

Physics Colloquium

Thursday, Mar 23rd at 3:30 pm in SC 234

Dr. Mark Lattery

University of Wisconsin - Oshkosh

Scientific Discovery and Elementary Particles of Understanding

How does scientific discovery occur? What conditions and processes transform how we think and reason about the world? The history of physics and the physics classroom are excellent places to study these questions. The purpose of this talk is to present the big ideas that are shaping research on student epistemology and model reasoning in physics.

Refreshments at 3:00 pm in SC 103
