

ONLINE INTERACTIVE CLASSES FOR LIFELONG LEARNERS

LETTER FROM THE VICE PROVOST

Dear current and prospective OLLI members,

What a year 2020 has been! In January, I never expected we would be in the situation that we find ourselves. In March, we made the decision to cancel the rest of the classes due to the concern with COVID-19. We were following the guidance of the university with the intent of starting again in the fall.

As President Schovanec expressed in the Texas Tech University Commitment, "...our top priority is the health, safety, and well-being of our students, faculty, and staff." There have been numerous meetings since March to make sure we can open as safely as possible. As a small part of the much larger team, I feel that we are trying to hit a moving target. One thing that has not changed is Texas Tech's commitment to our OLLI community.

During the summer, we tried something new for OLLI – online classes. We were pleased with the involvement by our members and even our largest summer class – Popular Music of the 1970s allowed for interaction and was just as informative and enjoyable as it would have been in the classroom. Typically, we want to have face-to-face classes in large part due to the social aspect of them. However, I noticed in the class I attended this summer, there was quite a bit of interaction – maybe not the same, but there was something.

Given the current situation, we are planning virtual classes for our fall semester. Obviously, this is not ideal, but we feel it is the safest option for this fall. As soon as it is safe to do so, we are committed to returning to face-to-face offerings. Until then, please enjoy the wonderful virtual classes we have scheduled for the fall semester.

Stay safe and healthy!

Sincerely,

Melanie a. Hart

Melanie A. Hart, Ph.D. Vice Provost – eLearning & Academic Partnerships

Orientation for New and Prospective OLLI Members

In this informal session, participants will learn about OLLI at TTU programs, activities and meet board members and staff online. The class will examine a wide variety of course topics, committees and volunteer opportunities. This class is open to current members as well as prospective members who are interested in learning more about what OLLI at TTU has to offer.

This class is led by OLLI at TTU Director Shelby Crews along with other OLLI board members and staff.

Date: Wednesday, August 19 Time: 2-3:30 p.m. or 5:30-7 p.m.

Fee: FREE

Sign Up Now: 2-3:30 p.m. or 5:30-7 p.m.

Zoom Training for Members

These trainings will be an opportunity for all OLLI members to learn the ins and outs of using the online platform, Zoom, to participate in OLLI virtual classes. Members will learn how to log in to classes, use their computer audio and camera, as well as what to do if they run into any technical problems.

These training sessions will be led by OLLI at TTU staff and volunteers.

Dates: August 24, 26 & September 1

Times: 9-10 a.m., 2-3 p.m. or 5:30-6:30 p.m.

Fee: FREE Sign Up Now

August 24: 9 a.m. / 2 p.m. / 5:30 p.m. August 26: 9 a.m. / 2 p.m. / 5:30 p.m. September 1: 9 a.m. / 2 p.m. / 5:30 p.m. Arts and Culture

Crafting Fiction From History

Join OLLI favorite, Andy Wilkinson, as he shares his methods and insights for writing. He will discuss how he crafted an album of poetry, a song and a stage play on Charles Goodnight, as well as a brand-new work of historical fiction.

Andy Wilkinson, artist in residence at the Southwest Collection at Texas Tech University; teaches songwriting in the School of Music, and creative process in the Honors College.

Date: Wednesday, September 2

Time: 2-3:30 p.m.

Fee: \$10 Sign Up Now

History

The Desolate Line: Abilene Area Forts and 19th Century Texas Frontier

To bring some level of peace to West Texas, the federal government established several frontier military installations. This course will examine the role each of these installations played in Federal Indian policy on the Texas frontier, while offering participants a glimpse into the often desolate, isolated lives of those who occupied these forts.

John Caraway is a graduate of Hardin Simmons University and Texas Tech University. He is the department head for the Government and History Department at Cisco College.

Dates: September 8, 22 & 29

Time: 2-3:30 p.m. Fee: \$10/session

Sign Up Now: <u>9/8</u>, <u>9/22</u>, & <u>9/29</u>

Science and Technology

Science by the Glass

Join the TTU Climate Center to hear from one of our researchers about how their studies relate to climate change. Our speakers typically cover a range of interesting topics – from gardening to flat earth conspiracy theories – at a level that is appropriate for anyone with a general interest in these topics. Each class is followed by a live Q&A and the recordings are posted on the TTU Climate Center's YouTube channel, so they can be shared and viewed afterward.

These classes will be presented by the Texas Tech University Climate Center.

Dates: September 8, October 13, November 10 & December 8

Time: 5-6 p.m. Fee: FREE

SignUp Now: <u>9/8</u>, <u>10/13</u>, <u>11/10</u> & <u>12/8</u>

History

Fifty Years of the Best TV Advertising: 1944 to 1994

This class takes its cue from 50 years of CLIO awards. This course provides background on the authors of modern advertising strategies and how they have changed the focus over the years from the products being sold to consumers and their lifestyles. We will watch some classic commercials from the 1940s to the 1980s; including Timex watches' spokesperson John Cameron Swayze, Maxwell House coffee, and the classic VW ads of the 1970s. After a break for discussion, the second reel includes the famous '80s ads for Macintosh computers, Budweiser beer (you remember, the one with the frogs), and other memorable commercials.

Marye Tharp, Ph.D., was a professor of marketing and advertising at the University of Texas at Austin and UTSA.

Date: Wednesday, Sept 9 Time: 2-4:30 p.m.

Fee: \$10 Sign Up Now History

The American Civil War Era, Part II

This six-lecture series will explore the opening phase of the American Civil War, at a time when the reality of raising two armies and engaging in political maneuvers at home and abroad framed the destinies of the United States of America and the Confederate States of America. It will conclude with the military campaigns of the spring of 1862, which announced to the partisans of the Union and the Confederacy alike that the conflict would involve trauma far greater than initially anticipated.

Fred A. Bailey, Ph. D., is a retired university history professor with 40 years' experience. He is the author of two books and 80 professional articles and has received recognition and awards for his scholarly endeavors.

Emerging Technologies

Over the last few decades, new technologies have introduced the world to social media, driverless cars, 3D printing of artificial organs and food, artificial intelligence, robots, stem cells and the list goes on and on. What are these? How are they related? While some of these easily improve our lives, they also are the subject of much controversy. Join us as we discuss how ever-changing technologies affect us and the world in which we live.

Phil Youngblood founded and headed a university degree program in computer information systems and cyber security for 17 years. Before retiring from full-time teaching, he completed a career in the U.S. Navy and conducted biochemical research at the University of Hawaii and NASA.

Date: Monday, September 14

Health and Wellness

Specialty of Pain Medicine

Pain is a complex experience and unique to each individual. Our instructor specializes in pain medicine diagnoses. Being comprehensive and educating patients on a wide variety of medical conditions affecting the nervous and musculoskeletal systems, he treats patients experiencing problems with acute and chronic pain by creating a multidisciplinary approach in treatment plans to restore function and decrease pain.

In this class, Dr. Damien Sacky will cover the importance of the study of pain, the prevention of pain; as well as, the evaluation, treatment and rehabilitation of people enduring issues related to pain. Sacky is board-certified and holds memberships in the Texas Pain Society and the American Academy of Pain Medicine.

Viva the Difference: Understanding Generational Differences

The Greatest Generation, Boomers, Gen X, Millennials, Gen Y and Gen Z are terms heard daily. Do these terms describe important differences in the age groups or are they stereotypes? Understanding generational differences is the first step to working together in harmony and could be a determining factor in the success of an organization. Along with suggestions for how to work with each generation, this class will describe how generational differences arise and provide key descriptions of the core characteristics of each group.

Terry Waldren, Ph.D., is the owner of The Waldren Group consulting firm, whose clients include: Texas Tech University, TTUHSC, City of Lubbock and United Supermarkets.

Date: Thursday, September 17

Time: 2-3:30 p.m.

History

Road to Epidaurus: Frazer and Pausanias

Instructor Christopher Witmore will take participants on a journey with James George Frazer to the ancient sanctuary of Epidaurus in 1890 and 1895. Frazer is the author of The Golden Bough and a fellow of Trinity College, Cambridge; he is largely regarded as an armchair anthropologist. Through Frazer's lens on Pausanias, this class will attempt to understand how the ancient traveler, religious pilgrim, antiquarian and literary stylist influenced Frazer through an exploration of Epidaurus.

Christopher Witmore is an author and professor of archaeology and classics at Texas Tech University.

Date: Thursday, September 17

Arts and Culture

The World's Best Archive of Nature Writers

This class will provide an overview of the unique Sowell Family Collection. Created through the generous support of former TTU Regent James Sowell, this collection contains the personal papers of some of the country's most prominent writers on the natural world. Writing with a profound respect for the grandeur and fierceness of the land, these writers are deeply engaged with questions of land use and the nature of community, the conjunction of scientific and spiritual values, and the fragility of wilderness. We'll examine some of the gems in this national treasure and you'll learn how to access them for your own interest and research.

Bryan Giemza, Ph.D., J.D., is an associate professor of Humanities and Literature in the Honors College.

Date: Monday, September 21

Time: 2-3:30 p.m.

"Their Eyes Were Watching God"

by Zora Neale Hurston

One of the most important and enduring books of the twentieth century, "Their Eyes Were Watching God" brings to life a Southern love story with the wit and pathos found only in the writing of Zora Neale Hurston. Out of print for almost 30 years – due largely to initial audiences' rejection of its strong black female protagonist, Hurston's classic has, since its 1978 reissue, become perhaps the most widely

read and highly acclaimed novel in the canon of African-American literature.

Shelby Crews is the director of OLLI at Texas Tech University. She has been an avid reader since childhood and is especially looking forward to discussing these books as a part of "The Great American Read."

History

The Travels of Rudyard Kipling

An Englishman born in India, Rudyard Kipling traveled widely, and as a young man, became a rich and famous author. His prose, poetry, short stories and drinking ditties - such as: "The Jungle Books", "Just So Stories" for kids, "Kim" and "From Sea to Sea" - are some of the most beloved in English literature. His poem, "If," is among the most-quoted today in valedictories and speeches. The course will provide a brief overview of his writing, his life, his times, his exotic adventures and his lasting impact.

Ross Bigelow, Ph.D., recently visited Kipling's home in England and came away with an abiding love of this gifted writer, his wide-ranging travels, his diverse interests and perspectives and the lasting impact he has made.

He will offer advice on conservative treatments and include a segment on joint education for hip and knee replacement including post-operative rehabilitation.

Eastman provides care for orthopedic conditions at Baylor Scott and White. He received his medical degree from the University of Nebraska. He is board certified by the American Board of Orthopedic Surgery and is a fellow of the American Academy of Orthopedic Surgery.

Date: Wednesday, November 4

Time: 10-11:30 a.m.

History

The American Civil War Era, Part III

The American Civil War (June 1862-autumn 1863) was a critical time in which the fate of both the American Union and the would-be Confederate States of America stood in the balance. We will outline the campaigns across three geographic theaters of the war, the conflict at sea and the efforts of both Lincoln and Davis to find commanders sufficiently talented to lead their armies. Special attention will also be paid to international relations and their impact on the conflict, the efforts of both sides to confront domestic issues and the difficulty of recruiting replacement troops once the enthusiasm for volunteering faltered.

Fred Bailey, Ph. D., is a retired university history professor with 40 years' experience.

Cultures of Texas: Past, Present & Future

Who are we, Texans? This class presents a demographic and cultural profile of Texans today and tomorrow. It will include descriptions of Texas subcultures: geographic, ethnic, age and social identity. Our instructor will use anthropologists' tools to compare the differing values of these cultural groups, and demographic data to describe the sizes of various Texas populations. Join us as we discuss the dynamics of these interacting forces as they shape the Texas of tomorrow.

Marye Tharp, is a retired associate professor of business/marketing who taught at the University of Texas, Emerson College and Shriner University.

History

Summer of '68: Events That Changed Baseball and America Forever

This is a sequel to the Fall 2018 OLLI course: "1968: Events that Still have Impact Fifty Years Later". We will revisit some happenings of that historic year (Vietnam, assassinations and political upheaval) but also focus on the epic changes to the games of baseball, football and the Olympics. Our instructor will discuss the Bob Gibson vs. Denny McLain World Series matchup, the start of divisional series, free agency and the rise of Super Bowls to national-holiday equivalency, to name a few!

Ross Bigelow, Ph.D., teaches geography at the Hill Country University Center. He is an OLLI board member and has taught various OLLI courses.

Geodes: Treasures of Nature

What are geodes? How and when were they formed? Geodes (agates) tell a remarkable story of the earth as they are found throughout the world. They can be gifts from ancient volcanoes as well as from prehistoric seas. Join us as we explore the many different types and stunning features of geodes!

Walter Scarborough has studied, cut, and polished geodes for over 45 years. He is a member of the Central Texas Gem and Mineral Society and has attended several International Agate Expo conferences in Europe as well as in the U.S.

A Short History and Discussion About the U.S. Supreme Court

The U.S. Supreme Court is the nation's highest court and considers cases that affect all citizens. From the liberties enshrined in the Bill of Rights, to national policy matters – both civil and criminal – the court has grappled with issues of the day since 1789. This class will include key history and anecdotes involving the court and its influential and interesting justices over the years before the court during its current term.

Hon. Frank Reilly has 30 years of legal experience and has appeared before the U.S. Supreme Court. He teaches law-related political science courses for Texas Tech University, is a municipal judge and is a partner of the Potts & Reilly, LLP law firm.

Arts and Culture

A Mature Person's Guide to the Opera: Mozart

This class will explore the world of Mozart's operas, focusing primarily on his last. The Magic Flute premiered shortly before his death in 1791. We will explore operatic conventions of the time and the ways Mozart refined and expanded these. After reviewing the plot and musical numbers of the opera, we will explore how Mozart's work influenced later generations of composers. The opera is slated to be performed and recorded by the Metropolitan Opera of New York City in its digital movie series in January 2021.

James Klein, Ph.D., is a retired music professor and professional conductor who has over 40 years' experience in orchestra and opera performances.

Date: Monday, November 30

Time: 2-3:30 p.m.

The Human Trafficking Paradox

This ostensibly veiled subject is offered to engage and challenge participants to become mindful of human trafficking in all its insidious incarnations. This course includes research gathered by Charles Crews for his two doctorates from Texas Tech University; and narratives from law enforcement, professional counselors, traffickers and victims. Come learn from behind the scenes about why human trafficking is such an elusive concern.

Charles Crews, Ph.D., is a professor in counselor education and supervision at Texas Tech University.

Intoxication in Today's West Texas

It is impossible to turn on the nightly news or read a newspaper without seeing stories about traffic fatalities and the consequences of intoxicated driving. Many people have strong feelings about these stories, but what really happens after the news has moved on? How does the legal system handle these issues? What is fact and what is entertainment fiction? What does the law say about intoxicated driving and traffic fatalities? Do we really have a problem? These topics and more will be explored. More than a legal lecture, this presentation will give ample opportunity for Q&A to help address issues most important to participants.

Tom Brummett has been an assistant district attorney with the Lubbock County DA's office for 17 years, and has developed a specialty in handling DUI cases. He teaches on related legal issues all across Texas. He received his BA in public relations from Texas Tech, and his JD from Indiana University.

"One Hundred Years of Solitude"

by Gabriel Garcнa Mбrquez

"One Hundred Years of Solitude" tells the story of the rise and fall, birth and death of the mythical town of Macondo through the history of the Buendia family. Inventive, amusing, magnetic, sad and alive with unforgettable men and women—brimming with truth, compassion and a lyrical magic that strikes the soul—this novel is a masterpiece in the art of fiction.

Shelby Crews is the director of

OLLI at Texas Tech University. She has been an avid reader since childhood and is especially looking forward to discussing these books as a part of "The Great American Read."

Tornado Damage and Sheltering

The Wind Science and Engineering Research Center at TTU has pursued damage investigation and design for sheltering against tornadoes. Since 1970, the research group has investigated close to 100 tornado damages in many states. The lessons learned from these investigations have revealed how the tornadoes cause damage to buildings and where the best places are to take shelter. Additionally, the experiences have led to the development of design criteria for tornado shelters in homes and schools. This class will include illustrations with photographs from the center's extensive research.

Kishor C. Mehta, Ph.D., is a distinguished member of ASCE, a SEI Fellow, a member of the National Academy of Engineering, and a P. W. Horn professor of civil, environmental and construction engineering at TTU.
