

COUNSELING PSYCHOLOGY TENURE-TRACK FACULTY POSITION AT TEXAS TECH

UNIVERSITY: The Counseling Psychology Doctoral Program at Texas Tech University (TTU) invites applications for one tenure-track Assistant Professor position (req. 11117BR).

The anticipated starting date is August 22, 2018. Candidates are expected to conduct productive and programmatic research, compete for extramural research funding, teach undergraduate and graduate psychology courses, mentor graduate students and provide service to the department, college, university, and profession. Our aim is to bring to TTU an outstanding and collegial faculty member who will fit into our academic culture, with a focus on funded research, excellent graduate and undergraduate mentoring and teaching, national service and engaged outreach. We seek a strong researcher in any area within the field of Counseling Psychology; however, we have a particular interest in individuals researching topics in health psychology broadly defined, but health disparities research in particular, or community mental health services. We have a strong commitment to diversifying our faculty and strongly encourage applications from members of diverse groups. Applicants should also have the ability to teach effectively at the undergraduate and graduate levels (including practicum) and be willing to contribute service to the department, college, university, and profession. Candidates must receive their PhD from an APA-accredited Counseling Psychology program by August 2018.

The Counseling Psychology Doctoral Program at TTU has been APA-accredited since 1964. We have seven full-time faculty positions with wide-ranging research interests. The Program is committed to fostering knowledge of and appreciation for diversity in faculty, students, and clients, and express this via coursework and practica. The TTU Department of Psychology (www.psychology.ttu.edu) has doctoral programs in counseling, clinical, cognitive/applied cognitive, human factors, and social psychology. We currently have 32 full-time faculty, approximately 120 doctoral students, approximately 900 undergraduate majors, our own building with labs and classroom space, and a Psychology Clinic. We have effective working relationships with the TTU Health Sciences Center, several large area hospitals, and numerous psychological-service groups in the region. TTU is classified as a doctoral “research-extensive university” by the Carnegie Foundation and as a “national research university” by the State of Texas. TTU is growing rapidly with over 33,000 students on the main campus and almost 5,000 students at the adjoining TTU Health Sciences Center campus. With a population of approximately 250,000 people, Lubbock is an ethnically-diverse community, with a low cost of living, temperate climate, modern airport and infrastructure, and good school districts.

To apply for a faculty position, candidates must submit a cover letter, curriculum vitae, statement of research interests, statement of teaching philosophy, evidence of teaching effectiveness, sample reprints, 3 or more letters of recommendation, and any other materials that candidates think will be helpful, to our online application web site, at: <http://jobs.texastech.edu>, under the above requisition number for each of the specialty areas. **We will begin reviewing applications on October 1, 2017**, and will continue to review applications until the positions are filled. Please direct questions about these positions to: Dr. Steve Richards, Search Committee Chair, STEVEN.RICHARDS@ttu.edu, 806-834-8518. As an Equal Employment Opportunity/Affirmative Action employer, Texas Tech University is dedicated to the goal of building a culturally diverse faculty committed to teaching and working in a multicultural environment. We actively encourage applications from all those who can contribute, through their research, teaching, and/or service, to the diversity and excellence of the academic community at Texas Tech University. The university welcomes applications from minorities, women, veterans, persons with disabilities, and dual-career couples.
