Generative AI on Tests, Quizzes and Exams

To promote deep learning and critical thinking, students are expected to complete reading quizzes, tests, exams, etc. without the use of generative AI tools **(**such as ChatGPT, Claude, Gemini, Grammarly, or similar platforms**).** Relying on AI to answer these questions may limit your understanding of the material and may undermine your long-term academic and professional success. Any unauthorized use of AI, or collaboration and sharing of answers with others may be referred to the Office of Student Conduct.
