

Student Employment

Position: Student Greenhouse Technician

Duties: Perform necessary and routine maintenance on greenhouse operating systems including irrigation and electrical systems (fans, belts, small motors). A basic knowledge of electrical and plumbing would be ideal. Occasionally will be required to help researchers with greenhouse projects, i.e., planting, harvest, data collection, some data entry. We are looking for someone who can stay with our program while they complete their education. Sophomores/Juniors are preferred, however if you have previous experience with the skills, younger applicants may be accepted. I'm looking for an individual who is self-motivated, responsible, and doesn't mind working alone with minimum supervision. We offer an informal work environment with flexible hours where we understand that school is your priority.

Apply: Please find on-line application at <http://lubbock.tamu.edu/jobs/>

Forward application along with current resume to: lwwells@ag.tamu.edu
