Research Project on Economic Sanctions

Co-author and Data Coder with Professor David Lektzian of Texas Tech University

- Created a new data-set of Positive Sanctions (policy concession or economic aid) and calculated that when carrot and stick (threat and positive sanction) are both used the success of sanction compliance increases by 60 percent
- Presented the working paper in Midwest Political Science Association conference, Chicago, IL in April 2016.
- STATA for logistic regression analysis, to summarize, categorize, and present data allowing economic sanctions researchers and policy makers better understand the impact of positive sanctions

Conferences Midwest Political Science Association Annual Conference, Chicago, April, 2016.

Languages Bengali (Native), Arabic (Beginner: completed two semesters at Al Asr Institute as well as received instruction through online programs), Urdu-Hindi (Beginner conversational)
