

**Part-time Lab and Technical Assistant Position
Rutgers University**

Applications are invited for a part-time research assistant position in the turfgrass stress physiology program at the Department of Plant Biology, Rutgers University.

Job Responsibilities: This individual will perform experiments independently and assist graduate students and research associates for turfgrass research in controlled-environment and field trials. This individual is responsible for maintaining turfgrass plant materials in the greenhouse and managing turf field plots in research farm. The individual is expected to take care of purchasing and maintaining lab supplies, chemicals, and instruments in good order.

Qualification: BS or MS. in Plant Biology, Agronomy or Horticulture. Experiences and training in turfgrass management are highly desirable. Experiences with field trials are required.

Candidates should submit their CV and list of at least 3 references to Dr. Bingru Huang, Distinguished professor, Department of Plant Biology, Rutgers University, New Brunswick, NJ 08901, huang@sebs.rutgers.edu.

Applications will be reviewed immediately and accepted, until position is filled.
