RISE also administers the required Think About It course for all incoming first-year and transfer students.

Becoming and staying academically fit

should begin before students think they need help. Just as one cannot train for a marathon in one weekend, being academically successful cannot occur at the last minute. Students must get in a habit of using small incremental study doses, instead of attempting to pull an all-nighter prior to big tests. Study doses include: attending class, reading class notes after EVERY class, keeping up with assignments, and taking advantage of academic support services offered around campus. By using these methods, preparing for any major test or final exam becomes more of a review session than a gut-wrenching experience.

This pamphlet highlights some of the available academic resources across campus. The information is presented as campus-wide resources, college and departmental resources, and restricted access resources. While the presented information is comprehensive, not all departmental resources may be included. Students should check with specific departments within colleges. Students should also use their academic advisors as a primary academic support resource. Prior to making any decision that could influence academic success, students need to check with their academic advisor. Students should see their advisors at least once a semester, and more frequently if needed. Advisors are an integral part of the Graduate On Time initiative www.depts.ttu.edu/graduatenowtime.

Most importantly, students who begin using these services at the start of the semester are more likely to have a successful academic semester than students who wait until the last minute, or do not use the services at all. Most of these services are free. It is up to each student to commit to academic success, use the services offered, and take responsibility for their own total academic experience.
Campus-Wide Resources
