

Areas of Concentration Selection Guide

UNIVERSITY STUDIES

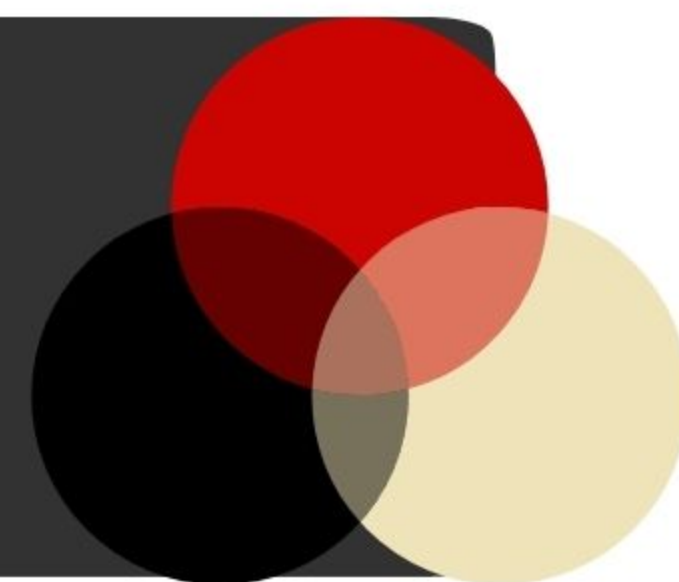

WHAT IS A CONCENTRATION?

A Bachelor of Arts or Bachelor of Science in University Studies provides a unique course of study that allows students flexibility in choosing three distinct areas of study. Each area is referred to as a “concentration”. A concentration allows a student to complete the degree with a demonstrated proficiency in an area, or areas, of focus within their major.

This degree path allows students to explore areas of learning that interest them across department and college boundaries.

1.

Pick three concentrations from the provided list.

2.

Make an appointment with your appointed University Studies advisor.

3.

Start building your degree plan!

List of Concentrations:

Note: Please see an advisor for concentration area advising procedures, availability of courses, and for completion in each area
