

TA OF THE WEEK

November 11, 2022

Eric Ji

Hometown: Seoul, South Korea

Research Advisor: Beth Thacker

This week's TA of the week is Eric Ji.

The topic of a recent lab was the force of a magnetic field on a current-carrying wire due to a magnetic field. This is a topic that students often struggle with because it involves visualizing a 3-D situation. Eric used his 3-D printer to make some vector models of this situation. When I saw them, I commissioned him to make a set for use in some of our other classes. This type of thinking and effort to improve the quality of instruction in his labs set Eric apart and earned him the honor of TA of the Week.

CONGRATULATIONS, ERIC!!!
