

Summer Employment Internship Opportunity

MARK SCOTT CROP CONSULTING & AGRICULTURAL RESEARCH is presently hiring students for full time summer jobs. We are looking for individuals who are interested in working as agricultural field technicians and research assistants in the Lubbock area.

Field technicians will assist in the sampling of insects, weeds, and plant diseases in crops and aid in the evaluation of new agricultural technologies.

A background in agriculture (farm or ranch) is desired but not required. Training for all aspects of the job will be provided.

Pay starts at \$100 per day for inexperienced technicians and is elevated for individuals with field experience. **Raises** will be given throughout the summer to employees with good work skills. **Bonuses** will also be awarded to deserving employees. Summer earnings of **\$5,500 to \$7,500** are not uncommon.

Paid Internships are also available. Degree credits from **3-12 hours** can be earned.

This is an invaluable learning experience for individuals who desire employment in the field of agriculture and for anyone who desires a thorough knowledge of crop production. Employment will begin the first week in June and ends just prior to the beginning of the Fall semester.

If you are interested in applying for a position with **MARK SCOTT CROP CONSULTING & AGRICULTURAL RESEARCH**, please call or text, **(806) 773-1444** or email mscbugs@hotmail.com to set up an interview.
