CALL FOR PROJECT PROPOSALS

Faculty Cross-Disciplinary Research Excellence Award

Description:

This is a call for proposals that generate synergy across diverse disciplines under the broad umbrella of One Health. The One Health research program aims to highlight the interconnectedness of human, animal, and environmental health, promoting collaborative research at the intersection of traditional disciplinary boundaries. Such collaboration can include any research discipline and is open-ended. The ultimate goal of the proposal is to generate pilot study data towards extramural funding.

Proposed research is expected to lead to

- establishing new ways of thinking about One Health in a Global sense
- exploiting the unique attributes of multidisciplinary approaches

Eligibility:

Only fulltime faculty members are eligible to apply. The applicants must demonstrate that some percentage of their position is dedicated to research or creative activity.

Awards and submission details are described [here](#).

CALL FOR POSTER ABSTRACTS

Cross-Disciplinary Project Poster Presentations

Description:

This is a call for abstracts to be presented in poster format that demonstrate cross-disciplinary collaborative projects. Cross-disciplinary collaborative projects combine multiple investigators that apply different/multiple/diverse approaches and methods to solve specific problems. These abstracts can include any research discipline and is open-ended.

Eligibility:

Faculty and Graduate students from all disciplines.

Link to information/submission are described [here](#).

**The top five proposals will
present at the conference
and receive a \$1,000
stipend. The top two will
receive an additional
\$5,000.**

conference date:
April 12th, 10:00 am - 5:00 pm
