

Physics & Astronomy Colloquium *- Fall 2018*

Tuesday, Sep 04th at 3:30 pm in SC 010

Dr. Luis Grave de Peralta

Texas Tech University

Physics of Reality

In this talk I will address from a very personal perspective some issues about the fundamentals of Physics and the physicists' profession. I will address topics like what is Physics, what physicists do, and how to become a physicist. I will also describe experiments realized in my research group addressing fundamental mysteries of the quantum world like how quantum particles travel and what a quantum particle is. Finally, I will describe some near-future research topics in my research group focusing in studying other aspects of the reality in which we live.
