulation, and reception, whether that text is a manuscript, book, graphic novel, film, digital media, etc. Courses in the minor cover a wide array of topics, including the creation of medieval manuscripts, the transition from oral to scribal to print texts, the nineteenth-century industrialization of print, the history of film, and the history of the internet and digital books, as well as letterpress print making and web design.

The minor consists of 18 hours of coursework, at least 3 hours of which come from ENGL 3350. Electives may be chosen from the list below; students should consult with the director concerning course selection and progress toward the minor.

Electives may come from: ENGL 3302, 3303, 3307, 3360 (when taught as Technologies of Writing), 3368, 4368. Other ENGL courses may count for the minor when taught with an applicable focus. Consult this page for recent and upcoming classes or ask the director of the minor. Courses that sometimes count for the minor (depending on instructor) include: ENGL 2321, 3305, 3323, 3384, 3385, 3387, 3388, 4315, 4360. Students may also choose up to three hours from outside of the College of Arts & Sciences, including: ARTH 4307 and ARCH 4324.

Contact: Dr. Marta Kvande | marta.kvande@ttu.edu

English

An English minor consists of 18 hours: ENGL 1302, two 2000-level English courses, and 9 hours of advanced English courses (3000 or 4000 level).

To receive credit toward graduation, a student who is an English major or minor must receive at least a C in courses in English. A maximum of 3 advanced hours of transfer credit will be accepted for the minor.

Students wishing to use an English minor to complete the core Language, Philosophy, and Culture requirement must choose two courses from ENGL 2307, 2310, 2351, 2381, 2382, 2383, 2388, and 2391 for their sophomore-level courses. At least two of their three upper-level courses must be numbered ENGL 3302 to 3351 and/or ENGL 3381 to 3391, but not ENGL 3360 to 3373.

Writing, Design, and Technical Communication

To graduate with the minor on the Lubbock campus or other regional Texas Tech sites, students must earn at least a C in each of these courses. A maximum of 3 hours of transfer credit will be accepted toward the minor. A minor in writing, design, and technical communication consists of the following courses: ENGL 1302, 2311, 4380, and 9 hours from ENGL 3360, 3362, 3363, 3365, 3366, 3367, 3368, 3369, 4360, 4363, 4365, 4366, 4367, 4368, 4369, 4378.

Undergraduate Certificates

User Experience (UX) Design

The undergraduate user experience (UX) design certificate helps students learn fundamental UX research, design, and writing methodologies that are applicable to a broad array of technological disciplines. Students are required to take four Technical Communication (English) courses: ENGL 3367, 3369, 4367, and 4369. Students must achieve a 3.0 GPA in all design courses to receive credit for the certificate.

Writing

The undergraduate writing certificate is designed to teach students fundamental technical, science, and creative writing skills. Students are required to take five English writing courses: ENGL 1302, 2311, 2351, 3351, and either ENGL 3363, 3365, or 3366. Students must achieve a 3.0 GPA in all writing courses to receive the certificate. A maximum of 3 advanced hours of credit will be accepted toward the certificate.

Undergraduate Course Descriptions**English (ENGL)****Developmental Course**

0301—Developmental Writing (3). Emphasizes the development of fluency and coherence in writing and increased capability in usage and grammar. Students are assigned to this course on the basis of testing and evaluation and successfully complete this course before registration in ENGL 1301. Not applicable toward general degree requirements in any degree program. Hours for ENGL 0301 are in addition to the minimum number needed for graduation.

Undergraduate Courses

- 1301—Essentials of College Rhetoric (3).** [ENGL1301] Prerequisite: Successful completion of ENGL 0301 or a satisfactory score on SAT, ACT, or English department writing sample. A student may be required to transfer to ENGL 0301 on the basis of the English department writing sample. Focuses on the writing process and requires students to write extensively in a variety of modes and styles. Partially fulfills core Communication (Written) requirement.
- 1302—Advanced College Rhetoric (3).** [ENGL1302] Prerequisite: Successful completion of ENGL 1301. Focuses on writing from sources, research methods, and documentation. Partially fulfills core Communication (Written) requirement.
- 2305—Introduction to Poetry (3).** Prerequisites: ENGL 1301, ENGL 1302. Introduction to the art of poetry through critical study of poems representing a variety of styles, periods, cultures, and authors. Writing required. Fulfills core Creative Arts requirement.
- 2306—Introduction to Drama (3).** Prerequisites: ENGL 1301, ENGL 1302. Critical study of and writing about plays that represent a variety of styles, periods, cultures, and authors. Writing required.
- 2307—Introduction to Fiction (3).** Prerequisites: ENGL 1301, ENGL 1302. Critical study of and writing about short stories and novels that represent a variety of styles, periods, cultures, and authors. Writing required.
- 2308—Introduction to Nonfiction (3).** Prerequisites: ENGL 1301, ENGL 1302. Critical study of and writing about historical, biographical, and scientific writings that represent a variety of styles, periods, cultures, and authors. Writing required.
- 2310—Literature, Social Justice, and the Environment (3).** Prerequisites: ENGL 1301, ENGL 1302. Critical study and writing about literary texts from multiple genres, periods, and traditions in relation to aspects of social justice and the environment. Fulfills core Language, Philosophy, and Culture requirement.
- 2311—Introduction to Technical Writing (3).** [ENGL2311] Prerequisites: ENGL 1301 and ENGL 1302. Introduction to patterns of writing used in reports and letters for business, industry, and technology. Writing required. (CL)
- 2312—Texts and Technologies that Change the World (3).** Survey of technologies of text production, publication, and consumption across cultures, extending from manuscripts through the printing press and to the internet. (CL)
- 2321—Global Literature I (3).** Prerequisites: ENGL 1301, ENGL 1302. Survey of global literature from ancient to modern times, with a special focus on the epic as a trans-historical and transcultural genre.
- 2322—Global Literature II (3).** Prerequisites: ENGL 1301, ENGL 1302. Survey of global literature from the modern to the contemporary with special attention to modernist, postmodernist, and postcolonial questions and sensibilities in different genres.
- 2323—British Literature I (3).** Prerequisites: ENGL 1301, ENGL 1302. Survey of British literature from the Middle Ages to the 18th century, including representative genres from each period.
- 2324—British Literature II (3).** Prerequisites: ENGL 1301, ENGL 1302. Survey of British literature from Romanticism to the present day, including representative genres from each period.
- 2325—American Literature I (3).** Prerequisites: ENGL 1301, ENGL 1302. Survey of American literature from beginnings to the Civil War, including representative genres from each period.
- 2326—American Literature II (3).** Prerequisites: ENGL 1301, ENGL 1302. Survey of American literature from the Civil War to the late 20th century, including representative genres from each period.
- 2351—Introduction to Creative Writing (3).** [ENGL2307, 2308] Prerequisites: ENGL 1301 and ENGL 1302. Fundamentals of creative writing with practice in writing poetry, fiction, and/or nonfiction. Writing required. Fulfills core Language, Philosophy, and Culture requirement.
- 2370—Introduction to Language (3).** A survey of the role of language in human life—its structure, its origins, and its role in society. Fulfills core Social and Behavioral Sciences requirement.
- 2371—Language in a Multicultural America (3).** Prerequisites: ENGL 1301 and ENGL 1302. Examines language in the U.S. as it relates to race, gender, class, religion, and ethnicity. Writing required.
- 2381—Fantasy and Science Fiction (3).** Prerequisites: ENGL 1301, ENGL 1302. Critical study of and writing about fantasy and science fiction from multiple genres, periods, and traditions, with attention to aesthetics, ideas, and values. Fulfills core Language, Philosophy, and Culture requirement.
- 2382—Heroes and Anti-Heroes (3).** Prerequisites: ENGL 1301, ENGL 1302. Critical study of and writing about heroes, anti-heroes, and villains from multiple genres, periods, and traditions, with attention to aesthetics, ideas, and values. Fulfills core Language, Philosophy, and Culture requirement.
- 2383—Bible as Literature (3).** Prerequisites: 3 hours of 2000-level English courses. A survey of biblical authors, genres, and styles, with attention to methods of scriptural interpretation. Writing required. Fulfills core Language, Philosophy, and Culture requirement.
- 2384—Comics as Graphic Storytelling (3).** Prerequisites: ENGL 1301 and ENGL 1302. Analysis and critical study of a variety of comics, with the aim of understanding how comics work, and appreciating their storytelling significance.
- 2388—Introduction to Film Studies (3).** Prerequisites: ENGL 1301 and ENGL 1302. Introduction to the history, aesthetics, and criticism of avant-garde, documentary, and narrative film. Writing required. Fulfills core Language, Philosophy, and Culture requirement.
- 2391—Introduction to Literary Studies (3).** Prerequisites: ENGL 1301, ENGL 1302. Extensive practice in writing critical essays about literature. Writing required. Fulfills core Language, Philosophy, and Culture requirement. (CL)
- 3301—Introduction to Literary Theory (3).** Prerequisite: 3 hours of 2000-level English. Literary theories and methods of the 20th and 21st centuries and their application to literary texts. Writing required. (CL)
- 3302—British Literature Before 1066 (3).** Prerequisites: 3 hours of 2000-level English. Old English and Anglo-Latin history, heroic poetry, homiletics, naturalism, manuscript culture, c. 731 to 1200. Writing required. (CL)
- 3303—Medieval Literature in England (3).** Prerequisite: 3 hours of 2000-level English. Medieval literature in England c. 1066 to 1400: history, romance, hagiography; cultural and codicological contexts of early writings. Writing required. (CL)
- 3304—Medieval and Renaissance Drama (3).** Prerequisites: 3 hours of 2000-level English courses. English drama to 1642. Writing required. May be repeated for credit once when topics vary. (CL)
- 3305—British Renaissance Literature (3).** Prerequisites: 6 hours of 2000-level English courses. British poetry, prose, and drama from 1485 to 1660. Writing required. May be repeated for credit once when topics vary. (CL)
- 3307—Restoration and Eighteenth Century British Literature (3).** Prerequisites: 3 hours of 2000-level English courses. British poetry, prose, and drama from 1660 to 1800. Writing required. May be repeated for credit once when topics vary. (CL)
- 3308—British Romantic Literature (3).** Prerequisites: 3 hours of 2000-level English courses. Representative authors and literature from 1780-1830 in Great Britain. Situates texts in the historical, political, and cultural contexts of this period. Writing required. May be repeated for credit once when topics vary. (CL)
- 3309—Modern and Contemporary British Literature (3).** Prerequisites: 3 hours of 2000-level English courses. British poetry, prose, and drama since 1900. May be repeated for credit once when topics vary. (CL)
- 3311—British Victorian Literature (3).** Prerequisites: 3 hours of 2000-level English courses. Representative authors and literature from 1831-1901 in Great Britain; situates texts in the historical, political, and cultural contexts of this period. Writing required. (CL)
- 3312—Film and Media History (3).** Prerequisites: 3 hours of 2000-level ENGL courses. Survey of the history of narrative film. Writing required. May be repeated once for credit when topic varies. (CL)

- 3313—Topics in Film & Media Studies (3).** Prerequisites: 3 hours of 2000-level ENGL courses. Concepts of audio/visual communication within applications across film and media studies topics. Writing required. May be repeated once for credit when topic varies.
- 3323—Early American Literature (3).** Prerequisites: 3 hours of 2000-level English courses. American poetry and prose to 1800. Writing required. May be repeated for credit once when topics vary. (CL)
- 3324—Nineteenth Century American Literature (3).** Prerequisites: 3 hours of 2000-level English courses. American poetry, prose, and drama from 1800 to 1900. Writing required. May be repeated for credit once when topics vary. (CL)
- 3325—Modern and Contemporary American Literature (3).** Prerequisites: 3 hours of 2000-level English courses. American poetry, prose, and drama since 1900. May be repeated for credit once when topics vary. (CL)
- 3328—Introduction to American Studies (3).** Prerequisites: 3 hours of 2000-level ENGL courses. A theoretical and interdisciplinary approach to the study of American literature and culture. Writing required. (CL)
- 3335—Ancient and Medieval World Literature (3).** Prerequisites: 3 hours of 2000-level English courses. Representative works in translation, primarily Greek and Roman. Writing required. May be repeated for credit once when topics vary. (CL)
- 3336—Early Modern World Literature (3).** Prerequisites: 3 hours of 2000-level English courses. Representative works in translation from 1400 to 1900. Writing required. May be repeated for credit once when topics vary. (CL)
- 3337—Modern and Contemporary World Literature (3).** Prerequisites: 3 hours of 2000-level English courses. Representative works in translation since 1900. Writing required. May be repeated for credit once when topics vary. (CL)
- 3338—Global South Literatures (3).** Prerequisites: 3 hours of 2000-level ENGL courses. Representative African, Asian, Caribbean, and/or Latin American authors. May be repeated once for credit when topic varies. (CL)
- 3339—Sexuality and Literature (3).** Prerequisites: 3 hours of 2000-level English courses. Representative literature focusing on gender and sexuality from various parts of the world. May be repeated once for credit when topic varies. (CL) [WGS 3339]
- 3341—Studies in Translation Practice and Theory (3).** Theoretical and practical aspects of translating literature and the impact of translation on literary studies and/or creative writing. Writing required. Second language helpful; not required. (CL)
- 3342—Travel, Migration, and Literature (3).** Prerequisites: 3 hours of 2000-level English. Representative literature focusing on travel and migration from various parts of the world. Writing required. (CL)
- 3350—Topics in Book History and Digital Humanities (3).** Prerequisites: 3 hours of 2000-level English. Topics in the global history of written communication from the earliest writing systems to the rise of digital technologies. May be repeated once for credit when topic varies.
- 3351—Creative Writing (3).** Prerequisites: 3 hours of 2000-level English or, if a student's major does not require those courses, completion of English courses required by the student's major. Discussion of basic techniques in the genres of fiction, poetry, or creative nonfiction, with emphasis on student's creative writing. Writing required. May be repeated once under a separate genre. (CL)
- 3360—Issues in Composition (3).** Prerequisites: 6 hours of 2000-level English courses. Exploration of principles and practices in rhetoric and writing.
- 3362—Rhetorical Criticism (3).** Prerequisite: Junior standing. Introduction to methods of rhetorical criticism; the nature, scope, and function of rhetoric; classical and modern theories of rhetoric; practice in applying critical methods to discursive and non-discursive artifacts. Writing required. (CL)
- 3363—Introduction to Scientific Writing (3).** Prerequisite: Junior standing. How scientists as professionals and researchers present problems, methods, data, and findings to disciplinary, interdisciplinary, and non-expert audiences through scientific communication genres. (CL)
- 3365—Professional Report Writing (3).** Prerequisite: Junior standing. Preparation of professional and academic reports and publications through the use of communication analysis. Writing required. (CL)
- 3366—Style in Technical Writing (3).** Prerequisite: Junior standing. Investigation of the varieties, characteristics, and function of prose style in technical and professional writing. Writing required. (CL)
- 3367—User Experience Research (3).** Prerequisite: ENGL 2311 or 3365. Principles and techniques of testing online and print documents, using video and digital equipment, with emphasis on rhetorical effectiveness and usability of graphics, text, and format. Writing required. (CL)
- 3368—Designing for the Web (3).** Prerequisite: ENGL 2311 or ENGL 3365. Principles and techniques of designing usable Web sites, with emphasis on needs assessment, information architecture, and navigation. Writing required. (CL)
- 3369—Information Design (3).** Prerequisite: ENGL 2311 or ENGL 3365. Principles of design, visual rhetoric, and visual communication and application of those principles in document design. Writing required. (CL)
- 3371—How Language Works (3).** Prerequisites: 3 hours of 2000-level English courses. Modern theory and practice in the description and analysis of natural languages. Writing required. (CL)
- 3372—History of the English Language (3).** Prerequisites: 3 hours of 2000-level English courses. An historical and descriptive survey of the English language in the context of the cultural development of the English-speaking peoples. Writing required. (CL)
- 3373—How Syntax Works (3).** Prerequisites: 3 hours of 2000-level English courses. The syntactic and morphological analysis of modern English. Writing required. (CL)
- 3381—Literature of the Fantastic (3).** Prerequisites: 3 hours of 2000-level English courses. The analysis and criticism of the literary methods and style by which fantasy and science fiction explore cultural, psychological, and scientific issues. Writing required.
- 3382—Women Writers (3).** Prerequisites: 3 hours of 2000-level English courses. Significant works by women. Writing required. (CL) [WGS 3382]
- 3384—Religion and Literature (3).** Prerequisites: 3 hours of 2000-level English courses. The function of religious images and ideas in British and American literature as well as in works in translation. Writing required. (CL)
- 3385—Selected Plays of Shakespeare (3).** Prerequisite: 3 hours of 2000-level English courses. Survey of comedies, histories, tragedies, and romances. (CL)
- 3386—Literature and Science (3).** Prerequisites: 3 hours of 2000-level English courses. An exploration of the relations between science and technology and literature and discourse. Writing required.
- 3387—Multicultural Literatures of America (3).** Prerequisites: 3 hours of 2000-level English courses. Representative works by Americans of different cultures. May be repeated once for credit when topic varies. (CL)
- 3388—Film Genres (3).** Prerequisites: 3 hours of 2000-level English courses. Concepts of visual and aural communication and a survey of various film genres. Writing required. May be repeated once for credit when topic varies. (CL)
- 3389—Global Short Story (3).** Prerequisites: 3 hours of 2000-level English courses. Short stories around the world. Writing required. (CL)
- 3390—Literatures of the Southwest (3).** Prerequisites: 3 hours of 2000-level English courses. Examines the diverse literatures and cultures of the Southwest. Writing required.
- 3391—Literature and War (3).** Prerequisites: 3 hours of 2000-level English courses. Explores the representation of war and conflict in literature and emphasizes diverse perspectives involved. Writing required. May be repeated once for credit when topic varies.
- 3392—African American Literature (3).** Prerequisites: 3 hours of 2000-level ENGL courses. African American or African diasporic writers. Substantial writing required. May be repeated once for credit when topic varies. (CL)
- 3393—U.S. Latina/o Literature (3).** Prerequisites: 3 hours of 2000-level ENGL courses. Latina/o writers (e.g., Mexican-, Dominican-, Cuban-American). Substantial writing required. May be repeated once for credit when topic varies. (CL)
- 3394—Asian American Literature (3).** Prerequisites: 3 hours of 2000-level ENGL courses. Asian American writers (e.g., Chinese, Japanese). Substantial writing required. May be repeated once for credit when topic varies. (CL)
- 3395—Native American Literatures (3).** Prerequisites: 3 hours of 2000-level ENGL courses. Works by indigenous peoples of the Americas. Substantial writing required. May be repeated once for credit when topic varies. (CL)
- 4300—Individual Studies in English (3).** Prerequisites: Junior or senior standing; 6 hours of 3000-level ENGL courses; approval of the instructor and department chairperson. Independent study under the guidance of a member of the faculty. May be repeated once.
- 4301—Studies in Selected Authors (3).** Prerequisites: 6 hours of 3000-level English courses. Intensive examination of one or more authors. May be repeated once for credit when topics vary.
- 4311—Studies in Poetry (3).** Prerequisites: 6 hours of 3000-level English courses. Intensive studies in the genre. Writing required. May be repeated once for credit when topics vary.
- 4312—Studies in Drama (3).** Prerequisites: 6 hours of 3000-level English courses. Intensive studies in the genre. Writing required. May be repeated once for credit when topics vary.

- 4313—**Studies in Fiction (3)**. Prerequisites: 6 hours of 3000-level English courses. Intensive studies in the genre. Writing required. May be repeated once for credit when topics vary.
- 4314—**Studies in Nonfiction (3)**. Prerequisites: 6 hours of 3000-level English courses. Intensive studies in the genre. Writing required. May be repeated once for credit when topics vary.
- 4315—**Studies in Film (3)**. Prerequisites: 6 hours of 3000-level English courses. Intensive studies in the genre. Writing required. May be repeated once for credit when topics vary.
- 4321—**Studies in Literary Topics (3)**. Prerequisites: 6 hours of 3000-level English courses. Intensive examination of one or more issues, themes, or motifs in British, American, or world literature. Writing required. May be repeated once for credit when topics vary.
- 4342—**Studies in Literary Theory (3)**. Prerequisites: 6 hours of 3000-level English courses. Intensive studies in theories and traditions of literary criticism. Writing required. May be repeated once for credit when topics vary. (CL)
- 4351—**Advanced Creative Writing (3)**. Prerequisites: Submission of a writing sample; 3 hours of ENGL 3351 in the same genre and instructor consent. Form and techniques of creative nonfiction, fiction, or poetry, with emphasis on writing and discussion of the student's own creative writing. May be repeated. (CL)
- 4360—**Studies in Composition (3)**. Prerequisite: Junior or senior standing. Intensive examination of one or more issues in the study of writing. May be repeated once for credit when topics vary.
- 4363—**Issues in Science Writing and Rhetoric (3)**. Prerequisite: Junior standing. Analyzes how key classical and contemporary texts have produced and communicated scientific knowledge.
- 4365—**Special Topics in Technical Communication (3)**. Prerequisite: Junior standing; ENGL 2311 or ENGL 3365 or instructor consent. Development of complex documents, such as manuals, proposals, and newsletters. Writing required. May be repeated once for credit when topics vary.
- 4366—**Technical and Professional Editing (3)**. Prerequisite: Junior or senior standing. Methods of editing and publishing in business, science, technology, and the professions. Practical experience with editing reports and publications produced in the university. (CL)
- 4367—**Designing Instructional Materials (3)**. Prerequisite: Junior or senior standing or consent of instructor. Preparation of instructions for complex procedures with focus on task and user analysis, organization, format, and usability testing. Writing required.
- 4368—**Digital Content Management Strategy (3)**. Prerequisite: ENGL 3367, ENGL 3368, or ENGL 3369; junior or senior standing or instructor consent. Advanced study of content design for database websites, interactive design using single sourcing, and scripting technologies. Writing required.
- 4369—**User Experience Design (3)**. Prerequisite: ENGL 3367, ENGL 3368, or ENGL 3369; junior or senior standing or instructor consent. The study of information gathering for design of efficient user interaction with software and hardware through adaptive interfaces, dynamic text structures, and single-sourcing methodologies. Writing required.
- 4371—**Language and Community (3)**. Prerequisites: 3 hours of 2000-3999-level English courses and ENGL 2370, or ENGL 2371, or ENGL 3371, or ENGL 3372, or ENGL 3373. Combines community service (tutoring language and literacy) with theory (readings and discussions on linguistics, language, race/ethnicity). May be repeated once for credit when topics vary.
- 4373—**Advanced Studies in Linguistics (3)**. Prerequisites: 3 hours of 2000-3999-level English courses and ENGL 2370, or ENGL 2371, or ENGL 3371, or ENGL 3372, or ENGL 3373. Intensive examination of one or more issues in the study of language. May be repeated once for credit when topics vary.
- 4378—**Internship in Technical Communication (3)**. Prerequisites: Junior or senior standing, ENGL 3365, declared major in technical communication, and approval of the director of technical communication. Supervised work in technical communication. Requires portfolio and research paper. Writing required.
- 4380—**Professional Issues in Technical Communication (3)**. Prerequisites: 3 hrs in a 4000-level ENGL course, senior standing, declared major or minor in technical communication, or approval of the director of technical communication. Advanced study of trends in technical communication, application of theory in community service-learning project, and preparation of a professional portfolio. (CL)
- 4390—**Internship in Literature, Creative Writing, and Linguistics (3)**. Prerequisites: 6 hours of 3000-level ENGL courses, major/minor in English or related interdisciplinary field, LCWL approval. Supervised work in literature, linguistics, film, creative writing. Portfolio. .

Department of Environmental Toxicology

Jaclyn Cañas-Carrell, Ph.D., Chairperson

Professors: Anderson, Cañas-Carrell, Godard-Coddling, Kendall, Presley, Ramkumar, Singh, E. Smith

Associate Professors: Crago, Halamek, Mayer, Prada-Tiedemann, P. Smith, Wang, Yim

Assistant Professors: Halamkova, J. Smith

Assistant Professors of Practice: Barnes, Kessler, Santoro

CONTACT INFORMATION: Building 555 Reese Technology Center
Box 41163 | Lubbock, TX 79409-1163 | T 806.742.4567 | F 806.885.2132
www.entx.ttu.edu

Graduate Programs

For information on graduate programs offered by the Department of Environmental Toxicology, visit the Graduate Programs section on page 210.

About the Department

This department offers the following programs:

- Master of Science in Environmental Toxicology
- Master of Science in Forensic Science
- Doctor of Philosophy in Environmental Toxicology
- Undergraduate Minor in Environmental Toxicology
- Undergraduate Minor in Forensic Sciences

Dual Degree Program

- Master of Science in Environmental Toxicology / Doctor of Jurisprudence

The Department of Environmental Toxicology (ENTX) provides faculty and graduate students opportunities for multidisciplinary research and scholarly engagement related to environmental, forensic, and human health sciences. The Department also houses two research-focused institutes: The Institute of Environmental and Human Health (TIEHH) and the Institute for Forensic Science (IFS). TIEHH integrates the efforts of Texas Tech University, the School of Law, and the Texas Tech University Health Sciences Center in a joint venture to assess the impacts of toxic chemicals and other stressors on the natural environment. IFS is a comprehensive teaching, training, and research organization in all aspects of forensic science. IFS is committed to providing outstanding service to the university, profession, and community, and committed to supporting local law enforcement and criminal justice agencies through the sharing of ideas, problem-solving, and empiricism promoting social values and contributing to safer communities.

The Environmental and Human Health faculty attract graduate students at both the master's and doctoral level, with their backgrounds in biological sciences, medicine, epidemiology, biostatistics, engineering, chemistry, computer science, law, mathematics, pharmacology, physiology, and wildlife biology. The Forensic Science faculty are committed to the production and dissemination of interdisciplinary forensic science research through a unique multidisciplinary program that provides outstanding education, research, and professional training opportunities for undergraduate and graduate students at TTU and for local and regional law enforcement.

The Department of Environmental Toxicology offers graduate programs within the College of Arts & Sciences as well as undergraduate minors in Environmental Toxicology and Forensic Sciences. The courses are designed to provide undergraduate students the opportunity to learn about and conduct scientific research in the Department of Environmental Toxicology. Generally, a background in the natural, physical, or health sciences will provide the necessary preparation for completion of these courses. Interested students should contact faculty within the department.

The Environmental Toxicology, M.S. program (36 hours) and the Ph.D. program (72 hours) are composed of coursework emphasizing the principles of toxicology, the environmental fate of chemicals, statistical

approaches to study design, data handling, and data analysis, and seminars in environmental toxicology. Supplemental coursework, research, and thesis or dissertation hours are chosen by the student with the guidance of their committee, allowing for focus on the student's particular research emphasis. Students pursuing either degree must perform an original research project, prepare a written thesis or dissertation, and defend their work in a public defense.

The Forensic Science, M.S. program (45 hours) has the option of completing a research thesis or a comprehensive written exam coupled with an internship. Students from various undergraduate backgrounds may pursue either of two concentrations within the program: Forensic Chemistry or the Forensic Investigation concentration. Students pursuing the Forensic Chemistry concentration must have a bachelor's degree in a forensic or natural science (i.e., biology or chemistry). Furthermore, currently employed forensic professionals can pursue the online Forensic Science Professional concentration within our M.S. in Forensic Science degree. The Forensic Professional Concentration entails 28 credit hours of online graduate coursework (core + forensic electives) coupled with six credit hours of an in-person forensic capstone experience (required; one-week intensive hands-on training for two summers), targeted for working forensic professionals only to allow for flexibility of working professionals.

Undergraduate Minors

Environmental Toxicology

The minor in Environmental Toxicology offers an undergraduate program within the College of Arts & Sciences with 18 credit hours of coursework for undergraduates. The program is designed to provide undergraduate students the opportunity to learn basic sciences and be exposed to scientific research in environmental toxicology. The Department of Environmental Toxicology integrates a multidisciplinary approach with a primary focus on research in wildlife and human health in the following areas to assess the impacts of toxic chemicals and other stressors on the natural environment: Wildlife toxicology, ecotoxicology, molecular toxicology, analytical toxicology, and aquatic toxicology.

Required courses (students are required to take 9 credit hours from the following courses): ENTX 3300, 3301, 4000, 4301, 4325, 4326, 4374; FSCI 4355 (*Prerequisite: FSCI 2308*).

Elective courses (students are required to take 9 credit hours of electives from the following courses): ANSC 3301, 3402; BIOL 1401, 1402, 1403, 1404, 3320; CHEM 1307, 1308, 3305, 3306; ENTX 3300, 3301, 4325, 4326, 4374; FSCI 4355; NRM 2406, 2307, 3314, 4408; ZOOL 2403, 2404.

Contact: Dr. Ernest Smith | ernest.smith@ttu.edu

Forensic Sciences

The goal of the Forensic Sciences minor is to offer students the opportunity to take courses pertinent to scientific and methodological issues associated with crime scene investigation and criminalistic disciplines. All students minor in forensic sciences must complete at least 18 hours in designated

forensic-related courses. Courses with a grade of D cannot be counted toward fulfillment of the minor. At least 6 hours of upper-division courses must be taken at Texas Tech. Designated courses may require prerequisites before the student can enroll in them. Consult the catalog or contact the specific instructors for details.

Requirements for the minor are FSCI 2308 (Forensic Sciences), FSCI 4355 (Forensic Trace Analysis, prerequisite: FSCI 2308), and 12 credits from the designated forensic-related courses: ANTH 3303, 4343; BIOL 3416; CRIM 2335, 4325; ENTX 3300, 3301; FSCI 4300; PSY 4384; SOC 3327, 4335.

Contact: Dr. Paola Tiedemann | paola.tiedemann@ttu.edu

Undergraduate Course Descriptions

Environmental Toxicology (ENTX)

- 3300—Biological Effects of Chemicals in the Environment (3).** Introduces students to the biological effects following exposure to chemicals in the environment.
- 3301—Introduction to Ecotoxicology (3).** A comprehensive overview of wildlife and ecological problems with a focus on toxicology.
- 4000—Undergraduate Research in Environmental Toxicology (V1-3).** Prerequisite: 15 hours of biology or chemistry, junior or senior standing, and consent of instructor. Selected research problems according to the needs of the student. May be repeated for credit.
- 4301—Special Topics in Environmental Toxicology (3).** Prerequisite: Consent of instructor. Special areas of current interest not commonly included in other undergraduate courses (e.g., wildlife toxicology, pesticides in the environment).
- 4325—Principles of Toxicology I (3).** Prerequisite: ENTX 3300 or ENTX 3301 or consent of instructor. First half of two-semester course. Examines foundations of toxicological sciences, covering principles, disposition, and half of toxicity mechanisms.
- 4326—Principles of Toxicology II (3).** Prerequisite: ENTX 4325. Second half of two-semester course. Covers remaining toxicity mechanisms, toxic agents, and applied toxicology.
- 4371—Procedures and Techniques in Ecologic Risk Assessment (3).** Designed to provide students with a solid foundation in risk assessment methods. Students will learn how the ecological risk assessment framework developed by U.S. EPA is used to assess the potential hazards of chemicals. [ENTX 6371]

Forensic Sciences (FSCI)

- 2308—Forensic Sciences (3).** An introductory course focusing on basic principles of criminalistics. Experts from academia and law enforcement will provide guest lectures on specific topics.
- 4300—Individual Studies in Forensic Science (3).** Prerequisite: Consent of instructor. Independent study under the individual guidance of a faculty member. May be repeated, up to a total of 6 credits.
- 4355—Forensic Trace Evidence (3).** Prerequisite: FSCI 2308. Covers the application of analytical chemistry techniques for the analysis of trace evidence encountered in the forensic science laboratory to aid in criminal investigations.

Department of Geosciences

Callum J. Hetherington, Ph.D., Chairperson

Pevehouse Professor: Sylvester

Professors: Ancell, Bruning, Hetherington, Horita, Lee, Nagihara, Ridley, J. Schroeder, Weiss, Yoshinobu

Associate Professors: Ardon-Dryer, Carter, Dahl, Gurrola, Karlsson, Leverington, Nitttrouer, Pal, Segvic, Sweet

Assistant Professors: Ardill, Bhattachan, Henderson, Khaled, McAdams, Reygadas-Langarica, Tung, Wang

Professor of Practice: C. Schroeder, Xu

Instructors: Asquith, Shaw, Weaver

Adjunct Faculty: Asquith, Holterhoff, Johnson, McGovern, Polyakov, Solis, Stout, Van Pelt

CONTACT INFORMATION: 125 Science Building
Box 41053 | Lubbock, TX 79409-1053 | T 806.742.3102
www.depts.ttu.edu/geosciences

About the Department

This department supervises the following degree programs:

- Bachelor of Arts in Geography and the Environment
- Bachelor of Arts in Geosciences
- Bachelor of Science in Geosciences
 - Geophysics Concentration
 - Geology Concentration
 - Environmental Geology Concentration
 - Environmental Sciences Concentration
- Master of Science in Atmospheric Science
- Master of Science in Geography and the Environment
- Master of Science in Geosciences
- Doctor of Philosophy in Geosciences
- Undergraduate Certificate in Geographic Information Science and Technology
- Graduate Certificate in Geographic Information Science and Technology

Graduate Programs

For information on graduate programs offered by the Department of Geosciences, visit the Graduate Programs section on page 213.

Undergraduate Programs

Geoscience is a diverse field that focuses on the study of the Earth and other planets and how these systems evolve through time. Geoscientists apply principles of physics, chemistry, biology, and mathematics to understand Earth's history. Geoscientists are employed in environmental sciences and engineering, energy, and mining and resource companies; state and federal agencies; and in education, law, data science, and business. The B.S. in Geosciences commonly leads to graduate studies in the physical sciences as well as the STEM M.B.A. The undergraduate program offers a B.A. in geosciences—geology concentration—and three concentrations in the B.S. degree: geology, geophysics, and environmental geology. Capacity in upper-division GEOL, GPH, and GCH courses may be capped due to limited departmental resources. The residency requirement for the major is 12 hours.

Communication Literacy Requirement. Geoscience graduates are expected to be able to communicate with their peers and with the general public in a variety of ways. In particular, they should be capable of written communication in a scientific format, oral communication, both to peers and to informed laypersons, and illustration of data and concepts through various graphical formats. Courses in the Communication Literacy Plan for the B.S. and B.A. in Geosciences are three courses from GEOL 2101, 3401, 3402; and GIST 3300.

Minors. The department offers six minors: Geography and the Environment, Geology, Geophysics, Atmospheric Science, Geographic Informa-

tion Science and Technology, and a Composite Minor in Geosciences. The residency requirement for all minors is 6 hours.

Teacher Education. The department cooperates with the College of Education in preparing individuals for science certification in the programs in Education (middle-level education) and Multidisciplinary Science (composite science certification). The student should consult the College of Education and the Department of Geosciences for requirements. Geography coursework is included in the social science composite field certification program in secondary education. Specific course requirements for this program may be obtained in the department.

Geography and the Environment, B.A.

The Bachelor of Arts in Geography and the Environment combines a liberal arts education with the technical skills necessary to be successful in the modern workforce. The undergraduate program also provides a solid foundation for those students who wish to pursue graduate study in geography or a related professional field.

As a discipline, geography provides a unique framework for understanding our world based on location. Geography is concerned with where things are located, why they are located where they are, and how these work together to form a tapestry of human and physical landscapes across the surface of the Earth. The degree program emphasizes coursework in both the social and physical sciences to provide students with a broad understanding of the world's physical environment and the human experience in that world.

Students completing the degree program will have the knowledge, tools, and technical skills necessary to understand and address many of the social and environmental problems facing society and the planet at large. This allows students in geography to pursue their interests in a wide variety of topics including social and cultural change, globalization, urbanization, impacts of climate change, natural resource management, natural hazards, food and water security, resilience, and sustainability.

Students in the geography program are strongly encouraged to pursue a minor in Geographic Information Science and Technology (GIST). When taken together, the GIST minor provides students with knowledge and technical expertise in geographic information science. Courses in the minor cover geographic information systems (GIS), database design, spatial analysis, satellite remote sensing, cartographic design, and global navigation satellite systems (GNSS).

Students who graduate from our program have gone on to become emergency managers, urban planners, GIS specialists for city and county governments, faculty members, and researchers in federal labs. Careers are possible in a variety of government, private industry, and academic institutions.

Communication Literacy Requirement. Communication literacy in geography is illustrated by competence in reading, writing, oral presentation, and cartography. Our faculty members endorse a project-driven curriculum. Courses in the Communication Literacy Plan for the B.A. in Geography and the Environment are GEOG 3337, 3355, 4360; and GIST 3300.

Geosciences, B.A.

The geology program leading to the B.A. degree provides a broad liberal arts background and basic training in the principles of geosciences. The program is designed for students with strong interests in earth processes and the history of nature's initiation of and response to continuous change. Successful B.A. graduates have pursued careers in teaching, business, and government agencies, and others have pursued advanced degrees in law, business administration, and environmental sciences. Students interested in professional employment or graduate degrees in geology should complete the B.S. degree program. Students are required to earn at least a C in all major, minor, and adjunct courses. Successful completion of adjunct courses with a C or better is required before upper-division geosciences courses may be taken. Students may choose any minor approved by the university.

Geosciences, B.S.

The geosciences program leading to the B.S. degree provides graduates with an excellent foundation for acceptance to graduate programs in the

Geography and the Environment, B.A. (with GIST minor) Sample Curriculum

FIRST YEAR

Fall

- ☐ GIST 2300 - Digital Earth (3 SCH)
- ☐ GEOG 2300 - Introduction to Human Geography (3 SCH)
- ☐ ENGL 1301 - Essentials of College Rhetoric (3 SCH)
- ☐ MATH Elective (3 SCH)
- ☐ Personal Fitness and Wellness (1 SCH)
- ☐ Social & Behavioral Sciences Elective (3 SCH)

TOTAL: 16

Spring

- ☐ GEOG 1401 - Global Environmental Science (4 SCH)
- ☐ MATH Elective (3 SCH)
- ☐ ENGL 1302 - Advanced College Rhetoric (3 SCH)
- ☐ Life and Physical Sciences (GEOL/ATMO) (4 SCH)

TOTAL: 14

SECOND YEAR

Fall

- ☐ GIST 3300 - Geographic Information Systems (3 SCH)
- ☐ GEOG 3355 - Environmental Hazards and Disasters (3 SCH)
- ☐ Foreign Language (1000-level) (5 SCH)
- ☐ Personal Fitness and Wellness (1 SCH)
- ☐ POLS 1301 - American Government (3 SCH)

TOTAL: 15

Spring

- ☐ GEOG 3350 - Social and Cultural Geography (3 SCH) **OR**
- ☐ GEOG 3351 - Geography of Urban Places (3 SCH)
- ☐ GIST Jr./Sr. Elective (3 SCH)
- ☐ Foreign Language (2000-level) (3 SCH)
- ☐ POLS 2306 - Texas Politics and Topics (3 SCH)
- ☐ Language, Philosophy, and Culture (3 SCH)

TOTAL: 15

THIRD YEAR

Fall

- ☐ Foreign Language (2000-level) (3 SCH)
- ☐ GEOG Jr./Sr. Elective (3 SCH)
- ☐ HIST 2300 - History of the United States to 1877 (3 SCH)
- ☐ Creative Arts (3 SCH)
- ☐ GIST Jr./Sr. Elective (3 SCH)

TOTAL: 15

Spring

- ☐ Creative Arts (Jr./Sr.) (3 SCH)
- ☐ GEOG 3310 - Environmental Change (3 SCH)
- ☐ GIST Jr./Sr. Elective (3 SCH)
- ☐ GEOG 3337 - Economic Geography (3 SCH)
- ☐ Free Elective (3 SCH)

TOTAL: 15

FOURTH YEAR

Fall

- ☐ English Literature (3 SCH)
- ☐ GEOG Jr./Sr. Elective (3 SCH)
- ☐ GIST Jr./Sr. Elective (3 SCH)
- ☐ Language, Philosophy, and Culture (Jr./Sr.) (3 SCH)
- ☐ Free Elective (3 SCH)

TOTAL: 15

Spring

- ☐ English Literature (3 SCH)
- ☐ Oral Communication (3 SCH)
- ☐ GEOG 4360 - Seminar in Geography (3 SCH)
- ☐ HIST 2301 - History of the United States since 1877 (3 SCH)
- ☐ Free Elective (3 SCH)

TOTAL: 15

TOTAL HOURS: 120

Foreign Language: A student must complete 6 hours at the sophomore level or above in a single language. The prerequisite for all sophomore language courses is credit for the freshman level. This credit can be determined through a credit by examination. The score attained on the exam will determine whether the student is placed in a second-year course, a 5-hour review course, or in some cases the first or second semester of a beginning (first-year) language course. See Arts & Sciences General Degree Requirements for further explanation.

Geosciences, B.A. (Geology Concentration) Sample Curriculum

FIRST YEAR

Fall

- ☐ GEOL 1303 - Our Planet Earth: Principles of Geology (3 SCH)
- ☐ GEOL 1101 - Our Planet Earth: Principles of Geology Laboratory (1 SCH)
- ☐ CHEM 1307 - Principles of Chemistry I (3 SCH)
- ☐ CHEM 1107 - Experimental Principles of Chemistry I (1 SCH)
- ☐ MATH Elective (3 SCH)*
- ☐ HIST 2300 - History of the United States to 1877 (3 SCH)

TOTAL: 14

Spring

- ☐ GEOL 2401 - History of the Earth through Deep Time (4 SCH)
- ☐ MATH 1321 - Trigonometry (3 SCH)
- ☐ HIST 2301 - History of the United States since 1877 (3 SCH)
- ☐ ENGL 1301 - Essentials of College Rhetoric (3 SCH)
- ☐ Minor Elective (3 SCH)

TOTAL: 16

* Select from Arts & Sciences General Degree Requirements.

Foreign Language: A student must complete 6 hours at the sophomore level or above in a single language. The prerequisite for all sophomore language courses is credit for the freshman level. This credit can be determined through a credit by examination. The score attained on the exam will determine whether the student is placed in a second-year course, a 5-hour review course, or in some cases the first or second semester of a beginning (first-year) language course. See Arts & Sciences General Degree Requirements for further explanation.

geosciences and for many careers as a professional geoscientist. Students completing the B.S. degree will have the knowledge, tools, and technical skills necessary to understand and address global needs for society, while working to sustainably harness and develop Earth's resources and protect the environment. Students pursuing a B.S. in Geosciences are required to maintain a TTU GPA of 2.5 to remain in the program. Students earning a cumulative TTU GPA less than 2.5 will be given a one-semester probationary period allowing them to improve their GPA. Internal transfers are required to have a TTU GPA of 2.5 to declare into the B.S. in Geosciences program. Students are required to earn at least a C in all major, minor, and adjunct courses. Successful completion of adjunct courses with a C or better is required before upper-division geoscience courses may be taken. Field work is a requirement for the B.S. degree. If this is a concern, the B.A. should be considered.

Environmental Geology Concentration

The environmental geology concentration prepares students for graduate study or a career as a scientist, particularly in the fields of environmental consulting and hydrogeology. The minor must be in a field of science, mathematics, engineering, or composite of these fields.

Environmental Sciences Concentration

The environmental science concentration prepares students for graduate study or a career in environmental science and the related fields of environmental sustainability, protection, monitoring, and remediation. Students will be prepared to pursue graduate study in environmental science. The minor must be in a field of science, mathematics, engineering, or composite of these fields.

Geology Concentration

The geology concentration for the B.S. degree prepares students for graduate study or a career as a geologist. The minor must be in a field of science, mathematics, engineering, or an approved composite of courses from these fields.

Geophysics Concentration

The geophysics concentration prepares students for a career as a geophysicist or for graduate study. Students pursuing the geophysics concentration are encouraged to select a minor in mathematics; however, minors in the physical sciences, engineering, or an approved composite of courses from these fields are acceptable. Adjunct requirements include: MATH 1451, 1452, 2450, 2360, 3350; PHYS 1408, 2401; CHEM 1307 AND 1107.

Undergraduate Minors

Atmospheric Science

The atmospheric science minor requires the following courses and approved elective courses to total 18 hours. Six hours must be junior-senior level. A list of approved elective courses is available from the department. Required courses are ATMO 1300, 1100, 3310, 3316, and 3301.

Composite Minor in Geosciences

The composite minor is comprised of courses in mathematics, science, or engineering and is available only to students pursuing a B.A. or B.S. in Geosciences. The minor consists of 18 hours of electives, at least 6 of which must be at the junior-senior level. Courses for the minor are advisor-directed and selected from a list of approved courses.

Geographic Information Science and Technology

The minor in geographic information science and technology requires GIST 2300 and GIST 3300 then four approved electives to total 18 hours. A list of approved electives is available from the Department of Geosciences. At least six hours of upper division coursework is required in the minor.

Geography and the Environment

The Geography and the Environment minor requires GEOG 1401, 2300 OR 2351; and GIST 3300, and 8 hours of upper-division GEOG or GIST courses.

Geology

The geology minor requires: GEOL 1303 AND 1101 (petroleum engineering students may substitute PETR 2324 for GEOL 1303), 2401, and additional upper-division GEOL, GPH, GCH courses to reach 18 hours in the minor.

Geophysics

The minor in geophysics for all majors includes:

- Required (choose 9 hours): GPH 3310, 4321, 4322, and 4323
- Electives: Any nine hours from GEOL, MATH, ATMO, GIST, or PHYS courses.

Undergraduate Certificate

Geographic Information Science and Technology

The Geographic Information Sciences and Technology certificate provides students with theoretical and applied knowledge of Geographic Information Sciences. Successful completion of this certificate will prepare students in best practices of design and management of geospatial data, useful in a wide array of professions. All courses must be completed with a grade of C or better. Students must take GIST 3300 first. Other courses may be taken in any order as long as prerequisites have been met. Required courses are GIST 3300, 4302, 4304, and one course from GIST 4310, 4312, 4314, 4316.

Undergraduate Course Descriptions

Atmospheric Science (ATMO)

- 1100—Atmospheric Science Laboratory (1).** [GEOL1147, 1447] Discussion and practical experience in weather analysis, methods of instrumentation, and observational meteorology. Partially fulfills core Life and Physical Sciences requirement.
- 1300—Introduction to Atmospheric Science (3).** [GEOL1347, 1447] An investigation of atmospheric properties and physical processes that determine current weather events and long-term climate conditions. Partially fulfills core Life and Physical Sciences requirement.
- 3301—General Meteorology (3).** Prerequisites: ATMO 1100, ATMO 1300, and MATH 1451 or MATH 1331 or RE 1310. An exploration of the quantitative foundation for atmospheric processes built on basic radiative, fluid and thermodynamic physics and applied over a range of scales.
- 3310—Weather, Climate, and Human Activities (3).** Prerequisites: ATMO 1300 and ATMO 1100. Observation and analysis of the impacts of weather and climate on human activity, e.g., storms, climate change, forecasting, weather modification, health, energy, transportation.
- 3316—Severe and Hazardous Weather (3).** Prerequisites: ATMO 1100, ATMO 1300. A study of the meteorology behind hazardous weather phenomena focusing on events affecting the U.S., especially the Great Plains and adjacent regions of Texas.
- 4010—Internship in Atmospheric Science (VI-6).** Supervised activity in a professional setting. Opportunity to apply technical skills in a non-academic setting. Prior approval required.
- 4300—Independent Studies in Atmospheric Science (3).** Prerequisites: ATMO 1100, ATMO 1300, and instructor consent. Atmospheric sciences minors only. Independent studies in atmospheric science. May be repeated once for credit.
- 4312—Undergraduate Research (3).** Prerequisite: Senior standing and instructor consent. Independent research in an area of current interest in atmospheric sciences.

Geochemistry (GCH)

- 3303—Introduction to Geochemistry (3).** Prerequisites: C or better in GEOL 3401; MATH 1451, MATH 1452; and CHEM 1308 and CHEM 1108 (may be completed concurrently). Principles and concepts of inorganic geochemistry with an emphasis on applications of geologic and environmental problems.
- 4308—Techniques and Applications in Mineral Sciences (3).** Prerequisites: C or better in GEOL 3401, CHEM 1308, PHYS 1403 or PHYS 1408. Fundamental and practical aspects of mineral science with application to properties of natural crystalline phases.
- 4405—Inorganic Geochemistry (4).** Prerequisite: C or better in GCH 3303. Origin of elements and isotopes, theory and application of isotopic systems, element mobility, thermodynamics, solution geochemistry, and geochemical cycles.

Foreign Language: A student must complete 3 hours at the sophomore level or above in a single language. The prerequisite for all sophomore language courses is credit for the freshman level. This credit can be determined through a credit by examination. The score attained on the exam will determine whether the student is placed in a second-year course, a 5-hour review course, or in some cases the first or second semester of a beginning (first-year) language course. See Arts & Sciences General Degree Requirements for further explanation.

English Literature: Students have the option of choosing an English literature course that also fulfills the 3-hour Language, Philosophy, & Culture requirement.

Geosciences Jr./Sr., and STEM Elective: Students will select major electives from a list of approved electives in geosciences and STEM fields.

Minor: Typically 8 hours from adjunct requirements will apply toward the 18-hour minor.

Geographic Information Science and Technology (GIST)

- 2300—Digital Earth (3).** A broad survey and introduction to Geospatial Technologies (GPS, GIS, drones, apps, social media, cloud, and GeoAI) and their effects on individuals and society.
- 3300—Geographic Information Systems (3).** An introduction to geographic information systems (GIS) for thematic mapping and spatial analysis. Laboratory emphasizes experience with professional GIS software. (CL)
- 3301—Remote Sensing of the Environment (3).** Prerequisites: GIST 3300; and either MATH 1451, MATH 2300, MATH 3342, or SOC 2391. An introduction to the use of satellite data to monitor our environment, including physical processes, sensors, analysis methods, and applications.
- 4001—Problems in Geographic Information Systems (VI-6).** Prerequisite: Instructor consent. Independent study under guidance of faculty member. May be repeated up to 3 times.
- 4302—Spatial Analysis and Modeling (3).** Prerequisite: GIST 3300. A course in GIS focused on spatial data management, editing, topology, models and cartographic representations.
- 4304—Exploring Spatial Databases (3).** Prerequisite: GIST 3300. Students will explore basic database concepts, fundamental design principles, and basic techniques of building a database to manage, analyze, and visualize geospatial data. [GIST 5304]
- 4310—GPS Field Mapping (3).** Prerequisite: GIST 3300. Use of the global positioning system (GPS) and mobile field mapping software for navigation and the acquisition of spatial data.
- 4312—Web Mapping and Geovisualization (3).** Prerequisite: GIST 3300. Study of the technology used to create visualizations for geospatial data analysis with an emphasis on interactive web-mapping applications. [GIST 5312]
- 4314—Geospatial Data Science (3).** Prerequisite: GIST 3300. Introduction to spatial data science and machine learning tools to investigate and identify patterns, clusters, trends, and anomalies based on geospatial big data. [GIST 5314]
- 4316—Spatial Programming and Geostatistics (3).** Prerequisite: GIST 3300. Students will explore statistical applications with emphasis on geographic-specific problems and develop programming skills in Python. [GIST 5316]
- 4322—Remote Sensing Image Processing and Analysis (3).** Prerequisite: GIST 3301 or permission of instructor. A second course in Remote Sensing focusing on preprocessing of Earth observation data including georegistration and calibration, and image analysis including feature extraction and classification. [GIST 5322]

Geography (GEOG)

- 1101—Physical Geography Laboratory (1).** [GEOG1301] Laboratory course for transfer students with previous lecture credit for Physical Geography.
- 1401—Global Environmental Science (4).** [GEOG1301] Study of the atmospheric and terrestrial systems that shape our natural environment, especially the global patterns of climate, landforms, and vegetation. Provides laboratory and nonlaboratory science credit. Fulfills laboratory science requirements. Partially fulfills core Life and Physical Sciences requirement.
- 2300—Introduction to Human Geography (3).** [GEOG1302] Survey of human geography, including factors affecting location of different aspects of culture, economy, and politics. Fulfills core Social and Behavioral Sciences requirement.
- 2351—Regional Geography of the World (3).** [GEOG1303] An introduction to the geography of world regions for students who have had no previous geography courses. Fulfills core Social and Behavioral Sciences requirement.
- 3310—Environmental Change (3).** Prerequisite: GEOG 1401 or equivalent natural science courses. Investigates changes in climate, hydrology, soils, biota, and landforms since the start of the Ice Age, and on interactions between humans and the natural world.
- 3337—Economic Geography (3).** Consideration of the characteristics and distribution of production and consumption of goods and services and of variation and interaction of economic activities. (CL)
- 3340—Introduction to Research in Human Geography (3).** An introduction to research and research methods in geography. [WGS 3342]
- 3350—Social and Cultural Geography (3).** An examination of the spatial dimensions of human social, cultural, economic, and historical interactions.

- 3351—Geography of Urban Places (3).** An analysis of the location, distribution, function, and spread of urban places, including a study of current urban problems, sprawl, city decline, and metropolitan transportation.
- 3352—Geography of US and Canada (3).** Study of the physical and cultural geography of the United States and Canada, including geographical aspects of the development of Texas.
- 3353—Environmental Sustainability (3).** Study of the interrelated problems of population growth, efficient use of natural resources, and human disruption of Earth's environment.
- 3355—Environmental Hazards and Disasters (3).** Examines physical and social drivers of environmental hazards and disasters. Students will learn the metrics for measuring and mitigating risk, vulnerability, and resilience. (CL)
- 3360—Technology and the Human Landscape (3).** Study of the relationship of technological development and energy use with human use of the earth from pre-humans to the present.
- 4001—Problems in Geography (VI-6).** Prerequisite: Instructor consent. Independent study under guidance of faculty member. May be repeated up to 3 times.
- 4010—Internship in Geography and the Environment (VI-6).** Prerequisites: Minimum of 12 hours in geography, minimum 3.0 GPA in geography, and consent of instructor. Supervised activity in a professional setting. Opportunity to apply technical skills in a non-academic setting. Prior approval required.
- 4301—Geomorphology in Environmental Management (3).** Prerequisite: GEOG 1401, GEOL 1303, or consent of instructor. Evaluation and analysis of earth-forming processes and terrain features in relation to human activities. Course emphasizes analytical techniques.
- 4302—Independent Studies in Geography (3).** Independent studies in geography. May be repeated for credit.
- 4321—Biogeography (3).** Prerequisite: GEOG 1401 or consent of instructor. Study of plants and animals in their spatial context, functional interaction, and as related to human impacts.
- 4323—Energy, Water, and Food (3).** Explores technology behind current and future energy, societal benefits and impact, and environmental impact. Explores the nexus between water and energy demand for food production.
- 4334—Field Seminar in Human Geography (3).** Seminar conducted in field setting. Students will conduct a research project and reflect on human geography of the region. May be repeated when specific region and topic vary.
- 4335—Field Methods in Physical Geography (3).** Introduction to the collection of environmental and geographic data in the field. Topics include mapping, sampling, record keeping and automated data collection. May be repeated up to 3 times. [GEOG 5335]
- 4357—Geography of Arid Lands (3).** Systemic and regional inquiry into the physical nature and the problems of human utilization of the arid and semiarid lands of the earth.
- 4360—Seminar in Geography (3).** Enrollment restricted to geography majors or minors unless approved by course instructor. A capstone course required of all majors, intended to assess knowledge in the discipline. Topics vary. May be repeated for credit. (CL)
- 4425—Physical Hydrology (4).** Prerequisites: MATH 1451 and either PHYS 1403 or PHYS 1408. Studies hydrological cycle, principles of fluid dynamics applied to the description of surface and subsurface hydraulics, soil moisture dynamics. Explores humanity's influence on water resources.

Geology (GEOL)

- 1101—Our Planet Earth: Principles of Geology Laboratory (1).** [GEOL1103] Laboratory study of rocks, minerals, and geologic mapping. Partially fulfills core Life and Physical Sciences requirement.
- 1102—History of the Earth through Deep Time Laboratory (1).** [GEOL1104] Prerequisite: GEOL 1101. Laboratory study of fossils, geologic maps, and geologic structure.
- 1105—History of Life Laboratory (1).** Introduction to and applications of methods employed by paleontologists to interpret the fossil record. Not for credit for majors.
- 1303—Our Planet Earth: Principles of Geology (3).** [GEOL1303] Introduction to earth structure and composition, minerals and rocks, surface processes, orogeny, and the principle of plate tectonics. Partially fulfills core Life and Physical Sciences requirement.
- 1350—History of Life (3).** A survey of the evolution of life on earth as interpreted from the fossil record and the processes that produced extinct and modern ecosystems. Not for credit for majors.
- 2101—Undergraduate Seminar (1).** Prerequisites: GEOS majors only, GEOL 3401 (may be concurrent). Skills, best practices, and techniques to successfully navigate the geosciences major. (CL)

- 2401—History of the Earth through Deep Time (4).** Prerequisite: C or better in GEOL 1303 and GEOL 1101. Survey of the earth's geological history and the evolution of life and its interaction with geological processes. Interpretation of rocks, fossils, and geological maps.
- 3301—Geomorphology (3).** Prerequisites: C or better in GEOL 3401. Introductory course regarding the landforms and surface processes of the earth and other solar system bodies.
- 3321—Igneous and Metamorphic Petrology (3).** Prerequisites: C or better in GEOL 2401 (may be taken concurrently), GEOL 3401; CHEM 1307 and CHEM 1107. Systematic mineralogical, geochemical and petrographical description of igneous and metamorphic rocks and application of internationally recognize nomenclature schemes. Field trip requires strenuous activity.
- 3322—Oceanography (3).** Prerequisite: GEOL 1303, GEOL 3324, GEOG 1401, or ATMO 1300. The physiography and origin of ocean basins and the processes and systems operative in them including physical, chemical, and biological factors as well as sedimentation patterns.
- 3323—Environmental Geology (3).** Prerequisite: GEOL 1303 or GEOL 3324. Study of geological processes that affect human activities, emphasizing natural hazards, water resources, waste disposal, energy, mineral resources, and land use and planning.
- 3324—Geology for Petroleum Engineers (3).** Prerequisites: C or better in MATH 1452. Survey of geology with emphasis on concepts and processes important for hydrocarbon exploration and extraction. Petroleum engineering majors only.
- 3325—Sedimentary Petrology (3).** Prerequisites: C or better in GEOL 3321 and GEOL 3401. The characteristics of sediments and sedimentary rocks, the processes that control sediment accumulation, and the diagnostic processes which affect sedimentary rocks.
- 3328—Geology of Energy Resources (3).** Prerequisite: GEOL 1303 or GEOL 3324. Origin, distribution, and exploitation of geological resources of energy, with emphasis on hydrocarbons, coal, and nuclear energy.
- 3401—Mineralogy (4).** Prerequisites: C or better in GEOL 1303, GEOL 1101, GEOL 2401; CHEM 1307 and CHEM 1107; 2.5 cumulative GPA. Elementary crystallography; identification of minerals in hand specimen and using the petrographic microscope; general chemical and physical properties of minerals; occurrence of minerals. (CL)
- 3402—Structural Geology (4).** Prerequisite: C or better in GEOL 3401, GEOL 3321; PHYS 1403 or PHYS 1408 (concurrent enrollment allowed). Structural analysis of deformed rocks. Laboratory includes fieldwork, stereonet, map and cross-section construction. Required field trip that includes strenuous activity. (CL)
- 3450—Paleontology and Paleocology (4).** Prerequisites: C or better in GEOL 2401. Classification, evolution, and paleobiology of invertebrate fossils. Applications of paleontological data in geological dating, correlation, and paleoenvironmental analyses.
- 4001—Problems in Geosciences (VI-6).** Prerequisite: Instructor consent. Independent study under guidance of faculty member.
- 4010—Internship in Geosciences (VI-6).** Supervised activity in a professional setting. Opportunity to apply technical skills in a non-academic setting. Prior approval required.
- 4201—Field Methods in Sedimentary Geology (2).** Prerequisite: C or better in GEOL 3402 and GEOL 3325. Description of sediments and sedimentary rocks in the field, measurement of stratigraphic sections, mapping of surficial deposits and stratified rocks, interpretation of depositional environments. Field work requires strenuous physical activity.
- 4300—Independent Studies in Geology (3).** Prerequisite: Instructor consent. Independent studies in geology. May be repeated for credit.
- 4301—Advanced Fields Methods (3).** Prerequisites: C or better in GEOL 3402, GEOL 4201, and GEOL 3321. Field mapping of igneous, metamorphic, and sedimentary rocks. Field work requires strenuous physical activity.
- 4306—Introduction to Petroleum Systems (3).** Prerequisite: GEOL 3401 and GPH 3300. General and updated background knowledge of petroleum geosciences, including unconventional resources. Generation and migration of petroleum, reservoir properties, sedimentary basins, and petroleum exploration.
- 4310—Planetary Geology (3).** Prerequisite: C or better in GEOL 1303 and GEOL 1101. An introduction to the solid bodies of the solar system beyond Earth, with an emphasis on surface processes and landforms.
- 4312—Undergraduate Research (3).** Prerequisites: Senior standing, GEOS majors only, prior approval from specific professor. Independent research in an area of current interest in the geosciences.
- 4318—Geology of Texas (3).** Prerequisites: GEOL 1303 and GEOL 1101, or GEOL 3324. A comprehensive study of the structure, stratigraphy, and economic geology of Texas and parts of adjacent states.
- 4321—Igneous and Metamorphic Processes (3).** Prerequisites: C or better in GCH 3303 and GEOL 3321. Application of field, experimental, geochemical, and petrographic data to modelling and interpreting high-temperature earth processes.
- 4324—Geology of Hydrocarbons (3).** Prerequisite: C or better in GEOL 3324; for petroleum engineering majors making progress in the PE program only. A study of the world-wide distribution and geologic setting of petroleum in addition to methods of exploration.
- 4327—Depositional Systems and Stratigraphy (3).** Prerequisite: C or better in GEOL 3325. Sedimentation of strata in various depositional systems and basin-scale perspective of stratigraphic concepts.
- 4331—Digital Imagery in Geosciences (3).** Prerequisites: Senior standing, GEOL 1303 and GEOL 1101 or GEOG 1401, MATH 1320 or higher. Introduction to digital image processing, visualization, and raster GIS modeling applied to geosciences. Involves computer lab exercises.
- 4334—Structural Analysis in Hydrocarbon Systems (3).** Prerequisites: C or better in PETR 3303, PETR 3103, PETR 3304, and PETR 3306; petroleum engineering majors in good standing in the PE program as determined by the PE department and partner advisors. Structural and geological analysis of hydrocarbon systems.
- 4340—Extraordinary Events in Deep Time (3).** Prerequisites: C or better in GEOL 4327. Capstone course focusing on the geologic evolution of North America, emphasizing the interactions of all spheres of the Earth system.
- 4351—Imaging Spectroscopy and Raster Classification (3).** Prerequisite: C or better in GEOL 4331, or instructor consent. A comprehensive study of the techniques of reflectance spectroscopy, and of per-pixel and sub-pixel classification methods. Involves computer lab exercises.
- 4361—Advanced Structural Geology (3).** Prerequisites: Senior standing in major, GEOL 3402. Topics include deformation mechanisms and rheology, tectonic evolution of oceanic lithosphere and evolution of arcs.
- 4362—Tectonics (3).** Prerequisites: Senior standing in the major and GEOL 3402. Survey of the plate tectonic paradigm in terms of historical development and modern application.
- 4370—Hydrogeology (3).** Prerequisites C or better in GEOL 3402 and GEOL 3325. Physical, chemical, and geologic mechanisms of surface and groundwater now and solute transport through aquifers, with emphasis on principles, practical applications, and case studies.

Geophysics (GPH)

- 3300—Geophysics (3).** Prerequisites: 2.5 overall GPA, C or better in MATH 1451 and either GEOL 1303 and GEOL 1101 or GEOL 3324. An overview of geophysical principles and methods with case studies in the use of geophysics to understand the three-dimensional structures of Earth.
- 3310—Introduction to Data Science for Geophysics (3).** Prerequisites: C or better in PHYS 1403 or PHYS 1408, and MATH 1451. Emphasis is on the basics of Python programming and data science in geophysics.
- 4300—Independent Studies in Geophysics (3).** Prerequisite: Consent of instructor. Independent studies in geophysics. May be repeated up to 3 times.
- 4321—Seismic Exploration Methods (3).** Prerequisites: C or better in PHYS 1403 or PHYS 1408, and MATH 1451. Methods to collect, process, and interpret seismic data are discussed.
- 4322—Solid-Earth Geophysics (3).** Prerequisites: C or better in GPH 3300, GPH 4321. Application of geophysical principles and multiple investigative methods for solving real-world geoscience problems.
- 4323—Environmental Geophysics (3).** Prerequisites: C or better in PHYS 1403 or PHYS 1408, and MATH 1451. Covers methods of exploring Earth's subsurface using gravity, magnetic, electrical, and electromagnetic methods.

Department of History

Emily Skidmore, Ph.D., Interim Chairperson

Professors: Bjerk, Cunningham, D'Amico, Hahn, Howe, Iber, McBee, Milam, Stoll, Willet, Wong

Associate Professors: Barenberg, Baum, Brittsan, Calkins, Hart, Legacey, Levorio, Lutjens, Mosher, Nelson, Pehl, Pelley, Sánchez, Skidmore, Swingen, Thomas

Assistant Professors: Bell, Franklin, McCahey, Whealton

Assistant Professor of Practice: Rafei

Senior Lecturers: Poole, Verrone

CONTACT INFORMATION: 165 Humanities | Box 41013 | Lubbock, TX 79409-1013 | T 806.742.3744 | F 806.742.1060 | www.depts.ttu.edu/history

About the Department

This department supervises the following degree programs:

- Bachelor of Arts in History
- Master of Arts in History
- Doctor of Philosophy in History

The department also participates in a minor in women's and gender studies and a minor in secondary education; Honors College programs; Mexican American and Latina/o Studies; the Institute for Peace and Conflict; and Arts & Sciences minors in Asian studies, community and urban studies, environmental studies, ethnic studies, European studies, family life studies, and religion studies.

The broad liberal arts foundation available through a major in history can deepen students' understanding of the complex world in which they live, stimulate intellectual attitudes conducive to effective participation in contemporary society, and cultivate those mental skills required for meaningful employment in many areas of the modern economic system. A history student may consider a career in teaching within colleges, universities, or public schools; in park administration; in regional and local historical society work; in archives and records management; in museum work; in various branches of government work; and in business and industry generally. Many students use their undergraduate history major as a preparation for advanced studies in such areas as law, medicine, and theology. The Department of History boasts an outstanding and diverse faculty with expertise in a wide range of specializations. The department is particularly strong in the areas of international politics and political culture and United States history with an emphasis on the U.S. in a global context. It is also strong in Texas history, the history of the American west and southwest, and borderlands history; modern and early modern European history; and world history. The department maintains thematic strengths in the history of race, imperialism, and national identity; foreign relations, war, and society/military history; gender and sexuality; memory, commemoration, and political culture; environmental history; business history; the history of technology; and religious history.

Graduate Programs

For information on graduate programs offered by the Department of History, visit the Graduate Programs section on page 216.

Undergraduate Programs

History, B.A.

Students seeking an undergraduate degree in history will complete 36 hours of history, in accordance with the following:

- 3 hours of HIST 1300 or 2322
- 3 hours of HIST 1301 or 2323
- 6 hours of U.S. history selected from HIST 2300, 2301, and 2310
- 24 hours in advanced courses, including
 - 3 hours of 3000- or 4000-level elective in U.S.
 - 3 hours of 3000- or 4000-level elective in European

History, B.A. Sample Curriculum

FIRST YEAR

Fall

- ☐ RRP 1100 - RaiderReady: First Year Seminar (1 SCH) **OR**
 - ☐ Elective (1 SCH)
- ☐ HIST 1300 - Western Civilization I (3 SCH) **OR**
 - ☐ HIST 2322 - World History to 1500 (3 SCH)*(either course will fulfill the Language, Philosophy, and Culture requirement)*
- ☐ HIST 2300 - History of the United States to 1877 (3 SCH)
- ☐ ENGL 1301 - Essentials of College Rhetoric (3 SCH)
- ☐ MATH (3 SCH)*
- ☐ Personal Fitness and Wellness (1 SCH)

TOTAL: 14

Spring

- ☐ HIST 2301 - History of the United States since 1877 (3 SCH)
- ☐ HIST 1301 - Western Civilization II (3 SCH) **OR**
 - ☐ HIST 2323 - World History Since 1500 (3 SCH)*(either course will fulfill the Language, Philosophy, and Culture requirement)*
- ☐ PHIL 2310 - Logic (3 SCH) **OR**
 - ☐ MATH (3 SCH)*
- ☐ ENGL 1302 - Advanced College Rhetoric (3 SCH)
- ☐ Creative Arts (3 SCH)*

TOTAL: 15

SECOND YEAR

Fall

- ☐ HIST 3000 or 4000 Level (3 SCH)
- ☐ ENGL 2000 Level (3 SCH) *(not ENGL 2312 or ENGL 2371)*
- ☐ Foreign Language (3 SCH)
- ☐ Life and Physical Sciences (4 SCH)*
- ☐ Elective (3 SCH)

TOTAL: 16

Spring

- ☐ HIST 3000 or 4000 Level (3 SCH) *(Must take one U.S., one EUR, and one AAL.)*
- ☐ ENGL 2000 Level (3 SCH) *(not ENGL 2312 or ENGL 2371)*
- ☐ Foreign Language (3 SCH)
- ☐ Elective (3 SCH)
- ☐ Minor Elective (3 SCH)

TOTAL: 15

THIRD YEAR

Fall

- ☐ HIST 3000 or 4000 Level (3 SCH) *(Must take one U.S., one EUR, and one AAL.)*
- ☐ Elective (3 SCH)
- ☐ POLS 1301 - American Government (3 SCH)
- ☐ Oral Communication (3 SCH)*
- ☐ Minor Elective (3 SCH)

TOTAL: 15

Spring

- ☐ HIST 4000 Level (3 SCH)
- ☐ HIST 3000 or 4000 Level (3 SCH) *(Must take one U.S., one EUR, and one AAL.)*
- ☐ Social and Behavioral Sciences (3 SCH)*
- ☐ Life and Physical Sciences (4 SCH)*
- ☐ Minor Elective (3 SCH)

TOTAL: 16

FOURTH YEAR

Fall

- ☐ HIST 4000 Level (3 SCH)
- ☐ POLS 2306 - Texas Politics and Topics (3 SCH)
- ☐ Additional Social and Behavioral Sciences (3 SCH)*
- ☐ Minor Elective (3 SCH)
- ☐ Minor Elective (3 SCH)

TOTAL: 15

Spring

- ☐ HIST 4398 - Senior Seminar in History (3 SCH) *(May be repeated once for credit.)*
- ☐ HIST 3000 or 4000 Level (3 SCH)
- ☐ Minor Elective (3 SCH)
- ☐ Personal Fitness and Wellness (1 SCH)
- ☐ Additional Creative Arts (3 SCH)*
- ☐ Elective (1 SCH)

TOTAL: 14

TOTAL HOURS: 120

Forty hours must be junior or senior level courses.

*Select from the university's core curriculum

Foreign Language: A student must complete 6 hours at the sophomore level or above in a single language. The prerequisite for all sophomore language courses is credit for the freshman level. This credit can be determined through a credit by examination. The score attained on the exam will determine whether the student is placed in a second-year course, a 5-hour review course, or in some cases the first or second semester of a beginning (first-year) language course. See Arts & Sciences General Degree Requirements for further explanation.

- 3 hours of 3000- or 4000-level elective in African, Asian, or Latin American history
- 6 hours of 3000- or 4000-level electives in any geographic area
- 6 hours of 4000-level (communication literacy) electives in any geographic area
- 3 hours of HIST 4398
- With prior departmental consent, 3 upper-division hours in related disciplines may be counted toward the major
- At least 12 of the 36 hours required for the history major must be taken in residence, including at least 9 hours from upper-division courses

Communication Literacy Requirement. All HIST courses at the 4000 level will qualify toward the university's Communication Literacy requirement for the B.A. in History.

Note: All courses numbered at the 3000 and 4000 level are upper-division (or "advanced") courses. Additionally, all 4000 level HIST courses require junior standing and the consent of the instructor. A student must receive at least a C in any HIST course if it is to count toward the major or minor.

Teacher Certification in History or Social Studies

The Department of History cooperates with the College of Education in preparing students for teacher certification in history or social studies for grades 7-12. Students wishing to teach social studies for grades 7-12 should major in history while minoring in secondary education and should complete their certification through the Texas Tech University College of Education's TechTeach program.

In order to fully understand the teacher certification process, students are strongly encouraged to consult with the undergraduate advisor in the College of Education to learn more about teacher certification programs in the State of Texas and the requirements related to those programs.

Undergraduate Minors

History

Students seeking a minor in history will complete 18 hours of HIST courses, in accordance with the following:

- 6 hours of U.S. history selected from HIST 2300, 2301, and 2310
- 6 hours of 3000- or 4000-level electives (at least 3 hours must be taken in residence)
- 3 hours of 4000-level electives (must be taken in residence)
- 3 hours of electives at any level
- Of the above 18 hours, at least 6 hours must be in non-U.S. history.

Mexican American & Latina/o Studies

The Mexican American and Latina/o Studies minor is a dynamic interdisciplinary course of study based in the humanities, social sciences, arts, and evolution of ethnic studies. The Mexican American and Latina/o Studies minor offers a unique curricular structure through which to examine one of the predominant ethnic groups in the American Southwest, and the fast-growing nationally.

The 18-hour minor introduces students to the significant and rich personal, historical, economic, cultural, and religious experiences of Mexican Americans and Latinas/os in the United States. The MALS program will help students develop a more robust understanding of how social issues, politics, and other environmental realities shape the circumstances of Mexican Americans and Latinas/os.

- Required Courses (6 hours): MALS 2300, 3302
- Service Learning Course (choose 3 hours from): MALS 4306; SPAN 3315; SOC 3339
- Category One (choose 6 hours from): ANTH 3349, 3375; CMI 3309; ENGL 3393; HIST 3311, 3316, 3325, 3381, 3382, 3383, 4363, 4365, 4381, 4382; MUHL 4300 (topics include Latino Musics of the Southwest; Latin American Seminar: Mexico, Central America, and Caribbean; and Latin American Seminar: South American Music), 2308; MUEN 3110; RHIM 2340; SPAN 2300, 3390, 4318, 4320, 4332, 4337 4360, 4361

- Category Two (choose 3 hours from): ANTH 1301; ARTH 3350; CMI 3355; ENGL 3338, 3390; HDFS 3350; HIST 3317, 3357, 4329; HRDV 2303; INTS 3330; PSY 3398; SOC 3323, 3337; SPAN 3306, 4332

Contact: Dr. Miguel Levario | Miguel.Levario@ttu.edu

Military History

Students seeking a minor in military history will complete 18 hours of HIST courses, in accordance with the following:

- 3 hours of courses from Group A (HIST 1300, 1301, 2300, 2301, 2322, 2323)
- 9 hours of courses from Group B (HIST 3330, 3331, 3332, 3333, 3340, 3348, 3366, 3367, 4302, 4337, 4338, 4343, 4696)
- 6 hours of courses from Group C (HIST 3308, 3309, 3310, 3346, 3350, 3359, 3374, 3396, 3398, 4304, 4309, 4310, 4311, 4351, 4353, 4361, 4372, 4379, 4383, 4390, 4393)
- Of the above 18 hours, 6 hours must be in U.S. history, 6 hours must be in non-U.S. history, and at least 3 hours must be taken at the 4000 level. At least 6 hours must be taken in residence, three of which must be taken at the 4000 level.

Other courses may be substituted with prior departmental consent.

Undergraduate Course Descriptions

History (HIST)

1112—History at Texas Tech and You (1). Introduces students to the vibrant community at TTU and strengthens peer-to-peer and student-to-faculty relationships to help students, particularly first-generation, under-represented, and non-traditional students, feel more comfortable about the transition to Tech.

1300—Western Civilization I (3). [HIST2311] Western civilization from its dawn to the 17th century. Culture and the arts stressed alongside politics. (European history) Fulfills core Language, Philosophy, and Culture requirement.

1301—Western Civilization II (3). [HIST2312] The revolutionary transformations of European civilization in the 17th, 18th, and 19th centuries; world dominion and the world wars; intellectual and cultural developments. (European history) Fulfills core Language, Philosophy, and Culture requirement.

1310—History of Western Medicine I: Antiquity to the Scientific Revolution (3). Surveys the history of medical thought and practice in western societies from antiquity to the Scientific Revolution. (European history)

HIST 1311—History of Western Medicine II: Scientific Revolution to Present (3). Surveys the history of western medicine from the late seventeenth century to the present, with a focus on Europe and the United States.

1399—Special Topics in History (3). A freshman-level course examining selected topics in the field of history. Content varies based on instructor. May be repeated for credit.

2300—History of the United States to 1877 (3). [HIST1301] This course and HIST 2301 satisfy the legislative history requirement. Most sections combine political, military, constitutional, and social history. Special sections emphasize technology, agriculture, business, and family life. (Honors section offered.) (U.S. history) Partially fulfills core American History requirement.

2301—History of the United States since 1877 (3). [HIST1302] Continuation of HIST 2300. (Honors section offered.) (U.S. history) Partially fulfills core American History requirement.

2302—Wealth and the Nation: The History of American Business (3). Surveys the history of business in America from colonial times to the 21st century. (U.S. history)

2310—History of Texas (3). [HIST2301] A survey of Texas history beginning with the Native American occupation and tracing the major social, political, and economic developments of the state into the modern era. (U.S. history) Partially fulfills core American History requirement.

2322—World History to 1500 (3). [HIST2321] Introduction to basic narrative and major themes in world history from origins to 1500. (African, Asian, or Latin American history) Fulfills core Language, Philosophy, and Culture requirements.

2323—World History Since 1500 (3). [HIST2322] Introduction to basic narrative and major themes in world history since 1500. (African, Asian, or Latin American history) Fulfills core Language, Philosophy, and Culture requirement.

- 3399—Special Topics in History (3).** A sophomore-level course examining selected topics in the field of history. Content varies based on instructor. May be repeated for credit.
- 3101—Myths and Legends in History (1).** As professional historians grapple with often conflicting interpretations of the past, they turn to archival evidence to reveal popular misconceptions. Topics may vary.
- 3300—The Historian's Craft (3).** Introduces students to the theory, philosophy, and skills of the professional historian. Strongly recommended for students prior to taking HIST 4398.
- 3301—Ancient Civilization I (3).** Introduction to the study of the ancient Near East and classical Greece. (European history)
- 3302—Ancient Civilization II (3).** Introduction to the study of ancient Rome. (European history)
- 3303—Introduction to Roman Law (3).** Surveys all major areas of Roman private and criminal law within the setting of Roman history. (European history)
- 3304—The Vikings (3).** Examines the historical, archaeological, and literary stories of the Viking Age (ca. 750-1050 CE) across Europe and the Middle East. (European history)
- 3305—Creating the American Nation, 1785-1840 (3).** Examines the political and cultural processes by which the U.S. was formed in the decades following the American Revolution. (U.S. history)
- 3306—African American History to 1877 (3).** Surveys the history of African Americans from the African background through the Civil War and Reconstruction. (U.S. history)
- 3307—African American History from 1877 to Present (3).** Surveys the history of African Americans from the Post-Reconstruction period through Civil Rights years and new forms of activism in the 1900s to the present. (U.S. history)
- 3308—United States Foreign Relations to 1913 (3).** A survey of U.S. foreign relations from the American Revolution to 1913 with an emphasis on the evolution of the U.S. as a world power. (U.S. history)
- 3309—United States Foreign Relations Since 1913 (3).** A survey of U.S. foreign relations from 1913 to the present with an emphasis on the U.S. as a world leader. (U.S. history)
- 3310—The Indian Wars, 1848-1898 (3).** Examines cross-cultural encounters between indigenous peoples and American military personnel. (U.S. history)
- 3311—Social and Cultural History of the Southwest (3).** Survey of the history of the varied cultures of the American Southwest, emphasizing Anglo-American, Spanish-Mexican, and Indian backgrounds. (U.S. history)
- 3312—Presidential Politics from Kennedy to Reagan (3).** Explores developments and transformations in Americans' political attitudes, values, ideologies, and behaviors, seen through the lens of modern presidential politics. (U.S. history)
- 3313—The Old South (3).** Explores the society, politics, economics, and race relations of the antebellum South, the development of sectionalism, and the impact of the Civil War. (U.S. history)
- 3314—The South Since the Civil War (3).** Explores the degree to which the South has remained a separate region socially, politically, economically, and in race relations from Reconstruction to the present. (U.S. history)
- 3316—Mexican American History of Texas (3).** Surveys the history, culture, and contribution of Mexican Americans to the history and economic development of Texas. (U.S. history)
- 3317—The Frontier and American West (3).** Explores the settlement of the American West to 1900, with emphasis on trapping, mining, transportation and farming frontiers, Spanish borderlands, and Indian-United States relations. (U.S. history)
- 3318—The Plains Indians (3).** Culture and history of the Plains Indians; cultural developments prior to contact with the Whites; Plains Indians-White relations; Plains Indians in the 20th century. (U.S. history)
- 3320—History of Film and American Society (3).** A history of American film from its beginnings to the present with focus on film and the role it plays in reflecting or changing American society. (U.S. history)
- 3321—Twentieth Century American West (3).** An examination of the history and development of the American West from ca. 1900 to the present. (U.S. history)
- 3322—Women in Early America (3).** Explores the history of women and gender in the United States from the 16th century to 1877. (U.S. history)
- 3323—Women in Modern America (3).** Explores the social and cultural history of women and gender in the United States since 1877. (U.S. history). [WGS 3323]
- 3324—Latinos Since the 1970s (3).** A survey of major political, social, cultural, and ideological developments within the many Latina/o communities in the U.S. since the 1970s. (U.S. History)
- 3325—History of Mexican Americans in the United States (3).** Survey of the history of Mexican Americans of the United States during the 20th century, relating their daily life and institutional experience to United States and Mexican history. (U.S. history)
- 3326—History of Native Americans in the United States (3).** Survey of the history of American Indians from their earliest migrations through the acculturation, termination, and civil rights movements of the 20th century. (U.S. history)
- 3327—Earth, Wind, and Fire: Nature and History in America (3).** Surveys nature's role in American history from pre-Columbian Indian societies to the present, including such areas as natural disasters, global warming, wildlife, resources, health, and recreation. (U.S. history)
- 3328—History of Religion in America (3).** Traces the development of religious groups in America from colonial times to the present. Emphasizes beliefs and interaction with society. (U.S. history)
- 3329—Development of Modern Science (3).** Examines the historical development of the intellectual, institutional, and social dimensions of Western science from the 17th century to the present. (European history)
- 3330—The Vietnam War (3).** Explores the military, diplomatic, political, and social dimensions of the war from its origins in the 1940s through its conclusion in the 1970s. (U.S. history)
- 3331—History of United States Military Affairs to 1900 (3).** Explores American military history from the Colonial period through the Spanish-American War, with an emphasis on strategy and the development of military institutions. (U.S. history)
- 3332—History of United States Military Affairs Since 1900 (3).** Examines 20th century American military history up to the present. (U.S. history)
- 3333—United States in the Second World War (3).** History of the political and military involvement of the United States in the Second World War. (U.S. history)
- 3334—Technology in Modern America (3).** An analysis of major developments in American technology since 1870 and their impact on society, culture, politics, and the economy. (U.S. history)
- 3335—Sport and the Black Experience (3).** Explores black Americans' contributions to American sport from the era of slavery to the present. (U.S. history)
- 3336—History of Mass Incarceration (3).** Introduces students to the origins, implementation, and consequences of mass incarceration in the United States. (U.S. history)
- 3337—Science in American Society (3).** An examination of major developments in American science with an emphasis on the 20th century and their impact on society, politics, and the economy. (U.S. history)
- 3338—History of Sports and Recreation in the U.S. (3).** Study of the development and role of sports and recreation in American social history with emphasis on organized amateur and professional sports. (U.S. history)
- 3339—The History of Baseball: A Mirror on America (3).** Examines the history of the national pastime with an eye to how the sport has reflected and influenced American society since the late 19th century. (U.S. history)
- 3340—War and Memory (3).** Examines how the experience and trauma of war (victory, defeat, heroism, war crimes, loss) are later integrated into a society's sense of identity. (U.S. history)
- 3343—Malcolm, Martin, and Mandela (3).** The overlapping lives and legacies of Malcolm X, Martin Luther King Jr., and Nelson Mandela, three revolutionary figures whose influence on the fight for civil rights in America and Africa was profound and far reaching.
- 3344—History of Christianity (3).** Surveys Christianity from immediate pre-Christian era to present. Emphasizes various churches and organizations, theology and Biblical studies, and Christianity's impact on Western culture. (European history)
- 3345—The Birth of Europe (3).** Examines the confrontation between the Later Roman Empire and its barbarian invaders, which ultimately produced new economic, political, social, and cultural structures of a new civilization. (European history)
- 3346—The Age of Chivalry (3).** Medieval Europe, 1000-1450, witnesses the domestication of a warrior aristocracy through chivalric ideals, feudal monarchy, and the rise of a powerful bourgeoisie. (European history)
- 3347—Colonial North America (3).** Surveys political, social, and cultural changes in colonial North America from the arrival of Europeans to the eve of the American Revolution. (U.S. history)
- 3348—The Crusades (3).** Surveys the origins of the holy war ideal, the military campaigns and their leaders, life in the Crusader States, and the Crusades' ultimate results. (European history)
- 3349—LGBTQ History in the United States (3).** Traces the history of lesbian, gay, bisexual, transgender, and queer (LGBTQ) people in the United States, from the colonial period to the present. (U.S. history) [WGS 3349]
- 3350—War, Religion, and Revolution: Early Modern Europe (3).** Explores the political, social, economic, and intellectual transformations that took place during Europe's early modern period. (European history)

- 3351—History of Spain (3).** A survey of Spanish history from ancient times to the present, including the Roman and Medieval heritage, the Golden Age, Enlightenment, and modern developments. (European history)
- 3352—History of Modern Italy (3).** Examines major historical movements in Italy from the unification in 1861 to the present. Topics include nationalism, empire, race, criminology, and politics. (European history)
- 3353—History of Modern France (3).** Surveys French political, social, and cultural history from the middle of the 18th century to the present. (European history)
- 3354—Twentieth Century Europe (3).** Survey of European history from the immediate origins of World War I to the present. (European history)
- 3355—Europe in Transformation, 1815-1914 (3).** Transformations in the social, cultural, political, and economic structures of Europe, including Russia and Great Britain during the 19th century. Revolution, nationalism, industrialism, and mass culture. (European history)
- 3356—Plagues, People, and Public Health in Europe from the Black Death to Spanish Influenza (3).** Surveys the wide-ranging impacts of epidemic disease in European history, from the first outbreak of bubonic plague (1346) to the influenza pandemic of 1918-1920. (European history)
- 3357—International Radical Movements (3).** Surveys theories, national, and transnational sources and impacts of radical and revolutionary movements and societies and governments based on radical or revolutionary ideologies. (African, Asian, or Latin American history)
- 3358—Origins of Modern Germany, 1517-1871 (3).** Examines the history of Germany from the Protestant Reformation (1517) to Unification (1871) Emphasis placed on formative role of religion and politics in this period. (European history)
- 3359—The Nazi Era, 1919-1945 (3).** Surveys post-World War I Germany, the rise of national socialism, Hitler in power, the Nazi State, and Germany in World War II. (European history)
- 3360—Popes, Bastards, and Kings: Medieval and Early Modern Britain (3).** Examines the social, cultural, and political history of medieval and early modern Britain, focusing on institutions, religion, culture, and everyday life. (European history)
- 3361—British Politics, Society, and Culture Since 1688 (3).** Examines the social, cultural, and political history of Britain since 1688, focusing on the expansion of government, social movements, industrialization, popular culture, and the world wars. (European history)
- 3362—Forging a Nation: Germany, 1871-Present (3).** An examination of the nation of Germany since its founding. Topics covered include imperial Germany, the Nazi period, Cold War division and reunification. (European history)
- 3366—The First World War (3).** Surveys the social, political, and cultural effects of the First World War, which brought down the last major empires and created the modern world. (European history)
- 3367—The Second World War (3).** A history of the major diplomatic, military, social, and economic developments associated with the Second World War. (European history)
- 3372—Tsarist Russia (3).** Political, economic, cultural, and social development as well as the territorial expansion of Russia from the earliest times to the beginning of the 20th century. (European history)
- 3374—History of Soviet and Post-Soviet Russia (3).** Russian history from the revolutions of 1917 to the present, emphasizing the Soviet state's internal development, role in international relations, and collapse. (European history)
- 3377—In Search of the Historical Jesus (3).** Introduction to modern historical (not theological) scholarship on the New Testament (especially the gospels) and the life of Jesus. (European history)
- 3381—Colonial Latin America (3).** General introduction to the formation of Latin American civilization, including the Indian empires, voyages of discovery, conquest, extraction of treasure, pirates, and royal administration. (African, Asian, or Latin American history)
- 3382—Modern Latin America (3).** Survey of the principal events in Latin American history beginning with the independence movement and reaching into the contemporary scene. (African, Asian, or Latin American history)
- 3383—Modern Mexico and Central America (3).** Covers major themes in Mexico and Central America since Independence. (African, Asian, or Latin American history)
- 3384—History of Brazil (3).** Brazil from preconquest times to the present with emphasis on unique characteristics of Brazilian culture in the context of world history. (African, Asian, or Latin American history)
- 3389—The British Empire, 1783 to Present (3).** Studies the growth of the British Empire in the 19th century and its later decline in the 20th century under the impact of war and nationalism. (European history)
- 3392—Introduction to Public History (3).** Introduces theories that inform various fields, traditions, and major debates of public history. (Advanced U.S. history or Advanced European history) May not be repeated for credit.
- 3393—Special Topics in History I (3).** A junior-level course examining selected topics in the field of history. Content varies based on instructor. May be repeated for credit.
- 3394—Religion, Family, and the State in Asia (3).** Surveys the main religious traditions of Asia and modern transformations; explores traditional and modern notions of family; examines changing political patterns. (African, Asian, or Latin American history)
- 3395—Africa: Empires and Civilizations (3).** A survey of the development of Africa's civilizations and cultures from ancient Egypt to the West African trading states of the 18th century. (African, Asian, or Latin American history)
- 3396—Africa: Revolution and Nationalism Since 1800 (3).** Surveys the colonial impact on African political, social, and economic life; the rise of African nationalism; and the creation of new nations. (African, Asian, or Latin American history)
- 3397—Study Abroad in Africa and the Atlantic World (3).** Students will experience life in Africa and the Atlantic world through study and research abroad. Topics and locations will vary by semester. (African, Asian, or Latin American history)
- 3398—The Modern Middle East, 1800 to the Present (3).** The history of the Middle East from ca. 1800 to the rise of Arab and other nation-states and the coups and revolutions of recent decades. (African, Asian, or Latin American history)
- 3399—Readings in History (3).** An independent study course involving in-depth reading. May be repeated for credit.
- 4301—The Atlantic World (3).** Prerequisite: Junior standing or consent of instructor. An exploration of British, Spanish, French, and Dutch colonial societies and their connections with one another as well as with African and Native American peoples. (U.S. history) (CL)
- 4302—The Era of the American Revolution (3).** Prerequisite: Junior standing or consent of instructor. An exploration of the causes, progress, and consequences of the American Revolution as both a domestic and global event from 1750-1820. (U.S. history) (CL)
- 4303—Slavery in America (3).** Prerequisite: Junior standing or consent of instructor. Introduces students to the history of slavery in the United States from colonial times through the end of Reconstruction. (U.S. history) (CL)
- 4304—Civil War and Reconstruction, 1850-1877 (3).** Prerequisite: Junior standing or consent of instructor. Explores the causes of the Civil War; the military, political, economic, and social aspects of the war; and the issues and results of Reconstruction. (U.S. history) (CL)
- 4305—Rise of Modern America, 1877-1919 (3).** Prerequisite: Junior standing or consent of instructor. Focuses on the economic, social, political, and military impact of the transformation of the United States into an urban, industrial nation. (U.S. history) (CL)
- 4306—Roaring Twenties, Depression, and War, 1920-1945 (3).** Prerequisite: Junior standing or consent of instructor. Examines political, social, economic, and military developments in the United States during the 1920s, the Great Depression, the New Deal, and World War II. (U.S. history) (CL)
- 4307—The United States, 1945 to the Present (3).** Prerequisite: Junior standing or consent of instructor. The study of American society from the Second World War through the 1970s, including political developments, wars, and cultural conflicts. (U.S. history) (CL)
- 4308—United States Urban and Immigration History (3).** Prerequisite: Junior standing or consent of instructor. Explores the economic and political issues surrounding U.S. urban and immigration policy and how these policies affected the lives of "ordinary" men and women. (U.S. history) (CL)
- 4309—United States and the Cold War (3).** Prerequisite: Junior standing or consent of instructor. Examines the causes, course, and consequences of the Cold War between the U.S. and the Soviet Union. (U.S. history) (CL)
- 4310—United States Foreign Relations Through Film (3).** Prerequisite: Junior standing or permission of instructor. A study of major issues in modern U.S. foreign relations as presented and interpreted through film. (U.S. history) (CL)
- 4311—The Nuclear Age (3).** Prerequisite: Junior standing or consent of instructor. Examines the historical development of nuclear weaponry and power and their impact on 20th century American politics, society, and culture. (U.S. history) (CL)
- 4312—The Rise of Modern American Conservatism (3).** Prerequisite: Junior standing. Explores the causes and consequences of modern American conservatism's popular and electoral ascendancy between 1932 and the present. (U.S. history) (CL)
- 4314—The Golden Age of Piracy (3).** Prerequisite: Junior standing or consent of instructor. Traces the history of piracy from antiquity to the present, focusing on Anglo-American piracy's "Golden Age." (U.S. history) (CL)

- 4315—Slavery in the Atlantic World (3).** Prerequisite: Junior standing or instructor consent. Investigates the growth of chattel slavery, the slave trade, plantation slavery, slave resistance, and the Abolitionist movement in the British American Empire and Atlantic World. (U.S. history) (CL)
- 4317—The American Culture of Curiosity, 1800-1860 (3).** Prerequisite: Junior standing or consent of instructor. Examines the creation of a mass culture which combined education and amusement in print and commerce between the Revolution and the Civil War. (U.S. history) (CL)
- 4319—Empire and Imperialism in United States History (3).** Prerequisite: Junior standing or consent of instructor. Undergraduate research seminar on the history of United States imperialism from the founding to the present, considering major works, themes, approaches, and sources in the field. (U.S. history) (CL)
- 4320—Monuments, Memory, and Commemoration (3).** Prerequisite: Junior standing or instructor consent. Explores within specific social and political contexts the ways in which societies remember heroes, villains, tragedies, and triumphs. (U.S. history) (CL)
- 4323—Nature and Americans (3).** Prerequisite: Junior standing or consent of instructor. History of the relationship between Americans and their land from prehistory to the present. (U.S. history) (CL)
- 4324—History of Capitalism (3).** Prerequisite: Junior standing or consent of instructor. Examines the development of modern business enterprise, firms and corporations, entrepreneurship, and the business-government relationship. (U.S. history) (CL)
- 4325—Hysterical Women and Other Comics (3).** Prerequisite: Junior standing or consent of instructor. In-depth study of how women and other traditional targets of humor use comedy to alter the U.S. cultural and political landscape. (U.S. history) (CL)
- 4326—A History of Sexuality in the United States (3).** Prerequisite: Junior standing or consent of instructor. Examines the history of sexuality in the United States. Themes and topics include relations of power, sexual identities, commercialization of sex, courtship, marriage, and reproduction. (U.S. history) (CL)
- 4328—Bad Girls in Early America (3).** Prerequisite: Junior standing or instructor consent. Explores the lives of disorderly women, including alleged witches, prostitutes, escaped slaves, cross-dressers, suffragists, and others who defied social expectations in early America. (U.S. history) (CL)
- 4329—Race, Identity, and Citizenship in the United States (3).** Prerequisite: Junior standing or instructor consent. A research course that covers legal, political, and social definitions of racial identity and citizenship in the United States. (U.S. history) (CL)
- 4330—Jim Crow America: From Ferguson to Ferguson (3).** Prerequisite: Junior standing or consent of the instructor. Explores the historical development and influence on society of lynching and racial violence in America. (U.S. history) (CL)
- 4333—Law and Legality in the American West (3).** Prerequisite: Junior standing or instructor consent. History of law and legality in the North American West from the first Indigenous-European encounters to the present day, with a focus on the 19th and 20th centuries. (U.S. history) (CL)
- 4334—Race and Medicine in American History (3).** Prerequisite: Junior standing or instructor consent. Introduces students to the history of race, medicine, science, and health in American history. (U.S. history) (CL)
- 4337—History of American Seapower (3).** Prerequisite: Junior standing or consent of instructor. Examines history of the American Navy, organizational and technological development, evolution of strategic planning, and impact on foreign relations. (U.S. history) (CL)
- 4338—History of "Small Wars" (3).** Prerequisite: Junior standing or instructor consent. A research seminar focusing on insurgencies involving both American and international forces. (U.S. history) (CL)
- 4339—Children of War (3).** Examines the role of children in international affairs through the many dynamics of war and conflict during the twentieth century. (CL)
- 4340—A History of Disability in Europe (3).** Prerequisite: Junior standing or instructor consent. Surveys the ways disability has been understood and experienced in European history, with special emphasis on patterns of exclusion and integration. (European history) (CL)
- 4341—Ancient Greece (3).** Prerequisite: Junior standing or consent of instructor. From the origins of classical Greek civilization to the Roman conquest. Tyranny and democracy, imperialism, and the Hellenistic age. (European history) (CL)
- 4342—Ancient Rome (3).** Prerequisite: Junior standing or consent of instructor. Imperialism and its consequences from the early Republic through the partial collapse of the Empire in the 5th century A.D.; Christianity and the Empire. (European history) (CL)
- 4343—Alexander the Great (3).** Prerequisite: Junior standing or consent of instructor. A detailed study of the rise of ancient Macedonia, the reign of Alexander the Great, and the Hellenistic world. (European history) (CL)
- 4344—The Homeric Poems and the Trojan War: The Aegean World during the Late Bronze and Early Iron Ages (3).** Prerequisite: Junior standing or consent of instructor. Covers Homeric poems (*The Iliad* and *The Odyssey*) and scholarly studies in attempt to understand the two works of literature and the world(s) they describe. (European history) (CL)
- 4346—A History of Food in Europe (3).** Prerequisite: Junior standing or instructor consent. Examines the shifting politics, culture, and economics of food in Europe from pre-modern times to the contemporary period. (European history) (CL)
- 4347—History of the Medieval Church (3).** Prerequisite: Junior standing or consent of instructor. Origins of the Roman Church, the papacy, monasticism, scholastic and mystical theology, church-state relations, and the decline of medieval Christendom. (European history) (CL)
- 4348—The Renaissance (3).** Prerequisite: Junior standing or consent of instructor. Cultural and political history of Italy, France, and England from 1300-1600; the "rebirth" of wisdom through art, architecture, literature, music, economics, and religion. (European history) (CL)
- 4349—The Protestant Reformation (3).** Prerequisite: Junior standing or consent of instructor. Europe from 1517 to 1648. Religious revolt and the establishment of Protestantism; the age of religious wars; attempts at religious peace. (European history) (CL)
- 4351—Origins of the British Empire to 1783 (3).** Prerequisite: Junior standing or instructor consent. Explores the origins of the British Empire in the early modern era. Topics include exploration, colonization, trade, encounters, and ideas of imperialism and empire-building. (European history) (CL)
- 4352—Witchcraft and Witch Hunting in the Early Modern Western World (3).** Prerequisite: Junior standing or instructor consent. Examines the evolution of beliefs in witchcraft and the persecution of alleged witches in Europe and European colonies in the Americas from 1300 to 1800. (European history) (CL)
- 4353—The French Revolution and Napoleon (3).** Prerequisite: Junior standing or consent of instructor. The Old Regime and the Enlightenment. The Revolution and its drama, ideas, events, personalities, and complexities. Napoleon: heir, paladin, or liquidator of the Revolution? (European history) (CL)
- 4354—From Vampires to Death Tourism: The Dead in Europe since 1700 (3).** Prerequisite: Junior standing or instructor consent. Examines the different ways that Europeans have handled, represented, and thought about the dead in the early modern period. (European history) (CL)
- 4359—Cultural Brilliance and Political Failure: Germany's Weimar Republic, 1919-1933 (3).** Prerequisite: Junior standing or instructor consent. An in-depth examination of the rise and fall of Germany's Weimar Republic through an examination of its politics, culture, and society. (European history) (CL)
- 4360—Germany Since 1945: A Divided Nation Confronts Its Past (3).** Prerequisite: Junior standing or consent of instructor. A comparative study of capitalism and communism in West and East Germany emphasizing problems of national unity and efforts to atone for Nazi crimes. (European history) (CL)
- 4361—The USSR and the Cold War (3).** Prerequisite: Junior standing or instructor consent. Examines the successes, failures, and legacies of Soviet leaders who attempted to build the world's first Communist society after World War II. (European history) (CL)
- 4363—Emergence of New Nations in Latin America (3).** Prerequisite: Junior standing or consent of instructor. This 19th century course covers the formation of political systems, challenges to social stability, abolition of slavery, and relationship to North Atlantic world. (African, Asian, or Latin American history) (CL)
- 4365—Foundations of Contemporary Mexico (3).** Prerequisite: Junior standing or consent of instructor. Examines major themes of post-nineteenth century Mexico and their political, social, and cultural relevance. (African, Asian, or Latin American history) (CL)
- 4366—The Greater Mexican Revolution: The Mexican Revolution as U.S. History (3).** A transnational study of the Mexican Revolution, which challenged many presumptions of the previous Age of Revolutions and, in the process, transformed Mexico and the U.S. (CL)
- 4370—Great Cities (3).** Prerequisite: Junior standing or consent of instructor. Seminar on the history of a single major city, using it as a microcosm to study political, social, cultural, and intellectual development over time. May be repeated when topics vary. (European history) (CL)
- 4371—Race, Nation, and Identity (3).** Prerequisite: Junior standing or consent of instructor. Nineteenth and twentieth century concepts of difference as construed by race, nation, and identity. (European history) (CL)

- 4372—History of Comparative Genocide (3).** Prerequisite: Junior standing or consent of instructor. Examines the history of the term “genocide” and analyzes modern and contemporary examples of mass exterminations. (European history) (CL)
- 4373—Britain in Crisis: Reformations and Revolutions in the Early Modern Era (3).** Prerequisite: Junior standing or consent of instructor. Explores political and cultural upheaval and its significance in early modern Britain, focusing on religious and political change, war, and everyday life. (European history) (CL)
- 4375—Social and Cultural History of Europe, 1800 to the Present (3).** Prerequisite: Junior standing or consent of instructor. Modernization, industrialization, urbanization, gender, household, new professions, old occupations, and labor unrest. Bourgeois and working-class culture, avant-garde and masses, war, genocide, Europe today. (European history) (CL)
- 4376—History of the Italian Mafia (3).** Prerequisite: Junior standing or consent of instructor. Discusses the origins and development of the Mafia in the context of Italian politics, economy, and society in the 19th and 20th centuries. (European history) (CL)
- 4378—History of Italian Fascism (3).** Prerequisite: Junior standing or consent of instructor. Examines the origins of Italian Fascism and its development from the 1920s through 1940s, including the topics of propaganda, race, imperialism, gender, and war. (European history) (CL)
- 4379—Revolutionary Russia (3).** Prerequisite: Junior standing or instructor consent. Examines Russia/USSR during its revolutionary period, ca. 1900-1950. Topics studied include the 1917 revolutions, civil war, NEP, Stalinism, terror, the Gulag and WWII. (European history) (CL)
- 4380—A History of Masculinity (3).** Prerequisite: Junior standing or consent of instructor. Examines the history of masculinity and manhood in Great Britain and the United States since the mid-nineteenth century. (U.S. history) (CL)
- 4381—Colonial Mexico and the Spanish Borderlands (3).** Prerequisite: Junior standing or consent of instructor. Study of the Spanish conquest of Mexico and the evolution of the Spanish Empire in North America until Mexican independence in 1821. (African, Asian, or Latin American history) (CL)
- 4382—Walking the Line: The History of U.S. Mexico Border Relations since 1836 (3).** Prerequisite: Junior standing or instructor consent. A research course that covers the social, political, and economic histories of specific borderland region between the United States and Mexico since 1836. (U.S. history) (CL)
- 4383—History of Central Asia (3).** Prerequisite: Junior standing or instructor consent. Explores the history of Central Asia from ancient nomadic empires to the present. Topics include nomadic pastoralism, Mongols, competing imperialisms, everyday life, Islam, and politics. (African, Asian, or Latin American history) (CL)
- 4384—Global Buddhism (3).** Prerequisite: Junior standing or instructor consent. Examines the emergence and global diffusion of Buddha Dharma. Emphasizes innovations in doctrine and practice as Buddhism has spread globally. (African, Asian, or Latin American history) (CL)
- 4385—Global Islam: Past and Present (3).** Prerequisite: Junior standing or instructor consent. Examines Islam not only as a religion but also as a global phenomenon that helps shape the lives of people globally. (African, Asian, or Latin American history) (CL)
- 4386—Slavery in Africa (3).** Prerequisite: Junior standing or instructor consent. Explores the history of slavery in Africa, addressing varying definitions of slavery. Emphasizes West African slave kingdoms. (African, Asian, or Latin American history) (CL)
- 4387—The Social History of Currency from Beads to Bitcoin (3).** Prerequisite: Junior standing or consent of instructor. Students consider money as a social interaction in world history: as a form of communication, a means of exchange, a token of a political community. (African, Asian, or Latin American history) (CL)
- 4390—The Israeli-Palestinian Conflict (3).** Prerequisite: Junior standing or instructor consent. Research seminar on the 20th-century history of the land of Israel/Palestine, focusing on the conflict between Hebrew-speaking Jews and Arabic-speaking Palestinians. (African, Asian, or Latin American history) (CL)
- 4391—Modern South Africa (3).** Prerequisite: Junior standing or consent of instructor. Description and analysis of the social, economic, and political development of South African society, focusing on the struggle against apartheid. (African, Asian, or Latin American history) (CL)
- 4393—Modern China (3).** Prerequisite: Junior standing or consent of instructor. Chinese history from late Ming and early Qing period (17th century) until contemporary times. Emphasis on social, cultural, and political history. (African, Asian, or Latin American history) (CL)
- 4394—Modern Japan (3).** Prerequisite: Junior standing or consent of instructor. Social, cultural, political, and economic history of Japan (17th to 20th century). Focus on merchant culture, Tokugawa times, civic training of Meiji period, militarism, postwar period. (African, Asian, or Latin American history) (CL)
- 4395—Modern Vietnam (3).** Prerequisite: Junior standing or consent of instructor. Covers the social, political, and cultural history of Vietnam, beginning with the emergence of frontier society in the 16th century and concluding with the Vietnamese diaspora. (African, Asian, or Latin American history) (CL)
- 4397—Readings and Research in History (3).** Prerequisite: Senior standing and consent of instructor. An independent study course involving in-depth reading and intensive historical writing. May be repeated for credit. (CL)
- 4398—Senior Seminar in History (3).** Prerequisite: Senior standing or completion of 18 hours in history. An intensive study in historical methodology, document analysis, retrieval and collection of data, and synthesis into well-written history. (CL)
- 4399—Special Topics in History II (3).** Prerequisite: Junior or senior standing or consent of instructor. A senior-level, research-based, and writing-intensive course examining selected topics in the field of history. Content varies based on instructor. May be repeated for credit. (CL)
- 4696—Studies Abroad in Southeast Asia (6).** Students have the opportunity to travel to Vietnam, Laos, Cambodia, and Thailand and to participate in cultural exchanges with government leaders, students, and Vietnamese veterans. (African, Asian, or Latin American history) (CL)

Mexican American & Latina/o Studies (MALS)

- 2300—Introduction to Mexican American and Latina/o Studies (3).** Examines the historical development of the Mexican American and broader Latina/o community within the context of United States history and culture in the 19th and 20th centuries.
- 3302—Mexican American and Latina/o Studies: Contemporary Issues (3).** An interdisciplinary examination of the contemporary social condition of Mexican Americans and Latinos in the contemporary United States. Will be concerned with shifting material conditions in a variety of arenas.
- 4306—Capstone in Mexican American and Latina/o Studies (3).** Prerequisite: MALS 3302. After reviewing current theories and issues related to Mexican American and Latina/os in the U.S., students will apply this knowledge to an individual research project about Mexican American and Latina/os in the U.S., and will present the project in front of an audience.

Department of Kinesiology and Sport Management

Angela Lumpkin, Ph.D., Chairperson

Professors: Figueroa, Lochbaum, Lumpkin

Associate Professors: Blinch, K. Brown, Gonzales, J. Harry, Massett, T. Palmer, Sanderson, Tinsley

Assistant Professors: Albracht-Schulte, Brougham, Damon, Jung, Levitt, Luk, Mota, Pedersen, Sekiguchi, Vellers

Associate Professors of Practice: Arreola, Day

Assistant Professors of Practice: S. Brown, Corder, Fikes, Mata

Senior Lecturers: A. Harry, B. Palmer, Smith

Instructor: Kitten

CONTACT INFORMATION: 141 Kinesiology and Sport Management
Box 43011 | Lubbock, TX 79409-3011 | T 806.742.3371

About the Department

This department supervises the following degree programs:

- Bachelor of Science in Kinesiology
- Bachelor of Science in Sport Management
- Master of Science in Kinesiology
- Master of Science in Sport Management (face-to-face; online)
- Master of Science in Sport Management / J.D.
- Master of Science in Sport Management / M.B.A.
- Doctor of Philosophy in Exercise Physiology

Accelerated Degree Programs

- Bachelor of Science in Kinesiology / Master of Science in Kinesiology
- Bachelor of Science in Sport Management / Master of Science in Sport Management

Graduate Programs

For information on graduate programs offered by the Department of Kinesiology and Sport Management, visit the Graduate Programs section of the catalog on page 219.

Undergraduate Programs

Undergraduate students with majors in this department complete 36 junior/senior-level hours plus a minimum of an 18-hour minor. Each student must meet with a departmental adviser to develop a plan of study to verify the appropriate courses needed to complete degree requirements. Department faculty provide information about potential careers in kinesiology and sport management.

Athletic Training State Licensure Requirements. Students who wish to become licensed as athletic trainers in Texas can participate in a collaborative program offered by the department in conjunction with the Texas Tech University Department of Athletics and local partner sites. Students interested in this opportunity must be accepted into the student athletic training program and complete the Sports Medicine minor. After completing these requirements and obtaining a minimum of 1,800 apprenticeship hours, students will be qualified to take the Texas Athletic Training Licensure Examination.

Personal Fitness and Wellness Program. All students interested in learning sport skills, improving their health and physical fitness, and developing knowledge about sport, exercise, and physical activity can enroll in courses in the personal fitness and wellness program. To satisfy the College of Arts & Sciences requirement of 1 credit hour of fitness and wellness and 2 credit hours of fitness and wellness for the Bachelor of Arts and Bachelor of General Studies degrees, students may complete any personal fitness and wellness (PFW) course. Students majoring in kinesiology or in sport management are required to complete two PFW courses. Students participating in varsity athletics may enroll in the personal fitness and wellness

course that corresponds to their varsity sport, with a maximum of 1 credit hour per academic year per sport.

Kinesiology, B.S.

Students majoring in kinesiology study the foundations of human movement and physical activity. Students complete courses in biomechanics, exercise physiology, sport and exercise psychology, anatomical kinesiology, physiological application of nutrition to exercise and physical activity, exercise testing and prescription, motor learning, applied exercise physiology, advanced strength and conditioning, medical terminology, and six hours from a list of courses. Students pursuing entry into allied health programs (i.e., physical therapy, occupational therapy, medical school, and athletic training) often choose this degree. Students in pre-allied health fields are encouraged to consult with a departmental adviser for information about required courses and acceptable substitutions. A 2.75 GPA is required for acceptance into and continued enrollment in courses in the kinesiology degree. After declaration of an initial major and enrollment in TTU classes, to change majors into kinesiology, a continuing student must have completed 12 TTU credit hours with a GPA of at least 2.75.

A minimum 18-hour minor is required for kinesiology majors. Approved minors are: Athletic Coaching, Biology, Chemistry, General Business, Health, Nutrition, Psychology, Public Health, Spanish, Sport Management, and Sports Medicine.

Communication Literacy Requirement. In the Department of Kinesiology and Sport Management, kinesiology majors preparing for working with people in a variety of exercise, fitness, and healthcare careers must be effective communicators. The communication literacy plan measures verbal, written, analytical, and interpersonal communication skills in the assessment, promotion, and management of human movement, life-long physical activity, and healthy exercise and nutrition. Courses in the communication literacy plan for kinesiology majors are KIN 3347, 4305, and 4306.

Sport Management, B.S.

Students majoring in sport management study the application of management and business theories and principles to the sport industry. Students take courses in sport communication, human resource management in sport, social issues in sport, sport facilities and event management, sport marketing, sport finance and economics, leadership and management in sport, sport law, sport sales, a three-hour internship, and 6 hours from a list of courses. Students prepare to pursue management and leadership positions in professional, intercollegiate, recreational, and international sport organizations. A 2.75 GPA is required for acceptance into and continued enrollment in courses in the sport management major. After declaration of an initial major and enrollment in TTU classes, to change majors into Sport Management, a continuing student must have completed 12 TTU credit hours with a GPA of at least 2.75. Students must have 60 earned credit hours to enroll in 3000-level and 4000-level sport management courses.

A minimum 18-hour minor is required for sport management majors, with the General Business minor being highly recommended, although a student could select one of the following as required for the minor:

- General Business (GPA 2.0) = 18 hours (recommended)
- Advertising = 21 hours
- Athletic Coaching = 18 hours
- Communication Studies = 18 hours
- Creative Media Industries = 21 hours
- Economics = 18 hours
- Journalism = 21 hours
- Professional Communication = 21 hours
- Public Relations and Strategic Communication Management = 21 hours

Communication Literacy Requirement. In the Department of Kinesiology and Sport Management, sport management majors prepare for working with people in a variety of sport management fields from marketing to athletic administration facility and event management, and they must be effective communicators. The communication literacy plan measures writing, oral, and interpersonal communication skills needed in the sport industry. Courses in the communication literacy plan for sport management majors are SPMT 3373, 4353, and 4356.

Kinesiology, B.S. Sample Curriculum

FIRST YEAR

Fall

- ☐ ENGL 1301 - Essentials of College Rhetoric (3 SCH)
- ☐ KIN 1301 - Introduction to Kinesiology (3 SCH)
- ☐ PFW (1 SCH)
- ☐ CHEM 1305 - Chemical Basics (3 SCH) *(or higher)* **AND**
- ☐ CHEM 1105 - Experimental Chemical Basics (1 SCH) *(or higher)*
- ☐ HIST 2300 - History of the United States to 1877 (3 SCH) **OR**
- ☐ HIST 2301 - History of the United States since 1877 (3 SCH) **OR**
- ☐ HIST 2310 - History of Texas (3 SCH)

TOTAL: 14

Spring

- ☐ ENGL 1302 - Advanced College Rhetoric (3 SCH)
- ☐ MATH 1320 - College Algebra (3 SCH) *(or higher)*
- ☐ PFW (1 SCH)
- ☐ PHYS 1401 - Physics for Non-Science Majors (4 SCH) *(or higher)*
- ☐ HIST 2300 - History of the United States to 1877 (3 SCH) **OR**
- ☐ HIST 2301 - History of the United States since 1877 (3 SCH) **OR**
- ☐ HIST 2310 - History of Texas (3 SCH)

TOTAL: 14

SECOND YEAR

Fall

- ☐ ZOOL 2403 - Human Anatomy and Physiology I (4 SCH)
- ☐ Sophomore Foreign Language (3 SCH)
- ☐ Elective (3 SCH)
- ☐ MATH 1320 - College Algebra (3 SCH) *(or higher)*
(MATH 1320 may only be taken once for credit)
- ☐ POLS 1301 - American Government (3 SCH)

TOTAL: 16

Spring

- ☐ ZOOL 2404 - Human Anatomy and Physiology II (4 SCH)
- ☐ Creative Arts (3 SCH)*
- ☐ Oral Communication Elective (3 SCH)*
- ☐ Language, Philosophy, & Culture (3 SCH)
- ☐ POLS 2306 - Texas Politics and Topics (3 SCH)

TOTAL: 16

THIRD YEAR

Fall

- ☐ KIN 3305 - Exercise Physiology (3 SCH)
- ☐ KIN 3318 - Exercise and Sport Psychology (3 SCH)
- ☐ KIN 3307 - Medical Terminology for Kinesiology Majors (3 SCH)
- ☐ KIN 3303 - Motor Learning (3 SCH)
- ☐ ENGL 2311 - Introduction to Technical Writing (3 SCH)

TOTAL: 15

Spring

- ☐ KIN 3347 - Nutrition for Exercise and Performance (3 SCH)
- ☐ KIN 3346 - Anatomical Kinesiology (3 SCH)
- ☐ KIN 3306 - Applied Exercise Physiology (3 SCH)
- ☐ Minor Elective (3 SCH)
- ☐ Social and Behavioral Sciences (3 SCH)*

TOTAL: 15

FOURTH YEAR

Fall

- ☐ KIN 4301 - Introduction to Biomechanics (3 SCH)
- ☐ KIN 4306 - Exercise Testing and Prescription (3 SCH)
- ☐ KIN 4305 - Advanced Strength and Conditioning (3 SCH)
- ☐ Minor (6 SCH)

TOTAL: 15

Spring

- ☐ KIN Designated Electives (6 SCH)
- ☐ Minor Elective (9 SCH)

TOTAL: 15

TOTAL HOURS: 120

The above curriculum model includes all of the courses/hours to complete the degree in four years. The program requires 120 hours for graduation. A minor of 18 minimum hours is required.

* Select from the university's core curriculum

Foreign Language: A student must complete 3 hours at the sophomore level or above in a single language. The prerequisite for all sophomore language courses is credit for the freshman level. This credit can be determined through a credit by examination. The score attained on the exam will determine whether the student is placed in a second-year course, a 5-hour review course, or in some cases the first or second semester of a beginning (first-year) language course. See College of Arts & Sciences for further explanation.

KIN Designated Electives: Choose 6 hours from KIN 3300, 3308, 3323, 4000, 4363, 4375; HLTH 3301, 4308.

Sport Management, B.S. Sample Curriculum

SPMT Designated Electives (choose from): SPMT 3300, 4000, 4354, 4374, 4378, 4379

Undergraduate Minors

Athletic Coaching

The minor in athletic coaching requires 18 hours and can be completed entirely through online courses. Although designed for College of Education students who want to teach in elementary, middle, and high schools and coach, this minor is open to all students. Students will complete KIN 3308, 1301 or 3303, 3318, 3323, 3324, and 3356.

Kinesiology

The 18-hour minor in kinesiology is designed for students interested in expanding their understanding about the scientific principles of human movement. Students will complete KIN 1301 (a prerequisite for all of the other courses in the minor), KIN 3303, 3305, 3346, 3347, and 4305.

Public Health

The 18-hour public health minor instructs students across five core areas of public health: epidemiology, biostatistics, environmental, social and behavioral science, and health policy and management. This minor can be completed entirely through online courses. Students will complete HLTH 2302, 3301, 3311, 4308, 4313, and 4344.

Sport Management

The 18-hour minor in sport management introduces students to the fundamentals of the field of sport management. Students will complete SPMT 1302 (a prerequisite for all of the other courses in the minor), SPMT 4353, 4355, 4356, 4357, and 4359.

Sports Medicine

The 18-hour minor in sports medicine introduces students to the field of athletic training and prepares them to take the Texas Athletic Training Licensure Examination or enter a graduate athletic training licensing program. Students will complete KIN 3323, 3339, 3346, 4337, 4338, and 2195, 2196, and 2197.

Accelerated Bachelor's to Master's Degrees

Kinesiology, B.S. / Kinesiology, M.S.

This accelerated bachelor's to master's program in Kinesiology allows highly qualified (3.0 GPA on last 60 hours) seniors with a minimum of 90 credit hours earned to be admitted into the master's degree in Kinesiology and complete six credit hours that will count in earning a bachelor's degree and earning six hours of the credit hours for a master's degree. These six credits may be chosen from any of the 5000-level scheduled courses in consultation with a master's degree adviser.

Sport Management, B.S. / Sport Management, M.S.

This accelerated bachelor's to master's program in Sport Management allows qualified (3.0 GPA on last 60 hours) seniors with a minimum of 90 credit hours earned to be admitted into the master's degree in Sport Management and complete six credit hours that will count in earning a bachelor's degree and earning six hours of the credit hours for a master's degree. These six credits may be chosen from any of the 5000-level scheduled courses in consultation with a master's degree adviser.

Undergraduate Course Descriptions

Health (HLTH)

- 2302—Environmental Health and Awareness (3).** Examines critical issues and relationships affecting biospheric health including personal, community, and international ecology.
- 3301—Epidemiology (3).** Principles and methods in epidemiology about the incidence, distribution, cause, and control of disease in populations with applied emphasis to public health issues and practices.
- 3311—Communicable and Chronic Diseases (3).** Examines etiology of diseases from a body-systems approach, with special emphasis on sexually transmitted diseases, cancer, and cardiovascular disease.

- 4308—Introduction to Biostatistics (3).** Overview of various statistical methods used in public health practice and research with an emphasis on application of appropriate methods and interpretation of results.
- 4313—Mental Health (3).** Prerequisite: Junior standing. Overview of social, behavioral, and contextual factors in well-being with an emphasis on mental health from a biopsychosocial framework.
- 4344—Managing Stress (3).** Prerequisite: Junior standing. Provides a comprehensive and holistic approach to stress and stress management.

Kinesiology (KIN)

- 1301—Introduction to Kinesiology (3).** [PHED1301] An introduction to the professions in the exercise sciences, including the history, ideas, events, people, and programs that shaped those professions.
- 2195—Sports Medicine Practicum I (1).** Prerequisites: Departmental approval; Sports Medicine minor. Student athletic trainers work with TTU Athletics or other athletes in a physical therapy clinic, or related healthcare setting, to gain knowledge and practical skills.
- 2196—Sports Medicine Practicum II (1).** Prerequisites: C or better in KIN 2195; departmental approval; Sports Medicine minor. Student athletic trainers work with TTU Athletics or other athletes in a physical therapy clinic, or related healthcare setting, to gain knowledge and practical skills.
- 2197—Sports Medicine Practicum III (1).** Prerequisites: C or better in KIN 2196; departmental approval; Sports Medicine minor. Student athletic trainers work with TTU Athletics or other athletes in a physical therapy clinic, or related healthcare setting, to gain knowledge and practical skills.
- 2198—Sports Medicine Practicum (1).** Prerequisites: Sports Medicine minor and C or better in KIN 3323. Student athletic trainers will gain knowledge and practical skills working with intercollegiate athletic teams under the supervision of certified athletic trainers.
- 3300—Special Topics in Kinesiology (3).** Prerequisites: Kinesiology majors only; C or better in KIN 1301; departmental approval; junior or senior standing. Examines selected topics in kinesiology with content varying based on the topic.
- 3303—Motor Learning (3).** Prerequisites: Kinesiology majors only; kinesiology and athletic coaching minors and concentrations only; C or better in KIN 1301. A study of the many aspects of learning and performance of motor skills.
- 3305—Exercise Physiology (3).** Prerequisites: Kinesiology majors, minors, and concentrations only; C or better in KIN 1301, ZOOL 2403, and ZOOL 2404. Physiological response to exercise with emphasis on bioenergetics, neuroendocrine activity, skeletal muscle function, and cardiopulmonary system. Enrollment in KIN 3306 the next academic term encouraged.
- 3306—Applied Exercise Physiology (3).** Prerequisite: Kinesiology majors, minors, and concentrations only; C or better in KIN 3305. Examination of physiological adaptations to exercise training in health and disease along with physiological responses to environmental stress. Enrollment urged immediately following KIN 3305.
- 3307—Medical Terminology for Kinesiology Majors (3).** Prerequisite: Kinesiology majors only; KIN 1301. Study of the terminology related to exercise physiology principles, exercise testing, and exercise programming. Provides a foundation vocabulary utilized in courses required for kinesiology majors.
- 3308—Science of a Healthy Lifestyle (3).** [PHED1338] In-depth study of the physiological basis for living a healthy lifestyle centered on the importance of participating in physical activity.
- 3318—Exercise and Sport Psychology (3).** Prerequisite: Kinesiology majors; Athletic Coaching minors and concentrations; C or better in KIN 1301. Emphasis on the social and psychological factors pertaining to participation in sport and exercise.
- 3323—Care and Prevention of Athletic Injuries (3).** Prerequisite: Athletic Coaching minors and concentrations only. An introduction to athletic training and the qualifications and functions of the athletic trainer including emphasis on common athletic injuries.
- 3324—Teaching Physical Activities and Sports (3).** Prerequisite: Athletic coaching minors and concentrations only. Theory, practice, and instructional methodologies appropriate for teaching physical activities and sports in elementary and secondary school settings.
- 3339—Rehabilitation Concepts and Special Topics in Athletic Training (3).** Prerequisite: C or better in ZOOL 2403; Sports Medicine minors or concentrations only. Introduction of rehabilitation concepts aligned to the healing phases, developing documentation acumen, overview of special topics in terminology, diagnostics, and modalities.
- 3346—Anatomical Kinesiology (3).** Prerequisites: Kinesiology majors, minors, and concentrations only; sophomore standing; C or better in KIN 1301 and ZOOL 2403. Study of movement-specific muscu-

loskeletal anatomical structures and the respective neuromuscular fundamentals associated with movement analysis and their application to performance-based human movement.

- 3347—Nutrition for Exercise and Performance (3).** Prerequisites: Kinesiology majors, minors, and concentrations only; C or better in KIN 3305 and KIN 1301 or equivalent. Physiological application to exercise and physical activity of nutritional strategies for energy systems, body composition and weight management, and exercise recovery and muscular health. (CL)
- 3356—Principles of Sport Coaching (3).** Principles of effective coaching including team motivation and organization, managing coach-athletic relationships, and administering personnel, facilities, and contests.
- 4000—Independent Study (V1-6).** Prerequisites: Kinesiology majors or departmental approval; junior or senior standing. A structured independent study under the guidance of a faculty member.
- 4301—Introduction to Biomechanics (3).** Prerequisite: Kinesiology majors only; C or better in KIN 3346. The application of mechanical principles to the study of human motion.
- 4305—Advanced Strength and Conditioning (3).** Prerequisite: KIN 3305; Kinesiology majors, minors, and concentrations only. Scientific and applied principles of strength training with an emphasis on physiological mechanisms, training adaptation responses, program planning and implementation, and practical performance applications. (CL)
- 4306—Exercise Testing and Prescription (3).** Prerequisite: Kinesiology majors, minors, and concentrations only; C or better in KIN 3305. Theory and practical application methods of health fitness testing and exercise prescription for healthy and diseased individuals. (CL)
- 4337—Evaluation and Intervention of the Lower Quarter (3).** Prerequisites: Sports Medicine minors or concentrations only; C or better in KIN 3346 and KIN 3339; departmental approval. Clinical evaluation, interpretation, and exercise prescription specific to musculoskeletal and athletic injuries of the lower quarter.
- 4338—Evaluation and Intervention of the Upper Quarter (3).** Prerequisites: Sports Medicine minors and concentrations only. C or better in KIN 3346 and KIN 3339. Clinical evaluation, interpretation, and exercise prescription specific to musculoskeletal and athletic injuries of the upper quarter.
- 4363—Principles and Theories in Exercise Psychology (3).** Prerequisite: Kinesiology majors, minors, and concentrations only; C or better in KIN 3318. Psychological principles and theories regarding antecedents and consequences of exercise behaviors that can be applied to healthy individuals and clinical populations.
- 4375—Internship in Kinesiology (3).** Prerequisites: Kinesiology major; senior standing. Provides work-related experiences in physical activity, exercise, health promotion, and related exercise science organizations, including commercial, corporate, and clinical settings. Two-hundred clock hours equal 3 course credit hours.

Personal Fitness and Wellness (PFW)

- 1111—Aerobics (1).** Physical exercise that combines rhythmic aerobic exercise with stretching and strength training routines with the goal of improving all elements of fitness.
- 1112—Diet and Exercise (1).** [PHED1338] A concepts-based activity course in which the student learns to create and participate in an individualized lifetime physical activity program combined with healthy nutritional practices.
- 1113—Golf (1).** Basic golf rules, etiquette, and mechanics. Class meets off campus. Extra fee required.
- 1114—Jogging (1).** Principles and practice of recreational jogging for cardiovascular health. Includes flexibility training, individual progression instruction, complementary weight training, and nutritional practices.
- 1117—Walking (1).** Topics include walking technique, principles and practice of personal walking programming, interval, and circuit training, flexibility and muscular endurance training.
- 1118—Weight Training (1).** Basic principles and practice of weight training, developing and modifying an individual program. Includes flexibility and cardiovascular fitness.
- 1119—Yoga (1).** Basic poses, principles of movements and balance in yoga. Breathing techniques, stress reduction, relaxation, advanced poses, and twists will be covered.
- 1123—Racquetball (1).** Introduction to rules, shots, and strategies for singles, doubles, and cut-throat.
- 1124—Pickleball (1).** Pickleball, a concepts-based, individualized lifetime physical activity, combines elements of tennis, badminton, and ping-pong and is played on a modified-sized tennis court.
- 1125—Tennis (1).** Concepts of stroke mechanics, skill development, offensive and defensive strategies, rules, game play, singles and doubles, organization and communication, flexibility, and conditioning for tennis.

- 1127—Bowling (1).** Basic to advanced bowling skills will be taught, including stance, approach, delivery, rules, safety, bowling etiquette, and terminology. Class meets off campus. Extra fee required.
- 1130—Basketball (1).** Concepts of skill development, offensive and defensive strategies, rules, team organization and communication, game play, flexibility and conditioning for basketball.
- 1132—Soccer (1).** Concepts of skill development, offensive and defensive strategies, rules, team organization and communication, game play, flexibility, and conditioning for soccer.
- 1133—Softball (1).** Concepts of skill development, offensive and defensive strategies, rules, team organization and communication, game play, flexibility, and conditioning for softball.
- 1134—Volleyball (1).** Concepts of skill development, offensive and defensive strategies, rules, team organization and communication, game play, flexibility, and conditioning for volleyball.
- 1141—Scuba (1).** Allows the student to explore the underwater in a warm, pristine environment. Scuba and snorkeling gear are provided. Certification is possible.
- 1142—Beginning Swimming (1).** Swimming principles, basic stroke mechanics, breathing technique, and conditioning for beginning swimmers.
- 1160—Varsity Baseball (1).** For the student listed on the official intercollegiate squad for this sport. Athletics department approval is required prior to enrollment.
- 1161—Varsity Men's Basketball (1).** For the student listed on the official intercollegiate squad for this sport. Athletics department approval is required prior to enrollment.
- 1162—Varsity Women's Basketball (1).** For the student listed on the official intercollegiate squad for this sport. Athletics department approval is required prior to enrollment.
- 1163—Varsity Cross Country (1).** For the student listed on the official intercollegiate squad for this sport. Athletics department approval is required prior to enrollment.
- 1164—Varsity Football (1).** For the student listed on the official intercollegiate squad for this sport. Athletics department approval is required prior to enrollment.
- 1165—Varsity Golf (1).** For the student listed on the official intercollegiate squad for this sport. Athletics department approval is required prior to enrollment.
- 1166—Varsity Soccer (1).** For the student listed on the official intercollegiate squad for this sport. Athletics department approval is required prior to enrollment.
- 1167—Varsity Softball (1).** For the student listed on the official intercollegiate squad for this sport. Athletics department approval is required prior to enrollment.
- 1168—Varsity Tennis (1).** For the student listed on the official intercollegiate squad for this sport. Athletics department approval is required prior to enrollment.
- 1169—Varsity Track and Field (1).** For the student listed on the official intercollegiate squad for this sport. Athletics department approval is required prior to enrollment.
- 1170—Varsity Volleyball (1).** For the student listed on the official intercollegiate squad for this sport. Athletics department approval is required prior to enrollment.

Sport Management (SPMT)

- 1302—Introduction to Sport Management (3).** Overview of the various components, contexts, and functions of the sport industry.
- 3300—Special Topics in Sport Management (3).** Prerequisites: Sport Management majors only; C or better in SPMT 1302; departmental approval; junior standing. Examines selected topics in sport management with content varying based on the topic.
- 3373—Sport Communication (3).** Prerequisite: Sport Management majors only; junior standing; C or better in SPMT 1302. An overview of the various methods and modalities of communication within the sport industry. (CL)
- 3375—HR Management and Employee Relations in Sport (3).** Prerequisites: Sport Management majors only; junior standing; C or better in SPMT 1302. An examination of interpersonal, cultural, and legal aspects of managing human resources and dealing with employee relations within sport organizations.
- 4000—Independent Study (V1-6).** Prerequisite: Sport Management majors only; C or better in SPMT 1302; departmental approval; junior standing. A structured independent study under the guidance of a faculty member.
- 4353—Social Issues in Sport (3).** Prerequisite: Sport management majors, minors, and concentrations only; junior standing; C or better in SPMT 1302. Analysis and understanding of various ways in which cultural, racial, and socio-economic diversity impacts those within sport. (CL)

- 4354—**Current Issues in Intercollegiate Athletics (3)**. Prerequisite: Sport Management majors only; junior standing; C or better in SPMT 1302. Examination of contemporary issues within intercollegiate athletics, such as amateurism, student-athlete health and well-being, construction of new athletic facilities, and rising costs of coaches' contracts.
- 4355—**Sport Facilities and Event Management (3)**. Prerequisite: Sport management majors, minors, and concentrations only; junior standing; C or better in SPMT 1302. Examination of principles, practices, and procedures of managing sporting events and sport related facilities.
- 4356—**Sport Marketing (3)**. Prerequisite: Sport management majors, minors, and concentrations only; junior standing; C or better in SPMT 1302. Overview of the nature and theories of sport product marketing and the relationship between consumer behavior and marketing research. (CL)
- 4357—**Sport Finance and Economics (3)**. Prerequisite: Sport management majors, minors, and concentrations only; junior standing; C or better in SPMT 1302. Examination and application of financial and economic principles and theories within the sport industry.
- 4358—**Leadership and Management in Sport (3)**. Prerequisite: Sport management majors, minors, and concentrations only; junior standing; C or better in SPMT 1302. Fundamental concepts and theories for management in sport programs.
- 4359—**Sport Law (3)**. Prerequisite: Sport Management majors only; junior standing; C or better in SPMT 1302. Examination of legal duties and responsibilities within sport, legal rights, liability, prevention, alternatives to litigation, and actions to pursue if involved in a lawsuit.
- 4360—**Sport Sales (3)**. Prerequisites: Sport Management majors only; junior standing; C or higher in SPMT 1302. Students learn about client-focused selling and fundraising in the sport industry and the importance of understanding client needs and motivation for buying and donating.
- 4374—**International Sport Management (3)**. Prerequisite: Sport Management majors only; junior standing; C or better in SPMT 1302. An overview of the global sport industry from both cultural and economic perspectives and the globalization of American sports.
- 4376—**Sport Management Internship I (3)**. Prerequisite: Sport Management majors only; senior standing; junior standing; C or better in SPMT 1302 and departmental approval. This required three-hour course is a student's integrative, capstone, practical, and professional experience to help prepare them for working in the sport industry.
- 4378—**Sport Management Internship II (3)**. Prerequisite: Sport Management majors only; junior standing; C or better in SPMT 1302 and departmental approval. This optional three-hour course allows students to expand on professional experiences during an internship to better prepare them for working in the sport industry.
- 4379—**Introduction to Sports Analytics (3)**. Prerequisite: Sport Management majors only; junior standing; C or better in SPMT 1302. Students will identify and apply practical analytics techniques used in the sports industry and learn how team personnel utilize advanced statistical techniques for competitive advantages.

Department of Mathematics and Statistics

Magda D. Toda, Ph.D., Chairperson

Dick and Martha Brooks Regents Professor: Ghosh

Professors: Aulisa, Christensen, Ellingson, Gelca, Higgins, Howle, Iyer, Jang, Lindquist, Long, McCarthy, Peace, Rachev, L. Schovanec, Solynin, Surles, Toda, Trindade, D. Volchenkov, A. Wang, G. B. Williams

Associate Professors: Bornia, Guo, Hamilton, Hoang, Juan, Ledet, Lee, Luan, Monico, Pavlov, Tran, Weinberg, F. Zhang, W. Zhang

Assistant Professors: Das, Dey, Huang, Laubmeier, Liu, Mei, Pampano, T. Thompson, Tomas, Vo, Y. Wang

Senior Lecturers: P. Schovanec, L. Volchenkov, C. Williams

Lecturers: Bailey, Davenport, Erwin, Qi, Server, Surowiec, G. Thompson, Tyrrell, J. Wang

Instructors: Juarez, Nunez

Postdoctoral Teaching Scholars: Belding, Chierici, Golubnichiy, Guler, Soto Levins, Tripathi

CONTACT INFORMATION: 201 Mathematics and Statistics Bldg.

Box 41042 | Lubbock, TX 79409-1042 | T 806.742.2566 | F 806.742.1112

www.math.ttu.edu

About the Department

This department supervises the following degree and certificate programs:

- Bachelor of Arts in Mathematics
- Bachelor of Science in Mathematics
- Mathematics, B.A. or B.S.: Data Science Concentration
- Master of Science in Mathematics
 - Thesis Option
 - Non-Thesis Exam Option
 - Non-Thesis Report Option
- Master of Science in Statistics
 - Thesis Option
 - Non-Thesis Exam Option
 - Non-Thesis Report Option
- Doctor of Philosophy in Mathematics
- Graduate Certificate in Mathematics

Dual Degree Program

- Bachelor of Science in Mathematics /
Bachelor of Science in Computer Science

In addition, the department has offered a Master of Arts in Mathematics, but this program no longer accepts new students. Since Fall 2017, it has been replaced by the Graduate Certificate in Mathematics offered in conjunction with (or in addition to) a master's or doctoral degree in another field. The departmental emphasis is placed on the Ph.D. and M.S. degrees in the mathematical sciences.

A Bachelor of Arts or Bachelor of Science in Mathematics with a minor in actuarial science has been offered since 2008. In addition, the department supervises programs leading to minors in mathematics and to teacher certification in mathematics at the middle and secondary school levels.

Graduate Programs

For information on graduate programs offered by the Department of Mathematics and Statistics, visit the Graduate Programs section on page 221.

Undergraduate Programs

Residency Requirement. For the minor and major in mathematics, at least one half of the upper-level mathematics courses must be taken in the Department of Mathematics and Statistics at Texas Tech University. This residency requirement will be waived by the department only in very exceptional circumstances.

Teacher Education. The Department of Mathematics and Statistics cooperates with the College of Education in offering plans for teacher certification in mathematics at both the middle and secondary school levels.

A student must have a grade of C or better in each mathematics course counted toward middle-or secondary-education certification.

The courses offered in mathematics for students intending to prepare themselves for middle school teaching are MATH 1320, 2370, 2371, 3371, 3372, and 4370.

The student preparing to teach in the secondary school may select mathematics as a teaching field and complete the program for teacher certification in mathematics. Students planning to become high school teachers should minor in secondary education. Students wishing to obtain teacher certification should consult with the department's undergraduate advisor and see a College of Education advisor to complete a certification plan.

The minimum requirements for the teaching field in mathematics at the secondary level are as follows:

- MATH 1451, 1452, 2450, 2360, 3310, and 4331
- One of the following: MATH 2300, 3342, or 4342
- One of the following: MATH 3430 or 4330

NOTE: A satisfactory score on the placement exam or satisfactory completion of TSI requirements is required for entrance to all above courses. Texas Success Initiative (TSI) students who have not passed the mathematics section of the TSI test may not enroll in MATH 1320 or MATH 1321 until they have successfully completed their prescribed program of TSI mathematics skills development. See course listings for descriptions and prerequisites for the courses listed above.

Communication Literacy Requirement. The Communication Literacy requirement for the Mathematics (B.A. or B.S.) major include two of the following: MATH 3310, 3360, and 4350.

Mathematics, B.A.

The academic background of undergraduate students pursuing a degree in mathematics is extremely diverse. Because of this diversity, semester-by-semester schedules for undergraduate degree plans are formulated individually for each student on a case-by-case basis.

Specific listings of General Degree Requirements for each undergraduate program, based on disciplines and number of corresponding credit hours, can be found at

www.math.ttu.edu/Undergraduate/undergrad_program.shtml.

The mathematics curriculum is designed to allow flexibility in choosing elective courses so that students can prepare to enter the industrial job market, graduate or professional school, or a teaching career. Recent Texas Tech mathematics graduates have been employed by companies in aerospace (NASA, defense), electronics (computers, telecommunications), engineering, finance (banks, brokerage, insurance), government (federal agencies, offices, laboratories), petroleum (geophysics, oil), security, entertainment, and education. Some graduates have entered law school or medical school, while many have pursued graduate degrees at various universities.

The department offers honors-level courses in collaboration with the Honors College. The upper-division curriculum includes customized special topics classes and fosters individual undergraduate research projects under supervision of faculty members.

Requirements. The 120-hour curriculum established for the B.A. degree is designed to provide the foundation for a liberal education through a well-rounded study of the humanities and fine arts; the physical, biological, and social sciences; and mathematics. It also provides the factual basis and insights requisite for specialized study and professional work in these fields.

Twenty-five semester hours of upper-level math courses are required. These course requirements may be broadly divided into four components:

- **Calculus:** MATH 1451, 1452, 2450 (Note: 3-hour calculus courses are accepted for transfer equivalency.)
- **Foundation** (5 courses): MATH 2360, 3310, 4350, 3350 OR 3354, 3360 OR 4342 OR 3342
- **Depth** (take one 3-hour course from): MATH 4343, 4351, 4354, 4360, 4000
- **Breadth** (take a minimum of 10 hours not used on above lists): MATH 3342, 3356, 3430, 4000, 4101, 4310, 4312, 4324, 4330, 4331, 4342, 4343, 4351, 4354, 4356, 4360, 4362, 4363

Additional Requirements. Total MATH hours must be at least 37, with at least half of the upper-division (3000- and 4000-level) courses taken at Texas Tech.

The Bachelor of Arts in Mathematics requires a minimum of 40 semester hours of junior and senior work. Not more than 42 semester hours in one subject may be counted nor more than 8 hours in applied music and/or

music ensemble except for students having music as a major or minor. Not more than 6 hours in personal fitness and wellness courses may be counted as electives nor more than 24 hours in the technical or professional subjects or agriculture, business administration, engineering, and/or human sciences.

Elective Courses. Additional courses sufficient to bring the total to 120 semester hours must be taken.

Mathematics, B.S.

The 120-hour B.S. degree permits a greater degree of specialization than that afforded by the B.A. degree.

Requirements. Twenty-seven semester hours of upper-level math courses are required. The mathematics requirements are similar to those for the B.A. degree, but additional advanced math courses are required. These course requirements may be broadly divided into four components:

- **Calculus:** MATH 1451, 1452, 2450 (Note: 3-hour calculus courses are accepted for transfer equivalency.)
- **Foundation** (5 courses): MATH 2360, 3310, 4350, 3350 OR 3354 OR 4325, 3360 OR 4342 OR 3342
- **Depth** (take two 3-hour courses from): MATH 4343, 4351, 4326 OR 4354, 4360, 4000
- **Breadth** (take a minimum of 9 hours not used in the above): MATH 3342, 3356, 3430, 4000, 4101, 4310, 4312, 4324, 4330, 4331, 4342, 4343, 4351, 4354, 4356, 4360, 4362, 4363

Total MATH hours must be at least 42, with at least half of the upper-division (3000- and 4000-level) courses taken at Texas Tech.

Minor. Candidates for the B.S. degree must choose their minor from a scientific or technical area, including but not limited to the following: actuarial science, accounting, anthropology, astrophysics, atmospheric science, biology, bioengineering, business, chemistry, chemical engineering, civil engineering, cognitive science, computer science, economics, electrical engineering, engineering, environmental sciences, finance, general business, health professions (STEM only courses), kinesiology, geology, geophysics, industrial engineering, life sciences, mechanical engineering, microbiology, petroleum engineering, physics, sociology, social work, sport management, sustainability, technical communication, technical writing, wind energy, or zoology. A minor must include 18 semester hours, 6 of which must be advanced. Courses counted for the minor must be approved by the department supervising the minor.

Electives. These courses are taken in addition to the required courses, to a total of minimum 120 semester hours. The inventory of courses that can be used to fulfill various requirements is updated each year. Students should consult the department's undergraduate advisor if they have any questions about a particular course and the general degree requirements. For the minor in actuarial science, please refer to

www.math.ttu.edu/Undergraduate/Minors/actuary.shtml.

Mathematics: Data Science Concentration, B.A. or B.S.

The Data Science Concentration is designed to provide mathematics majors with a solid foundation in statistics and mathematical computation. Students are required to take two mathematical computing courses (MATH 3430 and MATH 4330), two statistics courses (MATH 4342 and MATH 4343), a numerical analysis course (MATH 4310 or MATH 4312), and a special topics course covering a data science topic (MATH 4000). The MATH 4000 course can be replaced by CS 3361 - Concepts of Programming Languages or an equivalent course, as determined and approved by the department.

Undergraduate Dual Degree

The Department of Mathematics and Statistics participates with the Department of Computer Science in offering a 162-hour dual degree program in mathematics and computer science. This is a five-year program that culminates in a B.S. in Mathematics with a minor in computer science from the College of Arts & Sciences and a B.S. in Computer Science from the Whitacre College of Engineering. Students should consult with an academic advisor in each college and may declare either as their primary college. See the Department of Computer Science catalog section for curriculum information.

**Mathematics, B.A.
Sample Curriculum****FIRST YEAR****Fall**

- ☐ MATH 1451 - Calculus I with Applications (4 SCH)
- ☐ ENGL 1301 - Essentials of College Rhetoric (3 SCH)
- ☐ Life and Physical Sciences Elective (4 SCH)
- ☐ Language, Philosophy, and Culture Elective (3 SCH)

TOTAL: 14

Spring

- ☐ MATH 1452 - Calculus II with Applications (4 SCH)
- ☐ ENGL 1302 - Advanced College Rhetoric (3 SCH)
- ☐ Life and Physical Sciences Elective (4 SCH)
- ☐ Language, Philosophy, and Culture Elective (3 SCH)
- ☐ Personal Fitness and Wellness Elective (1 SCH)

TOTAL: 15

SECOND YEAR**Fall**

- ☐ MATH 2450 - Calculus III with Applications (4 SCH)
- ☐ MATH 2360 - Linear Algebra (3 SCH)
- ☐ English Literature (3 SCH)
- ☐ Foreign Language (3 SCH)
- ☐ Minor (3 SCH)

TOTAL: 16

Spring

- ☐ MATH 3310 - Intro. to Mathematical Reasoning and Proof (3 SCH)
- ☐ English Literature (3 SCH)
- ☐ Foreign Language (3 SCH)
- ☐ Creative Arts Elective (3 SCH)
- ☐ Minor (3 SCH)

TOTAL: 15

THIRD YEAR**Fall**

- ☐ MATH 3360 - Foundations of Algebra I (3 SCH) **OR**
- ☐ MATH 4342 - Mathematical Statistics I (3 SCH) **OR**
- ☐ MATH 3342 - Mathematical Statistics for Engineers & Scientists (3 SCH)
- ☐ MATH 3354 - Differential Equations I (3 SCH)
- ☐ HIST 2300 - History of the United States to 1877 (3 SCH)
- ☐ Social and Behavioral Sciences Elective (3 SCH)
- ☐ Minor (3 SCH)

TOTAL: 15

Spring

- ☐ MATH 4331 - Advanced Geometry (3 SCH)
(Can be exchanged within Breadth category.)
- ☐ HIST 2301 - History of the United States since 1877 (3 SCH)
- ☐ Creative Arts Elective (3 SCH)
- ☐ Social and Behavioral Sciences Elective (3 SCH)
- ☐ Minor (3 SCH)
- ☐ MATH 4000 - Selected Topics (V1-3 SCH) (minimum 1 hour required)

TOTAL: 16

FOURTH YEAR**Fall**

- ☐ MATH 4350 - Advanced Calculus I (3 SCH)
- ☐ MATH 3430 - Computational Techniques for Science and Math. (4 SCH)
- ☐ POLS 1301 - American Government (3 SCH)
- ☐ Minor (3 SCH)
- ☐ Personal Fitness and Wellness Elective (1 SCH)

TOTAL: 14

Spring

- ☐ MATH 4351 - Advanced Calculus II (3 SCH)
(Can be exchanged within Depth category.)
- ☐ POLS 2306 - Texas Politics and Topics (3 SCH)
- ☐ Oral Communication Elective (3 SCH)
- ☐ Minor (3 SCH)
- ☐ MATH 4362 - Theory of Numbers (3 SCH)
(Can be exchanged within Depth category.)

TOTAL: 15

TOTAL HOURS: 120

Foreign Language: A student must complete 6 hours at the sophomore level or above in a single language. The prerequisite for all sophomore language courses is credit for the freshman level. This credit can be determined through a credit by examination. The score attained on the exam will determine whether the student is placed in a second-year course, a 5-hour review course, or in some cases the first or second semester of a beginning (first-year) language course. See Arts & Sciences General Degree Requirements for further explanation.

Foreign Language: A student must complete 3 hours at the sophomore level or above in a single language. The prerequisite for all sophomore language courses is credit for the freshman level. This credit can be determined through a credit by examination. The score attained on the exam will determine whether the student is placed in a second-year course, a 5-hour review course, or in some cases the first or second semester of a beginning (first-year) language course. See Arts & Sciences General Degree Requirements for further explanation.

Mathematics, Undergraduate Minor

A minimum of 9 semester hours above the level of Calculus III is required for a minor, 6 hours of which must be upper-division coursework, not including MATH 2370, 2371, 3370, 3371, 3372, 4370. The minor is subject to the requirements of and must be approved by the Department of Mathematics and Statistics.

Undergraduate Course Descriptions

Mathematics (MATH)

- 1300—Contemporary Mathematics (3).** [MATH1332] Prerequisites: A score of at least 3500 on the STA2, 500 on the SATM and composite score of 1070 or a score of at least 19 on the ACTM and composite score of 23, or a C or better in either MATH 0302, REF 0302, or TSI 0302. Quantitative literacy and problem solving with applications to finance, population dynamics, politics, and business. Partially fulfills core Mathematics requirement.
- 1320—College Algebra (3).** [MATH1314] Prerequisites: A score of at least 500 on the SATM and composite score of 1070 or a score of at least 19 on the ACTM and composite score of 23 or score of at least 3500 on STA2, or a grade of C or better in either MATH 0302, TSI 0302, or REF 0302. Inequalities, determinants, theory of equations, binomial theorem, progressions, mathematical induction. Cannot receive credit for both MATH 1320 and MATH 1420. Partially fulfills core Mathematics requirement.
- 1321—Trigonometry (3).** [MATH1316] Prerequisite: C or better in MATH 1320, MATH 1420, or REF 0302 or a test score of at least 3500 on the STA2 or 610 on the SATM or 26 on the ACTM or Code 4 or higher on MPE. Trigonometric functions, radians, logarithms, solutions of triangles, identities, trigonometric equations, complex numbers, De Moivre's Theorem. Partially fulfills core Mathematics requirement.
- 1329—Equations, Functions, and Graphs With Business Applications (3).** Corequisite: TSI 0329 if TSI Math requirements are not met. An introduction to equations, functions, and graphs with an emphasis on algebraic manipulations using examples of interest to students of business and the social sciences.
- 1330—Introductory Mathematical Analysis I (3).** [MATH1324] Prerequisite: A score of at least 500 on the SATM and composite score of 1070 or a score of at least 19 on the ACTM and composite score of 23 or score of 3500 on STA2, or a C or better in either MATH 0302, REF 0302, or TSI 0302. Pre-calculus topics of interest to students of business and the social sciences. These include mathematics of finance, probability and statistics, and Markov processes. Cannot receive credit for both MATH 1330 and MATH 1430. Partially fulfills core Mathematics requirement.
- 1331—Introductory Mathematical Analysis II (3).** [MATH1325, 1425] Prerequisite: a grade of C or better in MATH 1330 or MATH 1430 or a test score of at least 610 on SATM or 26 on ACTM or Code 4 or higher on MPE. Contains an introduction to regression analysis and topics from differential and integral calculus that are of interest to students of business and the social sciences. Partially fulfills core Mathematics requirement.
- 1350—Analytical Geometry (3).** [MATH2312, 2412] Prerequisite: MATH 1321 or Code 6 or higher on MPE or a score of at least 660 on the SATM or a score of at least 29 on the ACTM. Fundamental concepts of analytical geometry. Partially fulfills core Mathematics requirement.
- 1420—College Algebra With Review (4).** [MATH1414] Prerequisites: A score of at least 500 on the SATM and composite score of 1070 or a score of at least 19 on the ACTM and composite score of 23 or 3500 on STA2, or a C or better in MATH 0302, REF 0302, or TSI 0302. Review of topics from high school algebra, inequalities, functions and graphs, linear systems, sequences, mathematics induction. Cannot receive credit for both MATH 1320 and 1420. Partially fulfills core Mathematics requirement.
- 1430—Introductory Mathematical Analysis With Review (4).** Prerequisites: Code 2 or higher on MPE or a score of at least 610 on the SATM or a score of at least 26 on the ACTM or a score of 3500 on STA2, or a C or better in REF 0302, a B or better in MATH 0301 or TSI 0202, or a grade of D or better in a college level mathematics course. Review of topics from high school algebra, pre-calculus topics of interest to students of business and the social sciences. These include mathematics of finance, probability and statistics, and Markov processes. Cannot receive credit for both MATH 1330 and 1430. Partially fulfills core Mathematics requirement.
- 1451—Calculus I with Applications (4).** [MATH2413] Prerequisite: MATH 1350 or MATH 1550 with a grade of C or better, or MATH 1321 with a grade of C and Code 5 on MPE, or MATH 1321 with a grade of B or better, or Code 7 on MPE, or a score of at least 660 on the SATM, or a score of at least 29 on the ACTM, or a score of at least 3 on AP AB Calculus and Code 5 on MPE. Differentiation of algebraic and transcendental functions, differentials, indefinite integrals, definite integrals. Applications and problem-solving are strongly emphasized. A student will receive credit for either (not both) MATH 1351 or 1451. (Honors section offered.) Partially fulfills core Mathematics requirement.
- 1452—Calculus II with Applications (4).** [MATH2414] Prerequisite: C or better in MATH 1451 or departmental consent. Methods of integration, parametric equations, polar coordinates, hyperbolic functions, infinite series. Applications and problem-solving are strongly emphasized. A student will receive credit for either (not both) MATH 1352 or 1452. (Honors section offered.) Partially fulfills core Mathematics requirement.
- 1550—Precalculus (5).** Prerequisite: Code 3 or higher on MPE or a score of at least 610 on the SATM or a score of at least 26 on the ACTM or a 3500 on the STA2, or an A in MATH 0302 or TSI 0302, or a C or better REF 0302 or in a college level mathematics course. Topics from college algebra, trigonometry, and analytical geometry that are necessary prerequisites for Calculus I. Partially fulfills core Mathematics requirement.
- 2300—Statistical Methods (3).** [MATH1342, 1442, 2342, 2442] Prerequisite: A score of at least 500 on the SATM and composite score of 1070 or a score of at least 19 on the ACTM and composite score of 23 or a grade of C or better in MATH 0302 or a grade of C or better in TSI 0302. Methods of analyzing data, statistical concepts and models, estimation, tests of significance, introduction to analysis of variance, linear regression, and correlation. Partially fulfills core Mathematics requirement.
- 2345—Introduction to Statistics with Application to Business (3).** Prerequisite: Code 4 or higher on MPE, a score of at least 610 on the SATM, a score of at least 26 on the ACTM, or a C or better in either MATH 1330, MATH 1430, or MATH 1451. Statistics and probability for business. Data collection, description, interpretation, prediction, inference, and computer software. Partially fulfills core Mathematics requirement.
- 2360—Linear Algebra (3).** [MATH2318, 2418] Prerequisite: C or better in MATH 1452 or consent of department. Finite-dimensional vector spaces, linear transformations and matrices, eigenvalues and eigenvectors.
- 2370—Elementary Analysis I (3).** [MATH1350] Prerequisite: MATH 1320 and major of EC or MDS or consent of department. Analytic geometry and the real number system with applications. Not for engineering, science, or mathematics majors. Partially fulfills core Mathematics requirement.
- 2371—Elementary Analysis II (3).** Prerequisite: MATH 1320 and major of EC or MDS or consent of department. Elementary differential and integral calculus with application. Not for engineering, science, or mathematics majors. Partially fulfills core Mathematics requirement.
- 2450—Calculus III with Applications (4).** [MATH2415] Prerequisite: MATH 1452 or departmental consent. Partial differentiation, functions of several variables, multiple integrals, line integrals, surface integrals, Stokes Theorem. Applications and problem-solving are strongly emphasized. (Honors section offered.)
- 3310—Introduction to Mathematical Reasoning and Proof (3).** Prerequisite: MATH 2450 or concurrent with MATH 2450 or consent of department. Logic, techniques of proof, induction, writing proofs involving sets, relations, functions, graphs, number theory, and construction of real numbers. (CL)
- 3342—Mathematical Statistics for Engineers and Scientists (3).** Prerequisite: MATH 2450 or consent of department. Descriptive statistics, elementary probability, random variables and distributions, mean, variance, parameter estimation, hypothesis testing, regression, analysis of variance. MATH 3342 and MATH 4342 cannot both be counted toward a mathematics major or minor.
- 3350—Higher Mathematics for Engineers and Scientists I (3).** Prerequisite: C or better in MATH 1452 (cannot be taken concurrently) or consent of department. Ordinary differential equations. Laplace transforms. Other selected topics. MATH 3350 and MATH 3354 may not both be counted toward a mathematics major or minor. Mathematics majors should take MATH 3354 and have the consent of the department to take MATH 3350.
- 3351—Higher Mathematics for Engineers and Scientists II (3).** Prerequisites: C or better in MATH 2450 and in MATH 3350 or MATH 3354 or consent of department. Partial differential equations and numerical methods. MATH 3351 and MATH 4354 cannot both be counted toward a mathematics major or minor.
- 3354—Differential Equations I (3).** Prerequisite: MATH 2450 and MATH 2360 or consent of department. Solutions of ordinary differential equations, geometric and physical applications. MATH 3350 and 3354 may not both be counted toward a mathematics major or minor.
- 3356—Quantitative Theory of Interest (3).** Prerequisite: C or better in MATH 1452. Covers the foundation of financial mathematics. Topics include

compound interest, annuities, amortization, sinking funds, bonds, and current topics in finance; SOA Exam FM.

- 3360—Foundations of Algebra I (3).** Prerequisites: MATH 2360 and MATH 3310 or consent of department. Fundamental concepts of abstract algebra. Primarily group theory. (CL)
- 3370—Elementary Geometry (3).** Congruence and measures of plane and solid figures, similarity, areas, volumes, and a brief introduction to concepts in probability and statistics.
- 3371—Elements of Finite Mathematics (3).** Combinatorics, probability theory. Bayes' Theorem, Bernoulli Trials. Probability distributions and statistics. Not for engineering, science, or mathematics majors.
- 3372—Math Modeling for Teachers (3).** Prerequisite: MATH 2371. Not for engineering, math, or science majors. Calculus and non-calculus based models in science and engineering. Appropriate technology for simulation. Computer algebra systems.
- 3430—Computational Techniques for Science and Mathematics (4).** Prerequisite: MATH 2450 and MATH 2360 or consent of department. Emphasis on writing code using modern computer languages. Designated primarily for mathematics majors, general science majors, or students enrolled in a secondary mathematics teacher program. Restricted to mathematics majors or students enrolled in a secondary mathematics teacher program.
- 4000—Selected Topics (VI-3).** Prerequisite: MATH 2450. Selected topics in upper division mathematics. May be repeated for credit.
- 4101—Seminar in Mathematics, Statistics, and Mathematics Education (1).** Prerequisite: MATH 1451 or consent of instructor. Issues in mathematics, statistics, and mathematics education.
- 4202—Preparation for Mathematics Competitions (Putnam Competition) (2).** Prerequisite: Consent of instructor. Prepares students for the Putnam Competition. Only 2 hours of this course can be applied toward the major.
- 4310—Introduction to Numerical Analysis I (3).** Prerequisite: MATH 3350 or MATH 3354, or consent of instructor. Interpolation, approximations, numerical integration, and differentiation.
- 4312—Introduction to Numerical Analysis II (3).** Prerequisite: MATH 2360, including an elementary knowledge of programming or consent of instructor. Numerical techniques in linear algebra.
- 4324—Introduction to Topology (3).** Prerequisite: MATH 3310. Euclidian spaces; metric, open, and closed sets; neighborhood; topology; Euler characteristic; triangulation; orientability classification of surfaces.
- 4325—Mathematical Methods in Physical Sciences I (3).** Vectors and coordinate systems, vector and scalar fields, ordinary differential equations, boundary-value problems and partial differential equations. [PHYS 4325]
- 4326—Mathematical Methods in Physical Sciences II (3).** Calculus of variations, an introduction to complex analysis, special functions, integral transforms. [PHYS 4326]
- 4330—Mathematical Computing (3).** Prerequisite: MATH 2360 and MATH 3430 (or other suitable programming course with the permission of the department). Topics from computational mathematics and data science. Designated primarily for mathematics majors, general science majors, or students enrolled in a secondary mathematics teacher program.
- 4331—Advanced Geometry (3).** Prerequisite: MATH 2450 and MATH 3310 or consent of department. Euclidean and non-Euclidean geometries.
- 4342—Mathematical Statistics I (3).** Prerequisite: MATH 2450. Frequency functions, moments, probability, correlation and regression, testing hypotheses, small sample distributions, analysis of variance, nonparametric methods, sequential analysis. MATH 3342 and 4342 cannot both be counted toward a mathematics major or minor.
- 4343—Mathematical Statistics II (3).** Prerequisite: MATH 4342 or consent of department. Frequency functions, moments, probability, correlation and regression, testing hypotheses, small sample distributions, analysis of variance, nonparametric methods, sequential analysis.
- 4350—Advanced Calculus I (3).** Prerequisite: MATH 2450, MATH 2360, and MATH 3310 or consent of department. Sets, functions, vector fields, partial derivatives, power series, theory of integration, line, surface, and multiple integrals. (CL)
- 4351—Advanced Calculus II (3).** Prerequisite: MATH 4350 or consent of department. Sets, functions, vector fields, partial derivatives, power series, theory of integration, line, surface, and multiple integrals.
- 4354—Differential Equations II (3).** Prerequisite: MATH 3350 or MATH 3354, or consent of department. Partial differential equations and boundary value problems. MATH 4354 and MATH 3351 may not both be counted toward a mathematics major or minor.
- 4356—Elementary Functions of Complex Variables (3).** Prerequisite: MATH 4350 (concurrent) or consent of department. The complex number system, functions of a complex variable, differentiation, elementary functions, and contour integration.
- 4360—Foundations of Algebra II (3).** Prerequisite: MATH 3360 or consent of department. Continuation of MATH 3360. Rings, fields, and applications.
- 4362—Theory of Numbers (3).** Prerequisite: MATH 3310 or consent of department. Prime numbers, congruences, theorems of Fermat, Euler, and Wilson, residues, reciprocity law, Diophantine Equations.
- 4363—Introduction to Combinatorics (3).** Prerequisite: MATH 3310. Basic counting techniques, pigeonhole principle, partitions, permutations, recurrence relations, coloring problems.
- 4370—Elementary Problem Solving (3).** Prerequisite: MATH 3370 or MATH 3371, or consent of department. Techniques of problem solving using elementary number theory.
- 4371—Basic Computer Literacy and Programming (3).** Prerequisite: MATH 3372 and MATH 4370 or consent of department. Computer literacy, structured programming, and problem solving using modern mathematical computing technology. (For students seeking elementary school certification as mathematics specialists).

Department of Philosophy

Joel Velasco, Ph.D., Chairperson

Professors: Curzer, Nathan, Ribeiro

Associate Professors: Di Poppa, Flowerree, Hom, Schwartz, Velasco

Assistant Professors: Boylan, Gottlieb

Assistant Professor of Practice: Amdur

Lecturer: Westfall

CONTACT INFORMATION: 251 Humanities Building
Box 43092 | Lubbock, TX 79409-3092 | T 806.742.3275 | F 806.742.0730

About the Department

This department supervises the following degree programs and certificate:

- Bachelor of Arts in Philosophy
- Master of Arts in Philosophy
- Graduate Certificate in Ethics

The department also participates in the humanities minor in the Honors College; the fine arts doctoral program in the College of Visual & Performing Arts; a minor in women's and gender studies; and minors in European studies, environmental studies, religion studies, Asian studies, cognitive science, and linguistics in the College of Arts & Sciences.

Graduate Programs

For information on graduate programs offered by the Department of Philosophy, visit the Graduate Programs section on page 226.

Undergraduate Program

Education in philosophy develops the ability to think critically, increases understanding of normative issues, provides a unique interdisciplinary perspective on the place of human beings in the universe, gives opportunities for critically examining methods of inquiry, yields a grasp of the development of human ideas in a cross-cultural perspective, and increases one's ability to understand and communicate with others effectively. Philosophy majors may qualify for graduate work in philosophy in preparation for college or university teaching careers, but a major in philosophy is also recognized by many professional schools and employers as fine preparation because students of philosophy are able to think for themselves in a critical and objective manner.

Evidence that a philosophy education has broad application to various fields can be seen in the remarkable performance of majors on graduate and professional school admission examinations and in their high rate of admission to professional schools. Over recent years, they have scored higher on average than business majors on admissions tests to business schools (GMAT), higher than any other humanities or social science areas on the graduate record examinations (GRE), and third out of 30 disciplines on the law school admission test (LSAT). Additionally, philosophy majors have been more likely than almost any other major to gain admission to medical schools. No other undergraduate discipline can match such a record of achievement across the entire range of professional and graduate schools.

The Department of Philosophy brings distinguished guest speakers to campus for public lectures, classroom discussions, and visits with philosophy majors and graduate students. These visits provide a unique chance to talk informally about philosophical topics with world famous scholars.

Ethics Concentration. Philosophy majors may pursue a concentration in ethics by completing five Philosophy courses that focus on ethics. PHIL 2320, which is required for the major, is one of the five. The remaining Philosophy courses may be drawn from PHIL 3320, 3321, 3322, 3325, 3332, 4320, 4321, 4322, and any other Philosophy courses with topics that cover an aspect of ethics.

Philosophy, B.A.

Students majoring in philosophy must complete 30 hours in philosophy, including PHIL 2310, PHIL 2320, PHIL 3301, either PHIL 3303 or PHIL 3305, and one course from PHIL 4330, PHIL 4331, PHIL 4335, or PHIL 4340. Twenty-four hours must be at the 3000 or 4000 level. Minors are required to complete 18 hours in philosophy, at least 6 of which must be at the 3000 or 4000 level. For transfer students, at least 9 hours of the major or 6 hours of the minor must be completed in residency at Texas Tech. Philosophy students must receive at least a C in any philosophy course for it to satisfy major or minor requirements. Many students combine a philosophy major with a second major.

Communication Literacy Requirement. Philosophy majors must complete 6 hours of Communication Literacy courses. Communication Literacy courses for the B.A. in Philosophy are PHIL 3301, 3303, 3305, 4000, and 4341.

Philosophy, Undergraduate Minor

A minor in philosophy requires the completion of 18 hours in philosophy, 6 of which must be at the 3000 or 4000 level.

For transfer students, at least 9 hours of the major or 6 hours of the minor must be completed in residency at Texas Tech. Philosophy students must receive at least a C in any philosophy course for it to fulfill major or minor requirements.

Undergraduate Course Descriptions

Philosophy (PHIL)

- 1310—Critical Reasoning (3).** Study of good reasoning for use in both scholarly and everyday life. Topics will include principles of deductive and inductive reasoning and fallacies in reasoning.
- 2300—Beginning Philosophy (3).** [PHIL1301] An introduction to philosophical thinkers, ideas, and methods. Fulfills core Language, Philosophy, and Culture requirement.
- 2310—Logic (3).** [PHIL2303] Development of formal methods for evaluating deductive reasoning. Additional topics may include uses of language, definition, nondeductive inference. Partially fulfills core Mathematics requirement (in conjunction with a mathematics course).
- 2320—Introduction to Ethics (3).** [PHIL2306] Discussion of moral problems and theories of morality. Includes the application of philosophical techniques to issues of contemporary moral concern. Fulfills core Language, Philosophy, and Culture requirement.
- 2322—Business Ethics (3).** Discusses ethical theories as they relate to business practices. Concentrates on applications to concrete issues arising in the conduct of business. Fulfills core Language, Philosophy, and Culture requirement.
- 2330—Science and Society (3).** An exploration of the nature of science and how it does and should relate to other areas like religion, ethics, and politics. Fulfills core Language, Philosophy, and Culture requirement.
- 2340—Meaning and Value in the Arts (3).** Introduction to philosophical questions raised across the arts, including such topics as the nature of art, ways of interpreting and evaluating works of art, and the difference between popular art and high art. Fulfills core Creative Arts requirement.
- 2350—World Religions and Philosophy (3).** [PHIL1304] Philosophical study of the doctrines and practices of the major world religions, including Hinduism, Buddhism, Christianity, Judaism, and Islam. Fulfills core Language, Philosophy, and Culture requirements.
- 3300—Selected Topics in Philosophy (3).** Topic varies by semester.
- 3301—Classical Greek Philosophy (3).** Study of the major philosophical ideas as originally developed in the Western world by thinkers such as Socrates, Plato, Aristotle, and others. (CL)
- 3302—Asian Philosophy (3).** Study of the major philosophical ideas originating in India and China, and developed generally in Asia.
- 3303—Modern European Philosophy (1600-1800) (3).** Study of the major philosophical ideas as they developed in Great Britain and on the European continent since the Renaissance, covering such figures as Descartes, Hume, and Kant. (CL)
- 3304—Existentialism and Phenomenology (3).** Consideration of the meaning of human existence through study of thinkers such as Nietzsche, Heidegger, Husserl, Merleau-Ponty, Sartre, and others.
- 3305—Modern Political Thought (1600-1800) (3).** An overview of some of the debates in political theory in the Early Modern period (roughly

Philosophy, B.A. Sample Curriculum

FIRST YEAR

Fall

- ☐ PHIL 2320 - Introduction to Ethics (3 SCH)
(Also fulfills 3 hours of the core curriculum Language, Philosophy, and Culture requirement.)
- ☐ ENGL 1301 - Essentials of College Rhetoric (3 SCH)
- ☐ POLS 1301 - American Government (3 SCH)
- ☐ Social & Behavioral Sciences (3 SCH)*
- ☐ Creative Arts (3 SCH) (PHIL 2340 recommended)*

TOTAL: 15

Spring

- ☐ PHIL 2310 - Logic (3 SCH)
(Also fulfills 3 hours of the core curriculum Mathematics requirement.)
- ☐ ENGL 1302 - Advanced College Rhetoric (3 SCH)
- ☐ American History (3 SCH)*
- ☐ Oral Communication (3 SCH)*
- ☐ Social & Behavioral Sciences (3 SCH)*

TOTAL: 15

SECOND YEAR

Fall

- ☐ PHIL Elective (3 SCH)
- ☐ ENGL 2000-Level Literature (3 SCH)
- ☐ Foreign Language (2000 level) (3 SCH)
- ☐ Life and Physical Sciences (4 SCH)*
- ☐ Elective (3 SCH)

TOTAL: 16

Spring

- ☐ PHIL Elective (3 SCH)
- ☐ ENGL 2000 Level (3 SCH)
- ☐ Foreign Language (2000 Level) (3 SCH)
- ☐ Life and Physical Sciences (4 SCH)*
- ☐ Elective (1 SCH)

TOTAL: 14

THIRD YEAR

Fall

- ☐ PHIL 3301 - Classical Greek Philosophy (3 SCH)
- ☐ PHIL Junior/Senior Elective (3 SCH)
- ☐ Minor Elective (3 SCH)
- ☐ American History (3 SCH)*
- ☐ Creative Arts (3 SCH)*

TOTAL: 15

Spring

- ☐ PHIL Junior/Senior Elective (3 SCH)
- ☐ Minor Elective (3 SCH)
- ☐ POLS 2306 - Texas Politics and Topics (3 SCH)
- ☐ Math (3 SCH)*
- ☐ PHIL 3303 - Modern European Philosophy (1600-1800) (3 SCH) **OR**
- ☐ PHIL 3305 - Modern Political Thought (1600-1800) (3 SCH)

TOTAL: 15

FOURTH YEAR

Fall

- ☐ Minor Elective (3 SCH)
- ☐ Minor Elective (3 SCH)
- ☐ Elective (3 SCH)
- ☐ Elective (3 SCH)
- ☐ Personal Fitness and Wellness (1 SCH)
- ☐ Choose one:
 - ☐ PHIL 4330 - Epistemology (3 SCH)
 - ☐ PHIL 4331 - Philosophy of Language (3 SCH)
 - ☐ PHIL 4335 - Philosophy of Mind (3 SCH)
 - ☐ PHIL 4340 - Metaphysics (3 SCH)

TOTAL: 16

Spring

- ☐ PHIL Junior/Senior Elective (3 SCH)
- ☐ Minor Elective (3 SCH)
- ☐ Minor Elective (3 SCH)
- ☐ Elective (3 SCH)
- ☐ Personal Fitness and Wellness (1 SCH)
- ☐ Elective (1 SCH)

TOTAL: 14

TOTAL HOURS: 120

* Choose from the university's core curriculum.

Foreign Language: A student must complete 6 hours at the sophomore level or above in a single language. The prerequisite for all sophomore language courses is credit for the first-year level. This credit can be determined through a credit by examination. The exam score will determine if the student is placed in a second-year course, a 5-hour review course, or the first or second semester of a beginning (first-year) language course. See Arts & Sciences General Degree Requirements for further explanation.

1600-1800). Readings include Hobbes, Spinoza, Locke, Wollstonecraft, and others. (CL)

3311—Social Epistemology: Conspiracy Theories, Disinformation, and the Attention Economy (3). Focuses on social epistemic pathologies: misplaced trust and doubt, fake news, conspiracy theories, and misinformation in the context of social media and the attention economy.

3320—Introduction to Political Philosophy (3). Basic issues and concepts in political philosophy, including discussion of such topics as justice, freedom, equality, authority, community, and the nature of politics and the state.

3321—Philosophy of Law (3). Discussion, based on study of philosophical writings, of various conceptions of law and their relation to morality. Includes philosophical problems about liberty, privacy, justice, and criminal punishment.

3322—Biomedical Ethics (3). Discussion of conceptual and moral problems surrounding such issues as abortion, euthanasia, genetic research, behavior control, allocation of medical resources, health, and disease.

3324—Philosophy of Religion (3). An examination of general philosophical problems that arise in connection with religion. Topics may include the nature of religion, the existence of God, the problem of evil, the relation between faith and reason, and the relation between religion and morality.

3325—Environmental Ethics (3). Discussion of conceptual and moral questions surrounding human population and consumption of resources, loss of biodiversity and wilderness areas, and human use of nonhuman animals.

3330—Philosophy of Science (3). Inquiry into the nature of science including the examination of basic scientific concepts and the forms of scientific reasoning.

3332—Feminist Philosophy (3). Examines philosophical issues in feminist thought. Topics may include oppression, sexual difference, the intersection between multiple identities, sex and sexuality, aesthetics, epistemology, and ethical theories. [WGS 3332]

3334—Philosophy of Biology (3). Study of the nature and scope of biological theories. Topics may include evolution and creation, natural selection and design, sociobiology, or genetic engineering.

3335—Philosophy of Cognitive Science (3). Examines foundational questions within cognitive science, looking at concepts, language, perception, emotion, belief, representation, memory, and consciousness.

3340—Minds, Brains, and Computers (3). Study of the nature of mental entities and how they fit into the causal structure of the world, with particular reference to recent developments in the cognitive sciences.

3341—Philosophy and Literature (3). Discusses philosophical questions raised by literature, including such topics as the nature of literature, theories of interpretation and evaluation of literary works, and an evaluation of whether literary works convey unique knowledge.

3342—Philosophy and Film (3). Philosophical examination of issues raised by film, such as cinematic representation, realism, film genre, the power of cinema, and the interpretation of film. Required screenings.

- 4000—Philosophical Problems (V1-3).** Prerequisites: Previous philosophy coursework and instructor consent. Directed individual studies or conferences on selected advanced topics. May be repeated for a total of 9 hours. (CL)
- 4125—Introduction to Research Ethics (1).** Introduction to research ethics for future researchers. Frameworks of moral reasoning and their application to moral problems through a discussion of case studies.
- 4300—Topics in Philosophy (3).** Topic varies by semester.
- 4301—Seminar in Ancient Philosophy (3).** Prerequisite: Previous philosophy coursework or consent of instructor. In-depth study of one or two philosophical texts or themes from the ancient world. Topics vary.
- 4310—Advanced Logic (3).** Prerequisite: PHIL 2310 or consent of instructor. Full treatment of sentential logic and first-order predicate logic. May also treat topics such as identity, definite descriptions, axiomatic systems, completeness.
- 4320—Ethics (3).** Prerequisite: PHIL 2320 or instructor consent. Philosophical ethics investigates how we ought to live. Students will examine closely some of the most powerful thinkers on this subject.
- 4321—Political Philosophy (3).** Prerequisite: Previous coursework in philosophy or consent of instructor. Study of contemporary writings in political philosophy. Discussion of selected philosophical issues concerning liberalism, conservatism, communitarianism, liberal neutrality, social choice theory, and political obligation.
- 4322—Metaethics (3).** Prerequisite: PHIL 2320 or instructor consent. The study of the meaning and justification of moral judgments, the possibility of ethical knowledge, and the nature or moral standards.
- 4323—Aesthetics (3).** Prerequisite: Previous coursework in philosophy or consent of instructor. Discussion of the nature of art and the principles of aesthetic judgment. Emphasis on philosophical problems arising in interpretation and evaluation within the arts.
- 4330—Epistemology (3).** Prerequisite: Previous coursework in philosophy or consent of instructor. An examination of the nature and scope of knowledge, and the justification of various types of knowledge claims.
- 4331—Philosophy of Language (3).** Prerequisite: Previous coursework in philosophy or consent of instructor. General theory of significance, meaning, and interpretation.
- 4335—Philosophy of Mind (3).** Prerequisite: Previous coursework in philosophy or consent of instructor. Topics in the philosophy of mind including the nature of the mental, the mind-body problem, the problems of consciousness, and the problems of intentionality.
- 4340—Metaphysics (3).** Prerequisite: Previous coursework in philosophy or consent of instructor. Consideration of the nature of what there is (ontology) or of the nature of the universe as a whole (cosmology).
- 4341—Great Figures in Philosophy (3).** Prerequisite: Previous coursework in philosophy or consent of instructor. In-depth study of the works of just one or two great philosophers. (CL)

Department of Physics and Astronomy

Sung-Won Lee, Ph.D., Chairperson

President's Distinguished Chair: Duncan

Professors: Akchurin, Huang, Lee, Maccarone, Sanati, Thacker

Associate Professors: Gibson, Volobouev

Assistant Professors: Aydi, Chatzakis, DeGottardi, Eo, Fausnaugh, Feng, Järvelä, M. Kim, Madrid, Pol

Associate Professor of Practice: Moussa

Assistant Professor of Practice: Antoniou

Research Professor: Lodhi

Lecturers: Damgov, Farooq, Tsai

Instructor: Lamp

Adjunct Faculty: Babkin, Bernussi, Blawdziewicz, Hussain, S. Kim, Kunori, Kupfer, Pal, Romano, Sill, Whitbeck

Joint Faculty: Quitevis

About the Department

This department supervises the following degree programs:

- Bachelor of Science in Physics
 - Astrophysics Concentration
 - Professional Physics Concentration
 - Quantum Science and Technology Concentration
- Master of Science in Physics
 - Course-Based Option
 - Exam-Based Option
 - Thesis Option
- Doctor of Philosophy in Physics

Graduate Programs

For information on graduate programs offered by the Department of Physics and Astronomy, visit the Graduate Programs section of the catalog on page 226.

Undergraduate Program

The Bachelor of Science in Physics degree can be taken in any of three areas of concentration and requires 120 hours of credit. These concentrations allow students to tailor their studies toward their particular career goals. Please refer to the sample course schedules in this section for details about each concentration. Physics majors should declare a concentration by the middle of their sophomore year.

Majors in this department are required to maintain a minimum institutional grade point average of 2.0 in physics courses and required adjunct courses and receive a C or better in each of these courses. Students also have a variety of university and College of Arts & Sciences requirements that must be met. Credit for any transferred physics hours will be handled on an individual basis with the department's academic advisor. Internal transfer students must have an institutional grade point average of at least 2.25 in order to declare the physics major.

Students are strongly encouraged to devote time to undergraduate research. Research areas in the department include condensed matter physics, nuclear physics, physics education, particle physics, astronomy, and biophysics. The Bachelor of Science in Physics curricula are designed around the assumption that physics students will minor in mathematics. However, a variety of other minors complement a major in physics.

Students are encouraged to participate in the Society of Physics Students, which sponsors several academic and social activities.

The Sigma Pi Sigma Chapter of Texas Tech University was chartered in 1954. Sigma Pi Sigma exists to honor outstanding scholarship in physics,

to encourage interest in physics among students at all levels, to promote an attitude of service, and to provide a fellowship of persons who have excelled in physics. Election is a lifelong membership and includes a one-year complimentary membership in the Society of Physics Students (SPS). Sigma Pi Sigma is an organization of the American Institute of Physics and the Association of College Honor Societies. Founded in 1921, there are more than 90,000 historical members.

Minors for Physics Majors. A broad variety of minor subjects may be elected by a student majoring in physics. These include, but are not limited to, mathematics, biochemistry, physical chemistry, geophysics, computer science, business, and electrical engineering. A frequent minor choice for physics majors is mathematics because most of the requirements are automatically satisfied by the sequence of math courses required for a physics major. Students contemplating minors outside the College of Arts & Sciences should seek the advice of the physics academic advisor before beginning that minor.

Communication Literacy Requirement. Communication Literacy courses for the physics major (all concentrations) are three courses from PHYS 2305, 3304, 3401, and 4306.

Physics, B.S.

The **astrophysics concentration** is a variation of the professional concentration and is intended for physics majors who have a particular interest in astronomy and astrophysics. In addition to preparing students for possible employment paths associated with the professional concentration, the astrophysics concentration will prepare students to pursue graduate study in astronomy or astrophysics. Students will take all courses in the 35-credit-hour physics core curriculum, which includes PHYS 1408, 2305, 2401, 3201, 3301, 3304, 3305, 3401, 4302, 4304, and 4307. Students in the astrophysics concentration will also take 14 credit hours of required astronomy and astrophysics courses, namely ASTR 1401, 2401, 4301, and 4302. Additionally, students in the astrophysics requirement must take nine hours of astrophysics electives, choosing from the following courses: ASTR 3300, ASTR 4305, PHYS 4312, PHYS 4350, and up to three credit hours of PHYS 3000 (the student's research topic must be astronomy or astrophysics).

The **professional concentration** provides a traditional curriculum for students majoring in physics and is intended to prepare them for graduate study or employment in the private or government sector as a physicist. Students will take all courses in the 35-credit-hour physics core curriculum, which includes PHYS 1408, 2305, 2401, 3201, 3301, 3304, 3305, 3401, 4302, 4304, and 4307. Students in the professional concentration are also required to take PHYS 3306, 4306, and 4308. Additionally, two physics elective courses are required in the professional concentration. Physics elective courses may include any PHYS or ASTR courses at the 3000- or 4000-level that are not already required for the professional concentration.

The **quantum science and technology (QST) concentration** is for physics majors with a particular interest in the field of quantum information, which includes the study of quantum computing and the physical systems used to realize it. This concentration will prepare students for a variety of career paths, from those that involve employment requiring only a bachelor's degree to those that involve pursuing a graduate degree. Students will take all courses in the 35-credit-hour physics core curriculum, which includes PHYS 1408, 2305, 2401, 3201, 3301, 3304, 3305, 3401, 4302, 4304, and 4307. Students in the quantum science and technology concentration will also take six credit hours of required QST courses, namely MATH 2360 and PHYS 4315. Additionally, students in the quantum science and technology concentration must take nine hours of QST electives, choosing from the following courses: PHYS 3306, 4308, 4309; ECE 4370, and up to three credit hours of PHYS 3000 (the student's research topic must be related to quantum science and technology).

The required mathematics courses for physics majors are MATH 1451, 1452, 2450, three hours of a first differential equations course (PHYS 4325; MATH 4325, 3350, or 3354), and three hours of a second differential equations course (PHYS 4326; MATH 4326, 3351, or 4354). PHYS 4325 and 4326 are the preferred differential equations courses for physics majors. Students planning to pursue an advanced degree in physics should consult the physics academic advisor about appropriate additional courses. Majors in this concentration are strongly encouraged to take MATH 2360 to complete the mathematics minor.

Undergraduate Minors

Astronomy

A minor in astronomy by students majoring in subjects other than physics requires 21 semester hours of physics and astronomy courses, at least 9 of which must be at the 3000 or higher level and which must be approved by the Department of Physics and Astronomy academic advisor. The recommended sequence is PHYS 1408, 2401, 3301/3201 with additional credits selected from among ASTR 2401, 3300, 4301, 4302, 4305; PHYS 4350; and undergraduate research (PHYS 3000) in astronomy. Under some circumstances, courses in engineering, geosciences or mathematics with significant astronomy content may be taken in place of the courses listed here.

Physics

A minor in physics by majors outside of physics requires 19 semester hours. The minor sequence is PHYS 1408, 2401, 3301/3201, plus 6 hours of approved 3000-level or above courses. Students must receive a grade of C or better in all courses applied toward a minor. Core astronomy courses (ASTR 1400 and 1401) may not be used to satisfy requirements for the physics minor.

Students are encouraged to participate in the Society of Physics Students, which sponsors several academic and social activities.

Undergraduate Course Descriptions

Astronomy (ASTR)

- 1100—Astronomy Laboratory Science (1).** Corequisite: Enrollment in a lab section of the appropriate astronomy course. For transfer students only. Provides lab credit for a transferred lecture-only Natural Sciences Core course in astronomy.
- 1400—Solar System Astronomy (4).** [PHYS1304, 1401+1101, 1403; ASTR1304+1104, 1401, 1404] Covers the sun, planets, moons, asteroids, comets, gravitation, and formation. (Honors section offered.) Partially fulfills core Life and Physical Sciences requirement.
- 1401—Stellar Astronomy (4).** [PHYS1303, 1303+1103, 1403; ASTR1303+1103, 1401, 1403] Covers stars, star formation, galaxies, and cosmology models. (Honors section offered.) Partially fulfills core Life and Physical Sciences requirement.
- 2401—Observational Astronomy (4).** Prerequisite: C or better in ASTR 1400 or ASTR 1401 or instructor consent. Designed for anyone interested in learning the use of an optical telescope, both visually and for imaging.
- 3300—Special Topics in Astrophysics (3).** Prerequisites: C- or better in ASTR 2401, PHYS 3301, and PHYS 4325 or MATH 3350 or MATH 3354. Topics in radio astronomy, X-ray astronomy, gravitational wave astronomy, compact objects, accretion, stellar explosions, and others. May be repeated in different areas.
- 4301—Astrophysics I (3).** Prerequisite: C or better in PHYS 3301. Introduction to the tools of astronomy, stellar properties, stellar structure, and stellar evolution.
- 4302—Astrophysics II (3).** Prerequisite: C or better in PHYS 3301. Structure, formation, and evolution of galaxies; cosmology.
- 4305—Radiative Processes in Astrophysics (3).** Prerequisite: C- or better in PHYS 3305. Prerequisite or corequisite: C- or better in PHYS 4307. A survey of the physical processes related to the production and propagation of radiation in astrophysical phenomena, including thermal and non-thermal radiation, and atomic transitions.

Physics (PHYS)

- 1100—Physics Laboratory Science (1).** Corequisite: Enrollment in a lab section of the appropriate physics course. For transfer students only. Provides lab credit for a transferred lecture-only Life and Physical Sciences core course in physics.
- 1401—Physics for Non-Science Majors (4).** [PHYS1305+1105, 1310+1110, 1405] Covers the basic laws and vocabulary of science using a minimum of mathematics. Partially fulfills core Life and Physical Sciences requirement.
- 1403—General Physics I (4).** [PHYS1301+1101; 1401] Prerequisite: C or better in MATH 1320, MATH 1550, MATH 1420, MATH 1451, or MATH 1321. Non-calculus introductory physics covering mechanics, heat, and sound, thus providing background for study in science-related areas. Partially fulfills core Life and Physical Sciences requirement.

- 1404—General Physics II (4).** [PHYS1302+1102; 1402] Prerequisite: C or better in PHYS 1403 or PHYS 1408. Non-calculus introductory physics covering electricity, magnetism, light, and modern physics, thus providing background for study in science-related areas. Partially fulfills core Life and Physical Sciences requirement.
- 1406—Physics of Sound and Music (4).** Sound and music, including waves, harmonics, musical instruments, voice, hearing, room acoustics, elementary music theory, classroom demonstrations, music performances, high school mathematics. Laboratory. Partially fulfills core Life and Physical Sciences requirement.
- 1408—Principles of Physics I (4).** [PHYS2325+2125, 2425] Prerequisite: C or better in MATH 1451. Calculus-based introductory physics covering mechanics, kinematics, energy, momentum, and thermodynamics. (Honors section offered) Partially fulfills core Life and Physical Sciences requirement.
- 2305—Computation for the Physical Sciences (3).** Prerequisites: C or better in PHYS 1408 and PHYS 2401. Introduces computational tools to solve science problems. Emphasizes interplay between technology application and practical learning. (CL)
- 2401—Principles of Physics II (4).** [PHYS2326+2126, 2426] Prerequisites: C or better in PHYS 1408 and MATH 1452. Calculus-based introductory physics covering electric and magnetic fields, electromagnetic waves, and optics. (Honors section offered) Partially fulfills core Life and Physical Sciences requirement.
- 3000—Undergraduate Research (V1-6).** Prerequisite: Permission of the instructor and the undergraduate advisor. Individual and/or group research projects in basic or applied physics, under the guidance of a faculty member.
- 3101—Legacy Modern Physics Lab (1).** Corequisite: PHYS 3301. Laboratory experiments designed to illustrate the basis of quantum physics.
- 3201—Modern Physics Lab and Data Analysis (2).** Corequisite: PHYS 3301. Laboratory experiments and accompanying lectures designed to illustrate the basis of quantum physics and proper techniques for data acquisition, analysis, and determination of uncertainties.
- 3301—Modern Physics (3).** Prerequisite: C or better in PHYS 1408 and MATH 2450. Corequisites: PHYS 3201 or PHYS 3101. Failure of classical physics in the microscopic realm, development and fundamentals of quantum theory, applications to atoms, molecules, solids, nuclei, and particles.
- 3302—Cosmophysics: The Universe as a Physics Lab (3).** Prerequisite: PHYS 3301. Deals with topics from astrophysics, cosmology, and cosmic ray physics of interest to all physicists.
- 3304—Intermediate Physics Laboratory (3).** Prerequisite: C or better in PHYS 3301 and PHYS 2305. Laboratory course on advanced physical principles. Experiments in atomic, molecular, solid state, and nuclear, and particle physics as well as relativity, electricity and magnetism including data acquisition and analyses. (CL)
- 3305—Electricity and Magnetism (3).** Prerequisite: C or better in PHYS 2401 and PHYS 4325, MATH 3350, or MATH 3354. Electrostatics, dielectric materials, Maxwell's equations, currents, and magnetostatics.
- 3306—Electricity and Magnetism (3).** Prerequisite: C or better in PHYS 3305 and PHYS 4325, MATH 3351, or MATH 4354. Magnetic properties of materials, electrodynamics, electromagnetic waves, waveguides and resonators, interaction with matter, AC circuits, radiation.
- 3400—Fundamentals of Physics (4).** Prerequisites: Education majors only; preference given to EC or HDFS; instructor approval. Teaches the fundamentals of physics and strategies for teaching these fundamentals. Not open to engineering, science, or mathematics majors.
- 3401—Optics (4).** Prerequisites: C or better in PHYS 3301 or PHYS 2402. Covers geometrical and physical optics, waves, reflection, scattering, polarization, interference, diffraction, modern optics, and optical instrumentation. (CL)
- 4000—Independent Study (V1-4).** Prerequisite: Approval of advisor. Study of advanced topics of current interest under direct supervision of a faculty member.
- 4301—Computational Physics (3).** Prerequisites: C or better in PHYS 1408, PHYS 2305, PHYS 2401, and PHYS 2402 or PHYS 3301. Numerical modeling of physical systems. Data acquisition and analysis. Graphics for displaying complex results. Quadrature schemes, solution of equations.
- 4302—Statistical and Thermal Physics (3).** Prerequisites: C or better in PHYS 3301 or PHYS 2402, and MATH 3350, MATH 3354, or PHYS 4325. Introduction to statistical methods in physics. Formulation of thermodynamics and statistical mechanics from a unified viewpoint with applications from classical and quantum physics.
- 4304—Mechanics (3).** Prerequisite: C or better in PHYS 1408 and PHYS 4325, MATH 3350, or MATH 3354, or department chair consent. Dynamics of particles and extended bodies, both rigid and fluid, using Newtonian mechanics and the Euler-Lagrange equations from Hamilton's principle. Nonlinear systems and chaos with numerical modeling. Applications of the Navier Stokes equation.
- 4306—Capstone Project (3).** Prerequisite: Senior standing in physics major. Research in a current topic in physics and astronomy with a faculty mentor culminating in an oral presentation and a written report. (CL)
- 4307—Quantum Mechanics I (3).** Prerequisite: C or better in PHYS 3301 or PHYS 2402, and MATH 3351, MATH 4354 or PHYS 4325. Introduction to fundamental concepts in quantum mechanics: probability, normalization, operators, solutions to Schrodinger equation for various potentials. Discussion of quantum mechanics in 3D, generalized uncertainty principle, angular momentum, and hydrogen atom.
- 4308—Quantum Mechanics II (3).** Prerequisite: C or better in PHYS 4307. Review of quantum mechanics, time-independent and dependent perturbation theory, variational principle, WKB approximation, the adiabatic approximation and scattering.
- 4309—Solid State Physics (3).** Prerequisites: C or better in PHYS 3305 and knowledge of elementary quantum mechanics. The structural, thermal, electric, and magnetic properties of crystalline solids. Free electron theory of metals. Concept of energy bands and elementary semiconductor physics.
- 4312—Nuclear and Particle Physics (3).** Prerequisite: C or better in PHYS 4307. Deals with modern nuclear physics covering such topics as nuclear structure models, radioactivity, nuclear reactions, elementary particles, nuclear conservation, forces, and symmetry.
- 4315—Introduction to Quantum Computing (3).** Prerequisite: Permission of instructor. Covers two-level quantum systems, qubits, quantum gates and circuits, measurement, entanglement, Bell's Theorem, no-cloning theorem, quantum parallelism, quantum teleportation, quantum algorithms.
- 4325—Mathematical Methods in Physical Sciences I (3).** Prerequisite: C or better in MATH 2450. Vectors and coordinate systems, vector and scalar fields, ordinary differential equations, boundary-value problems and partial differential equations. [MATH 4325]
- 4326—Mathematical Methods in Physical Sciences II (3).** Prerequisite: C or better in PHYS 4325. Calculus of variations, an introduction to complex analysis special functions, integral transforms. [MATH 4326]
- 4350—Relativity (3).** Prerequisite: C- or better in PHYS 3305. Prerequisite or corequisite: C- or better in PHYS 4304. Introduction to spacetime, differential geometry, special and general relativity; with applications to black holes, cosmology, and gravitational waves.

**Physics, B.S. (Astrophysics
Concentration) Sample Curriculum****FIRST YEAR****Fall**

- ☐ MATH 1451 - Calculus I with Applications (4 SCH)

- ☐ ENGL 2000 Level (3 SCH)
- ☐ Elective (1 SCH)

TOTAL: 13

TOTAL HOURS: 120

Astrophysics concentration students are strongly encouraged to minor in mathematics, as assumed in the curriculum above.

**Choose from the university's core curriculum.*

Foreign Language: A student must complete 3 hours at the sophomore level or above in a single language. The prerequisite for all sophomore language courses is proficiency at the freshman level. This proficiency can be determined through credit or by examination. The score attained on the exam will determine whether the student is placed in a second-year course, a 5-hour review course, or in some cases the first or second semester of a beginning (first-year) language course. See Arts & Sciences General Degree Requirements for further explanation.

Department of Political Science

Toby Rider, Ph.D., Chairperson

Horn Distinguished Professor and Endowed Professor in Public Policy and Public Law: Hayhoe

Tullock Professor of Political Economy: Grier

Professors: Khan, Kwon, Lektzian, Patterson, Rider, Thames

Associate Professors: Bak, Chen, Lee, McKenzie, Nokken, Scheller, Sievert

Assistant Professors: Banerjee, Coll, Gallagher, Harman, Hung, Kim, Kopp, Lamb, McCrea, Muñoz, Petrova, Wehde

CONTACT INFORMATION: 113 Holden Hall

Box 41015 | Lubbock, TX 79409-1015 | T 806.742.3121 | F 806.742.0850

www.depts.ttu.edu/politicalscience

About the Department

This department supervises the following degree programs and certificate:

- Bachelor of Arts in Political Science
- Bachelor of Arts in Global Studies
- Master of Arts in Political Science
- Master of Public Administration
- Doctor of Philosophy in Political Science
- Graduate Certificate in Strategic Studies

Dual Degree Program

- Master of Public Administration / Doctor of Jurisprudence

The department also participates in the Bachelor of Arts in Languages and Cultures with a concentration in Russian Language and Area Studies; a minor in women's and gender studies; Honors College programs; and Arts & Sciences minors in community and urban studies, international studies, ethnic studies, and Asian studies.

Graduate Programs

For information on graduate programs offered by the Department of Political Science, visit the Graduate Programs section on page 228.

Undergraduate Program

The political science curriculum is designed to provide students with a solid foundation and broad understanding of the discipline of political science and to allow them to specialize in areas of substantive interest. Political science provides excellent instruction for students interested in politics, law, journalism, teaching, or civil service. Insight into political values, domestic policy issues, and foreign policy is invaluable for students interested in such careers and for business careers.

Students seeking an undergraduate degree in political science must complete 36 hours of coursework within the department. Political science majors are required to take POLS 1301, 2306, 2361, 2371, 3314, and 21 additional hours of upper-level POLS courses (must include 9 hours of communication literacy courses).

Under state law, all students who receive bachelor's degrees from Texas Tech must have received credit for 6 semester hours in political science, covering the federal and Texas constitutions. Students will normally fulfill this requirement by completing POLS 1301, which is a prerequisite for all upper-division political science courses, and POLS 2306.

Requirements and Prerequisites. POLS 1301 is a prerequisite for all upper-division political science courses. A student must receive at least a C in POLS 1301 and POLS 2306 and all courses in political science that apply to major, minor, or teaching field requirements.

Communication Literacy Requirement. Students majoring in political science are expected to develop proficiency in written, oral, and graphical/mathematical communication. To satisfy this requirement, all majors are required to take three 3-hour courses (9 hours) of communication literacy

courses in the department. The three courses that satisfy this requirement are POLS 3314, POLS 3300 or POLS 3303 (not both), POLS 3301 or POLS 3302 (not both).

Selected Topics Courses. Multiple sections of POLS 3300, POLS 3301, POLS 3302, and POLS 3303 are offered each semester with varying topics of contemporary interest. These courses are repeatable for credit up to four times each (totaling 12 hours). To apply to a student's major or minor, these courses must each cover different topics, as indicated by the course title found online each semester. Additionally, for students to grade replace either course, the topics must be the same.

Political Science, B.A.

The Department of Political Science offers four concentrations for students: American Politics, Comparative Politics, International Relations, or Policy and Public Administration. Students who do not choose to have a concentration will receive a general B.A. in Political Science.

Concentrations

American Politics. Students seeking the notation "American Politics Concentration" on their transcripts must take four 3-hour courses (12 hours) with a grade of C or better from the following courses: POLS 3300, 3317, 3318, 3319, 3323, 3325, 3327, 3351, 3352, 3353.

Comparative Politics. Students seeking the notation "Comparative Politics Concentration" on their transcripts must take four 3-hour courses (12 hours) with a grade of C or better from the following courses: POLS 3302, 3364, 3372, 3373, 3375, 3376.

International Relations. Students seeking the notation "International Relations Concentration" on their transcripts must take four 3-hour courses (12 hours) with a grade of C or better from the following courses: POLS 3301, 3360, 3363, 3365, 3366, 3367, 3368.

Policy and Public Administration. Students seeking the notation "Policy & Public Administration Concentration" on their transcripts must take four 3-hour courses (12 hours) with a grade of C or better from the following courses: POLS 3303, 3328, 3334; PUAD 3329, 3340, 3352.

A minimum of 9 upper-level Political Science hours must be taken in residence at Texas Tech University.

Undergraduate Minors

Political Science

The requirement for a minor in political science is six 3-hour courses (18 hours), including POLS 1301 and POLS 2306. Political science minors are also required to take either POLS 2361 or POLS 2371 plus 9 hours of upper-level POLS courses. A minimum of 6 upper-level Political Science hours must be taken in residence at Texas Tech University.

Public Administration

The minor in public administration trains students to supplement their current major with directed and specific training in public service, public policy, and public administration so they can pursue a career in government, the public sector, or nonprofit management upon graduation or continue their studies/training in a Master of Public Administration program. The minor in public administration provides a diverse set of courses to provide students with a well-rounded education in the various aspects of public and nonprofit administration.

- Required (2 courses) POLS 1301 OR 2306; PUAD 3340
- PUAD Electives (choose 3): PUAD 3329, 3335, 3342, 3347, 3348, 3352
- POLS Elective (choose 1 POLS 3303 topic): POLS 3303

Political Science, B.A. / M.A.

The accelerated B.A. / M.A. program is designed to provide an opportunity for qualified undergraduate political science majors to take graduate classes during their senior year. Nine credit hours earned from three core graduate courses (POLS 5381, POLS 5382, and POLS 5383) will count toward both graduate and undergraduate degree requirements, shortening the time to complete both B.A. and M.A. degrees. Applicants to the B.A. / M.A. program must meet certain requirements prior to entry into the program.

First, B.A. / M.A. applicants must have a 3.5 GPA or higher in order to be considered for the program. Second, B.A. / M.A. applicants need to complete POLS 3314 prior to entering the program. Finally, B.A. / M.A. applicants should submit completed applications at least two months prior to beginning their senior year of undergraduate work.

Undergraduate Course Descriptions

Political Science (POLS)

- 1301—American Government (3).** [GOVT2305] Origin and development of the U.S. Constitution, structure and powers of the national government, political participation, the election process, policy, civil liberties, and civil rights. Partially fulfills core Government/Political Science requirement.
- 1347—Introduction to Political Science (3).** An introductory survey of the discipline of political science focusing on the subfields, key concepts, methods, and theories used in the study of politics.
- 2107—Federal and Texas Constitutions (1).** Prerequisite: Consent of instructor. A study of the United States and state constitutions with emphasis on Texas. Ensures compliance with TEC 51.301.
- 2306—Texas Politics and Topics (3).** [GOVT2306] Structure and powers of all state and local government, federalism, political process, culture, and policy in Texas and other topics in political science. Partially fulfills core Government/Political Science requirement.
- 2361—International Politics (3).** Introduction to global issues, actions, and processes: north-south relations, post-cold war issues, the role of the state, and leading theories of international relations.
- 2371—Comparative Politics (3).** The primary institutions (e.g., parties, groups, executives, legislatures) and processes (e.g., voting, instability) of politics as well as relevant social structures are viewed in various national settings. Questions of how and why to compare also are considered.
- 3101—Careers in Politics and Policy (1).** Helps students identify career opportunities related to political science training in substance and/or skills, and highlight political science training in career applications.
- 3300—Selected Topics in American Politics (3).** Prerequisite: POLS 1301. Topics of contemporary interest in American politics. Repeatable up to 12 hours with different topics. To grade replace, topics must be identical. (CL)
- 3301—Selected Topics in International Relations (3).** Prerequisite: POLS 1301. Varying global and international topics of current interest. Consult department for current topic. Repeatable for up to 12 hours with different topics. Note that to grade replace this course, the topics must be the same. (CL)
- 3302—Selected Topics in Comparative Politics (3).** Prerequisite: POLS 1301. Topics of contemporary interest in comparative politics. Repeatable up to 12 hours with different topics. To grade replace, topics must be identical. (CL)
- 3303—Selected Topics in Policy and Public Administration (3).** Prerequisite: POLS 1301. Topics of contemporary interest in policy/public administration. Repeatable up to 12 hours with different topics. To grade replace, topics must be identical. (CL)
- 3312—Game Theory (3).** Prerequisite: POLS 1301. Introduces students to positive political theory through games of strategy so students can discuss the problems of contemporary democracy and international relations.
- 3314—Introduction to Political Analysis (3).** Prerequisite: POLS 1301. Survey of methods of and approaches to the study of politics and their underlying assumptions as they apply to the major concepts of the discipline. (CL)
- 3316—Public Choice (3).** Using the theoretical lens of economic analysis to examine the behavior of voters, politicians, bureaucrats, and interest groups under various institutional arrangements.
- 3317—Campaigns and Elections (3).** Prerequisite: POLS 1301. Examines what candidates and campaigns think and do to attract the support of voters.
- 3318—Public Opinion (3).** Prerequisite: POLS 1301. Examines the origins, stability, and meaning of public opinion.
- 3319—Political Behavior (3).** Examines the actions of political citizens as they interact with the political world through voting, joining political parties, and consuming mass media.
- 3323—Congress (3).** Prerequisite: POLS 1301. Legislation, congressional elections, legislative parties and leaders, rules and procedures, committees, roll call voting, and executive-legislative relations.
- 3325—Political Parties (3).** Prerequisite: POLS 1301. Party history, functions, organization, finance, nominations, campaign methods, and elections.

- 3326—Gender and Politics (3).** Prerequisite: POLS 1301. A study of female political participation in the United States, including voting, campaign activity, interest group activity, and office holding. [WGS 3326]
- 3327—The American Presidency (3).** Prerequisite: POLS 1301. The presidency, its constitutional basis, structure, powers, functions, and responsibilities.
- 3328—Energy Politics and Policy (3).** Students will learn traditional and untraditional energy-related politics and law and the challenges associated with energy resource development in the United States and foreign countries.
- 3334—Sustainability: Energy, Environment, and Society (3).** Students will learn the key concepts of sustainability and the challenges with energy resource management, climate change, and environmentalism in developed and developing countries.
- 3351—The Judicial Process (3).** Prerequisite: POLS 1301. Analysis of the judicial process as part of the political process; judicial personnel and organization; sources and instruments of judicial power; judicial reasoning and behavior; and impact of judicial activity.
- 3352—Constitutional Law (3).** Prerequisite: POLS 1301. A case study of American constitutional law emphasizing constitutional bases of governmental power. Leading cases demonstrating the principles of separation of powers, judicial review, taxation, commerce, and implied powers.
- 3353—Civil Rights and Liberties (3).** Prerequisite: POLS 1301. Primarily a case study of American constitutional law emphasizing the constitutional limitations on government, with particular emphasis on personal, civil, and political liberties. The administrative process with particular emphasis on public law relating to the powers and procedures of administrative agencies having powers of adjudication and rule making.
- 3355—Controversial Legal Issues (3).** Basic concepts in critical thinking as demonstrated in legal reasoning and analysis of controversial legal issues, and analysis of public opinion on those issues.
- 3360—United States Foreign Policy (3).** Prerequisite: POLS 1301. Examines the patterns and processes that shape U.S. foreign policy.
- 3363—International Organization (3).** Prerequisite: POLS 1301. A comparative study of the major organizations of the League of Nations and the United Nations; approaches to peaceful settlement of disputes, collective security, disarmament, regional organizations, and the future of world order.
- 3364—Comparative Foreign Policy (3).** Prerequisite: POLS 1301. Surveys theories that connect domestic politics with foreign policy and applies them to a variety of countries.
- 3365—War and Security (3).** Prerequisite: POLS 1301. Considers the basic problem in international relations; how to survive. How do countries attempt to secure themselves against foreign threats?
- 3366—International Political Economy (3).** Prerequisite: POLS 1301. Explores interaction of politics and economics in trade, investment, finance, and development.
- 3367—International Bargaining and Security (3).** Examines the actors, processes, and strategies of international bargaining and negotiation in multilateral agreements and organizations with an emphasis on the security dilemma.
- 3368—Transnational Issues (3).** Prerequisite: POLS 1301. Survey of current politics of human rights, migration, environment, and technological change.
- 3372—Post-Communist Politics (3).** Prerequisite: POLS 1301. Examination of the politics and governments of post-Communist states.
- 3373—Governments of Western Europe (3).** Prerequisite: POLS 1301. Political culture, party systems, institutions, and behavior in selected countries of Western Europe. Primary attention paid to France, Germany, and Italy. Comparison between European and American political systems will be emphasized.
- 3375—Latin American Politics (3).** Prerequisite: POLS 1301. The government and politics of countries such as Argentina, Bolivia, Brazil, Chile, and Peru. Includes consideration of special problems such as land tenure and terrorism.
- 3376—Asian Governments and Politics (3).** Prerequisite: POLS 1301. Political culture, party systems, political structure, policy-making, and foreign policy in selected Asian countries. Primary attention focused on Japan, China, and South Korea.
- 4000—Active Learning in Political Science (VI-3).** Prerequisites: POLS 1301 and consent of instructor. Encompasses various forms of participatory learning, including internships and service learning. May be repeated for credit.
- 4001—Practicum in Politics: Public Service Systems and Policies (VI-3).** Supervised internship with government offices and agencies, including primarily congressional and legislative offices in Washington, D.C.;

Political Science, B.A. Sample Curriculum

FIRST YEAR

Fall

- ☐ POLS 1301 - American Government (3 SCH)
- ☐ ENGL 1301 - Essentials of College Rhetoric (3 SCH)
- ☐ HIST 2300 - History of the United States to 1877 (3 SCH)
- ☐ PHIL 2310 - Logic (3 SCH) **OR**
- ☐ Math (3 SCH)*
- ☐ RRP 1100 - RaiderReady: First Year Seminar (1 SCH)

TOTAL: 13

Spring

- ☐ POLS 2306 - Texas Politics and Topics (3 SCH)
- ☐ ENGL 1302 - Advanced College Rhetoric (3 SCH)
- ☐ HIST 2301 - History of the United States since 1877 (3 SCH)
- ☐ PHIL 2310 - Logic (3 SCH) **OR**
- ☐ MATH (3 SCH)*
- ☐ Language, Philosophy, & Culture (3 SCH)*

TOTAL: 15

SECOND YEAR

Fall

- ☐ POLS 2371 - Comparative Politics (3 SCH)
- ☐ Foreign Language (2000 level) (3 SCH)
- ☐ ENGL 2000-level Literature (3 SCH)
- ☐ Creative Arts (3 SCH)*
- ☐ Personal Fitness and Wellness (1 SCH)
- ☐ POLS Jr./Sr. Elective (3 SCH)

TOTAL: 16

Spring

- ☐ POLS 2107 - Federal and Texas Constitutions (1 SCH)
- ☐ POLS 2361 - International Politics (3 SCH)
- ☐ Foreign Language (2000 level) (3 SCH)
- ☐ ENGL 2000-level Literature (3 SCH)
- ☐ Life and Physical Sciences (4 SCH)*
- ☐ Personal Fitness and Wellness (1 SCH)

TOTAL: 15

THIRD YEAR

Fall

- ☐ POLS Communication Literacy Course (3 SCH)
- ☐ Oral Communication (3 SCH)*
- ☐ Life and Physical Sciences (4 SCH)*
- ☐ Social and Behavioral Sciences (3 SCH)*
- ☐ Minor (3 SCH)

TOTAL: 16

Spring

- ☐ POLS Jr./Sr. Elective (3 SCH)
- ☐ POLS 3314 - Introduction to Political Analysis (3 SCH)
- ☐ Minor (6 SCH)
- ☐ Elective (3 SCH)

TOTAL: 15

FOURTH YEAR

Fall

- ☐ POLS Communication Literacy Course (3 SCH)
- ☐ Minor (3 SCH)
- ☐ Language, Philosophy, & Culture (3 SCH)*
- ☐ Creative Arts (3 SCH)*
- ☐ POLS Jr./Sr. Elective (3 SCH)

TOTAL: 15

Spring

- ☐ POLS Jr./Sr. Elective (3 SCH)
- ☐ POLS Jr./Sr. Elective (3 SCH)
- ☐ Minor (6 SCH)
- ☐ Elective (3 SCH)

TOTAL: 15

TOTAL HOURS: 120

40 hours must be at the junior/senior level; 9 hours must be communication literacy courses in the major.

* Choose from the university's core curriculum.

Foreign Language: A student must complete 6 hours at the sophomore level or above in a single language. The prerequisite for all sophomore language courses is credit for the first-year level. This credit can be determined through a credit by examination. The exam score will determine if the student is placed in a second-year course, a 5-hour review course, or the first or second semester of a beginning (first-year) language course. See Arts & Sciences General Degree Requirements for further explanation.

Austin, Texas; and Lubbock, Texas. Requires approval for participation in university program by the TTU Office of the President.

- 4334—Introduction to Moot Court (3).** Prerequisite: Instructor approval. Learning courtroom procedures and how to engage in simulated appellate oral arguments before a panel of judges.
- 4335—Advanced Moot Court (3).** Prerequisites: POLS 4334 and instructor approval. Simulated appellate oral arguments before a panel of judges and competing against other universities.
- 4397—Practicum in Politics (3).** Prerequisite: Consent of instructor. Practical experience integrated with academic study of politics through study programs or work experience. Credit or no credit. May be repeated once for credit.
- 4399—Individual Studies (3).** Prerequisites: 15 hours of political science and consent of instructor. Independent research under the guidance of a staff member. May be repeated once for credit.

Public Administration (PUAD)

- 3329—Environmental Politics and Policy (3).** Examines American environmental policy from the perspective of political science and the influence of theory, history, and politics on domestic environmental policymaking processes.
- 3335—Introduction to Nonprofit Management (3).** An introduction to the nonprofit sector, focusing on the different types of nonprofit organizations and their structure, mission, powers, activities, operations, and limitations.
- 3340—The Administrative Process (3).** Prerequisite: POLS 1301. A survey of the field of public administration. Principles of administrative organization; distribution of administrative functions together with the structure of government charged with the carrying out of public policy.
- 3342—Local Government Management and Policy (3).** The political implications and administrative functions of city and other local governments and policy are examined. Contemporary issues in city government and policy are emphasized.
- 3347—Internship in Public Administration (3).** Service assignment in a public agency to enhance professional skills for students in the Minor in Public Administration or those students interested in public service. May be repeated for credit.
- 3348—Selected Topics in Public Administration (3).** Topics of contemporary interest in policy/public administration. May be repeated for credit.
- 3352—Public Policy Analysis (3).** Prerequisite: POLS 1301. The study of public policy formulation, implementation, and evaluation at various levels of government. Particular focus on health, social, and development policies. Attention to policy analysis skills and approaches used in government and consulting.

Department of Psychological Sciences

Keith S. Jones, Ph.D., Chairperson

John G. Skelton, Jr. Regents Endowed Professor: Van Allen

Professors: Jones, Littlefield, Marshall, Talley, Taraban, Van Allen, Young
Associate Professors: Alquist, Garos, Greenlee, Hohman, Ingram, Klein, Mitchell, Piña-Watson, Robitschek, Schmidt, Scolari, Victor

Assistant Professors: Choi, Cummings, Jung, Kim, Murphy, Ramasubramanian, Raveendranath, Singer, Warlick

Associate Professor of Practice: Thoen

Lecturers: Augustine, Clements-Hickman, Crescioni, Titone

CONTACT INFORMATION: 119 Psychology Building
Box 42051 | Lubbock, TX 79409-2051 | T 806.742.3711 | F 806.742.0818

About the Department

This department supervises the following degree programs:

- Bachelor of Arts in Psychology
- Bachelor of Science in Psychological Sciences
- Master of Arts in Experimental Psychology
- Master of Arts in Psychology
- Doctor of Philosophy in General Experimental Psychology
- Doctor of Philosophy in Clinical Psychology
- Doctor of Philosophy in Counseling Psychology

An overview of the requirements for the Bachelor of Arts in Psychology and the Bachelor of Science in Psychological Sciences are given in this section of the catalog.

Graduate Programs

The requirements for the graduate programs are extensive and tailored, to some extent, to the specific student and the specific graduate program in psychology. These requirements are also revised regularly to align with the relevant accrediting agencies, such as the American Psychological Association (for the clinical and counseling psychology Ph.D. programs) and the Human Factors and Ergonomics Society (for the experimental psychology concentration in human factors, with combined B.A.–M.A. and M.A.–Ph.D. options).

Students in the clinical and counseling psychology Ph.D. programs are only admitted for the doctoral degree, but they may elect to complete the requirements for the optional master's degree during their work toward the Ph.D. in Clinical Psychology or the Ph.D. in Counseling Psychology.

Students in the experimental psychology graduate programs are typically admitted for the doctoral degree, although a small number may be admitted for a terminal master's degree or for a combined B.A.–M.A. degree. The combined B.A.–M.A. degree entails a B.A. in Psychology and an M.A. in Experimental Psychology with a concentration in human factors. The Ph.D. in General Experimental Psychology offers concentrations in cognition and cognitive neuroscience, human factors, and social psychology.

Extensive details are available at www.psychology.ttu.edu in the online handbooks for each graduate program. Application forms and instructions for the graduate programs are also available online. Applicants must apply through the Graduate School of Texas Tech University; applicants cannot apply directly through the Department of Psychological Sciences.

For more information on graduate programs offered by the Department of Psychological Sciences, visit the Graduate Programs section on page 230.

Undergraduate Programs

Psychological Sciences, B.S.

The Bachelor of Science degree in Psychological Sciences is designed to prepare students for graduate study in experimental, theoretical, or applied

psychology. The Bachelor of Science degree, therefore, offers less flexibility than the Bachelor of Arts, instead emphasizing a heavy concentration in psychological science. Because this degree is intended to prepare students for graduate study, participation in undergraduate research via PSY 4000 is strongly encouraged.

Communication Literacy Requirement. The required number of hours for the major is 47, including three communication literacy courses in psychology. Courses designated as meeting the communication literacy requirement are PSY 2400, 3306, 3401, 4305, 4310, and 4334.

At least 31 hours of the total credits toward the major must be taken from 3000- or 4000-level courses. Transfer students who major in psychology must complete at least 15 credit hours in psychology at Texas Tech. All psychology majors must have a minor.

In addition to offering regularly structured courses, the department provides opportunities to participate in various research and service activities of faculty members. These are particularly valuable for the student who intends to pursue graduate study in psychology. Interested students should confer with an advisor or any of the faculty. Such activities may contribute to the completion of major and/or minor requirements through enrollment in PSY 4000 during the junior and senior years. Nine hours of PSY 4000 may be counted toward the major and 12 hours may be counted toward the degree.

All undergraduate psychology majors must complete the following core program: PSY 1300, 2400, and 3401 (with PSY 2400 as a prerequisite). All majors must also complete at least two courses from Group 1 and Group 2, plus at least six elective courses from the Special Topics group to reach a total of 47 hours in the major:

- GROUP 1 (select 2): PSY 3327, 4323, 4324, 4327
- GROUP 2 (select 2): PSY 2304, 3306, 4301, 4305
- Special Topics in Psychology (select at least 6 courses to reach the total 47 hours required in the major – can include courses from the above lists; up to 9 hours of PSY 4000 may count toward this requirement; minimum 24 credit hours): PSY 2306, 2307, 3301, 3310, 3317, 3318, 3334, 3335, 3341, 3345, 3390, 3398, 4000, 4300, 4302, 4303, 4306, 4310, 4325, 4326, 4328, 4331, 4332, 4334, 4384

Psychology, B.A.

The undergraduate psychology curriculum is designed to provide a core of knowledge of the subject matter in experimental, theoretical, and applied psychology. Sufficient curricular flexibility is provided to permit students to emphasize the acquisition of useful vocational and personal skills for later life and to prepare students for a graduate degree program in psychology, related fields, or both.

Communication Literacy Requirement. The required number of hours for the major is 35, including three communication literacy courses in psychology. Courses designated as meeting the communication literacy requirement are PSY 2400, 3306, 3318, 3398, 3401, 4300, 4305, 4310, and 4334.

At least 24 hours of the total credits toward the major must be taken from 3000- or 4000-level courses. Transfer students who major in psychology must complete at least 15 credit hours in psychology at Texas Tech. All psychology majors must have a minor.

In addition to offering regularly structured courses, the department provides opportunities to participate in various research and service activities with faculty members. These are particularly valuable for the student who intends to pursue a career in psychology. Interested students should confer with an advisor or any of the faculty. Such activities may contribute to the completion of major and/or minor requirements through enrollment in PSY 4000 during the junior and senior years. Six hours of PSY 4000 may be counted toward the major and 12 hours may be counted toward the degree.

All undergraduate psychology majors must complete the following core program: PSY 1300, 2400, and 3401 (with PSY 2400 as a prerequisite). All majors must also complete at least two courses from Group 1 and Group 2, plus four elective choices:

- GROUP 1 (select 2): PSY 3327, 4323, 4324, 4327
- GROUP 2 (select 2): PSY 2304, 3306, 4301, 4305
- Special Topics in Psychology (select 4 courses—can include courses from Group 1 and Group 2): PSY 2306, 2307, 3301, 3310, 3317, 3318, 3334, 3335, 3341, 3345, 3390, 3398, 4000, 4300, 4302, 4303, 4310, 4325, 4326, 4328, 4332, 4334, 4384

Psychological Sciences, B.S. Sample Curriculum

FIRST YEAR

Fall

TOTAL: 15

TOTAL HOURS: 120

* Choose from the Arts & Sciences General Degree Requirement list.

NOTE: PSY 2400 and PSY 3401 always meet the communication literacy requirement; another communication literacy PSY course is required.

Foreign Language: A student must complete 3 hours at the sophomore level or above in a single language. The prerequisite for all sophomore language courses is proficiency at the freshman level. This proficiency can be determined through credit or by examination. The score attained on the exam will determine whether the student is placed in a second-year course, a 5-hour review course, or in some cases the first or second semester of a beginning (first-year) language course. See Arts & Sciences General Degree Requirements for further explanation.

- ❑ Minor Elective (3 SCH)
- ❑ Elective (3 SCH)
- ❑ Life and Physical Sciences (4 SCH) (Choose from the Life and Physical Sciences section of the Arts & Sciences General Degree Requirement list.)
- ❑ PFW Elective (1 SCH) (Choose from the Personal Fitness and Wellness section of the Arts & Sciences General Degree Requirement list.)
- ❑ Foreign Language (3 SCH)

TOTAL: 14

TOTAL HOURS: 120

NOTE: PSY 2400 and PSY 3401 always meet the communication literacy requirement; another communication literacy PSY course is required.

Foreign Language: A student must complete 6 hours at the sophomore level or above in a single language. The prerequisite for all sophomore language courses is credit for the freshman level. This credit can be determined through a credit by examination. The score attained on the exam will determine whether the student is placed in a second-year course, a 5-hour review course, or in some cases the first or second semester of a beginning (first-year) language course. See Arts & Sciences General Degree Requirements for further explanation.

Psychology, Undergraduate Minor

Students who are majoring in a field other than psychology and wish to minor in psychology must complete at least 18 credit hours in psychology, including PSY 1300 and at least three courses numbered at the 3000 or 4000 level. Transfer students who minor in psychology must complete at least 6 credit hours in psychology at Texas Tech.

Grades below C in psychology courses will not be acceptable for fulfilling major or minor requirements.

Psychology, B.A. / M.A.

The Department of Psychological Studies offers this accelerated bachelor to master's degree program. Please see the [department website](#) for more information.

Undergraduate Course Descriptions**Psychology (PSY)**

- 1300—General Psychology (3).** [PSYC2301] Introduction to fundamental concepts in psychology. Emphasis on the physiological, social, emotional, and environmental determinants of behavior. (Honors section offered) Fulfills core Social and Behavioral Sciences requirement.
- 2301—Child Psychology (3).** [PSYC2308] A study of the developmental processes and environmental factors that shape the personality and affect the achievement of the child.
- 2304—Introduction to Social Psychology (3).** Prerequisite: PSY 1300. Study of individual experience and behavior in relation to social stimulus situations. Survey of experimental work and reports on current problems.
- 2306—Child and Adolescent Psychology (3).** A study of the developmental processes and environmental factors that shape the physical and psychological growth of children and adolescents. Note: This course replaces PSY 2301. Students cannot earn credit for both courses, and grade replace for PSY 2301 is not allowed.
- 2307—Psychology of Gender (3).** Surveys the research and theories related to sex and gender, including sex/gender in professional settings, mental health concerns, and relationships.
- 2400—Statistical Methods (4).** Introduction to descriptive and inferential statistics. Emphasis is placed on application to psychological research problems and an introduction to computer functions. Partially fulfills core Mathematics requirement (in conjunction with a mathematics course). (CL)
- 3301—An Introduction to the Psychology of the Arts (3).** An introduction to various psychological perspectives on artistic production and appreciation.
- 3306—Personality (3).** Prerequisite: PSY 1300. Principles of normal personality structure. (CL)
- 3310—Psychology and Religion (3).** Prerequisite: PSY 1300. Examines historical perspectives on the psychology of religion, the experience of religion and spirituality from a psychological perspective, and the relations between psychology and religion.
- 3317—Principles of Learning and Memory (3).** Prerequisite: PSY 3401. A survey of contemporary theory and research in the fields of learning and memory.
- 3318—The Development of Children's Thinking and Emotion (3).** Prerequisite: PSY 1300. Considers cognitive development from infancy to adulthood with attention to experimental methods, and development of perception, memory, concepts, problem-solving, language, and emotion. (CL)
- 3327—Introduction to Physiological Psychology (3).** Prerequisite: PSY 1300. Introduction to neuroanatomy, electrophysiological measuring techniques, and the mechanisms of receptor and effector systems. A study of the relationships between behavior and the physiological substrate.
- 3334—Introduction to Clinical and Counseling Psychology (3).** Prerequisite: PSY 1300. Introduction to current practices of clinical and counseling psychologists, including clinical, diagnostic, and intervention strategies. Survey of career opportunities, professional issues, and ethical problems.
- 3335—Industrial Organizational Psychology (3).** Prerequisite: PSY 1300. The study of human behavior as it is related to work, including personnel issues, worker issues, and organizational issues.
- 3341—Close Relationships (3).** Prerequisite: PSY 1300. Social psychology theory and research on topics in close relationship literature, including attitudes toward love and sexuality, friendship, intimacy, power, conflict, and divorce.
- 3345—Clinical Sport and Performance Psychology (3).** Examines the foundations, social, cultural, and developmental factors influencing sport and other performance-based endeavors. Grounded in theory consistent with the scientist-practitioner model.

- 3390—Introduction to Positive Psychology (3).** Provides an introduction to positive psychology constructs, topics, theories, contexts, and applications.
- 3398—Ethnic Minority Psychology (3).** Prerequisites: PSY 1300 and junior standing. Focus is on the psychosocial aspects that impact the four predominant ethnic minority populations in the United States. (CL)
- 3401—Research Methods (4).** Prerequisites: PSY 2400. Survey of research methods in psychology. Emphasis on critical aspects of experimentation such as designing, conducting, and critiquing experiments, as well as interpreting and communicating results. (CL)
- 4000—Individual Problems Course (VI-6).** Prerequisites: PSY 1300 and consent of instructor. Independent work under the individual guidance of a faculty member. May be repeated for up to 12 hours credit. Up to 6 hours may count toward fulfillment of the major when completing a Bachelor of Arts in Psychology degree; up to 9 hours may count toward fulfillment of the major when completing a Bachelor of Science in Psychological Sciences degree. Up to 3 hours may count toward fulfillment of the minor in Psychology.
- 4300—Psychology of Human Sexual Behavior (3).** Study of human sexual behavior from a psychosocial viewpoint with emphasis on contemporary research methods and findings. (CL) [WGS 4302]
- 4301—Developmental Psychology (3).** Prerequisite: PSY 1300. An advanced study of the process of development through consideration of data, theories, and contemporary research issues.
- 4302—Undergraduate Internship in Psychology (3).** Prerequisites: Senior standing, consent of instructor. Provides undergraduate psychology majors with an opportunity to earn credit doing supervised service in the community. May be repeated one time for credit toward overall degree requirements.
- 4303—Intermediate Statistics for Psychologists (4).** Prerequisite: PSY 2400 or MATH 2300. Second course in psychological statistics recommended for students planning to attend graduate school. Includes probability, correlation and regression, basic parametric and nonparametric inferential statistics.
- 4305—Abnormal Psychology (3).** Prerequisite: PSY 1300. Personality deviations and maladjustments; emphasis on clinical descriptions of abnormal behavior, etiological factors, manifestations, interpretations, and treatments. (CL)
- 4306—Constructivist and Narrative Psychologies (3).** Introduction to theories, research, and applications of meaning-making psychologies, including constructivist, narrative, social constructionist, and feminist approaches.
- 4310—Abnormal Child Psychology (3).** Prerequisite: PSY 4305 or consent of instructor; junior standing. Description, classification, assessment, treatment, and research methods pertaining to behavioral and emotional disorders of childhood and adolescence. (CL)
- 4323—Perception: Theories and Applications (3).** Prerequisite: PSY 1300. Survey of methods and findings in perception. Emphasis on demonstrations of perceptual phenomena; theories of visual perception (cognitive and ecological); applications. Topics include illusions, depth, motion.
- 4324—Cognition (3).** Prerequisite: PSY 3401. Introduction to cognitive psychology, including perception, attention, memory, language, problem-solving, decision-making, and the development of expertise.
- 4325—Drugs, Alcohol, and Behavior (3).** Prerequisite: C or better in PSY 1300. Survey of psychological factors involved in drug use and an introduction to pharmacotherapy used in treatment of mental illness.
- 4326—Human Factors Psychology (3).** Prerequisite: PSY 3401. Introduction to methods and findings in human factors psychology. Applications of psychological research to designs of machines, environments, and tasks.
- 4327—Cognitive Neuroscience (3).** Prerequisite: PSY 1300. Introduction to functional neuroanatomy, cognitive neuroscience methods, and cognitive neuroscience theory in broad cognitive areas such as attention, perception, memory, language, and decision-making.
- 4328—Neuroscience of Vision (3).** Covers how the human brain accomplishes vision from detection of very basic image features to face processing, visual attention, and consciousness.
- 4331—Social Psychology of Groups (3).** Prerequisite: PSY 2304. Social psychology theory and research on topics in group dynamics, including group structure, influence, conflict, performance, decision making, and leadership.
- 4332—Health Psychology (3).** Introduces students to the contributions of psychology as a discipline to the understanding of health and illness.
- 4334—Introduction to Counseling and Psychotherapy (3).** Prerequisite: PSY 1300. Survey of current practice and theory in counseling and psychotherapy. Consideration of the research support for counseling and psychotherapy as an agent of change of behavior. (CL)
- 4384—Forensic Psychology (3).** Prerequisite: PSY 4305 and PSY 3401 or SOC 3392. Introduces students to the interface of psychology and law with a focus on forensic psychology (e.g., forensic psychological assessment, expert testimony).

Department of Sociology, Anthropology, and Social Work

Arthur Durband, Ph.D., Chairperson

Professors: Houk, Koch, Williams

Associate Professors: Choi, Durband, Flores-Yeffal, Jordan, Lowe, Maloney, Miller, Novotny, Ramirez, Rose, Smithey, Swed, Wagner, Walter

Assistant Professors: Alboroto, Cho, Herbolsheimer, Isa, Pusch

Associate Professors of Practice: Button-Schnick, Lavender-Bratcher, Rudd, Speer, Watson

Assistant Professors of Practice: Molina, Mount, Patterson, Phelps, Phillips, Thompson

Instructors: Lee, Siu, Whitman

CONTACT INFORMATION: 158 Holden Hall

Box 41012 | Lubbock TX 79409-1012 | T 806.742.2400 | F 806.742.1088

www.depts.ttu.edu/sasw

About the Department

This department supervises the following degree programs:

- Bachelor of Arts in Anthropology
 - Forensic Anthropology Concentration
- Bachelor of Arts in Criminology
- Bachelor of Arts in Social Work
- Bachelor of Arts in Sociology
 - Criminology Concentration
- Master of Arts in Anthropology
- Master of Arts in Sociology
- Master of Social Work

In addition, the department participates in the archaeological studies, women's and gender studies, community and urban studies, ethnic studies, environmental studies, family life studies, forensic sciences, religion studies, and Asian studies minor programs. The minimum number of hours required for majors in all baccalaureate programs in the department is a total of 120 hours.

Graduate Programs

For information on graduate programs offered by the Department of Sociology, Anthropology, and Social Work, visit the Graduate Programs section on page 232.

Undergraduate Programs

Anthropology, B.A.

The anthropology program reflects the broad scope of the discipline, including the three subfields of archaeology, ethnology, and biological anthropology. International and/or regional field schools in all three areas are highlights of the curriculum, and well-equipped laboratory facilities support faculty and student research in all three subfields.

A student majoring in anthropology must complete 34 semester hours in anthropology, including 10 hours of introductory-level coursework, 3 hours of theory, 9 hours of foundational courses, and 12 hours of electives. The introductory courses include ANTH 2100, ANTH 2300, ANTH 2301, and ANTH 2302. All majors are required to take ANTH 3316 as the theory course. Students are also required to take a foundational course in each subfield: ANTH 3311 (human variation) or ANTH 3310 (human evolution); ANTH 3339 (ethnology); and ANTH 3380 (archaeology). The remaining 12 hours are upper-division elective courses within the program. A maximum of 9 hours of transfer credit may be accepted for the major. With prior departmental approval, 3 advanced hours in a related discipline may be counted toward the major. Anthropology majors must make a grade of C or better in each ANTH course. Up to 6 hours of individual studies and 6 hours of field courses may be credited to the major.

Forensic Anthropology Concentration. The department offers a concentration in forensic anthropology for students seeking the notation “Forensic Anthropology Concentration” on their transcripts. The concentration requires five 3-hour courses (15 hours) with a grade of C or better from the two following groups:

- ANTH 3303, 3314, 4343 (required core courses)
- One course chosen from ANTH 3350, 4320
- One course chosen from FSCI 2308; ANTH 3350, 4320; GIST 3300, 3301 (if not already taken)

The anthropology major with a concentration in forensic anthropology requires a total of at least 34 hours of anthropology courses. Students must receive a grade of C or better in each course that counts toward the forensic anthropology concentration. The minimum prerequisites recommended for all advanced courses are ANTH 2100 and ANTH 2300 or consent of instructor. ANTH 3314 is a prerequisite for ANTH 4343.

Communication Literacy Requirement. Communication literacy in anthropology focuses on three forms of communication: written, visual, and oral. The required theory course and two of the foundational courses each deliver instruction and training pertaining to one of these forms of communication. These pairings are based, in part, on differences between the subfields. For example, visual communication in the form of poster presentations is more common in biological anthropology than ethnology. Therefore, ANTH 3310 or ANTH 3311 provide students with training in effective visual communication. The theory course, ANTH 3316, focuses on written communication. Oral communication is emphasized in ANTH 3380. There is not a set order in which students must complete these courses. However, students must complete the necessary introductory-level coursework before enrolling in the foundational courses.

Criminology, B.A.

Criminology is the sociological study of law-making, law-breaking, and social control. Areas of specialization and faculty expertise include criminology and delinquency, intimate relationships and families, race and ethnicity, inequality, gender, aging, social psychology, medical sociology, religion, social research methods, and social theory. A major in criminology is beneficial to students planning careers in a variety of areas, including business, law, law enforcement, government, international development, medicine, and social services. Courses in sociology fulfill core curriculum requirements in the social and behavioral sciences in the College of Arts & Sciences and the university.

A student majoring in criminology must complete 36 hours in sociology or criminology, 24 of which must be upper-division courses (3000 or 4000). It is the student's responsibility to make sure they reach the 40 upper-division hours that are required for graduation. A maximum of 9 hours of transfer credit may be accepted for the major. For a course to apply to the major or minor, a student must score a C or better. Students who wish to declare a major in Criminology must have a 2.0 TTU cumulative GPA. If a student's GPA falls below 2.0, they be placed on probation for one semester, during which time they must raise their GPA to 2.0. If they are not successful, they will be dropped from the major after that semester. Core course requirements are as follows:

- SOC 1301, 2391, 3392, 3327; and CRIM 4325.
- Either SOC 3393 or 3394. Students expecting admission to graduate work in sociology should take both of these courses.
- One lower-level division and three alternate upper-division courses to be chosen from the following: any CRIM prefix course; SOC 3326, 3333, 3335, 3340, 3368, 3383, 4335, 4327; ANTH 3303, 4320, 4343; PSY 4384. SOC 3300 may be applied to this requirement by approval of advisor.
- Two non-criminology electives from sociology (any level).

The criminology major requires a total of 36 hours of sociology and/or approved courses in the above related areas.

Communication Literacy Requirement. Communication Literacy courses for the Criminology major include SOC 3391, 3392, 3393, and 3394.

Sociology, B.A.

Sociology is the study of groups in society and individuals in those groups. Areas of concentration and faculty expertise include criminology and deviance, intimate relationships and families, race and ethnicity, inequality,

gender, aging, social psychology, medical sociology, culture, education, religion, food, social geography, social research methods, and social theory. A major or minor in sociology is beneficial to students planning careers in a variety of areas, including business, law, law enforcement, government, international development, medicine, social services, education, public relations and marketing, and human relations. The sociology program also offers a Bachelor of Arts in Criminology. Courses in sociology fulfill core curriculum requirements in the social and behavioral sciences in the College of Arts & Sciences and the university.

A student majoring in sociology must complete 33 hours in sociology or criminology, 24 of which must be upper-division courses (3000 or 4000). It is the student's responsibility to make sure they reach the 40 upper-division hours that are required for graduation. Communication Literacy requirements will be met in the required upper-division core courses specified below through numerical data analyses, written papers, and visual/audio in-person or web-based presentations. A maximum of 9 hours of transfer credit may be accepted for the major. For a course to apply to the major or minor, a student must score a C or better. Students who wish to declare a major in Sociology must have a 2.0 TTU cumulative GPA. If a student's GPA falls below 2.0, they be placed on probation for one semester, during which time they must raise their GPA to 2.0. If they are not successful, they will be dropped from the major after that semester. Core course requirements are as follows:

- SOC 1301, 2391, and 3392.
- Either SOC 3393 or 3394. Students expecting admission to graduate work in sociology should take both of these courses.
- 21 hours of sociology and/or criminology electives.

Criminology Concentration. Criminology is the sociological study of law-making, law-breaking, and social control. Sociology majors who wish to specialize in the study of criminology and receive the notation “Criminology Concentration” on their transcripts are required to complete the core course requirements for the sociology major plus the additional requirements as follows:

- Two core courses, both of which must be taken: SOC 3327 and CRIM 4325.
- One course to be chosen from CRIM 2333, 2335; or FSCI 2308.
- Three alternate upper-division courses to be chosen from the following: any CRIM prefix course; SOC 3300 (must be approved by advisor in advance), 3326, 3333, 3335, 3368, 3383, 4327, 4335; ANTH 3300 (must be approved by advisor in advance), 3303, 4320, 4343; PSY 4384.
- Two non-criminology electives from sociology (any level).

The sociology major with a concentration in criminology requires a total of 36 hours of sociology and/or approved courses in the above related areas.

Communication Literacy Requirement. Communication Literacy courses for the Sociology major include SOC 2391, 3392, 3393, and 3394.

Social Work, B.A.

The Bachelor of Arts in Social Work (BASW) uses a generalist model to prepare entry-level social work professionals for work in a wide variety of field settings and with diverse populations. The degree is accredited by the Council on Social Work Education, and graduates are eligible to sit for a national exam with the Association of Social Work Boards, one requirement for licensing in Texas and most other states. In addition, graduates are often eligible for advanced standing admission in a Master's of Social Work degree program. Refer to the [BASW Student Handbook](#) for additional information about the degree program and the social work profession in general.

In order to change degree plans to major in social work at any point following initial enrollment at TTU, students must have completed at least 12 institutional credit hours and have an overall GPA no lower than 2.0. Majors are expected to maintain a GPA of 2.5 or greater in major coursework throughout the degree program.

Social work majors must meet with an academic advisor each long semester to plan the course of study and monitor completion of all degree requirements. For information about the social work profession, fields of practice, or graduate study, students should consult with the Program Director or another social work faculty member.

Social Work Major. All students in the college complete the core curriculum of the university, the general degree requirements for the college, as well as an 18-hour minor. In addition to these credits, social work majors complete the following course of study:

- Human Biology (before or with SW 3312) – Choose BIOL 1402 or ANTH 2300/2100 or a combination of both BIOL 1403 and 1404 or a combination of both ZOOL 2403 and 2404.
- Statistics or research methods (before SW 3339) – Choose SOC 2391, MATH 2300, or PSY 2400. Of these courses, only MATH 2300 and PSY 2400 also provide mathematics credit in the General Degree Requirements for the College of Arts & Sciences.
- 24 credit hours in lecture-based social work classes
- 3 credit hours selected from the list of approved electives
- 9 capstone credit hours in social work, corresponding to a 400 clock-hour field placement in an approved social service agency and its accompanying seminar class.

Admission to the Practice Course Sequence (PCS). Before taking any of the practice courses restricted to majors-only (SW 3332, SW 3333, SW 4340, and SW 4611), students must be approved for admission to the practice course sequence. By this point in the program, majors should have a good sense of what social work is all about and how they fit with the profession. Based on their application materials, a determination is made about whether each student appears compatible with the profession and has been adequately prepared by the foundation curriculum. PCS applications are due midterm in the semester before students hope to begin the sequence. Refer to the *BASW Student Handbook* for additional details about the PCS application process; application forms and instructions are available on the program website.

Professionalism. Students seeking a degree in social work are expected to demonstrate levels of professionalism commensurate with their exposure to professional standards. These expectations include compatibility with social work values and ethics, a high level of engagement during academic activities, satisfactory academic progress (a social work GPA of 2.5 should be maintained throughout the program), and sufficient emotional and cognitive competence for successful professional practice. Concerns about students' professional behavior or academic progress are handled through the program's Student Concern and Professional Review Committee (SCPRC), and failure to meet expectations may delay or prevent student's progression toward degree completion. Refer to the *BASW Student Handbook* for additional details about the SCPRC.

Social Work Field Placement. In their final semester of the social work curriculum, majors complete a 400-hour, closely supervised individual field practice experience in a social agency selected and certified by the social work program. This capstone experience (SW 4611) along with its accompanying seminar course (SW 4340), allows students to demonstrate generalist practice skills across micro, mezzo, and macro level systems. Students should keep in mind that they will spend 32 hours per week at the field agency and that these hours will take place between 8 a.m. and 5 p.m. on weekdays only. Because of the increased psychological, emotional, and physical demands during field, students are limited to a total of 12 credit hours of enrollment and no more than 10 hours per week of paid employment.

The long semester prior to planned placement, a field placement application must be completed by the student and a placement site arranged by the Director of Field Education. All social work students are required to pay for and carry professional liability insurance during the field placement semester, and some field sites have special requirements, such as background checks or medical testing, for which students may also be expected to pay. Students should refer to the [BASW Field Instruction Handbook](#) for deadlines and additional details about field education.

Criminal Backgrounds. Students seeking a degree in social work should be aware that conviction histories are taken into account for professional state licensure. Pursuant to Chapter 53 of the Occupations Code and 22 TAC 882.41, the Texas Behavioral Health Executive Council "can provide an individual with a preliminary evaluation of his or her criminal background to determine if the individual's background would prevent him or her from obtaining licensure." Students with conviction histories are therefore encouraged to complete the Application for Criminal History Evaluation with the TBHEC early in their degree program or as soon as possible after receiving a conviction in court.

Transfer Students and Transfer Credit. While the program typically accepts up to 9 hours of transfer credit for social work coursework from other CSWE-accredited programs, practice sequence courses must be taken at the institution.

No Credit for Life Experience. The social work program does not give credit for work or other life experiences.

Communication Literacy Requirement. Communication Literacy courses for the B.A. in Social Work include SW 3332, 3333, and 4340.

For additional information about the B.A. in Social Work, refer to the program website (www.depts.ttu.edu/socialwork) or send a request to sasw.socialwork@ttu.edu.

Undergraduate Minors

Anthropology

A minor in anthropology consists of 18 hours, with at least 6 hours in upper-level courses. No more than 6 hours of transfer credit will be accepted for the minor. Students seeking a minor in anthropology must make a grade of C or better in each ANTH course.

Anthropology courses provide distribution credit in three areas of the core curriculum (language, philosophy, and culture; social and behavioral sciences; and life and physical sciences). In addition, anthropology courses fulfill a variety of humanities and social science requirements in other colleges of the university. Students in these colleges should check with advisors in their major departments to learn which anthropology courses fulfill their college and core curriculum requirements.

Criminology

Criminology is the sociological study of law-making, law-breaking, and social control. A minor in criminology may be beneficial to students planning careers in a variety of areas, including business, law, law enforcement, government, international development, medicine, and social services. Students minoring in criminology must complete 18 hours of sociology or criminology courses: SOC 1301, CRIM 2333 or CRIM 2335, SOC 3327, CRIM 4325 and 6 hours of additional upper level sociology or criminology electives.

Health and Society

The general goal of the Health and Society undergraduate minor is to empower students to make sense of the demographic, social, economic, and political issues that influence human health, health behavior, and health-related policy. While the minor focuses on health, students will be exposed to interdisciplinary perspectives, and they are expected to acquire a broad range of skills. Courses include SOC 3300 (Pandemic and Society), 3300 (Health and Inequality), 3383, 4312, 4316, 4381.

Social Work

The purpose of the social work minor is to provide an understanding of social work knowledge, values, and perspective. Minors are not eligible for social work licensing upon graduation nor for advanced standing status in MSW programs. The minor in social work consists of human biology (choose from BIOL 1402 or ANTH 2300/2100 or a combination of both BIOL 1403 and 1404 or a combination of both ZOOL 2403 and 2404), as well as SW 2301, 2362, 2311, 3312, and 3331. No more than 6 hours of social work transfer credit will be accepted for the minor.

For additional information, contact Laura Lowe, Ph.D., LCSW, BASW Program Director, at laura.lowe@ttu.edu or refer to the program website (www.depts.ttu.edu/socialwork).

Sociology

Students minoring in sociology must complete 18 hours of sociology or criminology, including SOC 1301. Students must receive a grade of C or better in each sociology or criminology course if they wish it to count toward a major or minor in sociology or in the criminology concentration. No more than 6 hours of transfer credit will be accepted for the minor.

Undergraduate Course Descriptions

Anthropology (ANTH)

- 1301—Understanding Multicultural America (3).** Cultural diversity in the U.S. as studied by anthropologists. Ethnographic descriptions of African-Americans, Hispanics, Native Americans and other groups.
- 2100—Biological Anthropology Lab (1).** Corequisite: ANTH 2300. Study of human and nonhuman primary biodiversity via skeletal biology and evolution concepts. Topics include anthropometrics, diet surveys, genetics, and exercises designed to explore human biodiversity issues. Partially fulfills core Life and Physical Sciences requirement.
- 2300—Biological Anthropology (3).** [ANTH2301] Corequisite: ANTH 2100. Topics include human genetics, health, diet, and issues of human and nonhuman primate evolution. Partially fulfills core Life and Physical Sciences requirement.
- 2301—Introduction to Archaeology (3).** [ANTH2302, 2401] Introduces archaeology and what it has told us about our past, from the earliest beginnings to the birth of civilization. Fulfills core Social and Behavioral Sciences requirement.
- 2302—Introduction to World Cultures and Ethnology (3).** [ANTH2346, 2351; HUMA2323] The rich complexity of peoples and cultures in the world as studied by anthropologists. Discussion of basic concepts such as ethnography, linguistics, and social organization. Fulfills core Social and Behavioral Sciences requirement.
- 2304—Global Forces and Local Peoples (3).** Anthropological perspective on critical problems facing humanity: the aftermath of colonialism, the fate of indigenous peoples, changing family systems, and the reassertion of ethnic identity. Fulfills core Social and Behavioral requirement.
- 2306—Anthropology at the Movies (3).** Examines how anthropology, archaeology, and biological anthropology are portrayed in mainstream movies as a springboard for discussing important topics about culture and science. Fulfills core Language, Philosophy, and Culture requirement.
- 2315—Introduction to Language and Linguistics (3).** An introductory course in the scientific study of language, including grammatical description and analysis as well as the study of relationships between language and society.
- 3300—Special Topics in Anthropology (3).** Examines selected topics in the discipline of anthropology. Content varies. May be repeated for credit.
- 3303—Forensic Anthropology (3).** Examines the field of forensic anthropology, including osteological assessment of cases, ethics, and courtroom responsibilities.
- 3310—Human Evolution (3).** Prerequisites: ANTH 2100 and ANTH 2300. Study of human origins and evolution as a mammal, primate, and bioculturally adapting species. Emphasizes principles in evolution and systematics and recent discoveries in paleoanthropology. (CL)
- 3311—Human Variation (3).** Prerequisites: ANTH 2100 and ANTH 2300. ANTH 3310 is not a prerequisite. Study of human heredity, biodiversity, and adaptations. Survey of the physical and genetic variations of modern populations throughout the world. (CL)
- 3312—Primate Behavior (3).** A survey of the biological and behavioral diversity of nonhuman primates. Emphasizes issues concerning evolution, social organizations, and conservation of prosimians, anthropoids, and hominoids.
- 3313—Primate Evolution (3).** Introduces the field of primate evolution with attention to primate anatomy. Topics to be covered include non-human primate osteology, living primate anatomy, theories of primate origins, and the fossil record of primates.
- 3314—Human Osteology (3).** Prerequisites: ANTH 2100 and ANTH 2300. Detailed study of human bones and teeth to facilitate the field identification of intact and fragmentary specimens. Includes basic identification of age and sex.
- 3315—Genes, Plagues, and Culture (3).** Examines the syndemic relationship of genes, pathogens, environments, and culture in human diseases. Evolutionary and biocultural principles are applied.
- 3316—Anthropological Theory: Understanding Language and Culture (3).** Prerequisite: C or better in ANTH 2302. Overview of history and development of anthropological theory. Explores the intellectual genealogy and theoretical debates within the fields of cultural anthropology and linguistics. (CL)
- 3317—Food and Culture (3).** Explores cross-cultural variation in foodways, examining how groups utilize food to express their cultural identities. Topics include food taboos, feasting, and regional cuisines.
- 3320—Material Culture: People and Things (3).** Explores ways in which humans use food, clothing, monuments, and other material objects to construct and express their identity.
- 3322—Anthropology of Religion, Magic, and Witchcraft (3).** Provides a basic foundation in the anthropological approach to the understanding of religious behavior.
- 3325—Anthropology of Latin America (3).** Explores Latin America's role in the world system and the unique cultural practices through which Latin Americans assert their identity.
- 3326—Anthropology of Martial Arts (3).** Uses martial arts as means of studying issues like identity, spirituality, globalization, cultural change, power, and agency that help us understand human societies.
- 3331—Indians of North America (3).** The experience of Native American peoples from contact to the present. Incorporates historical and ethnographic approaches; selected case studies.
- 3335—Anthropology of the Plains Indians (3).** An introduction to Plains Indian cultures past and present. Explores a variety of topics, including world view, sacred sites, traditional arts, powwows, and language revitalization.
- 3339—Methods in the Study of Culture and Language (3).** Training in cross-cultural research methods employed by ethnographers and linguists. Topics include interviewing, participant observation, digital audio recording, transcription, and data analysis.
- 3341—Laboratory Archaeology (3).** Provides hands-on training in processing and analysis of archaeological materials in the laboratory and exposure to other aspects of archaeological research centered in the lab.
- 3342—Prehistory of the Southwest (3).** Introduction to the prehistory of the Southwest beginning with the first humans to enter the area up to the period of Spanish colonization.
- 3343—Maya Archaeology (3).** A survey of ancient Maya prehistory and archaeology with emphasis on religion, world view, iconography, and hieroglyphic writing.
- 3344—South American Archaeology (3).** Covers the prehistory of South America from the earliest colonization to the development of civilizations with special emphasis on the Central and South Central Andes.
- 3347—Texas Prehistory (3).** Prerequisite: ANTH 2301. A comprehensive survey of 12,000 years of human activity in Texas; the major prehistoric sites and findings of archaeological studies.
- 3348—Introduction to Historical Archaeology (3).** Introduces students to the methods and theories of historical archaeology. The course will focus on the post-1492 era in North and South America.
- 3349—Archaeology of the Northern Spanish Frontier (3).** Familiarizes students with the history and archaeology of the Spanish occupation of the borderlands in the New World with particular emphasis on the Southwest U.S.
- 3350—Archaeology of Death (3).** Explores the archaeology of death. Topics include treatment of the dead, mortuary practices, and belief systems surrounding death.
- 3353—Bioarchaeology (3).** Introduction to bioarchaeology, which uses human skeletal data from archaeological contexts to address aspects of past lifeways (health, migration, kinship, funeral behavior, and social identity).
- 3363—Peopling of the Americas (3).** Examines anthropological evidence of the earliest peoples in the Americas including origins and migrations, relevant environmental settings, and cultural narratives.
- 3375—Topics in Latin American Archaeology (3).** Examines the ancient civilization of Latin America through exploration of specific topics (e.g., cities, regions, cultures). May be repeated for credit when topics vary.
- 3380—Methods and Theory in Archaeology (3).** Introduces students to the methodological and theoretical practices that guide archaeological inquiry. Excavation techniques and current research paradigms are specifically addressed. (CL)
- 4000—Individual Problems in Anthropology (VI-3).** Prerequisites: ANTH 2300, ANTH 2301, or ANTH 2302; advanced standing; and consent of instructor. May be repeated for credit.
- 4310—Cultural Resource Management (3).** Introduction to the practice of cultural resource management archaeology in the United States, including historical and legal background, methods, and employment opportunities.
- 4320—Forensic Archaeology (3).** Prerequisite: ANTH 2301. Covers the history of forensic archaeology case studies and archaeological principles and methods as applied to forensic cases.
- 4343—Methods in Forensic Anthropology (3).** Prerequisites: ANTH 2300, ANTH 2100, and ANTH 3314 or consent of instructor. Intensive study of forensic anthropology methods including trauma analysis, age, sex, and stature estimation.
- 4640—Field School in Cultural Anthropology (6).** A field school providing training in basic ethnographic methods, including interviewing, participant observation, the documentation of cultural performance events, and the analysis of material culture.
- 4642—Field Archaeology (6).** A summer session field school providing instruction in basic archaeological field techniques, including site

TOTAL HOURS: 120

* Select from Arts & Sciences General Degree Requirements. At least 6 hours must be upper-division (3000 or 4000 level).

ANTH 2306 satisfies Language, Philosophy, and Culture requirement.

ANTH 2302 fulfills the Social and Behavioral Sciences requirement.

Foreign Language: A student must complete 6 hours at the sophomore level or above in a single language. The prerequisite for all sophomore language courses is credit for the freshman level. This credit can be determined through credit by examination. The score attained on the exam will determine whether the student is placed in a second-year course, a 5-hour review course, or in some cases the first or second semester of a beginning (first-year) language course. See Arts & Sciences General Degree Requirements for further explanation.

ANTH Elective 3000/4000 Level: Anthropology majors are required to take 12 hours of upper-division (3000- or 4000-level) ANTH electives.

Sophomore Foreign Language: A student must complete 6 hours at the sophomore level or above in a single language. If 4 or more semesters of high school foreign language are accepted for admission, the student should consult the information preceding the course listing for the foreign language department. A student enrolling in the first-year sequence will have a total requirement of 11-16 hours. A student who enrolls in the second-year sequence will have a 6-hour requirement. See Arts and Sciences General Degree Requirements for further explanation.

survey, test excavations, record keeping, mapping, and collection documentation.

4643—Field Research in Skeletal Biology (6). A field experience providing hands-on learning specific to human skeletal biology and forensic methods. May be repeated.

Criminology (CRIM)

2309—The Science Around True Crime Media (3). Explores the sociology and criminology behind true crime media, including podcasts, videos, and social media.

2333—The U.S. Criminal Justice System (3). Surveys the structure and process of the U.S. criminal justice system, including policing and cross-national comparison.

2335—Homicide (3). Analyzes homicide by strangers, family members, and acquaintances from a criminological perspective. Serial, mass, school shootings, and hate crime murder are also examined.

3300—Special Topics in Criminology (3). Covers special topics in criminology. Topics will vary according to student need and instructor credentials. May be repeated for credit.

3328—Offender Re-entry and Reintegration (3). Investigates successful reintegration of previously incarcerated offenders. Topics include justice policies, politics, privilege, inequality, and navigating multiple barriers nationally and cross-nationally.

3339—Crime Data Analysis (3). An introduction to understanding crime data, statistical analysis, and interpretation of crime data and trends.

3341—Race, Ethnicity, and Crime (3). Examination of diversity and multicultural differences in crime trends and the criminalization of behavior of racial and ethnic groups; examination of social control power differentials.

3357—Prison and Society (3). Examines the prison through intersectional analyses of policies, politics, institutional history, and inequalities and takes a critical approach to the prison institution, culture, and structure.

4321—Cross-national and Global Crime (3). A comparative, cross-national approach to crime that applies criminological theory to understanding social and cultural factors surrounding criminalization of behavior and societal response to offending.

4325—Criminological Theory (3). Surveys classical and contemporary theories of criminology and sociology of crime.

Social Work (SW)

2301—Introduction to Social Work (3). [SOCW2361] Examination of society's responses to human needs and social problems through voluntary and governmental social policies and services.

2311—Human Behavior and the Social Environment: Systems (3). Examination of interaction between person and environment, emphasizing mezzo and macro level systems, including small groups, organizations, and communities.

2362—Social Welfare as a Social Institution (3). [SOCW2362] Examines development of U.S. social welfare legislation, including preceding political, economic, environmental, and social conditions as well as resulting policies, services, and societal responses.

3312—Human Behavior and the Social Environment: Lifespan (3). Prerequisites: BIOL 1402 or ANTH 2300/ANTH 2100 or a combination of both BIOL 1403 and BIOL 1404 or ZOOL 2403 and ZOOL 2404. Examination of interaction between person and environment with emphasis on biological, social, emotional, and cultural systems across life-span.

3331—Social Work with Diverse Populations (3). Integrated approach to theory, values, and skills of working with culturally diverse populations. Emphasis - empowering vulnerable populations to fulfill their potential.

3332—Generalist Practice with Micro Systems (3). Prerequisite: PCS admission. Prerequisite or corequisite: SW 3331. Application of generalist knowledge, ethics, and skills for effective partnerships at the micro level of systems. Social work majors only. (CL)

3333—Generalist Practice with Meso/Macro Systems (3). Prerequisite: PCS admission. Prerequisite or corequisite: SW 3331. Application of generalist knowledge, ethics, and skills for effective partnerships with meso and macro levels of systems. Social work majors only. (CL)

3339—Social Work Research and Evaluation (3). Prerequisite: MATH 2300, SOC 2391, or PSY 2400. Scientific approach to social work knowledge. Emphasis on evaluation of social welfare programs and social work practice.

4000—Independent Study in Social Work (V3-6). Prerequisite: Consent of instructor. Independent study in social work theory, practice, policy, research, or policy evaluation. May be repeated for credit with instructor's approval.

4315—**Special Topics in Social Work (3).** Prerequisite: Junior standing. Examines selected topics in social work. May be repeated for credit when topic varies.

4340—**Social Work: Field Placement Integrative Seminar (3).** Prerequisite: C or better in SW 3332 and SW 3333. Corequisite: SW 4611. Integration of social work knowledge, skills, and values used in the student's individual practice of social work. Social work majors only. (CL)

4611—**Social Work: Field Experience (6).** Corequisite: SW 4340. Closely supervised 400-hour practicum using social work knowledge/skills/ethics in program-approved social agency. Professional liability insurance required. Social work majors only. Pass/fail.

Sociology (SOC)

1301—**Introduction to Sociology (3).** [SOCI1301] Human group behavior, influence on the individual, and relationships of individuals to each other as members of groups. Fulfills core Social and Behavioral Sciences.

1320—**Current Social Problems (3).** [SOCI1306] Problems in basic social institutions as marriage and the family, community, economy, government, education, health and welfare, recreation, etc. Fulfills core Social and Behavioral Sciences requirement.

2380—**Sociology of the Movies (3).** Focuses on exploring how movies reflect and extend sociological forces in structures like the family, the education system, and the criminal justice system.

2391—**Introduction to Social Statistics (3).** Statistical analysis and interpretation of sociological research data. (CL)

3300—**Special Topics in Sociology (3).** Examines selected topics in sociology. May be repeated when topics vary.

3323—**Race and Ethnicity (3).** Sociological and global analysis of racial and ethnic groups. Analysis of diversity and multiculturalism from a global perspective.

3325—**Gendered Lives (3).** Study of the gendered nature of society, emphasizing the experiences of women in such areas as family, health, and the economy. [WGS 3325]

3326—**Women and Crime (3).** Examines the nature and extent of female crime, contemporary debate in feminist criminology, and the construction of gender in criminal justice discourse.

3327—**Sociology of Law and Policing (3).** Examines social forces affecting the development and current operation of criminal law and policing. Special attention given to contemporary issues concerning each.

3331—**Sexuality, Intimate Relations, and Family Life (3).** An examination of the sociology of love and intimate partnership formation; sexuality; and historical, global, and cultural variations in family life. [WGS 3331]

3333—**White Collar Economic Crimes (3).** Examines white collar and economic crimes in the United States as well as from a global perspective.

3335—**Family Violence (3).** Surveys definitions, prevalence, and theories of family violence. Focuses on impact of variations in definitions of family violence and societal responses to family violence.

3336—**Sociology of Education (3).** Examines the education system over time as well as the impacts of education on income, racial equality, and stratification in American society.

3337—**Inequality in America (3).** Inequality as expressed in occupational, class, ethnic, and sexual hierarchies is examined from varying sociological perspectives. [WGS 3337]

3339—**International Migration (3).** Examines international migration as a social process. Provides sociological tools to understand the causes, social processes, and consequences of international migration. Service Learning.

3340—**Sociology of Terrorism (3).** Introduces the sociological study of terrorism and examines fundamental questions on terrorism as a social phenomenon.

3352—**Technology and Society (3).** Explores the interrelationships between technology and society, emphasizing the impacts of technology on society and social factors contributing to the development and diffusion of technology.

3355—**Global Food Issues: On Bread and Water (3).** Explores contemporary global circumstances and problems through food-related topics, including public policy, conflict, water issues, climate change, inequalities, cultural imperatives, consumer demands and concerns.

3356—**Sociology Research Practicum (3).** Supervised research on sociological topics. An intensive study in sociological methodology, content analysis, and retrieval and collection of data using revolving topics.

3357—**Sociology of Globalization (3).** Study of cultures, political and economic institutions, and interdependencies of societies through a sociological lens.

3368—**Sociology of Deviance (3).** Study of different forms of deviant behavior in Western societies, emphasizing the social relativity of deviance and

theories that attempt to explain it. Examples of topics include tattooing, drug abuse, topless dancing, pedophilia, and mental illness.

- 3370—Social Inequality and Health (3).** Provides an introduction to social disparities in population health. From a sociological perspective, this course explores the social mechanisms that shape the health disparities in the U.S.
- 3372—Population Problems (3).** Introduces demographic techniques and concepts and applies them to the examination of social and economic causes of population structure and change. Examples are drawn from a variety of U.S. and international settings.
- 3383—Alcohol, Drugs, and Society (3).** Analysis of social factors related to the use and abuse of alcohol and other drugs.
- 3392—Introduction to Social Research Methods (3).** Nature of the sociological research process, including the scientific method, experimentation, participant observation and survey research. (CL)
- 3393—Classical Sociological Theories (3).** Emergence of systematic sociological theory out of social philosophy; evolution of sociology as a discipline in the late 19th and early 20th centuries. (CL)
- 3394—Contemporary Sociological Theories (3).** Review of selected current perspectives on social behavior. Special attention given to linkages between micro and macro levels of the social world. (CL)
- 4300—Internship Supervision Class (3).** Provides sociology credit for students who have obtained an internship with a qualifying program related to sociology or criminology. May be repeated for credit.
- 4307—Individual Studies in Sociology (3).** Prerequisite: Instructor consent and high scholastic achievement. Independent study. May be repeated for credit.
- 4311—Sociology of the Person (3).** Effects of group membership on individual attributes and behavior; focuses on the influence of experience in primary groups and positions in social structure.
- 4312—Human Societies, Health and Environment (3).** Focuses on the connections between human societies, health and environment. Topics include societal structure, health issues and environmental degradation.
- 4316—Aging and Society (3).** Theory and research on aging: covering demographic, sociocultural, economic, individual, and social factors.
- 4327—Juvenile Delinquency (3).** Delinquency is reviewed as a form of deviant behavior. Attention is given to prevalent theories of causation, distribution, and frequency of delinquency, and the treatment, prevention, and control of delinquent patterns of behavior.
- 4331—Religion and Society (3).** The sociological study of religious groups and beliefs. The reciprocal relationships between religious institutions and society.
- 4335—Victims of Crime (3).** A sociological analytical approach to social, scientific, and popular theories of criminal victimization, including its extent, nature, causes and effects, and lived experience of victims.
- 4381—Sickness, Health, and Society (3).** The sociological study of the medical institution and its interrelationship with other societal institutions. Differential definitions of health and illness.
- 4399—Research (3).** By invitation and under direction of a professor. Requires a completed research project and presentation at a formal conference for credit.

College of Arts & Sciences Graduate Programs

Interdisciplinary Graduate Programs

Comparative Literature Master's Concentration

Administered by the Comparative Literature Committee, this interdisciplinary concentration gives students the opportunity to study literature from a global perspective, to study two or more national literatures, and to concentrate attention upon the following special fields: periods, genres, theories, or relationships between literatures and other arts and disciplines.

Students specializing in Comparative Literature at the M.A. level must be admitted to the program in which they plan to major (e.g., English, Spanish). The graduate advisor of the program in comparative literature oversees the preparation of the Comparative Literature concentration.

Comparative Literature candidates who are not international students should have completed sufficient language study to begin or continue graduate work in the literature of at least two languages. Inquiries concerning sound preparation for concentration in Comparative Literature at the master's level and a Comparative Literature track at the doctor's level should be addressed to the graduate advisor of the program in comparative literature.

Majors in classical humanities, English, French, German, and Spanish with concentrations in Comparative Literature are available at the master's level. Students are required to take at least five courses for the concentration at the master's level, including at least two graduate literature courses in languages other than their major and at least two graduate comparative literature (CLT) courses. The fifth course may be an interdisciplinary elective approved by the graduate advisor of the Comparative Literature program. Degree plans must be approved by both the student's major advisor and the graduate advisor in Comparative Literature.

Contact: Dr. John Beusterien | john.beusterien@ttu.edu

Comparative Literature Doctoral Track

Administered by the Comparative Literature Committee, this interdisciplinary track gives students the opportunity to study literature from a global perspective, to study two or more national literatures, and to concentrate attention upon the following special fields: periods, genres, theories, or relationships between literatures and other arts and disciplines.

Comparative Literature candidates who are not international students should have completed sufficient language study to begin or continue graduate work in the literature of at least two languages. Inquiries concerning sound preparation for a concentration in Comparative Literature at the master's level and a track at the doctor's level should be addressed to the graduate advisor of the program in Comparative Literature.

Students following a track in Comparative Literature at the Ph.D. level must be admitted to the program in which they plan to major (e.g., English, Spanish). The graduate advisor of the program in Comparative Literature oversees the preparation of the Comparative Literature track.

At the doctoral level, majors are offered in English and Spanish with tracks in Comparative Literature. A track involves a minimum of six courses, including at least two in comparative literature (CLT) and at least three graduate courses taught in one or more foreign languages. The sixth course may be an interdisciplinary elective approved by the graduate advisor of the Comparative Literature program. A student's program is supervised by a doctoral committee drawn up in consultation with the student's major advisor and the graduate advisor in Comparative Literature.

Contact: Dr. John Beusterien | john.beusterien@ttu.edu

Graduate Course Descriptions

Comparative Literature (CLT)

- 5301—Theories of Literature (3).** Intensive exploration of selected theories or methodologies of literary study. May be repeated.
- 5310—Literature and Cultural Studies (3).** Places a variety of national literatures in relation to other cultural institutions and structures. Readings in English. May be repeated for credit.
- 5314—Literature and Gender (3).** Examines the representation of gender in various national literatures. May be repeated for credit.
- 5355—Studies in Comparative Literature (3).** Practice of the study of comparative literature with emphasis on themes and motifs. [ENGL 5355]
- 7000—Research (V1-12).**

Departmental Graduate Programs

Department of Biological Sciences

The Department of Biological Sciences offers three master's degrees and one research-based doctorate degree that culminates in a dissertation.

The basic requirements for all degrees follow those of the Graduate School, and all incoming graduate students are assigned a faculty advisor with whom they consult when developing their degree plan. Non-thesis M.S. degrees are coursework based; all others include research and culminate in a written thesis or dissertation. Students should refer to the Biological Sciences Graduate Student Handbook for additional details. The department does not have a foreign language requirement for graduate programs, and with a few exceptions (noted below), students work with their advisor to complete a tailored suite of coursework.

Biology, M.S. / Microbiology, M.S.

The department offers both a 30-hour thesis-based and 30-hour coursework-based, non-thesis M.S. in Biology or Microbiology. The thesis-based M.S. program provides students with in-depth research training under the mentorship of a tenure-track faculty member, and students complete up to 6 credit hours of BIOL 6000 (M.S. thesis research) while in the program. Students in the non-thesis-based program do not complete a research project but instead focus solely on classroom-based coursework. Students who expect to continue in academia beyond the M.S. degree are strongly encouraged to choose the thesis option.

The basic program requirements of both M.S. degrees follow those of the Graduate School, with the following additions. Students in the thesis-based program are required to take BIOL 5322 and BIOL 6202. Students in the non-thesis track are not required to take BIOL 5322 but must do so if they wish to be considered for appointment as a teaching assistant in the department.

Complete details of the requirements for this degree can be found in the Department of Biological Sciences Graduate Student Handbook.

Professional Science Master's Degree

The Professional Science Master's (P.S.M.) degree is a two-year coursework-based graduate degree designed to allow students to pursue advanced training and excel in science while simultaneously developing valued business skills. The P.S.M. degree qualifies students for employment in the public or private sector and offers two tracks: (1) the Ecology and Environmental Sustainability track is offered through the Department of Biological Sciences and (2) the Natural Resource Management track is offered in the Department of Natural Resources Management within the Davis College of Agricultural Sciences & Natural Resources. Details of the program can be found at

<https://www.depts.ttu.edu/online/programs/masters/professionalScience/>.

The degree consists of 15 to 19 hours of required courses (including either a 6-hour internship or a 3-hour capstone course) plus 15 hours of elective courses. In addition, students will be required to complete a series of online workplace skills modules (e.g., economics, ethics, interviewing skills, human resource management, conflict management, team building). Students accepted to the program but found to be deficient in prepara-

tion for taking graduate courses will be required to take leveling courses. The P.S.M. degree differs from a conventional M.S. degree in requiring an internship or capstone experience in lieu of a research-based thesis. Students interested in the P.S.M. should consult with the program advisor prior to applying for admission.

Biology, Ph.D.

The Department of Biological Sciences doctoral program provides students with in-depth training under the mentorship of a tenure-track faculty member. Among others, research strengths in the department include animal physiology, ecology, evolution and systematic biology, microbiology, plant biology, biotechnology, and quantitative biology.

The basic program requirements for Ph.D. candidates follow those of the Graduate School, with the following additions. Students in the thesis-based program are required to take BIOL 5322 and BIOL 6202. Students in the non-thesis track are not required to take BIOL 5322 but must do so if they wish to be considered for appointment as a teaching assistant in the department.

Complete details of the requirements for this degree can be found in the Department of Biological Sciences Graduate Student Handbook.

Graduate Course Descriptions

Biology (BIOL)

- 5000—Professional Internship (V3-6).** Prerequisite: Instructor consent. Supervised study providing advanced training for master's students. Emphasis in applying environmental science training and practice in a professional setting including businesses, government, and non-profits.
- 5301—Advanced Genetics (3).** Prerequisite: 8 hours of biology, 8 hours of chemistry, one semester of organic chemistry, or consent of instructor. Genetic and molecular analyses of inheritance. Course is offered to graduate students with limited knowledge in genetics.
- 5302—Advanced Cell Biology (3).** Prerequisite: 8 hours of biology, 8 hours of chemistry, plus at least one semester of organic chemistry; or consent of instructor. Structure and function of cells with introduction to modern techniques for cell study. Course is offered to graduate students with no formal training in cell biology.
- 5303—Advanced Experimental Cell Biology (3).** Prerequisite: Consent of instructor. A project-oriented introduction to modern research techniques used to study cellular and molecular processes in eukaryotic cells.
- 5305—Organic Evolution for Advanced Students (3).** Prerequisite: BIOL 3416 or equivalent course in genetics. The concept of evolution, its mode and tempo of operation, and its relationship to organic diversity in its broadest sense are emphasized. S.
- 5306—Advanced Cancer Biology (3).** Prerequisite: BIOL 3320; BIOL 4324 is recommended. Presents a comprehensive overview covering the history of cancer biology to the most recent findings in the field. Molecular and cellular biology as well as clinical topics will be covered.
- 5309—Advanced Ecology (3).** Prerequisite: Background in organismal biology or undergraduate ecology or consent of instructor. A detailed examination of the structural and functional relationships underlying the organization of populations, communities, and ecosystems.
- 5310—Advanced Community Ecology (3).** Prerequisite: A course in ecology or consent of instructor. An investigation of both theoretical and experimental approaches to understanding the composition, diversity, and structure of plant, animal, and microbial communities.
- 5311—Ecology for Teachers (3).** Prerequisite: Admission to the Master of Science in Multidisciplinary Science program or consent of instructor. An investigation into ecology for individuals, populations, communities, and ecosystems for practicing teachers.
- 5312—Cell and Molecular Biology for Teachers (3).** Prerequisite: Admission to the Master of Science in Multidisciplinary Science program or consent of instructor. An investigation into cellular and molecular biology intended for practicing teachers.
- 5313—Advanced Medical Entomology (3).** Prerequisite: Consent of instructor. An advanced exploration into the roles of insects and other arthropods in the direct causation of disease or disease transmission in humans.
- 5316—Advanced Principles of Terrestrial Ecosystem Ecology (3).** Students will learn the fundamentals of ecosystem ecology, including interactions between biological organisms and their environment. Students will be evaluated on their ability to discuss and disseminate course topics. [BIOL 4316]

- 5320—Advanced Molecular Biology (3).** Coverage includes a rigorous examination of molecular processes in cellular functioning. Experimental approaches used to investigate molecular events in eukaryotes, prokaryotes, and viruses will be emphasized. S.
- 5322—Biology Pedagogy (3).** Biology graduate TAS' knowledge, skills, and confidence are developed to foster learning in the biology classroom by interactions, observations, reflections, and teaching implementation.
- 5324—Comparative Endocrinology (3).** Prerequisite: ZOOL 3405, 3416, BIOL 1404, or equivalent. Hormones as chemical coordinators of bodily functions. [BIOL 4324] S.
- 5326—Advanced Vector Biology (3).** Prerequisites: BIOL 1403 and BIOL 1404. Introduces graduate students to the principles of transmission of pathogens by arthropods with an emphasis on understanding the biology and ecology of different arthropod taxa. [BIOL 4326]
- 5330—Advanced Landscape Ecology (3).** Prerequisite: Consent of instructor. In-depth examination of how we quantify patterns and effects of spatial heterogeneity on organisms and ecological processes. Discussion section is required.
- 5332—Ecology and Evolution of Infectious Disease (3).** Prerequisites: BIOL 1403 and BIOL 1404 or equivalent. Introduces students to key concepts in the ecology and evolution of infectious diseases across diverse taxa and levels and connects these key concepts to applications to a variety of real world issues, including climate change and conservation. [BIOL 4332]
- 5340—Biological Informatics (3).** Hands-on training in the data manipulation and analysis of genomics data.
- 5350—Genomes and Genome Evolution (3).** Prerequisite: Permission of instructor. Fundamentals of genome analysis and how genomics impacts our understanding of organismal biology, evolution, and medicine. [BIOL 4340]
- 5360—Conservation Biology (3).** Focuses on the principles of conservation biology, discussing the values of and threats to biodiversity, before exploring interdisciplinary approaches to biodiversity protection. [BIOL 4360]
- 5401—Advanced Plant Physiology (4).** Prerequisites: Organic chemistry or biochemistry and BIOL 1403 and BIOL 1404 or equivalent. A general plant physiology course for graduate students with no previous training in plant physiology. Emphasis is placed on recent experimental advances in the field.
- 5404—Advanced Taxonomy of the Vascular Plants (4).** A survey of the diversity of vascular plants (emphasis on angiosperms) and the methodology of their classification. Lecture emphasizes modern approaches to systematics; lab emphasizes identification and collection techniques.
- 5407—Advanced Population Biology (4).** Prerequisite: BIOL 3301, BIOL 4393, or equivalent. Introduction to the genetics or ecology of populations including a survey of topical, historic, and current literature with emphasis on experimental evaluation of testable hypotheses. S.
- 5416—Advanced Invertebrate Zoology (4).** Prerequisite: Consent of instructor. Develops a comprehension of the structure, function, ecology, and evolution of invertebrate animals, with an emphasis on the relationships among taxa and the diversity within taxa. Written reports on special projects required. [BIOL 4416]
- 5418—Advanced Ornithology (4).** Prerequisite: Consent of instructor. Selected topics including avian systematics, migration, physiology, ecology, and comparative behavior. [BIOL 4418]
- 6000—Master's Thesis (V1-6).**
- 6100—Advanced Topics in Biology (1).** Prerequisite: Consent of instructor. Special areas of current interest not commonly included in other courses. Content normally different each time offered. May be repeated for additional credit.
- 6101—Seminar (1).** Prerequisite: Consent of instructor. Various topics in modern biology. May be repeated for credit.
- 6202—Preparation for Graduate Learning and Teaching in Biology (2).** Prerequisite: Acceptance in a graduate degree program in the Department of Biological Sciences or consent of instructor. Preparation of graduate students for the roles of scholar, researcher, and teaching assistant. Emphasizes literature research, preparation of visual aids, innovative teaching strategies, and problem-solving methods. F.
- 6301—Advanced Topics in Biology (3).** Prerequisites: MBIO 4402 with minimum grade of B and consent of instructor. Special areas of current interest not commonly included in other courses. Content normally different each time offered. May be repeated for additional credit.
- 6302—Principles and Practice of Phylogenetic Systematics (3).** Character, analysis, phylogeny reconstruction, consensus procedures, and phylogenetic classification, using morphologic and molecular data.
- 6305—RNA Silencing and Regulatory Small RNAs (3).** Prerequisites: BIOL 3320 and BIOL 3416. Covers the most recent developments in small RNA biology, an emerging field in molecular and cell biology.
- 6306—Advanced Field Botany (3).** A field-trip and herbarium-based course that will provide students with sophistication in the identification and classification of plants in natural areas of West Texas and adjacent regions.
- 6309—Biostatistics in R (3).** Prerequisite: Consent of instructor. Studies of current applications of mathematics, statistics, and computing to the biological sciences. May be repeated for additional credit.
- 6310—Transposable Element Biology (3).** Prerequisite: Consent of instructor. Examines the understudied-half of any given eukaryotic genome that consists of transposable elements, which influence the structure and function of the genomes they occupy.
- 6311—Applied Virology (3).** Covers in detail aspects of infectious diseases caused by human viruses and the applicability of virology to other fields in biology.
- 6314—Advanced Plant Molecular Biology (3).** Prerequisites: BIOL 1403 and BIOL 1404, BIOL 3304, and BIOL 3320 or equivalent. Molecular mechanisms regulating plant metabolism. Intensive reading of current literature is required. Alternate years.
- 6325—R as a Research Tool: Introduction to Programming (3).** A workshop course that teaches the basics of the computer language "R," an open-source, interactive programming language designed for scientific numerical computation.
- 6329—Advanced Quantitative Methods (3).** Prerequisites: BIOL 6309 or equivalent evidence of statistical background and experience in R, or consent of instructor. Deals with analyses that go beyond the traditional statistics course, including multivariate analyses, bootstrapping approaches, mixed-effects models, optimization procedures in non-linear models.
- 6350—Advanced Physiological Plant Ecology (3).** Investigation of the physiological processes of plants that contribute to understanding the ecological distribution and evolutionary success of plants in their physical environment.
- 6360—Environmental Sustainability (3).** Integrates interactions between human activities, ecological systems and innovative approaches using ecological concepts in balancing environmental quality, economic growth, and culture.
- 6361—Ecology and Ecosystems (3).** Explores processes influencing the distribution of organisms, the interactions among organisms, and the interactions between organisms and the transformation and flux of energy and matter.
- 6364—Reconciliation Ecology: Restoring Ecosystem Services to Built Environments (3).** Examines methods of inventing and reconfiguring human habitats to conserve species diversity and reestablish ecosystem services where people live, work, and play.
- 6370—Metagenomic Analysis (3).** Provides a classroom experience that combines hands-on computer lab training with lecture and discussion of consequential work in the field of metagenomic analysis.
- 6392—Marine Biology (3).** The study of marine organisms and their environments.
- 6409—Advanced Plant Development (4).** Molecular and cellular analysis of plant development with emphasis on experimental approaches. Alternate years.
- 6430—Fluorescence Microscopy (4).** Prerequisite: Instructor permission. Teaches students to design, execute, image, and analyze fluorescence microscopy experiments.
- 6520—Advanced Experimental Cell Biology (5).** Modern cell biology research techniques used in biomedical research. Offered odd years only.
- 7000—Research (V1-12).**
- 8000—Doctor's Dissertation (V1-12).**
- Microbiology (MBIO)**
- 5301—Advanced General Microbiology (3).** Prerequisite: CHEM 3305 and CHEM 3306 or equivalent. Content is similar to that of MBIO 3401 except that readings or original research in one area of microbiology is required. May not be taken for credit by students who have taken MBIO 3401. F, S.
- 5303—Microbe-Plant Interactions (3).** Prerequisite: MBIO 3400 or MBIO 3401 or BIOL 3420 or BIOL 3401. Biochemical, molecular, genetic, and ecological basis of pathogenic and symbiotic microbe-plant interactions. F, even years.
- 5310—Foundations of Microbiological Research (3).** Provides training in conducting modern microbiological research in academic and industry settings; discusses current research topics, experimental design, etc.
- 5401—Current Perspectives in Microbial Ecology (4).** Prerequisite: BIOL 3309, or MBIO 3401, or equivalent; or consent of instructor. Course will examine specific theories and concepts concerning ecology of the

soil microflora and microfauna, and the roles of these organisms in ecosystem functioning.

- 5403—Immunobiology (4).** Prerequisite: Consent of instructor. Content is similar to that of MBIO 4402 except that readings or research in one area of immunology is required. May not be taken for credit by students who have taken MBIO 4402. S.
- 5404—Pathogenic Microbiology (4).** Prerequisite: C or better in MBIO 3401 or MBIO 5401; may not be taken for credit by students who have received credit for MBIO 4404. A detailed study of pathogenic microorganisms.
- 5408—Microbial Genetics (4).** Prerequisite: MBIO 3401, or MBIO 5301, or equivalent; or consent of instructor. Topics include current techniques of genetic analysis, molecular biology, molecular genetics, nucleic acid metabolism, and gene regulation in microorganisms, with emphasis on bacteria and bacteriophages. May not be taken for credit by students who have taken MBIO 4406.
- 6000—Master's Thesis (V1-6).**
- 6302—Advanced Bacterial Physiology (3).** Prerequisite: MBIO 3401 or MBIO 5301; 12 semester hours of chemistry, including biochemistry or concurrent registration; consent of instructor. Advanced study of bacterial physiology. S.
- 6306—General Virology (3).** Prerequisite: Consent of instructor. An introduction to the biology of animal, bacterial, and plant viruses. S.
- 6311—Advanced Biofilms (3).** Prerequisite: Instructor consent. Delves into primary literature surrounding the latest advances in biofilm research to demonstrate the beneficial and detrimental impacts of biofilms while promoting independent scientific reasoning.
- 6367—Molecular Biology of Parasitism (3).** Prerequisites: MBIO 3401, BIOL 3320, or equivalent. The molecular biology and pathogenesis of parasites.

Zoology (ZOOL)

- 5312—Advanced Animal Behavior (3).** Comparative animal behavior with emphasis on genetics and neurophysiology and how they relate to survival. F.
- 5401—Animal Histology for Advanced Students (4).** Microscopic anatomy of the normal cells, tissues, and organ systems of the human and other mammals are studied. Open to graduate students who have not taken ZOOL 3401 or equivalent.
- 5402—Advanced Mammalogy (4).** Studies of recent advances in mammalogy. For students who have not taken ZOOL 4406. F.
- 5407—Vertebrate Zoology for Advanced Students (4).** Diversity, evolutionary relationships, and adaptations of vertebrates. Field trips required. Open to students who have not taken ZOOL 4407.
- 5409—Comparative Physiology for Advanced Students (4).** Prerequisite: ZOOL 3405 or BIOL 4416; BIOL 3416; CHEM 3305, CHEM 3306 recommended. A comparison of physiological functions including homeostatic mechanisms, muscle, nerve, in the major phyla. Laboratory reports written in a journal format are required.
- 5421—Ecological Entomology (4).** Prerequisite: Consent of instructor. An advanced exploration of the behavior, ecology, and evolution of insects.
- 6302—Principles of Systematic Zoology for Advanced Students (3).** Prerequisite: BIOL 3416 or equivalent; BIOL 3305 or BIOL 5305 recommended. Theory and practice of naming, describing, and classifying organisms. Speciation, phylogeny reconstruction, and other current topics in evolutionary biology emphasized. F, even years.
- 6303—Seminar in Mammalogy for Advanced Students (3).** Prerequisite: Consent of instructor. A historical perspective of mammalogy as a science including advances in ideology, character systems, and data analysis. Current topics and controversies will be addressed. S, odd years.
- 6321—Advanced Herpetology (3).** Prerequisite: Consent of instructor. Covers the biology of amphibians and reptiles. Stresses classification, evolution, ecology, and anatomy of the various groups.

Department of Chemistry and Biochemistry

Students seeking advanced degrees must take the diagnostic examination in their area of specialization and in two other non-specialty areas after arrival in early spring or fall. These examinations are based on the undergraduate curriculum and are also offered in late spring. Students who fail the diagnostic examination in their specialty area will be given a second and final opportunity to pass this examination.

Chemistry, M.S.

A master's degree program includes a minimum of 19 credit hours of graduate-level coursework, 5 credit hours of research (CHEM 7000), and 6 hours of thesis (CHEM 6000).

Chemistry, Ph.D.

A doctoral degree program includes a minimum of 24 credit hours of graduate-level coursework, 36 credit hours of research (CHEM 7000), and 12 credit hours of dissertation (CHEM 8000).

A cumulative examination system is used as the written part of the qualifying examination for the doctoral degree, with cumulative examinations offered six times each year. A successful oral defense of the Ph.D. research and future work plan must be completed before the end of the second year. This constitutes the oral part of the qualifying exam.

Each student fulfilling the doctoral residence requirement in chemistry and biochemistry will normally enroll for 24 hours within a 12-month period. Ordinarily, this would be accomplished by taking 9 hours in two long semesters and 6 hours in the summer.

Graduate Course Descriptions

Chemistry (CHEM)

- 5010—Individual Studies in Chemistry (V1-6).** Prerequisite: Instructor consent. A structured independent graduate studies course under the guidance of a faculty member. May be repeated for credit.
- 5101—Seminar (1).** Prerequisite: Graduate standing in chemistry. Required of all graduate students majoring in chemistry.
- 5102—Seminar (1).** Prerequisite: Graduate standing in chemistry. Required of all graduate students majoring in chemistry.
- 5104—Topics in Chemistry (1).** Prerequisite: Instructor consent. Special area of chemistry not commonly included in other courses. Topics may be taken from the traditional chemical disciplines or any interdisciplinary combination. May be repeated under a different topic for credit.
- 5301—Advanced Inorganic Chemistry I (3).** Prerequisite: Instructor consent. Principles of coordination chemistry. Structure, bonding, properties, and reactions of complex compounds.
- 5302—Advanced Inorganic Chemistry II (3).** Prerequisite: Instructor consent. Reaction mechanisms of inorganic compounds.
- 5304—Topics in Chemistry (3).** Prerequisite: Instructor consent. Special area of chemistry not commonly included in other courses. Topics may be taken from the traditional chemical disciplines or any interdisciplinary combination. May be repeated under a different topic for credit.
- 5310—Polymer Chemistry (3).** Prerequisite: Instructor consent. An introduction to the chemistry of macromolecules, polymer and polymer characterization. This will build on a knowledge of chemistry to investigate the synthesis, structures, properties, and applications of polymers.
- 5314—Advanced Analytical Chemistry (3).** Prerequisite: Instructor consent. General principles and special methods of analytical chemistry.
- 5315—Atmospheric Chemistry (3).** Prerequisite: Instructor consent. An advanced course covering the production, monitoring, and fate of gases, vapors, and particulates in planetary atmospheres.
- 5318—Analytical Separation Science and Technology (3).** Prerequisite: Instructor consent. The science and technology of analytical separation techniques, including chromatography, electrophoresis, field flow fractionation, and capillary separation.
- 5319—Electrochemical Analysis (3).** Prerequisite: Instructor consent. Principles and applications of electrochemistry with emphasis on topics in electroanalytical chemistry.
- 5320—Analytical Spectroscopy (3).** Prerequisite: Instructor consent. A detailed fundamental assessment and survey of the important techniques in analytical spectroscopy.
- 5321—Advanced Organic Chemistry I (3).** Prerequisite: Instructor consent. Principles and reactions of organic chemistry, with emphasis on the most recent developments from the current literature.
- 5322—Advanced Organic Chemistry II (3).** Prerequisite: Instructor consent. Principles and methods of synthesis of organic compounds.
- 5323—Modern Principles of Organic Chemistry I (3).** Prerequisite: Instructor consent. A survey of modern organic chemistry with emphasis on reactions and contemporary theory. Not appropriate for graduate students in the department.
- 5324—Modern Principles of Organic Chemistry II (3).** Prerequisite: Instructor consent. A continuation of CHEM 5323. Primarily intended for graduate minors in chemistry. Will serve as the prerequisite for other

graduate courses in organic chemistry. Not appropriate for graduate students in the department.

- 5326—Organic Spectroscopic Analysis (3).** Prerequisite: Instructor consent. Theory and interpretation of spectra of organic compounds: MS, IR, carbon and proton NMR, 2D-NMR.
- 5327—Physical Organic Chemistry I (3).** Prerequisite: Instructor consent. Properties and reactions of organic compounds and the mechanisms of organic reactions considered from the standpoint of the principles of physical chemistry.
- 5329—Supramolecular Chemistry: Molecular Self-Assembly and Molecular Recognition (3).** Prerequisites: CHEM 3306 or CHEM 5321 or the equivalent or permission of the instructor. Bridges organic chemistry, inorganic chemistry, surface science, materials science, and analytical chemistry. Supramolecular chemistry is of particular interest when considering the self-assembly of molecules into larger systems and molecular recognition.
- 5330—Biochemistry I (3).** Prerequisite: Instructor consent. Properties of biological compounds. Chemical processes in living systems. For advanced study by graduate students with majors outside the department. Not appropriate for graduate students in the department.
- 5331—Biochemistry II (3).** Prerequisite: Instructor consent. Properties of biological compounds. Chemical processes in living systems. For advanced study by graduate students with majors outside the department. Not appropriate for graduate students in the department.
- 5332—Biochemistry III (3).** Prerequisite: Instructor consent. Third semester of a three semester general biochemistry series for nonmajors. Topics include nucleotide metabolism and cellular processes involving nucleic acids. Not appropriate for graduate students in the department.
- 5333—Proteins (3).** Prerequisite: Instructor consent. Chemical and physical properties of proteins. Primary and conformational structure determination.
- 5334—Principles of Biochemistry (3).** Prerequisite: Instructor consent. A one-semester course geared towards graduate students in animal sciences, food technology, plant and soil sciences, biotechnology, and biology. Not appropriate for graduate students in the department.
- 5335—Physical Biochemistry (3).** Prerequisite: Instructor consent. Biophysical methods and approaches to the study of structure-function relationships in biopolymers.
- 5336—Lipids (3).** Prerequisite: Instructor consent. Structure and function of lipids. Emphasis is placed on the methods of characterization, evolution, biosynthetic pathways, and biological roles of lipids.
- 5337—Enzymes (3).** Prerequisite: Instructor consent. Structure, mode of action, and kinetics of enzymes.
- 5339—Nucleic Acids (3).** Prerequisite: Instructor consent. Structure, biosynthesis, modification, and function of DNA and RNA. Emphasis on eukaryotic gene expression and regulation.
- 5340—Physical Chemistry Principles I (3).** Prerequisite: Instructor consent. A foundation course for the graduate student minoring in chemistry. Covers a wide range of principles and is a prerequisite for other chemistry courses. Not appropriate for graduate students in the department.
- 5341—Physical Chemistry Principles II (3).** Prerequisite: Instructor consent. A foundation course for the graduate student minoring in chemistry. Prerequisite for other courses in chemistry. Not appropriate for graduate students in the department.
- 5342—Introduction to Quantum Chemistry (3).** Prerequisite: Instructor consent. Introduction to quantum mechanics, spectroscopy, and the electronic structures of atoms and molecules.
- 5343—Quantum Chemistry (3).** Prerequisite: Instructor consent. The application of non-relativistic wave mechanics to problems of chemical structure and reactivity.
- 5344—Kinetics of Chemical Reactions (3).** Prerequisite: Instructor consent. A survey of chemical kinetics and dynamics, including transition state theory, scattering theory, state-to-state kinetics, cross sections, and the master equation.
- 5345—Molecular Spectroscopy (3).** Prerequisite: Instructor consent. Principles of electronic, vibrational, and rotational spectroscopy and applications for determining molecular structure and other properties.
- 5346—Statistical Mechanics and Thermodynamics (3).** Prerequisite: Instructor consent. Equilibrium and non-equilibrium systems including ensembles, density matrices, and time-correlation functions.
- 5349—Physical Chemistry Principles for Biological Sciences (3).** Prerequisite: Instructor consent. A physical chemistry course for graduate students in biological sciences. Topics: Thermodynamics, electrochemistry, chemical kinetics, and quantum mechanics. Not appropriate for graduate students in the department.
- 5360—Conceptual Chemistry for Teachers I (3).** Prerequisite: Instructor consent. An integrated course including dimensional analysis, nomenclature, stoichiometry, atomic and molecular structure and geometry, quantum mechanics, periodic properties, thermochemistry, states of matter, and solution chemistry.

5361—Conceptual Chemistry for Teachers II (3). Prerequisite: Instructor consent. A continuation of CHEM 5360, covering equilibrium; acid-base chemistry; solubility; kinetics; electrochemistry; nuclear chemistry; and introductory organic chemistry, biochemistry, and polymer chemistry.

6000—Master's Thesis (V1-6).

7000—Research (V1-12).

8000—Doctor's Dissertation (V1-12).

Department of Classical and Modern Languages and Literatures

Before beginning a graduate program in this department, students should consult the graduate advisor of the particular program concerning departmental admission procedures and degree requirements. Admission to the Graduate School requires departmental recommendation as well as approval by the Graduate Dean.

Accelerated Bachelor's to Master's Degrees

Languages and Cultures, B.A. / Languages and Cultures, M.A. or Languages and Cultures, B.A. / Romance Languages, M.A.

Exceptional undergraduate Languages & Cultures (concentrations Classics, French, & German) majors who wish to complete an ABM degree in a timely manner may apply for admission into the Languages & Cultures (Classics or German), B.A. to Languages & Cultures, M.A. program or to the Languages & Cultures (French), B.A. to the Romance Languages (French), M.A. program. Admission to this program allows students to count 9 dual hours of undergraduate coursework towards the master's degree. The application should be made during the first semester of the junior year following procedures available from the graduate program coordinator in the department.

Spanish, B.A. / Romance Languages, M.A.

Exceptional undergraduate Spanish majors who wish to complete an ABM degree in a timely manner may apply for admission into the Spanish, B.A. and Romance Languages, M.A. program. Admission to this program allows students to count 9 dual hours of undergraduate coursework towards the master's degree. The application should be made during the first semester of the junior year following procedures available from the graduate program coordinator in the department.

Languages and Cultures, M.A.

This degree has several possible concentrations. Depending on the concentration, students may complete 30 hours of graduate courses and a thesis or 36 hours of coursework. Candidates for this degree are directed to the Guide to the M.A. Degree Program in Languages and Cultures, which is obtainable from the graduate advisor or the departmental office.

Applied Linguistics Concentration. Students in the Master of Arts in Languages and Cultures with a concentration in Applied Linguistics complete 36 hours of coursework. Areas of emphasis include teaching English as a second language, teaching second/foreign languages, or general applied linguistics. Candidates for this degree must demonstrate knowledge of a language other than English prior to entering the program. There is no foreign language requirement as part of the program.

Classics Concentration. Students in the Master of Arts in Languages and Cultures with a concentration in Classics may complete 30 hours of graduate courses and a thesis or 36 hours of coursework. Candidates for this degree are directed to the Guide to the M.A. Degree Program in Languages and Cultures—Classics, which is obtainable from the graduate advisor or the departmental office. Areas of emphasis include art history, gender, language, and literature.

German Concentration. Students in the Master of Arts in Languages and Cultures with a concentration in German may complete 30 hours of graduate courses plus a thesis or 36 hours of coursework. Areas of interest include classical and contemporary literature, applied linguistics, and cultural studies. The German concentration is not available at this time.

Romance Languages, M.A.

French or Spanish Concentration. Applicants for the Master of Arts in Romance Languages degree with a concentration in French or Spanish may complete 30 hours of graduate courses and a thesis or 36 hours of coursework. The degree may include a 6-hour minor. For Spanish and French, areas of interest include literature, comparative literature, linguistics, and cultural studies.

Spanish, Ph.D.

The doctoral program in Spanish requires both greater breadth of study than the M.A. program and greater concentration in the area selected for specialization. To fulfill these requirements the student must demonstrate a reasonable comprehensive knowledge of literature or linguistics and the ability to engage in original research. To qualify for admission to candidacy for the Ph.D. degree in Spanish, applicants must complete a graduate minor in another language or demonstrate a reading knowledge of one approved language other than English or Spanish. Any substitution must be submitted in writing to the Spanish graduate advisor and approved by the candidate's doctoral committee.

Students in the Ph.D. program normally minor within the department in one of the above-mentioned minor areas, but they may select a combination of courses within and outside the department if approved by the Spanish graduate advisor. Students should consult with a graduate advisor for approved options. A Ph.D. minor consists of 15 to 18 hours of coursework in approved areas. Spanish Linguistic track students are required to minor in the 18 credit hour graduate level Applied Linguistics minor program.

Coursework for the Ph.D. generally amounts to a minimum 60 hours beyond the B.A. degree, including at least 45 hours of coursework in Spanish and 15 additional hours in a minor program outside the major field. In addition, the student must satisfy the preliminary examination requirement, pass qualifying examinations, and prepare and defend a dissertation.

Languages and Cultures, M.A. / Curriculum and Instruction, M.Ed. or Romance Languages, M.A. / Curriculum and Instruction, M.Ed.

There are 36 hours total each in the regular M.A. and M.Ed. programs. The joint degree will consist of 60 hours (36 credit hours for each program, with 12 credit hours mutually recognized toward each program's requirement and 24 credit hours that are unique to each program).

This joint degree will be of interest to students considering careers in human resources, instructional coaching, curriculum coordination, higher education, and K-12 education (both public and private) in the state of Texas and beyond. Students will graduate from this program with advanced skills in curriculum and instruction and in a specific content area: Applied Linguistics, Classics, French, German, or Spanish. The training they receive through this joint degree will equip them with transferable skills that are coveted by employers, thus preparing them for a range of careers in the 21st century.

Applied Linguistics Graduate Minor

Applied Linguistics is offered as a minor for students who may find that either second language acquisition studies or second language instruction studies (or a combination) a useful complement to their major area of work. A doctoral minor consists of 18 hours of applied linguistics (LING) courses offered through the Department of Classical and Modern Languages and Literatures, as approved by the Program Director of Applied Linguistics. A minor at the master's level consists of 6 hours of applied linguistics courses, as approved by the Program Director of Applied Linguistics.

Courses in the applied linguistics program include but are not limited to the following: LING 5312, 5320, 5322, 5325, 5327, 5330, 5332, 5336, 5340, 5382 (repeatable), 5383 (repeatable).

Portuguese Graduate Minor

The minor in Portuguese is designed to offer both linguistic and cultural knowledge through comparative analysis of the cultures and literatures of Portuguese-speaking regions. Required courses are PORT 5307, 5341, 5342, 5355, 7000.

Graduate Course Descriptions

Classics (CLAS)

- 5101—**Classical Language Pedagogy (1).** Systemic formal training in language pedagogy for Latin and ancient Greek.
- 5102—**Classical Culture Pedagogy (1).** Systematic formal training in pedagogy for diverse classical culture courses.
- 5301—**Studies in Greco-Roman Literature (3).** Selected studies in major authors, genres, or themes. May be repeated up to 9 credit hours with different content.
- 5305—**Aims and Methods of Classical Scholarship (3).** A general overview of aims and methods of ancient studies covering primary and secondary sources.
- 5311—**Classical Art and Archaeology (3).** Examines architecture, sculpture, and painting of the Greco-Roman World. May be repeated up to 9 credit hours with different content.
- 5315—**Topics in Classics (3).** A problem-oriented approach to contemporary themes in the scholarship of Greco-Roman antiquity. Repeatable for up to 9 credit hours with different content.
- 5350—**The Classical Tradition (3).** Designed to acquaint students with the influence of ancient Rome and Greece on Western culture. Readings in English.
- 6000—Master's Thesis (V1-6).
- 7000—Research (V1-12).

Classical and Modern Languages and Literatures (CMLL)

- 5301—**Fundamentals of Research and Scholarship (3).** Systematic study of research methods, bibliographical materials, and problems in the fields of languages and literatures. May be repeated for credit with different content.
- 5302—**Theoretical Foundations (3).** Theories and practices of literary analysis and criticism with emphasis on critical / analytic thinking, reading, and writing. May be repeated for credit with different content.
- 5305—**Seminar in Language Studies (3).** Issues related to language and language learning. Repeatable for credit with different content.
- 5307—**Studies in World Language and Culture (3).** Examines the language and/or character of distinctive world cultures, including their products, perspectives, and practices. Repeatable for credit with different content.
- 5309—**Studies in Literature and Culture (3).** Interpretation and analysis of the literature and culture of distinctive world civilizations. Repeatable for credit with different content.
- 6000—Master's Thesis (V1-6).
- 7000—Research (V1-12).

English as a Second Language (ESL)

- 5305—**Academic Listening Skills (3).** Teaches listening, note-taking, interrogative and verbal skills to students who are non-native speakers of English. May be repeated once.
- 5310—**Professional Communication in English (3).** Foundation of English-speaking fluency and pronunciation for international teaching assistant candidates and graduate students seeking better professional communication ability. May be repeated once.
- 5312—**English Communication for Teaching Professionals (3).** Prerequisite: Instructor consent. Communicating in U.S. academic classrooms for international teaching assistant candidates through guided practicum experiences in academic departments. May be repeated once.
- 5315—**Academic Writing in English (3).** Focuses on the fundamentals of writing needed by international students for graduate-level coursework, including in-class reports and assignments.

5317—Advanced Projects in Academic English (3). Focusing on advanced writing projects, the preparation of theses and dissertations, and the preparation of research for publication. May be repeated once.

French (FREN)

- 5301—Practicum in Language Teaching: Teaching Methods (3).** Introduction to principles and techniques of effective language teaching through course observations, creation and evaluation of lesson plans, skill-based activities, and course materials.
- 5310—Medieval and Renaissance Literature (3).** Reading, analysis, and interpretation of selected works of the Middle Ages and the Renaissance.
- 5311—From the Baroque to the Revolution (3).** Reading, analysis, and interpretation of selected works of the 17th and 18th centuries.
- 5315—Studies in French Language and Literature (3).** Concentrates on topics in French civilization, linguistics, and literature with content varying to meet the needs of students. Repeatable with different content.
- 5319—Nineteenth Century Literature (3).** Readings, analysis, and interpretation of selected works of the 19th century. Course content may vary. May be repeated once for credit.
- 5320—Twentieth Century Literature (3).** Readings, analysis, and interpretation of selected works of the 20th century. Course content may vary. May be repeated once for credit.
- 5321—French Cinema (3).** Presentation of the major trends of French cinema from the beginnings to the present. Course content may vary. May be repeated once for credit.
- 5327—French Civilization (3).** Historical, geographical, social, and artistic aspects of the development of the culture of France. Course content will vary. May be repeated once for credit.
- 5328—Francophone Literature and Culture (3).** Readings and topical studies relating to French-speaking cultures (in Africa, Europe, U.S., Quebec, and Caribbean) and French and Francophone culture that may require special treatment.
- 5329—Studies in Literary Criticism and Theory (3).** Current and traditional ways of analyzing literary texts in their cultural contexts with emphasis on theory. Course content will vary. May be repeated once for credit.
- 5330—Advanced French Translation (3).** Presents translation strategies to students who are proficient in French and English.
- 5341—Intensive French for Graduate Research I (3).** French readings with related grammar to acquaint graduates with French as a research skill; equivalent of two years of normal coursework. Not intended to meet major or minor degree requirements.
- 5342—Intensive French for Graduate Research II (3).** French readings with related grammar to acquaint graduates with French as a research skill; equivalent of two years of normal coursework. Not intended to meet major or minor degree requirements.
- 6000—Master's Thesis (V1-6).**
- 7000—Research (V1-12).**

German (GERM)

- 5303—Intensive German for Graduate Research I (3).** Accelerated grammar course acquainting graduates with German as a research skill to be used in translating research articles in the graduate's field. Equivalent to two years of normal coursework. Not intended to meet major or minor degree requirements.
- 5304—Intensive German for Graduate Research II (3).** Accelerated grammar course acquainting graduates with German as a research skill to be used in translating research articles in the graduate's field. Equivalent to two years of normal coursework. Not intended to meet major or minor degree requirements.
- 5311—German Literature of the Nineteenth Century (3).** A study of German literature from 1830 to 1895, including Biedermeier, junges Deutschland, poetic realism, and naturalism.
- 5312—Survey of German Culture (3).** A study of the development of German culture throughout history.
- 5313—Germany and the European Union (3).** Prerequisite: Graduate standing. A study of the social, economic, and political structures of the European Union and their representation, with particular emphasis on the German perspective.
- 5314—History of the German Language (3).** Development of German from its origins to the present with emphasis on its phonological, morphological, and syntactic change.
- 5315—Holocaust, Genocide, and Memory in Germany (3).** A study of Germany's relationship to genocide, especially the Holocaust, through literature and film.
- 5316—Award-Winning German-Language Literature (3).** A study of award-winning German-language literature with emphasis on the significance of specific literary awards.

5317—East-German Literature and Culture (3). Prerequisite: Graduate standing. A study of East German Literature and Culture, its characteristics and effects from 1945 to today.

- 5318—German Romanticism (3).** Study of German literature from 1790 to 1830.
- 5319—The German "Klassik" (3).** Introduction to the classical works of Goethe and Schiller and other authors of the period.
- 5321—Seminar in German Literature (3).** A study of various genres of literature with special emphasis on philosophical, theoretical, or psychological aspects. May be repeated for credit up to 12 hours.
- 5322—German Business Culture (3).** This seminar offers a study of business cultures in German-speaking countries, with a focus on intercultural competence. Conducted in English.
- 5324—German Literature of the Enlightenment (3).** A study of German literature from 1700 to 1785, including "Aufklärung," "Sturm und Drang," and "Empfindsamkeit."
- 6000—Master's Thesis (V1-6).**
- 7000—Research (V1-12).**

Greek (GRK)

- 5330—Greek Prose (3).** Selected readings from Greek texts in history, philosophy, oratory, rhetoric, biography, and the novel. Topics may vary. May be repeated up to 9 credit hours with different content.
- 5340—Greek Poetry (3).** Selected readings in Greek poetic texts from various genres. Topics may vary. May be repeated up to 9 credit hours with different content.
- 7000—Research (V1-12).**

Italian (ITAL)

- 5301—Topics in Italian Literature (3).** Study of selected Italian literary works. Class taught partially in Italian with Italian readings. May be repeated twice if content is different.
- 7000—Research (V1-12).**

Latin (LAT)

- 5304—Latin Poetry: Epic, Lyric, Elegiac, and Pastoral (3).** Study of one or more poetic genres. May be repeated up to 9 credit hours with different content.
- 5310—Seminar in Latin Literature (3).** Content will vary to meet the needs of the students.
- 5341—Intensive Latin for Graduate Research I (3).** Grammar and readings for reading knowledge. Equivalent to one year of normal coursework. Not for classics majors or Latin minor graduate degree requirements.
- 5342—Intensive Latin for Graduate Research II (3).** Prerequisite: LAT 5341 or LAT 1502. Continuation of LAT 5341. Equivalent to completion of LAT 2302. Not for classics majors or Latin minor graduate degree requirements.
- 5360—Latin Prose (3).** Selected readings from Latin texts in history, philosophy, oratory, rhetoric, epistolography, satire, biography, and the novel. Topics may vary. May be repeated up to 9 credit hours with different content.
- 7000—Research (V1-12).**

Linguistics (LING)

- 5311—Principles of Foreign Language Teaching (3).** Deepens students' expertise in important theories, research, and practices associated with second and foreign language teaching.
- 5312—Linguistics for Second Language Educators (3).** Concepts in linguistics and linguistics analysis as they relate to bilingual and second language education.
- 5320—Second Language Writing (3).** A study of theories and research related to second language writing and their implications for teaching second language composition.
- 5322—Theoretical and Research Foundations of Second Language Teaching (3).** Study of theory and research underlying current language teaching with an emphasis on communicative approaches.
- 5325—Technology in Teaching Second Languages (3).** A study of theory, research, and practice in the use of technology for teaching second languages, including audio, video, CALL, and Internet technologies.
- 5327—Second Language Curriculum Design (3).** Analysis of second and foreign language teaching curriculum design models and application to current language teaching.
- 5328—Teaching English in International Contexts (3).** Designed to prepare students methodologically and professionally for teaching English in international contexts.

- 5330—**Second Language Acquisition (3)**. An introduction to second language acquisition as a research field, including basic and major research findings with emphasis on adult learners.
- 5332—**Instructed Second Language Acquisition (3)**. Prerequisite: Consent of instructor. Focuses on the theory and research related to the effect of instruction on linguistic development.
- 5336—**Corpus Linguistics for Research and Teaching (3)**. Provides an in-depth introduction of corpus linguistics as a methodology for analyzing principled collections of naturally occurring texts for research and pedagogic purposes.
- 5340—**Second Language Testing (3)**. Designed to give language teachers a working knowledge of testing principles applied to second language classrooms and programs.
- 5382—**Seminar in Second Language Instruction (3)**. Study of current topics of interest in second language instruction and/or curriculum development. Course content will vary. May be repeated for credit for a maximum of 12 credit hours as topics vary.
- 5383—**Seminar in Second Language Acquisition (3)**. Study of current topics of interest in second language acquisition. Course content will vary. May be repeated as topic varies for a maximum of twelve credits.
- 6000—**Master's Thesis (V1-6)**.
- 7000—**Research (V1-12)**.

Portuguese (PORT)

- 5307—**Luso-Brazilian Civilization and Literature (3)**. Examines the civilization and cultures of the Luso-Brazilian world through the study of representative literary, cultural, and journalistic texts. Topics range from 16th through the 20th centuries. Films will be screened to illustrate material. Taught in English. May be repeated up to 9 credit hours with different content.
- 5341—**Intensive Portuguese for Graduate Students I (3)**. Intensive introduction to the Portuguese language for graduate students proficient in Spanish. Supports the Portuguese minor for the Spanish M.A. and Ph.D. programs.
- 5342—**Intensive Portuguese for Graduate Students II (3)**. Intensive introduction to the Portuguese language for graduate students proficient in Spanish. Supports the Portuguese minor for the Spanish M.A. and Ph.D. programs.
- 5355—**Readings in Luso-Brazilian Literature (3)**. Advanced topics in Luso-Brazilian literature. May be repeated up to 12 credit hours with different content.
- 7000—**Research (V1-12)**.

Russian (RUSN)

- 5301—**Russian Language for Graduate Students (3)**. This course is conducted entirely in Russian. Students work towards achieving an American Council for Teaching Foreign Languages advanced or superior proficiency rating. May be repeated for credit up to 12 hours.
- 5303—**Topics in Russian Culture (3)**. This course will study selected aspects of classical or contemporary Russian culture organized around a particular period or theme. Readings, most writings, and a significant portion of the class will be in Russian. May be repeated for credit up to 12 hours when content is different.
- 5304—**Topics in Russian Literature (3)**. This course will study selected classical or contemporary Russian literary texts organized around a particular period or theme. Readings, most writings, and a significant portion of the class will be in Russian. May be repeated for credit up to 12 hours when content is different.
- 7000—**Research (V1-12)**.

Spanish (SPAN)

- 5100—**Advanced Special Problems in Spanish Language and Literature (1)**. An individualized research project course. Contents will vary to meet the needs of students.
- 5301—**Writing for the Profession (3)**. Prepares students to conduct independent research in the fields of Hispanic literature, linguistics, and cultures and to write effectively.
- 5304—**Advanced Business Spanish I (3)**. Prerequisite: Consent of instructor. Foundation in business vocabulary and discourse of management. Emphasis on geographic and cultural understanding of the Spanish-speaking world.
- 5311—**Spanish As a Heritage Language: Pedagogical and Methodological Implications (3)**. Seeks to help students understand the sociolinguistic and socio-affective needs of Spanish heritage speakers and familiarize them with the best teaching practices for heritage speakers.
- 5333—**Raciolinguistics I: Theoretical Perspectives (3)**. Seeks to explore the interface between language, race, and identity and reflect on strategies to stop perpetuating racial disparities in students' lives and their communities.

- 5337—**Raciolinguistics II: Research Methodologies (3)**. Prerequisite: SPAN 5333. Seeks to briefly review the interface between language, race, and identity and conduct a research project that has IRB approval and will be intended for publication.
- 5340—**Spanish Language and Linguistics (3)**. Spanish phonology, dialectology, morphology, or Spanish syntax. May be repeated once for credit with different emphasis.
- 5341—**Intensive Spanish for Graduate Research I (3)**. Spanish readings with related grammar to acquaint graduates with Spanish as a research skill. Equivalent to two years of normal coursework. Not intended to meet major or minor degree requirements.
- 5342—**Intensive Spanish for Graduate Research II (3)**. Spanish readings with related grammar to acquaint graduates with Spanish as a research skill. Equivalent to two years of normal coursework. Not intended to meet major or minor degree requirements.
- 5343—**Studies in Spanish (3)**. Concentrated studies in Spanish language or literature. May be repeated for credit up to 9 hours as topic varies.
- 5345—**History of the Spanish Language (3)**. Prerequisite: One year of Latin or equivalent. The development of the Spanish language from its earliest forms to the present.
- 5347—**Language Development (3)**. Mastery of language skills through readings, compositions, and directed oral projects. Offered only in programs abroad each summer.
- 5348—**Culture and Literature (3)**. Analysis and interpretation of cultural and literary expressions of the host country. Offered only in programs abroad each summer.
- 5352—**Methods of Literary Criticism (3)**. Theories and practices of literary analysis and criticism.
- 5354—**Hispanic Literary Concepts (3)**. A study of movements, genres, influences, forms, themes, and other concepts in Hispanic literatures from the Middle Ages to the present.
- 5355—**Seminar in Hispanic Literature (3)**. Advanced topics in Hispanic literature and literary theory. May be repeated for credit up to 12 hours.
- 5356—**Seminar in Hispanic Culture (3)**. Advanced topics in Hispanic culture with an emphasis on critical theory and cultural studies. May be repeated for credit up to 12 hours.
- 5361—**Medieval Literature (3)**. Spanish literature from its earliest monuments to the end of the Middle Ages.
- 5362—**Golden Age Literature (3)**. Selected authors, works, and genres from sixteenth and seventeenth century Spain.
- 5364—**Eighteenth- and Nineteenth-Century Spanish Literature (3)**. Studies on the main authors and movements of the 18th and 19th Century literature in Spain, including the Enlightenment, Romanticism and Realism.
- 5366—**Twentieth and Twenty-First Century Spanish Prose (3)**. A comprehensive study of the principal literary currents, authors and works with emphasis on the twentieth and twenty-first century periods.
- 5368—**Twentieth and Twenty-First Century Spanish Theatre and Poetry (3)**. A comprehensive study of the principal literary currents, authors, and works with emphasis on the contemporary period.
- 5369—**Spanish Narrative Since 1898 (3)**. Prerequisites: Acceptance to graduate program or permission of instructor. Graduate-level topics course in Spanish Peninsular narrative with an emphasis on both research and pedagogy. May be repeated for credit up to 6 hours.
- 5370—**Colonial Spanish American Literature (3)**. A study of this literature from the Pre-Colombian era to the end of the Spanish American baroque.
- 5374—**Nineteenth-Century Spanish American Literature (3)**. A comprehensive study of the principal literary currents, authors, and works of the 19th century.
- 5375—**Modernism (3)**. Studies on literature and aesthetic ideas from the turn of the 19th century "Modernista" writers from Spanish America and Spain.
- 5376—**Twentieth and Twenty-First Century Spanish American Prose (3)**. The development of prose fiction in Spanish America during the twentieth and twenty-first century.
- 5378—**Twentieth and Twenty-First Century Spanish American Theatre and Poetry (3)**. The development of the theatre and poetry in Spanish America during the 20th and 21st century.
- 5381—**Hispanic Literature of the Southwest (3)**. The origin and development of Hispanic literature in the southwest, including Spanish literature (1539-1820), Mexican literature (1821-1848), and Mexican-American literature (1849-present).
- 5382—**Spanish in the U.S. (3)**. Examines the social and linguistics properties of the Spanish language as is currently spoken in the United States.
- 5383—**Spanish Language with Other Languages (3)**. Introduces students to the dynamic nature of bilingualism in the Spanish-speaking world.

Topics include childhood/adult bilingualism, borrowing, and code-switching. May be repeated for credit.

- 5384—Acquisition and Development of Skills in Spanish as a Second Language (3).** Offers graduate students the possibility to explore and work on projects related to Spanish language skills such as writing, speaking, reading, and listening. May be repeated for credit.
- 5385—Seminar in Hispanic Linguistics (3).** Provides students with a general overview of current issues related to Hispanic linguistics.
- 5386—Seminar in the Acquisition of Spanish as a Second Language (3).** Studies in the acquisition of Spanish as a second language. May be repeated for credit with different content.
- 5388—Spanish Phonetics & Phonology: Sound Inventory, Processes of Change, and Phonological Variation (3).** Provides an overview of the Spanish language sound inventory, process of sounds change, methodologies of phonetic and phonological analyses, and the Spanish phonological variation.
- 5389—Spanish Quantitative Sociolinguistics (3).** This seminar is an in-depth overview of the principal concepts, theories, and methodologies of the field of variationist sociolinguistics.
- 5390—Language Ideologies (3).** Provides an overview of Language Ideologies, particularly surrounding Spanish, as well as Language Ideologies' impact on language, politics, education, and the society at large.
- 5391—Spanish Sociophonetics (3).** Provides an introduction to the field of sociophonetics, which combines fine-grained acoustic analysis and experimental methodologies from phonetics and social theory and methodologies from sociolinguistics.
- 5392—The Play in Spanish (3).** Prerequisite: Consent of instructor. Intensive analysis of a play and preparation for two public performances.
- 5393—Translation Theory and Linguistic Analysis (3).** A graduate introduction to translation studies covering the main theoretical approaches in the field as well as relevant aspects of linguistic analysis.
- 5394—Spanish-English Translation Practice (3).** Prerequisite: SPAN 5393. Practicum devoted entirely to Spanish-English translation using authentic texts and structured based primarily on topic and discourse genre.
- 6000—Master's Thesis (V1-6).**
- 7000—Research (V1-12).**
- 8000—Doctor's Dissertation (V1-12).**

Department of Economics

Students seeking a degree in economics should consult with the graduate advisor or the chairperson of the department.

Economics, M.A.

Non-Thesis Option. The non-thesis plan requires successful completion of 12 courses (36 credit hours) and passing of a comprehensive written examination for the Master of Arts in Economics degree.

The coursework includes: ECO 5321, ECO 5311, 21 credit hours of economics electives, and 9 credit hours of approved general electives.

Thesis Option. The thesis plan requires successful completion of 12 courses (36 credit hours), writing an M.A. thesis, and a successful final defense of the M.A. thesis.

The coursework includes ECO 5321, ECO 5311, 6 hours of ECO 6000 (thesis hours), 15 hours of economics electives, and 9 hours of approved general electives.

Economics, Ph.D.

The goal of the doctoral program in economics at Texas Tech University is to train outstanding economists. Graduates of our Ph.D. program are ready to undertake research in economics, teach economics in higher education, and apply the skills gained in our program to problems in the private and public sectors.

The Ph.D. program in economics offers a solid foundation in economic theory and the students learn how to apply and develop economic tools. The Ph.D. program is divided into two parts. The first part includes completing core courses and examinations in microeconomic and macroeconomic theory. The second part includes taking field and elective courses and completing a third-year paper. The coursework and the continual support of our professors prepare students to conduct their own independent research, which culminates in a doctoral dissertation.

Our faculty and staff provide a supportive and inclusive environment for study and research, and we encourage students to work together. We want students from all backgrounds to succeed in our economics program.

The program for the doctorate requires a minimum of 72 credit hours comprised of a minimum of 60 credit hours of coursework beyond the bachelor's degree (excluding dissertation hours) plus a minimum of 12 dissertation hours (ECO 8000). The candidate for the doctoral degree must choose three specializations from within the areas of international economics, monetary economics, public finance, labor economics, environmental and natural resource economics, industrial organization, and special fields of economics. In addition, the doctoral student must demonstrate a mathematical proficiency in calculus and analytical geometry.

Graduate Course Descriptions

Economics (ECO)

- 5301—Mathematical Economics (3).** Prerequisite: Consent of instructor. The application of mathematical techniques to economic model-building.
- 5310—Price and Income Theory (3).** Designed for graduate students who need intensive study of intermediate economic price and income theory.
- 5311—Microeconomics I (3).** Prerequisite: Consent of instructor. Theory of household and firm choice, duality, commodity, and factor market structures, general equilibrium and welfare economics. Emphasis on theory and policy applications.
- 5315—Mathematical Economics II (3).** Prerequisite: ECO 5301 or consent of instructor. Advanced topics in the application of mathematics to economic model-building including dynamic models and programming techniques.
- 5318—History of Economics (3).** Examines various historical episodes and their influence on the development of economic theories.
- 5321—Macroeconomics I (3).** Prerequisite: ECO 3311 or consent of instructor. Market clearing and non-market clearing business cycle models and their policy implications. Emphases include inflation, real growth, unemployment, and balance of payments and their interactions.
- 5325—Seminar in Economic Policy (3).** Prerequisite: Consent of instructor. Analysis of major economic issues, theories, or policies. May be repeated for credit.
- 5331—Econometrics I (3).** Prerequisite: Consent of instructor. Topics chosen from the following: problems in single and multiple regressions, qualitative choice models, specification tests, estimation of rational expectations models, and fixed-effects models.
- 5337—Health Care Economics (3).** The application of economic principles to the analysis of problems and the formulation of policies in the healthcare sector of the economy.
- 5343—Natural Resource and Environmental Economics (3).** Prerequisite: ECO 5311 or consent of instructor. Covers theory and policy in natural resource and environmental economics. Optimal rules for renewable and nonrenewable patterns of use, public policy. Intensive study of one sector (energy, water, forestry).
- 5344—Environmental Economics (3).** Prerequisite: ECO 5343 or consent of instructor. Students will use economic models to consider current environmental issues from both a theoretical and an empirical perspective.
- 5345—Energy Economics (3).** Prerequisite: ECO 5343 or instructor consent. Students will use economic models to analyze current local and global energy markets from both theoretical and empirical perspectives.
- 5350—Behavioral and Experimental Economics (3).** Prerequisite: ECO 5311 or instructor consent. Shows developments in the testing of economic theory through experiments with a strong emphasis on behavioral models/phenomena in explaining economic decision-making.
- 5352—Economics of Incentives (3).** Prerequisite: Instructor consent. Covers a selection of topics in the theory of incentives. Topics covered include medical insurance, human-capital investment, bureaucracy, corporate finance, and others.
- 5353—Public Finance I (3).** Prerequisite: Consent of instructor. Analysis of economic effects of taxation, governmental expenditures, debt management, and budgetary planning and administration.
- 5355—Labor Economics I (3).** Prerequisites: ECO 5311 and ECO 5331. Theory and econometric techniques to analyze the operation of the labor market, including labor supply and demand, unemployment, job search, human capital, and migration.
- 5365—International Trade (3).** Prerequisite: ECO 3333 or consent of instructor. Advanced study of theory, problems, and policies in international economics.
- 5383—Time Series Economics (3).** Prerequisite: ECO 5331 or ISQS 5349 or AAEC 5307 or instructor consent. Contemporary issues in time

series econometrics. Topics include dynamic models, ARMA models, stationarity, causality and exogeneity, unit root tests, integration and error correction.

6000—Master's Thesis (V1-6).

6312—Microeconomics II (3). Advanced topics in microeconomic theory, including production and cost minimization, competitive market equilibrium, uncertainty, and a thorough treatment of game theory.

6313—Microeconomics III (3). Prerequisite: ECO 5311 or consent of instructor. Advanced topics in microeconomic theory, including advanced applications of game theory, principal-agent problems, contracts, information, uncertainty, welfare and general equilibrium.

6322—Macroeconomics II (3). Prerequisite: ECO 5321 or consent of instructor. Topics in macroeconomic theory, including applications of general equilibrium theory and computation.

6323—Macroeconomics III (3). Prerequisite: ECO 3323 or ECO 5310. Advanced topics in macroeconomic theory, including advanced applications of general equilibrium monetary and macroeconomic models.

6332—Econometrics II (3). Advanced topics in econometric methods focusing on identification and estimation of causal treatment effects.

6333—Econometrics III (3). Advanced methods in econometrics that are frequently used in applied work, including techniques for the analysis of cross-sectional, time-series, clustered, and panel data.

6341—Industrial Organization I (3). Prerequisites: C or better in ECO 5311 or consent of instructor. Course focuses on theories of the "new industrial organization" applied to imperfect competition, from monopoly to the strategic analysis of oligopolistic markets.

6342—Industrial Organization II (3). Prerequisite: ECO 5311 or consent of instructor. Focuses on recent developments in empirical industrial organization, public utility, and regulation literature.

6354—Public Finance II (3). Prerequisite: Consent of instructor. Research in and analysis of public goods, public choice, public budgeting, cost-benefit analysis, and intergovernmental fiscal relations.

6356—Labor Economics II (3). Prerequisite: ECO 5355. Examines the factors that determine wage differentials among workers, including job turnover, wage dynamics, compensating wage differentials, discrimination, contract theory, unions, and collective bargaining.

6361—Monetary Economics (3). Prerequisite: ECO 6323 or consent of instructor. Recent developments and controversies in monetary theory and policy. Emphasis on leading edge issues and literature and on development of research skills in monetary economics.

6363—Consumption and Investment: Microfoundations and Aggregate Dynamics (3). Prerequisites: C- or higher in ECO 5321 and ECO 5331; instructor consent. Life-cycle analysis through Value Function Iteration and the Method of Endogenous Gridpoints. The permanent income hypothesis, precautionary and rainy-day savings, time-to-build investment, and lumpy investment.

6366—International Finance (3). Prerequisite: Advanced graduate standing and consent of instructor. Advanced study of theory, problems, and policies associated with the international monetary system. [FIN 5332]

6367—Forecasting (3). Prerequisites: ECO 5321, ECO 6322. Introduction to forecasting and applied empirical methods in macroeconomics. Focuses on forecasting models and evaluations, VAR/SVAR applications, and estimation of DSGE models.

6369—Growth and Development (3). Prerequisites: ECO 5321, ECO 5331. Deals with the macroeconomics of economic development. Topics include barriers to investment and productivity adoption, misallocation, and institutions.

6371—Macroeconomic Labor Economics (3). Prerequisites: ECO 5355 and ECO 6356 or instructor consent. Topics in labor economics including effects of minimum wage, taxes, EITC on labor supply, returns to schooling, family and child policy, immigration, and retirement decisions.

6391—Presentation Seminar (3). Prerequisites: ECO 5311, ECO 5321, and ECO 5331. Prerequisites cannot be taken concurrently. Develops presentation skills with a focus on effectively communicating research. Students will be well-prepared to present at academic conferences, job market seminars, and departmental workshops.

7000—Research (V1-12).

8000—Doctor's Dissertation (V1-12).

Department of English

Before beginning a graduate program in English or Technical Communication, students must consult the Director of Graduate Studies of their program concerning departmental admission procedures and degree requirements. Admission to the Graduate School requires departmental recommendation as well as approval by the Graduate Dean. Information on the requirements is available at <https://www.depts.ttu.edu/english/>.

Creative Writing, M.F.A.

The Master of Fine Arts degree (M.F.A.) is a recognized terminal degree in the study in and practice of creative writing. The degree is offered onsite and shares many classes with the long-established doctoral program in English with a concentration in creative writing.

Admission to the M.F.A. program normally presumes that students hold a Bachelor of Arts or Science, generally in English or a related field, though a Humanities specialization is not required. A committee composed of graduate faculty members in the genre for which the applicant is seeking admission will examine applications—which will include a portfolio of the student's work—and may hold a personal interview. On the basis of these evaluations, the committee will make recommendations concerning acceptance to the M.F.A. program. Students applying for the Master of Fine Arts degree program do not need to submit scores for the Graduate Record Examination.

The M.F.A. in Creative Writing requires the completion and presentation of a craft talk, thesis proposal, and creative thesis (a book-length publishable work developed in consultation with members of the Creative Writing faculty). The degree is offered with tracks in fiction, nonfiction, poetry, and genre-specific translation and requires a minimum of 60 semester hours of graduate work. Each emphasis involves a common set of core requirements: foundation courses, British, American, and Comparative literature courses, and professional development curricula. M.F.A. students in literary translation must also demonstrate reading knowledge of one language other than English.

- **Required Courses** (Foundations Requirements: 27 credit hours, 8 courses): Two of the three of ENGL 5340, 5342, and 5360; ENGL 5067 (3 hours), 5390, 5166 (6 hours), 5395, 6000 (M.F.A. Thesis A & B, 6 hours)
- **Prescribed Electives:**
 - Track Requirements (15 credit hours, 5 courses): ENGL 5370 (9 hours), 5367 (6 hours)
 - Breadth Component (9 credit hours, 3 courses across two different periods): ENGL 5XXX (British Literature) and/or ENGL 5XXX (American Literature) and/or ENGL 5XXX (Comparative Literature)
- **Optional Electives:** Students may take 3-6 credit hours of graduate courses outside of the courses listed above as electives instead of part of their required research hours. These courses would be considered electives on the M.F.A. degree plan. Students must consult with the Director of Creative Writing prior to enrolling in courses to determine if such courses will be applied to the M.F.A.
 - Foreign language, linguistics, additional literature, or other field-related practices and/or
 - Editing and Publishing course in TCR and/or
 - Additional course(s) in the student's selected specialization(s) or area of interest (up to 2 courses)

Note: Three of the track courses are ENGL 5370 Creative Writing workshops, and students are encouraged (though not required) to take at least one workshop outside of their specialization.

English, M.A.

Advanced study in literature, creative writing, and linguistics are offered in this program. It is intended to be not merely a continuation of undergraduate work but a distinctly different educational experience requiring study in greater depth and the development of critical thinking. The Department of English offers both onsite and online M.A. degree programs; the programs share the same classes.

The M.A. in English is a 36-semester-hour degree, available under a thesis and a non-thesis option. The thesis option requires students to complete 30 hours of graduate courses and write and defend a thesis (6 thesis hours). The non-thesis option requires students to complete 36 hours of graduate courses and assemble and defend a portfolio of revised essays or creative pieces. The portfolio also includes a reflective essay.

Areas of concentration include: Early British Literature; Later British Literature; American Literature; Comparative Literature, Globalization and Translation (CLGT); Film and Media Studies; Linguistics; Book History/ Digital Humanities; Literature, Social Justice, and Environment (LSJE); and Creative Writing. Each emphasis involves a common set of core require-

ments: foundation courses, British, American, and Comparative literature courses, and literary genre courses. M.A. students must also demonstrate reading knowledge of one language other than English or proficiency in linguistics, English philology, translation methods, or other language-related practices by taking two graduate courses in these fields.

Technical Communication, M.A.

This master's degree prepares you for workplace success. Specific aims of study include knowledge of the history, theory, research, genres, principles, techniques, and practices of technical communication. The MATC qualifies you for project management, UX research, UCD, writing, and editing in a variety of industries. The thesis option requires students to complete 30 hours of graduate courses in technical communication and electives, 6 hours of research hours, and a thesis. The non-thesis option requires students to complete 36 hours of graduate courses in technical communication and electives. Students who elect the non-thesis option must complete a mid-program portfolio and pass a comprehensive portfolio examination in the semester of graduation.

The master's degree in technical communication is also available fully online. Application and admission processes and degree requirements are the same across all modalities. Prospective students are advised to consult https://www.depts.ttu.edu/english/programs_degrees/programs/tcr/index.php for details of degree requirements, the Director of Graduate Studies, and the course schedule.

English, Ph.D.

The Ph.D. program in English is designed to build on the general and specialized knowledge and skills attained in master's-level work and to permit students to conduct advanced study in **literature, linguistics, or creative writing**. Students in our program must read and study broadly so that they may come to understand the interconnectedness of texts, methods, and approaches across traditional classifications of period, geography, and genre. They also choose and refine particular primary and secondary areas of concentration and conduct original research at the highest level of intellectual engagement. The goal of this two-fold approach to doctoral studies is to prepare students to be able to teach in more than one field while producing robust scholarship in their area of concentration.

Doctoral students in English may specialize in Early British Literature; Later British Literature; American Literature; Comparative Literature; Globalization, and Translation (CLGT); Film and Media Studies; Linguistics; Book History/Digital Humanities; Literature, Social Justice, and Environment (LSJE); or Creative Writing (poetry, fiction, or nonfiction). Students may minor outside the department or create a secondary concentration within the department in one of the above areas or in technical communication.

The Ph.D. in English requires at least 60 hours of graduate coursework beyond the bachelor's degree and at least 12 hours of ENGL 8000 (Doctor's Dissertation), to total 72 hours. The 60 hours includes at least 48 hours of coursework and 12 hours of ENGL 7000 (research hours). All students are reviewed annually for satisfactory progress. In addition, all students must pass written qualifying examinations in the fall of their third year and subsequently prepare and defend a dissertation. Ph.D. students must also demonstrate reading knowledge of two languages other than English. One language fulfillment can be met by demonstrating proficiency in linguistics, English philology, translation methods, or other language-related practices by taking two graduate courses in these fields.

Technical Communication and Rhetoric, Ph.D.

The Ph.D. in TCR is designed for students with an interest in technical communication, rhetoric, writing, and composition. The aims of study are broad knowledge of the literature on technical communication and rhetoric, specialized knowledge of some aspect of technical communication or rhetoric as reflected in the dissertation research, and ability to conduct ongoing independent research using one or more methods. The Ph.D. requires at least 60 hours of graduate courses beyond the bachelor's degree, proficiency in research methodology, and a dissertation.

The doctoral degree in technical communication and rhetoric is also available online. Application and admissions processes and degree requirements are similar to those for the on-campus degree. In addition to fulfilling all

the degree requirements of the on-campus program, all distance students must attend a two-week seminar every May. Prospective students are advised to consult https://www.depts.ttu.edu/english/programs_degrees/phd/tcr/index.php for details of degree requirements, the Director of Graduate Studies, and the course schedule.

Graduate Course Descriptions

English (ENGL)

- 5000—English as a Profession (V1-3).** Introduction to professional issues in English. Topics include teaching dossiers, grant writing, project management and strategies for professional conduct and advancement.
- 5067—Methods of Teaching College Composition (V1-3).** Introduces methods of teaching writing through assigned readings, supervised participation in teaching activities, and seminar discussion.
- 5166—Creative Writing Practicum (1).** Prerequisites: Admission to the M.F.A. in Creative Writing. Offers a brief, targeted discussion on issues related to writing followed by a focused period of writing-in-place. May be repeated for credit.
- 5300—Individual Studies (3).** Prerequisite: Approval of the faculty mentor and Director of Graduate Studies. Independent study under the guidance of a graduate faculty member. May be repeated.
- 5301—Old English (3).** Survey of the grammar and vocabulary of Old English together with readings.
- 5302—Middle English Language: Translating Middle English Literature (3).** Introduces Middle English grammar, syntax, vocabulary, and prosody. Students gain comprehension and recitation skills in texts that range widely in dialect and genre.
- 5303—Studies in Medieval British Literature (3).** Concentrated studies in British literature to 1500, treating in various semesters poetry, prose, drama, and major authors.
- 5304—Studies in Renaissance British Literature (3).** Concentrated studies in British literature, 1500-1600, treating in various semesters poetry, prose, drama, and major authors.
- 5305—Studies in Shakespeare (3).** Emphasis on the comedies, tragedies, histories, poetry, or a combination of these.
- 5306—Studies in Seventeenth-Century British Literature (3).** Concentrated studies in British literature, 1600-1660, treating in various semesters poetry, prose, drama, and major authors.
- 5307—Studies in Restoration and Eighteenth-Century British Literature (3).** Concentrated studies in British literature, 1660-1800, treating in various semesters poetry, prose, drama, and major authors.
- 5309—Studies in Nineteenth-Century British Literature (3).** Concentrated studies in British literature, 1800-1900, treating in various semesters poetry, prose, drama, and major authors.
- 5313—Studies in Twentieth-Century British Literature (3).** Concentrated studies in British literature, 1900-present, treating in various semesters poetry, prose, drama, and major authors.
- 5315—Studies in British Fiction (3).** Concentrated studies in British fiction, treating in various semesters major figures and movements.
- 5317—Studies in Postcolonial Literature (3).** Concentrated studies in post-colonial theory and global literature, treating in various semesters poetry, prose, drama, film, popular culture, and major authors. May be repeated when topics vary.
- 5320—Studies in Seventeenth- and Eighteenth-Century American Literature (3).** Concentrated studies in American literature, 1600-1800, treating in various semesters poetry, prose, drama, and major authors.
- 5323—Studies in Nineteenth-Century American Literature (3).** Concentrated studies in American literature, 1800-1900, treating in various semesters poetry, prose, drama, and major authors.
- 5324—Studies in Twentieth-Century American Literature (3).** Concentrated studies in American literature, 1900-present, treating in various semesters poetry, prose, drama, and major authors.
- 5325—Studies in American Fiction (3).** Concentrated studies in American fiction, treating in various semesters major figures and movements.
- 5326—MATC Portfolio Capstone (3).** Capstone Course for MATC (ENTC) students. Students use completed projects from previous MATC coursework as artifacts with which to compose their final MATC Portfolio.
- 5327—Studies in Multicultural American Literature (3).** Concentrated studies in the literature, theory, and culture of minority American populations, treating in various semesters poetry, prose, drama, film, popular culture, and major authors. May be repeated when topics vary.
- 5334—History of the English Language (3).** An exploration of the external and internal history of the English language and the people who speak it. Considers linguistic, historical, and literary materials.

- 5335—**Principles of Language** (3). A broad introduction to the major subfields of descriptive and applied linguistics. Covers theoretical and practical issues in modern analyses of language.
- 5337—**Studies in Linguistics** (3). Special topics. May be repeated when the topic varies.
- 5338—**Syntax** (3). Surveys syntactic analysis and generative syntactic theory.
- 5339—**Phonology** (3). Surveys the study of sound patterns, phonological description and analysis, and generative phonological theory.
- 5340—**Research Methods in Literature and Languages** (3). Survey of research methods, including using archival, bibliographic, and web-based sources, with special attention to preparing master's students for graduate level research in English.
- 5341—**Histories and Theories of the Book** (3). Surveys the global history of written communication from the earliest writing systems to the rise of digital technologies.
- 5342—**Critical Methods** (3). Survey of contemporary critical methods with special attention to preparing master's students in graduate-level application of critical theory and methodologies to literature.
- 5343—**Studies in Literary Criticism** (3). Concentrated study of specific problems in literary theory and its application to literature.
- 5344—**Teaching History of the Book** (3). Surveys the best practices for integrating book history and material studies into the postsecondary and graduate classroom in the Humanities.
- 5345—**Letterpress Printing History and Practice** (3). Surveys the historical rise of printing from Gutenberg, with practical experience in letterpress printing on a 19th century historic iron handpress.
- 5346—**Digital Humanities** (3). Surveys theories and practices associated with using computer-aided resources to perform and present humanities texts and research.
- 5348—**Studies in History of the Book** (3). Concentrated study of specific problems in the history of the book and material culture. May be repeated when topics vary.
- 5349—**Religion and Material Texts** (3). Explores the relationship between religion and material texts across histories and cultures.
- 5351—**Studies in Film and Literature** (3). Readings, analysis, and research in the interrelationships between film and literature.
- 5354—**Doctoral Research and Critical Methods in English** (3). Survey of research and critical methods in English, with special attention to the processes of marking out a field and methodology for doctoral research.
- 5355—**Studies in Comparative Literature** (3). Theory and practice of the study of comparative literature, with emphasis on themes and motifs.
- 5357—**Teaching Film and Media Studies** (3). Provides graduate students structure, guidance, and practice for teaching film and media studies as well as related audio-visual and multimedia activities.
- 5360—**History and Theories of College Composition** (3). Seminar in history and contemporary theories of composition and rhetoric studies.
- 5361—**Introduction to Rhetorical Theory** (3). Classical and modern theories of rhetoric.
- 5362—**Rhetorical Analysis of Text** (3). Classical and modern theories of rhetorical analysis.
- 5363—**Research Methods in Technical Communication and Rhetoric** (3). Survey of research methods in technical communication, rhetoric, and composition studies with emphasis on current research trends.
- 5364—**History of Rhetoric** (3). Survey of history and theories of rhetoric with an emphasis on applications to written communication.
- 5365—**Studies in Composition** (3). Consideration of classical and modern theories and research in written composition.
- 5366—**Teaching Technical and Professional Writing** (3). Theory and teaching of technical and professional writing with special attention to developing course objectives, syllabi, and teaching techniques.
- 5368—**Studies in Written Argumentation** (3). History and theories of written argumentation.
- 5369—**Discourse and Technology** (3). Study of the effects of computer networks and digitally mediated knowledge management on theoretical, practical, and pedagogical notions of discourse and discourse communities.
- 5370—**Creative Writing Workshop** (3). Prerequisite: Consent of instructor. Theory and practice of creative writing. This class may be taught as a single genre poetry, fiction, creative nonfiction, or other writing or as multiple genres. May be repeated for credit towards creative writing specialization.
- 5371—**Foundations of Technical Communication** (3). Theory and practice of technical communication.
- 5372—**Technical Reports** (3). Theory and practice of reports and proposals.
- 5373—**Instructional Design for Technical Communicators** (3). Theory and practice of instructional document development and design.
- 5374—**Technical Editing** (3). Substantive editing and design of technical documents.
- 5375—**Document Design** (3). Theory and practice of creating comprehensible, usable, and persuasive texts.
- 5376—**Online Publishing** (3). Design and testing of online materials to support instruction and information retrieval.
- 5377—**Theoretical Approaches to Technical Communication** (3). Intensive analysis and application of one or more theories of technical communication.
- 5378—**Graduate Internship** (3). Prerequisite: Consent of the Director of Graduate Studies. Substantial writing, editing, and/or teaching experience under the direction of a faculty member or professional mentor.
- 5379—**Empirical Research Methods in Technical Communication and Rhetoric** (3). Empirical research methods in technical communication and rhetoric.
- 5380—**Special Topics in Literary Studies** (3). Concentrated studies in works, authors, or approaches.
- 5381—**Global Technical Communication** (3). Introduction to theories and practices in global technical communication.
- 5382—**Theory and Research in the Written Discourses of Health and Medicine** (3). Current theory and research in the written discourses of health and medicine, focusing on the roles of technical and professional communicators.
- 5383—**Grants and Proposals** (3). Theoretical issues and practical experience dealing with the genre and process of writing grants and proposals.
- 5384—**Rhetoric of Scientific Literature** (3). Study of the role of rhetoric in the texts of scientific inquiry.
- 5385—**Ethics in Technical Communication and Rhetoric** (3). Definitions, philosophies, and applicability of ethics to technical communication problems and solutions.
- 5386—**Written Discourse and Social Issues** (3). Study of uses of written discourse in problem solving on social issues involving science or technology.
- 5387—**Publications Management** (3). Strategies of managing processes and knowledge that support publication.
- 5388—**User Experience Research** (3). Methods of planning, conducting, and analyzing user experience research and tests.
- 5389—**Field Methods of Research** (3). Survey of methods such as ethnography, observation, and participatory design with application to research in rhetoric and technical communication.
- 5390—**Writing for Publication** (3). Designed to teach students in graduate programs how to write clear and effective articles for professional journals in their field.
- 5391—**Grants and Proposals for Nonprofits** (3). Strategies and techniques for researching, writing, and editing grant proposals for nonprofit organizations.
- 5392—**Teaching College Literature** (3). Survey of pedagogical issues associated with the teaching of university-level literature courses.
- 5393—**Grants and Proposals for the Academy and Industry** (3). Strategies and techniques for researching, writing, and editing grant proposals and business plans for the academy and industry.
- 5394—**User-Centered Design** (3). Theory, practice, and methods of user-centered design for technical information products.
- 5395—**Teaching Creative Writing** (3). Prerequisite: Permission from Director of Creative Writing. Students analyze theories of creative writing pedagogy practices; examine workshop models; and design exercises, revision techniques, and group dynamics for creative writing courses.
- 6000—**Master's Thesis** (V1-6).
- 7000—**Research** (V1-12).
- 8000—**Doctor's Dissertation** (V1-12).

Department of Environmental Toxicology

The Department of Environmental Toxicology (ENTX) provides faculty and graduate students opportunities for multidisciplinary research and scholarly engagement related to environmental, forensic, and human health sciences. The Department also houses two research-focused institutes: The Institute of Environmental and Human Health (TIEHH) and the Institute for Forensic Science (IFS). TIEHH integrates the efforts of Texas Tech University, the School of Law, and the Texas Tech University Health Sciences Center in a joint venture to assess the impacts of toxic chemicals and other stressors on the natural environment. IFS is a comprehensive teaching, training, and research organization in all aspects of forensic science. IFS is committed to providing outstanding service to the university, profession, and community, and committed to supporting local law enforcement and criminal justice agencies through the sharing of ideas,

problem-solving, and empiricism promoting prosocial values and contributing to safer communities.

The Environmental and Human Health faculty attract graduate students at both the master's and doctoral level, with their backgrounds in biological sciences, medicine, epidemiology, biostatistics, engineering, chemistry, computer science, law, mathematics, pharmacology, physiology, and wildlife biology. The Forensic Science faculty are committed to the production and dissemination of interdisciplinary forensic science research through a unique multidisciplinary program that provides outstanding education, research, and professional training opportunities for undergraduate and graduate students at TTU and for local and regional law enforcement.

Environmental Toxicology, M.S. / Ph.D.

Environmental Toxicology offers a graduate program within the College of Arts and Sciences. Because of the multidisciplinary nature of environmental toxicology, prospective students should contact the graduate advisor to discuss prerequisites and prior training. Generally, a strong background in the natural, physical, or health sciences will provide the necessary preparation. Students interested in pursuing a degree must complete online applications to the Graduate School (www.gradschool.ttu.edu) and to the Environmental Toxicology Graduate Program (www.entx.ttu.edu).

The Environmental Toxicology M.S. program (36 hours) and Ph.D. program (72 hours) are composed of coursework emphasizing the principles of toxicology, the environmental fate of chemicals, statistical approaches to study design, data handling, and data analysis, and seminars in environmental toxicology. Supplemental coursework, research, and thesis/dissertation hours are chosen by the student with the guidance of their committee, allowing for focus on the student's particular research emphasis. Master's and doctoral students must perform an original research project, prepare a written thesis or dissertation, and defend their work in a public defense.

Research areas include Aquatic Toxicology, Ecotoxicology, Human Health Sciences, Environmental Chemistry, Biochemical and Molecular Toxicology, Infectious Disease Research, Wildlife Toxicology, Fibers, Protective Textiles, and Countermeasures to Chemical Toxins, among others.

Master's Curriculum.

- **Core Courses:** ENTX 6100 (*Statistics Lab*), 6105, 6325, 6326, 6385, 6445
- **Seminars** (4 hours): ENTX 6305, 6115 (or approved research hour)
- **Broadening Courses** (6 hours): ENTX 6300, 6312, 6314, 6327, 6328, 6351, 6352, 6365, 6371
- **Research** (hours after core, seminars, and broadening to reach 36 credit hours): ENTX 7000
- **Thesis** (6 hours): ENTX 6000

Ph.D. Curriculum.

- **Core Courses:** ENTX 6100, (*Statistics Lab*) 6105, 6325, 6326, 6385, 6445
- **Laboratory-Based Course Requirement** (6 hours; any combination of lecture and lab): ENTX 6327, 6328, 6351, 6352
- **Seminars** (6 hours): ENTX 6305, 6306
- **Broadening Courses** (6 hours): ENTX 6300, 6312, 6314, 6365, 6371; including courses that were not taken to fulfill the Laboratory-Based Course Requirement: ENTX 6327, 6328, 6351, 6352
- **Research** (up to 27 hours; hours after core, laboratory-based courses, seminars, and broadening to reach 72 credit hours): ENTX 7000
- **Dissertation** (12 hours): ENTX 8000

Forensic Science, M.S.

The Master of Science in Forensic Science degree program emphasizes extensive learning in the scientific and laboratory skills necessary for application in a modern forensic laboratory. The program offers concentration focuses in areas of forensic investigation and includes exposure to the breadth of forensic disciplines, including the principles, practices, and contexts of science as they relate to specialized forensic topics.

Graduates from this program are prepared to enhance and strengthen the forensic science disciplines through sound methodologies and practices while simultaneously advocating the highest ethical standards through public service to federal, state, and local law enforcement jurisdictions and agencies.

Students from various undergraduate backgrounds may pursue either of two concentrations within the program: the forensic chemistry concentration or the forensic investigation concentration. The forensic investigation concentration is designed for students who have a social science background and intend to work in a non-laboratory setting. The forensic chemistry concentration is designed for students who have a natural or forensic science background and wish to work in a traditional laboratory setting. The program offers both theoretical and practical coursework and is designed to allow students to emphasize areas of special interest such as forensic chemistry, toxicology, DNA, entomology, or crime scene investigation.

Students in both concentrations must take 30 hours from the core curriculum, including fundamentals of forensic science, research methods, crime scene investigation, trace evidence analysis, and ethics. The remaining coursework requirements vary by concentration and includes specialized courses along with a broad list of approved electives. Forensic chemistry concentration students are required to complete a research-oriented thesis. Forensic investigation students may complete a research-oriented thesis or an internship and a comprehensive written exam. This comprehensive exam is highly individualized and will focus on the student's primary area of interest. For both the forensic chemistry and investigation concentrations, a minimum of 39 hours of graduate coursework plus 6 hours of thesis (FSCI 6000) or internship (FSCI 6031) are required.

Following the first 9 credit hours of graduate study, each student's curriculum will be formalized through consultation with the forensic program academic advisor and will reflect the student's area of emphasis. This degree plan will be approved by the program advisor before being submitted to the Graduate School. When approved, it will serve as a tool for advising and reviewing to assure completion of degree requirements.

Applicants will be considered for admission to the forensic science program after the following materials are received: completed application to the Texas Tech Graduate School, GRE test scores, three letters of recommendation (two of which must be from academic faculty), letter of intent, and curriculum vita/resume. The program accepts students in the fall and spring semesters. Once that process is completed, program admission and competitive scholarship awards are based on the following three general categories of criteria:

- **Academic Record.** All academic records may be considered—60 hours, total, major, post-baccalaureate, etc.
- **Test Scores.** Scores on the General Test of the Graduate Record Examination (GRE) should be no more than five years old. Each score is considered separately, with percentile scores viewed by broad major. No test score will be considered the sole criterion.
- **Individual Profile.** Profiles may include recommendations, research background, motivation, undergraduate institution, presentation, and interviews. Other information that admission committees may consider is work commitment, demonstrated commitment to a particular field of work or study, and community involvement.

NOTE: Certain criminal, traffic, and civil convictions can disqualify a graduate from obtaining some positions in the law enforcement or criminal justice professions.

Contact: Dr. Paola Tiedemann | paola.tiedemann@ttu.edu

Forensic Chemistry Concentration

- **Core Course Curriculum** (minimum grade of 3.0 required for core courses unless otherwise approved by the program faculty): FSCI 5101, 5260, 5308, 5310, 5331, 5350, 5352, 5353, 5355
- **Specialized Courses:** ENTX 6351, 6352; FSCI 5254, 5256, 5257
- **Master's Thesis** (6 hours): FSCI 6000

Forensic Investigation Concentration

- **Core Course Curriculum** (minimum grade of 3.0 required for core courses unless otherwise approved by the program faculty): FSCI 5101, 5260, 5308, 5310, 5331, 5350, 5352, 5353, 5355
- **Specialized Courses:** FSCI 5251, 5252, 5258
- **Internship or Master's Thesis** (6 credit hours): FSCI 6031 or 6000

Forensic Investigation Concentration

The program's Forensic Professional Concentration is designed for currently employed forensic professionals, provides career development with a flexible online delivery platform amenable to the working environment. This degree is designed for those individuals currently working in a forensic science field such as law enforcement, medical examiner offices, legal, or forensic science laboratory settings to improve the current level of mastery which may lead to supervisory roles and promotion.

The program offers both theoretical and practical coursework and is designed to allow students to emphasize areas of special interest such as crime scene investigation, scene reconstructions, and forensic science management.

The Forensic Professional Concentration entails 28 credit hours of online graduate coursework (core + forensic electives) coupled with six credit hours of a required in-person forensic capstone experience (one-week intensive hands-on training for two summers), targeted for working forensic professionals only for flexibility in the working environment. The program entails a total of 34 credit hours.

Forensic Professional Concentration Applicant Instructions:

- GPA: 3.0
- GRE: not required.
- Applicant Statement/Letter of Intent: Required. Statement of purpose describing applicant's reasons for pursuing an advanced degree in forensic science and related career plans.
- Letters of Recommendation: 2 letters of recommendation required. The two letters must be from professional colleagues relevant to the career field.
- Verification letter from employer: To be admitted into the program, an applicant must submit an employment verification letter pertaining to active employment in a forensic related discipline by either a law enforcement agency or organization.
- Additional requirements: must submit official transcripts, have a bachelor's degree in a relevant discipline from an accredited college or university, and an interview may be required.

Curriculum.

- **Core Course Curriculum** (minimum grade of 3.0 required for core courses): FSCI 5260, 5350, 5352, 6310, 6340, 6350, 6360
- **Forensic Electives:** FSCI 6210, 6120 (*may be repeated*), 6220
- **Capstone Experience:** FSCI 6300 (*to be taken twice*)

Environmental Toxicology, M.S. / J.D.

The School of Law, in association with the Graduate School, offers a joint program leading to the degrees of Doctor of Jurisprudence (J.D.) and Master of Science in Environmental Toxicology (M.S.). This dual-degree program is designed principally for the student who has an interest in environmental law and wishes to acquire technical underpinning in Environmental Toxicology to complement legal training.

The dual-degree candidate must choose to pursue both degrees by the end of the third or fourth semester in Law School and must meet admission requirements for the second degree. Typically, if all prerequisites are met, both degree programs can be finished within four years, including summer session courses. The M.S. degree in Environmental Toxicology is offered through the Department of Environmental Toxicology. Students must apply to both the Law School and the Graduate School and be accepted by both schools. No graduate curriculum in this area can be pursued before entering Law School.

A candidate for the J.D./M.S. in Environmental Toxicology may credit up to 12 non-law credits of approved courses toward the J.D. degree and 12 law credits toward the M.S. degree. These transfers are of credit hours, not grades. Students must meet the admission requirements for both the Law School and Graduate School. The Graduate School will accept the LSAT in lieu of the GRE or GMAT exam.

The J.D./M.S. program (36 hours) is composed of coursework emphasizing the principles of toxicology, the environmental fate of chemicals, statistical approaches to study design, data handling, and data analysis, and seminars in environmental toxicology. Supplemental coursework, research, and thesis hours are chosen by the student with the guidance of their committee, allowing for focus on the student's particular research emphasis. J.D./M.S. students must perform an original research project, prepare a written thesis, and defend their work in a public defense.

Graduate Course Descriptions

Environmental Toxicology (ENTX)

6000—Master's Thesis (V1-6).

6100—Graduate Seminar (1). Prerequisite: Graduate standing or consent of instructor. A participatory seminar where graduate students condense, review, and present research findings on focused topics. Subject matter varies by semester. May be repeated for credit.

6105—Introductory Seminar in Environmental Toxicology (1). Prerequisite: Graduate standing. A tour through the discipline of environmental toxicology focusing on its composition and workings. Demonstrations of laboratory, field, computational, presentation, safety, quality assurance, permitting, and career components.

6115—Environmental Toxicology Seminar (1). Graduate standing or consent of instructor. Seminar on timely topics by experts in environmental toxicology. Required for all environmental toxicology students. May be repeated for credit.

6300—Advanced Topics in Environmental Toxicology (3). Special areas of current interest not generally covered in other courses. Content normally different each time offered. May be repeated for credit.

6305—Professional Development and Editorial Training in Environmental Toxicology (3). Discussion of the important aspects for successful completion of a graduate degree in Environmental Toxicology at TTU. Practical post-graduation exercises for networking and career development.

6306—Grantsmanship and Editorial Training in Environmental Toxicology (3). The knowledge gained through this course will help with professional development in terms of writing successful grant applications and technical reports.

6312—Biological Threats in the Environment (3). Prerequisite: Undergraduate biological background or consent of instructor. Detailed examination of characteristics, surveillance, and control of naturally-occurring zoonoses and diseases exploitable as biological weapon agents.

6314—Chemical Warfare and Protective Countermeasures (3). Coverage of chemical warfare agents, their protective measures, and technologies. Suitable for science and engineering majors.

6324—Principles of Toxicology III (3). Prerequisites: ENTX 6325, ENTX 6326. Provides mechanistic aspects of toxicity and adverse consequences.

6325—Principles of Toxicology I (3). Prerequisite: Graduate standing in the department or consent of instructor. First half of two semester course. Examines the foundations of toxicological sciences. Covers principles, disposition, and first half of toxicity mechanisms.

6326—Principles of Toxicology II (3). Prerequisite: ENTX 6325. Second half of two semester course. Covers remaining mechanisms, toxic agents, and applied toxicology.

6327—Molecular Toxicology (3). Prerequisite: ENTX 6325 and ENTX 6326 or consent of instructor. Molecular mechanisms and control of phase I and phase II xenobiotic metabolizing enzymes, oxidative stress, and carcinogenesis. Emphasizes prototypical chemicals with multiple modes of action.

6328—Molecular Methods in the Toxicology Laboratory (3). Theoretical background and hands-on experience with molecular methods to understand and analyze adverse effects of toxicants at the molecular level.

6331—Reproductive and Developmental Toxicology (3). Prerequisite: ENTX 6325 and ENTX 6326 or consent of instructor. Mechanistic treatment of chemical effects on reproductive and developmental processes and the resulting impacts on reproductive function, fertility, and the developing offspring.

6351—Analytical Toxicology Lecture (3). Prerequisite: Consent of instructor. Corequisite: ENTX 6352. Theory of isolation, detection, identification, and quantification of toxic substances and their transformation products in environmental and biological samples.

6352—Analytical Toxicology Laboratory (3). Corequisite: ENTX 6351. Extraction, cleanup, and quantitative analysis of environmental chemicals and their degradates. Reinforces and applies theories taught in ENTX 6351.

6365—Fundamentals of Aquatic Ecotoxicology (3). Prerequisite: Graduate or advanced undergraduate background in biological, chemical, or environmental sciences or consent of instructor. Covers effects of water pollution on aquatic organisms and human health. Subjects include fate and transport in aqueous systems, acute toxicity and toxicity tests, and effects of pollutants on aquatic systems from molecular to global levels.

6367—Advanced Wildlife Toxicology (3). Prerequisite: ENTX 6325 and ENTX 6326, ENTX 6445, or consent of instructor. Environmental contaminant effects on reproduction, health, and well being of wildlife species and applications to ecological risk assessment.

- 6371—**Procedures and Techniques in Ecological Risk Assessment (3)**. Designed to provide students with a solid foundation in risk assessment methods. Students will learn how the ecological risk assessment framework developed by the U.S. EPA is used to assess the potential hazards of chemicals.
- 6385—**Statistical Applications in Environmental Toxicology (3)**. Prerequisite: STAT 5302 or equivalent. Designed for students who wish to understand the interrelationships of statistical distributions and particular statistical approaches to environmental toxicology data analysis.
- 6391—**Modeling and Simulation in Ecotoxicology (3)**. Model development, implementation, and simulation applied to ecotoxicology; stressor responses; toxicokinetics; individual organism effects; individual-based models; population, community, and landscape effects; parameter estimation; design and analysis of simulation experiments; and model validation.
- 6445—**Chemical Sources and Fates in Environmental Systems (4)**. Prerequisite: Organic and analytical or environmental chemistry or consent of instructor. Environmental phenomena and physical properties of chemicals are used to understand processes governing chemical fate in the environment from global to micro scales.
- 7000—**Research (V1-12)**.
- 8000—**Doctor's Dissertation (V1-12)**.

Forensic Sciences (FSCI)

- 5101—**Seminar in Forensic Science (1)**. Prerequisites: Enrollment in the Master of Science in Forensic Science program or instructor consent. Features presentations and discussions by faculty and/or invited guest speakers on current forensic science topics.
- 5251—**Serial Crime (2)**. Develop an understanding of the constructs of deviant behavior and how they relate to criminal activity and the impact that deviant behavior has on victims and society as a whole. Case studies and related research topics in these areas will be covered.
- 5252—**The Foundations of Homeland Defense and Security (2)**. Explores the multifaceted realm of threats to U.S. national security, both abroad and domestic, and examines the structure of the systems that detect, prevent, and disrupt these threats.
- 5254—**Introduction to Forensic Drug Chemistry (2)**. An introduction to the basic principles and uses of forensic drug analysis. Concepts include various drug categories and appropriate analytical techniques for valid identification.
- 5256—**Forensic Toxicology (2)**. Prerequisite: Enrollment in the Master of Science in Forensic Science program or instructor consent. An introduction to forensic toxicology, including pharmacology, pharmacokinetics, specimen collection, and laboratory analysis. Emphasizes duties and responsibilities of toxicologists in the laboratory.
- 5257—**Explosives and Arson Investigation (2)**. Prerequisites: Enrollment in the Master of Science in Forensic Science program or instructor consent. Introduction to history of explosives/propellants, detection of hidden explosives, processing scenes of explosions, theories of fire investigation, and instrumental analysis of subsequent fire debris.
- 5258—**Criminal Investigations (2)**. Provides an overview of managing criminal investigations. Concepts include overview of major types of crimes, call response, evidence collection, interrogation, and case presentation.
- 5259—**Victimology (2)**. Prerequisite: Graduate student standing. Provides a complete and integrated study of victimization, including history and theories, interaction of crime victims within the criminal justice system, and victim services.
- 5260—**Courtroom Testimony for Forensic Scientists (2)**. Prerequisite: Enrollment in the M.S. in Forensic Science program or instructor consent. Seminar in effective report writing and provision of expert testimony. Emphasis on critical aspects and execution of written reports, and practical experience of providing testimony.
- 5308—**Fundamentals of Forensic Science (3)**. Overview of forensic science. Focuses on general principles of criminalistics, scope, history, and development of forensic science. Survey of physical, chemical, and biological evidence.
- 5310—**Forensic Biology (3)**. Covers the biological principles used in the identification of bodily fluids, the methods used to process evidence items for DNA profile generation, and the subsequent analysis of those DNA profiles, emphasizing practical considerations pertaining to both the crime scene and the forensic lab environment.
- 5331—**Forensic Science and the Law (3)**. Presents the justice system and the application of rules of evidence to forensic sciences. It will cover evidence admissibility and landmark cases.
- 5350—**Crime Scene Processing and Integrity of Physical Evidence (3)**. Presents crime scene processing and the integrity of physical evidence. Topics will include documentation, recognition, collection, and preservation of physical evidence.

- 5352—**Quality Assurance and Ethics in Forensic Science (3)**. Introduces the importance of quality assurance, ethics, codes of conduct, and professional practice in forensic science.
- 5353—**Research Methods in Forensic Science (3)**. A survey of research methods in forensic science. Emphasis is on critical aspects of designing, conducting, and critiquing experiments; and interpreting and communicating results.
- 5355—**Instrumental Methods for Trace Evidence Analysis (3)**. Covers the theory and application of analytical chemistry concepts and methodology to the analysis of physical evidence.
- 6000—**Master's Thesis (V1-6)**.
- 6031—**Internship in Forensic Science (V1-6)**. Supervised internship in an aspect of forensic science designed to provide the student with practical experience in the field.
- 6120—**Special Topics in Forensic Science (1)**. Prerequisite: For professional concentration only. Advanced concepts in forensic science will be presented through classroom presentations and discussions focusing on different aspects of forensic science as found in current journal articles, casework studies, and current research projects.
- 6210—**Advanced Forensic Photography (2)**. Prerequisite: For Professional concentration only. Participants will learn advanced techniques in the photographing of crime scenes, especially when conditions or situations are less than ideal.
- 6220—**Genetic Genealogy (2)**. Prerequisite: For professional concentration only. Covers how genetic principles can be coupled with traditional genealogy methods to infer familial relationships.
- 6300—**Forensic Capstone Experience (3)**. Prerequisite: For professional concentration only. The forensic capstone experience is a course offered in both the first and second summer semesters of the Master of Science in Forensic Science online program.
- 6310—**Investigative Analysis of Scene Reconstructions (3)**. Prerequisite: For professional concentration only. Participants will learn specialized knowledge in three subject areas related to crime scene investigation. Topics will include ballistics and firearm related investigations, blood spatter reconstructions, and staged crime scenes.
- 6330—**Master's Report in Forensic Science (3)**. Supervised research project to provide the student an opportunity to develop specific experience in the field.
- 6340—**Medicolegal Death Investigation (3)**. Prerequisite: For professional concentration only. Provides an in-depth look into the medicolegal aspects of death investigation, including the manners, mechanisms, and causes of death, as well as the postmortem changes.
- 6350—**Forensic Scene Management and Leadership (3)**. Prerequisite: For professional concentration only. Focuses on key points of crime scene and forensic laboratory management and leadership, including dealing with challenges associated with both administrative and leadership roles at a crime scene and in a forensic science laboratory.
- 6360—**Investigative Analysis of Impression Evidence (3)**. Prerequisite: For professional concentration only. Participants will learn specialized knowledge in the science of fingerprint identification, basic and advanced fingerprint processing techniques, and general comparison of fingerprints.
- 7000—**Research (V1-12)**.

Department of Geosciences

Master's and doctoral degree candidates may specialize in areas within geology, atmospheric science, geography and the environment, and geophysics. Details concerning the specific makeup of these groups are available from the department.

General degree requirements are those of the Graduate School. By the end of their first semester, graduate students are strongly encouraged to associate themselves with a faculty member or members who will serve as the student's principal advisor and will be responsible for the student's degree program.

The department permits students with bachelor's degrees from other sciences to enter the geosciences graduate program. Required leveling work will be determined on an individual basis, primarily by the faculty member(s) in the student's field of interest. A graduate minor may be taken either inside or outside this department.

Atmospheric Science, M.S.

The master's degree in atmospheric science provides the student with a comprehensive treatment of the dynamics describing the current and future atmospheric state using theory, observations, and numerical model-

ing. The curriculum is comprised of a minimum of 24 hours of graduate-level coursework and 6 hours of thesis credit. Students are expected to complete a thesis project as part of the degree requirements.

Geography and the Environment, M.S.

The 30-hour master's degree in Geography and the Environment has two options: 1) a thesis-based program designed for students who intend to pursue a Ph.D. or research-based career and 2) a non-thesis program intended for students who seek to acquire advanced employment skills. Both programs are designed to provide students with critical thinking skills, specific geographic expertise, spatial analysis techniques, and research experience.

Thesis Option. Students entering the Geography and the Environment master's program are strongly encouraged to write a thesis. The thesis is an original and significant piece of research. The thesis option requires: GEOG 5300, 15 hours in the major (GEOG and GIST courses), 6 hours in the minor or an additional 6 hours in the major, 6 hours of GEOG 6000 (Thesis).

Non-Thesis Option. Students entering the Geography and the Environment master's program may choose to pursue their degree under a non-thesis option. Under this option, a project is assigned to the student according to his/her interests and background and it is designed to demonstrate the student's ability to integrate geographic knowledge and skills. The non-thesis option requires: GEOG 5300, 18 hours in the major (GEOG and GIST courses comprise the major), 6 hours in the minor or an additional 6 hours in the major, 3 hours of GEOG 7000 (for the project).

Geosciences, M.S.

The master's degree in Geosciences has two options: 1) a thesis-based program for students who intend to pursue a Ph.D., research-based career, or preparation for professional employment and 2) a non-thesis program intended for students who seek advanced employment skills and/or opportunities for professional development. Both programs provide students with critical thinking skills, technical and skill proficiency in Earth and Planetary Sciences, and research experience. Requirements for the master's degree in geosciences include completion of a minimum of 24 hours of graduate named coursework; and a minimum of 6 hours of credit for research or professional development, including internship experience.

Thesis Option. Students entering the Geosciences master's program are strongly encouraged to write a thesis. The thesis is an original and significant piece of research. The thesis option requires a minimum of 24 hours of named graduate coursework, with a minimum of 18 in geology, geophysics or geochemistry, and 6 hours of GEOL 6000 (Thesis).

Non-Thesis Option. Students entering the Geosciences master's program may choose to pursue their degree under a non-thesis option. Under this option students will complete a project that is aligned with their professional interests and background and will demonstrate the student's ability to integrate Geoscience knowledge and skills. The non-thesis option requires a minimum of 21 hours of GEOL, GCH, or GPH named courses, including up to 3 hours of GEOL 5010, and 3 hours of GEOL 5300 or GEOL 7000 (project hours). The remaining 6 hours may be taken in GEOG/GIST, GEOL/GPH/GCH, or from a list of approved electives.

- 21 hours of named courses in GEOL/GPH/GCH.
- 3 hours for the project GEOL 5300 or GEOL 7000
- 6 hours of approved electives or GEOL/GPH/GCH, which may include GEOL 5010

Geosciences, Ph.D.

Requirements for the Doctor of Philosophy require completion of a minimum of 72 hours of graduate credit. A minimum of 36 hours of taught graduate coursework is required, of which a minimum of 12 hours must be completed in the Department of Geosciences. Additional coursework may be recommended at the discretion of a student's Dissertation Committee. At least 12 hours of dissertation credit and 12 hours of research credit must also be completed. The first-year Ph.D. student will be expected to prepare and defend a research pre-proposal. The intent of this work is to determine whether the individual is capable of doctoral-level research. In the second year, the student will formalize the dissertation topic and committee. Under normal circumstances the committee will consist of three to five members, including the faculty advisor. The Comprehensive Examination

will be completed before the end of the fourth long semester in residence. At least 6 credit hours of tool subject credit is required. Tool subjects are courses where students acquire a particular skill-set. These include foreign language, computer science, analytical techniques, microscopy, or statistics. Tool courses are determined by the graduate advisor and the student's dissertation committee.

Graduate Course Descriptions

Atmospheric Science (ATMO)

- 5010—Internship in Atmospheric Sciences (VI-6).** Supervised activity in a professional setting. Opportunity to apply technical skills in a non-academic setting. Prior approval required.
- 5101—Atmospheric Science Seminar (1).** Prerequisite: Instructor consent. Discussions of current research or selected topics of interest. May be repeated for credit.
- 5301—Individual Studies in Atmospheric Science (3).** Prerequisite: Instructor consent. A structured independent graduate studies course under the guidance of a faculty member. May be repeated for credit.
- 5302—Weather, Climate, and Applications (3).** Basic principles of atmospheric science, with particular emphasis on applications, including severe weather, air pollution, and global climate change.
- 5316—Dynamics of Severe Storms (3).** Observations and theoretical studies of severe storms. Conceptual and numerical models of storm structure and development.
- 5319—Boundary Layer Meteorology (3).** Boundary-layer turbulent transfer processes are examined, including diffusion, mixing, diabatic modification, low-level jet formation, and moisture discontinuities.
- 5321—Cloud and Precipitation Physics (3).** Processes of cloud droplet nucleation; initial growth of droplets and cloud droplet size spectra; theories of natural precipitation processes and microphysical parameterizations.
- 5322—Atmospheric Electricity (3).** Electrical processes in the atmosphere and in weather: ionosphere and global circuit, storm electrification, lightning physics and phenomenology, relationships between lightning and convection, measurement.
- 5327—Radar Meteorology (3).** Applications of radar to investigation of precipitating weather systems. Emphasis is given to analysis and interpretation of radar data in conjunction with other data sources.
- 5328—Synoptic and Mesoscale Dynamics (3).** Development of a conceptual and theoretical understanding of quasi- and semigeostrophic theory, omega-equations, PV-Thinking, cyclogenesis, frontogenesis, gravity waves, instabilities.
- 5331—Analysis of Geophysical Data Fields (3).** Theory, computation, and application of Fourier, time series, spectral, statistical, and data assimilation techniques.
- 5332—Regional Scale Numerical Weather Prediction (3).** Numerical solutions of geophysical systems, predictability of the atmosphere, and data assimilation techniques.
- 5351—Meteorological Data Acquisition and Instrumentation Systems (3).** Exploration, design, integration and application of meteorological data acquisition and instrumentation systems.
- 5352—Wind Science and Modeling (3).** Prerequisites: Instructor consent. Introduction of various wind systems and boundary layer aerodynamics, analysis of wind data, and modeling of near-ground wind features using experimental and numerical simulations.
- 6000—Master's Thesis (VI-12).**
- 7000—Research (VI-12).**

Geochemistry (GCH)

- 5300—Individual Studies in Geochemistry (3).** Prerequisite: Consent of instructor. A structured independent graduate studies course under the guidance of a faculty member. May be repeated for credit.
- 5303—Trace Element Geochemistry (3).** Theoretical basis for trace element distribution and fractionation. Trace element "fingerprints," use of stable and radioactive isotopes and rare-earth elements in petrology.
- 5305—Environmental and Aqueous Geochemistry (3).** Prerequisite: C or better in GCH 5405 or consent of instructor. Theoretical and applied aspects of geochemistry occurring in the upper crust. May be repeated for credit.
- 5308—Techniques and Applications in Mineral Sciences (3).** Prerequisite: Consent of instructor. Fundamental and practical aspects of mineral science with application to properties of natural crystalline phases.
- 5315—Sedimentary Provenance (3).** Introduction to geochemical and mineralogical approaches for determining the provenance of siliciclastic sedi-

ments and sedimentary rocks, with implications for paleogeography, paleoclimate, diagenesis and tectonic evolution.

- 5350—Stable Isotope Geochemistry (3).** Principles and applications of stable isotope geochemistry to the earth, environment, and solar system.
- 5360—Radiogenic Isotope Geochemistry (3).** Geochemical principles of radiogenic isotopes and their application as chronometers of the formation of geological materials and tracers of geological processes.
- 5371—Analytical Methods in Laser Ablation ICPMS (3).** Introduction to laser ablation inductively coupled plasma mass spectrometry and its applications to geochemistry and geochronology, including theoretical aspects and laboratory demonstrations and exercises.
- 5405—Inorganic Geochemistry (4).** Origin of elements and isotopes. Theory and application of isotopic systems, element mobility, thermodynamics, solution geochemistry, and geochemical cycles.

Geographic Information Science and Technology (GIST)

- 5001—Problems in Geographic Information Systems (VI-6).** Prerequisite: Instructor consent. Independent study under guidance of faculty member. May be repeated up to 3 times.
- 5300—Geographic Information Systems (3).** Introduction to geographic information systems (GIS) for thematic mapping and spatial analysis. Laboratory emphasized experience with professional GIS software.
- 5301—Remote Sensing of the Environment (3).** Use of satellite data to conduct research on spatial and temporal changes in the environment, emphasizing physical processes, sensors, analysis methods, and applications.
- 5302—Spatial Analysis and Modeling (3).** Prerequisite: GIST 5300 or equivalent. A course in GIS focused on spatial data management, editing, topology, models and cartographic representations.
- 5304—Exploring Spatial Databases (3).** Prerequisite: GIST 5300 or equivalent. Students will explore basic database concepts, fundamental design principles, and basic techniques of building a database to manage, analyze, and visualize geospatial data. [GIST 4304]
- 5310—GPS Field Mapping and Data Acquisition (3).** Prerequisite: GIST 5300 or equivalent. Use of the Global Position Systems (GPS) and mobile field software for navigation and the acquisition of spatial data.
- 5312—Web Mapping and Geovisualization (3).** Prerequisite: GIST 5300 or equivalent. Study of the technology used to create visualizations for geospatial data analysis with an emphasis on interactive web-mapping applications. [GIST 4312]
- 5314—Geospatial Data Science (3).** Prerequisite: GIST 5300 or graduate level statistics course, or instructor consent. Introduction to spatial data science and machine learning tools to investigate and identify patterns, clusters, trends, and anomalies based on geospatial big data. [GIST 4314]
- 5316—Spatial Programming and Geostatistics (3).** Prerequisite: GIST 5300 or graduate level statistics course, or instructor consent. Students will explore statistical applications with emphasis on geographic-specific problems and develop programming skills in Python. [GIST 4316]
- 5322—Remote Sensing Image Processing and Analysis (3).** Prerequisite: GIST 5301 or permission of instructor. A second course in Remote Sensing focusing on preprocessing of Earth observation data including georegistration and calibration, and image analysis including feature extraction and classification. [GIST 4322]

Geography (GEOG)

- 5001—Problems in Geography (VI-6).** Prerequisite: Instructor consent. Independent study under guidance of faculty member.
- 5010—Internship in Geography and the Environment (VI-6).** Supervised activity in a professional setting. Opportunity to apply technical skills in a non-academic setting. Prior approval required.
- 5101—Seminar on Professionalism in Geography (1).** Discussions and presentations on professionalism in academic and non-academic settings, including working effectively and efficiently, communication, ethics, and preparing for careers.
- 5300—Individual Studies in Geography (3).** A structured independent graduate studies course under the guidance of a faculty member. May be repeated for credit.
- 5303—Advanced Human Geography (3).** Consideration of current research in human geography with special reference to the spatial aspects of natural resource-environmental analysis. May be repeated as topic varies.
- 5304—Advanced Physical Geography (3).** Consideration of current research in physical geography with special reference to the spatial aspects of natural resource-environmental analysis. May be repeated as topic varies.

- 5306—Seminar in Geography of Arid Lands (3).** Systematic and regional review and analysis of the physical nature and problems of human utilization of the arid and semi-arid lands of the earth.
- 5309—Quantitative Methods in Geographic Research (3).** Provides an overview of the components of quantitative geographic research, addressing data and how data can be transformed into information. May be repeated as topic varies.
- 5334—Field Seminar in Human Geography (3).** Seminar conducted in field setting. Primary focus is original research projects by students. May be repeated when region and topic vary.
- 5335—Field Seminar in Physical Geography (3).** Original field research is done in a field setting, including design, data collection, data analysis and write-up of results. May be repeated up to 3 times. [GEOG 4335]
- 5342—Qualitative Methods in Disaster Research (3).** Introduces students to multiple qualitative methods used to build knowledge of the human and social drivers of environmental hazards and disasters.
- 5350—Research Design in Geography (3).** Core course for the design of spatial-temporal research, analysis, and writing skills in geography.
- 6000—Master's Thesis (VI-6).**
- 7000—Research (VI-12).**

Geology (GEOL)

- 5001—Problems in Geosciences (VI-6).** Prerequisite: Instructor consent. Independent study under guidance of a faculty member.
- 5010—Internship in Geosciences (VI-6).** Supervised activity in a professional setting. Opportunity to apply technical skills in a non-academic setting. Prior approval required.
- 5101—Seminar (1).**
- 5124—Modern Carbonate Environments: Field study of Bahamian Carbonate Sediments (1).** Corequisite: GEOL 5422. Exposes students to modern carbonate depositional systems and uses the student's observations to compare with ancient systems.
- 5300—Individual Studies in Geology (3).** Prerequisite: Instructor consent. A structured independent graduate studies course under the guidance of a faculty member. May be repeated for credit.
- 5303—Advanced Igneous Petrology (3).** Phase relations, geochemistry, and tectonic setting of igneous rocks. Emphasis on modern concepts of magma origin and differentiation. May be repeated for credit.
- 5304—Techniques in Electron Microscopy and Microanalysis (3).** Prerequisite: Graduate student in good standing. Application of electron microscopy and microanalysis to the study and characterization of organic and inorganic substances.
- 5305—Geology of Clays (3).** Introduction to clay mineral compositional and structural properties, laboratory identification and occurrences (soils, sediments, rocks). Uses of clays, emphasis on hydrocarbon exploration and production.
- 5311—Micropaleontology (3).** Lectures and labs are designed to acquaint the student with basic lab techniques, morphology, and classification within the major microfossil groups, and to demonstrate the usefulness and importance of microfossils as biostratigraphic and paleoecologic tools.
- 5322—Sedimentary Processes (3).** Principles of fluid dynamics important in sedimentation, interpretation of primary sedimentary structures, and description of depositional environments.
- 5325—Petrophysics (3).** Physical properties of reservoir rocks, including porosity, permeability, composition, and texture. Interrelationships between rock characteristics and electric log responses in geologic exploration and exploitation.
- 5327—Problems in Paleontology (3).** Subjects include origin of life, Precambrian life, origin and relationships of fish, amphibians, reptiles, dinosaurs, pterosaurs, birds, and primates; mass extinction and impact cratering processes.
- 5340—Advances in Historical Geology (3).** Survey of currently important topics in earth processes and history for science educators, with an emphasis on how geologists interpret modern and past geologic events.
- 5341—Digital Imagery in Geosciences (3).** Introduction to digital image processing, visualization, and raster GIS modeling applied to geosciences. Involves computer lab exercises.
- 5351—Imaging Spectroscopy and Raster Classification (3).** Prerequisite: C or better in GEOL 5341 or instructor consent. A comprehensive study of the techniques of reflectance spectroscopy, and of per-pixel and sub-pixel classification methods. Involves computer lab exercises.
- 5361—Advanced Structural Geology (3).** Topics include deformation mechanisms and rheology, tectonic evolution of oceanic lithosphere, and evolution of arcs. May be repeated once for credit.
- 5362—Advanced Tectonics (3).** Survey of the plate tectonics paradigm in terms of its historical development and modern application.

- 5399—**Advanced Petrophysics (3)**. Analysis of complex reservoirs, such as shaly sands, carbonates with complex pore geometries, fractured reservoirs, and gas-bearing dolomites. The development and use of new logging tools is also covered.
- 5410—**Vertebrate Paleontology (4)**. An introduction to the principles of paleontology governing evolution, morphology, and phylogeny of major groups of vertebrates.
- 5420—**Geological Correlation (4)**. Principles and methods of correlation of stratigraphic units with the geological time scale including chronostratigraphy, biostratigraphy, ecostratigraphy, sequence stratigraphy, event stratigraphy, chemostratigraphy, and related techniques.
- 5422—**Sedimentary Geology of Carbonates (4)**. Classification and interpretation of carbonate rocks, processes that control their deposition and diagenesis, evolution of carbonate systems through times.
- 5424—**Clastic Sedimentology (4)**. Origins, classification, petrology, diagenesis, and facies analysis of clastic sedimentary rocks. Survey of modern and ancient clastic depositional systems.
- 5426—**Sequence Stratigraphy (4)**. Fundamental concepts of sequence stratigraphy and application to interpretation of sedimentary basins across a range of depositional systems. Application to petroleum exploration and production.
- 6000—**Master's Thesis (V1-6)**.
- 7000—**Research (V1-12)**.
- 8000—**Doctor's Dissertation (V1-12)**.

Geophysics (GPH)

- 5300—**Individual Studies in Geophysics (3)**. Prerequisite: Instructor consent. A structured independent graduate studies course under the guidance of a faculty member. May be repeated for credit.
- 5303—**Seismic Data Analysis (3)**. Prerequisite: Instructor consent. Principles and methods for analyzing digital seismic data, including sampling, Fourier analysis, filtering, deconvolution, and introduction to seismic migration and tomography.
- 5305—**Velocity Model Building (3)**. Prerequisite: Instructor consent. Principles and usage of major seismic velocity model building approaches, including seismic refraction, semblance, migration, and tomographic velocity model building methods.
- 5307—**Seismic Migration (3)**. Prerequisites: C or better in GPH 5303 and instructor consent. Theory and practicality of Kirchhoff, f-k, FD, and reverse-time migrations for subsurface imaging.
- 5310—**Geophysical Fluid Dynamics (3)**. Survey of dominant modes of wave motion in the atmosphere. Scale analysis for problems in atmospheric dynamics with application to mid-latitude synoptic scale systems.
- 5321—**Advanced Seismic Exploration Methods (3)**. Prerequisites: C or better in MATH 1451 or instructor consent. Discusses methods to collect, process, and interpret seismic reflection data.
- 5323—**Advanced Environmental Geophysics (3)**. Prerequisite: C or better in GEOL 3401 and MATH 2450, or instructor consent. Covers methods to explore Earth's subsurface using gravity, magnetic, electrical, and electromagnetic methods.
- 5324—**Radiative Transfer (3)**. Principles of radiation, the radiative transfer equation. Applications to absorption, emission, and scattering processes. Determination of physical properties from satellite measurements.
- 5330—**Data Science for Geophysics (3)**. Prerequisites C or better in MATH 2450. Emphasizes the basics of Python programming and data science in geophysics.
- 5353—**Basin Analysis (3)**. Systematic understanding (and developing models) for the origin, maturation, and accumulation of hydrocarbons in sedimentary basins in the context of their geologic evolution.

Department of History

Information about departmental admission standards, prerequisites, and other matters dealing with graduate study in history may be acquired by consulting the departmental website (<https://www.depts.ttu.edu/history/>) or by contacting the department's Director of Graduate Studies or Graduate Program Coordinator.

History, M.A.

The Department of History offers two different kinds of Master of Arts degrees in History—the M.A. academic preparatory concentration (with thesis) and the terminal M.A., or professional enrichment preparatory concentration (non-thesis).

M.A. Academic Preparatory Concentration

Program Requirements. A student in the M.A. academic preparatory concentration must successfully complete at least 36 hours of graduate work to receive the Master of Arts degree. A minimum of 24 hours must be taken in the Department of History at Texas Tech. This includes 12 hours taken at the 5000-level in one of three geographic areas of concentration (United States, Europe, or World) and 12 hours of elective graduate coursework. Of the electives, 6 hours must be chosen from geographic areas outside of the student's geographic area of concentration. Students must complete HIST 5304 and HIST 6301 in the first semester they are offered after the student's admission to the program. HIST 5304 must be taken before HIST 6301. HIST 5304 and HIST 6301 must also be taken before completing 6 hours of thesis hours (HIST 6000). No more than 6 hours of coursework at the 7000-level may count toward degree requirements. Within this framework, students are strongly advised to plan their programs with the advice and consent of the Graduate Program Coordinator, the Director of Graduate Studies, and their primary faculty advisor.

Course Requirements:

- HIST 5304 (Take during first semester course is offered after admission.)
- HIST 6301 (Take during first semester course is offered after completion of HIST 5304.)
- Geographic Area of Concentration (12 Semester Credit Hours)
- Electives (12 Semester Credit Hours, 6 hours of which must be outside the geographic area of concentration)
- HIST 6000 - Master's Thesis (6 Semester Credit Hours)

Foreign Language Requirement. One foreign language is required for the M.A. thesis-concentration degree according to the following guidelines:

1. Proficiency in one language other than English is required of all candidates for the M.A. thesis-concentration degree.
2. For the purpose of the above listed requirements, "proficiency" in a language is defined according to the following parameters:
 - native speaker status as certified by the Graduate Studies Committee,
 - attainment of a grade of C- or better in a fourth semester undergraduate course (in Texas numeration, the 2302 course),
 - attainment of a grade of B- or better in the first or second semester of an accelerated graduate language course (in Texas numeration the 5341 or 5342 courses),
 - other class work equivalent to the above, OR
 - demonstration of an equivalent level of competency through an approved examination.

Thesis. Thesis work is directed by a committee consisting of at least two members of the history graduate faculty. Other faculty who may be a scholar with relevant expertise from the Department of History, another department, or another university, can be added to the committee if the thesis director, student, and graduate advisor conclude that the nature of the thesis topic warrants it. After the final version of the thesis has been approved by the committee, students are required to pass an oral defense of the thesis.

Online Non-Thesis Master's Degree (Professional Enrichment)

Program Requirements. This degree, which can be completed 100% online, is designed to assist persons for whom an M.A. would provide career advancement in a chosen or desired field other than that for which a history Ph.D. is required. The focus of the terminal M.A. is on providing a platform for developing critical analytical skills (reading, written, and oral) within a historical framework. The program provides intense study of up to three interrelated geographic or thematic fields. The terminal M.A. concludes with written examinations in the student's chosen fields of study. The degree does not require the completion of a thesis-length work. For this reason, the terminal M.A. concentration is not intended for those whose interests are oriented toward undertaking Ph.D. work in history. Some of the careers for which obtaining a terminal M.A. in History may be an asset include the following: education/teaching (K-12 or community college), library studies, non-governmental agencies, social work, journalism, campaign management, genealogist, archivist/archival administration, public historian, corporate management, community organizer, counseling, public affairs, political activism, and entertainment industry historical consultant.

Course Requirements. A student in this plan must successfully complete at least 30 hours of graduate work to receive the terminal Master of Arts degree. A minimum of 24 hours must be taken in the Department of History. Students must complete HIST 5304 and are encouraged to do so at their first opportunity. Students must also complete 3 hours in world history, 3 hours in European history, and 3 hours in United States history, as well as 12 additional hours, 9 of which must be taken in the Department of History. Students must also complete HIST 6301 during their penultimate semester and HIST 7310 in their final semester. Students in this program will work closely with a department-appointed Non-Thesis M.A. Coordinator.

The 30 hours are distributed as follows:

- HIST 5304
- HIST 6301
- HIST 7310
- United States History: 3 Semester Credit Hours
- World History: 3 Semester Credit Hours
- European History: 3 Semester Credit Hours
- Discretionary/Elective Hours: 12 Semester Credit Hours (9 of which must be taken in the Department of History)

Foreign Language Requirement. No language is required for the terminal Master of Arts option.

Capstone Project. In their final semester, students will enroll in HIST 7310 and complete a capstone project, something that advances their professional goals. Examples include (but are not necessarily limited to) a) curriculum and/or lesson plan development that incorporates knowledge and skills gained in the program for use in the classroom, b) a public or digital history project, c) a roughly 20-page research paper rooted in original, primary evidence, or d) some other project—approved by the Non-Thesis M.A. Coordinator—related to the individual's unique professional goals.

History, Ph.D.

The Doctor of Philosophy in History Program requires sixty (60) hours of graduate coursework beyond the B.A./B.S. degree. At least thirty (30) of those hours must be taken at Texas Tech University.

Program Requirements

Doctoral students must choose one major geographic field and two minor geographic fields of study from among the following three fields: United States, Europe, and World. Students will complete thirty (30) hours of graduate coursework in their major geographic field and nine (9) hours of graduate coursework in each minor geographic field. At least three (3) hours of that coursework in each geographic field must be in historiography. In addition, all doctoral students must complete HIST 5304 - Approaches to History, six (6) hours in HIST 6301 - Introduction to Historical Writing, and three (3) hours of an elective HIST graduate course. Doctoral students are not allowed to take more than four (4) HIST 7000-level courses (12 semester credit hours) toward the degree requirements.

The 60 hours are distributed as follows:

- Geographic Major Field: 30 semester credit hours (including 3 hours of "historiography")
- Geographic Minor Field: 9 semester credit hours (including 3 hours of "historiography")
- Geographic Minor Field: 9 semester credit hours (including 3 hours of "historiography")
- HIST 5304 - Approaches to History 3 semester credit hours
- HIST 6301 - Introduction to Historical Writing 6 semester credit hours
- Elective HIST graduate course: 3 semester credit hours

Other Doctoral Program Requirements

Foreign Language Requirement. If not satisfied at the Master of Arts level, proficiency in one foreign language is required of all candidates for the Ph.D. degree. Proficiency in a language is defined according to the following parameters:

- Native speaker status as certified by the Graduate Studies Committee
- Attainment of a grade of C- or better in a fourth semester undergraduate course (in Texas numeration the 2302 course)

- Attainment of a grade of B- or better in the first or second semester of an accelerated graduate language course (in Texas numeration the 5341 or 5342 courses)
- Other class work equivalent to the above, OR
- Demonstration of an equivalent level of competency through an approved examination.

Qualifying Examination. Doctoral students who have finished their required graduate coursework in history (and in an outside minor field if they select one) are required to take a comprehensive examination in four select fields of study. All graduate coursework should normally be completed in the semester prior to the comprehensive exam. In the comprehensive examination, the student is expected to demonstrate a very high level of factual knowledge, an insight into problems of meaning and interpretation, and a command of the historiography and literature of the fields selected. The comprehensive exam consists of two separate steps: written examinations and an oral examination. For the written portion, a student will be examined in four fields of study aligned with their research interests and in preparation for their dissertation. The four fields are comprised of:

- Field 1: Geographic Major Emphasis 1
- Field 2: Geographic Major Emphasis 2
- Field 3: Geographic Minor
- Field 4: Thematic

Dissertation. After completion of the comprehensive exams, doctoral students will complete a dissertation. The Ph.D. dissertation should represent a contribution to the discipline, either as a reevaluation of a subject or as an original contribution to knowledge. It should demonstrate a high-level command of research techniques and the ability to organize materials and present them clearly. The chairperson of the student's dissertation committee is primarily responsible for directing the research and writing of the dissertation, with the other members acting in an advisory capacity. A defense of the dissertation is held after the committee has approved the final working draft.

Graduate Course Descriptions

History (HIST)

- 5101—History as a Profession (1).** Designed to help students develop the skills necessary for researching and writing history at the graduate level as well as pedagogical skills.
- 5102—Teaching History in College (1).** For GPTIs concurrently teaching introductory surveys in the Department of History, focused on classroom implementation of historical content. For doctoral students in History only.
- 5303—Oral History Methodology (3).** Offers materials on the theory and methods for the collection and analysis of oral histories uses in reconstructing U.S., European, and non-Western history.
- 5304—Approaches to History (3).** Prerequisite: Must be a first-year graduate student in the Department of History. Introduces graduate students to the development of historical thinking, the historical profession, critical theory, methodologies, and research skills.
- 5305—Historiography of European History (3).** Introduction to the themes and approaches that have been influential in the historical profession and in the study of European history.
- 5306—Recent Interpretations of American History (3).** A survey of recent major works discussing chronological periods and topics in American history. Required of some master's and doctoral students.
- 5308—Historical Studies of Religion (3).** A survey of scholarly attempts to understand the history of religion emphasizing historiographical achievements and methods.
- 5309—Studies in the History of United States Imperialism (3).** Graduate seminar on the history of United States imperialism from the founding to the present, considering major works, themes, approaches, and sources in the field.
- 5310—Studies in American Cultural and Intellectual History (3).** Examines the intersection of intellectual and cultural history at various periods in American history. May be repeated once for credit when topics vary.
- 5313—Studies in American Legal History (3).** Graduate seminar on United States legal history considering major works, themes, approaches, and sources in the field.
- 5314—Studies in Post-1945 United States History (3).** Special topics examining the social, cultural, and political history of the United States since the end of World War II. May be repeated for credit.

- 5315—**Studies in Texas History (3).** Topics vary with interests and needs of each class; emphasis on Spanish heritage, Texas Revolution, Republic, political, economic, and social developments, ethnic groups.
- 5316—**Studies in Southern History (3).** An analysis of the major issues and controversies of the South with emphasis on the period from the American Revolution to the present.
- 5317—**Studies in Frontier and Western American History (3).** An examination of selected areas with emphasis on exploration, settlement, Anglo-American expansion, foreign and Indian conflicts, life-ways, and resulting changes in American institutions.
- 5318—**Studies in History and Memory (3).** A study of the theories and methodology used in the sub-field of history and memory.
- 5319—**Studies in Native-American History (3).** A reading seminar on the literature of Native-American history and the Native Americans of the plains and the southwest.
- 5320—**Studies in the Atlantic World (3).** Explores a series of problems in the developing field of Atlantic history. May be repeated once for credit when topics vary.
- 5321—**Studies in Sports History (3).** Introduces students to the vast array of materials and topics covered within the growing field of sports history.
- 5322—**Studies in United States Foreign Relations (3).** Readings in the history of U.S. Foreign Relations with an emphasis upon either pre-1900, post-1900, or the classics of the field.
- 5323—**Studies in the History of Science and Technology (3).** Topics vary to include 20th-century American science, the industrial revolution, and the social relations of science and technology.
- 5324—**Studies in American Religious History (3).** A survey of recent major works covering the social, political, and cultural implications of American religious history. Topics may vary.
- 5325—**Studies in American Economic History (3).** Historical analysis and interpretation of growth and change in the United States economy, with emphasis on ideas and institutions in business and agriculture.
- 5326—**Studies in Nature and History in America (3).** Readings in nature's role in American history from pre-Columbian Indians to present, with varied topics like environment, culture, society, politics, and war.
- 5327—**Studies in United States Immigration and Urban History (3).** Explores a series of problems in United States immigration and urban history since the mid-nineteenth century.
- 5328—**Studies in U.S. Military History (3).** A readings summary on military history with emphasis on development of institutions and national struggles.
- 5329—**Oceans and Sea Power (3).** Survey of classic and recent works on oceanic histories around the world, including economic, environmental, military, political, and science histories since the 18th century.
- 5330—**Studies in the Vietnam War (3).** A study of political, military, economic and social issues resulting from American's involvement in the Vietnam War.
- 5331—**Studies in the Classics of Military History (3).** A readings seminar to introduce the classic works of military strategists, theorists, tacticians, and historians.
- 5333—**Studies in African-American History (3).** Studies of African influences, racial ideas, slavery, and post-emancipation efforts to achieve civil and political rights, education, economic opportunity and the creation of social institutions.
- 5334—**Studies in Mexican-American History (3).** An extensive reading program and sustained dialogue centering on Mexican-American history with emphasis on theoretical approaches and methods of historical inquiry.
- 5335—**Studies in U.S. Labor (3).** Examines trends and topics central to the history of U.S. labor and working-class studies.
- 5336—**Studies in American Sexuality (3).** Examines trends and topics central to the key debates in the history of American sexuality.
- 5337—**Studies in Modern U.S. Women's History (3).** A survey of significant literature and analysis of problems related to the study of women in American history.
- 5338—**Studies in American Social History (3).** Reading, analysis, and critical reviews of pivotal works. Emphasis on varieties and impact of social history on topics such as family, community, race, gender, and work.
- 5339—**Studies in Ancient Greek History (3).** Studies of selected topics in the political or intellectual history of ancient Greece based upon a study of sources, in translation if advisable.
- 5340—**Studies in Ancient Roman History (3).** Studies of selected topics in the political or intellectual history of ancient Rome based upon a study of sources, in translation if advisable.
- 5341—**Studies in Medieval History (3).** Study of selected topics in the intellectual history of the early and high middle ages. Individual reports discussed in a seminar situation.
- 5342—**Studies in Renaissance and Reformation History (3).** Study of selected topics in the intellectual or religious history of the Renaissance or the Reformation. Individual reports discussed in a seminar situation.
- 5343—**Studies in Russian History (3).** Examines key topics and debates in the history of Russia and the Soviet Union. May be repeated once for credit when topics vary.
- 5344—**Readings in European Nationalism (3).** Takes a cross-disciplinary approach to the study of European nationalism. Emphasizes historians' contribution to this field. May be repeated for credit.
- 5345—**Studies in the History of Fascist and Related Right-Wing Movements in Europe (3).** Examines individually and collectively themes of nationalism, anti-Semitism, militarism, and anti-Marxism, chiefly in the period 1918-1945.
- 5346—**Studies in Modern European History (3).** Examines the social, cultural, and political history of Europe from 1815 to the present.
- 5347—**Studies in Early Modern British History (3).** Examines the political, social, and cultural history of early modern Britain, focusing on the sixteenth through the eighteenth centuries.
- 5348—**Studies in Roman Law (3).** Topics in the historical development of classical Roman law. Designed to meet the needs of both law and graduate students.
- 5349—**Studies in Early Modern European History (3).** Study of selected topics in the political, social, economic, religious, and cultural history of Europe from the 15th to the 18th century.
- 5350—**Studies in African History (3).** A survey of African history focusing on major problems of interpretation. Includes political, economic, religious, and cultural change; pre-colonial and colonial encounters.
- 5351—**Slavery in a World Perspective (3).** An examination of the main areas and epochs in which slavery institutions were central: Antiquity, Medieval Europe, Pre-Colonial Africa, the West Indies, and Southern U.S.
- 5352—**Studies in Asian History (3).** Explores key themes in Asian history. May be repeated for credit.
- 5353—**Studies in the History of the U.S. Civil War (3).** Introduces students to the key themes and debates in the history of the American Civil War.
- 5354—**Studies in Modern Revolution (3).** Explores the causes, courses, and consequences of revolutionary movements in the modern era.
- 5355—**Studies in Colonial Latin American History (3).** Explores the principal historical literature and interpretations for Colonial Spanish America from the conquest to independence.
- 5356—**Studies in National Latin American History (3).** Examines the history of the areas since independence with emphasis on modernization. Includes consideration of Latin America as a civilization while revealing unique characteristics of the individual countries.
- 5357—**Studies in LGBT History (3).** Explores the history of gays, lesbians, bisexuals, and transgender individuals in the United States from about 1600 to 1980.
- 5358—**Islamic Reform, Revival, and Politics in the Middle East (3).** Focuses on various Islamic reform and revival movements in the Middle East and their impact on society and politics.
- 5359—**Studies in Borderlands History (3).** Examines the broad concept of borderlands studies through a historical lens and its applicability across disciplines.
- 5360—**Studies in French History (3).** Explores problems in the social, cultural, and political history of France since the 17th century. May be repeated.
- 5361—**Studies in the History of Insurgency (3).** A study of a type of warfare that has existed from the days of early civilizations. Topics will progress from Greece and Rome to Iraq.
- 5362—**Family, Gender, Race, and Empire (3).** Explores the influence of imperial expansion and colonialism on familial ties, gender roles, racial identity, and sexuality.
- 5363—**Women in Early America (3).** Explores the history of women and gender in the United States from the 16th century to 1877.
- 5364—**The Era of the American Revolution (3).** Examines the major events of and historical writing about the American Revolution.
- 5366—**Studies in Religious History (3).** Investigations of the development of religious institutions, the relationship between religion and society, and cross-cultural religious phenomena.
- 5367—**Studies in U.S. Masculinity (3).** Explores a series of problems in the history of U.S. masculinity from the 18th century to the present.
- 5368—**The U.S. and the World (3).** Explores the historiography of the U.S. and the world, considering the history of the U.S. in a world history context.
- 5369—**Studies in U.S. Social Movements (3).** Introduces students to the advanced study of U.S. social movements.
- 5370—**Readings in Mass Incarceration (3).** Covers the emerging historiography of prisons and mass incarceration. The geographical focus of the course will vary.
- 5371—**War and Memory (3).** Examines the ways in which societies commemorate warfare.

- 5372—**Studies in Middle Eastern History: The Modern Middle East (3).** Explores key themes in Middle Eastern history. May be repeated for credit.
- 5373—**Religion in Latin America (3).** Prerequisite: Graduate standing. Students will examine religion in Latin America from diverse vantage points. Religion will be a lens to examine broader society and change over time.
- 5374—**Studies in Modern British History (3).** Examines the political, social, and cultural history of modern Britain, focusing on the eighteenth through twentieth centuries.
- 5632—**Studies Abroad in Southeast Asia (6).** Students have the opportunity to travel to Vietnam, Laos, Cambodia, and Thailand and to participate in cultural exchanges with government leaders, students, and Vietnamese veterans.
- 6000—**Master's Thesis (V1-6).** Prerequisite: C or better in HIST 5304.
- 6301—**Introduction to Historical Writing (3).** Prerequisite: C or better in HIST 5304; must also be enrolled as graduate student in the Department of History. Continues advanced examination of historical methods, emphasizing particular approaches to historical investigation and the writing of an ambitious piece of original work.
- 6304—**Seminar in American History (3).** A research course featuring formal papers on selected topics. Topics chosen in consultation with the instructor.
- 6305—**Seminar in European History (3).** Research seminar, with stress on methodology, types of research materials available in our library in European history, delivery of reports, and submission of an extensive term paper.
- 6307—**Historiography of the World (3).** Examines the major themes and interpretations of world history, emphasizing both the global past and methodological debates.
- 6311—**Readings in American History to 1877 (3).** Examines major readings and themes in American history to 1877.
- 6312—**Readings in American History Since 1877 (3).** Examines major readings and themes in American history since 1877.
- 7000—**Research (V1-12).**
- 7301—**Independent Readings (World) (3).** Individual readings in selected topics in World history, supervised by an instructor. May be repeated for credit.
- 7302—**Independent Readings (Europe) (3).** Individual readings in selected topics in European history, supervised by an instructor. May be repeated for credit.
- 7303—**Independent Readings (U.S.) (3).** Individual readings in selected topics in American history, supervised by an instructor. May be repeated for credit.
- 7310—**Capstone Portfolio (3).** Students will revise and prepare to defend their capstone projects.
- 8000—**Doctor's Dissertation (V1-12).**

Department of Kinesiology and Sport Management

The department offers a Master of Science in Kinesiology, a Master of Science in Sport Management, a Ph.D. in Exercise Physiology, and two dual degrees.

Kinesiology, M.S.

The Master of Science in Kinesiology offers advanced study in three concentrations, namely, exercise physiology, human performance, and motor behavior/exercise and sport psychology. Each concentration provides a unique curriculum to prepare students for specialized careers within their chosen area of study. This degree requires a minimum of 36 hours of graduate courses and provides thesis and non-thesis options. The thesis option requires successful completion of a research project culminating in a thesis document and its defense, which comprises 6 of the 36 hours. The non-thesis option requires 36 hours of coursework along with passing or completing a non-thesis exam/project that varies per concentration of study. Each student is assigned a graduate faculty adviser to assist with the development and completion of their degree plan.

Exercise Physiology Concentration. The Exercise Physiology concentration in the Master of Science in Kinesiology is designed for students interested in pursuing careers in allied health or a Ph.D. in exercise physiology.

For more information, visit the program website:
https://www.depts.ttu.edu/ksm/grad/ms_kinesiology.php.

Sport Management, M.S.

The Master of Science in Sport Management provides advanced study in management theories, principles, and applications within the sport industry. This degree requires a minimum of 30 hours of graduate sport management or equivalent courses along with passing a comprehensive evaluation. Two options exist to complete this degree. The face-to-face option is typically completed during four long terms (i.e., two fall and two spring semesters) with students admitted on a rolling basis. The online option can be completed in one calendar year with students admitted once a year through a cohort model.

For more information, visit the program website:
https://www.depts.ttu.edu/ksm/grad/ms_sp_manage.php.

Sport Management, M.S. / J.D.

The School of Law, in association with the Graduate School, offers a dual-degree program that enables a student to earn both the Doctor of Jurisprudence (J.D.) and Master of Science in Sport Management (M.S.) degrees in three years of academic work. This degree program may be particularly beneficial to students in becoming athletic directors or senior administrators of collegiate or professional sport programs as well as those who wish to represent athletes as sports agents.

Both degrees will be awarded upon completion of 99 hours (78 hours of law courses and a total of 21 hours of sport management courses). This is made possible by allowing 9 hours of approved law courses to transfer as elective credit toward the 30-hour M.S. degree and 12 hours of approved Sport Management courses to transfer as elective credit toward the J.D. These transfers are of credit hours, not grades. Therefore, graduate course work will not be computed in a student's Law School GPA and class ranking.

For more information, visit the program website:
<https://www.depts.ttu.edu/ksm/grad/MasterofScienceinSportManagement.php>.

Sport Management, M.S. / Master of Business Administration, M.B.A.

The Rawls College of Business Administration and the Department of Kinesiology and Sport Management offer a dual-degree program enabling students to earn a Master of Business Administration (M.B.A.) and Master of Science in Sport Management (M.S. in SPMT) in two years. This combination of degrees will aid students interested in becoming athletic directors or senior administrators of collegiate or professional sport programs. Students can complete a 42-hour M.B.A., which is only offered online, and a 30-hour M.S. in SPMT with 9 credit hours applying to both degrees for a total of 54 credit hours. After admission into the M.S. in SPMT, a prospective student must be admitted into the M.B.A. program.

For more information, visit the program website:
<https://www.depts.ttu.edu/ksm/grad/M.B.A.in.SPMT.php>.

Exercise Physiology, Ph.D.

Exercise Physiology, Ph.D.

The doctoral program in exercise physiology provides students with advanced knowledge about the integrative physiological processes related to how exercise and lifestyle changes improve health and reduce risk factors for disease and disability.

The doctoral degree requires 60 credit hours that include focused required coursework, seminar, electives, and 12 dissertation credit hours. Prior to starting dissertation research, students are required to pass a qualifying exam in their fourth long semester or summer term after completing the program's core courses. Details about the qualifying exam including examination options can be found in the departmental graduate student handbook. All students will be reviewed annually for satisfactory progress that includes maintaining a B average and meeting agreed upon standards/expectations established by the student's research mentor.

For more information, visit the program website:
<https://www.depts.ttu.edu/ksm/grad/ExercisePhysiologyPhD.php>.

Graduate Course Descriptions

Kinesiology (KIN)

- 5004—Special Topics (V1-6).** Prerequisites: M.S. in Kinesiology students, Ph.D. in Exercise Physiology students, or permission of the instructor. A rotating topics and variable credit-hour course examining a variety of issues and topics in kinesiology and exercise physiology. May be repeated for up to six credit hours when topics vary.
- 5031—Independent Study (V1-6).** A structured independent study under the guidance of a member of the graduate faculty. May be repeated for credit up to a maximum of 6 hours.
- 5302—Motor Control (3).** Provides an examination of the neural structure and processes involved in the control of movement and in the maintenance of body posture.
- 5303—Psychology of Sport (3).** Theory and practice of the major psychological dimensions underlying the behavior of the coach and athlete in the sport context.
- 5304—Clinical Internship (3).** Prerequisites: Nine hours of graduate work in kinesiology. Three credit hours are equal to 300 hours of on-site experience. Approval of the TTU Clinical Internship Director is required. May be repeated once for credit.
- 5305—Motor Learning (3).** The study of the principles and concepts of human behavior related to and affected by human movement with emphasis on motor skill learning.
- 5307—Motor Development (3).** The study of human development from conception through adulthood. Examines and discusses theoretical perspectives and motor development research throughout the life span.
- 5312—Behavioral and Psychological Aspects of Exercise (3).** Empirical investigations of the association between exercise and psychological/behavioral health. Moderation and mediation of the associations will also be discussed.
- 5313—Applied Psychology of Sport (3).** Applied aspects of psychological skills in sport and exercise and how individuals can use these skills to positively affect sport and exercise participation, performance, motivations, and enjoyment.
- 5315—Research Methods I (3).** Basic concepts of research methods, research design, treatment, and interpretation of data.
- 5316—Research Methods II (3).** Prerequisite: C or better in KIN 5315 or equivalent. Advanced and applied concepts of research methods, research design, treatment, and interpretation of data.
- 5317—Seminar (3).** Specific research topics will be studied. May be repeated for credit. [KIN 7304]
- 5318—Biomechanical Assessment of Human Performance (3).** The examination of research techniques used in biomechanical evaluations of human performance, including data acquisition, analysis, and presentation of information.
- 5334—Clinical Exercise Testing and Prescription (3).** Study of the pathophysiology of cardiovascular and pulmonary diseases with concentration on the recommendations for exercise in clinical populations.
- 5335—Cardiopulmonary Exercise Physiology (3).** Biophysical principles, cellular mechanics, fiber contraction, and feedback control systems in cardiovascular and pulmonary function is highlighted.
- 5336—Skeletal Muscle Physiology (3).** Structural and functional characteristics of skeletal muscle and the regulation of energy pathways that support muscle contraction.
- 5337—Electrocardiography (3).** The art and science of the interpretation of the 12-lead electrocardiogram and the underlying cardiovascular physiology is highlighted. ACLS emergency drugs are emphasized.
- 5338—Human Body Composition (3).** Prerequisite: Admission into M.S. in Kinesiology or permission of instructor. The assessment and modification of human body composition and its relationship to fitness and exercise performance.
- 5353—Research and Assessment of Muscular Performance (3).** Details the techniques used to assess human performance with an emphasis on and research about athletic performance testing and tools.
- 5355—Program Design for Strength and Conditioning (3).** Examines the outcomes associated with different strength training and conditioning regimens.
- 5357—Applied Neuromuscular Performance (3).** Examines the basic and applied principles of neuromuscular performance and the effects of exercise applications on the functioning of the neuromuscular system.
- 5358—Ergogenic Aids and Human Performance (3).** Students will understand fundamentals of sports nutrition and research and evidence concerning major dietary ergogenic aids and be able to communicate this knowledge to others.
- 6000—Master's Thesis (V1-6).**
- 6318—Experimental Design in Exercise Physiology (3).** Prerequisites: Graduate status; STAT 5302 or approval of instructor. An in-depth

knowledge of different types of experimental design and statistical/data analytic techniques related to a specific design used commonly in applied human physiological research.

- 6319—Development of Exercise Physiology Proposals (3).** Prerequisite: Ph.D. status in Exercise Physiology or approval of instructor. Write a scientific manuscript suitable for a peer-reviewed exercise physiology or related journal using a reference manager; write a research proposal for a granting agency.
- 7000—Research (V1-12).**
- 7104—Seminar in Exercise Physiology (1).** Prerequisite: Doctoral student status in exercise physiology or permission of instructor. This weekly course is designed to provide students with a forum to discuss new research in exercise physiology by attending and organizing presentations.
- 7301—Advanced Exercise Physiology I (3).** Prerequisite: Doctoral student status in exercise physiology or permission of instructor. Advanced study of mechanisms that regulate the cardiovascular and endocrine systems with application of physiological principles to understand responses and adaptations to exercise. [KIN 5335]
- 7303—Advanced Exercise Physiology II (3).** Prerequisite: Exercise Physiology doctoral students or permission of instructor. Advanced study of skeletal muscle as it pertains to cellular energy exchange supporting muscle contraction and neuromuscular adaptations with exercise training.
- 7304—Advanced Topics (3).** Students will examine selected advanced interdisciplinary topics in exercise physiology and related areas to kinesiology. May be repeated for credit when topic varies. [KIN 5317]
- 7305—College and University Teaching in Exercise Physiology (3).** Study of educationally sound curricular design, instructional delivery characterized by interactive lecturing and active learning, and formative and summative assessments of learning in exercise physiology.
- 7316—Applied Statistics in Kinesiology (3).** Prerequisite: Exercise Physiology doctoral students or permission of instructor. Advanced concepts of correlation, t-test, and one-way, factorial, and repeated measures ANOVA applied to kinesiology. [KIN 5316]
- 8000—Doctoral Dissertation (V1-12).** Prerequisite: Ph.D. candidacy. Design, performance, and defense of research leading to a Ph.D.

Sport Management (SPMT)

- 5003—Internship in Sport Management (V1-6).** Prerequisites: 18-24 hours of approved coursework in sport management, departmental approval. A maximum of 6 hours credit may be earned in one or more semesters.
- 5031—Independent Study (V1-6).** Prerequisite: Departmental approval. A structured independent study under the guidance of a member of the graduate faculty. May be repeated for credit up to 6 hours.
- 5300—Special Topics in Sport Management (3).** Prerequisite: SPMT degree status. Examines selected topics in sport management with content varying based on the topic.
- 5315—Research Methods I (3).** Basic concepts of research methods, research design, treatment, and interpretation of data.
- 5320—Sport Leadership (3).** The study of leadership theory and its application to the effective management of sport programs. The course will also examine current sport leadership research.
- 5321—Advanced Sport Finance and Economics (3).** Financial concepts and issues related to the sport industry, including methods and sources of revenue acquisition, financial analysis techniques, and economic impact.
- 5322—Organizational Behavior in Sport (3).** Methods of organizing and administering sport and athletic programs. Study of staff, program, budget, health and safety, facilities, publicity, history, duties of an athletic director, and national, state, and local controls.
- 5324—Marketing and Promotions in Sport (3).** Understanding the sport industry. Developing knowledge and skills of marketing process in sport operations. Sport sponsorship, promotion, and public relations.
- 5325—Ethics and Morality in Sport (3).** Students will learn to make morally reasoned decisions, respond responsibly when faced with challenging ethical dilemmas in sport settings, and serve as role models for ethical conduct.
- 5329—Sport Event Management (3).** The study of management principles and procedures specific to the design, operation, and implementation of sporting events.
- 5344—Applied Issues in Sports Analytics (3).** Prerequisites: Enrollment in Sport Management master's program or consent of instructor. Students will collect and statistically analyze sports data that will help sport managers think critically and make strategic inferences and recommendations based on these data.
- 5345—Administration of Intercollegiate Athletics (3).** Examination of the operations and management of intercollegiate athletic departments,

including historical perspectives of the NCAA and human and fiscal resource management.

- 5346—Applied Sport Law (3).** Provides advanced application of the law to the sport industry, specifically focusing on sport agent representation, liability and risk management, collective bargaining, and negotiation.
- 5347—Sport Media Management (3).** Provides sport managers with the skills for managing media relations and creating and distributing sports information and content across a variety of media platforms.
- 5348—Sponsorship and Endorsement in Sport (3).** Prerequisite: SPMT 5324 recommended but not required. Students will learn how sports organizations and athletes develop successful partnerships with corporations through the creation and execution of sponsorship agreements.
- 6000—Thesis (V1-6).** Prerequisite: Departmental approval. Original research for a thesis.
- 7000—Research (V1-12).** Prerequisite: Departmental approval. Structured research under the guidance of a faculty member.

Department of Mathematics and Statistics

Students seeking an advanced degree in mathematics or statistics should consult with the graduate director of the department before enrolling in any courses. The department offers a number of graduate courses that are suitable for students who wish to complete a minor in mathematics or statistics.

The requirements listed below are in addition to the university and Graduate School requirements. A student must fill out a degree plan after the end of the first long semester and before the start of the second long semester in the program. Each student's program of study and committee must be approved by a graduate program representative from the Department of Mathematics and Statistics.

Contact: Dr. David Cannon | david.cannon@ttu.edu or
Department of Mathematics | math.dept@ttu.edu

Transfer of Courses for All Degrees. With the permission of the graduate advisor, credit may be transferred as follows:

- One course (3 credit hours) may transfer toward a grad certificate provided there is an equivalent TTU course.
- Two courses (6 credit hours) may transfer toward a master's degree, provided there is an equivalent TTU course.
 - A core course/sequence from a master's degree granting institution will not transfer.
 - Students can be exempted from a core course/sequence by passing the corresponding Ph.D. prelim exam at TTU.
- Up to 10 courses (30 credit hours) from a doctoral degree granting institution may transfer toward a Ph.D. degree.
 - A core course/sequence from a Ph.D. degree granting institution may transfer if the student has passed the corresponding prelim exam at TTU.
 - No courses from a master's degree granting institution will be granted transfer credit.
- No course or credit from an undergraduate program will be allowed to transfer toward a graduate degree or certificate.

For questions, please contact Dr. David Cannon, david.cannon@ttu.edu.

Mathematics, M.A.

Non-Thesis Portfolio Option. This degree is offered primarily for those students who wish to teach mathematics at the secondary level or at a junior/community college. This program consists of 36 hours of graduate work and the creation of a Portfolio. The portfolio will serve as written evidence of the experience and expertise acquired during the course of completing the M.A. degree. A minor in an approved area outside mathematics is permitted. Normally, work in the student's second field of certification or work towards the Professional Teacher's Certificate will be an acceptable minor area.

This plan calls for 36 hours of course work and the creation of a Portfolio. Of the 36 hours of course work at least 24 hours must be in mathematics. Of the 6 sequences listed below, the student must complete at least three or the equivalent:

- analysis (MATH 5366/MATH 5367)
- algebra (MATH 5368/MATH 5369)

- topology (MATH 5371/MATH 5372)
- geometry (MATH 5375/MATH 5376)
- applied mathematics (MATH 5377/MATH 5378)
- computer literacy and programming (MATH 5364/MATH 5365)

Non-Thesis Report Option. This Master of Arts degree is offered primarily for those students who wish to teach mathematics at the secondary level or at a junior/community college. This program consists of 36 hours of graduate work that includes 33 hours of coursework (a minimum of 24 hours in mathematics) and 3 hours of credit for a departmental report (MATH 6310). Of the 33 hours of course work at least 24 hours must be in mathematics. Of the 6 sequences listed below, the student must complete at least three or the equivalent:

- analysis (MATH 5366/MATH 5367)
- algebra (MATH 5368/MATH 5369)
- topology (MATH 5371/MATH 5372)
- geometry (MATH 5375/MATH 5376)
- applied mathematics (MATH 5377/MATH 5378)
- computer literacy and programming (MATH 5364/MATH 5365)

A minor in an approved area outside mathematics is permitted. Normally, work in the student's second field of certification or work towards the Professional Teacher's Certificate will be an acceptable minor area. A final comprehensive examination for the report is required.

Thesis Option. This Master of Arts degree is offered primarily for those students who wish to teach mathematics at the secondary level or at a junior/community college. This is an online program consisting of 30 hours of graduate work that includes 24 hours of coursework (a minimum of 18 hours in mathematics) and 6 hours of credit for the master's thesis.

This plan calls for 24 hours of course work and at least 6 hours of the thesis course (MATH 6000). Of the 24 hours of course work, 18 must be in mathematics. Of the 6 sequences listed below, the student must complete at least two or the equivalent:

- analysis (MATH 5366/MATH 5367)
- algebra (MATH 5368/MATH 5369)
- topology (MATH 5371/MATH 5372)
- geometry (MATH 5375/MATH 5376)
- applied mathematics (MATH 5377/MATH 5378)
- computer literacy and programming (MATH 5364/MATH 5365)

A minor in an approved area outside of mathematics is permitted. Normally, work in the student's second field of certification or work towards the Professional Teacher's Certificate will be an acceptable minor area. A thesis defense is required.

Mathematics, M.S.

Non-Thesis Exam Option. This program consists of 36 hours of graduate work and passing two departmental Prelim Exams. A minor in an approved area outside of mathematics is permitted.

This program calls for 36 hours of course work and passing two departmental Prelim Exams. Of the 36 hours of course work, 24 must be in mathematics and must include two sequences from the following list:

- complex analysis (MATH 5320-MATH 5321)
- real analysis (MATH 5322-MATH 5323)
- topology (MATH 5324-MATH 5325)
- algebra (MATH 5326-MATH 5327)
- ordinary differential equations (MATH 5330-MATH 5331)
- partial differential equations (MATH 5332-MATH 5333)
- numerical analysis (MATH 5334-MATH 5335)
- probability and statistics (STAT 5328-STAT 5329)
- applied statistics (STAT 5373-STAT 5374)

See the Doctoral Program section for information on the Preliminary Examinations.

Non-Thesis Report Option. This Master of Science program consists of 36 hours of graduate work that includes 33 hours of coursework (a minimum of 24 hours in mathematics/statistics) and 3 hours of credit for a departmental report. This program calls for 33 hours of course work and 3 hours of work on a departmental report (MATH 6310). Of the 33 hours of course work, 24 must be in mathematics and must include two sequences from the following list:

- complex analysis (MATH 5320-MATH 5321)
- real analysis (MATH 5322-MATH 5323)

- topology (MATH 5324-MATH 5325)
- algebra (MATH 5326-MATH 5327)
- ordinary differential equations (MATH 5330-MATH 5331)
- partial differential equations (MATH 5332-MATH 5333)
- numerical analysis (MATH 5334-MATH 5335)
- probability and statistics (STAT 5328-STAT 5329)
- applied statistics (STAT 5373-STAT 5374)

A final comprehensive examination for the report is required.

Thesis Option. This M.S. program consists of 30 hours of graduate work that includes 24 hours of coursework (a minimum of 18 hours in mathematics/statistics) and 6 hours of credit for the master's thesis.

This plan calls for 24 hours of course work and at least 6 hours of the thesis course (MATH 6000). Of the 24 hours of course work, 18 must be in mathematics and must include one sequence from the following list:

- complex analysis (MATH 5320-MATH 5321)
- real analysis (MATH 5322-MATH 5323)
- topology (MATH 5324-MATH 5325)
- algebra (MATH 5326-MATH 5327)
- ordinary differential equations (MATH 5330-MATH 5331)
- partial differential equations (MATH 5332-MATH 5333)
- numerical analysis (MATH 5334-MATH 5335)
- probability and statistics (STAT 5328-STAT 5329)
- applied statistics (STAT 5373-STAT 5374)

A minor in an approved area outside of mathematics is permitted. A thesis defense is required.

Statistics, M.S.

Non-Thesis Exam Option. This program consists of 36 hours of graduate work and passing two departmental Prelim Exams in statistics.

Details of the coursework for this M.S. degree are as follows:

1. Required courses: STAT 5328, 5329, 5371, 5373, 5374. Additionally, two from STAT 5326, 5372, 5375, 5378, 5379, or 5386.
2. Six hours of mathematics to be selected with the approval of the director of graduate studies and the statistics coordinator.
3. One of the following two options (to be selected with the approval of the director of graduate studies).
 - Three hours in an area other than statistics, e.g., mathematics, animal science, computer science, biology, economics, engineering, psychology, or sociology. This option requires approval of the graduate advisor from the selected area.
 - Three additional hours in statistics (to be selected from the Department of Mathematics and Statistics offerings).
4. Six additional hours to be selected from requirements 1. or 3. above.
5. All statistics courses for the M.S. in Statistics must be taken from the statistics offerings in the Department of Mathematics and Statistics.

See the Doctoral Program section for information on the statistics Preliminary Examinations.

Non-Thesis Report Option. This program consists of 36 hours of graduate work that includes 33 hours of coursework (27 hours in statistics and 6 hours in mathematics) and 3 hours of credit for a departmental report. A final comprehensive examination is required.

Details of the coursework for this M.S. degree are as follows:

1. Required courses: STAT 5328, 5329, 5371, 5373, 5374. Additionally, two from STAT 5326, 5372, 5375, 5378, 5379, or 5386.
2. Six hours of mathematics to be selected with the approval of the director of graduate studies and the statistics coordinator.
3. One of the following two options (to be selected with the approval of the director of graduate studies).
 - Three hours in an area other than statistics, e.g., mathematics, animal science, computer science, biology, economics, engineering, psychology, or sociology. This option requires approval of the graduate advisor from the selected area.
 - Three additional hours in statistics (to be selected from the Department of Mathematics and Statistics offerings).
4. Three additional hours to be selected from requirements 1. or 3. above.
5. All statistics courses for the M.S. in Statistics must be taken from the statistics offerings in the Department of Mathematics and Statistics.

Thesis Option. This Master of Science program consists of 36 hours of graduate work that includes 6 hours of credit for the master's thesis. A thesis defense is required. Details of the coursework for this M.S. degree are as follows:

1. Required courses: STAT 5328, 5329, 5371, 5373, 5374. Additionally, two from STAT 5326, 5372, 5375, 5378, 5379, or 5386 must be included.
2. Six hours of mathematics to be selected with the approval of the director of graduate studies and the statistics coordinator.
3. One of the following two options (to be selected with the approval of the director of graduate studies).
 - Three hours in an area other than statistics, e.g., mathematics, animal science, computer science, biology, economics, engineering, psychology, or sociology. This option requires approval of the graduate advisor from the selected area.
 - Three additional hours in statistics (to be selected from the Department of Mathematics and Statistics offerings).
4. Six hours of Master's Thesis. Students who have the potential to be accepted in the Ph.D. program and who have the agreement of an advisor may choose the thesis option. A thesis defense is required. See the Doctoral Program section for information on the statistics Preliminary Examinations.
5. All statistics courses for the M.S. in Statistics must be taken from the statistics offerings in the Department of Mathematics and Statistics.

See the Doctoral Program section for information on the statistics Preliminary Examinations.

Mathematics, M.S. or Statistics, M.S.: Mathematical Finance Concentration

The department of Mathematics and Statistics offers a concentration in Mathematical Finance for the Mathematics, M.S. and Statistics, M.S. programs. To satisfy the Mathematical Finance concentration, students must take at least 6 courses (18 hours) out of the following: MATH 6351, 6353; STAT 6351; FIN 5328; MATH 5382, 6354, 6355, 6356, 6357, 5399, or their MATH 5099 equivalent (hours are added manually).

Mathematics, Ph.D.

Foreign Language. No requirement.

Seminars. Advanced topics seminars which contribute to the student's overall mathematical background will be offered each semester. It is expected that each student will participate in seminar work in his/her area of specialty.

Preliminary Examination. Only those students who have passed the preliminary examination requirement are eligible to take MATH 8000. Students should check with the instructor of record in the year the preliminary exams are administered to find out the exact list of topics for the preliminary exams. For more information about the preliminary examination requirements for the doctoral program, students must contact the graduate director or advisor.

Dissertation. A dissertation is required of every candidate for the doctoral degree. This requirement is separate and apart from other requirements in the doctoral program. Consequently, successful performance in other areas does not necessarily guarantee the acceptance of a dissertation. The dissertation should embody a significant contribution to new information to the subject.

Qualifying Examination (Oral Comprehensive). After passing the required preliminary examinations, the next required step towards candidacy is passing the qualifying exam. It consists of a public presentation by the candidate, after which the audience is asked to leave, and the examination continues between candidate and committee. The decision (pass/fail) is recorded in writing and signed by the committee.

Dissertation Defense. A final oral examination over the student's dissertation topics is required of every candidate for the doctorate. It consists of a public presentation by the candidate, after which the audience is asked to leave, and the examination continues between candidate and committee. The decision (pass/fail) is recorded in writing and signed by the committee. Students who pass a preliminary exam without having taken the corresponding course sequence in the department are exempt from that specific

sequence requirement. Students must complete the remaining number of foundational sequences and courses for their concentration. The rules 2b and 3a for transfer credit would apply.

Tracks

The doctoral program offers concentrations in five areas of study: applied mathematics, pure mathematics, statistics, mathematical finance, and mathematics education. The program consists of 60 hours of graduate coursework and 12 hours of doctoral dissertation. The program requirements listed below are in addition to the university and Graduate School requirements. Specific questions concerning interpretation of these policies should be directed to the graduate advisor. A student in the doctoral program must fill out a degree plan after the end of the second long semester and before the start of the third long semester in the program.

Applied Mathematics.

- Foundational coursework (24 hours):
 - Three sequences from the following, with at least one sequence from Group A and at least one sequence from Group B.
 - Group A: MATH 5320-5321, 5322-5323, 5324-5325, 5332-5333, 5340-5341.
 - Group B: MATH 5330-5331, 5334-5335; STAT 5328-5329, 5373-5374.
 - At least two other courses (not necessarily in a sequence) chosen from Group A and Group B. Course choices will be performed after consulting with the graduate advisor or departmental leadership, subject to course availability, graduation deadlines, and the subfield that the graduate student performs research in. These courses prepare students for preliminary examinations and build the foundation necessary for doctoral degrees.
- Additional coursework: Thirty-six additional hours selected with the approval of the student's dissertation advisor and the director of graduate studies. These may include courses offered by the Department of Mathematics and Statistics relevant to the student's area of research or courses offered outside the department relevant to the student's area of research.
- Twelve hours of MATH 8000

Pure Mathematics.

- Four sequences from the following list: MATH 5320-5321, 5322-5323, 5324-5325, 5326-5327, 5330-5331, 5332-5333. Course choices will be performed after consulting with the graduate advisor or departmental leadership, subject to course availability, graduation deadlines, and the subfield that the graduate student performs research in. These courses prepare students for preliminary examinations and build the foundation necessary for doctoral degrees.
- Thirty-six additional hours selected with the approval of the student's dissertation advisor and the director of graduate studies. These may be courses offered by the Department of Mathematics and Statistics relevant to the student's area of research or courses offered outside the Department of Mathematics and Statistics relevant to the student's area of research.
- Twelve hours of MATH 8000.

Statistics.

- All of the following courses: STAT 5328, 5329, 5371, 5373, 5374, 5380; MATH 5382.
- Four courses from: STAT 5326, 5370, 5372, 5375, 5378, 5379, 5386.
- Twenty-seven additional hours of statistics courses selected with the approval of the student's dissertation advisor, the director of graduate studies, and the statistics coordinator. These may be statistics courses offered by the Department of Mathematics and Statistics (excluding STAT 5302-5303 and 5384-5385), mathematics courses relevant to the student's area of research, or courses offered outside the Department of Mathematics and Statistics relevant to the student's area of research. These courses must be chosen with approval by the student's dissertation advisor and the director of graduate studies. Note that a Preliminary Examination in pure mathematics must be passed.
- At least twelve hours of MATH 8000.

Mathematical Finance.

- All of the following eight courses: MATH 5322, 5323, 6351, 6353; STAT 5328, 5329, 6351; FIN 5328.

- At least four of the following courses: MATH 5382, 6354, 6355, 6356, 6357, 5399 (*Special Topics in Mathematical Finance*); STAT 5371, 5380, 5386, 6352.
- Twenty-four additional hours selected with the approval of the student's dissertation advisor and the director of graduate studies. These may include courses offered by the Department of Mathematics and Statistics (excluding STAT 5302-5303 and 5384-5385) relevant to the student's area of research or courses offered outside the department relevant to the student's area of research.
- Twelve hours of MATH 8000.

Mathematics Education.

- Foundational coursework (24 hours):
 - STAT 5328-STAT 5329
 - At least two sequences from the following, including at least one sequence from Group A and one sequence from Group B:
 - Group A: MATH 5320-5321, 5322-5323, 5324-5325, 5326-5327, 5340-5341
 - Group B: MATH 5330 and 5332, 5334-5335; STAT 5373-5374
 - At least two other courses (not necessarily in a sequence) chosen from Group A and Group B.
- Additional coursework (36 hours) selected with the approval of the student's dissertation advisor and the director of graduate studies. These may be courses offered by the Department of Mathematics and Statistics relevant to the student's area of research or courses offered outside the Department of Mathematics and Statistics relevant to the student's area of research. (It is assumed that these courses will include a significant number of graduate Education courses chosen in consultation with the student's dissertation advisor.)
- Twelve hours of MATH 8000.

Applied Mathematics Graduate Minor

The minor in Applied Mathematics is an option available to all graduate students who are enrolled in a master's or doctoral level program in STEM disciplines, including, but not limited to, science and engineering. The main goal is to familiarize the student with contemporary fields of applied mathematics, such as applied algebra and analysis, control theory, machine learning, scientific computing, statistical analysis, data science, and related areas. To satisfy the minor requirements, students must complete 12 credit hours of approved graduate-level mathematics courses. All courses must be at the 5000 level or higher. All courses must be passed with a grade of B or higher.

At least 9 credit hours of coursework must be from organized mathematics or statistics courses at the 5000 level. No more than 3 credit hours can be completed through individual study or seminars. Each minor degree plan is customized to best match the focus of the primary graduate degree plan. This is achieved in collaboration with the Graduate Program Director and/or Graduate Advisor.

Graduate Course Descriptions

Mathematics (MATH)

- 5099—Individual Study (VI-6).** Prerequisite: Consent of instructor. A structural independent study course in mathematics or statistics under the guidance of a faculty member. May be repeated for credit.
- 5101—Seminar in Mathematics (1).** Discussion of current research and topics of interest in mathematics. Must be taken pass/fail. May be repeated for credit.
- 5104—Seminar in Statistics (1).** Discussion of current research and topics of interest in statistics. Must be taken pass/fail. May be repeated for credit.
- 5310—Principles of Classical Applied Analysis I (3).** Fourier series and integrals, discrete Fourier series, Laplace transforms, calculus of variations, Sturm-Liouville problems, integral equations, equations of fluids and solids, and ordinary and partial differential equations.
- 5311—Principles of Classical Applied Analysis II (3).** Fourier series and integrals, discrete Fourier series, Laplace transforms, calculus of variations, Sturm-Liouville problems, integral equations, equations of fluids and solids, and ordinary and partial differential equations.
- 5312—Control Theory I (3).** Prerequisite: MATH 2360, MATH 3354, MATH 4351, or consent of instructor. Linear dynamical systems, stability, frequency response and Laplace transform, feedback, state-space description, and geometric theory of linear systems. [ME 5312]

- 5313—Control Theory II (3).** Prerequisite: MATH 5312, MATH 5316, MATH 5318, or consent of instructor. Quadratic regulator for linear systems, Kalman filtering, non-linear systems, stability, local controllability, and geometric theory of non-linear systems. [ME 5313]
- 5315—Introduction to Set Theory (3).** Zermelo-Fraenkel axioms set theory, axiom of choice and its equivalents, cardinal and ordinal numbers, cardinal and ordinal arithmetic.
- 5316—Applied Linear Algebra (3).** Prerequisite: Consent of instructor. Solution of linear systems, matrix inversion, vector spaces, projections, determinants, eigenvalues and eigenvectors, Jordan form, computational methods, and applications.
- 5317—Introduction to Modern Algebra (3).** Prerequisites: MATH 2360 and MATH 3310, or similar courses on linear algebra and introduction to proof. Graduate-level introduction to the theory of groups and ring.
- 5318—Intermediate Analysis I (3).** The real number system, introduction to metric spaces, sequences, continuity, differentiation, Riemann integration, power series, functions of several variables, and differential forms.
- 5319—Intermediate Analysis II (3).** The real number system, introduction to metric spaces, sequences, continuity, differentiation, Riemann integration, power series, functions of several variables, and differential forms.
- 5320—Functions of a Complex Variable I (3).** Prerequisite: MATH 4350 or MATH 4356. Analytic functions as mappings, Cauchy theorems, Laurent series, maximum modulus theorems and ramifications, normal families, Riemann mapping theorem, Weierstrass factorization theorem, Mittag-Leffler theory, analytic continuation, and harmonic functions.
- 5321—Functions of a Complex Variable II (3).** Prerequisite: MATH 4350 or MATH 4356. Analytic functions as mappings, Cauchy theorems, Laurent series, maximum modulus theorems and ramifications, normal families, Riemann mapping theorem, Weierstrass factorization theorem, Mittag-Leffler theory, analytic continuation, and harmonic functions.
- 5322—Functions of a Real Variable I (3).** Prerequisite: MATH 5319 or equivalent. General measure and integration theory, Lp theory, differentiation theory, and basic functional analysis.
- 5323—Functions of a Real Variable II (3).** Prerequisite: MATH 5319 or equivalent. General measure and integration theory, Lp theory, differentiation theory, and basic functional analysis.
- 5324—Topology I (3).** Prerequisite: MATH 4350 or consent of instructor. Point set theory, introduction to combinatorial topology and homology theory.
- 5325—Topology II (3).** Prerequisite: MATH 4350 or consent of instructor. Point set theory, introduction to combinatorial topology and homology theory.
- 5326—Modern Algebra I (3).** Prerequisite: MATH 3360 or consent of instructor. Groups, rings, fields, linear algebra, Galois theory.
- 5327—Modern Algebra II (3).** Prerequisite: MATH 3360 or consent of instructor. Groups, rings, fields, linear algebra, Galois theory.
- 5330—Theory of Ordinary Differential Equations I (3).** Prerequisite: MATH 4351, MATH 4354, or consent of instructor. Existence and uniqueness results, continuation of solutions, continuous dependence on data, linear equations, oscillation and comparison theorems, boundary value problems, and stability analysis.
- 5331—Theory of Ordinary Differential Equations II (3).** Prerequisite: MATH 5330 or consent of instructor. Advanced existence, uniqueness, continuation, and continuity results; symmetry and variance; center manifold theorem.
- 5332—Partial Differential Equations I (3).** Prerequisite: MATH 4351, MATH 4354, or consent of instructor. Topics include first order equations, method of characteristics, parabolic, hyperbolic and elliptic equations, variational and Hilbert space methods.
- 5333—Partial Differential Equations II (3).** Prerequisite: MATH 4351, MATH 4354, or consent of instructor. Topics include first order equations, method of characteristics, parabolic, hyperbolic and elliptic equations, variational and Hilbert space methods.
- 5334—Numerical Analysis I (3).** Prerequisite: MATH 5316 or equivalent. Computer arithmetic and error analysis, interpolation techniques, numerical differentiation and numerical quadrature, direct and iterative methods for solution of systems of linear equations.
- 5335—Numerical Analysis II (3).** Prerequisite: MATH 5316 or equivalent. Numerical solution of ordinary differential equations, solution of nonlinear systems of equations, calculation of eigenvalues and eigenvectors, special topics.
- 5340—Functional Analysis I (3).** Prerequisite: MATH 5322. Hilbert and Banach space theory, linear operator theory, the closed graph theorem, the open mapping theorem, the principle of uniform boundedness, linear functionals, dual spaces and weak topologies, distribution theory, topological vector spaces, spectral theory of compact and unbounded self-adjoint and unitary operators, and semigroup theory.
- 5341—Functional Analysis II (3).** Prerequisite: MATH 5322. Hilbert and Banach space theory, linear operator theory, the closed graph theorem, the open mapping theorem, the principle of uniform boundedness, linear functionals, dual spaces and weak topologies, distribution theory, topological vector spaces, spectral theory of compact and unbounded self-adjoint and unitary operators, and semigroup theory.
- 5342—Advanced Topics in Analysis I (3).** Prerequisite: Consent of instructor. Current topics in analysis. May be repeated for credit.
- 5344—Topics in Numerical Analysis I (3).** Prerequisite: MATH 5335. Current advanced topics in numerical analysis, research work using computers. May be repeated for credit.
- 5345—Topics in Numerical Analysis II (3).** Prerequisite: MATH 5355. Current advanced topics in numerical analysis, computational research. May be repeated for credit.
- 5346—Advanced Topics in Applied Mathematics I (3).** Prerequisite: Consent of instructor. Current topics in applied mathematics. May be repeated for credit.
- 5354—Biomathematics I (3).** Prerequisite: Differential equations and linear algebra or consent of instructor. Qualitative and quantitative behavior of deterministic biological models are studied.
- 5355—Biomathematics II (3).** Prerequisite: Statistics, differential equations, and linear algebra or consent of instructor. Qualitative and quantitative behavior of stochastic biological models are studied.
- 5360—Professional Development (3).** Prerequisite: Consent of instructor. Introduces new graduate part-time instructors to the theory and practice of teaching and learning in mathematics. May be repeated for credit.
- 5362—Theory of Numbers (3).** Prerequisite: MATH 4362. Diophantine equations, binary quadratic forms, algebraic numbers, theory of number-theoretic functions, partitions, the prime number theorem.
- 5364—Computer Literacy and Programming I (3).** Development of computer literacy and programming ability, algorithms and data structures, and recursion.
- 5365—Computer Literacy and Programming II (3).** Development of computer literacy and programming ability, algorithms and data structures, and recursion.
- 5366—Introduction to Analysis I (3).** Introduction to logic, proofs, sets, functions, real numbers, and sequences. Not for M.S./Ph.D. in Math/Stat. Online.
- 5367—Introduction to Analysis II (3).** Prerequisite: B or better in MATH 5366 (concurrent enrollment allowed). A formal introduction to differentiation and Riemann Integration. Not for M.S./Ph.D. in Math/Stat. Online.
- 5368—Abstract Algebra Applied I (3).** An example-intensive introduction to fields and vector spaces. Not for M.S./Ph.D. in Math/Stat. Online.
- 5369—Abstract Algebra Applied II (3).** Prerequisite: B or better in MATH 5368 (concurrent enrollment allowed). An example-intensive introduction to Galois Theory and unsolvability of the general quintic. Not for M.S./Ph.D. in Math/Stat. Online.
- 5370—History of Mathematics (3).** A history of mathematics with an emphasis on the development of commercial arithmetic, geometry, algebra, and calculus. Not for M.S./Ph.D. in Math/Stat. Online.
- 5371—Topology of the Real Line I (3).** An introduction to topology via linearly ordered sets. Emphasis is on creating and criticizing proofs and counter examples. Not for M.S./Ph.D. in Math/Stat. Online.
- 5372—Topology of the Real Line II (3).** Prerequisite: B or better in MATH 5371 (concurrent enrollment allowed). Covers concepts of connectedness, separability, and characterization of the real line. Not for M.S./Ph.D. in Math/Stat. Online.
- 5375—Modern Geometry I (3).** A modern introduction to Euclidean geometry using metric and synthetic approaches. Uses dynamic geometry software. Not for M.S./Ph.D. in Math/Stat. Online.
- 5376—Modern Geometry II (3).** Prerequisite: B or better in MATH 5375 (concurrent enrollment allowed). Advanced topics in Euclidean geometry and an introduction to hyperbolic geometry. Uses dynamic geometry software. Not for M.S./Ph.D. in Math/Stat. Online.
- 5377—Applied Mathematics I (3).** An introduction to mathematical applications. Explores handling of data, voting, golden ratio, modular arithmetic, and encryption. Not for M.S./Ph.D. in Math/Stat. Online.
- 5378—Applied Mathematics II (3).** Explores mathematical ideas and applications, including infinity, surfaces, modeling of populations, and fractals and chaos. Not for M.S./Ph.D. in Math/Stat. Online.
- 5379—Probability: Theory and Application (3).** An introduction to probability including discrete and continuous random variables and probability distributions. Not for M.S./Ph.D. in Math/Stat. Online.
- 5380—Statistics: Theory and Application (3).** Prerequisite: B or better in MATH 5379 (concurrent enrollment allowed). An introduction to statistics including estimation, hypothesis testing, ANOVA, and regression. Not for M.S./Ph.D. in Math/Stat. Online.

- 5382—Advanced Probability I (3).** Prerequisite: MATH 5319 or consent of instructor. Measure and integration, axiomatic foundations of probability theory, random variables, distributions and their characteristic functions, stable and infinitely divisible laws, limit theorems for sums of independent random variables, conditioning, Martingales.
- 5383—Advanced Probability II (3).** Prerequisite: MATH 5319 or consent of instructor. Measure and integration, axiomatic foundations of probability theory, random variables, distributions and their characteristic functions, stable and infinitely divisible laws, limit theorems for sums of independent random variables, conditioning, Martingales.
- 5399—Advanced Problems (3).** Prerequisite: Graduate standing in mathematics. May be repeated for credit.
- 6000—Master's Thesis (V1-6).**
- 6310—Master's Report (3).**
- 6320—Representation Theory (3).** Prerequisites: MATH 5326 and MATH 5327. An introduction to basic methods and results of representation theory focusing on linear representations of finite groups.
- 6321—Homological Algebra I: Introduction (3).** Prerequisite: MATH 5326. Categories, functions, simplicial and singular homology, category of modules over a ring, resolutions, and derived categories.
- 6322—Homological Algebra II: Applications (3).** Prerequisite: MATH 6321. Homological dimensions, Koszul homology, local cohomology, duality theories, global dimension and regular rings, Cohen-Macaulay rings.
- 6323—Algebraic Geometry I (3).** Prerequisite: MATH 5326 or consent of instructor. Covers the basic theory of affine and projective varieties.
- 6324—Algebraic Geometry II (3).** Prerequisite: MATH 6323 or equivalent. Covers the theory of schemes and the scheme-theoretic concept of a variety.
- 6325—Category Theory (3).** Prerequisites: MATH 5326 and MATH 5327 or consent of instructor. Covers the basic theory of categories and functors.
- 6330—Manifold Theory (3).** Prerequisites: MATH 5316 and MATH 5318 or permission of instructor. Differentiable manifolds theory: smooth structures, tangent spaces, implicit mapping theorem, embeddings, immersions and submersions, vector fields, tensor analysis, Stokes' theorem.
- 6331—Riemannian Geometry (3).** Prerequisite: MATH 5330 or consent of instructor. Affine connections, Riemannian connections, geodesics and geodesic flow, curvatures (Ricci, sectional), spaces of constant curvature. Applications to computer modeling and visualization.
- 6332—Geometric Mechanics (3).** Prerequisite: MATH 5330 or consent of instructor. Geometric concepts in classical mechanics; Euler-Lagrange equations, Legendre transform and Hamilton's equations; symplectic manifolds; group actions; momentum maps; Hamiltonian and Lagrangian reduction.
- 6333—Introduction to Lie Groups and Their Representation (3).** Prerequisite: MATH 5330 or consent of instructor. Lie groups, Lie algebras, exponential map, Lie brackets, representation theory with examples, Peter-Weyl theorem, homogenous and symmetric spaces, applications to ODEs/PDEs arising in physics.
- 6351—Quantitative Methods with Applications to Financial Data (3).** Introduction to capital markets, securities pricing, and modern portfolio theory. Numerical exercises and projects in a high-level programming environment will be assigned.
- 6353—Stochastic Calculus with Applications to Financial Derivatives (3).** Foundations of stochastic modeling for financial applications, starting with general probability theory leading up to basic results in pricing exotic and American derivatives.
- 6354—Numerical Partial Differential Equations in Finance (3).** Valuation of financial options via the numerical solution of partial differential equations and the Black-Scholes approach to option pricing.
- 6355—Numerical Methods with Applications to Financial Data (3).** Review of the basic numerical methods for partial differential equations, variational inequalities, and free-boundary problems.
- 6356—Software Engineering with Financial Applications (3).** Covers essential C++ topics with applications to finance. Course will focus on numerical analysis and quantitative finance applications.
- 6357—Stochastic Processes and Applications to Mathematical Finance (3).** Provides basic introduction into probability theory and stochastic processes, mixing them in financial applications. Discuss modelling financial markets with stochastic processes.
- 7000—Research (V1-12).**
- 8000—Doctor's Dissertation (V1-12).**

Statistics (STAT)

- 5302—Applied Statistics I (3).** Prerequisite: Consent of instructor. Graphical presentation of data, histograms, confidence intervals for binomial probabilities, one-sample and two-sample t-test, regression and correlation with two variables, hypothesis testing and confidence intervals, multivariate regression and correlation, partial correlation coefficients, analysis of variance and covariance, multiple comparison procedures. Emphasis on analysis of research data. Not for mathematics, statistics, engineering, or physical science majors; these students should take STAT 5384, STAT 5385.

- 5303—Applied Statistics II (3).** Prerequisite: Consent of instructor. Graphical presentation of data, histograms, confidence intervals for binomial probabilities, one-sample and two-sample t-test, regression and correlation with two variables, hypothesis testing and confidence intervals, multivariate regression and correlation, partial correlation coefficients, analysis of variance and covariance, multiple comparison procedures. Emphasis on analysis of research data. Not for mathematics, statistics, engineering, or physical science majors; these students should take STAT 5384, STAT 5385.
- 5326—Biostatistics (3).** Prerequisite: Consent of instructor for non-majors. One- and two-sample testing and estimation; sample size and power calculation; nonparametric tests for one, two, and multiple samples; correlation; design and analysis of epidemiologic studies.
- 5328—Intermediate Mathematical Statistics I (3).** Prerequisite: MATH 2450 or consent of instructor. Probability spaces, continuous and discrete distributions, functions of random variables, expectation, conditional expectation, central limit theorem, convergence concepts, order statistics, sampling distributions.
- 5329—Intermediate Mathematical Statistics II (3).** Prerequisite: MATH 2450 or consent of instructor. Sufficiency and completeness, information, estimation, maximum likelihood, confidence intervals, uniformly mostpowerful tests, likelihood ratio tests, normal based inference, Bayesian inference.
- 5370—Decision Theory (3).** Prerequisite: MATH 4343 or STAT 5329 or consent of instructor. Game theory, statistical decision, Bayesian statistics.
- 5371—Regression Analysis (3).** Prerequisite: STAT 5326 and STAT 5329. Estimation and testing in linear regression, residual analysis, influence diagnostics, multicollinearity logistic regression, nonlinear regression.
- 5372—Nonparametric Statistical Inference (3).** Prerequisite: MATH 4343 or STAT 5329 or consent of instructor. Statistical inference, rank order statistics, chi-square and slippage tests, Kolmogorov and Smirnov type tests, confidence intervals and bands, runs tests, applications.
- 5373—Design of Experiments (3).** Prerequisite: MATH 4343 or STAT 5329. Principles of design and analysis of experiments, Latin squares, split plots, incomplete block designs, efficiency.
- 5374—Theory of Linear Statistical Models (3).** Prerequisite: MATH 4343 or STAT 5329. Multivariate normal, covariance matrix and operations, distribution of quadratic forms, general linear hypothesis of full and non-full rank, specific linear models.
- 5375—Statistical Multivariate Analysis (3).** Prerequisite: STAT 5329 or consent of instructor. Multivariate normal distribution, estimation of the mean vector and covariance matrix, distribution of sample correlation coefficients, the generalized T2 statistic, classification, distribution of the sample covariance matrix.
- 5376—Advanced Statistical Methods (3).** Prerequisite: MATH 4343 or STAT 5329 or consent of instructor. Applied regression analysis, cluster analysis, factor analysis, modeling, special topics in designs, sensitivity analysis, non-linear estimation. May be repeated for credit.
- 5377—Statistical Sampling Theory (3).** Prerequisite: MATH 4343 or STAT 5329. Theory of simple random sampling, stratified random sampling, cluster sampling, ratio estimates, regression estimates, other sampling methods.
- 5378—Stochastic Processes (3).** Prerequisite: STAT 5329. Markov chains, Markov processes in discrete and continuous time, diffusion processes, Brownian motion and transformations of Brownian motion, non-Markovian processes.
- 5379—Time Series Analysis (3).** Prerequisite: STAT 5329 or consent of instructor. Stationary and nonstationary time series, finite linear models, identification, filtering, and diagnostic checks of such models, spectral analysis of time series data, forecasting and control.
- 5380—Advanced Mathematical Statistics I (3).** Prerequisite: STAT 5329; STAT 5380 is prerequisite for STAT 5381. Theory of estimation and tests of statistical hypotheses, sequential analysis.
- 5381—Advanced Mathematical Statistics II (3).** Prerequisite: STAT 5329; STAT 5380 is prerequisite for STAT 5381. Theory of estimation and tests of statistical hypotheses, sequential analysis.
- 5384—Statistics for Engineers and Scientists I (3).** Prerequisite: Instructor consent. Probability, descriptive statistics, distributions, estimation, hypothesis testing, nonparametric statistics, data analysis using the computers. Not for mathematics or statistics majors.
- 5385—Statistics for Engineers and Scientists II (3).** Prerequisite: STAT 5384 or consent of instructor. Continuation of STAT 5384; simple

and multiple regression analysis, analysis of variance, nonparametric statistics, categorical data analysis, quality control, reliability, data analysis using the computer. Not for mathematics or statistics majors.

- 5386—Statistical Computing and Simulation (3).** Prerequisite: Consent of instructor. Basics of computing, optimization methods, EM algorithm, simulation of random variables, Monte Carlo methods, Markov Chain Monte Carlo, additional topics (time permitting).
- 5387—Statistical Machine Learning (3).** Prerequisites: STAT 5328 and MATH 5316 or departmental approval. Covers the implementation and theory of statistical machine learning, including model selection, spline regression, principal component analysis, nearest neighbor classification, support vector machine, and k-means.
- 6000—Master's Thesis (V1-6).**
- 6310—Master's Report (3).**
- 6351—Applied Time Series (3).** Covers applied statistical methodologies pertaining to financial time series especially series. Student will learn how to examine the techniques involved with forecasting.
- 6352—Bayesian Methods and Application for Financial Data (3).** Provides a detailed overview of the theory of Bayesian methods and explains their real-world applications to financial modeling.
- 7000—Research (V1-12).**

Department of Philosophy

The master's degree program is aimed at providing a broad background in philosophy while encouraging complementary work in an approved minor field of study.

The department also offers a Graduate Certificate in Ethics. This requires four courses in ethics at the graduate level.

Philosophy, M.A.

The student may choose to complete 24 hours of graduate coursework plus 6 hours of thesis research. Alternatively, the student may complete 33 hours of graduate coursework and then take an oral exit examination over a significant research paper. Up to one third (but no more than 9 hours) of the student's coursework may consist of graduate courses in disciplines other than philosophy, subject to the approval of the departmental graduate advisor.

For specific information on admission to the program, prospective students should contact the Department of Philosophy and the Graduate School. Students from fields other than philosophy are encouraged to apply, although they may be required to complete a certain amount of philosophy leveling work during their first year of enrollment.

Graduate Course Descriptions

Philosophy (PHIL)

- 5125—Introduction to Research Ethics (1).** Introduces future researchers to research ethics. Presents frameworks for moral reasoning and application of those frameworks to moral problems through a discussion of case studies.
- 5300—Independent Study (3).** Prerequisite: Approval of the instructor and the Director of Graduate Studies. Independent study under the guidance of a faculty member. May be repeated for credit.
- 5301—Studies in Greek Philosophy (3).** Studies in the Pre-Socratics, Plato, Aristotle, and Hellenistic philosophy. May be repeated as topic varies.
- 5302—Studies in Modern Philosophy (1600-1800) (3).** Studies in major philosophical works of the modern period drawn from such philosophers as Descartes, Spinoza, Leibniz, Locke, Berkeley, Hume, and Kant. May be repeated as topic varies.
- 5308—Basic Issues in Contemporary Philosophy (3).** Major philosophical theories and controversies of the 20th century. Works will be drawn from such philosophers as Wittgenstein, Russell, Heidegger, Husserl, Quine, Davidson, and Kripke. May be repeated as topic varies.
- 5310—History of Aesthetics (3).** Major philosophical theories of art and beauty from classical Greece to the present. May be repeated as topic varies.
- 5311—Seminar in Epistemology (3).** A study of one or two questions about the justification of our knowledge of the external world, the mind, mathematics, or logic. May be repeated as topic varies.
- 5312—Seminar in Logic (3).** Graduate seminar in logic. Topics vary by semester. May be repeated for credit as topics vary.

- 5314—Contemporary Aesthetics (3).** Current problems in aesthetics: the nature of a work of art, of aesthetic experience and judgment; issues of interpretation and evaluation in the arts. May be repeated as topic varies.
- 5315—Topics in Aesthetics (3).** In-depth examination of a particular area of topic in aesthetics and the philosophy of art. May be repeated as topic varies.
- 5320—Seminar in Ethics (3).** Selected topics in ethical theory: relativism, moral reasons, the nature of moral value, deontological and teleological ethics. May be repeated as topic varies.
- 5321—Social and Political Philosophy (3).** Study of selected social or political philosophers or of selected topics such as justice, liberty, equality, liberalism, conservatism, and rights. May be repeated as topic varies.
- 5322—Law and Philosophy (3).** Study of works of legal philosophers on central issues in philosophy of law such as legal obligation, nature of law, interpretation, privacy, law and morality. May be repeated as topic varies.
- 5324—Philosophy of Religion (3).** Central issues in philosophy of religion including the nature of religion, the existence of God, the relation between faith and reason, and the problem of evil. May be repeated as topic varies.
- 5330—Philosophy of Science (3).** Methodological and conceptual issues in the physical and social sciences. Emphasis upon scientific investigation as a way of knowing. May be repeated as topic varies.
- 5331—Philosophical Psychology (3).** Central issues in philosophy of the mind, including the nature of the mental and the relation between mental and physical. Emphasis on thought and perception. May be repeated as topic varies.
- 5332—Seminar in Feminist Philosophy (3).** Examines philosophical issues in feminist thought. Topics may include oppression, sexual difference, the intersection between multiple identities, sex and sexuality, aesthetics, epistemology, and ethical theories.
- 5333—Seminar in Philosophy of Language (3).** Central issues in philosophy of language, including the nature of meaning, truth, reference, and context. May be repeated as topic varies.
- 5340—Seminar in Metaphysics (3).** An intensive study of one or two topics which include the nature of existence, cause, identity, kinds and their instances, change, and/or mind. May be repeated as topic varies.
- 5341—Great Figures in Philosophy (3).** In-depth study of the works of just one or two great philosophers. May be repeated as topic varies.
- 5350—Seminar in Teaching and Writing Philosophy (3).** An introduction to 'How to succeed in graduate school in philosophy'. This includes reading and writing professional philosophy as well as an introduction to teaching philosophy at the college level. Required of all teaching assistants.
- 5355—Seminar in Philosophical Writing (3).** Designed to teach graduate students in philosophy how to become better philosophical writers.
- 6000—Master's Thesis (V1-6).**
- 7000—Research (V1-12).**
- 8000—Doctor's Dissertation (V1-12).**

Department of Physics and Astronomy

A core curriculum consisting of PHYS 5301, 5303, 5305, and 5306 forms the nucleus of the master's and Ph.D. programs and is the basis for the master's examination and the Ph.D. preliminary examination. A student selecting any of the degree options may designate a minor consisting of a minimum of 6 hours of course credit in a related area and satisfy any additional requirements of the minor department. These 6 hours may be taken in the Department of Physics and Astronomy. Full-time study towards the master's degree should be completed in about two years. Master's students must maintain a B average in the core courses in addition to the overall B average required by the Graduate School.

All graduate students must enroll in PHYS 5101 for three semesters, as early as possible in the program. PHYS 5307 and 5322 are tools courses that develop necessary skills for use in other courses and in research. They should be taken early.

Physics, M.S.

Course-Based Option. This program requires 36 credit hours, of which at least 30 must be formal coursework taken in the department, plus passing an oral master's examination.

Exam-Based Option. This program requires 36 credit hours with a minimum of 24 hours in the department, plus passing a written and oral master's examination.

Thesis Option. This program requires a minimum of 24 credit hours, of which at least 18 must be taken in the department, plus 6 hours of thesis research. The thesis is defended in a final oral examination.

Physics, Ph.D.

The core courses for the Ph.D. in Physics degree are the same as those for the M.S. degree, plus PHYS 5302 and PHYS 6306. Further selections of advanced courses should be made in consultation with the graduate and research advisor.

Students seeking the Ph.D. degree must pass a preliminary examination and a qualifying examination as described in the departmental Graduate Booklet and in accordance with Graduate School requirements. Examination topics are drawn from general undergraduate physics and graduate core courses. The program requires a Ph.D. dissertation based on original research.

Students are encouraged to get involved in research early by taking PHYS 7000, which may count toward the degree. The 12 hours of PHYS 8000, required for the Ph.D., should be taken as early as possible after passing the qualifying examination. Doctoral students must maintain a B average in the six core courses in addition to the overall B average required by the Graduate School.

Graduate Course Descriptions

Physics (PHYS)

- 5000—Independent Study (V1-3).** Prerequisite: Permission of the instructor and the graduate advisor. Offers independent study under the direct supervision of a faculty member. Not to be used for thesis or dissertation research or writing.
- 5001—Master's Internship (V1-12).** Prerequisite: Permission of the internship coordinator. Internship in an industrial or research laboratory setting. Arranged through the department and directly related to degree program.
- 5101—Seminar (1).** Must be taken by every graduate student for at least the first four semesters. Taken pass/fail.
- 5104—Instructional Laboratory Techniques in Physics (1).** Laboratory organization and instructional techniques. Must be taken by all teaching assistants when on appointment.
- 5274—Physics Pedagogy (2).** A course in teaching methods and pedagogy for physics laboratories and recitations.
- 5300—Special Topics (3).** Prerequisite: Approval of graduate advisor and/or department chair. Topics in semiconductor, plasma, surface, particle physics, spectroscopy, and others. May be repeated in different areas.
- 5301—Quantum Mechanics I (3).** Experimental basis and history, wave equation, Schrodinger equation, harmonic oscillator, piecewise constant potentials, WKB approximation, central forces and angular momentum, hydrogen atom, spin, two-level systems, and scattering. M.S. and Ph.D. core course.
- 5302—Quantum Mechanics II (3).** Prerequisite: PHYS 5301 or equivalent. Quantum dynamics, rotations, bound-state and time-dependent perturbation theory, identical particles, atomic and molecular structure, electromagnetic interactions, and formal scattering theory. Ph.D. core course.
- 5303—Electromagnetic Theory (3).** Electrostatics and magnetostatics, time varying fields, Maxwell's equations and conservation laws, electromagnetic waves in materials and in waveguides. M.S. and Ph.D. core course.
- 5304—Solid State Physics (3).** Prerequisite: PHYS 5301 or equivalent. A survey of the microscopic properties of crystalline solids. Major topics include lattice structures, vibrational properties, electronic band structure, and electronic transport.
- 5305—Statistical Physics (3).** Elements of probability theory and statistics; foundations of kinetic theory. Gibb's statistical mechanics, the method of Darwin and Fowler, derivation of the laws of macroscopic thermodynamics from statistical considerations; other selected applications in both classical and quantum physics. M.S. and Ph.D. core course.
- 5306—Classical Dynamics (3).** Lagrangian dynamics and variational principles. Kinematics and dynamics of two-body scattering. Rigid body dynamics. Hamiltonian dynamics, canonical transformations, and Hamilton-Jacobi theory of discrete and continuous systems. M.S. and Ph.D. core course.

- 5307—Methods in Physics I (3).** Provides first-year graduate students the necessary skill in mathematical methods for graduate courses in physical sciences; applications such as coordinate systems, vector and tensor analysis, matrices, group theory, functions of a complex variable, variational methods, Fourier series, integral transforms, Sturm-Liouville theory, eigenvalues and functions, Green functions, special functions and boundary value problems. Tools course.
- 5308—Molecular Biophysics (3).** Study of the physics of the structures and dynamics of biological molecules and assemblies at the molecular level. Required for students in biophysics research.
- 5309—Methods in Biophysics (3).** Study of experimental and computational methods in biophysics. Requires an individual research project. Mandatory for students in biophysics research.
- 5311—Nuclear Physics (3).** Prerequisite: PHYS 5301. Deals with nuclear physics covering such topics as nuclear structure models, interactions, reactions, scattering, and resonance. Nuclear energy is discussed as an application. Deals with nuclear physics covering such topics as nuclear structure models, interactions, reactions, scattering, and resonance. Nuclear energy is discussed as an application.
- 5312—Elementary Particle Physics (3).** Prerequisites: PHYS 5302, PHYS 5303. The role of symmetries, gauge theories, and the Standard Model. First-order Feynman diagram calculations aided by computing tools and comparison with the experimental data. Experimental techniques and detectors in particle physics.
- 5322—Computational Physics (3).** Numerical modeling of physical systems. Data acquisition and analysis. Graphics for displaying complex results. Quadrature schemes and solution of equations. Use of minicomputers and microcomputers. Tools course.
- 5330—Semiconductor Materials and Processing (3).** Survey of semiconductor materials deposition, characterization, and processing techniques with emphasis on the fundamental physical interactions underlying device processing steps.
- 5335—Physics of Semiconductors (3).** Theoretical description of the physical and electrical properties of semiconductors; Band structures, vibrational properties and phonons, defects, transport and carrier statistics, optical properties, and quantum confinement.
- 5336—Device Physics (3).** Principles of semiconductor devices; description of modeling of p/n junctions, transistors, and other basic units in integrated circuits; relationship between physical structures and electrical parameters.
- 5337—Physical Sciences at the Nanometer Scale and Quantum Sensor Design (3).** Physics and organizing principles at the nanometer scale, with applications to nanomaterials and nanodevice fabrication, and quantum-sensing applications.
- 5371—Conceptual Physics for Teachers (3).** Inquiry-based course in elementary physical principles of mechanics, heat, electricity, and magnetism.
- 5373—Mathematical Modeling of the Physical World (3).** Studies how and why mathematics is used to model physical situations and uses physical examples extensively.
- 5374—Research Experience in Physics (3).** Motivates physics/education research activities. Discusses scientific method, research plans, literature searches, data collection and analysis. Designed for math/science teachers; not allowed for physics majors.
- 6000—Master's Thesis (V1-6).**
- 6002—Master's Report (V1-6).**
- 6304—Condensed Matter Physics (3).** Prerequisite: PHYS 5304. Problems of current interest in condensed matter physics. Topics include transport properties in solids, superconductivity, magnetism, semiconductors, and related topics.
- 6305—Statistical Mechanics II: Critical Phenomena (3).** Equilibrium treatments of strongly interacting systems, phase transitions, and critical phenomena; mean field and Landau theories, scaling and critical exponents, renormalization approach, disorder and percolation.
- 6306—Advanced Electromagnetic Theory (3).** Prerequisite: PHYS 5303. Classical theory of electromagnetic fields, radiation, scattering and diffraction, special theory of relativity and electrodynamics, special topics. Ph.D. core course.
- 6309—Advanced Quantum Mechanics (3).** Prerequisite: PHYS 5302. Scattering, second quantization, charge particle interactions, path integral, Klein-Gordon and Dirac equations, many electron systems.
- 6312—Quantum Field Theory I (3).** Prerequisites: PHYS 5301, PHYS 5302. A first course in quantum field theory. Path integral approach to quantization of fields, Feynman diagrams and calculation of quantum electrodynamics (QED) processes.
- 7000—Research (V1-12).**
- 8000—Doctor's Dissertation (V1-12).**

Department of Political Science

For the M.A. and Ph.D. degrees, the department emphasizes and encourages specialization in the following areas of political science: American institutions and behavior, international relations, comparative politics, and public administration. In addition, the department offers graduate courses in methodology, public policy, and strategic studies.

To be admitted to the M.A. or Ph.D. program, the student must submit a department application form along with three letters of reference, a curriculum vitae, and a statement of purpose. In addition, the student must complete the Graduate School admission process, including the Graduate School application form, submission of GRE (Graduate Record Examination) scores, and submission of official transcripts showing prior graduate and undergraduate work. International students also must submit evidence of English language proficiency. Students applying to any of these programs should have an overall GPA of at least 3.0 in undergraduate and graduate work. M.A. and Ph.D. students must develop their courses of study in consultation with the department's director of political science graduate programs.

Political Science, M.A.

Master's degree work may follow either the thesis track or the comprehensive exam track. Under the thesis plan, a student is required to complete 30 hours of coursework plus 6 hours of thesis for 36 hours total. M.A. students under the thesis plan need to complete 9 hours of courses in a single major field beyond the pro-seminar, for a total of 12 hours. Under the comprehensive exam plan, a student is required to complete 36 hours of graduate courses without a thesis and to pass written comprehensive exams for both a major and a minor field. M.A. students under this plan must complete 9 hours of courses beyond the pro-seminar in their major field (for a total of 12 hours) and 6 hours beyond the pro-seminar in their minor field (for a total of 9 hours). All M.A. students are required to complete three methods courses (POLS 5381, 5382, and 5383) as well as three field pro-seminars (POLS 5322, 5360, and 5370) with a minimum grade of B- or higher. Additional information and application materials can be found at www.depts.ttu.edu/politicalscience. Interested students may also address questions and information requests to polsglad@ttu.edu for the M.A. program.

Public Administration, M.P.A.

The Master of Public Administration program is designed to provide students with the highest quality education in preparation for careers or advancement of careers in public, nonprofit, and healthcare organizations. The program stresses the acquisition of academic theory and practical skills to foster an ethical and enduring commitment to public service values of serving the public interest with accountability and transparency; serving professionally with competence, efficiency, and objectivity; acting ethically to uphold the public trust; and demonstrating respect, equity, and fairness in dealings with the public and fellow workers.

The program provides students with a public service perspective to do the following:

- to lead and manage in public governance;
- to participate in and contribute to the policy process;
- to analyze, synthesize, think critically, solve problems, and make decisions;
- to articulate and apply a public service perspective;
- to communicate and interact productively with a diverse and changing workforce and citizenry.

Applicants to the M.P.A. program should complete the [Graduate School](#) application process and submit two letters of reference.

The M.P.A. degree is a non-thesis program that requires 33 hours of in-class coursework and a 3-hour internship. Of these hours, 21 are specified as core curriculum and must be completed by all students. The remaining hours are elective courses. The 3-hour internship can be substituted for in-service students with substantial public service work experience. To complete the required 36 hours, students who receive such approval will have a choice of submitting a report integrating their previous experience with the study of public administration or taking a 3-hour elective. There are no foreign language or thesis requirements. M.P.A. students must develop their courses of study in consultation with the department's M.P.A. director. Terminal M.P.A. graduate students must complete, submit, and orally present a degree portfolio at the end of their degree program.

Public Administration, M.P.A. / J.D.

The School of Law, with the Graduate School, offers a program that enables a student to earn the Doctor of Jurisprudence (J.D.) and Master of Public Administration (M.P.A.) degrees in three to four years of academic work. This degree program may be particularly beneficial to students with interests in administrative positions within government, public agencies, and institutions.

Both degrees will be awarded upon completion of 108 hours (78 hours of law courses and a total of 30 hours of public administration hours). This is made possible by allowing 12 hours of approved law courses to transfer as elective credit toward the M.P.A. degree and vice versa. These transfers are of credit hours, not grades. Therefore, graduate coursework will not be computed in a student's Law School GPA and class ranking.

Interested students must apply for the program no later than their third semester in Law School. The first year of study consists entirely of law courses. During the second and third years, the remaining required law courses are to be completed together with selected law electives and an appropriate number of graduate business core courses. Students may enroll in the Graduate School at Texas Tech University and complete all leveling course work and earn up to 12 credit hours toward the M.P.A. in the academic year before matriculation to the Law School. Students who have earned more than 12 credit hours (excluding leveling course work) before matriculation to the Law School are ineligible for the J.D. dual-degree program.

Students must meet the admission requirements for both the Law School and Graduate School. The Graduate School will accept the LSAT in lieu of the GRE (Graduate Record Examination) or GMAT (Graduate Management Admission Test) exam. The degree is designed so that students complete the first year of law school before taking a mix of PUAD and law school courses. Students may begin a dual degree with PUAD courses, however, if they do not take more than 12 hours before matriculating to the law school.

In no case will a student be permitted to enter the joint program if the student has not been accepted to the M.P.A. part of the program by the end of the student's fourth semester in law school.

Political Science, Ph.D.

The doctoral degree requires a minimum of 72 credit hours including both graduate coursework (60 hours) beyond the bachelor's degree and dissertation credit hours (12 hours). A minimum tool requirement for all Ph.D. students is the successful completion of the first-year core curriculum courses with a minimum grade of B- or higher: three research methods courses (POLS 5381, 5382, and 5383) and three field pro-seminars (POLS 5322, 5360, and 5370). Students are required to declare three substantive fields, two major fields and one minor field. Students must complete at least 12 hours of coursework in each of the major fields and 9 hours in the minor field. The two major fields must be chosen from International Relations, American Politics, Comparative Politics, or Public Administration. The minor field may also be one of those above or Political Methodology. For the qualifying examination, the student will select two major fields and will be tested in those fields only. There will be no exam for the minor field. Additional information and application materials can be found at www.depts.ttu.edu/politicalscience. Interested students may also address questions and information requests to polsglad@ttu.edu for the Ph.D. program.

Graduate Course Descriptions

Political Science (POLS)

- 5100—Colloquium in Political Science (1).** Prerequisite: Consent of instructor. Presentations of current research and discussions of the political science profession by department and visiting faculty. Credit-no credit. May be repeated.
- 5321—Seminar in Political Behavior (3).** Current research on mass political behavior, including public opinion, political socialization, and voting behavior. Topics vary each semester. May be repeated for credit.
- 5322—Pro-Seminar in American Politics (3).** Advanced study in subjects relevant to an understanding of how the political process is affected by the environment of politics.

- 5324—**The Executive (3)**. Study of the executive branch of government in the United States, with particular emphasis on the presidency.
- 5325—**The United States Congress (3)**. An examination of the Congress, from formal organization, member recruitment, and theories of representation, to Congressional reform, policy-making, and inter-branch relations.
- 5327—**Selected Topics in American Government and Politics (3)**. Problems in American government and politics. Varying topics from semester to semester.
- 5356—**Judicial Behavior (3)**. Political analysis of actors in the judicial decision-making arena.
- 5360—**Pro-Seminar in International Relations (3)**. Survey of contending theories of world politics, focusing on those that emphasize the role of power and interest in shaping state behavior.
- 5361—**Interdependence and World Order (3)**. Survey of contending theories of world politics focusing on those that emphasize interdependence, democratization, transnationalism, nonstate actors, and the potential for system transformation.
- 5363—**International Organization (3)**. Theoretical examination of the rise of global, regional, and functional international organizations and their role in the solution of economic, social, environmental, and political problems.
- 5365—**Special Topics in International Relations (3)**. Intensive research on topics in international relations. Subjects vary.
- 5367—**International Political Economy (3)**. An exploration of the interaction of international politics and international economic trends. The course surveys the theories in the field, particularly as they relate to the political economy of trade, foreign investment, finance, and development.
- 5369—**International Security Studies (3)**. Examines how states maintain their security in a dangerous world.
- 5370—**Pro-Seminar in Comparative Politics (3)**. Critical survey of the major theories and literature in comparative politics, the logic of cross-national and cross-cultural inquiry, and the major concepts and approaches.
- 5371—**Area Studies in Comparative Politics (3)**. The culture and political system of a major geographical area like Western Europe, Latin America, or Asia. Topics vary each semester. May be repeated for credit.
- 5376—**Selected Topics in Comparative Government (3)**. Studies in comparative politics, with topics varying from semester to semester.
- 5381—**Research Design (3)**. Design and execution of political research.
- 5382—**Data Analysis (3)**. Techniques of analyzing political data, including descriptive and inferential statistics and computer applications. [PUAD 5320]
- 5383—**Advanced Quantitative Research Methods in Political Science (3)**. Extensions of the least squares model to such techniques as regression and diagnostics, structural equations, factor analysis and/or time series, and computer programs applicable to political data.
- 5384—**Advanced Political Analysis (3)**. Prerequisite: Consent of instructor. Examination of contemporary methods for investigating selected political topics. Topics may vary from semester to semester. May be repeated for credit.
- 5385—**Causal Inference and Quasi-Experimental Methods (3)**. Causal inference, the experimental ideal, and methods that attempt to produce causal estimates of policies/treatments from observational data.
- 5395—**Practicum in Survey Research (3)**. Prerequisites: POLS 5381, POLS 5382, POLS 5383, and consent of instructor. Introduces students to the operation and management of a survey research lab.
- 5396—**Research Practicum in International Relations (3)**. Prerequisite: Consent of instructor. Organized professional research on major issues in international relations. May be repeated twice for credit.
- 5397—**Research Practicum in Comparative Politics (3)**. Prerequisite: Consent of instructor. Organized professional research on major issues in comparative politics. May be repeated twice for credit.
- 6000—**Master's Thesis (V1-6)**.
- 7000—**Research (V1-12)**.
- 8000—**Doctor's Dissertation (V1-12)**.
- Public Administration (PUAD)**
- 5310—**Capstone: Practicum in Public Administration (3)**. Prerequisite: To be taken during final semester unless an exception is granted. Applied research paper requiring students to use concepts from their M.P.A. courses to analyze, synthesize, and formulate recommendations that address a real-world public administration problem or policy issue. Requires oral presentation. Graded on pass/fail basis.
- 5319—**Research Methods in Public Administration (3)**. Issues and techniques in data collection, analysis, and management for evaluating programs. Focus on research design, measurement, and decision-making in public organizations.
- 5320—**Program Evaluation and Quantitative Analysis (3)**. Introduction to techniques of analyzing public policies, including descriptive and inferential statistics and computer applications. [POLS 5382]
- 5322—**Planning and Management of Weather and Climate Risks (3)**. Students learn about the hazards faced by human and natural systems that are caused by weather and climate-related risks and how to develop a risk-management plan.
- 5323—**The Science and Policy of Climate Change (3)**. Discussion of the evidence for human-induced climate change, impacts of climate change on people and the planet, and possible solutions to this global problem.
- 5324—**Energy, Climate, and Sustainability (3)**. Students learn the political and administrative dynamics of U.S. energy, climate, and sustainability law policy.
- 5325—**Analysis and Application of Climate Data (3)**. Students learn to incorporate appropriate climate inputs into a wide range of quantitative applications. Fluency in advanced programming language (e.g., R, MatLab) required.
- 5326—**Information Technology in Public Administration (3)**. The role of information and communication systems are examined as well as applications used by public administrators. Emphasis is placed on understanding the systemic issues facing the application of information technology in the public sector.
- 5327—**Energy Policy and Administration (3)**. Students will learn traditional and untraditional energy-related policies and administrative agencies charged with implementing the law and the challenges associated with energy resource development.
- 5332—**Introduction to Healthcare Delivery Systems (3)**. Introduction to the history and structure of the U.S. healthcare system. Topics include professionals employed in healthcare, institutions, and effects of internal and external environments.
- 5333—**Environmental Policy and Administration (3)**. Analysis of the formulation, implementation, and evaluation of environmental and natural resources policy, emphasizing theoretical foundations, political contexts, and principles of administering environmental policies.
- 5334—**Healthcare Policy and Administration (3)**. Analysis of the formulation, implementation, and evaluation of healthcare policy and service delivery, emphasizing skills and knowledge in policy-making, management, and decision-making.
- 5335—**Management of Nonprofit Organizations (3)**. Study of the third sector and the administration of nonprofits, including laws, boards, personnel, volunteers, finances, grant writing, fundraising, marketing, and planning.
- 5337—**Public Organization Theory (3)**. The major political and administrative theories applicable to public sector organizations are examined. Contemporary trends in organization theory and public management are emphasized.
- 5340—**Public Administration Theory and Practice (3)**. Introduction to the theoretical foundations of public administration and the practical applications to the professional practice of public administration.
- 5341—**Public Policy Theory and Process (3)**. Introduction to competing theoretic explanations of U.S. public policy making. Explores interactions between institutional actors, logic of administrative structure and delegated authority, and bureaucratic discretion.
- 5342—**City Management (3)**. The political implications and administrative functions of city government are examined. Contemporary issues of municipal management are emphasized.
- 5343—**Human Resources Management (3)**. Description and analysis of human resources functions in public and non-profit agencies.
- 5344—**Public Budgeting (3)**. Political and economic aspects of the budgetary process as the central mechanism for public resource allocation and executive planning.
- 5345—**Administrative Ethics and Leadership (3)**. Apply major frameworks to diagnose organizational problems and to exercise leadership when resolving ethical dilemmas and leading organizational change.
- 5346—**Public Financial Management (3)**. Prerequisite: PUAD 5344 or consent of instructor. An in-depth study of government finance function with emphasis on fund structure, financial reporting, and related management practices including cash, debt, risk, and inventory management.
- 5347—**Internship in Public Administration (3)**. Prerequisite: Consent of instructor. Service assignment in a public agency to enhance professional skills for students in the Master's in Public Administration program. Graded pass/fail and may be repeated for credit.
- 5348—**Selected Topics in Public Administration (3)**. Special studies on subjects in public administration. Topics will vary from semester to semester.
- 5352—**Public Policy Analysis (3)**. Introduction to analytic tools for evaluating public policies; examines policy choices given resources and informational constraints. Topics include risk assessment, cost-benefit analysis, and market failures.

- 5353—**Collaborative Management (3)**. The study of theoretical and practical issues in collaborative and network management and the influence of collaboration networks on public policy.
- 5354—**Cost and Managerial Accounting in Government and Non-Profit Organizations (3)**. Discusses the importance of cost and managerial accounting and demonstrates how certain tools can be used to facilitate cost management in government and non-profits.
- 5362—**Grant Writing and Fundraising for Nonprofits (3)**. Explores the integral role philanthropy and fundraising play in sustaining and growing nonprofit agencies. Provides necessary tools to navigate the world of fund development.
- 5363—**Strategic Planning for Nonprofit Organizations (3)**. Focuses on theory and practice of strategic planning for public and nonprofit organizations as a tool for organizational management and effective governance.
- 5364—**Comparative Effectiveness and Quality Improvement of Healthcare Systems (3)**. Prerequisite: PUAD 5319. An in-depth understanding of healthcare delivery systems through comparisons of U.S. and other country's healthcare delivery systems and QI and CER methods.
- 5380—**Pro-Seminar in Public Administration (3)**. Advanced critical survey of the intellectual history, major theories, and current research literature in public administration.
- 5381—**Area Studies in Public Administration (3)**. Advanced studies in selected subfields of public administration, such as public management and public policy. Topics vary each semester. May be repeated for credit.

Institute for Peace and Conflict (IPAC)

- 5300—**Foundations of Strategic Studies (3)**. An introductory course in strategic thought, taught thematically using historical case studies to reinforce the process and environment of strategy in conflict resolution.
- 5306—**National Security and Intelligence in Post 9/11 World (3)**. Prerequisite: B or better in IPAC 5300. Covers the structure of the American intelligence community since World War I and changes in response to 9/11 and pre-war intelligence assessments of Iraq.
- 5307—**Seminar in Strategic Studies (3)**. Prerequisite: IPAC 5300 with a grade of B or higher. This capstone course for the Certificate in Strategic Studies utilizes guest lecturers and culminates in the writing of a research paper based on specific student interests.

Department of Psychological Sciences

The Department of Psychological Sciences admits students to and provides instruction in three Ph.D. programs. Within the Ph.D. programs, students may additionally obtain a Graduate Certificate in Psychological Methods and Analysis.

Psychology, M.A.

The department offers a Master of Arts degree in Psychology.

Experimental Psychology, M.A.

Information about the Master of Arts degree in Experimental Psychology can be found in the Experimental Psychology Programs Handbook online at www.psychology.ttu.edu.

Doctoral Programs

The Ph.D. program typically requires five to six years of full-time study. Extensive details regarding a typical curriculum are available in all the program handbooks, which are online at www.psychology.ttu.edu. Students may elect to earn an optional master's degree during their pursuit of the doctoral degree.

The American Psychological Association accredits the clinical and counseling psychology doctoral programs. The accrediting association can be contacted at American Psychological Association, Office of Program Consultation and Accreditation, 750 First Street N. E., Washington, DC 20002-4242, 202.336.5979, 202.336.6123 (TDD/TYY) 202.336.5978 (fax). The Human Factors and Ergonomics Society (HFES) accredits the Human Factors specialization within the experimental psychology doctoral program (Human Factors and Ergonomics Society, P.O. Box 1369, Santa Monica, CA 90406-1369 USA).

All three doctoral programs in psychology require courses specific to their own specialty, along with more general psychology courses that are department-wide requirements for graduate students. Courses in ethical and professional issues, multicultural issues and underserved populations, and supervision and consulting for the provision of psychological services are also required in clinical and counseling psychology.

All doctoral students are required to complete a second-year research project or its equivalent (e.g., an empirical master's thesis), doctoral qualifying exams specific to each doctoral program in the department, and a dissertation. Students in the clinical and counseling psychology programs also complete numerous practicum courses and an approved one-year predoctoral internship. Interdisciplinary study with other relevant and cooperating departments/colleges on campus is also available. For example, some psychology doctoral students take elective human sciences courses such as child and adolescent development.

Application instructions and forms for psychology graduate programs are available at the Graduate School online application website. Deadlines for receipt of the complete application for clinical, counseling, and experimental programs is December 1. Note that applicants must apply through the Graduate School of Texas Tech University; applicants cannot apply directly through the Department of Psychological Sciences.

Many graduate courses in psychology—and all graduate courses in psychology with a practicum component—are limited to full-time graduate students who are officially admitted and enrolled in one of the psychology degree graduate programs. In most cases, full-time graduate students from other degree programs must get written permission from the instructor before enrolling in a psychology graduate course.

Clinical Psychology, Ph.D. The Ph.D. in clinical psychology typically requires 5-6 years of full-time study, including a year-long internship at an APA-accredited internship program. The program in clinical psychology only admits students for the doctoral degree. During their pursuit of the doctoral degree, however, students usually earn a thesis-related master's degree (unless they have already earned a similar thesis-related master's degree elsewhere). There is not a terminal master's degree admission for clinical psychology. A master's degree in psychology typically requires successful completion of at least 36 credit hours of required coursework at Texas Tech, plus successful completion of other program requirements like the master's thesis research project and certain statistics courses. A doctoral degree in psychology has some variance in the required total hours because of such factors as the differences between doctoral psychology programs, diversity of student interests, range of academic backgrounds, and other practical issues. Doctoral students in psychology at Texas Tech typically earn approximately 90-120 credit hours of required coursework in their graduate program before successfully completing their doctoral degree. In addition, other doctoral program requirements must be completed successfully before the doctoral degree is awarded.

Counseling Psychology, Ph.D. The Ph.D. in counseling psychology program typically requires five to six years of full-time study, including an approved one-year internship at an appropriate training agency (e.g., approved university counseling center, community mental health center, hospital, outpatient clinic, correctional facility, healthcare system, psychological-services consortium). Extensive details regarding a typical curriculum are available in the program handbook, which is online at www.depts.ttu.edu/psy/counseling/. Though the program does not offer a terminal master's degree, students may elect to earn an optional master's degree in psychology during their pursuit of the doctoral degree. The master's degree requires completion of a minimum of 36 credit hours in required coursework completed at TTU. These hours will also count toward the doctoral degree. Doctoral students in counseling psychology typically earn between 90-120 credit hours of required coursework in their graduate program before successfully completing their doctoral degree. They must also meet other program requirements. The counseling program ascribes to a scientist-practitioner training model that emphasizes training in both research and clinical skills, with a commitment to fostering an appreciation of multicultural diversity. The counseling program uses a mentoring model in which an attempt is made to match incoming students with a particular faculty member with whom they will work closely during their time in the program.

General Experimental Psychology, Ph.D. This Ph.D. program also offers a terminal master's degree (M.A.) option in experimental psychology and

a combined B.A.–M.A. option with a concentration in one of the concentration areas of experimental psychology, human factors. The doctoral program typically takes five to six years of full-time study. The specialization areas available in the experimental psychology doctoral program are cognition & cognitive neuroscience, human factors, and social psychology. Graduate students in the human factors specialization frequently complete an approved internship, often for one to two semesters, at an appropriate agency (e.g., federal or state agency, consulting company, engineering group, high-tech business, transportation agency, healthcare facility, military base). Details regarding a typical curriculum in each of the specialization areas of experimental psychology are available online at www.psychology.ttu.edu.

The doctoral degree in experimental psychology has some variance in the required total hours because of such factors as the differences between specialization areas, diversity of student interests, range of academic backgrounds, and other practical issues. Doctoral students in psychology at Texas Tech earn approximately 72–90 credit hours in their graduate program before successfully completing their doctoral degree. In addition, other doctoral program requirements must be completed successfully before the doctoral degree is awarded.

The Human Factors and Ergonomics Society accredits the experimental psychology graduate program with a specialization in human factors (Human Factors and Ergonomics Society, P.O. Box 1369, Santa Monica, CA 90406-1369 USA).

Graduate Course Descriptions

Psychology (PSY)

- 5001—Problems in Psychology (V1-6).** Prerequisite: 12 advanced hours of psychology and prior permission of instructor. Independent work under individual guidance of a staff member.
- 5002—Advanced Practicum in Counseling and Clinical Psychology (V1-6).** Prerequisites: PSY 5316 or PSY 5418 and prior permission of instructor. Supervised practice in psychodiagnostics and psychotherapy with selected cases. Emphasis on a wide variety of experience. May be repeated.
- 5003—Internship in Experimental Psychology (V1-9).** Provides students with experience in real-world settings related to experimental psychology at sites on or off campus. May be repeated.
- 5004—Doctoral Internship in Counseling and Clinical Psychology (V1-6).** Prerequisite: By arrangement with department chairperson. Full-time supervised internship in an appropriate facility. Enrollment required four times to complete one calendar year.
- 5101—Colloquium in the Teaching of Psychology (1).** An overview of teaching methods as applied to the teaching of Psychology in the college classroom. Graded pass/fail.
- 5105—Supervision and Consultation Seminar (1).** Prerequisites: At least 10 hours of PSY 5002 or consent of the instructor. Provides an overview of theory and research relevant to clinical supervision and consultation.
- 5205—Supervision Practicum (2).** Prerequisite or corequisite: PSY 5105. Introduction to the process of clinical supervision and practice of the skills used in supervision. Provides an opportunity to supervise beginning-level therapists.
- 5301—Biological Bases of Psychological Function (3).** Current scientific knowledge of biological aspects of behavior and psychological function, including their history, research methods, and application to experimental and therapeutic research problems.
- 5302—Lifespan Development (3).** Prerequisite: Graduate standing in the department or consent of instructor. Overview of normative development in physical, cognitive, and socio-emotional domains from conception to older adulthood.
- 5303—Developmental Psychopathology (3).** Prerequisite: Consent of instructor. An examination of psychopathology in children, with consideration of the developmental course of various psychological disorders through childhood and adolescence.
- 5305—Neuroscience of Self-Regulation and Consciousness (3).** Theories, interventions, and research on self-regulation and consciousness using neuroscience as a foundation.
- 5306—Seminar in Professional Ethics (3).** A survey of the employment practices and prevailing legal and ethical standards in contemporary professional psychology.
- 5307—Close Relationships (3).** Surveys psychological findings and theories related to intimate relationships, including research on power, attraction, marriage, divorce, loneliness, and couple therapy.
- 5308—Vocational Psychology (3).** Prerequisite: Consent of instructor. Review of theories, assessment tools, and interventions in vocational psychology including the integration of vocational issues into psychotherapy.
- 5311—Introduction to Psychotherapeutic Intervention and Management (3).** Prerequisites: C or better in PSY 5338 and instructor consent. Didactic introduction to psychotherapy procedures plus a practicum element.
- 5312—Introduction to Child and Adolescent Psychological Treatment (3).** Prerequisites: PSY 5303 and consent of instructor. Introduction to empirically-based treatment approaches pertaining to children, adolescents, and families, with a focus on case formulation and treatment planning.
- 5314—Beginning Child Practicum (3).** Provides students with basic clinical skills in working with children, youth, and families presenting with psychological problems.
- 5315—Objective Personality Assessment (3).** Prerequisites: Graduate standing in the department, permission of instructor, and PSY 5338. Survey of objective personality and psychodiagnostic assessment including supervised practicum experience and methodological, empirical, theoretical, cultural, and ethical issues.
- 5316—Introduction to Counseling Psychology (3).** Prerequisite: Admission to counseling psychology doctoral program or consent of instructor. Professional identity, research themes and strategies, and ethical standards of counseling psychology. Exploration of theories and techniques of counseling.
- 5317—Behavioral Assessment (3).** Prerequisite: Consent of instructor; concurrent enrollment in PSY 5002 is recommended. Principles of behavioral assessment including idiographic and time series analysis, cognitive/behavioral case formulation, and outcome evaluation. Practicum application to adults.
- 5320—Research Methods in Social Psychology (3).** Prerequisite: Graduate standing in psychology or consent of instructor. Examines experimental, quasi-experimental and correlational methodologies in social psychology. Focuses on principles that guide research and development of skills to conduct and evaluate research.
- 5323—Group Counseling and Psychotherapy (3).** Prerequisites: PSY 5002, PSY 5311, and permission of instructor. Designed to provide theories of approaches to group work and a personal experience with group processes. Various points of view will be studied.
- 5327—Social Psychology and Emotion (3).** Prerequisite: Graduate standing in psychology and PSY 2304 or consent of instructor. Coverage of current and classic studies in social psychology and emotion with attention to the role of emotion in social psychological processes. This course does not meet a core requirement for students in the Experimental Psychology graduate program.
- 5328—Seminar in Social Psychology (3).** Prerequisite: PSY 2304. Contemporary attitude theory and research; systematic theory in social psychology; social structure and personality; the psychology of social movements and current research trends.
- 5330—Attitudes and Attitude Change (3).** Advanced study of the formation, organization, and change of social attitudes. Emphasis on current theory and research.
- 5333—Cognitive Behavioral Therapy (3).** Prerequisite: PSY 5002 and PSY 5418 or PSY 5316. A critical analysis of the major concepts of psychological intervention approaches derived from contemporary learning and cognitive theory.
- 5334—Theories and Techniques of Psychotherapy (3).** Prerequisite: PSY 5316. Consideration of theories of psychotherapy with adults. Discussion of professional issues and problems related to the area of counseling psychology.
- 5335—Group Processes and Intergroup Relations (3).** Explores the processes that occur within and between groups, e.g., social identity, social exclusion, and prejudice. Emphasis is on current theory and research.
- 5338—Seminar in Psychopathology (3).** Prerequisite: Graduate standing in the department or consent of instructor. A survey of theoretical perspectives and research findings concerning the causes, diagnosis, and treatment of psychopathology.
- 5345—Research Seminar in Clinical and Counseling Psychology (3).** Prerequisite: Instructor consent. Survey of methods and approaches to research in these areas.
- 5350—History and Systems of Psychology (3).** The nature of psychological systematics and theory construction, including cultural and other factors influencing system building; consideration of major systems from the Hellenic period to the present.
- 5352—Seminar in Memory (3).** Prerequisite: Graduate student standing. An overview of various topics within the field of empirical memory research, examined from both historical and theoretical perspectives.

- 5353—Seminar in Cognitive Neuroscience (3).** Explores how the basic building blocks of thought are implemented in the brain, such as learning, memory, and decision making.
- 5354—Seminar in Perception: Theories and Applications (3).** Theoretical and applied issues in perception. Emphasis on demonstrations of perceptual phenomena (e.g., illusions, motion perception), theories of visual perception, and discussions of human-factors literature.
- 5355—Neuroscience of Vision (3).** Covers the neural mechanisms involved in vision, including the critical role of attention in gating visual awareness. Many neuroscientific techniques are discussed.
- 5356—Seminar in Cognition and Cognitive Neuroscience (3).** Survey of research on human mental activities such as memory, concepts, language processing, problem solving, and decision making, with emphasis on cognitive and neural models.
- 5357—Seminar in Psycholinguistics (3).** Current models of language, reading, and comprehension with attention to topics such as syntax, prepositional representation, metacognition, decoding, beginning reading instruction, and related computational models.
- 5358—Seminar in Metacognition (3).** Overview of theories, concepts, empirical findings, and philosophical writings about metacognition ("thinking about thinking"). Contexts include learning, memory, reading, social interactions, aging, and animals.
- 5367—Analysis of Repeated Measures and Intensive Longitudinal Designs (3).** Prerequisite: B or better in PSY 5447 and PSY 5480 or equivalent. Analysis of repeated measures, longitudinal, and intensive longitudinal designs using multilevel models, time series regression, latent variable dynamic and growth curve analysis. Psychological research applications.
- 5370—Human Factors Psychology (3).** Survey of topics in human factors including human-machine interaction, visual performance, and transportation. Emphasis on presenting solutions to practical design problems and discussing applied literature.
- 5372—Human Factors Methodology (3).** Overview of human factors methodology including task analysis, usability evaluation and its role in human-computer interaction, assessment of risk, human reliability, and error.
- 5373—Cognitive Ergonomics (3).** Consideration of cognition in complex work environments with overviews of basic processes (e.g., attention, knowledge, comprehension), applied domains (e.g., sports, driving, industrial systems), and the modern concerns that arise (e.g., automation, teamwork).
- 5377—Behavioral Medicine (3).** Prerequisite: PSY 5338. Introduces graduate students in the applied social sciences to the contributions of psychology to the understanding of health and illness.
- 5379—Human-Computer Interaction (3).** Fundamentals of human-computer interaction including user interface design, usability and usability methods, cognition and user psychology, user-centered design, and understanding how designers think.
- 5384—Psychology and the Law (3).** Survey of the interface between psychology and law including topics in forensic psychology, expert testimony, and psychologists' influence in policy legislation.
- 5396—Multicultural Counseling (3).** Prerequisite: PSY 5002 or PSY 5311. Impact of privilege and culture (race, gender, sexual orientation, religion, disability, etc.) on individual experience and implications for culturally competent practice.
- 5398—Ethnic Minority and Community Interventions (3).** Course focuses on research and clinical issues related to mental health services for ethnic minority populations and establishing community prevention-intervention programs.
- 5404—Practicum in Intelligence Testing (4).** Prerequisite: Consent of instructor. A review of the historical and theoretical bases of intelligence testing in addition to instruction and supervised practice in scoring, interpreting, and reporting results from individual intelligence tests.
- 5409—Clinical Neuropsychology (4).** Prerequisites: PSY 5338 and doctoral standing in psychology. Foundational course in brain-behavior relationships, neuropathology for neuropsychologists, neuropsychological assessment, and other clinical applications.
- 5418—Introduction to Clinical Psychology (4).** Prerequisite: Admission to clinical psychology doctoral program. Supervised experience in clinical interviewing. A study of cognitive behavior therapy and evidence-based practice with adult clients.
- 5447—Advanced Correlational Methods and Factor Analysis (4).** Prerequisite: Consent of instructor. Comprehensive survey of multivariate analysis including multiple correlation and factor analysis and other correlational techniques. Review of analysis of co-variance.
- 5448—Advanced Multivariate Analysis for Psychologists (4).** Covers topics in multivariate analysis including canonical correlation, multiway frequency tables, MANOVA, profile analysis, discriminant analysis, logistic regression, and time series analysis.
- 5460—Structural Equation Modeling for Psychologists (4).** Prerequisite: PSY 5447 and PSY 5480 or equivalent. Advanced statistics course focusing on structural equation modeling, confirmatory factor analysis, and path analysis.
- 5465—Categorical Data Analysis (4).** Prerequisites: PSY 5447 and PSY 5480 or equivalents. Analysis of categorical variables, including contingency table analysis, linear regression models, and repeated-measure designs.
- 5480—Experimental Design (4).** Prerequisite: Graduate majors and consent of instructor. Logical principles governing sound experimentation: conventional designs using analysis of variance. Introduction to complex analysis of variance designs and trend tests.
- 5481—fMRI Design and Data Analysis (4).** Teaches basic data analysis and processing strategies for fMRI. Intended for applied users who wish to conduct their own fMRI studies.
- 5485—Psychometric and Item Response Theory (4).** Prerequisites: PSY 5447 and PSY 5480 or equivalents. Overview of psychometric theories and concepts in the field of psychology and related disciplines.
- 5490—Computer Modeling: Applied Analysis and Simulation (4).** Prerequisites: PSY 5480 and PSY 5447 or equivalents. Computational and simulation-based methods to develop principled solutions to novel data analytic problems.
- 5495—Hierarchical Linear Modeling (4).** Prerequisites: PSY 5447 and PSY 5480 or equivalents. Instruction in interpreting and conducting research in the field of psychological sciences using hierarchical linear modeling.
- 5496—Qualitative Research Methods and Analysis (4).** Prerequisites: PSY 5447 and PSY 5480 or equivalents. Introduces students to the ethical, philosophical, and methodological considerations for qualitative research in the field of psychology.
- 6000—Master's Thesis (V1-6).**
- 7000—Research (V1-12).**
- 8000—Doctor's Dissertation (V1-12).**

Department of Sociology, Anthropology, and Social Work

The department offers graduate degrees in all three programs: Master of Arts in Sociology, Master of Arts in Anthropology, and Master of Social Work (M.S.W.). In sociology and anthropology, the Master of Arts (M.A.) degree programs are designed to provide broad training for students who wish to enter a Ph.D. program, prepare for undergraduate or community college teaching, or pursue a nonteaching career for which master's-level training is appropriate and useful. Both programs emphasize training in basic theory and methods. The M.S.W. is a professional degree program that prepares students for advanced social work practice.

Admission. General admission requirements are those established by the Graduate School. The best preparation is an undergraduate major in the same field or equivalent. However, students from other fields are also encouraged to apply. More specific information regarding admission procedures or other aspects of the graduate programs may be obtained from the sociology, anthropology, or social work graduate advisor and the department website.

Anthropology, M.A.

Decisions on the program of study, specific courses, and thesis topics are made through consultation with the graduate advisor and other faculty members as appropriate on the basis of the student's background, interests, and objectives.

Coursework. The anthropology curriculum requires 9 hours of core courses in the following three subfields: archaeology, biological anthropology, and ethnology. Students are required to take ANTH 5305 (ethnology core), ANTH 5341 (archaeology core), and ANTH 5312 (biological core). Thirty-six total hours of graduate credit are required, including 21 hours of elective courses. The elective courses may include a 6-hour minor or courses outside of anthropology. No more than 6 hours of field course credit (ANTH 5642 or ANTH 5643) may count toward the degree. Students, in consultation with the graduate advisor, will also elect the thesis or non-thesis option for 6 hours of graduate credit. A grade of B or better is required to receive graduate credit for a course. Coursework is planned in consultation with the graduate advisor or thesis director soon after admission to the graduate program.

Thesis Option. Students in the anthropology program are strongly encouraged to write a thesis, particularly if they plan to continue their studies in a doctoral program. Students choosing this option are required to take 30 hours of coursework (including 9 core hours and 21 elective hours, which may include 6 hours outside of anthropology) plus 6 hours of thesis credit. The thesis is based on original research done in consultation with the thesis advisor. Students must submit a thesis prospectus prior to initiating their research and must defend the completed thesis to the department before the thesis may be submitted to the Graduate School.

Non-Thesis Option. Students choosing the non-thesis option are required to take 36 hours of coursework (including 9 core hours and 27 elective hours, which may include 6 hours outside of anthropology). In addition to the coursework requirement, students must choose a three-person committee (two of these faculty must be in the anthropology program) to administer a three-day exit examination in their final semester.

Social Work, M.S.W.

To complete a Master of Social Work degree, students will follow one of four possible options. Those with standard admission (no prior bachelor's degree in social work) will complete 59 hours of graduate social work credit, including 900 field placement hours, and will begin in the fall semester. Full-time students on the standard option can complete the program in two years, while part-time students should be finished in four years.

Students who have completed an undergraduate degree in social work from a program that was accredited (or approved by) the Council on Social Work Education may be eligible for advanced admission status. On this option, students normally start in the summer and will complete 32 hours of graduate social work credit, including 500 field placement hours, and will begin in the summer. Full-time students on the advanced option can complete the program in one full calendar year, while part-time students should be finished in two years.

Although opportunities for research are available, the M.S.W. is a non-thesis degree program. For further information, contact the department at sasw.socialwork@ttu.edu, or review the [program website](#).

Sociology, M.A.

Decisions on the program of study, specific courses, and thesis topics are made through consultation with the graduate advisor and other faculty members as appropriate on the basis of the student's background, interests, and objectives.

Coursework. The sociology program provides coursework concentration in such areas as family, criminology and deviance, sociology of education, inequality and race, demography and migration, medical sociology, and aging. Required courses include SOC 5101 (1 hour), 5303, 5308, 5334, and 5394. Six of the 36 required hours may be taken outside the department. Selection of a minor requires approval of the Sociology Graduate Committee. In lieu of a foreign language, each student is required to demonstrate proficiency in computer analysis of data. A grade of B or better is required for graduate credit.

Thesis, Non-Thesis Options. Students in the sociology program may select the thesis option or non-thesis option. The thesis option is strongly recommended for students who plan to continue their graduate studies by applying to a doctoral program. Those who have accepted a teaching assistantship must take the thesis track. Students choosing the thesis plan in sociology are required to take 30 hours of coursework (including two required courses in theory and two in methods) plus 6 hours of thesis credit. They are also required to complete a thesis that is acceptable to the student's thesis committee and demonstrate proficiency in a statistics software program. Students choosing the non-thesis plan are required to take 36 hours of coursework (including one course in theory, two courses in methods, and 3 hours of SOC 5331). They are also required to complete a paper on a topic related to their professional interests that is acceptable to the student's non-thesis committee.

Assessment. In the sociology program, a comprehensive examination is required. The comprehensive examination involves at least two of the various areas in sociology listed above. Students may present at two peer-reviewed conferences in lieu of taking the comprehensive exam.

Sociology, B.A. / Sociology, M.A.

This competitive accelerated program is designed for upper-division sociology majors to begin graduate classes during their senior undergraduate year so that they can finish with a master's degree in sociology with one additional year of graduate study instead of the normal two years. This program is particularly well-suited for students who wish to enter governmental, non-profit, or industry work. The program follows the same requirements as the Sociology, M.A., though nine hours of graduate credit may be counted as undergraduate credit, at the discretion of the graduate director.

Sociology Graduate Minor

The graduate minor in Sociology is designed for students to learn more about the practice, theory, content, and methods of Sociology. Students may take six credits through any two distinct, non-repeatable courses at the 5000-level that have a SOC prefix.

Graduate Course Descriptions

Anthropology (ANTH)

- 5305—Method and Theory in Cultural Anthropology (3).** The history of research in cultural anthropology; development of methodological and theoretical approaches, and the exploration of ethnographic fieldwork and writing.
- 5310—Seminar in Cultural Resource Management (3).** Seminar covering the practice of cultural resource management archaeology in the United States, including historical and legal background, business models, methods, and employment opportunities.
- 5311—Human Origins (3).** A comprehensive examination of hominid evolution with emphasis on current discoveries, interpretations, and theories. Seminar on selected topics.
- 5312—Human Diversity (3).** Survey of biological variation and the processes producing it in human populations and races; seminar in selected topics. Laboratory emphasizing research approaches to current problems.
- 5313—Human Skeletal Biology and Forensic Anthropology (3).** Analysis of human skeletal remains for legal purposes. Methods of identification, techniques of recovery and examination, facial reconstruction, report writing, limits of inference, expert testimony.
- 5315—Advanced Human Osteology (3).** Rigorous study of human skeleton to facilitate the identification of intact and fragmentary bones. Includes ageing, sexing, measurement techniques, report writing, and some legal issues.
- 5319—Topics in Biological Anthropology (3).** Selected topics or examination of a currently important topic in biological anthropology. May be repeated for a maximum of 9 hours credit.
- 5322—Social Anthropology (3).** Seminar in contemporary social anthropology. Selected topics in kinship, social, and political organization; warfare and conflict resolution; and ritual and symbolism.
- 5323—Topics in Cultural Anthropology (3).** May be repeated for credit.
- 5325—Alternative Ethnographic Representations (3).** Introduces students to diverse ways scholars can present ethnographic research, from public outlets like blogs to creative productions like novels, plays, and poetry.
- 5334—Statistical Methods in Anthropology (3).** Introduces the fundamentals of statistical analyses used in anthropological research.
- 5341—Method and Theory in Archeology (3).** An intensive survey of the development and present status of method and theory in archeology.
- 5343—Topics in Anthropological Archeology (3).** Examination of either a currently important methodological topic in archeology or the archaeological knowledge extant from a site or geographic unit. May be repeated for credit. Also offered as a summer field course.
- 5345—3D Recording and Modeling in Archaeology (3).** Learn how to use a variety of technologies to record and model 3D archaeological data for research and heritage management.
- 5352—Ethnolinguistics (3).** Survey of the nature of the interrelationships between language and culture.
- 5353—Current Debates in Bioarchaeology (3).** Covers current theoretical debates and methodological trends in bioarchaeology. Emphasizes communicating bioarchaeological topics to the general public.
- 5355—Cold Cases in Forensic Anthropology (3).** Applies an anthropological approach to understanding the issues involved in investigating and resolving missing and unidentified persons cold cases.
- 5642—Advanced Field Archaeology (6).** Field school providing instruction in crew supervision and advanced archaeological field techniques,

including site survey, excavations, record keeping, TDS mapping, and photography.

5643—Field Research in Skeletal Biology (6). A field experience providing hands-on learning specific to human skeletal biology and forensic methods.

6000—Master's Thesis (V1-6).

7000—Research (V1-12).

Social Work (SW)

5264—Foundation Field Placement I (2). Prerequisite: Admission to Master of Social Work program. Supervised practicum using social work knowledge, skills, and ethics in a program-approved social agency. Pass/fail. Liability insurance required.

5310—The Social Work Profession and Social Welfare Policy (3). Foundation graduate course examining social welfare system. Emphasizes how policies impact systems. Topics include social welfare history, policy development, implementation, evaluation, and values.

5311—Human Behavior and the Social Environment: Systems (3). Foundation course examining theories on and knowledge of interaction between person and environment. Emphasizes mezzo- and macro-level systems.

5312—Human Behavior and the Social Environment: Lifespan (3). Foundation graduate course that examines theories on and knowledge of interaction between person and environment. Emphasizes biological, social, emotional, and cultural systems across lifespan.

5331—Social Work with Diverse Populations (3). Foundation graduate course exploring integrated approach to theory, values, and skills of working with diverse populations. Emphasizes empowering vulnerable populations to fulfill potential.

5332—Foundation Practice I (3). Prerequisite: Admission to Master of Social Work program. Foundation course introducing theory, principles and skills of building and maintaining professional relationships with systems of all sizes for generalist social workers.

5333—Foundation Practice II (3). Prerequisite: C or better in SW 5332. Foundation course building on theory, principles, and introducing skills of problem solving and evidence-based practice with systems of all sizes for generalist practice.

5339—Foundations of Social Work Research (3). Introduces scientific approach to generation of social work knowledge, including how to read and interpret research with a critical eye and perform basic research activities.

5467—Foundation Field Placement II (4). Prerequisite: Admission to Master of Social Work program. Successful completion of SW 5264. Supervised practicum using social work knowledge, skills, and ethics in a program-approved social agency. Pass/fail. Liability insurance required.

6040—Advanced Independent Study in Social Work (V1-6). Prerequisite: Advisor consent. Independent study in advanced social work theory, research, or policy analysis.

6350—Social Work Practice With Individuals (3). Prerequisite: M.S.W. student with second year status. Advanced course focusing on intervention theories and skills for strengths-based practice with individuals.

6351—Social Work Practice With Families (3). Prerequisite: M.S.W. student with second-year status. Successful completion of SW 6350. Advanced course focusing on intervention theories and skills for strengths-based practice with families.

6355—Social Work Practice With Groups (3). Prerequisite: M.S.W. student with second-year status. Advanced course focusing on intervention theories and skills for strengths-based practice with groups.

6356—Social Work Practice with Communities and Organizations (3). Prerequisite: M.S.W. student with second-year status. Advanced course focusing on intervention theories and skills for strengths-based practice with communities and organizations.

6357—Advanced Social Work Research (3). Prerequisite: M.S.W. student with second-year status. Advanced research methods in social work practice with focus on evaluation with systems of all sizes.

6358—Social Welfare Policy Analysis (3). Prerequisite: M.S.W. student with second-year status. Advanced course building policy analysis skills, including concepts and tools used for examination of policy-related social problems in society.

6370—Special Topics in Social Work (3). Prerequisite: Advisor consent. Topical issues in a focused area of social problem or population. Repeatable for credit.

6371—Assessment and Practice Issues in Mental Health (3). Prerequisite: M.S.W. student with second-year status. Issues for systems of all sizes coping with mental health issues. Includes focus on DSM.

6372—Issues in Social Work Supervision and Administration (3). Prerequisite: M.S.W. student with second-year status. Develops skills in supervision and administration in small and large organizations.

6373—Life-Altering Illness and Social Work Practice (3). Prerequisite: M.S.W. student with second-year status. Exploration of issues for systems of all sizes coping with life-altering illness.

6374—Social Work Practice with Veterans and Military Families (3). Prerequisite: M.S.W. student with second-year status. Introduces students to military culture and explores strengths, resources, stressors, and obstacles to well being.

6464—Advanced Field Placement I (4). Prerequisite: M.S.W. student and advisor consent. Supervised practicum using knowledge, skills, and ethics in approved social agency. Pass/fail. Liability insurance required.

6467—Advanced Field Placement II (4). Prerequisite: M.S.W. student and advisor consent; successful completion of SW 6464. Supervised practicum using knowledge, skills, and ethics in approved social agency. Pass/fail. Liability insurance required.

Sociology (SOC)

5101—Professional Socialization (1). Practical issues in sociological research, scholarship, and teaching. Required of first-semester graduate students and teaching assistants through their appointment period. Pass/fail grading. May be repeated for a maximum of 4 hours credit.

5303—Seminar in Contemporary Sociological Theory (3). Study of contemporary approaches to society, including conflict theory, functionalism, symbolic interaction, ethnomethodology, rational choice, emotions, feminist theory, globalization, and postmodern perspectives.

5308—Seminar in the Origins of Social Theory (3). Development of sociological theory in the 19th and early 20th centuries. Topics may vary, but emphasis usually will be on the work of Marx, Durkheim, and Weber.

5311—Seminar in Criminology (3). Critical review of theory and research on selected topics in criminology.

5312—Seminar in Sociology of Education (3). Analysis of the history and structure of education and the social problems it has engendered, with an emphasis on causation and critiques of proposed solutions.

5313—Seminar in Minority Relations (3). American and world patterns of interethnic relations are covered with emphasis on recent and current trends.

5315—Seminar in Social Change (3). Linear and cyclical theories; analysis of the idea of progress, stage theories, dialectical materialism, and the lag hypothesis.

5316—Aging and Social Disparities in Health (3). Theory and research on aging and health issues in later life, covering demographic, sociocultural, economic, individual, and societal factors. Interdisciplinary aspects are stressed.

5320—Social Psychology: Symbolic Interactionism (3). Central ideas of social psychology are analyzed and integrated in a contemporary model of symbolic interactionism.

5325—Seminar in Deviant Behavior (3). Critical review of current theory and research in deviance.

5327—Seminar in Demography (3). Theory and skills of population analysis including use of large data-sets in social science research.

5329—Social Inequality (3). Overview of theories and trends in social inequality in the U.S. and in international context.

5331—Field Research (3). Individual research project off campus, covering entire term or longer. Research plans must be approved in advance by the student's major advisor. May be repeated for credit with permission.

5332—Seminar in Special Topics (3). Selected graduate seminar topics in sociology. Subjects vary. Required at least once of research assistants; open to other students.

5333—Qualitative Methods in Sociology (3). A focus on learning the methods and mindset behind qualitative research in social science, particularly interview, ethnographic, focus group, and content analysis skills.

5334—Quantitative Methods in Sociology (3). Decision making skills (from test selection to inferences from data) for quantitative analysis in sociology.

5335—Seminar in Family Violence (3). Advanced examination of definitions, prevalence, and theories of family violence. Focuses on impact of variation in definitions of family violence and societal responses to family violence.

5336—Seminar in the Family (3). Analysis of how the family institution has changed, in relation to other institutions and society in general and contemporary theory on family formation, structure, and function. Family is treated as both a dependent and independent variable.

5341—Seminar in Homicide (3). A graduate seminar on current types, trends, contexts, and contemporary theories of homicide.

- 5345—Seminar in Women and Crime (3).** Examination of types and trends in women's offending and victimization and contemporary feminist criminological theory.
- 5360—Sociology of Globalization (3).** Examines the accelerated rise of globalization since the 1970s and its effects on individuals, families, communities, society, and the world.
- 5371—Sociology of Terrorist Organizations (3).** Focuses on health and social services provided by terrorist organizations and how they maintain popular support, build legitimacy, and develop experience in governance.
- 5374—Seminar in International Migration (3).** Examines international migration as a social process. Provides sociological tools to understand why immigration and emigration happens, how it occurs and what consequences and outcomes it produces at the places of origin as well as at the places of destination.
- 5381—Seminar in Medical Sociology (3).** Theory and research on conceptions of health, illness, and medical care from the sociological perspective.
- 5384—Seminar in the Sociology of Religion (3).** Examination of the religious institution focusing on its sociological meaning, organizations, presence as a force in western society, and relationship to other social institutions.
- 5393—The Practice of Qualitative Methods (3).** Advanced laboratory class about qualitative methods designed to suit changing student needs. May be repeated once for credit.
- 5394—Seminar in Sociological Research Methods (3).** An examination of the research process including problem formation, case selection, data collection, and data organization.
- 6000—Master's Thesis (VI-6).**
- 6326—Human Societies, Health, and the Environment (3).** Focuses on the relationship between human population and the environment. Students will learn about diverse populations, dynamics of world population, and global environmental systems.
- 6328—Migration and Health (3).** Explores the intersection of migration and health, focusing on how migration processes affect the health of individuals, families, and communities.
- 6340—Seminar in Advanced Qualitative Methods: Content Analysis (3).** Focuses on the advanced methods used to perform qualitative content analysis including techniques to process written, audio, and visual data.
- 6360—Outreach and Engagement in Sociology (3).** Examines the methodological approaches used in the process of community engagement and outreach, with an emphasis on public and applied sociology.
- 6370—Quantitative Methods in Sociology II: Multivariate Analysis (3).** Prerequisite: SOC 5334 or equivalent as determined by the Graduate Director. Prerequisite cannot be taken concurrently. Sequel to the graduate-level introductory statistics course in sociology with an emphasis on multiple regressions.
- 6380—Quantitative Methods in Sociology III: Multilevel and Longitudinal Models (3).** Prerequisite: SOC 5334 or similar course approved by professor interview. Explores multilevel, longitudinal, and survival models appropriate for studying units nested within contexts.
- 6382—Medical Systems (3).** Explores how healthcare systems have developed around the world, how the U.S. medical system works, and the underlying processes and outcomes of healthcare.
- 6393—Writing for Grants and Publication (3).** Familiarizes students with the process and vocabulary of grant writing and publication.
- 6399—Graduate Teaching Practicum (3).** Designed to familiarize students with the teaching philosophies and techniques that are commonly used in a range of undergraduate sociology courses.
- 7000—Research (VI-12).**
- 8000—Sociology Dissertation Hours (VI-12).** Prerequisite: Successful defense of dissertation proposal and completion of qualifying exams. A dissertation will cover the major research project for a degree candidate. A passing dissertation will accumulate twelve credit hours.

Graduate Certificates

Book History and Digital Humanities

This program requires a minimum of 15 hours of courses in English, technical communication, and related fields. These courses typically include study in topics such as history of the book, teaching history of the book, digital humanities, media studies, scholarly editing, document design, and historic letterpress printing. They can also include work in art history, museum studies, and technical communication and rhetoric, among other related fields.

All applicants must apply to the certificate via the Graduate School admission portal. Students currently enrolled in a graduate degree program at

Texas Tech should contact the certificate director before beginning the application process.

- Required (one course from): ENGL 5341, 5346
- Electives: 5340, 5344, 5345, 5348, 5349, 5369, 5375, 5376, 5387, 5388

Contact: Dr. Marta Kvande | marta.kvande@ttu.edu

English Language for Academic and Professional Communication

The Graduate Certificate in English Language for Academic and Professional Communication provides non-native speakers of English the opportunity to develop their spoken and written English communication. This graduate certificate demonstrates to companies and educational institutions in the United States and overseas that non-native English-speaking M.A. and doctoral degree graduates who earn the certificate speak and write English at a level expected for academic and professional purposes.

Contact: Yesim Dollar, certificate advisor | yesim.dollar@ttu.edu

Ethics

The 12-hour Graduate Certificate in Ethics is a useful credential for people in a wide variety of academic, professional, and commercial roles, including students planning on entering the medical and legal professions, teachers (primary, secondary, and college-level) who offer (or are planning to offer) ethics modules in their classes, members of hospital ethics committees, IRB's, social action committees of churches, ethics watchdog committees within corporations, and professionals who are required to confront ethical questions on a regular basis.

Courses required (Must complete four of the following. The other courses listed can apply toward the certificate whenever the specific focus is ethics and only with approval by the Director of Graduate Studies in Philosophy.): PHIL 5320, 5321, 5322, 5301, 5308, 5341, 7000

Contact: Dr. Amy Flowerree | 806.742.3275 | amy.flowerree@ttu.edu

Geographic Information Science and Technology

The 12-hour Graduate Certificate in Geographic Information Science and Technology is designed to provide a flexible solution to professionals and recent graduates who would like to further their education in geospatial technology. GIST 3300, GIST 5300, or equivalent is required as a prerequisite levelling course. For recent graduates, credit will not be applied toward the graduate certificate for equivalent courses taken at the undergraduate level. For students who have already completed one or more of the core requirements and/or electives at the undergraduate level, the graduate certificate requires 12 additional hours.

- Required: GIST 5302, 5304
- Electives (choose two from): GIST 5301, 5310, 5312, 5316, 5322; GEOG 5335; GEOL 5341, 5351; NRM 6305

Contact: Dr. Jeff Lee | 806.834.8228 | jeff.lee@ttu.edu

Grants and Proposals

Online certificate designed to help individuals build their credentials in technical communication with a focus on professional grant and proposal writing. Students in this program will augment their writing and editing skills, learn strategies for composing professional grant proposals, and earn professional credentials from Texas Tech's world-class Technical Communication and Rhetoric program. Students completing G&P certification will gain real-world writing and editing experience.

The certificate requires five (5) courses for fifteen (15) hours to be completed, ideally in two years or less. Required courses are ENGL 5391, 5393, 5379, and 5374. Choose one applied theory course: ENGL 5363, 5371, 5372, 5375, 5376, 5377, 5382, 5384, 5386, 5387, or 5390 to complete the certificate requirements. Substitutions may be allowed with the DGS approval.

Contact: Dr. Beau Pihlaja | english.tcr@ttu.edu

Linguistics

This program comprises a minimum of 12 hours in linguistics courses. It usually includes study in phonology, syntax, and semantics, but flexibility is essential in meeting the diverse backgrounds, motivations, and goals of the students.

Provides a meaningful and internally coherent course of study of language and linguistics to match the background, interests, and needs of the individual student.

Courses required: 12 hours of linguistics coursework as approved by the Director of Linguistics.

Contact: Dr. Aaron Braver | 806.742.2501 | aaron.braver@ttu.edu

Mathematics

The Graduate Certificate in Mathematics is an 18-hour certificate designed for anyone with a master's or doctoral degree (in any field) who wants to increase mastery of mathematics. Students may complete any 18 hours of graduate courses with approval of the graduate director and usually chosen from the online offerings MATH 5364 through MATH 5378, which are designed for in-service teachers who desire to teach dual credit in high school or teach at a junior college. It is preferred, but not required, that applicants hold a bachelor's degree in mathematics.

Contact: Dr. David Cannon | david.cannon@ttu.edu

Medieval and Renaissance Studies

The 18-hour Graduate Certificate in Medieval and Renaissance Studies enables students whose study and research relate to Medieval and Renaissance materials to obtain an interdisciplinary certificate that will give them an advantage for positions in the field. The certificate will be of particular interest to students working toward a master's or doctoral degree in art history, classics, English, romance languages, German, history, music, or architecture.

- Required: MRST 5301
- Electives (choose 15 hours from): CLAS 5311, 5350; GERM 5314; ITAL 5301; SPAN 5345, 5361, 5362; ENGL 5301, 5303, 5304, 5305, 5334, 5364; HIST 5341, 5342, 5351, 5366; ARTH 5305, 5320, 5340; MUHL 5320, 5322, 5331 (Medieval), 5331 (Renaissance); THA 5325, 5333; MRST 7000; or other classes with approval from the MRST advisors.

Note: No more than nine of the eighteen hours may be taken in a single academic discipline.

Contact: Dr. Julie Nelson Couch | julie.couch@ttu.edu

Graduate Course Descriptions

Medieval and Renaissance Studies (MRST)

5301—Medieval and Renaissance Methods (3). Introduction to the scholarship of medieval and Renaissance studies. Focuses on interdisciplinary perspectives and Texas Tech resources for medieval and Renaissance studies.

7000—Research (V1-12). Faculty-directed research addressing medieval and Renaissance topics from an interdisciplinary perspective; may involve library archive and museum sources, including venues in Europe.

Psychological Methods and Analysis

This graduate certificate can supplement master's and doctoral students' methodological and statistical training—an objective that is increasingly essential for psychologists and those in related disciplines, not only for the purposes of acquiring knowledge that allows them to be informed scientific consumers but also for understanding and interpreting empirical findings. Additional training in psychological methods may also serve to increase the job prospects and marketability of graduates from the program.

Additional details regarding the certificate can be found at the Psychological Sciences Resources webpage at www.psychology.ttu.edu.

Strategic Studies

The Department of Political Science offers a 15-hour Graduate Certificate in Strategic Studies. Prepares students to fill the need for officials who can deal with strategic responsibilities in all branches of federal government, in the armed forces of the United States as well as state and local governments.

- Required: IPAC 5300, 5306, 5307
- Elective: POLS 5360, 5361, 5363, 5365, 5367, 5369, 5384; HIST 5308, 5322, 5323, 5326, 5328, 5329, 5330, 5331, 5632, 5344, 5345, 5350, 5356, 5361; LAW 6342

Contact: Ron Milam | 806.742.3744 | ron.milam@ttu.edu

Teaching Technical Communication

Online and onsite certificate designed for individuals needing specialized instruction in how to teach technical communication and for individuals seeking to retool their English degrees to develop teaching expertise in technical communication.

The certificate requires five (5) courses for fifteen (15) hours to be completed ideally in two years or less. Required courses are ENGL 5371, 5366, 5361 or 5364. Choose one theory course: ENGL 5365, 5368, 5369, 5377, 5382, 5384, 5385, 5386, or 5381. Choose one applied course: ENGL 5372, 5373, 5374, 5375, 5376, 5377, 5378, 5387, or 5388 to complete the certificate requirements. Substitutions may be allowed with DGS approval.

Contact: Dr. Beau Pihlaja | english.tcr@ttu.edu

Vector-Borne Diseases

Upon completion of this 12-credit graduate certificate program, individuals will acquire a robust knowledge base in entomology, vector biology, and the effective management of vector-borne diseases. This comprehensive preparation positions graduates as formidable candidates in diverse professional arenas, including public health, vector control, and entomology. Prospective students are encouraged to possess a background in biology or a related field, and specific course prerequisites may be applicable. The duration of the program will vary based on course availability and individual interests, with the expectation that students will successfully complete the certificate requirements within two semesters.

- Core Courses (6 hours, Choose two courses from:): BIOL 5313, 5326, 6301
- Electives (6 hours, Choose two courses from:): BIOL 6309, 6311, 7000; PSS 5307, ZOOL 5421

About the College

The Jerry S. Rawls College of Business offers educational programs in all areas of business while advancing knowledge through research, providing community service, and supporting development of business in the global economy. AACSB International, the national accrediting organization for business and management programs, fully accredits the baccalaureate and master's programs in business administration and accounting.

Degree Programs

The college offers programs leading to the following degrees and certificates:

- Bachelor of Business Administration in Accounting
- Bachelor of Business Administration in Energy Commerce
- Bachelor of Business Administration in Finance
- Bachelor of Business Administration in General Business
 - Construction Management Concentration
- Bachelor of Business Administration in Information Technology
- Bachelor of Business Administration in Management
- Bachelor of Business Administration in Marketing
- Bachelor of Business Administration in Supply Chain Management
- Master of Business Administration (On-Site | Online)
 - Professional Master of Business Administration
 - STEM Master of Business Administration
- Master of Science in Data Science (On-Site | Online)
- Master of Science in Marketing Research and Analytics
- Master of Science in Accounting
- Master of Science in Finance
- Doctor of Philosophy in Business Administration

Accelerated Degree Programs

- Bachelor of Business Administration in Accounting /
Master of Science in Accounting
- Bachelor of Business Administration in Finance /
Master of Science in Finance

Dual Degree Programs

- Bachelor of Business Administration /
Bachelor of Science in Architecture
- Bachelor of Business Administration /
Bachelor of Science in Agricultural and Applied Economics
- Master of Business Administration / Master of Architecture
- Master of Business Administration /
Master of Science in Biotechnology
- Master of Business Administration /
Master of Science in Environmental Toxicology
- Master of Business Administration / Doctor of Medicine
- Master of Business Administration / Doctor of Jurisprudence
- Master of Business Administration / Doctor of Pharmacy
- Master of Business Administration /
Doctor of Philosophy in Biomedical Sciences
- Master of Science in Accounting / Doctor of Jurisprudence

Undergraduate Certificates

- Undergraduate Certificate in Accounting
- Undergraduate Certificate in Commercial Banking
- Undergraduate Certificate in Commercial Real Estate
- Undergraduate Certificate in Data Analytics
- Undergraduate Certificate in Energy
- Undergraduate Certificate in Finance
- Undergraduate Certificate in Information Technology
- Undergraduate Certificate in International Business
- Undergraduate Certificate in Leadership
- Undergraduate Certificate in Sales
and Customer Relationship Management
- Undergraduate Certificate in Sustainable Energy
for Business Professionals

Graduate Certificates

- Graduate Certificate in Business Analytics
- Graduate Certificate in Essentials of Business

Graduate Minors

- Graduate Minor in Business
- Graduate Minor in Advanced Research Methods in Business

Undergraduate Program

General Standards and Requirements

Catalog Selection. Students will use the catalog issued for the year in which they were first officially admitted to the Rawls College of Business or a more recent catalog if approved. However, if they later transfer to another institution or another college at Texas Tech, they will use the catalog in effect when they are readmitted to the Rawls College of Business. For these purposes, a catalog expires after seven years.

Course Load. The normal course load for a semester is 15 to 19 hours. The maximum load for a semester is 19 hours (8 hours for a summer term). Distance education courses are included in a student's course load. The maximum course load for students on probation is 16 hours.

Course Restrictions. All undergraduate business courses are restricted to students admitted to the Rawls College of Business unless otherwise stated in the course description.

Course Prerequisites. Prerequisites are governed by the catalog in effect when the course is taken. All prerequisites must be satisfied for course enrollment.

GPA Requirement. Students are required to maintain a minimum cumulative 2.75 Texas Tech GPA to progress through their business major. If a student falls below the required GPA twice during their academic time it may result in a mandatory transfer to another college at Texas Tech.

Grades of Incomplete. A grade of I (incomplete) must be removed at Texas Tech University within one academic year. It may not be removed by transfer credit.

Ineligible Registrations. The Rawls College of Business reserves the right to drop any ineligibly registered student from a course for reasons such as lower division/upper division rule infractions and lack of prerequisites, including required GPAs. Courses taken ineligibly are not used in the degree program.

Laptop Computers. Students should be aware that laptop computers are required. Minimum specifications are available at:
<https://www.depts.ttu.edu/ithelpcentral/recommend/>.

Nondegree Students. All prerequisites and academic regulations based on GPA, such as probation and suspension, apply to nondegree students.

Courses taken while in the nondegree status may not be used as part of a degree program.

Pass/Fail. Only free electives are eligible for the pass/fail option.

Probation and Suspension. See the Academic Requirements catalog section concerning probation and suspension policies.

Mathematics Requirement. A mathematics course must be taken every semester until the requirement is fulfilled. Both MATH 1330 and MATH 1331 must be completed with grades of C or higher before taking some of the required sophomore business courses.

Foreign Language Requirement. Any student who is admitted to the university without two years of high school credit (8th through 12th grades) in the same foreign language must complete two semesters of a single foreign language in college. The college-level foreign language courses will replace free electives in the degree program.

Second Undergraduate Degree. No second bachelor's degree is conferred until the candidate has completed at least 24 semester hours (exclusive of credit by exam) after admission for the second degree. Students must be approved by the Undergraduate Services Center to seek a second degree and have at least a 2.75 GPA in their first degree.

Study Abroad. Students wishing to study abroad in business programs must have a minimum 2.75 Texas Tech GPA. Please check with the Center for Global Engagement for specific program requirements.

Transfer Work. Coursework taken at other institutions must be approved by a Rawls College undergraduate advisor prior to enrollment. Credit from other institutions is not calculated into the student's Texas Tech GPA.

Honors College for Business Majors. Students from all areas of the Rawls College of Business may enter the Honors College. Students with high grade point averages are encouraged to apply for admittance into this prestigious program. Honors sections are offered in several business courses.

Multiple Majors. Students who wish to pursue two or more majors within the Rawls College must take a minimum of 4 additional courses for each additional major.

Graduation Requirements

The Bachelor of Business Administration degree will be awarded to all students who fulfill the following minimum requirements:

- Satisfactory completion of all courses and minimum hours and grades as required for each major.
- A minimum Texas Tech 2.0 GPA.
- Completion of the last 30 hours following admission into a declared major in the Rawls College of Business.
- Completion of at least 40 hours of upper-division coursework.

Intent to Graduate. At least one year before the proposed graduation date, an intent to graduate must be filed through the Undergraduate Services Center. Graduation is attained by fulfilling the requirements for a B.B.A. degree using an eligible catalog edition. It is the student's responsibility to fulfill all catalog requirements.

Admission of Transfer Students

Students planning to take their first two years of work at a junior or community college should follow the lower-division degree plan. A maximum of 72 hours can be accepted provided none of the courses are vocational, workforce education, career, or upper-division courses.

Courses that are acceptable from a four-year institution are the lower-division requirements, free electives, and the following upper-division core: BLAW 3391, FIN 3320, ISQS 3344, MGT 3370, and MKT 3350. The last 30 hours must be taken while registered in the Rawls College of Business.

Students transferring from another institution must have MATH 1331 (Introductory Mathematical Analysis II) or MATH 1451 (Calculus I) with a grade of C or better and at least 15 completed credit hours with a minimum 2.75 GPA. Transfer credit is not used in the calculation of a student's Texas Tech grade point average. The Rawls College of Business has the authority for determining which transfer courses apply toward a B.B.A. degree program. Only free electives will be accepted as pass/fail. Official transcripts from all institutions are needed before the acceptance of transfer credit.

Students requesting permission to transfer from another college at Texas Tech must have MATH 1331 (Introductory Mathematical Analysis II) or MATH 1451 (Calculus I) with a grade of C or better and at least 15 completed credit hours with a minimum 2.75 GPA. A student is officially admitted to the college by a formal transfer completed by the Undergraduate Services Center. No business administration minor course can be used in place of a major requirement.

The last 30 hours prior to graduation must be taken while enrolled in the Rawls College of Business.

Undergraduate Services Center

Each undergraduate student in the college is provided with an academic advisor located in the Undergraduate Services Center. Advisors have the expertise and capability to provide the necessary guidance during each student's degree program and are aided by a computerized degree audit.

Upper-division students should maintain contact with their designated major advisor in the Undergraduate Services Center concerning degree requirements along with faculty advisors for help in selecting courses to achieve career objectives.

Division of Curriculum

Lower Division. The Rawls College of Business curriculum consists of two parts: a lower division and an upper division. The lower-division requirements should be completed during the freshman and sophomore years. The following table summarizes the courses schedule for lower-division students.

Bachelor of Business Administration, B.B.A. Recommended Lower-Division Curriculum for All Majors

FIRST YEAR

Fall

- ☐ BA 1301 - Foundations of Business (3 SCH)
- ☐ BA 2140 - Microsoft Excel for Business (1 SCH)
- ☐ MATH 1330 - Introductory Mathematical Analysis I (3 SCH)
- ☐ ENGL 1301 - Essentials of College Rhetoric (3 SCH)
- ☐ HIST 2300 - History of the United States to 1877 (3 SCH)
(Does not require a grade of C or higher.)
- ☐ Creative Arts (3 SCH)
(Does not require a grade of C or higher.)

TOTAL: 16

Spring

- ☐ MATH 2345 - Introduction to Statistics with Application to Business (3 SCH)
- ☐ ENGL 1302 - Advanced College Rhetoric (3 SCH)
- ☐ HIST 2301 - History of the United States since 1877 (3 SCH)
- ☐ Life and Physical Sciences (4 SCH)*
(Does not require a grade of C or higher. ENCO majors must take GEOL 1303 and GEOL 1101.)
- ☐ ISQS 2377 - Decision Making in Business (3 SCH)

TOTAL: 16

SECOND YEAR

Fall

- ☐ ACCT 2300 - Financial Accounting (3 SCH)
(Accounting and finance majors must achieve A or B.)
- ☐ ISQS 2340 - Introduction to Information Technology (3 SCH)
- ☐ Life and Physical Sciences (4 SCH)* (Does not require a grade of C or higher.)
- ☐ Language, Philosophy, & Culture (3 SCH)* (Does not require a grade of C or higher.)
- ☐ POLS 1301 - American Government (3 SCH) (Does not require a grade of C or higher.)

TOTAL: 16

Spring

- ☐ ACCT 2301 - Managerial Accounting (3 SCH)
(Accounting majors must achieve A or B.)
- ☐ ECO 2301 - Principles of Economics I (3 SCH)
- ☐ POLS 2306 - Texas Politics and Topics (3 SCH)
(Does not require a grade of C or higher.)
- ☐ MCOM 2310 - Business and Professional Communication (3 SCH)
- ☐ Elective (3 SCH) (Does not require a grade of C or higher.)

TOTAL: 15

* Choose from core curriculum requirements. Life and Physical Sciences must include both a lecture and a lab.

- Students wanting to pursue the Accelerated Bachelor's-to-Masters 150-hour program should take ACCT 1301 and ACCT 3304 spring of second year.
- Students wanting to major in Finance should take FIN 3320 spring of second year.
- Students wanting to major in Information Technology should take ISQS 3345 and ISQS 3348 in the spring of second year.

General Business, B.B.A.

The Bachelor of Business Administration with a major in General Business is strictly designed for a dual degree student. Only students whose primary major is outside of the Rawls College of Business can declare General Business as a secondary program of study. Note: This excludes students that declare General Business Construction Management concentration.

The lower-division requirements for this major should be completed during the freshman and sophomore years. Refer to the previous page for those requirements.

Recommended Upper-Division Curriculum

THIRD YEAR

Fall

- ☐ BECO 3310 - Applied Business Economics (3 SCH)
- ☐ FIN 3320 - Financial Management (3 SCH)
- ☐ SCM 3353 - Supply Chain and Operations Management (3 SCH)
- ☐ MGT 3370 - Managing People and Organizations (3 SCH)
- ☐ MKT 3350 - Marketing for a Global Marketplace (3 SCH)

TOTAL: 15

Spring

- ☐ BLAW 3391 - Business Law I (3 SCH)
- ☐ PCOM 3373 - Business Communication (3 SCH)
- ☐ Major Courses (9 SCH)

TOTAL: 15

FOURTH YEAR

Fall

- ☐ Major Courses (9 SCH)
- ☐ Electives (6 SCH)

TOTAL: 15

Spring

- ☐ MGT 4380 - Strategic Management (3 SCH)
- ☐ Major Courses (3 SCH)
- ☐ Electives (6 SCH)

TOTAL: 12

TOTAL HOURS: 120

Major Courses: Choose 21 hours from at least three of the following areas if not used to fulfill another requirement: ACCT, FIN, ISQS, MGT, MKT. At least 9 hours must be senior-level courses. Be aware that some senior level courses will most likely have prerequisites. Please refer to course descriptions.

Electives: These are the only courses not requiring a grade of C or higher. Elective hours may vary to meet 120-hour requirement.

General Business, B.B.A.

(Construction Management Concentration)

The Bachelor of Business Administration with a major in General Business is strictly designed for a dual degree student. Only students whose primary major is outside of the Rawls College of Business can declare General Business as a secondary program of study. Note: This excludes students that declare General Business Construction Management concentration.

The lower-division requirements for this major should be completed during the freshman and sophomore years. Refer to the previous page for those requirements.

REQUIRED COURSES:

- ☐ BECO 3310 - Applied Business Economics (3 SCH)
- ☐ MGT 3390 - Creating Value in a Changing World (3 SCH)
- ☐ FIN 3332 - Real Estate Fundamentals (3 SCH)
- ☐ MKT 3356 - Marketing Research and Analysis (3 SCH)

21 HOURS OF UPPER-DIVISION CORE

- ☐ BLAW 3391 - Business Law and Ethics (3 SCH)
- ☐ PCOM 3373 - Applied Workplace Communication (3 SCH)
- ☐ FIN 3320 - Financial Management (3 SCH)
- ☐ SCM 3353 - Supply Chain and Operations Management (3 SCH)
- ☐ MGT 3370 - Managing People and Organizations (3 SCH)
- ☐ MGT 4380 - Strategic Management (3 SCH)
- ☐ MKT 3350 - Marketing for a Global Marketplace (3 SCH)

Choose two of the following:

- ☐ FIN 3393 - Real Estate Law (3 SCH)
- ☐ FIN 3334 - Real Estate Finance (3 SCH)
- ☐ FIN 4333 - Real Estate Valuation (3 SCH)
- ☐ FIN 4382 - Internship in Finance (3 SCH)
- ☐ CONE 2302 - Surveying (3 SCH)

With construction engineering minor:

- ☐ CONE 1100 - Introduction to Construction (1 SCH)
- ☐ CONE 2200 - Construction Methods & Drawings (2 SCH)
- ☐ CONE 2302 - Surveying (3 SCH)
- ☐ CONE 4300 - Construction Safety (3 SCH)
- ☐ CONE 4320 - Construction Cost Estimating (3 SCH)
- ☐ CONE 4322 - Construction Management (3 SCH)
- ☐ CONE 4324 - Construction Contracts and Specifications (3 SCH)

Upper Division. Admission to the lower-division RCOBA designation does not assure admission to any upper-division major in the Rawls College of Business. Students can only apply for majors in effect at the time the application is made. Students must meet the requirements in effect at the time of the application. Junior- and senior-level business and economics courses may be taken upon admission to the upper division of the college. Note that the minimum GPA for any major may increase due to limited space availability. All lower-division coursework must be completed prior to enrollment in any major course. This includes lower-division business core courses and university requirements. Upper-division requirements for each major are discussed in the following sections.

Communication Literacy Requirement. Communication Literacy courses for the General Business, B.B.A. include: ISQS 3344, MCOM 2310, MGT 4380, and PCOM 3373.

Undergraduate Dual Degrees

B.B.A. and B.S. in Architecture. This dual degree program is designed to provide a broad background for a variety of careers in business, government, architecture, and building-related industries with emphasis on developing analytical tools and skills with managerial perspectives, thereby enhancing worldwide career opportunities. See the Huckabee College of Architecture section of this catalog for a full program outline. A 2.75 Texas Tech GPA is required.

B.B.A. and B.S. in Agricultural and Applied Economics. This dual program leads to two degrees: a Bachelor of Business Administration with a major in General Business and a Bachelor of Science with a major in Agricultural and Applied Economics. Students completing these dual degree programs will have increased understanding of business management principles, concepts, and analytical abilities as applied to agribusiness. See the Davis College of Agricultural Sciences & Natural Resources section for a full discussion of the program. A 2.75 Texas Tech GPA is required.

General Business, Undergraduate Minor

The Rawls College of Business offers one minor for non-business students. The requirements are as follows:

- Must have a minimum 2.0 Texas Tech GPA.
- Transfer students without a Texas Tech GPA must have a minimum 2.0 transfer GPA.
- All prerequisites must be met prior to taking each course.
- A minimum grade of C is needed to complete minor requirements.
- All business courses must be taken at Texas Tech University unless approved by minor advisor.
- Courses can be completed online.

Course Requirements for Minor: 18 hours

- BA 3301 (Prerequisite: min. 2.0 GPA)
- BA 3302 (Prerequisite: min. 2.0 GPA)
- BA 3303 (Prerequisite: min. 2.0 GPA and BA 3302)
- BA 3304 (Prerequisite: min. 2.0 GPA)
- BA 3305 (Prerequisite: min. 2.0 GPA)
- BA 3306 (Prerequisite: min. 2.0 GPA)

Graduate Programs

For information on graduate programs offered by the Rawls College of Business, visit the Graduate Programs section of the catalog on page 255.

Undergraduate Course Descriptions

Business Administration (BA)

1101—Fundamentals of Business Professionalism (1). Prerequisites: Must be taken in the first year as a COBA student; 2.75 TTU GPA. Integration of fundamental business principles from multiple disciplines and concepts of business professionalism and ethical behavior.

1301—Foundations of Business (3). Provides students with a basic understanding of how the various areas of business (accounting, finance, management, marketing, and supply chain management) work together in a company to help it cope with the business environment.

- 2140—Microsoft Excel for Business (1).** Self-paced course focusing on Microsoft Excel skills required for business.
- 3010—Business Law Basics (V1-3).** Prerequisite: Admission to the Rawls Summer Business Institute. Provides students with an understanding of the fundamentals of law as they relate to the general business environment.
- 3011—Accounting Basics (V1-3).** Prerequisite: Acceptance into the Rawls Summer Business Institute. Aims to build and solidify one's knowledge of the fundamentals of accounting that are vital for understanding business practices.
- 3012—Business Economics Basics (V1-3).** Prerequisite: Acceptance into the Rawls Summer Business Institute. Provides students with an understanding of how businesses use economic analysis to make business decisions.
- 3013—Finance Basics (V1-3).** Prerequisite: Admission to the Rawls Summer Business Institute. Covers business financial decisions including financing, investing, risk and statement analysis.
- 3014—Information Technology Basics (V1-3).** Prerequisite: Admission to the Rawls Summer Business Institute. Examines the impact of information technology and data on business. Covers roles of IT personnel, current technologies and the importance of security measures and policies.
- 3015—Management Basics (V1-3).** Prerequisite: Acceptance into the Rawls Summer Business Institute. Examines the various perspectives of managing organizations including the basic management function of creating value while effectively managing people.
- 3016—Marketing Basics (V1-3).** Focuses on marketing as it directs the organization's resources to satisfy customers' wants and needs at a reasonable profit to the organization.
- 3017—Operations Management Basics (V1-3).** Prerequisite: Admission to the Rawls Summer Business Institute. Teaches the importance of how scientific and technological developments in operations management affect society, the environment, and organizational improvement.
- 3018—Supply Chain Management Basics (V1-3).** Prerequisite: Admission to the Rawls Summer Business Institute. An introduction to principles and best practices in supply chain management (SCM) in the modern business world.
- 3019—Business Strategy Basics (V1-3).** Prerequisite: Acceptance into the Rawls Summer Business Institute. An integrative course focusing on an organization's pursuit of superior economic performance by deciding what business to be in and how to compete.
- 3301—Fundamentals of Marketing (3).** Prerequisites: Minimum cumulative 2.0 Texas Tech GPA. Focuses on the process of marketing products and services to consumers. Topics include marketing structures and agencies; motives and buying habits; types of middlemen, marketing institutions, and channels; current marketing practices; marketing of industrial and consumer goods. May not be used to satisfy business major degree requirements.
- 3302—Financial and Managerial Accounting (3).** Prerequisite: Minimum cumulative 2.0 Texas Tech GPA. Concepts and terminology of accounting and financial reporting for modern business enterprises and the relationships between accounting information and business activities. Additionally, the course covers uses of accounting information for planning decisions about products and services, activities and processes, suppliers and customers, organizational subunits, and time periods as these relate to organizations in changing environments. May not be used to satisfy business major degree requirements.
- 3303—Foundations of Finance (3).** Prerequisites: Minimum cumulative 2.0 Texas Tech GPA and BA 3302. Basic finance survey course for non-business majors. Covers financial markets, investment banking process, interest rates, time value of money, and security valuation. May not be used to satisfy business major degree requirements.
- 3304—Operations Management (3).** Prerequisite: Minimum cumulative 2.0 Texas Tech GPA. Focuses on the formulation of business and operational strategies, how products and services are designed, and how products and services are produced. May not be used to satisfy business major degree requirements.
- 3305—Organization Management (3).** Prerequisite: minimum cumulative 2.0 Texas Tech GPA. Focuses on the management of people and organizations. Topics include leadership; team building; motivation groups; organizational design, and personnel management. May not be used to satisfy business major degree requirements.
- 3306—Fundamentals of Business Economics (3).** Prerequisite: minimum cumulative 2.0 Texas Tech GPA. Provides an understanding of how economic analysis is applied to business decisions and strategy. May not be used to satisfy business major degree requirements.
- 4000—Directed Experience (V1-6).** Prerequisites: Instructor consent; 2.75 TTU GPA. Enhance the student's classroom knowledge through internships, projects in the workplace, mentoring experiences, and other approved experiences.
- 4100—Seminar in Business Leadership (1).** For upper-level students from all disciplines. Provides students with insights into leadership, problem solving and organization skills, communication skills, ethics, and negotiation. Pass/fail.
- 4101—Rawls Business Leaders Seminar I (1).** Prerequisites: Admission to Rawls Leadership Program; 2.75 TTU GPA. Focuses on guiding students to self-examine their leadership skills and identify their strengths and weaknesses.
- 4102—Rawls Business Leaders Seminar II (1).** Prerequisites: BA 4101 and Admission to Rawls Leadership Program; 2.75 TTU GPA. Guides students to formulate a personal development plan to enhance their leadership skills, particularly through the use of service learning projects and advanced leadership assessments.
- 4182—Business Administration Internship (1).** Prerequisites: Consent of instructor; 2.75 TTU GPA. Enhance the student's knowledge within fields of business specialization through application of concepts, principles, and techniques learned in the classroom.
- 4381—Individual Problems in Business Administration (3).** Prerequisites: Senior standing, 3.0 GPA in major, minimum cumulative 2.75 TTU GPA, and written consent of instructor prior to registration. Independent problem research under guidance of a faculty member. Student should register for section appropriate to the academic area in which the work will be done.
- 4382—Internship in Business Administration (3).** Prerequisites: At least 6 hours of professional courses (excluding core courses) to be determined by the area faculty; other minimum standards determined by area; written approval form contains specific requirements for participation; 2.75 TTU GPA. Permits students to enhance their knowledge within their field of specialization through application of concepts, principles, and techniques learned in the classroom. A maximum of 3 hours may be earned (with approval by faculty internship advisor prior to employment) by internships toward a degree program.
- 4383—Special Topics in Business (3).** Prerequisites: Determined by area; 2.75 TTU GPA. May be repeated once for credit by faculty approval only with no duplication of topic.
- 4384—Volunteer Income Tax Assistance (3).** Prerequisite: ACCT 3307 or equivalent. Service learning course designed to teach students about income tax through hands-on training assisting others in the community with income tax return preparation.

Health Organization Management (HOM)

- 4371—Health Organization Management (3).** Prerequisites: Junior/senior standing. Designed to provide an overview of the health care system and its managerial, social, behavioral, and economic aspects from an organizational viewpoint.

International Business (IB)

- 3101—Global Learning Strategies (1).** Prerequisite: 2.75 TTU GPA. Focuses on a student-centered learning approach and provides a series of exercises and reflections designed to help students recognize, develop, strengthen, and articulate their international experiences.
- 3105—Cross-Cultural Management Skills (1).** Prerequisite: Consent of instructor. Overview of essential management skills for successful international business enterprises. Includes cross-cultural business techniques, topics, current issues, and theories.
- 4361—International Commerce (3).** Prerequisites: MKT 3350 and MKT 4358 with a C or better; 2.75 TTU GPA. Develops a basic understanding of international trade as well as importing and exporting and the associated government regulations.
- 4382—Internship in International Business (3).** Prerequisite: Consent of instructor. Permits students to enhance their knowledge within their field of specialization through application of concepts, principles, and techniques learned in the classroom.
- 4383—Special Topics in International Business (3).** Prerequisite: Consent of instructor. Examines specialized problems relating to international business such as exporting, international trade, etc. May be repeated once for credit as topic varies.

About the School

The Lyons School of Accounting supervises the following degree and certificate programs:

- Bachelor of Business Administration in Accounting
- Undergraduate Certificate in Accounting
- Master of Science in Accounting

Dual Degree Program

- Master of Science in Accounting / Doctor of Jurisprudence

Undergraduate Programs

Accounting, B.B.A.

The primary objective of the undergraduate accounting program is to prepare students for accounting positions at the entry level in industry, government, and other organizations in the public and private sectors. A major in accounting is also excellent preparation for law school or graduate school. A 2.75 Texas Tech GPA and an A or B in ACCT 2300 and 2301 are required to declare accounting as a major. **Students should be aware that the undergraduate degree in accounting will not prepare them to sit for the CPA examination.** The requirements to take the CPA examination in Texas include a bachelor's degree, 30 hours of accounting beyond introductory courses, a minimum of 150 total hours, and a 3-hour approved course in ethics. The B.B.A. in accounting includes 18 hours of accounting beyond introductory. Accounting majors must also take ACCT 3101 during the fall of their junior year, prior to taking ACCT 3305. Students who plan to take the CPA exam are encouraged to apply to the 150-hour M.S.A. program.

Communication Literacy Requirement. MCOM 2310; PCOM 3373; ISQS 3344; ENGL 3365; and ACCT 4300 and ACCT 4301.

Accounting, Undergraduate Certificate

Designed for business students who are not majoring in accounting but would like to become versed in "the language of business," the Certificate in Accounting provides a broad base of accounting knowledge. Through the four required courses, students will become familiar with financial reporting for investors and creditors, budgeting and performance evaluation, and federal income taxation. Required courses for this certificate are ACCT 3304, ACCT 3305, ACCT 3306, ACCT 3307. Other requirements are as follows:

1. Completion of Lower Division Business requirements.
2. Completion of ACCT 2300 and ACCT 2301 with a B or better.

Accounting, B.B.A.

Recommended Upper-Division Curriculum

THIRD YEAR

Fall

- ❑ ACCT 3305 - Intermediate Accounting II (3 SCH)
- ❑ ACCT 3307 - Income Tax Accounting (3 SCH)
- ❑ PCOM 3373 - Applied Workplace Communication (3 SCH)
- ❑ BECO 3310 - Applied Business Economics (3 SCH)
- ❑ SCM 3353 - Supply Chain Operations Management (3 SCH)

TOTAL: 15

Spring

- ❑ ACCT 3306 - Cost Profit Analysis in Managerial Accounting (3 SCH)
- ❑ ACCT 4300 - Accounting Information Systems (3 SCH)
- ❑ FIN 3320 - Financial Management (3 SCH)
- ❑ MKT 3350 - Marketing for a Global Marketplace (3 SCH)

TOTAL: 12

FOURTH YEAR

Fall

- ❑ ACCT 4301 - Principles of Auditing (3 SCH)
- ❑ BLAW 3391 - Business Law I (3 SCH)
- ❑ ENGL 3365 - Professional Report Writing (3 SCH)
- ❑ MGT 3370 - Managing People and Organizations (3 SCH)

TOTAL: 12

Spring

- ❑ MGT 4380 - Strategic Management (3 SCH)
- ❑ Electives*† (11 SCH)

TOTAL: 14

TOTAL HOURS: 120

* These courses do not require a grade of C or higher.

† Students going into the 150-hour program will have 18 hours of major courses and 8 hours of non-accounting electives. Elective hours may be adjusted to meet minimum hour requirement of 120.

Accelerated Bachelor's-to-Master's Program

The 150-hour program is designed to allow students to complete both the B.B.A. and M.S.A. degrees in five years. To meet this goal, students are encouraged to take ACCT 3304 and ACCT 3101 spring of second year and must have completed 102 hours toward the B.B.A. prior to beginning the fall semester of the fourth year. Students meeting that standard will then typically schedule the fourth year as follows:

Note: Remaining undergraduate courses will be integrated into the schedule during the fifth year. Students will work with their graduate faculty accounting advisor to determine their fifth year schedule.

FOURTH YEAR

Fall

- ❑ Undergraduate Courses (3-6 SCH)
- ❑ Graduate Courses (6-9 SCH)

Spring

- ❑ Internship (3 SCH)
- ❑ Graduate Courses (6 SCH)

3. All prerequisites must be met prior to taking each course.
4. All courses must be taken in residence.

Accelerated Bachelor's to Master's Degree

Accounting, B.B.A. / Accounting, M.S.A.

Undergraduate B.B.A. students may apply during their junior year for admission to the Master of Science in Accounting accelerated bachelor's-to-master's program. The accelerated program is designed for academically outstanding undergraduate students who wish to complete a master's degree while at Texas Tech. Those students accepted into the program will begin taking graduate courses during their senior year.

The accelerated B.B.A. / M.S.A. program is designed to allow students to complete both the B.B.A. and M.S.A. degrees in five years. Students will work with their graduate advisor to determine their fifth-year schedule.

Undergraduate Course Descriptions

Accounting (ACCT)

- 2300—Financial Accounting (3).** [ACCT2301, 2401] Prerequisites: C or better in BA 2140 and any college-level mathematics course; 2.75 TTU GPA. Concepts and terminology of accounting and financial reporting for modern business enterprises and the relationships between accounting information and business activities. Must make an A or B to declare accounting or finance as a major.
- 2301—Managerial Accounting (3).** [ACCT2302, 2402] Prerequisites: minimum cumulative 2.75 TTU GPA; COBA and AGBS majors only; C or better in ACCT 2300. Uses of accounting information for planning decisions about products and services, activities and processes, suppliers and customers, organizational subunits, and time periods as these relate to organizations in changing environments. Must make A or B to declare accounting major.
- 3101—Seminar in Professional Practice (1).** Prerequisite: 2.75 TTU GPA. Structure of the accounting profession, requirements for certification, qualification for and preparation for professional practice in industry, government, and/or public accounting. Must complete before participating in "Meet the Firms." F.
- 3304—Intermediate Accounting I (3).** Prerequisites: Minimum overall 2.75 TTU GPA and a B or better in ACCT 2300. Net income concepts, corporations, current assets, and investments. Must make A or B to declare accounting major.
- 3305—Intermediate Accounting II (3).** Prerequisites: C or better in ACCT 3304; 2.75 TTU GPA. Fixed assets, liabilities and reserves, interpretation and analysis of financial statements, application of funds, cash flow statement, reorganizations, and price level impact on financial statements.
- 3306—Cost Profit Analysis in Managerial Accounting (3).** Prerequisites: Minimum overall 2.75 TTU GPA and a B or better in ACCT 2301. Covers traditional topics in managerial and cost accounting and provides hands-on experience with emerging technologies for analyzing cost and profit across products, services, and stakeholders.
- 3307—Income Tax Accounting (3).** Prerequisites: Minimum overall 2.75 TTU GPA and a B or better in ACCT 2300. A study in detail of certain provisions of the Internal Revenue Code, combined with elementary tax planning in business and individual transactions.
- 4300—Accounting Information Systems (3).** Prerequisites: B or better in ACCT 3304 and C or better in ISQS 2340 and BA 2140; 2.75 TTU GPA. The theories, procedures, and techniques of accounting information systems for organizations. (CL)
- 4301—Principles of Auditing (3).** Prerequisites: B or better in ACCT 3304, completion of ACCT 3305, and completion of or concurrent enrollment in ACCT 4300; 2.75 TTU GPA. An introduction to the theory and practice of auditing, emphasizing auditor decision making through a cycle approach to an audit engagement. (CL)
- 4310—Energy Accounting (3).** Prerequisites: B or better in ACCT 2300 and ACCT 2301; 2.75 TTU GPA. Introduces basic financial accounting, taxation and reporting issues related to energy producing activities, including current accounting practices of energy producing companies.
- 4381—Individual Problems in Accounting (3).** Prerequisite: Consent of instructor. For students with high academic achievement who are interested in enhancing their degree program by pursuing individual research or study under the guidance of an accounting faculty member.

Area of Energy Commerce and Business Economics

Eric Cardella, Ph.D., Area Coordinator

McLaughlin Chair of Free Enterprise: Ewing

Professors: Ewing, Powell, Salter, Young

Associate Professors: Cardella, Fitzgerald

Associate Professors of Practice: Kantelis, Martin, McInturff, Pleasant, Schuetzeberg

Assistant Professor of Practice: McQuillen

Adjunct Faculty: Frisbie, Long

CONTACT INFORMATION: NW315 Business Administration
Box 42101 | Lubbock, TX 79409-2101 | T 806.742.2046

About the Area

The Area of Energy Commerce and Business Economics supervises the following degree and certificate programs:

- Bachelor of Business Administration in Energy Commerce
- Undergraduate Certificate in Energy
- Undergraduate Certificate in Sustainable Energy for Business Professionals

Undergraduate Programs

Energy Commerce, B.B.A.

The goal of the undergraduate program in energy commerce is to enhance leadership potential by providing a high-quality and thorough educational experience in preparation for a business career in the energy industry. The energy commerce curriculum reflects the current world energy mix, primarily hydrocarbons with some emphasis on alternatives and renewables. Energy commerce majors must take GEOL 1303 and GEOL 1101. GEOL 1303 and GEOL 1101 will fulfill one university laboratory science requirement. All lower-division business and university required courses must be completed prior to beginning the program. Due to sequencing of courses the energy commerce degree program will take two academic years to complete. A minimum 3.00 GPA is required.

Communication Literacy Requirement. Communication Literacy courses for the Energy Commerce major include MCOM 2310; PCOM 3373; ISQS 3344; ENCO 3365, ENCO 4399, and ENCO 4362.

Energy, Undergraduate Certificate

The Certificate in Energy is designed to prepare undergraduate accounting, finance, and global supply chain majors for careers in the energy industry. Students will take four courses related to the energy industry and upon graduation will receive a Certificate in Energy in addition to the B.B.A. degree in their major. Students will be required to complete all lower-division business core courses and have a minimum 3.00 GPA to enroll in ENCO 3301. Courses may be taken in any order as long as all prerequisites are met.

Required Courses: ENCO 3301, 3365, 4344, and 4375.

Sustainable Energy for Business Professionals, Undergraduate Certificate

This certificate is designed for any RCOBA major who wishes to pursue a special area of interest. Required courses for this certificate are ENCO 3301, ENCO 3320, ENCO 3355, and ENCO 4375. Other requirements are as follows:

- Completion of Lower Division Business requirements.
- Minimum 3.0 TTU GPA.
- All prerequisites must be met prior to taking each course.
- All courses must be taken in residence.

Undergraduate Course Descriptions

Business Economics (BECO)

- 3310—Applied Business Economics (3).** Prerequisites: C or better in ACCT 2300; ECO 2301 or ECO 2302 or ECO 2305 or AAEC 2305; 2.75 TTU GPA. Economic analysis applied to business decisions and strategy. Topics may include business valuation, pricing strategy, risk management, contracts, and organizational economics.
- 4345—Economics of Regulation (3).** Prerequisites: C or better in ECO 2302 or ECO 2305; 2.75 TTU GPA. Study of the economic criteria of public regulation of private business with emphasis on public policy. Theories of regulation. Regulation of various markets.
- 4366—Global Business Economics and Policy (3).** Prerequisites: C or better in ECO 2302 or ECO 2305; 2.75 TTU GPA. Examines business interaction with economic policy in a globalized world, the impact of international trade policy on businesses, and the role international businesses play in the process of economic development.
- 4376—Austrian Economics (3).** Prerequisites: C or better in ECO 2302 or ECO 2305; minimum 2.75 TTU GPA. Applied topics include entrepreneurship and competition theory, regulation and anti-trust, business cycles, comparative systems and economic development, and business management.

Business Law (BLAW)

- 3391—Business Law and Ethics (3).** Prerequisite: C or higher in ENGL 1301 and ENGL 1302 and a minimum cumulative 2.75 Texas Tech GPA. Basis of legal concepts and applications related to business and an examination of the vital role of ethics in business.
- 4391—Advanced Topics in Business Law (3).** Prerequisites: 2.75 TTU GPA; C or higher in BLAW 3391. Advanced topics covering the U.S. legal system, ethics, business organizations, administrative law, employment law, contracts, and agencies.

Energy Commerce (ENCO)

- 3301—Energy Industry Fundamentals (3).** Prerequisites: C or better in ENGL 1301, ENGL 1302, MATH 1330, MATH 1331, MATH 2345 or MATH 2300, ECO 2305, ISQS 2340, BA 1301, ACCT 2300, ACCT 2301; 3.0 cumulative TTU GPA. History and overview of the energy industry providing basics of oil and gas exploration, production, electricity generation and transmission and emerging alternative technologies. Emphasis on critical thinking and issue analysis. F.
- 3320—Business of Clean Energy (3).** Prerequisites: 3.0 GPA. Minimum grade of C in ENGL 1301, ENGL 1302; MATH 1330, MATH 1331, MATH 2345 or MATH 2300; ECO 2305 or ECO 2301 and ECO 2302; ISQS 2340; BA 1301; ACCT 2300 and ACCT 2301. May not be taken concurrently. Introduction to the business of clean energy, including a basic understanding of the business practices and policies that are unique to the clean energy sector.
- 3345—Energy Systems (3).** Prerequisites: C or better in ENCO 3301 and ENCO 3385; 2.75 TTU GPA. Theories, procedures and techniques of systems, software and technology used in the energy industry.
- 3355—Contemporary Business Topics in Sustainability (3).** Prerequisite: C or higher in ENCO 3320. Minimum 2.75 TTU GPA. Examines the latest sustainability issues facing business across all sectors.
- 3365—Energy Markets (3).** Prerequisites: C or better in ENCO 3301, BECO 3310, and FIN 3320; 2.75 TTU GPA. Focuses on refining, processing, and transportation of hydrocarbons and electricity. Examines fuel on fuel competition, emerging energy markets, and commodity pricing. (CL)
- 3376—Exploration and Production Techniques (3).** Prerequisites: C or better in ENCO 3301, and ENCO 3385; 2.75 TTU GPA. Exposes students to exploration and production techniques in the energy industry and interfaces these areas with the land functions. Spring only.
- 3385—Petroleum Land Management (3).** Prerequisites: C or better in ENGL 1301, ENGL 1302, MATH 1330, MATH 1331, MATH 2345 or MATH 2300, ECO 2305, ISQS 2340, BA 1301, ACCT 2300, ACCT 2301; 3.0 cumulative TTU GPA. Overview designed to provide a foundation knowledge negotiations, real property and contract law and regulations of the oil and gas industry. Fall only.
- 3386—Oil and Gas Agreements (3).** Prerequisites: C or better in ENCO 3301, and ENCO 3385; 2.75 TTU GPA. Covers contracts utilized in petroleum exploration and production, specifically farmouts, joint operating agreements, gas balancing, secondary recovery, and federal exploratory units.
- 3392—Energy Quantitative Methods (3).** Prerequisites: C or higher in ENCO 3365; 2.75 TTU GPA. Understanding how the energy industry uses

Directed Electives: Choose one course from ENCO 3320, 3345, 4362, 4396, 4354; FIN 3322, 3324; SCM 3353

Business Elective: Any 3000- or 4000-level business course. Directed elective courses highly encouraged.

data and analytical tools to evaluate projects and various types of transactions and develop markets analysis.

- 4312—Energy and Environmental Economics (3).** Prerequisites: C or better in ENCO 3301, ENCO 3385; BECO 3310; 2.75 TTU GPA. Focus on oil and gas project economics and capital formation. Emphasis on project cost, revenue forecasting, reserve analysis, and financial risk.
- 4320—Energy Power Markets and Trading (3).** Prerequisites: C or better in ENCO 3365; 2.75 TTU GPA. Students will become familiar with the physical properties of electricity as well as how power markets work and how government policies will continue to transform power markets.
- 4325—Global Energy Perspectives (3).** Prerequisites: Instructor consent; 2.75 TTU GPA. Explores the challenges and resources available to developed nations in meeting the energy demands of the twenty-first century. Focuses on OECD countries primarily in Europe. Study abroad. SS.
- 4330—Geopolitics of Energy (3).** Prerequisites: C or better in ENCO 3301, ENCO 3376, and ENCO 3385; 2.75 TTU GPA. Focus on geopolitical implications in transnational energy transactions. Emphasis on international contract terms, ethics, and leadership issues. S.
- 4344—Energy Analytics and Strategy (3).** Prerequisites: C or better in ENCO 3365; 2.75 TTU GPA. Various types of economic and business analysis used in the energy sector to make decisions and to develop strategies.
- 4354—Energy Acquisitions and Divestitures (3).** Prerequisites: C or better in ENCO 3365; 2.75 TTU GPA. Strategies, tactics, and agreements utilized in acquisition/disposition and merger activities within the upstream, downstream, and midstream segments of the energy industry.
- 4362—Regulation of Energy Resources (3).** Prerequisites: C or better in ENCO 3301, and ENCO 3385; 2.75 TTU GPA. May not be taken concurrently with ENCO 4375. Focuses on a variety of regulatory topics relating to the energy industry including: federal law and regulations, state by state regulation comparisons and current events impacting the industry. (CL)
- 4375—Energy Finance (3).** Prerequisites: C or better in ENCO 3301, ENCO 3385, and FIN 3320; 2.75 TTU GPA. May not be taken concurrently with ENCO 4362. Examines elements of finance unique to oil and gas, including reserve-based lending tied to commodity pricing, capital formation and risk management.
- 4386—Oil and Gas Agreements II (3).** Prerequisite: C or better in ENCO 3386. Covers contracts utilized in petroleum exploration and production, including joint operating agreements, federal onshore and offshore leases, and federal exploratory units.
- 4390—World Energy Project (3).** Prerequisites: Instructor consent; 2.75 TTU GPA. Industry sponsored project to provide basic energy needs in the developing world. Students spend summer session abroad. Service Learning.
- 4395—Oil and Gas Law I (3).** Prerequisites: ENCO majors only; C or better in ENCO 3301 and ENCO 3385; 2.75 TTU GPA. Case law based study of jurisprudence affecting the oil and gas industry. Emphasis is on concurrent ownership, split estates, and oil and gas leases. Spring only.
- 4396—Oil and Gas Law II (3).** Prerequisites: ENCO majors only; C or better in ENCO 4395; 2.75 TTU GPA. Case law based on the study of jurisprudence affecting the oil and gas industry. Emphasis is on regulation of oil and gas industry and selected current issues in energy law.
- 4399—Senior Seminar in Energy Commerce (3).** Prerequisites: C or better in ENCO 3365 and ENCO 4395; 2.75 TTU GPA. Capstone course synthesizing with previous coursework advanced concepts in finance, mergers and acquisitions, and relevant negotiating and contract skills. (CL)

About the Area

The Area of Finance supervises the following degree and certificate programs:

- Bachelor of Business Administration in Finance
- Undergraduate Certificate in Commercial Banking
- Undergraduate Certificate in Commercial Real Estate
- Undergraduate Certificate in Corporate Risk Management and Insurance
- Undergraduate Certificate in Finance
- Undergraduate Certificate in Investment Management
- Master of Science in Finance

Accelerated Degree Program

- Bachelor of Business Administration in Finance / Master of Science in Finance

Undergraduate Programs

Finance, B.B.A.

The goal of the finance major is to prepare students for careers in banking, business finance, investment management, and real estate. To declare a finance major, students must make a B or better in ACCT 2300, ACCT 2301, MATH 2345 or MATH 2300, and FIN 3320.

Prospective finance students are encouraged to enroll in FIN 3320 during the second semester of their sophomore year as opposed to the first semester of their junior year. This allows finance majors to spread their core finance coursework over two years. This structure enables finance students to legitimately apply for finance internships in both their sophomore and junior summers. Such opportunities will make them more competitive in the job market. Within this structure, ACCT 2300 and ECO 2302 remain as prerequisites for FIN 3320. However, ACCT 2301 and MATH 2345 will be corequisites for enrollment in FIN 3320 for students who have declared their intention of majoring in finance.

Communication Literacy Requirement. CL courses for the Finance major include: MCOM 2310; PCOM 3373; ISQS 3344; and FIN 3321.

Undergraduate Certificates

Commercial Banking

Undergraduate finance students can earn a Certificate in Commercial Banking through the Excellence in Banking program. Designed to produce top-notch bankers, the program will provide you with a comprehensive understanding of modern banking operations and practices. You will take four courses related to the commercial banking industry. Upon graduation, students are prepared for multiple career paths in the commercial banking

Finance, B.B.A.

Recommended Upper-Division Curriculum

THIRD YEAR

Fall

- ☐ FIN 3321 - Financial Statement Analysis (3 SCH)
 - ☐ FIN 3322 - Corporation Finance I (3 SCH)
 - ☐ ACCT 3304 - Intermediate Accounting I (3 SCH)
 - ☐ ISQS 3344 - Introduction to Production and Operations Management (3 SCH)
 - ☐ MCOM 2310 - Business and Professional Communication (3 SCH)
- Students wanting to major in Finance should take FIN 3320 spring of Second Year.*

TOTAL: 15

Spring

- ☐ FIN 3323 - Intro. to Financial Markets and Institutions (3 SCH)
- ☐ FIN 3324 - Investments (3 SCH)
- ☐ ACCT 3305 - Intermediate Accounting II (3 SCH)
- ☐ MKT 3350 - Introduction to Marketing (3 SCH)
- ☐ Business Elective (3 SCH)

TOTAL: 15

FOURTH YEAR

Fall

- ☐ BLAW 3391 - Business Law I (3 SCH)
- ☐ MGT 3370 - Organization and Management (3 SCH)
- ☐ PCOM 3373 - Business Communication (3 SCH)
- ☐ Directed Elective (3 SCH)
- ☐ Business Elective (3 SCH)

TOTAL: 15

Spring

- ☐ BECO 3310 - Applied Business Economics (3 SCH)
- ☐ FIN 4331 - Finance Modeling (3 SCH)
- ☐ Directed Elective (3 SCH)
- ☐ Business Elective (3 SCH)

TOTAL: 12

TOTAL HOURS: 120

Directed Elective. Choose 2 courses from: FIN 3332, 4323, 4326; ENCO 3301; ISQS 3345

Business Elective. Any 3000- or 4000-level business course (FIN 4330 Corporate Finance II is highly encouraged)

Accelerated Bachelor's-to-Master's Program

The Accelerated Bachelor's to Master's in Finance provides an opportunity for qualified TTU students to earn both degrees in a cost-effective and timely manner. Students are approved to count up to nine hours of graduate coursework towards their undergraduate degree. Credit for these courses will also count towards earning a Master's in Finance.

FOURTH YEAR

Fall

- ☐ FIN 5322 - Corporate Finance (3 SCH)
- ☐ FIN 4330 - Corporate Finance II (3 SCH)
- ☐ FIN 3332 - Real Estate Fundamentals (3 SCH)
- ☐ MKT 5367 - Relationship Management for Financial Services (3 SCH)
- ☐ FIN 5329 - Fixed Income (3 SCH)

TOTAL: 15

Spring

- ☐ BLAW 3391 - Business Law I (3 SCH)
- ☐ BECO 3310 - Applied Business Economics (3 SCH)
- ☐ FIN 4331 - Finance Modeling (3 SCH)
- ☐ FIN 5328 - Options and Futures (3 SCH)
- ☐ MGT 3370 - Organization and Management (3 SCH)

TOTAL: 15

Summer

- ☐ FIN 5382 - Internship in Finance (Optional)

TOTAL: 3

industry, including credit analysis, loan review, lending, treasury management, development, marketing, and trust.

Requirements:

- Completion of Lower Division Business Requirements.
- Completion of FIN 3320 with a B or better.
- All prerequisites must be met prior to taking each course.
- All courses must be taken in residence.

Required Courses: Courses may be taken in any order. FIN 4323, 4324, 4382 (FIN 4333 can be substituted with permission from the Finance area.); FIN 4350

Commercial Real Estate

The Commercial Real Estate Certificate Program is designed to prepare undergraduate business majors for careers in the commercial real estate industry, equipping them with skills in commercial brokerage, appraisals, property management and real estate portfolio management. Each of the four required courses combines academic topics with opportunities to pursue industry-recognized technologies, certifications, and licensing programs.

Required Course (3 hours): FIN 3332

Choose two of the following (6 hours): FIN 3334, 3335, 3393, 4333, 4382*

Choose one of the following (3 hours): FIN 4335, 4336

* The internship (FIN 4382) must be related to the commercial real estate industry and approved by either (1) the Area Coordinator for the Area of Finance or (2) the Center for Real Estate Director.

Corporate Risk Management and Insurance

The Certificate in Corporate Risk Management and Insurance is designed to equip students with the theoretical knowledge and practical skills necessary for navigating the complex world of risk management and insurance. This certificate program is ideal for individuals aiming to pursue a career in corporate finance departments, insurance companies, risk management consultancies, and governmental agencies. The curriculum is structured to cover a broad range of topics, including but not limited to, the fundamentals of risk management, principles of insurance, regulatory environment, corporate risk management strategies, and the use of financial instruments to manage risk. Through a blend of lectures, case studies, and projects, students will develop a deep understanding of how to assess and manage risks, design and implement effective insurance strategies, and navigate the regulatory landscape. A key component of the program is the completion of an internship, providing students with hands-on experience in the field.

Requirements:

- Completion of Lower Division Business Requirements.
- Completion of FIN 3320 with a B or better.
- All prerequisites must be met prior to taking a course.
- All courses must be taken in residence.

Required Courses (6 hours): FIN 3336, 4330

Choose two of the following (6 hours): FIN 4337, 4384, 4382*

* The internship (FIN 4382) must meet certain standards as a risk management or insurance internship to count toward the certificate.

Finance

The Finance Undergraduate Certificate equips business students who are not majoring in finance with a solid foundation in the essential finance principles. By completing the five required courses you will broaden your perspective on financial topics and analysis, allowing you to enhance your strategic business decision making skills. The required courses for the certificate are FIN 3321, FIN 3322, FIN 3323, FIN 3324, and FIN 3332. Courses may be taken in any order.

General requirements for the certificate are as follows:

- Completion of the college's lower-division requirements.
- Completion of FIN 3320 with a B or better.
- All prerequisites must be met prior to taking each course.
- All courses must be taken in residence.

Investment Management

The Certificate in Investment Management is tailored for students pursuing careers in the field of investments. The program's coursework provides exposure to advanced topics in investments, including equity and fixed income analysis, security selection, portfolio management, and hedging strategies. Rooted in both rigorous academic research and practical application, this certificate equips students with the advanced knowledge and skills crucial for success in careers in investment banking, business valuation, investment advisement, portfolio management, and private equity. A key component of the program is the completion of an investment management internship, providing students with hands-on experience in the field. This certificate program aligns with the foundational elements of the Chartered Financial Analyst (CFA) curriculum, and as part of the coursework for FIN 4325, students are expected to sit for the Level I exam.

Requirements:

- Completion of Lower Division Business Requirements.
- Completion of FIN 3320 with a B or better.
- All prerequisites must be met prior to taking a course.
- All courses must be taken in residence.

Required Courses (6 hours): FIN 4325, 4330

Choose two of the following (6 hours): FIN 4326, 4327, 4329, 4382*

* The internship (FIN 4382) must meet certain standards as an investment management internship to count toward the certificate.

Accelerated Bachelor's to Master's Degree

Finance, B.B.A. / Finance, M.S.

The Accelerated Bachelor's to Master's in Finance provides an opportunity for qualified TTU students to earn both degrees in a cost-effective and timely manner. Students are approved to count up to nine hours of graduate course work towards their undergraduate degree. Credit for these courses will also count towards earning a Master's in Finance.

Undergraduate Course Descriptions

Finance (FIN)

- 3319—Personal Financial Management (3).** Prerequisites: C or better in FIN 3320; 2.75 TTU GPA. Broad coverage of personal financial management for business majors. Addresses issues in household finance, including saving, portfolio behavior, debt management, and analyzing financial choices.
- 3320—Financial Management (3).** Prerequisites: C or better in ACCT 2300 and ECO 2301 or ECO 2302 or ECO 2305 or AAEC 2305, and a minimum cumulative 2.75 Texas Tech GPA. Prerequisite or corequisite: C or better in ACCT 2301 and MATH 2345 or AAEC 2301. To declare a FIN major, student must make a B or better. Survey course in finance introducing topics in corporate finance investments and financial institutions.
- 3321—Financial Statement Analysis (3).** Prerequisites: B or better in ACCT 2300, ACCT 2301, MATH 2345 or MATH 2300, and FIN 3320; 2.75 TTU GPA. The analysis and interpretation of financial statement reports. Effective financial statement evaluation examined from the perspective of managers, investors, and creditors. Proforma statement development for effective financial management. (CL)
- 3322—Corporation Finance I (3).** Prerequisites: B or better in ACCT 2300, ACCT 2301, MATH 2345 or MATH 2300, and FIN 3320; 2.75 TTU GPA. Topics include financial analysis, capital budgeting and source of funds.
- 3323—Introduction to Financial Markets and Institutions (3).** Prerequisites: B or better in ACCT 2300, ACCT 2301, MATH 2345 or MATH 2300, and FIN 3320; 2.75 TTU GPA. Introduction to the US financial system covering various financial markets and institutions and key instruments.
- 3324—Investments (3).** Prerequisites: B or better in ACCT 2300, ACCT 2301, MATH 2345 or MATH 2300, and FIN 3320; 2.75 TTU GPA. Overview of various investment media and markets associated with them. Emphasis on fundamental and technical analysis, sources of information, and the efficient markets concept.
- 3332—Real Estate Fundamentals (3).** Prerequisites: C or better in FIN 3320; 2.75 TTU GPA. Introduction to property law, finance, valuation, invest-

ment analysis and brokerage. Operations of the real estate market and the study of urban land use, including urban growth, city structure, and land use planning.

- 3334—Real Estate Finance (3).** Prerequisites: B or better in FIN 3320; 2.75 TTU GPA. Prerequisite or corequisite: C or better in FIN 3332. Mechanisms of real estate financing, sources of funds and financial institutions, and government agencies. Fall only.
- 3335—Property Technology (3).** Prerequisites: C or better in FIN 3332 and a 2.75 TTU GPA. Examination of the increasing role of technology entrepreneurship and innovation in the real estate sector.
- 3336—Principles of Insurance (3).** Prerequisites: C or better in FIN 3320; 2.75 TTU GPA. Fundamentals of risk management and insurance, including the nature and treatment of pure loss exposures; legal principles; and property, liability, life and health insurance.
- 3393—Real Estate Law (3).** Prerequisites: Junior or senior standing; 2.75 TTU GPA. Rights in land, classification of estates, acquisition and creation of property rights, titles, and common conveyances.
- 4182—Internship in Business Administration (1).** Prerequisite: At least 6 hours of professional courses to be determined by the area. Permits students to enhance their knowledge within their field of specialization through application of concepts, principles, and techniques learned in the classroom. Must be taken pass/fail.
- 4323—Management of Financial Institutions (3).** Prerequisites: B or better in FIN 3320 and a C or better in FIN 3323; 2.75 TTU GPA. Operation and management policies of depository financial institutions. Commercial bank management is stressed. Examines internal operation, regulation, and supervision of institutions studied. Problems and cases.
- 4324—Credit and Lending (3).** Prerequisites: C or better in FIN 3321; 2.75 TTU GPA. Provides an in depth understanding of credit and lending in financial institutions with a primary focus on banks. Will be delivered with a combination of lectures, cases and RMA modules (for certification). Course will include discussion with banking industry leaders.
- 4325—Fundamentals of Investment Management (3).** Prerequisites: 2.75 GPA and permission of instructor. Explores current practices in portfolio theory and investment management, preparing students for professional certification in the securities and investment industries. [FIN 5326]
- 4326—Student-Managed Investment Fund (3).** Prerequisites: FIN 3321, FIN 3324 and consent of instructor; 2.75 TTU GPA. Advanced application of the process of selecting securities as well as forming and managing a portfolio involving real money. Focus is on managing risk and return. May be repeated for credit.
- 4327—Derivative Securities and Markets (3).** Prerequisites: C or better in FIN 3323 and FIN 3324; 2.75 TTU GPA. Course studies risk allocation function of derivative financial securities and markets from the perspective of market users. It includes hedging and trading strategies, pricing relationships, and the roles of government/private regulation.
- 4328—International Finance (3).** Prerequisites: C or better in FIN 3322 and FIN 3323; 2.75 TTU GPA. A study of the international monetary system in its theoretical and institutional setting. The position of an individual business firm in conducting international trade; procedures in financing international transactions.
- 4329—Fixed Income Analysis (3).** Prerequisites: C or better in FIN 3323 and FIN 3324. Analysis of interest rates, fixed income valuation and fixed income risk management.
- 4330—Corporate Finance II (3).** Prerequisites: C or better in FIN 3321 and FIN 3322; 2.75 TTU GPA. Senior-level course that covers capital structure, raising capital, leasing, dividend policy, mergers and acquisitions, corporate restructuring, and corporate governance.
- 4331—Finance Modeling (3).** Prerequisites: C or better in FIN 3322 and FIN 3324; 2.75 TTU GPA. Exploration of Excel models for decision making in investments and financial management.
- 4333—Real Estate Valuation (3).** Prerequisites: B or better in FIN 3320 and C or better in FIN 3332; 2.75 TTU GPA. Appraisal and valuation techniques applied to residential, commercial, and industrial property.
- 4335—Real Estate Investments (3).** Prerequisites: B or better in FIN 3320 and a C or better in FIN 3332; 2.75 TTU GPA. The framework for urban real estate investment decisions by individuals and institutions.
- 4336—Urban Land Development (3).** Prerequisite: 2.75 TTU GPA. Prerequisite or corequisite: C or better in FIN 3332 or FIN 3334. The land conversion process including feasibility analysis, market and merchandising targets, site selection, design, construction, and financial analysis. Land use controls, planning, and environmental constraints.
- 4337—Corporate Risk Management (3).** C or better in FIN 4330; 2.75 TTU GPA. Examines foundational theories and practical applications of risk identification, analysis, mitigation, and insurance solutions. Participants learn to implement effective strategies through case studies and exercises, enhancing organizational protection and value in an uncertain environment.

- 4350—Business Development in Finance (3).** Prerequisite: Acceptance into the Excellence in Banking Certificate program. Provides students with business development skills necessary for acquiring and fostering business relationships within the financial sector.
- 4381—Individual Problems in Finance (3).** Prerequisites: Senior standing; 2.75 TTU GPA; instructor consent. Independent problem research under guidance of a faculty member.
- 4382—Internship in Finance (3).** Prerequisites: 2.75 TTU GPA; faculty advisor approval. Permits students to apply the concepts, principles, and techniques learned in the classroom. Up to 3 hours of internships (with approval prior to employment) can be applied as a free elective toward a finance major. Must be taken pass/fail.
- 4383—Special Topics in Finance (3).** Prerequisites: 2.75 TTU GPA; consent of instructor. Examination of specialized problems in such topics as working capital management, capital budgeting, cost of capital, commodity and financial future investment, and small business finance. May be repeated once for credit as topic varies.
- 4384—Current Topics in Risk Management and Insurance (3).** Prerequisites: C or better in FIN 4330; 2.75 TTU GPA. Delves into modern risk management and insurance, addressing digital trends, cyber and climate risks, technological advancements like AI, and market evolution including InsurTech. Prepares students to tackle emerging challenges and innovate in risk and insurance fields through practical learning.
- 4385—Senior Finance Seminar (3).** Prerequisites: B or better in FIN 3320; senior standing; finance majors only; 2.75 TTU GPA. Must be taken in the last semester. Integrative experience that brings together the primary functional areas of finance: corporate, investments, institutions, and real estate.

About the Area

The Area of Information Systems and Quantitative Sciences (ISQS) supervises the following degree and certificate programs:

- Bachelor of Business Administration in Information Technology
- Master of Science in Data Science
- Undergraduate Certificate in Data Analytics
- Undergraduate Certificate in Information Technology (INTE)
- Graduate Certificate in Business Analytics

Undergraduate Programs

Information Technology, B.B.A.

The Information Systems and Quantitative Sciences area has a major field called information technology. The information technology graduate is prepared to perform systems analysis and design, database administration, systems and software development, and data analytics depending upon the concentration chosen for study. Graduates from both concentrations (systems and data analytics) are in great demand by industries across the board.

Communication Literacy Requirement. Communication Literacy courses for the Information Technology major include MCOM 2310; PCOM 3373; ISQS 3344, and ISQS 3358.

Undergraduate Certificates

Data Analytics

The Data Analytics Certificate provides students with the foundations and tools for the development of business analytics skills that are necessary to diagnose problems and envision solutions from a data-driven perspective. Courses may be taken in any order as long as prerequisites have been met.

Requirements for Non-Business Majors:

1. Junior/Senior standing.
2. 2.75 Texas Tech GPA.
3. All prerequisites must be met prior to taking each course.
4. All upper-level courses must be taken in residence.

Requirements for Business Majors:

1. Completion of Lower Division business requirements.
2. Completion of ISQS 2340 with a C or better.
3. 2.75 Texas Tech GPA.
4. All prerequisites must be met prior to taking each course.
5. All upper-level courses must be taken in residence.

Coursework Requirements: Choose four of the following: ISQS 3345, 3348, 3352, 3358, 4370

Information Technology (INTE)

The Information Technology (IT) Certificate is designed for business students who are not majoring in information technology (IT) but would like to gain a deeper understanding of everyday IT and its role in today's fast-paced business environment. Each of the four required courses will provide students with knowledge and skills for evaluating, designing, and using software systems to solve business problems and improve decision-making.

The initial prerequisites are a grade of C or better in ISQS 2340, a 2.75 GPA, and admission to the upper-division major. The certificate will consist of four courses: ISQS 3345, 3348, 3349, 3360. Prerequisites must be met prior to enrolling in each course.

Undergraduate Course Descriptions

Information Systems and Quantitative Sciences (ISQS)

- 2340—Information Technology for Business (3).** [BCIS1305, 1405] Prerequisites: Minimum grade of C in any college-level math course and a minimum cumulative 2.75 Texas Tech GPA. Explores how information technology (IT) drives business value, including hardware systems, software applications, and emerging technologies.
- 2377—Decision Making in Business (3).** Prerequisites: C or better in BA 1301 and any college-level math course; 2.75 TTU GPA. Decision-making using formal tools and frameworks. Covers the theory behind decision-making behaviors and their application to various business-related problems. The class will use case studies that draw from different areas of businesses and their interactions.
- 3344—Introduction to Production and Operations Management (3).** Prerequisites: C or better in ISQS 2340; MATH 2300 or MATH 2345; minimum cumulative 2.75 Texas Tech GPA. An overview of the production and operations function in organizations with examples of the application of computer and quantitative skills to management problems. Both design and operating problems are discussed. (CL)
- 3345—Analytics and Development with Python (3).** Prerequisite: 2.75 TTU GPA. An introductory course in the design and creation of data analytics, currently in Python.
- 3346—Emerging Technologies (3).** Prerequisites: 2.75 TTU GPA; C or better in ISQS 3345. Internet programming using PHP, Python, .NET, Ruby, and/or any other advanced web application techniques of interest to the industry.
- 3348—Data Base Management Systems (3).** Prerequisite: 2.75 TTU GPA. Basic concepts of data base management systems; recent developments in the area of data base systems. Students develop a prototype data base application of their own.
- 3349—Data Communications and Security (3).** Prerequisites: C or better in ISQS 3345, minimum cumulative 2.75 TTU GPA. Hands-on course introducing students to computer-to-computer communications technologies and the Linux operating systems.
- 3351—Telecommunications Security Using Linux (3).** Prerequisites: C or better in ISQS 3349; 2.75 TTU GPA. An advanced hands-on course in securing computer networks. F.
- 3352—Data Visualization (3).** Prerequisites: C or better in ISQS 3345; 2.75 TTU GPA. Learn data visualization theory and techniques, demonstrate value of data, create impactful dashboards, and build data-driven stories to effectively respond to business needs.
- 3358—Business Intelligence (3).** Prerequisites: C or better in ISQS 3345 and ISQS 3348; 2.75 TTU GPA. Introductory course to a broad range of applications and technologies for gathering, storing, analyzing, and providing access to data to help make business decisions. (CL)
- 3360—Information Security (3).** Prerequisites: C or better in ISQS 3345, minimum 2.75 cumulative TTU GPA. Introduction to a practical and theoretical study of information security with a focus on business practices. Topics include cryptography, access control, protocols, and insecurity in software. Best if taken concurrently with ISQS 3351. F.
- 4345—Android Development (3).** Prerequisite: C or better in ISQS 3345. Focuses on the development of mobile Android applications.
- 4348—Business Systems Analysis (3).** Prerequisites: C or better in ISQS 2340; 2.75 TTU GPA. Methods for analyzing information needs and specifying application system requirements, the development life cycle and the life cycle phases leading to the determination of system requirements.
- 4349—Information Systems Analysis and Design (3).** Prerequisites: C or better in ISQS 3345 and ISQS 3348, minimum 2.75 cumulative TTU GPA. State-of-the-art object-oriented systems analysis and design concepts and techniques to specify system requirements and to develop a detailed quality design to support those requirements.
- 4350—Information Systems Project Management (3).** Prerequisites: C or better in ISQS 4349; 2.75 TTU GPA. Methods for management of software development projects; procurement and financial control; career and professional considerations.
- 4351—Web Design Implementation (3).** Prerequisites: C or better in ISQS 4349; 2.75 TTU GPA. Internet programming for business applications using PHP, Python, .NET, Ruby, and/or any other advanced web application techniques of interest to the industry.
- 4361—Web Application Design (3).** Prerequisites: C or better in ISQS 3345 and ISQS 3348; 2.75 TTU GPA. The design and creation of web applications using a multi-tier internet technology such as Jakarta Struts and MySQL.
- 4370—Data Mining (3).** Prerequisites: C or better in MATH 2345 and ISQS 3345; 2.75 TTU GPA. Data mining uses modeling techniques from statistics and computer science to extract useful business knowledge from large data sets.
- 4371—Analytics for Optimal Decision Making (3).** Prerequisites: C or better in ISQS 4370; 2.75 TTU GPA. A study of the development and application of optimization modeling for fundamental business problems, implementation using computational solvers, fundamentals of solution techniques, and sensitivity analysis.
- 4373—Simulation for Business Analytics (3).** Prerequisites: C or better in ISQS 4370; 2.75 TTU GPA. Fundamentals of static and event-based dynamic simulation techniques as well as techniques for development, implementation, analysis, and validation of simulation studies.
- 4377—Managerial Decision Making (3).** Prerequisite: 2.75 TTU GPA. Introduces normative and behavioral aspects of managerial decision making as they relate to business analytics and to the broader managerial landscape.
- 4380—Mobile Application Development (3).** Prerequisites: C or better in ISQS 3345; 2.75 TTU GPA. Provides an introduction to the foundations of programming for Android app development. Topics include user interface development, techniques for capturing, storing, and manipulating user input, as well as control structures and data structures.
- 4381—Individual Problems in Information Systems and Quantitative Sciences (3).** Prerequisites: 2.75 TTU GPA; consent of instructor. For students with high academic achievement who are interested in enhancing their degree programs by pursuing individual research or study under the guidance of an ISQS faculty member.
- 4382—Internship in Information Systems and Quantitative Sciences (3).** Prerequisites: Approval prior to employment; 2.75 TTU GPA. Permits students to apply the concepts, principles, and techniques learned in the classroom. Up to 3 hours of internships can be applied toward a degree program. Must be taken pass/fail.
- 4383—Special Topics in Information Systems and Quantitative Sciences (3).** Prerequisite: 2.75 TTU GPA. Examines specialized problems relating to information systems and quantitative sciences. May be repeated once for credit as topic varies.
- 4385—Strategic IT and Telecommunications Management (3).** Prerequisites: Final semester or ISQS advisor approval; 2.75 TTU GPA. The design, management, and maintenance of information systems to provide strategic organizational advantage.

About the Area

The Area of Management supervises the following degree and certificate programs:

- Bachelor of Business Administration in Management
- Undergraduate Certificate in Entrepreneurial Management
- Undergraduate Certificate in Family Business
- Undergraduate Certificate in Global Business
- Undergraduate Certificate in Human Resources Management
- Undergraduate Certificate in Leadership

Undergraduate Programs

Management, B.B.A.

The undergraduate management program provides high-quality preparation for a wide range of managerial careers. It provides the broadest background of any of the business disciplines for understanding and managing organizations and behavior in these systems. Students may group courses to emphasize their particular interest. General management is particularly suited for management training programs sponsored by many larger firms and entry-level positions in smaller firms. These programs serve as the first step up the management ladder. A 2.75 or higher Texas Tech GPA is required to declare management as a major. The department offers concentrations in human resources management and strategic entrepreneurship and innovation.

Communication Literacy Requirement. Communication Literacy courses for the Management major include: MCOM 2310; PCOM 3373; ISQS 3344; and MGT 4380.

Undergraduate Certificates

Entrepreneurial Management

Undergraduate students can earn a certificate in Entrepreneurial Management designed to equip students with the skills and knowledge necessary to thrive in today's fast-paced business environment. Students will learn to identify market opportunities, develop business plans, and create innovative solutions to real-world problems. The program emphasizes experiential learning, encouraging students to engage in hands-on projects, work in teams, and network with entrepreneurs and industry professionals. Ideal for students from all business disciplines, this certificate empowers graduates with the entrepreneurial skills needed to launch startups, drive innovation within existing organizations, and excel in today's competitive job market.

Required Course for Non-Business Majors: MGT 3370

Required Courses (9 hours): MGT 3390, 4376, 4386

Choose one of the following (3 hours): MGT 4373, 4374, 4377, 7379, 4382*, 4383

* The internship (MGT 4382) must be related to entrepreneurship, innovation, or organizational change and approved by the Area of Management Internship Coordinator

Family Business

The Undergraduate Certificate in Family Business provides essential knowledge for managing family-owned businesses, with required courses in Strategic Management and Family Enterprise. Students can tailor their learning experience by choosing from electives such as Internship in Family Business Management, Special Topics in Management, Managing Conflict and Negotiation, and Change and Innovation Processes. The program emphasizes leadership, governance, and succession planning, combining theoretical insights with practical applications for family enterprises that comprise the intersectionality of the family business system and the family system. Upon completion, students will be better equipped to address family dynamics, drive innovation, and ensure business sustainability while preserving and continuing the family legacy. The curriculum blends academic insights with real-world applications, featuring case studies, guest lectures, and networking opportunities with industry leaders, further enriching the experience.

Required Course for Non-Business Majors: MGT 3370

Required Courses (6 hours): MGT 4377, 4380

Choose two of the following (3 hours): MGT 4384, 4388, 4382*, 4383

* The internship (MGT 4382) must be related to family business and approved by either (1) the Area of Management Internship Coordinator or (2) the Alderson & Griffin Center for Family Business & Entrepreneurship Director or Associate Director.

Global Business

The undergraduate certificate in Global Business prepares students for the global economy by providing an integrated understanding of the prin-

Management, B.B.A.

Recommended Upper-Division Curriculum

THIRD YEAR

Fall

- ☐ BECO 3310 - Applied Business Economics (3 SCH)
- ☐ FIN 3320 - Financial Management (3 SCH)
- ☐ MGT 3370 - Managing People and Organizations (3 SCH)
- ☐ PCOM 3373 - Applied Workforce Communication (3 SCH)

- ☐ Group A (3 SCH)

TOTAL: 15

FOURTH YEAR

Fall

- ☐ Group A (6 SCH)
- ☐ Group B (3 SCH)
- ☐ Electives (3 SCH)*
- ☐ MGT 3390 - Creating Value in a Changing World (3 SCH)

TOTAL: 15

Spring

- ☐ MGT 4380 - Strategic Management (3 SCH)
- ☐ Electives (6 SCH)*
- ☐ Group A (3 SCH)

TOTAL: 12

MINIMUM HOURS REQUIRED FOR GRADUATION: 120

* These are the only courses not requiring a grade of C or higher. Elective hours may vary to meet 120-hour requirement.

Group A. Choose four courses from: MGT 3375, 3379, 3390, 4370, 4373, 4374, 4375, 4376, 4377, 4384, 4385, 4386, 4388, 4389, 4397 or HOM 4371

Group B. Choose one additional junior- or senior-level business course, provided it is not used to fulfill another requirement.

ciples and practices of international business. Students will gain a deeper understanding of international policies, economies and global marketing practices. Courses may be taken in any order as long as prerequisites have been met.

Requirements:

1. 2.75 Texas Tech GPA.
2. Prior approval is required for all course substitutions.
3. All prerequisites must be met prior to taking each course.
4. Successful completion of coursework and international experience requirements.

Coursework Requirements (*may be taken in any order*):

- MGT 4375; MKT 4358; MGT 4384

International Experience Requirements:

- International Study Abroad experience

Human Resources Management

Undergraduate students can earn a certificate in Human Resources Management designed to equip students to use data and analytics to strategically leverage human resources for organizations. Students will learn to use evidence (e.g., survey responses, qualitative responses) from multiple stakeholders, especially employees, at multiple points in time to make data-driven decisions. Students will learn how to select and retain good employees, motivate them on the job, and essentially turn a job into a place employees want to be.

Required Course for Non-Business Majors: MGT 3370

Required Courses (9 hours): MGT 3347, 4385, 4372

Choose one of the following (3 hours): HRDV 3307, 3308, 3310; MGT 4382*, 4383

* The internship (MGT 4382) must be related to human resource management and approved by the Area of Management Internship Coordinator.

Leadership

The Undergraduate Certificate in Leadership consists of four courses and is designed for business students who are not majoring in management but would like to develop and master the essential interpersonal skills that are required for managerial positions. As a desirable skill across disciplines and critical to the advancement of business, a solid foundation in leadership will help you lead in any industry.

Required Course for Non-Business Majors: MGT 3370

Required Courses (6 hours): MGT 3376, 4373

Choose two of the following (3 hours): MGT 4384, 4389, 4375, 4382*, 4383

* The internship (MGT 4382) must be related to leadership and approved by the Area of Management Internship Coordinator

Undergraduate Course Descriptions

Management (MGT)

- 3370—Managing People and Organizations (3).** Prerequisites: C or better in MATH 1330; minimum cumulative 2.75 Texas Tech GPA. The management function; basic principles, concepts, and practices as they relate to both people and organizations.
- 3374—Managing Human Resources (3).** Prerequisites: B- or better in MGT 3370 (business majors) or BA 3305 (non-business majors); 2.75 TTU GPA. Principles and methods in human resources management.
- 3375—Entrepreneurship: New Value Creation (3).** Prerequisites: C or better in MGT 3370 (business majors) or BA 3305 (non-business majors); 2.75 TTU GPA. Introduces students to the knowledge and modes of thinking that are basic to new value creation.
- 3376—Organizational Behavior (3).** Prerequisites: B or better in MGT 3370 (business majors) or BA 3305 (non-business majors); 2.75 TTU GPA. Focuses on managerial and employee attitudes and behavior. Topics include performance, job satisfaction, motivation groups, and task design.
- 3379—Advanced Organization and Management (3).** Prerequisites: C or better in MGT 3370 (business majors) or BA 3305 (non-business majors); 2.75 TTU GPA. Study of the design and management of organizations in considerable depth beyond the basic course.

- 3390—Creating Value in a Changing World (3).** Prerequisites: B- or better in MGT 3370; 2.75 TTU GPA. Students learn to navigate and excel in today's rapidly evolving business landscape.
- 4370—Consulting to Entrepreneurial Organizations (3).** Prerequisite: C or better in MGT 3370 (business majors) or BA 3305 (non-business majors). Field Project in the Lubbock Community. Not an in-classroom course.
- 4372—Diversity, Equity, and Inclusion in Organizations (3).** Prerequisite: C or better in MGT 3370. Examines various forms of diversity, effective D&I practices, impacts of individual D&I perspectives on work experience, and the necessity of D&I in organizational performance.
- 4373—Leadership Ethics (3).** Prerequisites: C or better in MGT 3370 (business majors) or BA 3305 (non-business majors); 2.75 TTU GPA. Alternative perspectives of leadership and ethics are explored and applied to emergent ethical issues facing organizations.
- 4374—International Entrepreneurship (3).** Prerequisites: C or better in MGT 3370 (business majors) or BA 3305 (non-business majors); minimum cumulative 3.0 Texas Tech GPA. Focuses on how entrepreneurs and firms recognize and fulfill opportunities for wealth creation in an international context.
- 4375—International Management (3).** Prerequisites: C or better in MGT 3370 (business majors) or BA 3305 (non-business majors); 2.75 TTU GPA. Exploration of organization and management issues in international enterprise.
- 4376—Entrepreneurship: Discovering Entrepreneurial Opportunities (3).** Prerequisites: C or better in MGT 3370 (business majors) or BA 3305 (non-business majors); 2.75 TTU GPA. Generates and refines entrepreneurial process, opportunity discovery, and entrepreneurial thinking skills; develops the knowledge base for entrepreneurial idea assessment and problem-solving skills required for application to the recognition of viable opportunities.
- 4377—Family Enterprise (3).** Prerequisites: Previous experience in a family business or intent to establish a family business; 2.75 TTU GPA. Exploration of major issues and strategies for initiating, building and managing a family business.
- 4379—Technology Commercialization (3).** Prerequisite: 2.75 TTU GPA. Develops specialized, real-world, interdisciplinary (e.g., business + engineering) technology commercialization skills using integrated learning processes for projects with technical and/or value creating content.
- 4380—Strategic Management (3).** Prerequisites: Business students in their final semester with a C or better in MGT 3370; 2.75 TTU GPA. Strategy is an integrative course focusing on an organization's pursuit of superior economic performance by deciding what business to be in and how to compete. (CL)
- 4381—Individual Problems in Management (3).** Prerequisites: 2.75 TTU GPA; consent of instructor. For students with high academic achievement who are interested in enhancing their degree program by pursuing individual research or study under the guidance of a management faculty member.
- 4382—Internship in Management (3).** Prerequisites: Approval prior to employment; 2.75 TTU GPA. Permits students to apply the concepts, principles, and techniques learned in the classroom. Up to 3 hours of internships can be applied toward a degree program.
- 4383—Special Topics in Management (3).** Prerequisites: 2.75 TTU GPA; consent of instructor. Examines specialized problems relating to management. May be repeated once for credit as topic varies.
- 4384—Managing Conflict and Negotiations (3).** Prerequisites: C or better in MGT 3370 (business majors) or BA 3305 (non-business majors); 2.75 TTU GPA. Develop the skills necessary to manage organizational stakeholders effectively. Emphasizes negotiation skills.
- 4385—Recruitment, Selection, and Retention (3).** Prerequisites: C or better in MGT 3370 (business majors) or BA 3305 (non-business majors); 2.75 TTU GPA. Introduces students to employee selection and placement issues, including job analysis, criterion development, development and use of employment tests, validation of selection techniques, recruitment strategies, and statistical methods for making fair employment decisions.
- 4386—Entrepreneurship: New Venture Creation (3).** Prerequisites: C or better in MGT 3370 (business majors) or BA 3305 (non-business majors); 2.75 TTU GPA. Students learn and apply due diligence, business planning, and venture creation skills needed to implement new business concepts.
- 4387—History of Management Thought: Honors Seminar in Management (3).** Prerequisites: A 3.0 Texas Tech GPA and HPM, MGT, or PLM majors or Honors College student. Offers interdisciplinary perspective on development of management knowledge.
- 4388—Change and Innovation Processes (3).** Prerequisites: C or better in MGT 3370 (business majors) or BA 3305 (non-business majors); 2.75

TTU GPA. Focuses on understanding and managing innovation and change processes.

- 4389—Team Leadership (3).** Prerequisites: C or better in MGT 3370 (business majors) or BA 3305 (non-business majors); 2.75 TTU GPA. Introduction to the dynamic nature of teams using an experiential approach. Explores various roles in the interactions among team members, team members and leader, and team leader and the organization.
- 4397—Management and the Business Environment (3).** Prerequisites: C or better in MGT 3370 (business majors) or BA 3305 (non-business majors); 2.75 TTU GPA. Study and cases in social responsibility, business ethics, and other problems in the external environment of the business organization.
- 4399—Human Resource Management Capstone (3).** Provides students with opportunities to demonstrate mastery of the human resource management concentration coursework through review strategies and intensive preparation for the SHRM Assurance of Learning Assessment.

About the Area

The Area of Marketing and Supply Chain Management supervises the following degree programs:

- Bachelor of Business Administration in Marketing
- Bachelor of Business Administration in Supply Chain Management

Undergraduate Programs

Marketing, B.B.A., Supply Chain Management, B.B.A.

The undergraduate programs in marketing and supply chain offer solid curricula and learning experiences that prepare students for success. Both majors are designed to provide students with an understanding of the cutting-edge ideas and practices that will not only prepare them for their first positions but will also give them the foundations needed to advance in the future.

The **marketing degree** offers a concentration in sales. A grade of B or better in MKT 3350 is required to progress as a marketing major.

The degree in **supply chain management** focuses on managing the flow of goods, services, finances, and information from point of origin to point of consumption in global supply chains. Supply chain management requires the analytical ability to make data-driven decisions and the interpersonal skills to manage essential business relationships. Supply chain managers must be able to communicate, collaborate, and coordinate with customers and suppliers. The degree prepares students for challenging careers in supply chain management in areas such as transportation, inventory management, strategic sourcing, distribution, customer service, and demand management. Admission into the supply chain management program is competitive and based on a comprehensive review of a student's application materials.

Communication Literacy Requirement. Communication Literacy courses for the Marketing and Supply Chain Management majors include: MCOM 2310; PCOM 3373; ISQS 3344; and MKT 3356, and MKT 4385.

Sales and Customer Relationship Management, Undergraduate Certificate

Specifically designed to prepare business students with the critical skills required to develop successful sales strategies, implement new technologies and build and maintain business relationships, the four-course Sales & Customer Relationship Management Certificate prepares undergraduate students to set themselves apart in the professional world. Required courses are MKT 4350, 4351, 4352, 4359. Courses may be taken in any order.

Undergraduate Course Descriptions

Marketing (MKT)

- 3350—Marketing for a Global Marketplace (3).** Prerequisites: C or better in MATH 1330; and ECO 2301 or ECO 2302 or ECO 2305 or AAEC 2305; minimum cumulative 2.75 Texas Tech GPA. Overview of marketing and how it is used in creating, communicating, delivering, and exchanging valuable market offerings to customers. The course includes an applied international experience.
- 3351—Services Marketing (3).** Prerequisites: B or better in MKT 3350; 2.75 TTU GPA. Services are more difficult to market than products. This course explores the dynamic nature of services marketing based on value and relationships.
- 3352—Consumer Behavior (3).** Prerequisites: B or better in MKT 3350; 2.75 TTU GPA. The buyer as a problem solver; buying decision processes; factors influencing behavior; principles, theories, and models; behavioral research techniques.
- 3356—Marketing Research and Analysis (3).** Prerequisites: B or better in MKT 3350 and C or better in MATH 2345 or MATH 2300; 2.75 TTU GPA. Scientific marketing research methods; emphasis on collection, analysis, and interpretation of data as applied to the solution of marketing problems. (CL)
- 4350—Personal Selling (3).** Prerequisites: B or better in MKT 3350; 2.75 TTU GPA. Customer-focused selling, including socialization to a career in sales.
- 4351—Customer Relationship Management (3).** Prerequisites: B or better in MKT 3350; 2.75 TTU GPA. Provides knowledge and understanding of customer relationship management (CRM) concepts, strategies, and tools.
- 4352—Sales Analytics and Data Driven Sales Strategies (3).** Prerequisites: B or better in MKT 3350; 2.75 TTU GPA. Focuses on metrics, forecasting and analytical approaches used in sales evaluation and driving sales strategies.
- 4354—Integrated Marketing Communications (3).** Prerequisites: B or better in MKT 3350; 2.75 TTU GPA. Management of the promotional mix of advertising, personal selling, and sales promotion. Emphasizes the interaction and coordination of these three elements and relates them to the other components of the firm's marketing strategy.
- 4355—Digital Marketing (3).** Prerequisites: B or better in MKT 3350; 2.75 TTU GPA. Focuses on digital marketing strategies, and social media tools used by firms to manage and analyze their virtual presence for marketing purposes.
- 4356—New Product Development (3).** Prerequisites: B or better in MKT 3350; 2.75 TTU GPA. Focuses on the elements of marketing strategy, consumer behavior, value proposition, pricing strategies, promotion, and distribution strategies with respect to New Product Development (NPD) Process.
- 4358—International Marketing (3).** Prerequisites: B or better in MKT 3350; 2.75 TTU GPA. A survey of international marketing principles, cultural differences, world markets, and political constraints.
- 4359—Sales Management (3).** Prerequisites: B or better in MKT 3350; 2.75 TTU GPA. Problems and methods of organization and administration of sales departments, sales operations, sales control, sales promotion, and sales policies.
- 4381—Individual Problems in Marketing (3).** Prerequisites: 2.75 TTU GPA; consent of instructor. For students with high academic achievement who are interested in enhancing their degree program by pursuing individual research or study under the guidance of a marketing faculty member.
- 4382—Internship in Marketing (3).** Prerequisites: At least 6 hours of approved marketing courses and approval prior to employment; 2.75 TTU GPA. Internship must include at least 10 consecutive calendar weeks of full-time employment; compensation must be commensurate with the work assignment for the entire internship.
- 4383—Special Topics in Marketing (3).** Prerequisites: B or better in MKT 3350; consent of instructor; 2.75 TTU GPA. Examination of specialized problems in such topics as working capital management, capital budgeting, cost of capital, commodity and financial future investment, and small business finance. May be repeated once for credit as topic varies.
- 4385—Marketing Strategy (3).** Prerequisites: C or better in 9 hours of MKT 3000-4999 courses; 2.75 TTU GPA. Explores the field of marketing as it directs the organization's resources to satisfy customers' wants and needs through the exchange of process at a profit to the organization. (CL)

Supply Chain Management (SCM)

- 3351—**Business Process Improvement (3)**. Prerequisites: C or better in MATH 1330 and ECO 2301 or ECO 2305, and a 2.75 TTU GPA. Focuses on the fundamental concepts, techniques, and tools for improving business processes in supply chain contexts.
- 3353—**Supply Chain and Operations Management (3)**. Prerequisites: C or better in MATH 1330 and ECO 2301 or AAEC 2305; minimum cumulative 2.75 TTU GPA. An overview of how SCM enables technology to enhance supplier and customer relationships, operations, logistics, compliance, project management, and sourcing. Students gain cross-functional experience regarding demand-driven value networks.
- 4370—**Forecasting and Inventory Management (3)**. Prerequisites: B or better in SCM 3353 or C or better in SCM 3351; 2.75 TTU GPA. Covers demand management, customer service, forecasting, and inventory management aspects of business logistics. Introduces select analytical techniques, strategies, and applied problem-solving approaches.
- 4371—**Transportation and Distribution Management (3)**. Prerequisites: B or better in SCM 3353 or C or better in SCM 3351; 2.75 TTU GPA. Covers transportation and distribution aspects of business logistics. Introduces select analytical techniques, strategies, and applied problem-solving approaches.
- 4372—**Global Sourcing (3)**. Prerequisites: B or better in SCM 3353 or C or better in SCM 3351; 2.75 TTU GPA. Focuses on the global sourcing function, supplier selection and development, total cost of ownership, and performance management.
- 4373—**Supply Chain Strategy (3)**. Prerequisites: B or better in SCM 3353 and C or better in SCM 3351; 2.75 TTU GPA. Capstone course with emphasis on strategic supply chain management that integrates concepts, processes, and tools learned in previous coursework.
- 4382—**Internship in Supply Chain Management (3)**. Prerequisites: Admission into the supply chain management program and approval of internship coordinator prior to employment; 2.75 TTU GPA. Hours of employment must be worked in the term that internship credit is awarded.
- 4383—**Special Topics in Supply Chain Management (3)**. Prerequisites: Admission into the supply chain management program and consent of instructor; 2.75 TTU GPA. Examination of specialized problems or select current events in supply chain management. May be repeated once for credit as topic varies.

Jerry S. Rawls College of Business Graduate Programs

Academic Requirements

Admission to graduate degree programs offered through the Rawls College of Business is based on undergraduate grade point average, test scores (e.g., GMAT), and individual profile. No thesis is required in any of the master's degree programs. As part of the comprehensive evaluation process for graduation, a master's student must successfully complete one of the following as approved by their specific area of concentration: a final comprehensive examination, a capstone course, or a project. Students may be directed to enroll in a specific section. Students not enrolled in a degree-seeking program or certificate program within the Rawls College of Business may take up to 12 credits hours within the Rawls College of Business. Any deviations from this rule must be approved by The Rawls Graduate & Professional Programs Office.

The college requires that master's program students maintain at least a 3.0 GPA. Doctoral students must maintain at least a 3.2 average. A student's GPA is computed from all graduate courses. Students falling below these averages will be subject to probationary action. To graduate, master's students must have at least a 3.0 program GPA.

Technology Requirements

The Rawls College of Business building is equipped with technology that includes printing kiosks, breakout rooms with technology consoles and high definition monitors, classrooms with internet access, internet and power tables, and free Wi-Fi throughout the building. Access to a computer is required for many assignments; students are required to provide their own device for accessing the internet and printing kiosks when necessary.

Master's

Master of Business Administration, M.B.A.

The M.B.A. program provides a broad background in business with particular emphasis on developing managerial perspective, analytical tools, and business skills. The Rawls College of Business provides Microsoft Office Excel Specialist certification. The 42-hour program is AACSB accredited and may be completed in one of four formats:

STEM M.B.A.: In this lock-step format, students may choose to complete the program in 12 or 24 months. They are required to complete the STEM concentration.

Online M.B.A.: In this flexible format, students may choose to complete the program in as few as 12 months. Students may choose to add an additional concentration in Information Technology, Marketing Analytics, Health Organization Management, or Human Resource Management.

Professional M.B.A.: The Rawls College Professional M.B.A. is a two-year, part-time hybrid program requiring 42 credit hours (14 courses). Students complete online courses and meet in-person one weekend a month (three times per semester) and attend in-person classes in one of four convenient locations: Lubbock, San Antonio, Dallas/Fort Worth, or Houston, Texas.

Dual M.B.A.: Format and time to completion vary per primary program.

All M.B.A. programs are lock-step; please work with the M.B.A. advisor for course scheduling.

M.B.A. Concentrations

STEM Concentration. The 6-hour STEM concentration introduces business application in STEM-related industries. Students with STEM backgrounds will be able to apply concepts to STEM-related jobs. Courses include: MKT 5381, 5353, 5373; BA 5322.

Information Technology Concentration. The 6-hour IT concentration introduces IT courses relevant for managers working in the IT industry. Students desiring to work in the IT field after earning an M.B.A. will benefit from this concentration. Courses are: ISQS 5341, 5330.

Healthcare Organization Management Concentration. The 6-hour Healthcare Organization Management concentration introduces courses relevant for managers working in the healthcare industry. Students desiring to work in the healthcare field after earning their M.B.A. will benefit from this concentration. Courses include: HOM 5306, 5307, 5308, 5309, 5382.

Marketing Analytics Concentration. The 9-hour Marketing Analytics concentration introduces analytics courses relevant for managers working in industry. Students who desire to work in marketing after earning an M.B.A. will benefit from this concentration. Courses include: MKT 5369, 5370, 5371, 5372, 5373, 5374, 5375, 5376.

AI and Data Science in Business Concentration. The 12-hour AI and Data Science in Business concentration introduces courses relevant for students who desire to manage and analyze business data using information technology tools and quantitative methods with the objective of optimizing business processes. The concentration is available for the Rawls Professional M.B.A. program only. Courses include: BA 5385; ISQS 5330, 5332, 5333, 5341; MKT 5373.

Energy Business Concentration. The Energy Business concentration is available for the Rawls Professional M.B.A. program only. BECO 5310 is a prerequisite to taking this concentration.

The 12-hour Energy Business concentration introduces courses relevant for students working in the energy industry. Professional M.B.A. students currently working in or who desire to work in the energy field will benefit from this concentration. Courses include: ENCO 5301, 5303, 5321, 5365.

Human Resource Management Concentration. The Human Resource Management (HRM) concentration in the M.B.A. program provides students with the knowledge, skills, and abilities that managers need to complete their jobs, such as recruiting, training and development, compensation, and global management of human resources.

- Required Course: MGT 5377 (*MGT 5371 is a prerequisite or corequisite.*)
- Choose any two from the following five courses: (*MGT 5371 and MGT 5377 are prerequisites for all.*) MGT 5385, 5387 (*MGT 5385 is an additional prerequisite.*), 5388 (*MGT 5385 is an additional prerequisite.*), 5386, 5384

Professional Master of Business Administration, M.B.A.

This M.B.A. program is offered for students who wish to remain employed full-time while simultaneously attaining their degree. Classes are offered one weekend per month; students may expect to complete this 42-hour program in 2 years. The Rawls College of Business provides Microsoft Office Excel Specialist certification.

- M.B.A. Core: ACCT 5301; FIN 5320; ISQS 5331, 5345; MKT 5360; MGT 5371, 5372, 5391
- Electives: ACCT 5307; FIN 5324; ISQS 5330; MGT 5381, 5374; MKT 5373

AI and Data Science in Business Concentration. Available for Professional M.B.A. only. The AI and Data Science in Business concentration introduces courses relevant for students who desire to manage and analyze business data using information technology tools and quantitative methods, with the objective of optimizing business processes. Courses include: BA 5385; ISQS 5330, 5332, 5333, 5341; MKT 5373.

Energy Business Concentration. The Energy Business concentration is available for the Rawls Professional M.B.A. program only. BECO 5310 is a prerequisite to taking this concentration.

The 12-hour Energy Business concentration introduces courses relevant for students working in the energy industry. Professional M.B.A. students currently working in or who desire to work in the energy field will benefit from this concentration. Courses are: ENCO 5301, 5315, 5321, 5365.

Healthcare Organization Management Concentration. The 6-hour Healthcare Organization Management concentration introduces courses relevant for managers working in the healthcare industry. Students desiring

to work in the healthcare field after earning their M.B.A. will benefit from this concentration. Courses include: HOM 5306, 5307, 5308, 5309, 5382.

Human Resource Management Concentration. The Human Resource Management (HRM) concentration in the M.B.A. program provides students with the knowledge, skills, and abilities that managers need to complete their jobs, such as recruiting, training and development, compensation, and global management of human resources.

- Required Course: MGT 5377 (*MGT 5371 is a prerequisite or corequisite.*)
- Choose any two from the following five courses: (*MGT 5371 and MGT 5377 are prerequisites for all.*) MGT 5385, 5387 (*MGT 5385 is an additional prerequisite.*), 5388 (*MGT 5385 is an additional prerequisite.*), 5386, 5384

Supply Chain and Optimization Concentration. The Supply Chain and Optimization concentration focuses on building the leadership skills needed to run broad-spectrum supply chains by developing a solid analytical and problem-solving foundation. Students in this program establish and sharpen these in-demand skills to become robust supply chain leaders who can navigate future business challenges. Courses are: ISQS 5334, 5335; MKT 5385, 5386.

STEM Master of Business Administration, M.B.A.

This 42-hour M.B.A. program is specifically designed for students with undergraduate degrees in science, technology, engineering, and mathematics (STEM). The lock-step program may be completed in 12 or 24 months of on-campus courses and a distance component. The Rawls College of Business provides Microsoft Office Excel Specialist certification.

- M.B.A. Core (24 Hours): ACCT 5301; FIN 5320; ISQS 5331, 5345; MGT 5371, 5372, 5391; MKT 5360
- STEM Concentration (6 Hours): The 6-hour STEM concentration introduces business application in STEM-related industries. Students with STEM backgrounds will be able to apply concepts to STEM-related jobs. Courses include: MKT 5353, 5373, 5381; BA 5322
- Electives (12 Hours): BECO 5310; BLAW 5390; ISQS 5330; MKT 5365

Accounting, M.S.A.

The 36-hour M.S.A. program is designed to prepare graduates for professional careers in the practice of accounting. Concentrations are available in auditing/financial reporting and taxation. Graduates are prepared for professional service in a variety of fields.

- Core Courses (18 Hours): ACCT 5302, 5309, 5319, 5327, 5332, 5392
- Audit/Financial Reporting Concentration (12 Hours): ACCT 5303, 5305, 5320, 5321
 - Audit/Financial Reporting Electives (Choose 3 Hours): ACCT 5382; Other 53--
- Tax Concentration (12 Hours): ACCT 5304, 5308, 5315, 5318
 - Tax Electives (Choose 3 Hours): ACCT 5320, 5382; Other 53--
- Capstone Course Requirement for Both Tracks: ACCT 5334 (*Must be taken in the last semester of the program. Must earn a grade of "B" or higher.*)

Contact: 806.742.3181 | RawlsGrad@ttu.edu

Data Science, M.S.

The 36-hour master's degree in Data Science is a lock-step program. Courses are seven to eight weeks in length, except summer courses, which will be four or five weeks in length. All courses are available both online and face-to-face. The students can choose between the one-year in-person, one-year, or two-year online options.

- Summer Courses (12 Hours): ISQS 5346, 5350, 6337, 6338
- Fall Courses (12 Hours): ISQS 6339, 6347, 6349, 6350
- Spring Courses (12 Hours): ISQS 5341, 5342, 5381, 7339

Finance, M.S.

The 30-hour M.S. in Finance equips students with the knowledge and skills necessary to succeed in the many fields of finance, including corporate

finance, security analysis, valuation, investment management, commercial and investment banking, real estate analysis, and investments.

- Required Courses: FIN 5321, 5322, 5323, 5325, 5328, 5329, 5382; MKT 5367
- Electives (9 Hours): Choose three from FIN 5326*, 5327*, 5330, 5331†, 5333†, 5382

Notes: FIN 5321 Capstone course: must earn a grade of “B” or better. Must be taken in last semester available prior to graduation.

* Required for the Investment Management Concentration.

† Required for the Commercial Banking Concentration.

Commercial Banking Concentration. Only M.S.F. students can pursue the Commercial Banking Concentration.

- Required Courses (12 Hours): MKT 5367; FIN 5331, 5333; and choose one of the following: FIN 5330, 5345, or 5382.

Investment Management Concentration. The Investment Management Concentration provides students with advanced coursework that prepares them for careers in investment management. Only M.S.F. students can pursue the Investment Management Concentration.

- Required Courses (12 Hours): MKT 5367; FIN 5326; and choose two of the following: FIN 5330, 5327, 5382.

Contact: 806.742.3181 | RawlsGrad@ttu.edu

Information Systems, M.S.

The 36-hour master’s degree in Information Systems is a two-year program, where students will be immersed in development techniques on multiple different platforms, such as mobile, web, database, and blockchain, while also addressing user needs and risk assessment.

First Year

- Fall (9 hours): ISQS 6338 OR Elective (*ISQS 5331 recommended*), ISQS 6335, 6336
- Spring (9 hours): ISQS 6345, 6346, 6355

Second Year

- Fall (9 hours): ISQS 6356, Elective (*ISQS 6339 recommended*), Elective (*ISQS 6347 or 6349 recommended*)
- Spring (9 hours): ISQS 6365, 6367, Elective (*ISQS 7339 or 5331 recommended*)

Electives: ISQS 5346, 6349, 6350, 7339, 6337, 6339, 6347, 5331, 5330, 5341.

Marketing Research and Analytics, M.S.

The 30-hour M.S. in Finance equips students with the knowledge and skills necessary to succeed in the many fields of finance, including corporate finance, security analysis, valuation, investment management, commercial and investment banking, real estate analysis, and investments.

- Required courses: MKT 5360, 5376; MKT 5369 or ISQS 5345; MKT 5370, 5371, 5372, 5373, 5374, 5375, 5380 (*Capstone Course*)

Business Administration, Ph.D.

This degree is offered with first-field and second-field specializations in accounting and taxation, finance, management, marketing, management information systems, and business statistics. The program of study requires a minimum of 60 semester credit hours beyond the bachelor’s degree, plus approximately 12 hours of dissertation research. There are three emphases for the student: to provide a broad, integrated knowledge of business; to develop specialized knowledge in at least two fields; and to develop research skills. Students are expected to be competent in linear algebra and calculus as determined by the area of specialization. By completing coursework with a minimum grade of B, students must satisfy requirements in advanced statistics and economics early in the program. There is no foreign language requirement. A student who is successful should complete degree requirements in four years of full-time study beyond the master’s degree. For more information visit:

www.depts.ttu.edu/rawlsbusiness/graduate/phd/index.php

Intra-Institutional Dual Degrees

Business Administration, M.B.A. / M.Arch.

The Rawls College of Business Administration in association with other colleges and schools offers programs that enable students to obtain selected master’s degrees and an M.B.A. degree. These dual degrees require 12 hours fewer than if both degrees were pursued separately. Acceptance is required by both programs prior to pursuing a dual degree. The Rawls College of Business provides Microsoft Office Excel Specialist certification. The M.B.A. courses are offered online; please work with the M.B.A. advisor for course scheduling.

Per the agreement, the Rawls College of Business Administration will accept 12 hours of Architecture classes toward the 42-hour M.B.A. degree, while the Huckabee College of Architecture will accept 6 hours of Business classes toward the 42-hour M.Arch. degree.

- M.B.A. Courses: ACCT 5301; FIN 5320; ISQS 5331, 5345; MKT 5360; MGT 5371, 5372, 5391
- M.B.A. Electives (Choose 2 out of 3): BECO 5310; ISQS 5330; BLAW 5390
- Architecture Courses: ARCH 5354, 5392, 5602

Business Administration, M.B.A. / Biotechnology, M.S. or Biomedical Science, Ph.D.

Rawls College, in association with the TTUHSC Graduate School of Biomedical Sciences, offers two programs allowing students the opportunity to earn both an M.S. in Biotechnology and an M.B.A., or an M.B.A. and a Ph.D. in Biomedical Sciences. Students must be admitted to both the Graduate School of Biomedical Sciences and the M.B.A. program. Rawls College accepts 12 hours from the Graduate School of Biomedical Sciences as electives in the M.B.A. program. Likewise, the Graduate School of Biomedical Sciences will accept 12 hours from the M.B.A. program as electives for the M.S. in Biotechnology or Ph.D. in Biomedical Sciences. The Rawls College of Business provides Microsoft Office Excel Specialist certification. The M.B.A. courses are offered online; please work with the M.B.A. advisor for course scheduling.

- M.B.A. Courses: ACCT 5301; FIN 5320; ISQS 5331, 5345; MKT 5360; MGT 5371, 5372, 5391
- M.B.A. Elective Courses (Choose 2 out of three): BECO 5310; BLAW 5390; ISQS 5330
- Biomedical Sciences Courses: GSBS 5471, 5372, 5373, 5174; GBTC 6101

Business Administration, M.B.A. / J.D.

Rawls College, in association with the School of Law, offers a program that enables the student to earn both the Doctor of Jurisprudence and M.B.A. degrees in approximately three years of full-time academic work. Law students may begin the dual program either the summer prior to the first year of law or the summer after the first year of law. Applications must be approved by both the School of Law and the Rawls College of Business. The Rawls College of Business provides Microsoft Office Excel Specialist certification. The M.B.A. program is lock-step and offered online; please work with your M.B.A. advisor for course scheduling.

- M.B.A. Courses: ACCT 5301; FIN 5320; ISQS 5331, 5345; MKT 5360; MGT 5371, 5372, 5391
- M.B.A. Elective courses: BECO 5310; ISQS 5330
- Law Electives (12 Hours of LAW classes that are applied toward the M.B.A. degree): LAW 6420, 6434, 6435

Business Administration, M.B.A. / M.D.

Rawls College, in association with the School of Medicine in the Texas Tech University Health Sciences Center, offers a program that gives students the opportunity to earn both the M.D. and the M.B.A. Students must be admitted to both the School of Medicine and the M.B.A. program with a concentration in health organization management. The M.B.A. program may be completed within two consecutive summers during the M.D. program. The Rawls College of Business provides Microsoft Office Excel Specialist certification. The M.B.A. program is lock-step and offered mostly online; please work with the M.B.A. advisor for scheduling.

- Summer-Year One (18 Hours): ACCT 5301; HOM 5307, 5308; ISQS 5330, 5345; MGT 5371
- Summer-Year Two (18 Hours): BECO 5310; FIN 5320; HOM 5382, 5309; MGT 5372; MKT 5360
- Medical School Courses Accepted Toward the M.B.A.: MSCI 5106 (*as Development of Clinical Skills 1*), 5106 (*as Patient, Physicians & Populations*)

Business Administration, M.B.A. / M.D. (El Paso)

Rawls College of Business and the Texas Tech University Health Sciences Center Paul L. Foster School of Medicine have partnered to offer a pathway program where students from Doctor of Medicine program at the Texas Tech University Health Sciences Center Paul L. Foster School of Medicine can earn their Master of Business Administration at the Rawls College of Business. Students must be admitted to both the School of Medicine and the Rawls College of Business' M.B.A. program with a concentration in Health Organization Management to pursue this pathway program. If a student participates in this pathway program, they could transfer in 8 credit hours from the M.D. program towards their M.B.A. and 6 credit hours from their M.B.A. towards their M.D. Students typically complete the 42-hour M.B.A. (HOM) program in one year. Students attend M.B.A. classes on-line during the gap year between the second and third year of the medical curriculum, starting in summer and ending in the spring semester. Please work with the M.B.A. advisor for scheduling.

- Required Courses (24 hours): ACCT 5301; FIN 5320; HOM 5307, 5308, 5309; ISQS 5345; MKT 5360; MGT 5372, 5391
- M.B.A. Electives (Choose 10 hours): BECO 5310; BLAW 5390; ISQS 5330; MKT 5364, 5373; BA 7000
- School of Medicine Courses Accepted Toward M.B.A.: PSCI 5221

Business Administration, M.B.A. / Mass Communications, M.A.

The MCOM/M.B.A. dual degree enables qualified students to pursue concurrent work in both Media & Communication and Business Administration. Pursuing the dual degree requires 12 hours fewer than if both degrees were pursued separately. Acceptance is required by both programs prior to pursuing a dual degree. The Rawls College of Business provides Microsoft Office Excel Specialist certification. The M.B.A. program is offered online; please work with the M.B.A. advisor for course scheduling.

- M.B.A. Courses: ACCT 5301; FIN 5320; ISQS 5331, 5345; MGT 5371, 5372, 5391; MKT 5360
- M.B.A. Elective courses (Choose 2): ISQS 5330; BECO 5310; BLAW 5390
- Mass Communications Courses (9 hours): MCOM 5364, 5366, 6350
- Mass Communication Electives (Choose 5): COMS 5314; MCOM 5312, MCOM 5316 / COMS 5304; MCOM 5347, 5370, 5374, 6310, 6315; ADV/PR/CMJ/JOUR 6315 (can be repeated twice); Other COMS/MCOM/ADV/CMJ/JOUR 5000-level or above course with COMC Graduate Advisor approval.

Business Administration, M.B.A. / Nursing, M.S.

Rawls College of Business and the Texas Tech University Health Sciences Center School of Nursing developed an innovative dual degree program to provide nursing students with management and business skills to address the future leadership needs of an evolving healthcare environment. This dual degree is a fully online program allowing students to earn a Master of Science in Nursing and a Master of Business Administration at the same time. Students must be admitted to both the School of Nursing and the M.B.A. program. The Rawls College of Business provides Microsoft Office Excel Specialist certification. All M.B.A. programs are lock-step and offered online; please work with the M.B.A. advisor for scheduling.

- M.B.A. Courses: ACCT 5301; FIN 5320; ISQS 5345; MGT 5371, 5372; MKT 5360
- HOM Concentration: HOM 5306, 5309
- M.B.A. Electives (Choose 2): BECO 5310; BLAW 5390; ISQS 5330; MKT 5364, 5365, 5373
- Nursing Electives: NURS 5447, 5448, 6410

Business Administration, M.B.A. / Personal Financial Planning, M.S.

The Rawls College of Business in association with other colleges and schools offers programs that enable students to obtain selected master's degrees and an M.B.A. degree. These dual degrees require 6 hours fewer than if both degrees were pursued separately. Acceptance is required by both programs prior to pursuing a dual degree. The Rawls College of Business provides Microsoft Office Excel Specialist certification. This certification is required for graduation. All M.B.A. programs are lock-step; please work with the M.B.A. advisor for course scheduling.

- M.B.A. Courses: ACCT 5301; FIN 5320; ISQS 5331, 5345; MKT 5360; MGT 5371, 5372, 5391
- M.B.A. Elective Courses (Choose 4): ISQS 5330; BA 5380; BECO 5310; BLAW 5390; HOM 5306; MKT 5364, 5365, 5370, 5371, 5372, 5373, 5374, 5375, 5376
- PFP Courses (Choose 6 hours of PFP courses applied toward the M.B.A. degree): PFP 5371, 5394, 5398, 5325, 5326, 5360, 5365, 5383, 5385

Business Administration, M.B.A. / Pharm.D.

The student will earn both the Pharm.D. and M.B.A. degrees during the four years of pharmacy school. This degree track produces outstanding pharmacists with greater insight into the intricacies of healthcare management systems. Students admitted to this M.B.A. program with a concentration in health organization management begin the course of study in the summer before or after the first year of pharmacy school. Areas of study include accounting, management strategy, business decision-making skills and methods, business information systems, and other core skills in the business curriculum. For a more specific knowledge of the organizational context in which healthcare is provided, students complete courses concentrating in health organization management. Acceptance is required by both programs prior to pursuing a dual degree. The Rawls College of Business provides Microsoft Office Excel Specialist certification. The M.B.A. program is lock-step and offered online; please work with the M.B.A. advisor for course scheduling.

- Summer-Year One (15 Hours): ACCT 5301; HOM 5307, 5308; ISQS 5330, 5345
- Summer-Year Two (15 Hours): BECO 5310; FIN 5320; HOM 5309; MGT 5371; MKT 5360
- Pharmacy Courses Accepted Toward the M.B.A. (12 Hours): PHAR 5372, 2218, 4270, 4274, 1101, 3219

Business Administration, M.B.A. / Sport Management, M.S.

The Rawls College of Business Administration and the Department of Kinesiology and Sport Management offer a dual-degree program enabling students to earn a Master of Business Administration (M.B.A.) and Master of Science in Sport Management (M.S. in SPMT) in two years. This combination of degrees will aid students interested in becoming athletic directors or senior administrators of collegiate or professional sport programs. Students can complete a 42-hour M.B.A., which is only offered online, and a 30-hour M.S. in SPMT with 9 credit hours applying to both degrees for a total of 54 credit hours. Students can be in either the in-person or online SPMT Master's program to do the dual-degree M.B.A./M.S. After admission into the M.S. in SPMT, a prospective student must be admitted into the M.B.A. program. The M.B.A. program is offered online; please work with the M.B.A. advisor for scheduling.

- M.B.A. Courses: ACCT 5301; FIN 5320; ISQS 5331, 5345; MKT 5360; MGT 5371, 5372, 5391
- M.B.A. Elective Courses (Choose 2 out of 3): BECO 5310; BLAW 5390; ISQS 5330
- SPMT Courses: SPMT 5324, 5325, 5329, 5345

Business Administration, M.S.A. / J.D.

Rawls College, in association with the School of Law, offers a program that enables the student to earn both the Doctor of Jurisprudence and M.S.A. degrees. In many cases, the student in this program will be able to save numerous semester credit hours in comparison to those needed to complete both degrees separately. A student with an undergraduate

accounting degree may complete both degrees with 105 hours of law and business courses. Application must be made to and approved by both the School of Law and the Rawls College of Business.

- M.S.A. Requirements: ACCT 5304, 5306, 5308, 5309, 5320, 5327, 5332, 5334 (*Must be taken in the semester of graduation; must earn a grade of B or higher.*)
- Law Electives Applied to the M.S.A.: LAW 6420, 6434, 6435

Graduate Minor

Advanced Research Methods in Business

Rawls College of Business Ph.D. students may earn an optional minor in advanced research methods by completing the requisite courses and specialty paper. Note the following caveats regarding the methods minor option.

- Completion of the Advanced Research Methods Minor is an optional/voluntary component of the RCOB Ph.D. program. That is, no additional requirements to the extant program are imposed to earn a Ph.D. in Business. Instead, pursuit of the advanced methods minor is voluntary, as students elect to complete the programmatic requirements for a Minor in Advanced Research Methods. Students who fulfill the requirements for the Methods Minor will also receive recognition as a CARMA (Consortium for Advanced Research Methods and Analysis; <https://carmattu.com>) Research Methods Scholar.
- If a student elects to pursue the Advanced Research Methods Minor, there is no change to the existing program requirements with respect to course work and qualifying exams. That is, regardless of whether students elect to pursue the methods track, they are still required to complete existing requirements with respect to Area qualifying exams. To complete the Advanced Research Methods in Business Minor, doctoral students must fulfill the following additional programmatic requirements.
 - Successfully fulfill the requirements for five additional graduate level methods courses. Two to three of these courses can build upon CARMA short courses (<https://carmattu.com/short-courses/>). That is, the student enrolls in either a BA 6300 (Advanced Business Research Methods) or a BA 7000 (Special Topics in Research Methods and Analysis) class, with the requirement to complete two CARMA Short Courses along with a deliverable based on those courses (e.g., a research proposal, empirical, methodological critique, etc.) to earn course credit. Additionally, two to three (depending on the number of BA 6300/BA 7000 courses completed) methods courses from the existing Texas Tech Graduate curriculum must be successfully completed.
 - Successfully prepare a Specialty Paper on Advanced Research Methods. To earn the Business Minor in Advanced Research Methods, students must prepare an Area Specialty Paper on Advanced Research Methods. Prior to starting on the Specialty Paper, a three-page proposal that includes the title and a detailed description of the proposed research must be approved by the Area Ph.D. Committee. Following the completion of the Specialty Paper, the student will present the research to Area faculty and doctoral students. Evaluation of student performance on the paper will be conducted by the members of the Area Ph.D. Committee. If the committee determines that the candidate has not performed satisfactorily, it may recommend that the candidate prepare a revision based on the Committee's feedback. The revision will be evaluated by the Area Ph.D. Committee. If the revision is not approved, the student will not receive the designation of a minor in Advanced Research Methods. The content of the Area Specialty Paper on Advanced Research Methods must be distinct from the any Area requirements for a Specialty Field Paper and may include a review of an area research methods relevant to business research. This review might address technical aspects of the method, how the method is used in business research, an application of the method to empirical data, a simulation investigating the method, or presentation of a new method from outside the field of business. Other topics are acceptable if approved by the Area Ph.D. Committee. Note that the paper can be focused purely on introducing, refining, or reviewing applications of a particular

methodology that has high current or potential utility for research in the student's area of concentration (e.g., Accounting, Finance, Marketing and Supply Chain Management, Information Systems & Quantitative Sciences), or it can be focused on how to apply a particular methodology in an innovative way to contribute to a substantive body of research in the student's area of concentration. The expectation is that the paper will be of the sufficient breadth and quality to merit consideration for publication in a high-quality journal.

Graduate Certificates

Business Analytics

The 15-hour Graduate Certificate in Business Analytics is designed to train professional analysts to help organizations with the collection, filtering, storage, and analysis of very large amounts of data to support decision making. Business Analytics is one of the fastest growing areas in the business world today, and is in high demand in organizations and consulting companies.

- Required (15 Hours): ISQS 5346 OR 5347; 5341, 5342, 6337, 6338.

Essentials of Business

The 15-hour graduate certificate in Essentials of Business provides tools for a wide variety of business areas, including accounting, finance, information systems and quantitative sciences, management, and marketing. Choose 15 hours from ACCT 5301; BA 5301; FIN 5320; ISQS 5331; MGT 5371; MKT 5360.

Strategic Leadership

The 12-hour Graduate Certificate in Strategic Leadership is designed to develop a broad perspective on management in an organization, while strengthening the role of leadership by creating a sustainable climate, capable of countering workforce challenges and incorporating management tools for change into the day-to-day culture. There is a strong focus on preparing leaders to adapt to external opportunities and threats, as well as to improve organizational viability. Required courses are: MGT 5371, 5372, 5374, 5381.

Tax Certificate for Personal Financial Planners

This certificate program is designed to provide graduate personal financial planning students with additional tax knowledge so as to enhance their professional opportunities with boutique firms specializing in financial and tax planning. Required courses are: ACCT 5307, 5315, 5318, 5327.

Graduate Course Descriptions

Accounting (ACCT)

- 5301—Financial and Managerial Accounting (3).** Examines the objectives, structure, and substance of financial reports and the use of accounting in the management of an organization.
- 5302—Introduction to Data and Analytics for Accountants (3).** Prerequisites: ACCT 3305, ACCT 4300, ISQS 2340. Learn strategies designed to manage and manipulate data to support decision-making by management, the accounting function and other stakeholders. Also focuses on developing skillsets related to usage of advanced statistical software common to the accounting profession.
- 5303—Advanced Accounting Information Systems and Controls (3).** Prerequisites: Admission to M.S.A. program and ACCT 4301. Provides an understanding of information technology and data governance, assurance and advisory services regarding business processes, internal control testing, and information system security.
- 5304—Applied Data and Analytics for Tax Accountants (3).** Prerequisites: ACCT 3305, ACCT 4300, ISQS 2340. The introduction of computerized information systems topics tailored to the technical information tax accountants will need to be successful in the profession. The focus will include systems controls and development procedures, and automated data analyses techniques.

- 5305—Accounting Research and Communication (3).** Prerequisite: Admission to M.S.A. program. Written and oral communication examining individual studies of selected accounting topics.
- 5306—International Taxation (3).** Prerequisite: Admission to M.S.A. program. Study of taxation of individual and business entities operating outside the States and foreign entities operating in the States.
- 5307—Income Tax Accounting for Managers (3).** A detailed study of key provisions of the Internal Revenue Code combined with tax planning in common business and personal transactions.
- 5308—Federal Income Tax Law for Partnerships (3).** Prerequisites: Admission to M.S.A. program and ACCT 5318. Analysis of accounting by partnerships and other pass-through entities including LLCs. Focus is on economic and tax consequences for investors operating business or investment activities through partnerships and other pass-through entities.
- 5309—Advanced Accounting (3).** Prerequisites: Admission to M.S.A. program and ACCT 3305. A study of the accounting and reporting problems associated with consolidated financial statements, partnerships, and issues related to selected entities or types of ownership.
- 5310—Energy Accounting for Managers (3).** Prerequisite: B or better in first attempt at ACCT 3304, or equivalent course in financial reporting. Accounting as it applies to the production of oil and gas; including taxation and reporting issues. Introduction to accounting issues relating to renewable energies such as solar and wind.
- 5311—Individual Study in Accounting (3).** Prerequisite: Consent of instructor. Directed individual study of advanced accounting problems varying with the need of each student. May be repeated for up to 9 hours credit if subject matter differs.
- 5315—Estate and Gift Taxation (3).** Prerequisite: Admission to M.S.A. program. Intensive study of federal taxation of the estate and trust entities and the transfer of property rights through gifts and bequest.
- 5318—Income Tax Research and Planning (3).** Prerequisite: Admission to M.S.A. program. Fundamental procedures in research of income tax subject areas, such as property transactions, employment contracts, etc. Principles involved in necessary planning of actions for a desired tax result.
- 5319—Auditing Theory and Practice (3).** Prerequisites: Admission to M.S.A. program and ACCT 4301. A study of advanced concepts, theories, and techniques applied to external financial, governmental, and internal audit engagements.
- 5320—Analysis of Financial Accounting Information (3).** Prerequisites: Admission to M.S.A. program and ACCT 4301. Study of how financial accounting information is used by auditors, lenders, investors, regulatory compliance officers, management, and employees. Includes advanced analysis of financial reports, as well as economic trends and business valuation.
- 5321—Advanced Data and Analytics for Accountants (3).** Prerequisites: ACCT 3305, ACCT 4300, ACCT 4301, ACCT 5302, ISQS 2340. Corequisite: ACCT 5303. Learn strategies related to advanced database and querying skills in addition to expanding on forensic accounting topics and financial information modeling techniques.
- 5327—Advanced Income Taxation Accounting (3).** Prerequisite: Admission to M.S.A. program. Study of advanced income tax affecting business and investment.
- 5332—Ethics in Accounting (3).** Prerequisite: Admission to M.S.A. program. Introduces students to accounting ethics and professionalism. Independence issues and the Code of Professional Ethics are highlighted.
- 5334—Professional Accountancy Capstone (3).** Prerequisites: All requirements of the M.S.A. program must be met prior to enrollment, must be taken in last semester of study, and must have instructor consent. Prepares students for the accounting profession through intensive study, testing, and preparation for professional certification.
- 5382—Internship in Accounting (3).** Prerequisites: Admission to M.S.A. program and completion of ACCT 4301 for non-tax internships and ACCT 5318 for tax internships. Students apply knowledge of concepts, principles and technologies learned in class, within their field of specialization.
- 5392—Advanced Business Law (3).** Prerequisite: C or better in BLAW 3391. Second course in business law.
- 6300—Colloquium in Accounting Research (3).** Studies in selected areas of accounting research. Topics vary by semester. May be repeated for credit.
- 6301—Archival Research in Accounting (3).** This seminar explores accounting research using empirical-archival methods, primarily with respect to the role of financial accounting in capital markets.
- 6303—Applied Accounting Research Methods (3).** Explores topics including, but not limited to, philosophy of science, cutting edge research methods and current statistical tools, software and programming used in empirical accounting research.

- 6305—Advanced Seminar in Corporate Governance Accounting Research (3).** Explores current topics and issues related to corporate governance, including advanced technologies and methodologies used in this research stream.
- 6314—Behavioral Research in Accounting (3).** Prerequisite: Admission to doctoral program. This seminar explores how accounting research uses experimentation to investigate the ways in which accounting impacts judgments and decisions.

Business Administration (BA)

- 5301—Business Essentials (3).** Provides students with a basic understanding of how the various business areas work together to deliver value to their stakeholders.
- 5321—Negotiation and Business Law (3).** Examines the legal, regulatory, and ethical issues that arise in the conduct of business to develop a capacity for recognizing and dealing with such issues. Emphasizes negotiation skills and strategy development for managing organizational stakeholders.
- 5322—Technology Commercialization (3).** Focuses on how to recognize, screen, and develop technology opportunities to become commercial products and services.
- 5380—Directed Experience (3).** Prerequisite: Admission to the MBA program. Students enhance their classroom knowledge through the rigorous analysis of internships, global filled experiences, mentoring experiences, and other approved experiences. May be repeated for credit up to 9 hours if subject matter differs.
- 5382—Internship in Business Administration (3).** Minimum standards determined by area. Written approval form required. Permits students to enhance their knowledge within their field of specialization through application of concepts, principles, and techniques learned in the classroom. May be repeated for credit.
- 5385—Artificial Intelligence Strategies in Business (3).** Prepares managers to adapt and transform their firm into an AI-powered company and help improve their offerings, customer acquisition, and market competition.
- 5395—Practicum in Higher Education for Business (3).** Prerequisite: Instructor consent. Supervised practice in teaching of business and administrative subjects.
- 6300—Advanced Business Research Methods (3).** First methods course for incoming business Ph.D. students. Focuses on key advanced topics in business academic research methods.
- 7000—Research (V1-12).**
- 8000—Doctor's Dissertation (V1-12).**

Business Economics (BECO)

- 5310—Economic Analysis for Business (3).** Prerequisite: Admission to M.B.A. program. Studies markets in which firms compete within the context of a global supply chain, including markets for good and services, financial markets, and labor. Emphasizes how the interactions of these markets affect the formulation and implementation of business strategies.
- 5345—Economics of Regulation (3).** Study of the economic criteria of public regulation of private business with emphasis on public policy. Theories of regulation. Regulation of various markets.
- 5376—Austrian Economics (3).** Applied topics will include entrepreneurship and competition theory, regulation and anti-trust, business cycles, comparative systems and economic development, and business management.
- 5399—Global Energy Case Analysis (3).** Integrates and reviews prior course material in realistic case settings. Requires strategic assessment, communication, and use of (and balance between) quantitative and qualitative information.

Business Law (BLAW)

- 5390—Legal, Regulatory, and Ethical Environment of Business (3).** Examines legal, regulatory, and ethical issues related to business activities with emphasis on changing landscape based on ever-changing technology.

Energy Commerce (ENCO)

- 5301—Structure and Function of the Modern Energy Industry (3).** Provides essential, foundational, and institutional information about the structure and operations of the energy industry.
- 5303—Energy Business Law Topics (3).** Introduces students to energy industry laws and policies, covering topics related to oil, gas, renewables, legal procedures, dispute resolution, and commercial contracts.
- 5313—Energy Economics I (3).** Provides core instruction in economic theory of energy resources and analysis of economic policy.

- 5314—Energy Economics II (3).** Provides advanced knowledge of energy economics with in-depth modules on different energy sectors and the role of environmental and economic policy.
- 5315—Geopolitics of Energy (3).** Investigates the business environment of non-U.S. OECD economies (e.g., geopolitics and law) related to maintaining adequate energy supply necessary to maintain economic growth and political stability.
- 5321—Energy Markets (3).** Provides understanding of structure and function of markets for energy products.
- 5365—Energy Project Evaluation and Finance (3).** Provides students with an understanding of how the oil and gas industry uses data and analytical tools to develop business strategies, evaluate capital projects, and acquisition and divestitures. Provides fundamental preparation in microeconomics and macroeconomics for students.
- 5373—Energy and Developing Economies (3).** Focuses on availability and sustainability of energy resources to meet global energy demand. Emphasizes opportunities and risks involved with investing in markets centered in emerging economies.

Finance (FIN)

- 5320—Financial Management Concepts (3).** Prerequisite: ACCT 5301. Essential financial management concepts with applications to financial decision making in organizations. Special emphasis on cases and computer financial models.
- 5321—Financial Management Case Analysis (3).** Prerequisite: Admission to M.S. Finance program or consent of M.S. Finance director. In-depth analysis of financial decision-making in areas of capital budgeting, risk, capital structure, financial analysis, dividend policy, mergers, financial failure. Case studies and computer financial models are used.
- 5322—Corporate Finance (3).** Prerequisite: Admission to M.S. Finance program or consent of M.S. Finance director. Theoretical foundations of corporate finance with applications to financial decision making. Special emphasis on computer financial models.
- 5323—Valuation (3).** Prerequisite: Admission to M.S. Finance program or consent of M.S. Finance director. Application of the theory and practice of financial analysis and business valuation.
- 5324—Financial Statement Analysis and Equity Valuation (3).** Prerequisites: C or better in FIN 5322; admission to M.S. Finance program, admission to Finance Graduate Certificate program, or consent of M.S. Finance program coordinator. In-depth financial analysis leading to equity valuation.
- 5325—Seminar in Security Analysis and Investments (3).** Prerequisite: Admission to M.S. Finance program or consent of M.S. Finance director. Evaluation of various investment media (stocks, bonds), investment analysis (both fundamental and technical analysis), and the concept of efficient markets and market risk.
- 5326—Seminar in Investment Management (3).** Prerequisite: Instructor consent. Explores current practices in portfolio theory and investment management, preparing students for professional certification in the securities and investment industries. [FIN 4325]
- 5327—Student-Managed Fund (3).** Prerequisite: Instructor consent. Advanced application of the process of selecting securities and forming and managing a portfolio involving real money. Focus is on managing risk and return. May be repeated for credit.
- 5328—Options and Futures (3).** Prerequisite: Admission to M.S. Finance program or consent of M.S. Finance director. Focuses on the pricing and use of financial derivative securities and their role in investment management and financial risk management.
- 5329—Fixed Income (3).** Prerequisite: Admission to M.S. Finance program or consent of M.S. Finance director. Determination of saving-investment, demand for funds, theory of interest rates, portfolio selection, security pricing. Examination of money markets, bond markets, mortgage markets, tax-exempt markets.
- 5330—Advanced Financial Methods (3).** Prerequisite: Admission to M.S. Finance program or consent of M.S. Finance director. Exploration of programming and statistical methods for financial decision making.
- 5331—Seminar in Bank Management (3).** Prerequisite: Admission to M.S. Finance program or consent of M.S. Finance director. Management of financial institutions, including commercial banks, investment banks, mutual funds, insurance companies, etc.
- 5332—Fundamentals of Real Estate (3).** Prerequisite: Admission to M.S. Finance program or consent of M.S. Finance director. Introduction to real property law, finance, valuation, investment analysis, and brokerage. Includes operations of real estate markets and urban analysis.
- 5333—Seminar in Credit and Lending (3).** Prerequisite: Admission to M.S. Finance program or consent of M.S. Finance director. Explores current practices in the operations, mechanics, regulation, and structure of a

bank's credit and lending function, preparing students for professional certification in the commercial banking industry.

- 5334—Real Estate Finance (3).** Prerequisite: C or better in FIN 5322; admission to M.S. Finance program, admission to Finance Graduate Certificate program, or consent of M.S. Finance program coordinator. Covers primary and secondary mortgage markets, alternative mortgage instruments, creative financing, loan underwriting, and risk management.
- 5336—Individual Study in Finance (3).** Prerequisite: C or better in FIN 5322, FIN 5323, and FIN 5321; consent of M.S. Finance program coordinator. Directed individual study of advanced finance problems. May be repeated for credit.
- 5345—Real Estate Analysis (3).** Prerequisite: Admission to M.S. Finance program or consent of M.S. Finance director. A survey of the law, valuation, and financing of real estate, including secondary market analysis. Also, investigation into investment property ownership, feasibility, cash flow, and return calculations.
- 5382—Internship in Finance (3).** Prerequisite: Admission to M.S. Finance program or consent of M.S. Finance director. Permits students to enhance their knowledge within their field of specialization through application of concepts, principles, and techniques learned in the classroom.
- 6036—Seminar in Special Topics in Finance (V2-3).** Prerequisite: Instructor consent. Doctoral seminar covering the major theoretical and empirical studies in the area of finance as determined by the instructor. May be repeated for credit.
- 6122—Research Seminar in Finance (1).** Prerequisite: Instructor consent. Seminar in current research topics and methodology in finance. Should be taken by doctoral students each semester of the program. May be repeated for credit.
- 6331—Seminar in Asset Pricing Theory (3).** Prerequisite: Instructor consent. Doctoral seminar covering major theories that have been developed in the area of asset pricing.
- 6332—Seminar in Corporate Finance (3).** Prerequisite: Instructor consent. Doctoral seminar covering major theories and empirical studies that have been developed in the area of corporate finance.
- 6333—Seminar in Empirical Methods in Asset Pricing (3).** Prerequisite: Instructor consent. Doctoral seminar covering major empirical studies that have been developed in the area of asset pricing.
- 6335—Seminar in Financial Markets and Institutions (3).** Prerequisite: Instructor consent. Doctoral seminar covering major theoretical and empirical studies that have been developed in the area of financial markets and institutions.

Health Organization Management (HOM)

- 5306—HOM I: Introduction to Healthcare Systems (3).** Prerequisite: Admitted to HOM or consent of instructor. Provides and introductory-level overview of the United States healthcare system in terms of historical, current, political, organizational, human resources, financial, access-related, and quality dimensions.
- 5307—Managing Healthcare Organizations (3).** Examines management of healthcare organizations, including issues pertaining to human resources, financing, organizational design, law, and the organization's role in a rapidly changing environment.
- 5308—Healthcare Operations Management and Quality (3).** A study and application of healthcare operations management and quality tools emphasizing systems improvements through use of information technology and quantitative methods.
- 5309—HOM IV: Integrated Healthcare Operations (3).** Synthesizes components of prior courses and presents new knowledge through critical thinking skills and case studies.
- 5382—Field Experience in HOM (3).** Prerequisite: Consent of instructor. Exposes students to multiple levels of healthcare organizations while allowing them to develop skills in a defined project.

Information Systems and Quantitative Sciences (ISQS)

- 5059—Individual Study in ISQS (V1-3).** Prerequisite: Instructor consent. Directed individual study of advanced ISQS topics varying with the need of the particular student. May be repeated for credit if subject matter is different.
- 5330—Decision Theory and Business Analytics (3).** Provides an overview of business analytics and examines normative and behavioral theories that drive managerial decision-making.
- 5331—Business Information Technology (3).** Provides essential business knowledge while keeping individuals up to date with the latest trends in

information technology. Aims to empower students with the necessary tools to enhance their competitive advantage in the business landscape.

- 5332—Machine Learning Applications for Business (3).** Provides students with data analytics techniques that can be used to improve business problem solving and decision making.
- 5333—Data Intelligence and Visualization (3).** Focuses on methods to identify valuable data both inside and outside the organization and visualize the information to different audiences.
- 5334—Optimal Decisions in the Supply Chain (3).** Provides students with skills to identify and assess optimal decisions for supply chain planning and operation and discusses how to develop linear and mixed-integer optimization models for various classical problems in the supply chain.
- 5335—Risk and Resilience in Supply Chain (3).** Prerequisite: ISQS 5345. Provides tools and techniques for controlling uncertainties in supply chain systems and covers not only how to predict and manage demand uncertainties but also how to be prepared for the cascading effect of demand changes by quantifying the risks exposure of supply chain nodes and strategies to address these risks.
- 5338—Information Technology for E-Business (3).** E-commerce technology and business environment. E-commerce planning and implementation, Internet technologies, Multimedia on the Web. Web-based databases. Designing and building e-commerce site.
- 5341—Big Data Strategy (3).** Theory and practice of using data to create competitive advantage.
- 5342—Big Data Security (3).** Practical and theoretical study of information security with a focus on big data security guidelines in business practices. Topics may include: cyber threat intelligence, intrusion detection and prevention, cryptography and implementation of secure platforms.
- 5343—Operations Management and Management Science (3).** Prerequisite: ISQS 5345. Fundamentals of the operations management function from a management perspective with an emphasis on the creation of value through the integrated production and distribution of goods and services.
- 5345—Statistical Concepts for Business and Management (3).** Statistical applications using the personal computer, with emphasis on proper presentation and interpretation of statistics in managerial settings. Topics include descriptive statistics, graphical methods, estimation, testing, regression, forecasting, and quality control.
- 5346—Statistics for Data Science (3).** Discrete and continuous probability distributions, statistical methods for learning, prediction, and decision making. Uses calculus.
- 5347—Advanced Statistical Methods (3).** Discrete and continuous probability distributions, maximum likelihood, Bayesian methods, simulation, statistical methods for learning, prediction, and decision making. Uses calculus.
- 5348—Applied Distribution-Free Statistics in Business (3).** Prerequisite: C or better in ISQS 5345 or instructor consent. Distribution-free statistical techniques of inference from non-normal populations and tests of nonparametric hypotheses applied to business problems.
- 5349—Regression Analysis (3).** Prerequisite: C or better in ISQS 5347. Foundations and major topics of regression analysis, model formulation, and methods to deal with standard and nonstandard regression applications in business.
- 5350—Data Technology Environments (3).** Prerequisite: Instructor consent. Introduces different technological environments and the technologies where data is stored, accessed, and analyzed. Focuses on client-server design, cloud-based design, block-chain implementations, and additional industry-focused technologies. BA students only.
- 5381—Data Science Project (3).** Prerequisite: ISQS 6347. Students develop and implement a project in the field of data science.
- 5382—Internship in Information Systems and Quantitative Science (3).** Prerequisite: Instructor consent. Permits students to enhance their knowledge within their field of specialization through application of concepts, principles, and techniques learned in the classroom.
- 6335—Business Application Scripting (3).** Covers basics of scripting, web programming with JavaScript for business. May include syntax, functions, arrays, objects, flow control, document object models.
- 6336—Risk Management in Information Systems (3).** Introduces IS risk and control concepts central to info security management. Prepares students with auditing knowledge, tools, and discusses regulations.
- 6337—Scripting Languages (3).** Survey of current business analytics scripting languages.
- 6338—Database Concepts (3).** Model organizational data and business rules; logical and physical designs of relational databases, data warehousing, data mining, and data administration.
- 6339—Business Intelligence (3).** Prerequisite: C or better in ISQS 6338. Data warehousing, including extracting, transforming, loading, creating data warehouses, cubes, dimensional data modeling, techniques for managing large data sets, unstructured data sets, distributed data sets, and non-relational data sets.
- 6340—Decision Support Systems (3).** Prerequisite: C or better in ISQS 6338. Theories of decision making, DSS software and design, artificial intelligence in DSS, executive information systems, and institutionalization and behavioral factors.
- 6341—Data Communications and Network Management (3).** Concepts and terminology of data communications, network design, client-server architecture, distributed information systems with focus on communications architecture, and management.
- 6345—Data Structures for Business Applications (3).** Focuses on understanding, implementing, and administering data-related issues. Covers data structures, algorithms, and time complexity analysis with real-world business examples.
- 6346—Web Application Development (3).** Introduces web app development concepts, tools, and skills to solve business problems, covering data structures, frameworks, deployment, version control, and design patterns.
- 6347—Machine Learning (3).** Provides in introduction to machine learning techniques including, but not limited to, classification modeling (decision trees, logistic regression), clustering (including the application to marketing), association analysis, machine learning (AI related methods), neural networks, text and web mining.
- 6348—Applied Multivariate Analysis (3).** Prerequisite: C or better in ISQS 5347 or instructor consent. Multivariate methods for business research, including classification, visualization, testing, clustering, and latent structure.
- 6349—Time Series Analysis (3).** Prerequisite: C or better in ISQS 5346 or ISQS 5347, or instructor consent. Time series estimation and forecasting methods for business and econometrics.
- 6350—Multivariate Analysis (3).** Prerequisite: ISQS 5346 or ISQS 5347, or instructor consent. Multivariate methods for data science research, including classification, visualization, testing, clustering, and latent structure.
- 6355—Interface Design and UX for Business (3).** Introduces UI design skills, frameworks, and concepts, enhancing application UX. Covers business cases emphasizing user attention, engagement, and communication management.
- 6356—Web3 Infrastructure Development (3).** Introduces the concepts of Web3 infrastructure including devices, blockchains, and all other layers of the blockchain technology. Discusses the technologies, tools, and solutions that developers need to build and operate efficient Web3 ecosystems.
- 6365—Enterprise Architecture and System Integration (3).** Focuses on manipulating systems engineering and architecture in existing businesses, implementing and interacting with enterprise architecture frameworks.
- 6367—IT Capstone (3).** Students apply MS-IS program knowledge to conduct integrative projects for businesses, showcasing IT/IS skills in research or design, solving business cases.
- 7338—Systems Analysis and Design (3).** Prerequisite: C or better in ISQS 6338. Discusses various analysis and design methods and applies them to several case problems. Topics include requirement specification, design, and implementation architectures.
- 7339—Simulation & Optimization (3).** Prerequisites: C or better in ISQS 6337 and either ISQS 5346 or ISQS 5347. Development of models of causality underlying data structures. Topics may include: Discrete-event simulation, linear optimization, Monte-Carlo simulation, and sensitivity analysis.
- 7341—Seminar in MIS Research and Methods (3).** Prerequisite: Doctoral standing or consent of instructor. Seminar covering current MIS research methods and issues.
- 7342—Advanced Topics in Information Systems and Quantitative Sciences (3).** Prerequisite: Instructor consent. Topics include issues in MIS, statistics, and operations management. May be repeated for credit.
- 7346—Seminar in Cognitive and Behavioral MIS Research (3).** Prerequisite: Doctoral standing or consent of instructor. Seminar covering cognitive and behavioral MIS research.
- 7347—Seminar in Managerial and Organizational MIS Research (3).** Prerequisite: Doctoral standing or consent of instructor. Seminar covering managerial and organizational MIS research. May be repeated for credit.

Management (MGT)

- 5199—M.B.A. Capstone (1).** Prerequisite: Completion of, or concurrent enrollment in, all of the M.B.A. core courses. Integration and review of all M.B.A. core courses; comprehensive exam over all M.B.A. courses; evaluation of individual management and leadership skills; formula-

tion of individual Career Development Plan; assessment of individual progress toward M.B.A. program goals.

- 5300—Management in Special Contexts (3).** Special management topics will vary by semester and faculty instructor.
- 5371—Managing Organizational Behavior and Organizational Design (3).** Examines management of individual, interpersonal, group and inter-group relations, organizational design, and the organization's role in a rapidly changing environmental and global context.
- 5372—Leadership and Ethics (3).** Students apply alternative leadership and ethical perspectives through cognitive skill building and experiential learning to accelerate their development as authentic leaders.
- 5373—Opportunity Creation and Discovery (3).** Develops the new value creation skills and modes of thinking necessary for creating actionable opportunities in a variety of socioeconomic settings.
- 5374—Negotiation and Conflict Management Skills (3).** Emphasizes negotiation skills and strategy development for managing organizational stakeholders.
- 5377—Human Resource Management (3).** Examination of the principles and methodology of personnel administration with emphasis on manpower planning, selection, development, and evaluation.
- 5378—Leading and Managing the Effective Family Business (3).** Focuses on the exploration of the unique aspects of entrepreneurship in a family business enterprise.
- 5379—Applied Entrepreneurship (3).** Develops entrepreneurial skills with a focus on applying those skills to real-world situations such as the commercialization of new value-creating technologies.
- 5381—Managing Innovation and Change (3).** Focuses on understanding organization innovation and change and applying this knowledge to managing innovation and change processes.
- 5382—Internship in Management (3).** Prerequisite: Consent of instructor. Permits students to enhance their knowledge within their field of specialization through application of concepts, principles, and techniques learned in the classroom.
- 5384—International Human Resource Management (3).** Comparative analysis of domestic, international, and multinational business operations and the significance for HRM.
- 5385—Human Resource Information Systems and Analytics (3).** Prerequisites: B or better in MGT 5371 and MGT 5377. Focuses on the use of human resource information systems and human resource analytics to aid in the decision-making process in HRM.
- 5386—Employment Law and Labor Relations (3).** Prerequisites: B or better in MGT 5371 and MGT 5377. Provides an overview of the legal aspects of human resource management and an introduction to labor and employment relations.
- 5387—Talent Acquisition and Management (3).** Prerequisites: B or better in MGT 5371, MGT 5377, and MGT 5385. Provides an overview of macro and micro issues pertaining to talent acquisition, development, and management.
- 5388—Compensation and Benefits (3).** Prerequisites: B or better in MGT 5371, MGT 5377, and MGT 5385. Designed to provide the knowledge and skills required to design and implement comprehensive compensation and benefits systems within organizations.
- 5390—Individual Differences and Belongingness In Organizations (3).** Prerequisites: B or better in MGT 5371 and MGT 5377. Examines both the individual perspective of belongingness on one's work experience and the impact of belongingness on organizational performance.
- 5391—Strategic and Global Management (3).** M.B.A. Capstone. Global and local strategy formulation and implementation of corporate, business, and functional strategies.
- 5399—Strategic Human Resource Management Capstone (3).** Prerequisites: B or better in MGT 5371 and MGT 5377; to be taken in the last semester. Provides knowledge on designing and executing HRM strategies, managing human assets, implementing policies, and achieving competitive advantage.
- 5476—Executive Skills (4).** Develop self-awareness of personal attributes and goals, enhance personal development, and impart skills needed to function as future executives.
- 6305—Individual Study in Management (3).** Prerequisite: Instructor consent. Directed individual study of advanced management topics varying with the need of each student. May be repeated for credit.
- 6315—Current Management Issues (3).** Prerequisite: Consent of instructor. Study and integration of current management issues. May be repeated for credit.
- 6375—Advanced Organization Behavior (3).** Prerequisite: Doctoral student status or consent of instructor. A seminar which explores research and conceptual foundations of behavioral science and the role and contributions of microorganizational concepts in organization design and functioning.

- 6380—Colloquium in Management Research (3).** Prerequisite: Doctoral standing. Study of problems related to management for the individual student. Studies in selected areas of management research. May be repeated for credit.
- 6381—Seminar in Advanced Management Topics (3).** Organized seminar on specific advanced management topics in the areas of management of strategy, organizational studies, personnel and human resources management, or international business. May be repeated for credit.
- 6392—Advanced Organization Theory (3).** Prerequisite: Doctoral student status or consent of instructor. A seminar which explores the fundamental macro theories and concepts of organization design and functioning.
- 6395—Advanced Strategic Management (3).** Prerequisite: Doctoral student status or consent of instructor. A seminar which systematically examines the theoretical and empirical research literature on strategic management content and process.

Marketing (MKT)

- 5353—Supply Chain Management Concepts and Strategies (3).** Focuses on managing relationships, risks, and trade-offs in global supply chains. Emphasis on the strategic role of supply chain management as a source of competitive advantage and value creation.
- 5355—Research Design (3).** An in-depth examination of measurement issues, including latent constructs and data-gathering procedures in marketing.
- 5358—Business-to-Business Marketing (3).** Prerequisite: MKT 5360. Designed to provide an overview of the many diverse facets of business-to-business marketing. Specific topics include selling to large businesses, buyer-seller relationships, supply-chain management, strategic alliances, and the effect of the Internet on business-to-business marketing.
- 5359—Individual Study in Marketing I (3).** Prerequisite: Consent of instructor. Directed individual study of advanced marketing problems varying with the need of the particular student. Can be repeated for credit if subject matter is different.
- 5360—Marketing Concepts and Strategies (3).** Examines marketing functions, the institutions which perform them, and the study of marketing planning, strategy, and tactics. Includes the organization, execution, and control of the marketing effort.
- 5361—Marketing Administration (3).** Prerequisite: MKT 5360. A study of marketing planning and strategic issues related to the marketing effort.
- 5364—Services Marketing (3).** Designed to provide an overview of the basic functions, theoretical concepts, and terminology of the marketing of services to consumers and businesses.
- 5365—Advanced Professional Selling (3).** Students learn advanced professional selling techniques through an analytical and role-play approach.
- 5367—Relationship Management For Financial Services (3).** Prerequisite: Admission to M.S. Finance program or consent of M.S. Finance director. Provides interpersonal and core business development skills to acquire business relationships through excelling in all phases of communication, marketing, presenting, delivering, and managing the critical components of establishing and implementing a successful business development platform in the financial marketplace.
- 5369—Marketing Analytics Basics (3).** Provides students a foundation in marketing analytics using databases, analytics, and information systems to collect, analyze, and evaluate consumer information.
- 5370—Advanced Statistics for Marketing (3).** Prerequisite: ISQS 5345 or MKT 5369. Provides an overview of multivariate data analysis methods for research in the marketing, and provide hands-on experience with marketing-focused techniques. F.
- 5371—Measurements and Survey Research in Marketing (3).** Prerequisite: ISQS 5345 or MKT 5369. Focuses on measurement issues and developing and designing survey research studies in marketing research. F.
- 5372—Qualitative Research in Marketing (3).** Provides an overview of various qualitative research methods that are used in marketing research. SS.
- 5373—Market Forecasting and Analytics (3).** Prerequisite: C or better in ISQS 5345. For future managers who want to learn about advanced forecasting and analytical tools and apply them in making business decisions.
- 5374—Digital Marketing Analytics (3).** Students will learn analytical tools to analyze digital marketing data and develop digital strategies. S.
- 5375—Experimental Design and Analysis in Marketing (3).** Prerequisite: ISQS 5345 or MKT 5369. Focuses on developing skills applicable to experimental research in marketing, consumer behavior, and related fields. F.
- 5376—Consumer Behavior Research (3).** Prerequisite: MKT 5360. Provides an overview of consumer behavior theories and introduces research methods to analyze consumer data.

- 5380—Applications of Marketing Research (3).** Prerequisite: Successful completion of all other courses in the degree plan. Provides an opportunity to apply the tools and concepts of marketing research to a practical problem.
- 5381—STEM Theories in Business (3).** Survey of STEM topics including artificial intelligence, evolutionary theories, machine learning, optimization, social network analysis, and forecasting.
- 5382—Internship in Marketing (3).** Prerequisite: Consent of instructor. Permits students to enhance their knowledge within their field of specialization through application of concepts, principles, and techniques learned in the classroom.
- 5385—Micro Foundations of Supply Chain Management (3).** Advanced introduction to microfoundations of SCM and boundary-spanning integration of key business processes within the firm and across firms that constitute supply chains for effective SCM.
- 5386—Supply Chain Management Strategies (3).** Prerequisite: MKT 5385. Develops an in-depth understanding of integrative managerial issues and challenges related to developing and implementing a firm's supply chain strategy.
- 6300—Colloquium in Marketing (3).** Studies in selected areas of marketing. Topics vary by semester. May be repeated for credit.
- 6310—Advanced Topics in Marketing (3).** Seminar covering current issues in marketing. Topics vary by semester. May be repeated for credit.
- 6320—Advanced Topics in Marketing Research (3).** Seminar covering current issues in marketing research. Topics vary by semester. May be repeated for credit.
- 6350—Theory Building and Testing (3).** Prerequisite: Advanced graduate standing. Designed to provide an introduction to the research process as it applies to business disciplines.
- 6353—Marketing Theory (3).** Prerequisite: Advanced graduate standing and consent of instructor. A philosophy of science approach to the study of marketing theory and the components of marketing theory: hypotheses, law-like generalizations, empirical regularities, laws, models, and scientific explanations.
- 6354—Marketing Strategy (3).** Prerequisite: Advanced graduate standing and consent of instructor. Designed to examine issues regarding marketing strategy, its formulation, and its implementation.
- 6355—Theory Testing (3).** Prerequisite: Consent of instructor. A survey of quantitative methods for and issues in the analysis of marketing data.
- 6356—Consumer Behavior Seminar (3).** Prerequisite: Advanced graduate standing. A survey of the major research being carried out in consumer behavior.

College of Education

Kamau Oginga Siwatu, Ph.D., Dean

110 D Education | Box 41071 | Lubbock, TX 79409-1071
T 806.742.2377 | F 806.742.2179
www.depts.ttu.edu/education

About the College

The College of Education is committed to achieving rigor and relevance of all its programs. Working closely with partners in public schools, community agencies, and institutions of higher learning, college faculty have developed innovative programs to prepare graduates for the educational demands of the 21st century.

The college provides degree and certification programs for both undergraduate and graduate students who plan careers in the field of education. College faculty work closely with public school administrators, practitioners in the field, agency leaders, and higher education administrators to design programs that will prepare leading educators for a global society.

The College of Education is accredited by the Texas Education Agency, the State Board for Educator Certification, and the Association for Advancing Quality in Educator Preparation. Additionally, individual programs hold accreditation specific to their areas of expertise. Texas Tech University holds membership in the American Association of Colleges for Teacher Education. The teaching certificate earned at Texas Tech is accepted in a majority of the states in the nation through reciprocity agreements.

Programs in the college are housed in three departments. The Department of Teacher Education offers undergraduate programs leading to initial teaching certificates. The Department of Educational Psychology, Leadership, and Counseling offers graduate programs in counselor education, educational leadership, educational psychology, and higher education. The Department of Curriculum and Instruction offers graduate programs in bilingual education, curriculum studies, and teacher education, language literacy, blended/personalized learning, STEM education, and instructional technology. The Department of Special Education offers graduate programs in special education.

All students interested in becoming teachers or pursuing graduate programs in education should visit the college website for further information (www.depts.ttu.edu/education).

Educator Certification

The preparation of teachers and the provision of knowledge and skills for educators seeking advanced certificates are important functions of Texas Tech University at both the undergraduate and graduate levels. The coordination of the educator certification programs is the responsibility of the College of Education.

Undergraduate students in the college seek a degree in Education with teacher certification. Graduate students seeking professional educator certification enter a graduate program for certification with most leading to a master's degree. Admitted students must also apply to the educator preparation program (EPP). EPP admission is not guaranteed.

Students who want to teach will need to receive a "standard" or initial teaching certificate. Completing the program requirements in the College of Education leads to this initial certificate when all requirements are completed successfully.

A teaching certificate may also be obtained at Texas Tech through a Curriculum and Instruction Master's degree. Candidates must hold a bachelor's degree for consideration. See the graduate section of the catalog for more information.

Certification at the Undergraduate Level - TECHTeach

The college's teacher education program, TechTeach, is a clinically-intensive competency-based curriculum that features a full year of student teaching. The TechTeach program has been developed by Texas Tech University faculty in partnership with public school personnel. Those who complete the program will be highly capable teachers able to begin their teaching careers as skilled professionals.

Appropriate coursework accompanies student teaching. Teacher candidates follow the school district calendar for new teachers and participate in professional development opportunities with their mentor teachers.

The College of Education prepares students for a variety of teaching certificates. For a list of available certificates, please see Teacher Certification Concentrations.

Students preparing to teach at the elementary school level (Pre-K–6th grades) will major in Education with a concentration in Elementary Education. Students who want to teach middle school/junior high will seek a degree in Education with a concentration in Middle Level. These students will also select a specialization in Math, Science, Social Studies or English. Students seeking to teach at the secondary level (7–12th grades) in the areas of Math, Science or English will also major in Education. Students seeking secondary certification in other areas will major in their content area (e.g., History) and minor in education.

Students graduating with an initial certification from the College of Education are also eligible to seek certification in English as a Second Language (ESL) and Special Education (Sped).

All students seeking initial teaching certification at Texas Tech must successfully complete a series of competency-based performance assessments.

Students who are seeking certifications in specialized areas such as Art, Music, Agriculture, and Family and Consumer Sciences should contact the respective college for additional information.

General advice on specific degree requirements is available in the Office of the Associate Dean for Academic Affairs of the college in which the student is enrolled. The student will be advised on certification requirements by an appropriate advisor in the College of Education.

See www.depts.ttu.edu/education for additional information.

Admission to the Educator Preparation Program. Admission to College of Education certification programs is open to all individuals based on academic preparation, achievement, and availability of space in the selected program. When there are more qualified applicants than can be instructed adequately by the available faculty or accommodated in available facilities, the college will control enrollment in specific programs by limiting the admission of new students. The number of students accepted into the undergraduate elementary, middle-level education, all-level education, secondary education, and career and technology programs is limited. Therefore, admission into a teacher education program is competitive and based on GPA and other criteria. A complete description of eligibility requirements is available in the Educator Certification Office in the College of Education and online. (Entrance criteria may be subject to change.)

Admission to a college degree program does not ensure admission to an upper-division teacher certification program. Students seeking teacher certification may apply to a certification program through an admission process. An online application is available at www.depts.ttu.edu/education. All programs accept applications for a fall start only. Students should apply as early as possible in the spring semester prior to the desired fall start semester. For specific details, consult a College of Education advisor. To be considered for admission to teacher certification programs, students must meet the following minimum prerequisites:

1. Have a minimum of 60 semester hours (including current enrollment) with an acceptable scholastic GPA. Students seeking any certification must have a 2.75 or better overall GPA.
2. Possess college-level skills in reading, oral and written communication, critical thinking, and mathematics.
3. Possess the personal and social qualities and the physical and mental health to indicate a fitness for the education profession.
4. Have a state-mandated minimum cohort GPA of 3.0. If an applicant has met the minimum expectations listed in numbers 1-3, but the applicant's GPA will reduce the cohort GPA below 3.0 the candidate's application will be denied.
5. The student must be able to speak and understand the English language sufficiently to use it easily and readily in conversation and teaching.
6. Meet the requirements of all other criteria that may be established for the teacher certification program.

Admission to upper-division teacher education programs will be subject to additional entrance criteria depending on availability of space in the program selected.

No otherwise qualified student will be denied admission to a degree program, certification program, or student teaching because of race, religion, national origin, age, gender, or disabling condition.

Under some circumstances a student may be requested to leave a certification program. Such a request can be initiated by the college or by the student. Due process will be observed during this time.

While completing the requirements, a student must maintain a 2.75 GPA in the professional education courses and a 2.75 GPA in the teaching field(s). Grades of D are not acceptable in the professional education courses or in the teaching field(s). An overall GPA of 2.75 is required. Program courses are sequential and must be taken in the order outlined in the degree plan. Students must successfully complete each prior term to move to the next. Students in undergraduate programs must also successfully complete 50 hours of field experience.

Transferability. Developmental courses (e.g., basic introductory reading and mathematics courses) and vocational courses (e.g., auto mechanics, nursing) will not transfer for degree or certification programs. Courses with D grades do not transfer, depending on the guidelines of the Texas Higher Education Coordinating Board, Texas Tech University, and/or the college.

Certification Plan. Admitted students will file a certification plan in conjunction with their academic degree plan. Certification plans are created after completion of the prerequisite coursework (minimum 60 hours) or, for transfer students, during the first semester of attendance at Texas Tech. The student's advisors will assist in completing the certification plan. The requirement for filing a certification plan applies regardless of the degree sought, the subject that the student expects to teach, or the level (elementary, middle-level, secondary, or all-level) at which he or she expects to be certified. Degree plans and certification plans are not to be confused because they are two separate documents. The degree plan is to be filed in the office of the student's academic dean, whereas the certification plan must be filed in the College of Education.

Certification plans are completed during an intake interview with a College of Education advisor.

Student Teaching. Student teaching generally occurs during the senior year. Texas Tech follows a residency model requiring a full year of student teaching. Eligibility for student teaching is dependent on the following:

1. The applicant must have completed all appropriate coursework prior to student teaching. Additional courses will be taken during student teaching.
2. Students must pass the content TExES exam in their teaching field prior to the student teaching semester.
3. The student must have a grade point average of 2.75 or higher in professional education courses and in the teaching field(s) for middle-level and secondary teaching. Students seeking elementary certification must have a 2.75 or higher overall GPA. Students seeking middle-level, secondary, and all-level certificates must have a 2.75 or higher overall GPA.

Under some circumstances a student may be requested to leave a student teaching placement. Such a request can be initiated by the college, the

school district, or the student. Due process will be observed in considering whether an alternate placement will be made or the student teaching experience will be terminated.

Students applying for the Music, Art, Family and Consumer Sciences, and Agricultural Education certification programs are not subject to the same requirements. The requirements for these programs vary greatly. Contact an advisor in the program for more information.

TExES Exams. All persons enrolled in educator training programs and are candidates for initial Texas certification (i.e., those who do not hold a current valid Texas teaching certificate) must pass proficiency tests—Texas Examinations of Educators Standards (TExES)—in their fields of certification. All candidates for initial teacher certification must pass a test on pedagogy and professional responsibilities and a content pedagogy test in each area for which certification is sought. Students must meet program benchmarks and be approved by the test coordinator before test approval will be given. A fee is associated with all such examinations. To be eligible to take the exams, a student must complete a registration process online. Students will find exam information and access to the registration process at <https://www.depts.ttu.edu/education/undergraduate/index.php>. Students should also consult the website for exam testing dates and test preparation opportunities.

Recommendation for Teacher Certification. An individual who has maintained the levels of performance stated as prerequisites for admission to student teaching; who has completed all degree requirements; who has demonstrated the knowledge, dispositions, and skills to teach; who has completed student teaching, or an internship successfully; and who has passed all required state certification exams is eligible to apply for the appropriate teaching certificate.

The student must apply online to the State Board for Educator Certification at <https://tea.texas.gov/about-tea/leadership/state-board-for-educator-certification>. The state requires that applicants complete a fingerprint criminal background check before they may be certified. The state charges a fee for the certification process. Upon completion of all requirements, including the appropriate TExES examinations, the College of Education will recommend the student for certification.

Secondary Catalog Policy. Students pursuing a College of Education teacher concentration will use a primary catalog specific to their major. For the teacher education program, students will use a secondary catalog specific to the year they begin their College of Education teacher concentration.

This will be listed on the student's concentration record within Banner. The use of a secondary catalog year ensures that students will remain compliant with annually updated TEA rules and regulations.

Dismissal Policy. Students who do not adhere to the guidelines set by the university, State of Texas, or assigned school district certification program may be subject to dismissal. See the student handbook for specific details regarding potential dismissal.

Programs Offering Advanced Certification

Supplemental Certificates. Supplemental certificates are available for teachers holding an initial teaching certificate. Students may seek advanced certification in bilingual education, English as a second language, gifted and talented, generic special education, and visual impairment. Details are available on the college website under the appropriate program area. The bilingual and English-as-a-second-language certificates are available through the bilingual program area. Supplemental certificates in generic special education and visual impairment are available through the special education program area. Additional information is available at www.educ.ttu.edu.

Professional Certification Programs. The college offers professional certification programs in the following areas: principal, superintendent, school counselor, educational diagnostician, blended/personalized learning, master reading teacher, professional reading specialist, and certified orientation and mobility specialist. Some certificates may be combined with graduate programs leading to master's degrees or doctoral degrees in the related program areas. Admission criteria for these programs are set by the program area faculty in which the programs are housed. For admission information and details about the programs, see the college website for the appropriate program area. Educational Leadership, Special Education,

Counselor Education, and Literacy Education offer programs leading to educator certification in advanced certification areas.

Recommendation for Supplemental and Professional Certificates.

Students seeking supplemental and professional certificates must meet all program degree requirements, meet all educator preparation program requirements, pass the appropriate TExES exams, and apply for certification. After completing all requirements, students may apply for their certification online from the State Board for Educator Certification (tea.texas.gov).

Post Baccalaureate Initial Teaching Certification

The post-baccalaureate program is available for initial certification in the areas of family and consumer science, agricultural education, and music only at this time. Students desiring to enter the post-baccalaureate program must meet all of the entrance requirements as well as pass the TExES Pre-Admission test (PACT) in their content area prior to admission. Information about the process can be found at <http://cms.texas-ets.org/texas/registration-information/approval-test/> (PACT). Please contact an advisor in your content area for more information.

Alternative Certification Initial Teaching Certification

Persons holding a Bachelor's degree who would like to teach may complete a state-approved alternative certification program. Texas Tech's RAIDER Teach alternative certification program admits students seeking certification in middle level and secondary fields.

Interested students should meet with an education advisor and must apply for a Master's in Curriculum and Instruction degree with the Graduate School. Admission requirements can be found at www.educ.ttu.edu. Students must pass a PreAdmission Content Test (PACT) in the selected content area prior to admission. Admitted students must complete 50 hours of field experience and pass the TExES exam in their selected field prior to beginning program coursework. RAIDER Teach is a summer start program. Students will complete 12 hours of coursework over both summer terms. Students who successfully complete coursework and field experience will be eligible for an internship. An internship is a paid residency with a partner school district. Students must seek employment with the school district and be hired prior to beginning of the fall term before the internship can be initiated. Students who successfully complete the internship can apply to be recommended for certification. Details may be found in the educator preparation handbook at www.educ.ttu.edu

Department of Curriculum and Instruction

Mellinee Lesley, Ph.D., Interim Chairperson

Professors: Cheon, Cho, Greenhalgh-Spencer, Inan, Kim, Lesley, Maina, Saldaña, Wang

Associate Professors: Aquino-Sterling, Childers, Cruz, Hite, Matteson, Park, Pratt, Shin, Smit

Assistant Professors: Ataide Pinheiro, Basdogan, Fúnez-Flores, Hinojosa, Jung, Pedersen, Kaldalas

Research Assistant Professor: Mansell

Lecturers: Nguyen

About the Department

This department supervises the following degree programs and certificates:

- Master of Education in Curriculum and Instruction
 - General Option
 - Concentration in Blended/Personalized Learning
 - Concentration in Curriculum Studies/Teacher Education
 - Concentration in Language & Literacy
 - Concentration in STEM Education
- Master of Education in Bilingual Education and English as a Second Language
- Master of Education in Instructional Technology
- Master of Education in Language and Literacy
- Doctor of Education in Instructional Technology
- Doctor of Philosophy in Curriculum and Instruction
 - General Option
 - Curriculum Studies/Teacher Education Track
 - Language, Diversity, and Literacies Track
 - STEM Education Track
- Graduate Certificate in Advancing K-12 STEM Master Teacher Leadership (Basic)
- Graduate Certificate in E-Learning and Online Teaching
- Graduate Certificate in Developmental Literacy
- Graduate Certificate in K-12 STEM Education Advocacy Research (Advanced)
- Graduate Certificate in Personalized Learning Methods
- Graduate Certificate in Teacher Mentoring and Instructional Coaching

The Department of Curriculum and Instruction offers programs leading to advanced degrees, professional certificates and associated supplemental certificates. Information on admission standards, program requirements, and other matters concerning graduate programs in the department may be obtained from the department office, the Office of Graduate Education in the College of Education, and online at www.educ.ttu.edu. For more information on degree requirements, visit the Graduate School section of the catalog.

Bilingual Education and English as a Second Language, M.Ed.

The 30-semester hour master's program in Bilingual Education and English as a Second Language (ESL) is dedicated to preparing students to be educational leaders and advocates who, through rigorous academic and research-based programs of instruction, offer culturally and linguistically diverse students access to an excellent education. The program recognizes, values, and integrates the importance of multilingual and multicultural pedagogies for all students. Furthermore, it emphasizes that effective research-based instruction for second language learners will result in positive learning outcomes and dispositions, ensuring that our graduates become vital advocates for all members of a global society.

Contact: Dr. Comfort Pratt | 806.834.5710 | C.Pratt@ttu.edu

Curriculum and Instruction, M.Ed.

The Department of Curriculum and Instruction offers a 36-hour master's degree that is designed to meet the diverse needs of professional educators in elementary, secondary, and post-secondary education. Thesis and non-thesis options are available.

The 36-semester-hour plan includes core and specialty courses, and a 6-hour thesis or elective. Courses provide you with opportunities to develop, understand, and apply various curriculum, pedagogical, and assessment models in educational contexts. Students can choose a general option or choose a concentration for the M.Ed. in Curriculum and Instruction in the following areas: Curriculum Studies/Teacher Education, STEM Education, Bilingual and ESL Education, Personalized Learning, and Language and Literacy. Upon the completion of our program, students will be prepared to provide leadership in K-12 school districts and other educational settings in each of the respective areas. The department offers both face-to-face and online options for students to complete the program.

Contact: Dr. Mellinee Lesley | 806.834.1186 | mellinee.lesley@ttu.edu

Instructional Technology, M.Ed.

This fully online, 36-credit-hour degree prepares graduates to be specialists in the field of instructional design and technology. Instructional technology students come from a variety of backgrounds, including public school education, higher education, and the private sector. Courses include foundations in instructional design and technology, online and distance education, multimedia development and instruction, and instructional systems evaluation. Students will also gain first-hand experience in real-world practical application, research, and evaluation of instructional technology through a capstone practicum experience.

Graduates often accept positions as technology specialists in public education, consultants or developers of instructional materials in the private sector, or community college instructors or technology specialists. For more information, visit

https://www.depts.ttu.edu/education/graduate/curriculum-and-instruction/educational_and_instructional_technology.php.

Contact: Dr. Sungwon Shin | 806.834.6240 | sungwon.shin@ttu.edu

Language and Literacy Education, M.Ed.

The completely online Master's Degree in Language and Literacy is designed to prepare reading and literacy leaders in K-12 school districts and other educational settings. This degree is an ideal option for a career as a literacy coach, ELAR instructional coach, literacy curriculum leader, reading specialist, post-secondary reading instructor, professional development facilitator, literacy team leader, or classroom teacher. Graduates of this program develop in-depth knowledge of literacy processes that lead to increased student engagement and achievement with literacy tasks. Graduates will be able to confidently apply their knowledge to evaluate, design, and implement effective literacy instruction for culturally and linguistically diverse learners. The Language & Literacy graduate will also demonstrate the ability to sustain professional collaboration with a variety of educational stakeholders to foster ongoing growth as a literacy leader and practitioner.

Coursework in this program addresses topics such as reading comprehension of complex text, the science of teaching reading, culturally responsive pedagogy, writing process pedagogy, adolescent literacy, developmental literacy, early literacy methods, literacy assessment, language acquisition, teaching multilingual and transnational youth, translanguaging, digital literacies, and content area and disciplinary literacies.

Advanced certification as a Professional Reading Specialist is available as part of this degree.

Concentration in Dual Credit English. The Master's Degree in Language and Literacy with a concentration in Dual Credit English is designed to meet the growing demand for dual credit English coursework in secondary schools. The purpose of this credential is to provide secondary English teachers with the disciplinary and pedagogical knowledge needed to help students successfully transition from high school to college learning. In addition to developing expertise in literary and composition studies, coursework in the Language and Literacy program specializes in methods designed to accelerate students' ability to handle the literacy demands of

college-level reading and writing tasks. Coursework provides numerous opportunities to connect learning to real-world contexts for dual credit instruction. The Master's Degree in Language and Literacy is also designed to prepare literacy leaders in K-12 school districts. Graduates will develop in-depth knowledge of literacy processes and will be able to confidently apply their knowledge to evaluate, design, and implement effective literacy instruction for diverse learners.

Contact: Dr. Mellinee Lesley | 806.834.1186 | mellinee.lesley@ttu.edu

Instructional Technology, Ed.D.

The Doctor of Education (Ed.D.) in Instructional Technology is designed to prepare Instructional Technology professionals for leader/educator/researcher roles in various settings including schools, corporate, and higher education. The program includes an in-depth study of instructional design and educational technology applications and solid foundation of educational research and educational psychology. Throughout this program, students will use instructional design, learning theories, and concepts to explain an instructional need or problem and address it by providing an instructional product, system, or solution to maximize learning in a given situation.

The doctoral program requires 93 credit hours (including a dissertation) beyond a bachelor's degree. Doctoral program graduates often enter the field of higher education as professors, instructional designers, and technology specialists. For more information, visit www.depts.ttu.edu/education/graduate/psychology-and-leadership/educational_and_instructional_technology.php.

Contact:

Residential Ed.D.: Dr. Fethi Inan | 806.834.4743 | fethi.inan@ttu.edu

Online Ed.D.: Dr. Jongpil Cheon | 806.834.2052 | jongpil.cheon@ttu.edu

Curriculum and Instruction, Ph.D.

The Curriculum and Instruction program is a competency-based program for those who want to develop overarching theoretical and research bases in the field of curriculum and instruction and become scholars that engage in research partnerships with schools, districts, colleges, and local communities in pursuit of shared excellence and social activism. The degree is designed to emphasize studies in areas that are crucial to development of existing P-12 teachers, administrators, and curriculum specialists as well as college and university professors and administrators.

Students may choose a general Curriculum and Instruction option or choose one of three tracks: (1) Curriculum Studies and Teacher Education (CSTE), (2) Language, Diversity and Literacy Studies (LDLS), and (3) Science, Technology, Engineering and Mathematics Education (STEM). In addition to the curriculum and instruction core courses, students will take courses in the student's specialization area, research methods, and diversity. Students are required to demonstrate proficiency in independent research culminating in the completion of a dissertation.

The department offers both face-to-face and online options for students to complete the program.

Intra-Institutional Dual Degrees

Curriculum and Instruction, M.Ed. / Languages and Cultures, M.A. or Romance Languages, M.A.

There are 36 hours total each in the regular M.A. and M.Ed. programs. The joint degree will consist of 60 hours (36 credit hours for each program, with 12 credit hours mutually recognized toward each program's requirement and 24 credit hours that are unique to each program).

This joint degree will be of interest to students considering careers in human resources, instructional coaching, curriculum coordination, higher education, and K-12 education (both public and private) in the state of Texas and beyond. Students will graduate from this program with advanced skills in curriculum and instruction and in a specific content area: Applied Linguistics, Classics, French, German, or Spanish. The training they receive through this joint degree will equip them with transferable skills that are

coveted by employers, thus preparing them for a range of careers in the 21st century.

Graduate Certificate Programs

Advancing K-12 STEM Master Teacher Leadership (Basic)

This graduate certificate will focus on the development of K-12 STEM teacher leaders through experiences in exploring standards, curriculum reform, emergent pedagogies and assessment tools and communities of practice (e.g., professional learning communities, instructional coaching, community-based advocacy, and mentoring). Graduates of this certificate will be able to advocate for stronger (more equitable) learning spaces in K-12 STEM education. Required courses are EDCI 5306, 5309, 5312; ESTM 5371, 5372.

Contact: Dr. Rebecca Hite | 806.834.6370 | Rebecca.Hite@ttu.edu

Developmental Literacy

The 15-hour Graduate Certificate in Developmental Literacy fills a need in the community for qualified teachers in developmental literacy programs, adult basic education, adult literacy programs, alternative high schools, reading intervention programs in traditional high school settings, and GED programs. Required courses are EDLL 5344, 5342, 5356, 5366, and 5355 or 5350.

Contact: Dr. Mellinee Lesley | 806.834.1186 | mellinee.lesley@ttu.edu

E-Learning and Online Teaching

This fully online graduate certificate program is designed to provide students with distinctive skills associated with the design, development, facilitation, and evaluation of online courses and e-learning materials. The graduate certificate courses will provide conceptual knowledge as well as advanced practical skills in the areas of online pedagogy, curriculum development, instructional strategies, assessment, and management. Students apply these distinctive skills throughout their coursework in a variety of authentic online learning environments. Required courses are EDIT 5341, 5342, 5370, 5380, and 5390.

Contact: Dr. Fethi Inan | 806.834.4743 | fethi.inan@ttu.edu

K-12 STEM Education Advocacy Research (Advanced)

This graduate certificate will focus on the structures and policies that dictate K-12 STEM education and how to lead in fostering change to systemically improve K-12 STEM education. Graduates of this certificate will learn more about K-12 STEM education policy, develop and implement interventions, and research the efficacy of the implemented interventions to impact STEM education at scale. Prospective students are required to have a Master's degree before applying to this certificate program. Required courses are EDLD 6001; ESTM 6371, 6374, 6375, 6380.

Contact: Dr. Rebecca Hite | 806.834.6370 | Rebecca.Hite@ttu.edu

Personalized Learning Methods

The Graduate Certificate in Personalized Learning Methods is designed to give practitioners hands-on knowledge about the following topics: blended learning/personalized learning (BL/PL) foundations; data literacy and data-drive instruction; fostering student agency; creating community connections and collaborations; creating multiple pathways to mastery; and promoting competency-based learning. Graduates of this mastery-based program will have significant experience in teaching in BL/PL contexts, using BL/PL pedagogical strategies, peer-coaching, and critically using technology to enable better BL/PL learning and teaching. Students will also gain experience with the theories behind BL/PL, as well as applications of BL/PL for diverse contexts. Required courses are EDPL 5390, 5391, 5392, 5393, 5394.

Teacher Mentoring and Instructional Coaching

The 12-hour Teacher Mentoring and Instructional Coaching Graduate Certificate is designed to prepare experienced teachers to mentor beginning professionals in instructional strategies, classroom management strategies, and other aspects of daily classroom life, in addition to the policies and procedures specific to individual campuses.

Undergraduate Course Descriptions

Educational Instructional Technology (EDIT)

- 2318—Computing and Information Technology (3).** Use of computers as productivity tools, societal and ethical implications, and applications and related technology in society. Fulfills core Mathematics and Logic requirement.
- 3118—Technology in Educational Settings (1).** Students will have the opportunity to utilize technology applications that enhance the teaching/learning process. Course includes using technology to assess and monitor student learning.
- 3218—Introduction to Applications of Technology in Education (2).** Introduces students to technology as an educational tool. Students will learn applications of technology to enhance learning in school settings.
- 3318—Applications of Technology in Education (3).** Engages the undergraduate student in the use of technology as an educational tool. Students will have the opportunity to explore and utilize technology applications that enhance the teaching/learning process.

Graduate Course Descriptions

Curriculum Studies Teacher Education (ECTE)

- 5310—Critical Pedagogy and Social Justice (3).** Introduces ideas in critical theory that concern education and pedagogy, identifying barriers to the development of a more just and egalitarian society.
- 5315—Connecting Instructional Theory into Practice (3).** Provides graduate students with working knowledge of various instructional theories necessary for examining instructional theories with the intention to inform one's personal instructional style.
- 5318—Authentic Curriculum Assessment (3).** Designed to provide theoretical and experiential knowledge regarding basic principles of educational assessment, primarily the acquisition of alternative assessment skills through authentic approaches.
- 5335—Emerging Pedagogies and Designs (3).** Focuses on curriculum design and pedagogical strategies and examines the ways we think, interact, teach, and learn with digital technology in schooling spaces.
- 5381—Practical Applications of Curriculum, Instruction, and Assessment through Action Research (3).** Prerequisite: EDCI 5380, EPSY 5379, or consent of instructor. Designed to allow students to investigate a specific issue in their classroom/workplace, design a project using the Action Research model, collect and analyze data.
- 6301—Curriculum Theory: Foundations (3).** Designed to help conceptualize the curriculum field, understand philosophical approaches, and identify important curriculum issues and tasks involved with curriculum development and theory.
- 6305—Critical Contemporary Issues in Curriculum Studies and Teacher Education (3).** Learn, think, and discuss critical contemporary issues in teaching and learning through interactive debates, discussions, and dialogue.
- 6310—Theoretical Frameworks for Curriculum Inquiry (3).** Addresses epistemological and ontological knowledge that a research should be able to conceptualize when approaching, analyzing, and interpreting their research phenomena.
- 6312—Curriculum Theory: Contemporary Perspectives (3).** Curriculum theory. Contemporary perspectives.
- 6322—Writing for Publication and Dissemination of Research in Curriculum Studies and Teacher Education (3).** Research, connect with educational networks, and build community partnerships while learning to present research to professional audiences and disseminate research through professional journals.
- 6393—Advanced Practicum in Curriculum and Instruction I (3).** First supervised laboratory or field experience course that supports doctoral

students to complete a proposal for their application research experience project in Phase 1 of CSTE track.

Bilingual Education (EDBL)

- 5306—Seminar in Bilingual Education and ESL in PreK-12 Contexts (3).** Current research trends and issues in bilingual education and English as a Second Language in PreK-12 contexts.
- 5310—Advanced Spanish for Bilingual Teachers (3).** Prerequisite: Admission to the graduate program in bilingual education or instructor consent. Advanced proficiency and instructional skills for bilingual classrooms. Emphasizes academic language.
- 5320—Advanced Content Area Instruction in Spanish for Dual-Language Classrooms (3).** Teacher-training course. Advanced instructional language for bilingual education across content areas in dual-language classrooms.
- 5332—Foundations of Bilingual Education and English as a Second Language (3).** Overview of the research and historical, philosophical, and legal aspects of bilingual education and ESL.
- 5333—Teaching Culturally and Linguistically Diverse Students (3).** Strategies, techniques, and assessment procedures for teaching culturally and linguistically diverse students. Includes implementation of the ELPS in core areas.
- 5334—First and Second Language Acquisition (3).** First and second language acquisition and development as related to bilingual education and the teaching of English as a second language.
- 5336—Instructional and Management Issues in Bilingual Education and ESL (3).** Survey of issues relating to classroom instruction and management for culturally and linguistically diverse students.
- 5337—Strategies and Special Programs for Teachers of Emergent Bilinguals (3).** Provides an instructional framework for teaching approaches and material development for emergent bilinguals.
- 5338—Methods of Teaching English as a Second Language to PreK-12 Students (3).** Rationale, theories, and goals of a comprehensive PreK-12 ESL curriculum in compliance with the needs of emergent bilinguals.
- 5340—Academic Writing Development for PreK-12 Second Language Learning Contexts (3).** Theory, research, and development of academic writing skills of emergent bilinguals in PreK-12 contexts.
- 5393—Internship in Bilingual Education and English as a Second Language (3).** Experience in various roles in bilingual education and ESL.
- 7000—Research (V1-12).**
- 8000—Doctor's Dissertation (V1-12).**

Educational Curriculum and Instruction (EDCI)

- 5306—Seminar in Curriculum and Instruction (3).** Recent research, trends, and issues in curriculum and instruction. May be repeated for credit.
- 5308—Improving Mentoring Practices (3).** Provides an instructional framework for teaching specific mentoring skills and for developing and nurturing the teaching of skillful and reflective thinking.
- 5309—Mentoring Models for New Professionals (3).** Selected mentoring models of well-conceived introduction programs that offer practitioners a valuable tour of the mentoring landscape. Emphasis is placed on professional support and development.
- 5310—Instructional Theory and Design (3).** Applications of contemporary educational theory and design procedures to secondary education, including models of teaching, enhancement of self-concept, and adolescent needs and interests.
- 5311—Mentorship (3).** Guides veteran professionals through a cycle of learning based on established professional development national standards. Required for Master Mentoring Certificate.
- 5312—Collaborative Communities in Mentoring (3).** Designed to assist those planning to teach or work in professional settings in acquiring a perspective dealing with the theory and practice of professional learning communities. Required for Master Mentoring Certificate.
- 5320—Curriculum Theory: Foundations (3).** Fundamental bases for curriculum development.
- 5321—Curriculum Theory: Design and Development (3).** Principles of curriculum needs assessment, design, implementation, and evaluation.
- 5330—Ethics and Education (3).** A critical study of ethical theories and their implications for teaching and the teaching profession.
- 5333—Improving the Teaching of Thinking (3).** Provides an instructional framework for teaching specific thinking skills and for developing and nurturing the teaching of skillful and reflective thinking in all content areas (K-12).
- 5335—Models of Teaching (3).** Selected models of or approaches to teaching are described, demonstrated, and practiced. Emphasis is placed on expanding the repertoire of teaching skills.

- 5340—Curriculum Development in Biology Education for Dual-Credit K-12 Teachers (3).** Guides exploration of biology education curricula and development and evaluation of instructional design for dual credit secondary biology classrooms.
- 5362—Curriculum and the Media (3).** Investigates popular media and its role in development of relevant curriculum. Educators gain knowledge and skills for communicating educational issues in public environments.
- 5375—Creativity in the Curriculum (3).** A critical exploration of the trends, issues, and multiple perspectives related to creativity; its importance to individuals, groups, and society; and its place in cross-disciplinary curricula. Development of an informed position and curriculum recommendations.
- 5380—Action Research I (3).** Fundamentals of quantitative and qualitative design. Students write a literature review and design an original action research project.
- 5385—Critical Issues in Rural Education (3).** Focuses on understanding critical issues in rural education, developing and articulating best practices in curriculum development and pedagogical strategies to support rural schools.
- 6000—Master's Thesis (V1-12).**
- 6303—Inquiry into Teacher Education (3).** Examines issues, questions, and trends of teacher education and their social, historical, and theoretical backgrounds using different forms of literature in the field.
- 6304—Comparative Study in Curriculum, Teaching, and Teacher Learning (3).** Compares issues of curriculum, teaching, and teacher learning across different countries and examines the purposes, theories, methodology, and policy implication of such comparisons.
- 6306—Advanced Seminar in Curriculum and Instruction (3).** Critical analysis and design of research in selected curriculum areas. May be repeated for credit.
- 6316—Orientation to Research and Scholarship in Curriculum and Instruction (3).** Craft research questions using both qualitative and quantitative methods and examine the affordances, limitations, and assumptions within each paradigm.
- 6320—Curriculum Theory: Theoretical Frameworks in Curriculum and Instruction (3).** Antecedents of contemporary curriculum paradigms; relationships among curriculum, instruction, and society; tactics and models of curriculum analysis and criticism.
- 6331—John Dewey's Theory of Education (3).** A critical analysis of John Dewey's theory of education, pedagogy, and curriculum.
- 6332—Advanced Study in Teacher Education Practices (3).** Engages doctoral students in developing questions, a literature base, and methods; and completing a research report on a particular issue important to teacher education practices.
- 6333—Diversity Ideologies: Implications for Schooling (3).** Examines the origin, purpose, disciplinary orientation, and ideological positions of diversity theoretical perspectives.
- 6360—Introduction to Data-driven Models of Inquiry in Curriculum and Instruction (3).** Provides the foundational knowledge required to analyze large-scale data sets used in the implementation and evaluation of programs of curriculum, instruction, and teacher development.
- 6361—Advanced Studies in Data-driven Models of Inquiry in Curriculum and Instruction (3).** Prerequisite: EDCI 6360 or consent of instructor. Advanced course on the uses of statistical methods to examine questions and large data sets related to the issues of curriculum, instruction, and teacher education.
- 6367—Design-Based Research for Educational Contexts (3).** Prerequisite: Consent of instructor. Demonstrate the ability to use design-based research for educational improvement through the application research experience project (APEX).
- 6370—Policy Issues in K-12 Curriculum and Instruction (3).** Examines the theories and relevant examples about the processes of policy formation and implementation in curriculum and instruction and how politics shape these processes in educational institutions.
- 6381—Constructivist Inquiry Methodologies in Curriculum and Instruction (3).** Explores various constructivist research methodologies vital to research in educational settings. Narrative, autoethnography, action research, interactionism, and other theoretical approaches are explored and practiced.
- 6382—Advanced Field Methods in Constructivist Inquiry (3).** Prerequisite: EDCI 6381 or consent of instructor. Advanced course investigating methods used in constructivist inquiry. Students will complete three studies using observations, interviews, and documents culminating in a completed case study.
- 6383—Narrative Inquiry (3).** Prerequisite: Consent of instructor. Advanced qualitative research regarding what narrative inquiry entails, examining narrative inquiry's theoretical underpinnings, genres, methods, analysis and interpretation, and contemporary issues related to narrative inquiry.

- 6392—**Advanced Practicum in Mentoring (3)**. A supervised lab or field experience in a mentoring curricular area. Includes assessment, planning, instruction, and evaluation.
- 6393—**Advanced Practicum in Curriculum and Instruction (3)**. Prerequisites: EDCI 6382 and EDCI 6361, or consent of instructor. A supervised laboratory or field experience in a curricular area; includes assessment, planning, instruction, and evaluation. May be repeated for credit.
- 6395—**Advanced Seminar: Best Practices in Mentoring (3)**. Critical analysis and design of research in selected curriculum areas of induction training and support.
- 7000—**Research (V1-12)**.
- 8000—**Doctor's Dissertation (V1-12)**.

Elementary Education (EDEL)

- 5360—**Developing Social Studies Programs in Elementary Education (3)**. Objectives, patterns, and principles of organization of social studies in the elementary schools.
- 5370—**Developing Mathematics Programs in Elementary Education (3)**. The development of arithmetic and its educative function in the elementary school curriculum.
- 5375—**Developing Science Programs in the Elementary School (3)**. Methods and materials for helping children develop an understanding of their natural and physical environments.
- 6306—**Studies in Elementary Education (3)**. Trends in modern elementary education.
- 6360—**Studies in Social Studies Education (3)**. In-depth studies of research and instructional practices pertaining to social studies education. May be repeated for credit.
- 6370—**Studies in Mathematics Education (3)**. In-depth studies of research and instructional practices pertaining to mathematics education. May be repeated for credit.
- 6375—**Studies in Science Education (3)**. May be repeated for credit.
- 7000—**Research (V1-12)**.
- 8000—**Doctor's Dissertation (V1-12)**.

Educational Instructional Technology (EDIT)

- 5000—**Special Topics in Instructional Technology (V1-3)**. Covers special designated topics in instructional technology. May be repeated for credit.
- 5316—**Foundations of Instructional Technology (3)**. Overview of the field of instructional technology including the design, development, utilization, management, and evaluation of instructional systems.
- 5317—**Instructional Design Foundations (3)**. Prerequisite: EDIT 5316 or instructor consent. Examines the systematic approach to designing instructional materials. Emphasizes solving real-world learning problems through the application of contemporary instructional design principles and models.
- 5318—**Digital Literacy (3)**. Introduces digital literacy for educators on computer system software, online information searches, copyright, computer privacy, cybersecurity, multimedia, and Web 2.0 innovations.
- 5320—**Server Management for Instruction (3)**. Provides fundamental concepts of computer networking and knowledge of server-based applications for instructional settings. Emphasizes hands-on activities pertaining to setting up server operating systems, content management systems, and learning management systems.
- 5321—**Interactive Instructional Multimedia Development (3)**. Introduces processes involved in planning and developing interactive multimedia in online learning environments. Emphasizes development of interactive learning materials with online tools and authoring programs.
- 5322—**Visual Design for Instruction (3)**. Covers foundational theories and practices for visual design. Emphasizes the development of instructional visuals based on visual design principles, actions, and tools.
- 5325—**Instructional Systems Development (3)**. Covers the skills and knowledge related to development of instructional systems and materials. Includes basic instructional media development, and system design.
- 5326—**Instructional Systems Evaluation (3)**. In-depth study of conducting assessment and evaluation for instructional systems. Focuses on types of principles, procedures, and models for assessing and evaluating instructional products and systems.
- EDIT 5330—**Research-Based Instructional Strategies (3)**. Surveys different types of research-based instructional strategies and practice models that promote instructional effectiveness and student learning.
- 5341—**Online Course Design and Assessment (3)**. Covers the theories, models, and practice of designing effective instruction and learning assessments for online learning courses.

- 5342—**Online Teaching and Learning Technologies (3)**. Explores diverse learning activities and technologies to promote student engagement and learning in online courses.
- 5370—**Foundations of Distance Education (3)**. Provides an overview of the field of distance education including history, theories, technology, and various types of design and delivery models.
- 5380—**Online Course Management and Facilitation (3)**. Introduces fundamental strategies and methods to monitor and facilitate student progress and learning in online courses.
- 5390—**Online Course Development (3)**. Covers the development of online courses and trainings in various platforms for K-12, adult, higher, and professional education settings.
- 5395—**Administration of the Educational Technology Program (3)**. Overview of the procedures in planning, administering, and evaluating instructional technology programs in both educational and corporate settings. Major topics include organization improvement plans, software evaluation, and project management.
- 5397—**Practicum in Educational Technology (3)**. Students receive a supervised practicum experience in an educational setting requiring the application of competencies related to the design, development, implementation, management, and evaluation of instructional technologies.
- 6310—**Research Seminar in Instructional Technology (3)**. Covers foundational and advanced instructional technology research by highlighting research knowledge and practical applications of instructional technology through readings, critiques, and research. May be repeated for credit.
- 6317—**Advanced Instructional Design Theories (3)**. Prerequisite: EDIT 5317 or EDCI 5310. Explores variety of instructional theories and models in-depth. Emphasizes practical applications of instructional theories in various learning environments and evaluation research plan for the applications.
- 6322—**Research in Instructional Technology (3)**. Prerequisites: Minimum of 6 hrs in EDIT and B or better in 6 hrs of EPSY or instructor consent. Review of research on instructional technology, use of computers for research data analysis, and designing research on instructional technology.
- 6325—**Advanced Instructional Design and Development (3)**. Explores systematic procedure for producing online instructional unit based on instructional design model and multimedia design principles. Emphasizes advanced development skills and understanding of instructional design models.
- 6380—**Topical Inquiry Seminar (3)**. Surveys current topics and emerging trends in instructional technology research and their applications.
- 7000—**Research (V1-12)**.
- 8000—**Doctor's Dissertation (V1-12)**.

Language Literacy (EDLL)

- 5340—**Literacy Acquisition Process and Pedagogy (3)**. Psychological and research bases of reading instruction. A foundations course.
- 5341—**Developing Academic Literacy in the Disciplines for Adolescents (3)**. Reading and writing to learn in content area disciplines intended for secondary students in grades 8-12.
- 5342—**Classroom-Based Literacy Assessment for Differentiated Instruction (3)**. Examines the use of both formal and informal assessment measures as a means to provide information useful for evaluating student performance and planning instruction.
- 5343—**Practicum in Literacy (3)**. Provides an opportunity to work in instructional settings to assist children in their reading development. Student achievement is considered through instructional strategies and assessment procedures.
- 5344—**Content Area and Disciplinary Literacy Methods (3)**. Theoretical and research bases, issues, strategies, and methods related to learning from print in all content fields.
- 5345—**Emergent and Early Literacy Development and Pedagogy (3)**. Theoretical bases, procedures, techniques, and materials for early literacy instruction.
- 5346—**Increasing Reading Proficiency for All Readers (3)**. Examines a constructivist framework as a foundation for understanding language and literacy development in elementary classrooms.
- 5348—**Applied Linguistics and the Teaching of Literacy (3)**. A study of reading as communication with applications of linguistics to the reading classroom.
- 5350—**Developing Traditional and New Literacies (3)**. Applications of research findings and modern theory to teaching and organizing the language arts in K-12.
- 5351—**Children's Literature in the School Curriculum (3)**. Literature for children in elementary and middle school; selection, use and organi-

zation. Includes nonprint media. Appropriate for English or language arts majors.

- 5353—**Studies in Gender, Literacies, and Adolescence (3)**. Investigation into current research concerned with the intersecting discourses of gender and adolescent's literacy practices.
- 5355—**Creating Writing-Centered Classrooms (3)**. Application of in-depth studies of research and instructional practices in the teaching of writing to guide development of effective writing programs.
- 5356—**Trends and Issues in Adolescent Literacy (3)**. Investigation of current problems, trends, and issues in the teaching adolescent readers in middle and secondary schools. May be repeated for credit.
- 5366—**Teaching Developmental Readers Adolescent to Adult (3)**. Examines current research and theories concerned with effective literacy instruction for developmental readers.
- 5393—**Internship in Literacy Education (3)**. Prerequisite: Advanced graduate classification in education. Experiences in the various roles of language literacy education.
- 6000—**Master's Thesis (V1-6)**.
- 6349—**Adolescent Literature (3)**. Study of current literature for middle and secondary level students (grades 7-12). Selection of material and strategies appropriate for adolescents.
- 6351—**Critical Studies in Literature (3)**. In-depth studies of research and instructional practices pertaining to children's literature. May be repeated for credit.
- 7000—**Research (V1-12)**.
- 8000—**Doctor's Dissertation (V1-12)**.

Education Middle Level (EDML)

- 5301—**Foundations of Middle-Level Education (3)**. Examines the history and philosophy of middle-level education reforms and the implication for the current educational climate.

Education Personalized Learning (EDPL)

- 5390—**Foundations in Blended and Personalized Learning (3)**. Personalized/ Blended Learning skill development using actual classroom context alongside relevant case studies. Development of data-literacy skills to support planning and implementation of personalized learning strategies.
- 5391—**Blended Learning / Personalized Learning and Student Agency (3)**. Understand the importance of student ownership of learning and develop strategies that facilitate student ownership and agency. Participants will practice these strategies.
- 5392—**Teacher Routines for Using Data to Support Personalized Learning (3)**. Helps teachers develop knowledge and skills in collecting and managing student data to assess and monitor their progress and learning.
- 5393—**Demonstration of Advanced Models of Personalized Learning (3)**. Helps teachers develop knowledge and skills in designing inquiry-based learning units that promote higher order thinking skills in Personalized Learning classrooms.
- 5394—**Personalized Learning Coaching and Critical Communities of Practice (3)**. Prerequisites: EDPL 5390, EDPL 5391. Final practicum in PL/ BL Graduate Certificate. Focuses on coaching models/frameworks, teacher leadership models/frameworks. Provides practice in conducting feedback and coaching sessions in PL contexts.
- 5395—**Research Topics in Personalized Learning (3)**. Prerequisites: EDPL 5390, EDPL 5391. Bridge course for students moving from PL Graduate Certificate to the PL Master's concentration. Focuses on current research and innovation in PL/BL contexts.

Secondary Education (EDSE)

- 5305—**Issues and Reform in American Secondary Schooling (3)**. Purpose, role, contemporary issues, and reform trends in American secondary schooling. Historical, philosophical, sociological, and ideological foundations of education. Examination of multiple contexts that influence schooling and roles of teaching.
- 5320—**Developing Curricula in Secondary Schools (3)**. Foundations, principles, and issues of curriculum in secondary level schools.
- 5331—**Improvement of Instruction in the Secondary School (3)**. A study of teaching behaviors, styles, and strategies. Instructional theories and various models of teaching are examined.
- 5377—**Science Curriculum and Instruction (3)**. A study of evolving science curriculum with emphasis on innovative practices, methodology, organization for instruction, and evaluation.
- 7000—**Research (V1-12)**.
- 8000—**Doctor's Dissertation (V1-12)**.

STEM Education (ESTM)

- 5313—**Nature of informal STEM Education (3)**. Introduction to the nature of informal STEM education, the process of informal learning, and educating a wide range of audiences.
- 5315—**Learning Theories and Curriculum Models in Informal STEM Education (3)**. Formal learning theories and curriculum methodologies are investigated and applied to learning in informal STEM education.
- 5316—**Assessment in Informal STEM Education (3)**. Theoretical underpinnings of assessment in informal STEM settings and the diversity and complexity of assessing STEM learning in informal contexts.
- 5371—**Curriculum and Instruction in STEM Education (3)**. Guides exploration of STEM curricula: what it is, who writes it, who makes decisions about it, who field tests it, what content should be learned, and how teachers can prepare for proper enactment.
- 5372—**Standards and Assessment in STEM Education (3)**. Guides exploration of current issues related to standards, multiple dimensions of assessment, and the processes of assessment in STEM education.
- 5373—**Designing Project-Based Learning (PBL) in STEM Education (3)**. Introduces interdisciplinary pedagogies, technological tools, instructional strategies, and appropriate assessments for designing and developing project-enhanced environments in STEM classrooms.
- 5374—**Engineering Design Processes in STEM K-12 Education (3)**. Explores the use of engineering to promote STEM K-12 education learning with a focus on current research and best practices in engineering education pedagogies.
- 5376—**Teacher Leadership and Advocacy in STEM Education (3)**. Provides students opportunities to garner and apply knowledge, skills, and dispositions in K-12 STEM teacher leadership and subsequent advocacy activities.
- 5377—**Technology in STEM Education (3)**. Explores the use of technology to promote STEM learning with a focus on current research.
- 5378—**High Cognitive Demand Tasks in STEM Classrooms (3)**. Gives students the opportunity to experience, evaluate, and design interdisciplinary, inquiry-based instructional environments within STEM classrooms.
- 6370—**Current Topics and Trends in STEM Education Research (3)**. Survey of research in science, mathematics, engineering, and/or technology education.
- 6371—**Effective Policy Advocacy in STEM Education (3)**. Conceptual development course that focuses on knowledge and understanding of effective advocacy avenues for STEM education issues and current progressive STEM education reform efforts at the local, regional, national, and international levels.
- 6372—**Applied Assessment in STEM Education (3)**. Exploration of current issues related to assessment, multiple dimensions of assessment, and the processes of assessment in STEM education.
- 6373—**Theories of STEM Education (3)**. Introduces interdisciplinary pedagogies, technological tools, instructional strategies, and appropriate assessments for designing and developing inquiry-based instructional and learning environments in STEM classrooms.
- 6374—**STEM Education Assessment, Policy, and Practice (3)**. Analysis of policy and assessment implications in STEM education.
- 6375—**Professional Development in STEM Education (3)**. Principles of organizational change, training, and professional development in STEM education.
- 6376—**Philosophy and History of STEM Education (3)**. Study of STEM education through philosophical and historical lenses.
- 6377—**Global STEM Education (3)**. Examines instructional methods to engage students in global STEM education.
- 6378—**Applications of Global Science Education (3)**. A supervised practicum in global STEM education.
- 6379—**Applied Research in STEM Education (3)**. Foundations and applications of qualitative and quantitative research methods in STEM education.
- 6380—**Advanced Practicum in STEM Education (3)**. Developing a research study in STEM education.
- 6381—**Equity in STEM Education (3)**. Exploration of current and historical issues related to equity in STEM Education.
- 6382—**STEM in Context (3)**. An examination of STEM education within social, economic, political, and educational contexts.
- 6393—**Advanced Practicum in STEM Education Policy Advocacy (3)**. Developing a research study in STEM education.
- 6399—**STEMinar (3)**. Specific exploration of research and practice in science, technology, engineering, or mathematics education disciplines. May be repeated for credit.

Language Diversity and Literacy Studies (LDLS)

- 6320—Research Practicum in Language, Diversity, and Literacy Studies (3).** First supervised laboratory or field-experience course that supports doctoral students to complete a proposal for their application research experience project in Phase 1 of LDLS track.
- 6331—Research and Pedagogical Approaches in Latino/Bilingual/ESL Education (3).** Students will gain an in-depth understanding of educational issues, research, and pedagogical approaches pertaining to Latino students, including those in Bilingual/ESL programs.
- 6341—Trends and Issues in Literacy Pedagogy and Research (3).** Study of selected problems, trends, and issues related to literacy teaching and learning. Topics will vary. May be repeated for credit as topic varies.
- 6343—Global Literacies (3).** An exploration of ways in which countries around the world have sought and continue to seek to promote literacy and combat illiteracy.
- 6344—Content Area and Disciplinary Literacies Policy and Research (3).** In-depth study of trends and issues in content area and disciplinary literacy instruction in elementary, middle, and secondary schools. Designed specifically for educators concerned with K-12 and teacher education settings.
- 6345—New Literacies (3).** Concept of literacy is transforming due to changes in education, media, technology, and society. Introduction to literacies and the implications for research and instruction.
- 6346—Freire and American Education (3).** Examine the writings, achievements, life, and influences of Freire as they relate to school curricula, teacher-student relationships, formal schooling, critical consciousness, literacy, and radical democracy.
- 6347—A Genealogy of Research in Language and Literacy Acquisition (3).** In-depth analysis of research and policy pertaining to acquisition of language (including bilingual development), reading, and writing development across the lifespan.
- 6350—Research Methods in Language, Diversity, and Literacy (3).** In-depth studies of literacy research with a focus on data analysis. May be repeated for credit.
- 6351—Critical Studies in Bilingual/Bicultural Children's and Adolescent Literature (3).** In-depth studies of research and instructional practices pertaining to Bilingual/Bicultural child and adolescent literature.
- 6353—Investigating Theoretical Models of Literacy (3).** Theoretical bases and research perspectives on literacy learning and instruction. An in-depth analysis of historically important research.

Department of Educational Psychology, Leadership, and Counseling

Alexander W. Wiseman, Ph.D., Interim Chairperson

Horn Distinguished Professor: Bradley

Professors: Duemer, Hawley, Jones, Little, marbley, Paton, Siwatu, Stevens, Valle, Wiseman

Associate Professors: Almager, Claudet, Crews, de León, García, Gottlieb, Hotchkins, Jackson, Jung, Kirksey, Lau, Lee, Lértora, McNaughtan, Palmer

Assistant Professors: De La Garza, Freeman, Ortega, Wang

Associate Professor of Practice: Zaier

Assistant Professors of Practice: Arellano, Barbre, Hershberger, Muñoz

Lecturers: Lilly, Molina, Tommerdahl

CONTACT INFORMATION: 103 Education Building
Box 41071 | Lubbock, TX 79409-1071 | T 806.742.2290 | F 806.742.2179

About the Department

The Department of Educational Psychology, Leadership, and Counseling offers coursework at the graduate level. The department offers study in the following graduate degree programs and certificates:

- Master of Education in Counselor Education
- Master of Education in Educational Leadership
- Master of Education in Educational Psychology
- Master of Education in Higher Education Administration
- Doctor of Education in Educational Leadership
- Doctor of Education in Higher Education Administration*
- Doctor of Philosophy in Counselor Education
- Doctor of Philosophy in Educational Leadership
- Doctor of Philosophy in Educational Psychology
- Doctor of Philosophy in Higher Education
- Graduate Certificate in College Student Counseling
- Graduate Certificate in Fundamentals of Teaching and Learning
- Graduate Certificate in Higher Education Administration and Leadership
- Graduate Certificate in Institutional Research and Institutional Effectiveness
- Graduate Certificate in Mental Health Counseling
- Graduate Certificate in Mixed Methods Research
- Graduate Certificate in Program Evaluation and Assessment
- Graduate Certificate in School Psychology
- Graduate Certificate in Student Development and Academic Advisement

* Note: This program is not currently accepting new students.

Graduate Programs

The department offers programs leading to advanced degrees, professional certificates, and associated supplemental certificates. Information on admission standards, program requirements, and other matters concerning graduate programs in the department may be obtained from the department office, the Office of Graduate Education in the College of Education, and online at www.depts.ttu.edu/education. For more information on programs offered by the department, visit the Graduate Programs section of the catalog.

Counselor Education

The college offers both a Master's Degree (M.Ed.) and a Doctor of Philosophy (Ph.D.) in Counselor Education. The master's and doctoral programs are accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP).

There are two master's level concentrations in counselor education: clinical mental health counseling and school counseling. The master's program

with a concentration in clinical mental health counseling requires 60 credit hours. The master's program with a concentration in school counseling requires 48 credit hours. Applicants for the school counseling program must have an undergraduate GPA of 3.0 or higher. Although no teaching or certification requirements apply, experience in K-12 schools is preferred.

Master's level students in the clinical mental health counseling program may transfer a maximum of 6 hours of graduate coursework from a CACREP program. Transfer hours should be no more than six years old and be equivalent to courses offered at Texas Tech University. No transfer hours will be allowed for practica (EPCE 5360), internship (EPCE 5094), techniques (EPCE 5357), group (EPCE 5354), dysfunctional behavior (EPCE 5366), or ethics (EPCE 5370). Please note: The Counselor Education master's program in clinical mental health counseling admits only in the fall semester because the program coursework is offered in a scheduled rotation. Students are expected to meet rotation requirements and enroll in coursework as required each semester; failure to do so will add up to a year of additional time required to complete the program.

The doctoral program requires 93 hours beyond the bachelor's degree and offers one major in counselor education. Ph.D. students may transfer up to 30 hours from their master's program. However, all counseling core coursework at the Ph.D. level must be completed within the TTU Counselor Education program (i.e., transfers will not be allowed for the counseling core courses).

Additional information about counselor education is available online at www.educ.ttu.edu/epce and in the department office. All applicants must complete the program application through the TTU Graduate School application portal. Additional information about the application process may be found on the Graduate School website at <http://www.depts.ttu.edu/gradschool/admissions/howtoapply.php>.

Educational Leadership

The **Education Policy concentration in the M.Ed. in Educational Leadership** prepares graduates for non-state certified positions in education, government, the private sector, nonprofits, leadership & policy institutes, research-based advocacy groups, or to continue to a doctoral degree. Emphasis is on (1) understanding the relationships between education, leadership, and policy; (2) using evidence to make education-related decisions and policies; and (3) preparing to lead meaningful change through policy, research, and practice. The concentration is of interest to professionals with experience in education-related fields and agencies (e.g., social services, family support agencies, juvenile justice) and who have backgrounds in related academic disciplines (e.g., education, political science, sociology, economics, public administration, government relations). Program courses are delivered online synchronously via web-based links.

The **M.Ed. (Principal-Certification) in Educational Leadership** TechLEAD, is a Master's of Education in Educational Leadership and Principal Professional Certification Preparation Program designed for working teachers interested in pursuing careers as K-12 school principals in Texas. The TechLEAD program is an online virtual 36-hour, two-year program focusing on instructional coaching, strong use of student and teacher data for progress monitoring, the use of data to effectively lead Professional Learning Communities (PLCs) and advancing leadership through TTESS and TPESS. The program also utilizes the Texas Education Agency's Effective Schools Framework model for leading improvement. The goal of TechLEAD is to prepare effective and engaged instructional leaders who are knowledgeable, highly skilled and committed to building learning communities that serve students with diverse abilities and backgrounds. All courses are taught by faculty and instructors who are former and/or current K-12 school leaders. The program curriculum supports 268 and PASL certification, and courses are delivered synchronously online via web-based links and requires 2 long semesters for the practicum. Applicants should have completed two years of successful teaching and will need to provide the teacher of record document to apply and join the program.

Applicants interested in a Master's of Educational Leadership with non-principal certification should see Educational Leadership, M.Ed.: Education Policy Concentration.

The **Doctorate in Educational Leadership (Ed.D.)** program is designed for current school leaders with a design-based school improvement focus for instructional coaches, assistant principals, principals, and central office leaders. The Superintendent Certification is integrated into the program

coursework and available for school leaders to continue advancing their learning. The doctoral curriculum is theoretically aligned to both the Texas Education Agency frameworks and the Carnegie Project on the Education Doctorate (CPED) delivered synchronously online via web-based links. Applications are reviewed twice a year in November for a January cohort and April for a June start. The program requires participation in a weekend Orientation Colloquium and participation in a weekend Summer Institute at the end of June as part of the summer coursework designed to build capacity and a collaborative network of cohort members and faculty.

The **Educational Leadership Doctor of Philosophy (Ph.D.)** in Education Policy is an online program preparing students for leadership positions in a wide variety of settings at local, state, national, and international levels, including school districts, universities, government agencies, nonprofits, and policy think tanks. Students receive rigorous training in leadership, organizations, policy theory, research methods, policy implementation, and advocacy. Coursework involves the application of theory to real-world issues such as racial and economic disparities in student achievement or the role of school vouchers in education reform. A cohort model allows students to move through the fully online program together and be part of a learning community. The program courses are delivered synchronously online via web-based links using video conferencing, students regularly engage in a virtual classroom as if they were face-to-face. Applications are reviewed in early spring for a fall cohort start every year.

Educational Psychology

The Educational Psychology program is designed to develop educational psychologists and professionals. Students receive rigorous training in theories and applications of the cognitive, motivational, social, and cultural processes that are related to human development, learning, and instruction. The Educational Psychology program is committed to assisting students in developing foundational knowledge and skills needed to design and implement theory-driven research studies, apply cutting-edge statistical methods, and evaluate programs that influence educational policy. Thus, the program attracts students from various educational and professional backgrounds including education, psychology, human sciences, business, sports sciences, and health sciences. Graduates are prepared for careers in universities and colleges, public schools and school districts, educational testing companies, private research and development organizations, and federal, state, and local educational agencies.

Students are required to complete a minimum of 45 credit hours for the **master of education degree**. Students pursuing a master's degree can do so with or without a thesis. Admission to a master's program does not constitute later admission to a doctoral program. Additional information about the Educational Psychology program is available at www.depts.ttu.edu/education/graduate/psychology-and-leadership/educational_psychology_med.php.

The 62-hour **School Psychology Concentration of the M.Ed. in Educational Psychology** is designed for those who wish to meet the training requirements to practice psychology in the schools. Graduates of this concentration are eligible for licensure/certification as school psychologists depending on their state's requirements. The School Psychology Concentration prepares students for evidence-based practice and to critically evaluate these practices to ensure effective outcomes for their clients. The Concentration trains students to provide research-based services which meaningfully benefit children, families, schools, teachers, and communities. Students are mentored in the field to simultaneously engage in the provision of psychological services in educational settings and evaluate each stage of service delivery. This is accomplished through community and school-based experiences that accompany coursework at each year of study. These experiences are carefully and uniquely guided by university supported clinical staff and researchers who facilitate partnerships across area schools, especially those in rural communities without access to comprehensive and integrated school psychological services. For further information, see the program website at https://www.depts.ttu.edu/education/graduate/psychology-and-leadership/educational_psychology_med_school_psychology.php.

Students are required to complete a minimum of 91 credit hours beyond the bachelor's degree for the **doctor of philosophy degree**. Students interested in school psychology should apply for admission into the school psychology track. Additional information about the Educational Psychol-

ogy program is available at

https://www.depts.ttu.edu/education/graduate/psychology-and-leadership/educational_psychology_phd.php.

The 92-hour **School Psychology Track of the Ph.D. in Educational Psychology** is appropriate for individuals who are licensed to practice school psychology as well as individuals seeking licensure to practice school psychology. Non-licensed graduates of this track are eligible for licensure/certification as school psychologists depending on their state's requirements. The School Psychology Track is designed to advance the skill set of practitioners who wish to apply their clinical training in school psychology to conduct research in education, psychology, and schools. The emphasis in school psychology allows students to use this research-based training to support their development of knowledge and skills related to conducting psychological assessment, developing and implementing psychological and behavioral interventions, and supporting educators through consultation in the P-12 school context. Due to their strong research background and understanding of psychological theory, students trained in a scientist-practitioner model are able to address questions that arise in their practice by accessing the current research base and monitoring and evaluating elements of their practice. Thus, the School Psychology Track of the Educational Psychology Ph.D. program does not separate research from practice. Instead, the program prepares scientist-practitioners embedded in P-12 situations and contexts. For further information, see the program website at https://www.depts.ttu.edu/education/graduate/psychology-and-leadership/educational_psychology_phd.php.

Higher Education Administration

The Higher Education program is designed to develop scholarly and theoretical practitioners and researchers. Graduates of the program are equipped to apply theories and practical research as tools to name, frame, and solve problems of practice, using empirical evidence to evaluate impact and develop innovative solutions for colleges and universities. The Higher Education program is committed to excellence in preparing and supporting administrative and instructional leaders for higher education, generating and supporting research in the field of higher education, and delivering public service to the practice of higher education. The program delivers teaching, research, and professional services to students, institutions of higher education, and other academic disciplines. For further information, see the Higher Education program website at www.depts.ttu.edu/education/graduate/psychology-and-leadership/higher_education.

Students working on a **master's degree in Higher Education**

Administration may pursue either non-thesis or thesis options. The master's program requires completion of 30 semester credit hours for the non-thesis option and 33 hours for the thesis option.

The **Doctor of Education (Ed.D.) in Higher Education Administration*** is designed for advanced scholarly practitioners who wish to achieve a superior level of competency in their professional field with emphasis on practice and leadership within higher education administration roles. The Ed.D. in Higher Education Administration requires completion of 60 credit hours beyond the master's. The program accepts 30 credit hours of prior graduate-level transfer coursework toward the degree requirements with program approval. The remaining 60 hours of doctoral-level coursework must be taken at Texas Tech University. As part of the credit hour requirements, candidates are required to demonstrate proficiency in independent research in higher education culminating in the completion of a dissertation. * *Note: This program is not currently accepting new students.*
