

TA OF THE WEEK

April 1, 2022

Yejin Kwon

Hometown: Asan, South Korea

Research Advisor: Myoung-Hwan Kim

PHYS 1408 has four TAs who are from outside the department. These students are all international students. During the prep meetings on Fridays this semester, Yejin has worked with these students. She takes her time when going through the lab with them, making sure they understand each part of the experiment, whether the concepts being investigated or the procedure of the experiment. Yejin is patient and thorough. Because of her mentoring these students, they have been prepared to step into the labs they teach the next week. No one has asked Yejin to do this. She has seen a need and stepped up to meet it.

CONGRATULATIONS, YEJIN!!!
