FIRE STATISTICS.....	13

The Fire Safety Report is prepared and published annually by the Texas Tech University Fire Marshal. This report contains Statistical Information for Calendar years 2017, 2018, 2019

Report Published December 2020

NOTICE OF THE ANNUAL FIRE SAFETY REPORT

Texas Tech University publishes this Fire Safety Report as part of its annual compliance with the Clery Act and the Campus Fire Safety Right-to-Know Act. The Acts require colleges and universities with on campus housing facilities to compile an annual fire safety report which gives students, parents and the public current information about fires in on-campus housing. Universities are also required to maintain a public fire log which captures specific information about fires occurring in on-campus housing.

The report contains statistics about the number of fires in on-campus housing for the 2017, 2018 and 2019 calendar years. The description and cause of the fire follow the classifications used by the U.S. Department of Education. The estimated dollar amount of damages for each fire is included utilizing the ranges required by the reporting criteria of the Department of Education. The report also includes a description of fire systems, the number of fire drills, evacuation procedures, education and training programs, future plans for fire safety improvements, and the institutions policies on appliances, smoking, open flames, and other potential hazards.

The Annual Fire Safety Report is distributed electronically within the Annual Security Report to all current faculty, staff, and students through email and TechAnnounce. The Annual Security and Fire Safety report is made available online to all prospective students and employees via the Admissions website and the Human Resources page.

Parents will receive notification through a newsletter published by Parent & Family Relations. An advertisement containing information about how to access the report will run in The Daily Toreador for one week. Additional notices will be posted in common areas in campus buildings.

Copies of this report may be obtained in person or by contacting the Texas Tech Fire Marshal (806.742.0145), the Texas Tech Police Department (806.742.3931), or University Student Housing (806.742.2261) during normal business hours, 8:00 A.M. - 5:00 P.M., Monday through Friday. The Annual Security Report and the Annual Fire Safety Report can be found online at the [Texas Tech Clery Compliance website](#).

Faculty, staff and students at the Texas Tech University Center at Junction may also request or obtain a copy by visiting the Director of Operations office in the administrative offices on campus.

NOTICE OF THE ANNUAL SECURITY REPORT

The Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act is a consumer protection law. The law requires all colleges and universities which receive federal funding to share information about certain crimes which occur on and around campus, as well as institutional efforts to improve campus safety. This information is made publicly accessible through the University's Annual Security Report.

Clery Act regulations require colleges and universities to do the following:

- Publish an annual report by October 1st containing three years of campus crime and fire safety statistics and certain campus security policy statements;
- Disclose crime statistics for the campus, public areas immediately adjacent to or running through the campus, and certain non-campus facilities and remote classrooms.
Note: The statistics must be gathered from campus police or security, local law enforcement, and other University officials who have significant responsibility for student and campus activities.
- Provide "timely warning" notices of crimes which have occurred and pose an ongoing threat to the safety of students and employees.
- Issue an emergency notification, upon the confirmation of a significant emergency or dangerous situation involving an immediate threat to the health or safety of students or employees occurring on campus.
- Disclose in a public crime log all crimes and alleged crimes which occurred on campus or within the patrol jurisdiction of campus police reported to the campus police.
- Disclose missing student notification procedures pertaining to students residing in any on-campus student housing facilities.
- Maintain in a public fire log, a record of any fire which occurred in an on-campus student housing facility.
- Submit collected crime and fire statistics to the U.S. Department of Education.

Texas Tech University's ASFSR is distributed electronically to all current faculty, staff, and students through the via email and through TechAnnounce. The ASFSR is made available online to all prospective students and employees via the Admissions website and the Human Resources page. The ASFSR can be found online at the [Texas Tech Clery Compliance website](#).

The Parent & Family Relations department announces the publication of the ASR in a newsletter sent to the parents of students. An advertisement regarding publication information will run periodically in The Daily Toreador and will be posted in common areas in campus buildings.

Copies of the ASFSR may be obtained in person from the Office of Student Conduct, Dean of Students, University Student Housing, or the Texas Tech Police Department during normal business hours, 8:00 A.M. - 5:00 P.M., Monday through Friday.

LETTER FROM THE FIRE MARSHAL

Students, Faculty and Staff,

The Texas Tech University Fire Marshal's Office is committed to creating and maintaining a safe environment for everyone on campus. In addition to this report, the Fire Marshal's Office encourages all students, faculty and staff to use the resources available to them in order to create and maintain a safer campus. The Fire Marshal's office has developed a Fire and Life Safety Program which empowers employees and students to follow the correct procedures to ensure the safety of co-workers, other students and visitors, which all students, faculty and staff are encouraged to familiarize themselves with. This program supports Texas Tech's ultimate goal of cultivating a safe and secure learning, living and working atmosphere. Creating and maintaining such an atmosphere requires the cooperation of all students, faculty and staff. The Fire Marshal's office appreciates your attention to this matter. Feel free to contact our office with any questions or concerns. We also offer training in fire safety topics and fire extinguisher training. Contact us at 806.742.0145 or 806.742.0146.

Sincerely,

Walter James - Director
Texas Tech University Fire Marshal's Office

Walter James CFPS CFI is the director of Texas Tech University Fire Marshal's Office. Mr. James has been employed with the Texas Tech University Fire Marshal's Office since 1999. He has been active in the fire service since 1983. Mr. James holds certifications as a Certified Fire Protection Specialist, Advanced Fire Inspector, Advanced Fire Investigator, Advanced Firefighter, Field Examiner, and Level 3 Fire Service Instructor. He is a past President of the West Texas Fire Arson Investigators Association and currently serves on its board of directors.

TEXAS TECH FIRE MARSHAL'S OFFICE

The Fire Marshal's office administers a proactive Fire/Life Safety program. The program is designed to ensure all faculty, staff, students, and visitors are provided with at least the minimum required levels of protection in each campus facility.

The Texas Tech Fire Marshal's office coordinates with local fire departments for emergency responses and routine inspection of alert and sprinkler systems for campus facilities. They also assist first responders including all law enforcement, fire, and EMS personnel during emergencies by providing up-to-date information about campus facilities, assisting with evacuations, and providing investigative assistance if a fire is determined to be caused by arson.

All residence halls and residential apartments, are fully protected by fire sprinklers and smoke alarm systems. Student residents receive fire/life safety handouts at move-in and are required to participate in annual fire safety drills. The Fire Marshal's office also aids in the development of Emergency Action Plans for campus buildings and conducts educational programs to help ensure emergency preparedness for students, staff, and faculty.

The university reviews the fire systems in our residence halls and will make upgrades, repairs and/or revisions when problems are identified. At this time there are no planned improvements in fire safety outside routine maintenance.

The Texas Tech Fire Marshal's Office is staffed by both full time and part time employees which are certified by the Texas Commission on Fire Protection.

FIRE AND LIFE SAFETY PROGRAM

The health and safety of all university employees, students and visitors to our campus is of paramount importance to everyone working and learning at the University. This concern for safety mirrors the character and strength of Texas Tech's commitment to its academic mission.

Staff, faculty, students and visitors play an important role in assuring campus safety; they must do what they can to protect themselves and others within the University community and respond appropriately to all emergencies. Employees must avail themselves of information pertaining to the safe conduct of their work, regardless of setting. Students must also participate in fire and life safety programs and respect the safety of others. The Texas Tech University Fire and Life Safety Program, which is made available to all faculty, staff, students and visitors, contains policies and procedures that, when implemented and maintained, will satisfy the code and legal obligations of the University, help satisfy insurance requirements, prevent loss of life, reduce injury and reduce property damage due to fire and fire related emergencies.

The program is based on state and local regulations, National Fire Protection Association guidelines and Life Safety Code requirements. The program provides road maps for fire safety surveys of buildings, fire extinguisher maintenance, and fire safety related training. This training is scheduled for all resident hall occupants each semester and is available to any campus department upon request.

To obtain a complete copy of the Texas Tech University Fire and Life Safety Program, please visit: <http://www.depts.ttu.edu/ttfd/fire.php>

ON-CAMPUS STUDENT HOUSING FIRE SAFETY POLICIES

The following information is from Texas Tech University Student Housing [Residence Hall Policies](#) and provides information on prohibited conduct and items within the residence halls.

Prohibited Items

Possession of the following items is a violation of housing policy unless provided by University Student Housing.

Appliances: All electric appliances must bear a UL or equivalent certification label and should be kept in a safe operating condition. Prohibited appliances include but are not limited to air-conditioners, dishwasher, washing machines, clothes dryers, waterbeds, refrigerators over 3.5 cubic feet, and tanning beds.

Cooking: Ovens, microwaves over 1500 watts, deep fryers, electric skillets, charcoal and propane grills, hot plates, hot pots; stoves (propane, butane and kerosene); toasters or any items with an exposed coil or heating elements, including air fryers. Large Coffee Pots - Coffee pots with a capacity of more than four cups.

Incendiary: Candles, candle warmers, and/or incense, lit or unlit, are not allowed in student rooms and/or public areas in any of the residence halls. Modification of prohibited items for display, such as cutting the wick off of a candle does not make it “legal” or otherwise exempt the item. Combustible materials, compressed gases, and flammable liquids including spray paint, lighter fluid, kerosene, engine fluid, solvents, gasoline and diesel fuel.

Lighting: Sun Lamps, Halogen Lamps

Reporting of Fires

If a fire occurs in a Texas Tech University-owned, -rented, -leased, or otherwise controlled building, community members should immediately notify the Texas Tech Police Department by dialing 911. TTPD will respond to all fire alarms or reports it receives. TTPD dispatch will immediately summon the Lubbock Fire Rescue for all fire alarms. If a member of the Tech community finds evidence of a fire that has been extinguished, and the person is not sure whether TTPD has already responded, the community member should immediately notify TTPD or the Fire Marshal's Office to investigate and document the incident.

Electrical Outlets

Extension cords are not permitted. Only UL approved surge protectors may be used in the halls and may not be piggybacked onto other surge protectors or other devices where multiple items are plugged in for electrical power.

Smoking

Smoking is prohibited in all residence hall rooms, suites, apartments, and public spaces. Students may smoke outside 20 feet away from any part of the buildings and utilize designated receptacles for disposal. While outside smoking, you must keep at least 6ft from others and do not congregate. Use of Hookahs, e-cigarettes, and vaping is not allowed in the residence halls. These items may be stored in a room; however, the use of these items must be at least 20 feet from the building.

Permitted Holiday Decorations

Christmas Trees

- Only artificial Christmas trees labeled as fire-retardant will be allowed within the residence halls.
- Only low watt, safety rated lights allowed. Do not block exits.

Christmas Lights

- Cannot be hung in the hallways, but may be displayed in individual rooms.
- Only use lights certified by recognized testing laboratories and follow the manufacturer's instructions.
- Discard any lights with worn, frayed or broken cords. Connect no more than three strands of lights.

Wrapping / Decorating Doors

- When wrapping doors with paper or decorations, the door must not be covered more than 50%.

Fire Log

The Texas Tech Fire Marshal's Office makes the Fire Log available to the public for the most recent 60-day period. The log is kept within the TTPD dispatch center and can be inspected during normal business hours at TTPD located at 413 Flint Ave. Any portion of fire log older than 60 days are made available for public inspection within two business days of a request. Entries into the fire log contain all confirmed fires occurring within or on any and all on-campus residential facilities. The information in the fire log typically includes the incident number, nature of the fire, date reported, date occurred, and the general location of the fire. The Texas Tech Fire Marshal's Office and the Texas Tech Information Systems department are currently working on an upgrade to the fire log.

Fire Investigations/Arson

Every fire which is not known to be accidental (such as a cooking fire) is investigated by a trained arson investigator from the Texas Tech Fire Marshal's Office. The primary investigator in response to fire incidents is an officer from TTPD and request from the Fire Marshal's Office will be made as necessary. Fires determined through investigation to be willfully or maliciously set are classified as arsons for Clery reporting purposes.

On-Campus Student Housing Facilities Fire Safety Systems

All the rooms, hallways, and stairwells of the residence halls have smoke detectors and sprinklers. Fire alarm pull stations are located in all buildings, and fire extinguishers are located on every floor. Emergency phones/bells are located in the elevators in the event of an emergency. The smoke detectors are wired to the building's main fire alarm system. These smoke detectors, when activated, will set off the alarm system for the building, prompting an evacuation. The fire alarm panels communicate with Texas Tech Police Department dispatch. When a fire alarm system has been activated, TTPD will notify officers on duty, and dispatch Lubbock Fire Rescue. The Texas Tech Fire Marshal's Office is notified under certain circumstances. Housing staff members will initiate their emergency response plan and procedures for fire-related incidents.

The following table contains detailed information about the fire safety systems within each of the residence halls.

Texas Tech University On-Campus Residential Facilities Current Fire Safety Systems in place within On-Campus Residential Facilities as of Calendar Year 2019

EMERGENCY AND EVACUATION PROCEDURES

The safety and security of the students within Residence Halls is a priority for University Student Housing and Texas Tech University. The following information has been implemented to enhance the safety of those living or visiting university housing property.

When the fire alarm sounds, building evacuation is required by all individuals who are within the building. University Student Housing will conduct fire evacuation drills in the residence halls at the beginning of each semester. Evacuation information is found on room and apartment doors. In the event of an emergency, occupants should cooperate fully with staff and evacuate in a safe and orderly manner using the nearest exit. Those on the upper floors of a building should use the stairs. All should move as far away from the building as possible upon exiting.

Fire Alarm Instructions

Residents should immediately do the following when the fire alarm sounds:

- Put on coat and shoes when possible
- Close and lock your door and take your room key
- Take a large, damp bath towel with you if possible. If smoke is present, cover your mouth and nose.
- Evacuate the building using the most expedient method (Note: Do not use elevators)
- Proceed immediately and in an orderly manner to designated exits
- Avoid moving toward open flame or heavy smoke if possible
- In case of inclement weather, proceed to the lobby of the nearest building or residence hall
- Account for your friends and roommates
- Follow instructions from all emergency personnel, including fire safety personnel and police
- Do not re-enter the building until the “all clear” is sounded

Failure to Evacuate

Failing to evacuate the building during a fire alarm can cause harm to the individual as well as fire safety personnel. Failure to evacuate during a fire alarm will result in judicial action and could result in an arrest for violating state and federal law. Students should wear masks and strive to keep at least 6ft of physical distance when exiting the building. While outside, do not congregate and continue to keep the 6ft physical distance. In outdoor spaces where physical distancing is not possible, masks are required. During severe weather events, students should remain inside the building unless instructed otherwise. Residents and guests are expected to follow the directions provided by university officials, staff, law enforcement, and/or first responders.

Fire Drills

For the protection and safety of residents, fire drills are held every semester. Please read the fire safety information posted in residence hall corridors and become familiar with evacuation routes. Cooperation is expected at all times. All individuals must evacuate immediately when an alarm sounds. Failure to comply will result in judicial proceedings and possibly monetary assessment or revocation of housing privileges.

FIRE EVACUATION

FIRE EVACUATION: WHAT TO DO

It is important for building occupants to become familiar with the procedures for evacuating the building before the need for evacuation occurs. Evacuation is required for safety and the safety of the firefighters, police and staff who respond during alarms.

If the smoke detector in a room activates, occupants should:

1. Attempt to identify the source of the smoke or heat, and exit the room.
2. Pull the building fire alarm if there is a threat to safety.
3. Follow the building evacuation procedures posted within each room.

During evacuation, please remember:

1. Before opening the door, check to see if the door or handle is hot.
2. Close the door after exiting.
3. Walk, don't run.
4. Use the closest exit to evacuate the building.
5. Use the stairs, not the elevators.
6. Use alternate routes if smoke or fire is observed.
7. Move as far away from the building as possible upon exiting.

FIRE EMERGENCIES AND PRECAUTIONS: WHAT TO DO

If you are in the room or area of fire involvement:

1. Remove yourself and others
2. Close the door behind you to contain the fire
3. Activate the closest fire alarm pull station and exit the building

If a fire is located anywhere in the building:

1. Activate the building fire alarm system.
2. Evacuate the building immediately by the nearest exit, using stairwells and not the elevators.
3. Move away from the building.
4. Avoid blocking emergency access.

If I am in my room when the fire alarm sounds:

1. Close windows and doors to isolate the smoke.
2. Lock room/apartment doors when leaving the building.
3. Evacuate the building immediately.
4. Avoid using the elevators.

If I am trapped in the building:

1. Remain in the room/apartment.
2. Call 911.
3. Dampen clothes or towels and place them at the base of the door to create a seal.
4. Open a window and signal for help.

FIRE SAFETY AND EDUCATION

Every semester, University Student Housing staff covers fire safety with residents of housing during the floor meetings. Staff discuss the emergency procedures and what students are supposed to do in the various types of emergencies (fire, tornado, earthquake, etc.). Emergency evacuation maps are displayed throughout the buildings and in each residence hall room to direct occupants to the appropriate exit. University Housing conducts one preplanned fire drill each semester in all on-campus student housing facilities with a centralized system. These drills are conducted in coordination with University Student Housing, the Texas Tech Fire Marshal's Office, the Texas Tech Police Department, and Lubbock Fire Rescue. Participation in fire drills is mandatory, and failure to evacuate the building during a fire alarm could result in disciplinary action through the Office of Student Conduct.

If a fire occurs in a residence hall or apartment, the Texas Tech Police Department and Lubbock Fire Rescue should be immediately notified by calling 911.

If there is evidence of a fire which has been extinguished and the person who discovered the fire is unsure of whether the police have responded, he or she should immediately notify the Texas Tech Police Department or the Texas Tech Fire Marshal's office. The staff of university Student Housing can also assist in notifying the proper authorities.

Fire Safety Equipment

Besides being an annoyance, a false fire alarm can endanger lives. Tampering with a fire alarm system or fire extinguishers, misuse or tampering with sprinkler systems and other fire safety equipment is a violation of Texas law and the Texas Tech University Student Code of Conduct. Anyone unnecessarily setting off or tampering with fire alarm systems, fire extinguishers, sprinkler systems, cameras, or any other fire/life safety equipment will be subject to judicial action, financial responsibility for damage and referral to the civil authorities for prosecution under state and federal law. Removal from the residence hall community may be considered for those responsible.

Smoke Detectors

There are active smoke detectors in every room and common areas of the residence halls. Smoke detectors should never be unplugged, removed, covered or tampered with, and residents may be charged for fixing or replacing non-operational detectors. The smoke detectors in the residence hall are hardwired to the building alarm system.

Automatic Fire Sprinkler Systems

The residence halls are all equipped with automatic sprinkler systems which will activate in the event of a fire.

Fire Alarm Pull Stations

In the event of a fire, the fire alarm pull stations can also be pulled to activate the buildings' fire alarm systems.

Kitchen Fires

There are kitchens in several of the residence halls. Fires may occur because of faulty appliances, or by something being left on a stove unattended. Another common cause of fire is grease buildup on a stove. If cooking in the kitchen, remember:

- Never leave the stove unattended.
- Keep the stove, kitchen walls and all areas near the stove free of grease.
- In the event of a stove fire, turn the stove OFF.
- DO NOT use water to extinguish a grease fire as it will scatter the flames.
 - Empty a container of salt or baking soda on the flames, or use a fire extinguisher

The following table contains detailed information about the fire statistics within each of the residence halls.
