

I am the owner of ForeFront Agronomy based in Plainview, TX. We are currently seeking applicants for our Summer internship program.

ForeFront Agronomy provides seed and agronomic services to growers on the High and South Plains of Texas with a focus on irrigation management, IPM, balanced fertility, and soil health recommendations.

We are currently seeking applications for our summer season, which could turn into part-time through the rest of the year depending on the applicant.

Job Type: Internship

Education: High School or Equivalent + 1 yr of college

Experience: 1 year

License: Driver's License

Language: English (Required)

Job Description

- Scout fields for insects, weeds, disease, fertility, soil moisture, and crop growth.
- Soil and Tissue Sampling, Various Trial observations, Install/Maintain/Remove Soil Moisture Sensors
- Data collection and interpretation
- Maintain field equipment, vehicles, utvs, sampling, and mapping equipment
- Prefer an agriculture or science-based major
- Be able to lift 60lbs
- Must be responsible, self-motivated, and able to set own pace for getting the job done in an efficient and accurate manner. Applicants will need good observation, listening, and writing skills.

Thanks,
Jeff
