Postdoctoral Associate

JOB DESCRIPTION

The Institute of Food and Agricultural Sciences is committed to creating an environment that affirms diversity across a variety of dimensions, including ability, class, ethnicity/race, gender identity, and expression. We particularly welcome applicants who can contribute to such an environment through their scholarship, teaching, mentoring, and professional service. We strongly encourage historically underrepresented groups to apply.

If an accommodation due to a disability is needed to apply for this position, please call 352-392-2477 or the Florida Relay System at 800-955-8771 (TDD) or visit Accessibility at UF.

The Best Management Practices (BMPs) Program at Soil and Water Sciences Department, University of Florida, headed by Dr. Lakesh Sharma, is expanding its scope and seeks a highly motivated postdoctoral research associate with experience in DSSAT & other related modeling tools, soil nutrient management, water quality improvement, and project management to join our team. This is a 12-month postdoctoral associate position that will be 100% research at the Soil and Water Sciences Department, Institute of Food and Agricultural Sciences, the University of Florida, Gainesville, FL, focusing on designing tools to improve nutrient management in the agriculture system. This assignment may change in accordance with the needs of the unit. The postdoctoral associate will work on the row crop BMPs program with a multidisciplinary research team at the Soil and Water Sciences Department other UF facilities.

The postdoctoral associate will 1) design and implement experimental design for the research projects associated with nitrogen testing and fertilizer recommendations, 2) implement treatments and assist with maintenance of experiments in the field 3) interpret results, input data, and conduct statistical analysis and develop crop models using DSSAT and other available tools. The postdoctoral associate will be required to publish in peer-reviewed journals. This position includes supervision of graduate students and Biological Scientist and hourly wage employees in field experiments, data collection, and sample preparation.

JOB QUALIFICATIONS

Minimum qualifications: Ph.D. A doctorate (foreign equivalent acceptable) in soil science, agronomy, horticulture, agricultural engineering, or a closely related discipline is required. Candidates should have demonstrated skills in verbal and written communication and interpersonal relationships. Candidates must be supportive of the mission of the Land Grant system. Candidates must also have a commitment to IFAS core values of excellence, diversity, global involvement, and accountability. Extensive background in crop modeling and nutrient management is essential, including designing
and constructing new BMPs. This position requires excellent English-speaking skills to talk to crop producers and other stakeholders. A valid driver's license is required for this position as travel is involved to visit the research sites.

**Preferred qualifications:** Postdoctoral experience is desirable. INSTRUCTIONS

Application review will begin on March 10, 2022 and will continue until a suitable candidate is identified.

Please submit the following:

- resume,
- cover letter,
- and contact information of 3 references

**For questions related to this position, please contact:**

Lakesh K. Sharma, Ph.D.
Assistant Professor  |  Soil Fertility and Sustainable Nutrient Management Specialist  |  State Ag BMP Coordinator
