

TA OF THE WEEK

September 9, 2022

Sayani Ghosh

Hometown: Calcutta, India

Research Advisor: Ranadip Pal

Sayani is one of the more experienced TAs in the department, which is why she assists with our more advanced lab courses during the regular fall and spring terms. This past summer Sayani was the TA for PHYS 2401 during the second term. She assisted Dr. West in testing a new lab quiz procedure that took the place of lab homework. The trial was a success, and lab quizzes are being used in all introductory physics labs this semester. Sayani has been generous with her time and expertise by sharing her experience and knowledge with the TAs teaching introductory lab and showing them how to implement the lab quizzes using Blackboard.

CONGRATULATIONS, SAYANI!!!
