

## **Student Admissions, Outcomes, and Other Data**

### **Disclosure of Education and Training Outcomes and Information Allowing for Informed Decision-Making to Prospective Doctoral Students**

#### **Clinical Psychology Doctoral Program Texas Tech University**

The following information is provided to give prospective students, current students, and other interested parties accurate information about our training program. This information is updated on a yearly basis with an update made by October 1st of each year. For prospective students, the information we provide is meant to assist you in making an informed-decision about applying to our doctoral program.

Below, you will find information related to time of completion, program costs, internships, attrition and licensure. In addition, we also include information related to the general characteristics of students who are admitted to our program including number of students who apply, number of offers made, GPA, and GRE scores.

The Clinical Psychology doctoral program at Texas Tech University is accredited by the American Psychological Association (APA) and is a member of the Council of University Directors of Clinical Psychology (CUDCP). The [CUDCP website](#) states: "The member programs of CUDCP support the provision of full disclosure about operations and outcomes of our educational endeavors." In compliance with APA public disclosure guidelines (Implementing Regulation IR C-20) and Responding to the recommendation of the CUDCP Board of Directors, the TTU Clinical Psychology doctoral program provides the following performance and outcome data pertaining to the education of its graduate students:

**Time to Completion for all students entering the program**

Also, please describe or provide a link to program admissions policies that allow students to enter with credit for prior graduate work, and the expected implications for time to completion. Please indicate NA if not applicable:

Incoming students are allowed to petition to have prior graduate-level courses transfer in to our program. Incoming students are encouraged to consult either their academic advisor and/or the DCT regarding the best course of action during the first semester of enrollment at TTU. Clinical faculty prefer that graduate students enrolled in the program take all the core program courses during their tenure at TTU. Historically, incoming students have transferred in graduate-level courses such as entry-level statistics (Psy 5480: Experimental Design) and History & Systems of Psychology. There are many factors to consider regarding time to completion when courses are transferred in from another program. Some of these factors include rate of progress in successfully completing the Qualifying Examination and Dissertation along with the remaining courses, clinical work, and other program milestones. The Program requires of each student a minimum of 4 full-time academic years of graduate study and completion of a 12-month internship prior to awarding the doctoral degree. The Program's curriculum is designed to be completed in 6 years (including internship) but transferring in graduate courses may allow for the student to complete the program in less than 6 years. Again, students are encouraged to work closely with their academic advisor in developing a time to completion plan.

## Program Costs

Description	2015-2016 1 <sup>st</sup> -year Cohort Cost
Tuition for full-time students (in-state)	\$3,762.50*
Tuition for full-time students (out-of-state)	\$7,434.50**
Tuition per credit hour for part-time students ( <i>if applicable enter amount; if not applicable enter "NA"</i> )	N/A
University/institution fees or costs	Included in tuition (above)
Additional estimated fees or costs to students (e.g. books, travel, etc.)	Approximately \$1,600

*The proceeding information is based on 9-credits (full-time) per semester*

\*Students admitted into the Clinical Psychology doctoral program are guaranteed an assistantship for the first four years of training (contingent upon good standing in the program and in the department). Given this, a student will not pay the above amount. With a graduate assistantship, students qualify for department tuition and fee waivers that cover the majority of the tuitions costs. For example, during the 2015-2016 academic year, a Clinical Psychology graduate student paid \$904 per semester in tuition costs.

\*\*Students with a graduate assistantship qualify for in-state tuition costs.
