

TEXAS TECH UNIVERSITY™

TimeClock Plus

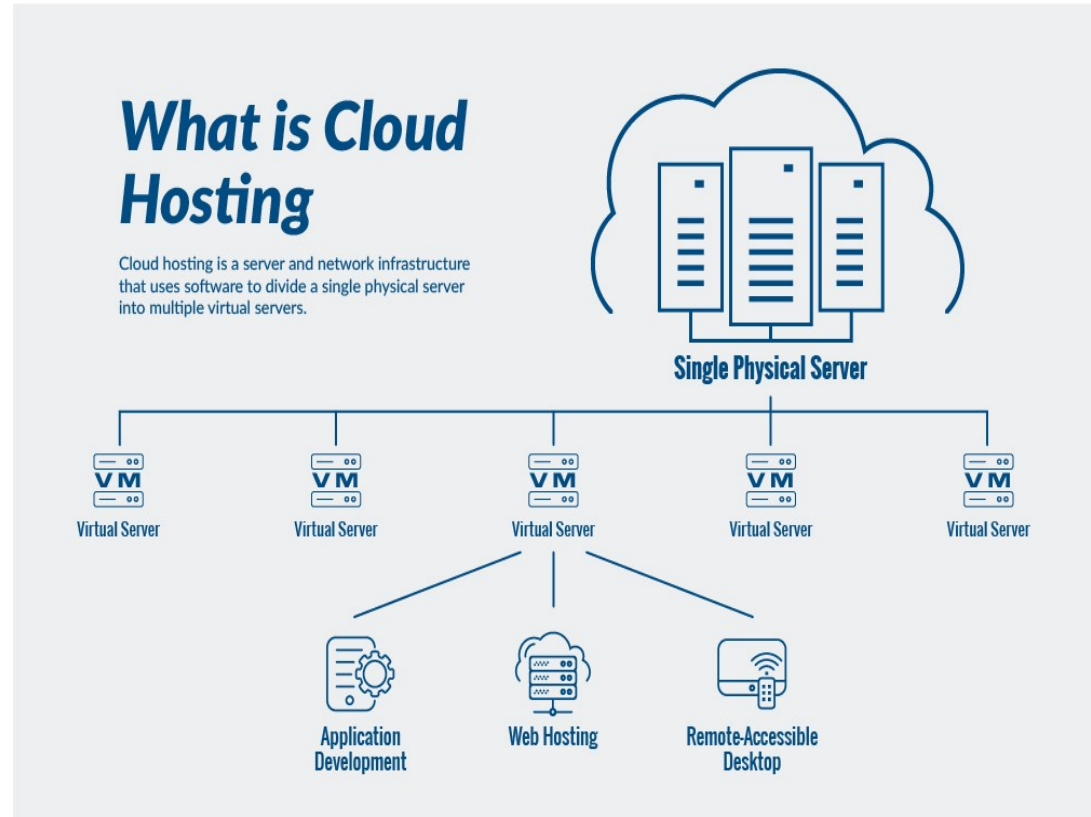

Cloud Conversion Preparation

Cloud Basics

Currently, all TimeClock Plus data (punches, reports, fingerprints, etc.) are stored and maintained on servers managed by Texas Tech's Technology Operations & Systems Management team (TOSM). This data storage and connectivity to the storage, is what allows TimeClock Plus and its applications to function on a daily basis.

After switching to the cloud, TimeClock Plus data will be stored on servers managed by TimeClock Plus and its partners, in place of TOSM.

When Will This Occur?

When Will This Occur?

Current Timetable

****Tentative****

Company Number	Department/Company	Date of Conversion	Group
10	Payroll & Tax Services	March 16th, 2021	1
19	Operations		
20	Housing	April 16th, 2021	2
30	Hospitality		
40	IT Help Central		
	All Other Departments	June 1st, 2021	3

Once the date of your department's conversion to the cloud is finalized, an email will be sent to department TCP Administrators (Exporters) with the date of conversion and further instructions.

How to Prepare

How to Prepare

To ensure that clock operations for employees and managers continue, Payroll Systems Support will provide a checklist of items to address prior to the switch to the cloud, along with training guides.

New URLs for TCP Web Clock and Manager

- *Share the new URL's and the date staff needs to begin using them. Update bookmarks as necessary. Links within Raiderlink and Webraider and Payroll & Tax's website will not be updated until all departments have completed their switch to the cloud.*

Connect Physical Clocks to the New Server

- *Reprogram your physical clocks to utilize the new cloud server*

Fingerprints for Biometric Clocks

- *To meet compliance with the storage of biometric data, all employees who were fingerprinted before biometric attestation was required must be re-fingerprinted. Fingerprints records without attestation will not carry over to the cloud servers*

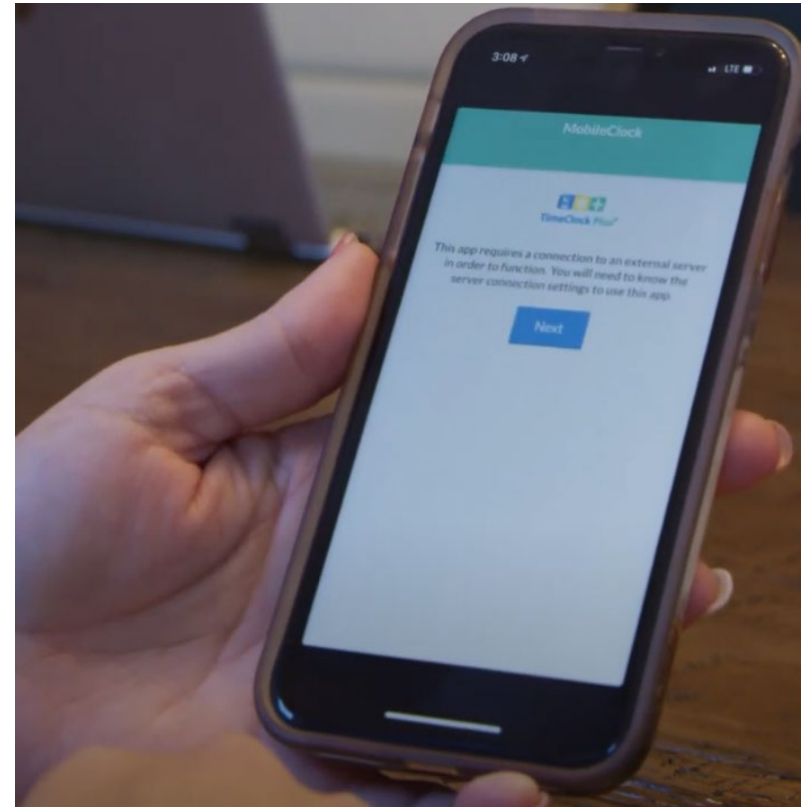

How to Prepare

TCP Mobile App Changes

- *The server within the TCP mobile app will change. For employees who use the mobile app, share instructions to reprogram mobile app for the new server*

Third Party Applications

- *If your department utilizes third party applications to retrieve or send data to TCP, Payroll Systems Support has worked with your IT area to ensure these processes continue unabated*

What to Expect Once You Are On the Cloud

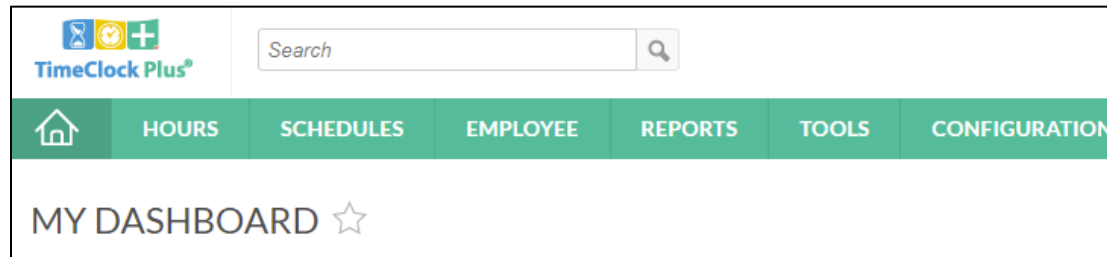

What to Expect Once You Are On the Cloud

Once your department is on the cloud, you should not expect any substantive changes in use and function of the Web Clock, Physical Clocks, Manager, or Mobile App.

You may notice some minor, aesthetic changes in the software interface. However, the manner in which an employee clocks in and out, how managers edit and approve time, and the exporting of hours, will not change.

Old Interface

New Interface

What to Expect Once You Are On the Cloud

Conversions to the cloud will occur on the first day of a pay period. Therefore for your first export once you are on the cloud, the hours to pay must be approved and exported from the old TimeClock Plus system. However all clock ins and outs will occur in the new system on the cloud.

Example – Converting to the cloud on June 1st 2021.

June 1

June 2

Annual Maintenance Changes

Annual Maintenance Changes

Hardware Support

Annual maintenance fees for clocks, are a percentage of the price of time clock terminals purchased. This fee, charged each year, covers software support, troubleshooting, and updates to the system and may vary based on the amounts charged by TimeClock Plus.

The current annual maintenance fee for time clock terminals is 15%.

Hardware support billing is not changing in the cloud.

Annual Maintenance Changes

Software Support Before

Employee licenses cost \$20.00 to purchase.

For annual maintenance, licenses were billed a percentage of their purchase price for employees that were active at the time that an employee count was performed (end of March traditionally).

For 2020's annual maintenance, this came out to \$3.00 per active employee license.

The screenshot shows the TimeClock Plus dashboard for Roman Valencia. The user is logged in as Roman Valencia, clocked in at 08:00 AM on 6/24/2020. The dashboard includes a navigation bar with options: CLOCK IN, CLOCK OUT, VIEW, and MANAGE TIME SHEET. The main content area is titled 'MY DASHBOARD' and features a 'Refresh' button and three status indicators (blue, grey, grey). Below this, there are two main sections: 'MY HOURS' and 'MY MESSAGES'. The 'MY HOURS' section shows a total of 14 hours for 14/14 days. The 'MY MESSAGES' section shows 0 messages.

Time	Position	Total
06/15 08:00 A - 12:15 P	19900000 - Payroll Lead Analyst	4:15
06/15 01:15 P - 05:00 P	19900000 - Payroll Lead Analyst	3:45
06/16 08:00 A - 11:15 A	19900000 - Payroll Lead Analyst	3:15
06/16 12:30 P - 05:00 P	19900000 - Payroll Lead Analyst	4:30

Annual Maintenance Changes

Software Support On the Cloud

Employee licenses will transition to an employee access subscription.

The employee access subscription fee will be billed \$8.50 per active employee for 2021. For 2022 it will be \$9.50. Subscription price beyond 2022 is subject to future increases as determined by TimeClock Plus.

The annual employee access subscription fee, charged each year on a per active employee basis, covers software support, troubleshooting, and updates to the system. Subscriptions are transferrable between employees.

The screenshot shows a mobile application interface for a user named Norman Outlaw. At the top, a green header bar displays the name and the date/time: 5/16/2019 12:12:08 PM. Below this, the status is indicated as 'STATUS Clocked out' in red text. Two large, light blue buttons labeled 'CLOCK IN' and 'CLOCK OUT' are positioned side-by-side. The lower portion of the screen features a vertical list of menu items: 'Notifications', 'Hours', 'Schedules', 'Last Punch', and 'Messages', each centered within its respective white rectangular box.

Annual Maintenance Changes

Software Support On the Cloud

For 2021's upcoming Annual Maintenance, employee access subscriptions will be billed at \$8.50 for each active employee that a department has at the time the count is performed.

After the initial annual maintenance charge, active employee counts will be reviewed on a daily basis. If at any point during the billing period, a department's active employee count exceeds the number of employee access subscriptions paid for in 2021's annual maintenance (baseline count), the department will be billed a prorated subscription fee.

Prorated subscription fees will be invoiced regularly prior to the next annual maintenance billing.

Annual Maintenance Examples

Annual Maintenance Examples

Example One: 48 Active Employees

2 Fingerprint Clocks with POE Purchased for \$2810.00 Each

2020 Annual Maintenance

48 active employees in March 2020 x 15% of \$20.00 = \$144.00

15% of 2 clocks purchased at \$2810 each = \$843.00

Total Maintenance due in April 2020 **\$987.00**

2021 Annual Maintenance

48 active employees in March 2021. 48 x \$8.50 = \$408.00

15% of 2 clocks purchased at \$2810 each = \$843.00

Total Maintenance due in April 2021 **\$1251.00**

2022 Annual Maintenance – 47 Active Employees

47 active employees in March 2022

47 x \$9.50 = \$446.50

15% of 2 clocks purchased at \$2810 each = \$843.00

Total Maintenance due in April 2022 **\$1289.50**

Employee count went down from 2021 to 2022

Annual Maintenance Examples

Example Two: 48 Active Employees

Web Clock Only

2020 Annual Maintenance

48 active employees in March 2020 x 15% of
\$20.00 = \$144.00

Total Maintenance due in April 2020 **\$144.00**

2021 Annual Maintenance

48 active employees in March 2021. 48 x
\$8.50 = \$408.00

Total Maintenance due in April 2021 **\$408.00**

Employee
count
increased
from 48 to 53
Sept 2021

5 additional active employees over the 48
employee count (53 total) added on September 1st
2021.

Prorated employee subscription fee due:
\$24.80 (\$4.96/employee)

2022 Annual Maintenance – 53 active employees

53 active employees as of March 2022.
53 x \$9.50 = \$503.50

Total Maintenance due in April 2022 **\$503.50**

Total Active Employee Count

Active Employee Profiles & R#'s

Payroll Systems Support strongly recommends that departments regularly check their total active subscriber count in TCP and also verify that there are no employees active that should not be.

This will help prevent prorated charges in instances where you did not anticipate exceeding your employee access subscription allotment. It will also prevent charges for employees who are no longer working.
