Title: Management of Cotton Diseases with Host Resistance.

Seminar date & Time: 12:30 - 1:30 pm on February 14, 2025 in BPS 118

Name: Terry Wheeler, Ph.D.

Position: Professor, Soilborne Diseases of Cotton and Peanut, Texas A& M University

Degrees:

1. North Carolina State University, Ph.D in Plant Pathology

- 2. Texas A&M AgriLife Research, M.S. in Plant Pathology
- 3. Worcester Polytechnic Institute, B.S.

My primary area of specialization is nematology. I have been working with cotton in the Southern High Plains of Texas since 1994, with an emphasis in soilborne pathogens.

I work with all plant pathogens of cotton and peanuts for this region, and nematode problems of other crops as well that are grown in this region.
