

# TA OF THE WEEK

*October 7, 2022*

**Cheslee Hibler**

**Hometown:** Midland, Texas by way of Al Khobar, Saudi Arabia

**Research Advisor:** Vallia Antoniou

This week's TA of the week is Cheslee Hibler. Cheslee works in the Astronomy program. Here's what the person who nominated her had to say:

In her limited free time, Cheslee produced an illustrated guide regarding the startup, operation, and shut down of the 12-inch Meade telescopes inside the roll-off room at Skyview. This is intended to supplement the onsite in-person training held before the ASTR 1401 telescope viewing labs and to be an acceptable reference during these labs.

She also volunteered to train the ASTR 1401 students to use the telescopes and our new CMOS cameras. She scheduled this on a Saturday evening, even though there were already ASTR 2401 observing labs scheduled that Sunday and 4 nights the following week (including both nights the following weekend)!

**CONGRATULATIONS, CHESLEE!!!**
