

IN THIS COURSE, GENERATIVE AI USE IS PERMITTED FOR PLANNING PURPOSES, NOT AUTHORSHIP

The use of artificial intelligence applications, including but not limited to ChatGPT, Claude, Gemini, DALL-E, Grammarly, or similar applications may be used for planning activities such as brainstorming, outlining, and idea development. However, all final submissions should show evidence that students have developed and refined these ideas on their own without additional generative AI use. Students are expected to apply what they are learning in this course to produce work for this class by drawing on their own developing knowledge, understanding, and skills. When using generative AI in permitted contexts as outlined in the syllabus or explicitly permitted by the instructor, you are responsible for ensuring that AI-generated content is properly cited, accurate, ethical, free of misinformation or intellectual property violations. AI-generated content must never be submitted as your own work. Doing so may constitute a violation of academic integrity and may be referred to the Office of Student Conduct. Please contact me if you have questions regarding this course policy.

Any generative AI use should be cited *AND* clearly disclosed according to the instructions in this syllabus. An example of an APA citation (7th ed. format) is seen here: OpenAI. (2025). ChatGPT (May 2024 version) [Large language model]. <https://chat.openai.com>
