

## **Biological Science Aid-position**

### **USDA-ARS, Cropping Systems Laboratory, 3810 4<sup>th</sup> street**

This position has flexible hours to work around your school schedule. It involves assisting an enthusiastic research team in the soil microbiology lab at USDA-ARS, 3810 4<sup>th</sup> st, Lubbock TX, 79415. Research duties include assisting in collection, preparation, and analysis of soil samples for soil health assessment. The individual will work as a team member and/or independently to perform lab analyses. The individual is responsible to maintain inventory of chemicals, stock solutions, etc., prepare solutions and reagents for use in the laboratory, and safely dispose of waste material (both chemical and biological). The individual is required to actively participate in one or more phases of the research process by performing a variety of technical duties in a laboratory or field setting. Additionally, the individual will assist the team to collect and keep records of experimental data.
