Below are the links to the Pathways (Student Trainee) positions that are being announced for Oklahoma NRCS. There are many locations listed for each announcement, but NRCS is not hiring for each of the locations listed on this announcement (see locations we are hiring at below). Positions are also being listed as either “Biological Science” or “Engineering and Architecture” – this is because the announcement covers a large number of agencies and positions. Students wishing to apply for a Soil Conservationist or Range Management Specialist trainee position should apply under the “Biological Science” announcement, and students wishing to apply for Engineering trainee positions should apply under the “Engineering and Architecture” announcement.

Another important note – the announcement is open until 1/18/2019, but there is an initial cut-off date of 12/9/2018. We strongly encourage anyone interested to apply for the positions by the December 9th cut-off.

Links to the announcements and the specific locations NRCS OK is hiring for are below:

* GS-0499-02/03/04/05 – Student Trainee (Biological Science) **This is the announcement for Soil Conservationist and Rangeland Management Specialist trainees**

* GS-0899-02/03/04/05 – Student Trainee (Engineering and Architecture) **This is the announcement for Engineering trainees**

If students have any questions about the application process, they may contact Josh Ketch at 405-742-1224, or by email Joshua.ketch@ok.usda.gov
