Advancing Infrastructure Resilience – mastering extremes in complex environments

During this workshop, experts and practitioners from academia, applied research, private, and public sectors will not only exchange concepts and applications in infrastructure resilience, but also identify joint research opportunities for German-US research teams.

- *Featuring the leading applied research organization in Europe and National Academy members & pioneer researchers in the US
- *Engaging participants via TED talks, expert panel, & World Cafe
- *Covering hazards from wind to flood in a changing climate
- *Exploring systems from civil infrastructure to agriculture
