AI-Enabled Wearable Technology During Assessments

To protect the integrity of assessments and ensure fairness for all students, AI-enabled or recording-capable wearable devices, including smart glasses, smartwatches and similar technologies, may not be used during quizzes, exams or other assessments, whether in class, in a proctored online setting or in a university testing center. Instructors and proctors may ask students to remove, power off and store these devices for the duration of an assessment.

Students who wear prescription smart glasses should bring a pair of non-AI glasses on assessment days. Students who do not have alternative eyewear should contact their instructor before the assessment to arrange an alternative. Students who rely on a wearable device for medical reasons, or whose approved accommodation through Student Disability Services (SDS) involves assistive technology should follow SDS procedures and communicate with their instructor in advance.

The use of AI-enabled devices to gain an unfair academic advantage may constitute academic misconduct and may result in a referral to the Office of Student Conduct.
