

TA OF THE WEEK

March 4, 2022

Ahmed Karkash

Hometown: Smarra, Iraq

Research Advisor: Mahdi Sanati

Ahmed Karkash is one of our Astronomy TAs. Here's what Gwen Armstrong said in her nomination: “Karkash is a fantastic TA. He is always timely and courteous to his students when communicating with them. When there is prep work to be done in the lab room, he volunteers to assist with anything that needs to be done. He goes the extra mile to be sure that he understands all equipment involved in each lab and how to address any issues that can be potential pitfalls for students when they attend their lab session. He also takes his responsibilities seriously, having his grades done and available well before they are due.”

CONGRATULATIONS, AHMED!!!
