

TA OF THE WEEK

April 22, 2022

Helen Rohan

Hometown: Aledo, Texas

Helen works as an Undergraduate Assistant in the inquiry-based sections of PHYS 1403 and 1404 that are taught in room 106. The standard for being recognized as TA of the Week is going beyond expectations. This was a bit of a problem with Helen's nomination because beyond expectations tends to be her default setting. Here's what the person who nominated her had to say: "Helen dedicates her time to everyone in the class and does her best to explain as we understand. She goes above and beyond by letting us know her schedule and that contacting her during her available time is not only accepted but encouraged... she goes that extra mile to connect with her students and push us to exceed Dr. West's expectations. I have never met someone as determined and encouraging as Helen."

CONGRATULATIONS, HELEN!!!
