Supply Chain Management Application

In order to effectively manage faculty-to-student ratios, student development, instructional quality, placement of graduates, enrollment, and resource constraints, admission into the supply chain management program is required. Admission into the supply chain management program is *competitive* and a limited number of students will be admitted into the program each semester. Admissions decisions will be based on a comprehensive review of a student's application materials. A completed application consists of:

1. Application form
2. Resume
3. Transcripts of all undergraduate coursework (unofficial copies are acceptable)
4. Written personal statement (optional)

All application materials must be submitted in hardcopy form to Terri Beard, Academic Administrative Coordinator, Rawls College of Business, terri.r.beard@ttu.edu, room W333. Applications for admission into the supply chain program are required for enrollment in any of the 4000 level SCM courses. Applications for admission into the Fall 2017 semester are due by Friday, March 24th at 2:00 p.m. Late applications may not be considered.

Note: Student must have completed or be enrolled in SCM 3353 and/or SCM 3351 to apply for admission in the supply chain management program.

Student applications will be reviewed by a panel. The panel may consist of faculty, staff, and/or industry professionals. The panel will evaluate all application materials in a holistic manner in order to select the best candidates for the supply chain management program. Due to the competitive nature of the admissions process, the average profile of admitted students may change over time. However, admitted students typically perform well in the following areas:

- Overall GPA
- Completion and grade earned in SCM 3353 Supply Chain Management
- Completion and grade earned in SCM 3351 Business Process Improvement
- Completion and grade earned in ISQS 3344 Introduction to Production and Operations
- Completion and grade earned in MKT 3350 Introduction to Marketing
- Resume quality
- Prior work experience in logistics or supply chain management roles
- Completion and grades earned in prior math courses
- Leadership potential

The admissions panel will also evaluate written personal statements from applicants. The personal statement is *optional*, but it provides students with the opportunity to highlight any strengths or explain any weaknesses in their applications. Personal statements must be typed, double spaced, 12-point font, and limited to 4 pages.
