Assessment: Assessment Plan

Degree Program - COB - SACSCOC/AACSB - Data Science (MS)

CIP Code: 11.0401.00
Disciplinary Accrediting Body: AACSB
Next Accrediting Agency Review: 2022
Degree Program Coordinator: David Lucus
Degree Program Coordinator Email: david.j.lucus@ttu.edu
Degree Program Coordinator Phone: 806-834-1656
Degree Program Coordinator Mail Stop: MS2101
Assessment Coordinator: Claudia Cogliser
Modality: Fully Online (86-99% Online), Face-to-Face
Assessment Timeline: Accreditation under the Association to Advance Collegiate Schools of Business (AACSB) is based on a 5-year cycle. Assurance of Learning (assessment of student learning outcomes) is an important part of AACSB accreditation, and all of our degree programs have assessment plans for AACSB. At the graduate level, AACSB and SACSCOC assessment plans are identical. At the undergraduate level, AACSB focuses their review on degree programs. SACSCOC focuses their review on the academic major. Despite this difference, we have coordinated our assessment plans and implementation so that data for AACSB and SACSCOC are collected at the same time and in the same manner. Thus, our SACSCOC data will be reported using the same timeframe as AACSB. Data/results may not be reported every year; they will be reported at a minimum of twice during a 5-year period.

Student Learning Outcome: Data Value Extraction

Students will use information technologies to extract value from data
Outcome Status: Active
Outcome Type: Program
Start Date: 09/01/2019

Assessment Methods

Course Level Assessment - ISQS 6339 assignment evaluated by data science leadership using MSDS Data Value Extraction Rubric. (Active)
Criterion: 85% of students will meet or exceed expectations.
Schedule: Annual - Spring term.

Student Learning Outcome: Communicate Data Science Information

Students will demonstrate the ability to communicate data science knowledge to audiences with various backgrounds.
Outcome Status: Active
Outcome Type: Student Learning
Start Date: 09/01/2019

Assessment Methods

Course Level Assessment - Evaluation of ISQS 5330 in-class communications (discussions and exercises). Spring term. (Active)
Criterion: 85% of students will meet or exceed expectations.
### Student Learning Outcome: Results Analysis for Managerial Solutions

Students will demonstrate understanding of the appropriate usage of data and the ability to evaluate and apply data analytic outcomes to solve specific managerial issues.

**Outcome Status:** Active  
**Outcome Type:** Student Learning  
**Start Date:** 09/01/2019
